SBI FUNDS
MANAGEMENT LIMITED

SBI FUNDS MANAGEMENT LIMITED
(To be listed on the main board of BSE and NSE)

Our Company was originally incorporated as 'SBI Funds Management Private Limited' as a private limited company under the Companies Act, 1956, at Mumbai, Maharashtra, pursuant to a certificate of incorporation dated February 7, 1992 ("**Original COI**") issued by the Registrar of Companies, Maharashtra. Pursuant to an intimation made by our Company under Section 43A(2) of the Companies Act, 1956, our Company was converted to a public limited company and the name of our Company changed to 'SBI Funds Management Limited'. Consequently, the Original COI was amended by the Registrar of Companies, Maharashtra to reflect such change in our name w.e.f. June 30, 1992. Following the subsequent deletion of Section 43A(2) of the Companies Act, 1956, our Company was converted to a private limited company pursuant to the resolutions of our Board and our Shareholders each dated May 16, 2001, and the name of our Company was changed to 'SBI Funds Management Private Limited'. Consequently, the Original COI was amended by the Registrar of Companies, Maharashtra to reflect such change in our name w.e.f. August 24, 2001. Subsequently, our Company was converted to a public limited company and the name of our Company changed to 'SBI Funds Management Limited' pursuant to a resolution of our Board dated October 22, 2021 and our Shareholders dated November 23, 2021, and a fresh certificate of incorporation dated December 16, 2021 was issued by the Registrar of Companies, Maharashtra at Mumbai. For further details, see ***"History and Certain Corporate Matters"*** beginning on page 275 of the Red Herring Prospectus dated July 8, 2026 (the "**Red Herring Prospectus**" or "**RHP**") filed with the Registrar of Companies, Mumbai-I at Mumbai ("**RoC**").

IN MAKING AN INVESTMENT DECISION, POTENTIAL INVESTORS MUST RELY ONLY ON THE INFORMATION INCLUDED IN THE RHP READ WITH THE ABRIDGED PROSPECTUS DATED JULY 10, 2026, AND THE ADDENDUM TO THE RED HERRING PROSPECTUS AND THE ABRIDGED PROSPECTUS, EACH DATED JULY 8, 2026 ("ADDENDUM") AND THE TERMS OF THE OFFER, INCLUDING THE RISKS INVOLVED AND NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION ABOUT THE OFFER AVAILABLE IN ANY MANNER. IN RELATION TO PRICE BAND, POTENTIAL INVESTORS SHOULD ONLY REFER TO THE PRICE BAND ADVERTISEMENT FOR THE OFFER AND SHOULD NOT RELY ON ANY MEDIA ARTICLES/ REPORTS IN RELATION TO THE VALUATION OF THE COMPANY AS THESE ARE NOT ENDORSED, PUBLISHED OR CONFIRMED EITHER BY THE COMPANY OR THE BOOK RUNNING LEAD MANAGERS TO THE OFFER ("BRLMS").

In accordance with the recommendation of a committee of Independent Directors of our Company, pursuant to their resolution dated July 8, 2026, the above provided price band is justified based on quantitative factors/ key performance indicators ("KPIs") disclosed in the "Basis for Offer Price" section on page 121 of the RHP vis-a-vis the weighted average cost of acquisition ("WACA") of primary and secondary transaction(s), as applicable, as disclosed in the "Basis for Offer Price" section beginning on the page 121 of the RHP and provided below in this advertisement.

Risk to Investors
For details, refer to section titled *"Risk Factors"* on page 24 of the RHP.

1. **We are subject to extensive and evolving regulatory requirements:** The key regulatory requirements and prudential norms applicable to our Company include net worth / capital adequacy, Total Expense Ratio ("**TER**") / Base Expense Ratio ("**BER**") restrictions, investment, valuation and portfolio norms, governance and trustee oversight, risk management, compliance and SEBI inspections, cybersecurity, data protection and technology resilience, KYC, AML and investor protection. Introduction of the BER framework and reduction in TER caps under the SEBI (Mutual Funds) Regulations directly reduce our management fee and TER income. Any changes to applicable laws, regulations or guidelines, or any adverse outcome from regulatory inspections, enquiries or investigations, including penalties, enhanced supervision may lead to suspension or cancellation of our registration, or reputational damage could have a material adverse effect on our business, financial condition, results of operations and cash flows.
2. **Scheme Underperformance Risk:** A significant number of our schemes have underperformed relative to benchmarks and peer schemes in the past three years. Underperformance relative to benchmarks in any given period may be driven by various factors and may persist across multiple periods. Any sustained underperformance of a significant number or proportion of our schemes, or the persistence of underperformance of existing bottom-quartile schemes, could result in increased investor redemptions, deterioration in our QAAUM, loss of market share, and reputational damage, each of which could have a material adverse effect on our business, results of operations, financial condition and prospects. The following table sets forth the number and percentage of our schemes (by category) that were ranked in the bottom quartile of their respective categories based on three-year returns, as at the relevant dates:

Period	Total Schemes	Bottom-Quartile Equity / Equity-Oriented Schemes	% of Equity / Equity-Oriented Schemes	Bottom-Quartile Debt Schemes	% of Debt Schemes	Bottom-Quartile Schemes (All Categories)	% of Total Schemes	AUM of Bottom-Quartile Schemes (₹ billion)	% of total ranked AUM
As at March 31, 2026	128	9	33.33%	2	10.53%	11	8.59%	941.09	12.69%
As at March 31, 2025	129	4	15.38%	-	-	4	3.10%	1,001.88	14.94%
As at March 31, 2024	122	5	21.74%	1	5.56%	7	5.74%	1,861.40	35.50%

3. **Revenue and Profitability is directly linked to QAAUM which could decline due to adverse market movements, redemptions**: Any decline in our QAAUM, whether due to market depreciation, investor redemptions, or other factors, directly reduces our management fee income. Investor redemptions in response to poor scheme performance, market volatility, or changes in investor preferences could result in a significant decline in our QAAUM. Large-scale redemptions, particularly by institutional investors or high-net-worth individuals, could create a compounding effect where redemptions force schemes to sell securities at unfavourable prices, resulting in further performance deterioration and additional redemptions.

   The table below sets forth our management fees as a percentage of our total revenue from operations for Fiscal 2026, Fiscal 2025 and Fiscal 2024:

Particulars	For Fiscal 2026	For Fiscal 2025	For Fiscal 2024
Management fees (₹ million) **(A)**	42,344.92	34,377.87	26,101.82
Total revenue from operations (₹ million) **(B)**	43,894.88	35,977.57	26,905.58
Management fees as a percentage of total revenue from operations **(C=A/B)%**	96.47%	95.55%	97.01%

4. **Lower fees on Passive Investment Products:** We face risks relating to the growth of passive investment products, which typically have lower fees and could impact our actively managed QAAUM and reduce our profitability. The table below sets forth our mutual fund QAAUM from passive products (i.e., ETFs and index funds) as at March 31, 2026, March 31, 2025, and March 31, 2024:

Particulars	As at March 31, 2026	As at March 31, 2025	As at March 31, 2024
QAAUM from passive products (ETFs and Index Funds) (₹ billion) **(A)**	4,055.26	3,416.86	3,182.01
Total Mutual Fund QAAUM* (₹ billion) **(B)**	12,509.98	10,729.49	9,143.64
QAAUM from passive products as a % of total mutual fund QAAUM **(C=A/B)%**	32.42%	31.85%	34.80%

5. **Distribution Channel Dependence Risk:** We distribute our mutual fund schemes through multiple channels, including SBI's branch network and YONO banking platform, mutual fund distributors including 132,519 institutional and individual MFDs, which includes 122,460 independent financial advisors, 9,964 national distributors, and 95 banks (including SBI) as of March 31, 2026, digital channels and direct channels including our branches, website and InvesTap mobile application. Any disruption in distribution channels or deterioration in relationships with key distributors could adversely affect our ability to attract and retain investors.

   The table below provides a split of our MAAUM generated from direct and third party distribution channels as at the dates

Continued on next page...

...continued from previous page.

indicated:

Distribution Channel	As at March 31, 2026		As at March 31, 2025		As at March 31, 2024	
	MAAUM (₹ billion)	% of Total MAAUM	MAAUM (₹ billion)	% of Total MAAUM	MAAUM (₹ billion)	% of Total MAAUM
Direct	7,007.12	57.68%	5,982.42	56.33%	5,361.79	57.67%
Third Parties	5,142.20	42.32%	4,637.47	43.67%	3,935.77	42.33%
Total MAAUM	**12,149.32**	**100.00%**	**10,619.89**	**100.00%**	**9,297.56**	**100.00%**

6. **Scheme Concentration Risk:** A portion of our mutual fund QAAUM and revenue from mutual fund operations is concentrated in a limited number of schemes, and any adverse developments affecting these schemes could materially affect our business. As at March 31, 2026, our top 5 schemes by mutual fund QAAUM accounted for 42.57% of our total mutual fund QAAUM and our top 10 schemes by mutual fund QAAUM accounted for 59.47% of our mutual fund QAAUM. Any adverse developments affecting these schemes could have a disproportionate impact on our overall assets under management, revenues, and profitability.
7. **B-30 Cities Redemption Volatility Risk:** B-30 investors tend to be relatively newer to mutual fund investing and may exhibit higher redemption volatility during periods of market stress or market downturns compared to MAAUM sourced from T-30 cities; additionally, any material reduction in our B-30 MAAUM, or higher-than-anticipated redemption volatility from B-30 cities, could have an adverse effect on our business, financial condition, results of operations and cash flows. The table below sets forth geographic breakdown of our mutual fund MAAUM as at the dates specified:

Geographic Breakdown	As at March 31, 2026	As at March 31, 2025	As at March 31, 2024
Top-30 Cities mutual fund MAAUM (₹ billion)	9,376.55	8,172.80	7,285.34
% of Total mutual fund MAAUM	77.18%	76.96%	78.36%
B-30 Cities mutual fund MAAUM (₹ billion)	2,772.77	2,447.09	2,012.22
% of Total mutual fund MAAUM	22.82%	23.04%	21.64%
B-30 Equity mutual fund MAAUM (₹ billion)	1,558.17	1,390.08	1,024.78

8. We do not own 'SBI' trademark or the "SBI FUNDS MANAGEMENT LIMITED" logo, and termination of the SBI Trademark License Agreement with State Bank of India or any inability to use the "SBI" name or the "SBI FUNDS MANAGEMENT LIMITED" logo may materially and adversely affect our business, prospects, financial condition, and results of operations.

   The table below sets forth details of our expenses in relation to royalty to SBI for logo as a percentage of total expenses for Fiscal 2026, Fiscal 2025 and Fiscal 2024:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Royalty expenses for logo (₹ in million) **(A)**	506.32	412.59	266.24
Total expenses (₹ in million) **(B)**	9,706.16	8,718.13	7,524.57
Royalty expenses for logo as a percentage of total expenses **(C=A/B)%**	5.22%	4.73%	3.54%

9. A significant component of our PMS business has historically been derived from our mandate to manage a portion of a statutory provident fund institution in India's corpus, where we have served as a portfolio manager since the inception of its equity investment program. As at March 31, 2026, we held a 49.9% market share of this institution's equity corpus under management *(Source: CRISIL Report)* reflecting the depth of our institutional track record. This fund in India is currently undertaking a comprehensive update of its investment management structure, including appointment of new portfolio managers and asset management companies across its fixed income and exchange traded fund mandates. As part of this process, we have received a reallocation notice under our fixed income mandate, which may result, for the time being, in a material reduction of assets under management in our discretionary PMS business. Any such reallocation may also impact assets under management and mutual fund market share.
10. **Offer related risk:** The Offer is by way of an Offer for Sale of up to 170,956,631 Equity Shares of face value of ₹1 each aggregating up to ₹ [●] million by State Bank of India and Amundi India Holding, who are also our Promoters and who shall be entitled to the entire proceeds from the Offer (net of its portion of the Offer-related expenses) and the Company will not receive any proceeds from the Offer.
11. The Price/Earnings Ratio based on diluted EPS for Financial Year 2026 for the Company at the upper end of the price band is 38.16. The composite Industry peer group Price / Earnings ratio is 41.64.
12. **Weighted Average Return on Net Worth for Financial Years ended 2026, 2025 and 2024 is 38.77.**
13. **The average cost of acquisition of Equity Shares for Promoter Selling Shareholders ranges from ₹0.15 per Equity Share to ₹4.35 per Equity Share.**
14. **Weighted average cost of acquisition of Equity Shares of the Promoters (including the Promoter Selling Shareholders):**

Name	Number of Equity Shares of face value of ₹1 each on a fully diluted basis	Weighted average cost of acquisition ("WACA") of Equity Shares of face value of ₹ 1 each	WACA of Equity Shares face value of ₹1 each (in ₹ per Equity Share) acquired in last one year*	WACA of Equity Shares face value of ₹1 each (in ₹ per Equity Share) acquired in last three years*

#SBI Capital Markets Limited ("SBICAPS") is an associate of our Company and State Bank of India, one of the Promoter Selling Shareholders, in terms of the SEBI Merchant Bankers Regulations. Accordingly, in compliance with the proviso to Regulation 21A of the SEBI Merchant Bankers Regulations and Regulation 23(3) of the SEBI ICDR Regulations, SBICAPS would be involved only in the marketing of the Offer. SBICAPS has signed the due diligence certificate and has been disclosed as a BRLM.

Additional Information for Investors

With reference to the Red Herring Prospectus and the abridged prospectus to the Red Herring Prospectus ("**Abridged Prospectus**"), each dated July 8, 2026, filed by SBI Funds Management Limited ("**Company**") with the RoC, SEBI and the Stock Exchanges, as applicable, investors may note the following:

1. Two of our Promoters, namely State Bank of India and Amundi India Holding, who are also the Promoter Selling Shareholders, have, pursuant to separate share purchase agreements entered into with each of the transferees set out in the table below, each dated July 9, 2026, transferred an aggregate of 32,752,608 Equity Shares having face value of ₹1 each ("**Sale Shares**"), representing 1.60% of the pre-Offer paid-up Equity Share capital of our Company on a fully diluted basis, to such transferees. The Sale Shares were transferred post the filing of the Red Herring Prospectus and Abridged Prospectus (such transfers, the "**Transfers**"), and the particulars of the Transfers are set out below:

[(1)] UPI mandate end time and date shall be at 5.00 pm on Bid/Offer Closing Date, i.e. Thursday, July 16, 2026.

**In case of (i) any delay in unblocking of amounts in the ASBA Accounts (including amounts blocked through the UPI Mechanism) exceeding two Working Days from the Bid/Offer Closing Date for cancelled/ withdrawn/ deleted ASBA Forms, the Bidder shall be compensated at a uniform rate of ₹ 100 per day or 15% per annum of the Bid Amount, whichever is higher from the date on which the request for cancellation/ withdrawal/ deletion is placed in the Stock Exchanges bidding platform until the date on which the amounts are unblocked (ii) any blocking of multiple amounts for the same ASBA Form (for amounts blocked through the UPI Mechanism), the Bidder shall be compensated at a uniform rate ₹ 100 per day or 15% per annum of the total cumulative blocked amount except the original application amount, whichever is higher from the date on which such multiple amounts were blocked till the date of actual unblock; (iii) any blocking of amounts more than the Bid Amount, the Bidder shall be compensated at a uniform rate of ₹ 100 per day or 15% per annum of the difference in amount, whichever is higher from the date on which such excess amounts were blocked till the date of actual unblock; (iv) any delay in unblocking of non-allotted/ partially allotted Bids, exceeding two Working Days from the Bid/Offer Closing Date, the Bidder shall be compensated at a uniform rate of ₹ 100 per day or 15% per annum of the Bid Amount, whichever is higher for the entire duration of delay exceeding two Working Days from the Bid/Offer Closing Date by the SCSB responsible for causing such delay in unblocking. The BRLMs shall, in their sole discretion, identify and fix the liability on such intermediary or entity responsible for such delay in unblocking. The Bidders shall be compensated in the manner specified in the SEBI ICDR Master Circular, which for the avoidance of doubt, shall be deemed to be incorporated in the deemed agreement of the Company with the SCSBs, to the extent applicable, issued by SEBI, and any other applicable law in case of delays in resolving investor grievances in relation to blocking/unblocking of funds. The processing fees for applications made by the UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI ICDR Master Circular, which has also prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹ 0.50 million, shall use UPI. RIBs, Eligible SBIFM Employees and Eligible SBI Employees Bidding under Employee Reservation Portion for up to ₹ 0.50 million (net of Employee Discount, if any), Eligible SBI Shareholders Bidding under SBI Shareholder Reservation Portion for up to ₹ 0.50 million and individual investors Bidding under the Non-Institutional Portion Bidding for more than ₹ 0.20 million and up to ₹ 0.50 million, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.*

ASBA* | **Simple, Safe, Smart way of Application!!!**

*Applications Supported by Blocked Amount ("**ASBA**") is a better way of applying to offers by simply blocking the fund in the bank account.

For further details, check section on ASBA.

Mandatory in public issues.
No cheque will be accepted.

UPI — UNIFIED PAYMENTS INTERFACE

UPI-Now available in ASBA for Retail Individual Investors and Non Institutional Investor applying in public issues where the application amount is up to ₹ 500,000, applying through Registered Brokers, Syndicate, CDPs & RTAs. UPI Bidders also have the option to submit the application directly to the ASBA Bank (SCSBs) or to use the facility of linked online trading, demat and bank account. Investors are required to ensure that the bank account used for bidding is linked to their PAN. Bidders must ensure that their PAN is linked with Aadhaar and are in compliance with CBDT notification dated February 13, 2020 issued by the Central Board of Direct Taxes and the subsequent press releases, including press release dated June 25, 2021 read with press release dated September 17, 2021, and CBDT circular no. 7 of 2022 dated March 30, 2022, read with press release dated March 28, 2023, and any subsequent press release in this regard.

*ASBA has to be availed by all the investors except Anchor Investors. UPI may be availed by (i) Retail Individual Investors in the Retail Category; (ii) Eligible SBIFM Employees and Eligible SBI Employees in the Employee Reservation Portion (net of Employee Discount, if any); (iii) Eligible SBI Shareholders Bidding in the SBI Shareholder Reservation Portion with an application size of up to ₹ 0.50 million; and (iv) Non-Institutional Investors with an application size of up to ₹ 500,000 in the Non-Institutional Portion. For details on the ASBA and UPI process, please refer to the details given in the Bid Cum Application Form and Abridged Prospectus and also please refer to the section **"Offer Procedure"** on page 501 of the RHP. The process is also available on the website of Association of Investment Bankers of India ("**AIBI**") and Stock Exchanges and in the General Information Document. The Bid Cum Application Form and the Abridged Prospectus can be downloaded from the websites of the Stock Exchanges and can be obtained from the list of banks that is displayed on the website of SEBI at www.sebi.gov.in/sebiweb/other/OtherAction.do?do RecognisedFpi=yes&intmId=35 and https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes &intmId=43, respectively as updated from time to time. For the list of UPI apps and banks live on IPO, please refer to the link: www.sebi.gov.in. UPI Bidders Bidding using the UPI Mechanism may apply through the SCSBs and mobile applications whose names appear on the website of SEBI, as updated from time to time. ICICI Bank Limited, State Bank of India and Kotak Mahindra Bank Limited have been appointed as the Sponsor Banks for the Offer, in accordance with the requirements of SEBI circular dated November 1, 2018 as amended. For Offer related queries, please contact the BRLMs on their respective email IDs as mentioned below. For UPI related queries, investors can contact NPCI at the toll free number: 18001201740 and mail Id: ipo.upi@npci.org.in.*

THE EQUITY SHARES OF THE COMPANY WILL GET LISTED ON THE MAIN BOARD PLATFORMS OF BSE AND NSE.

In case of any revision in the Price Band, the Bid/Offer Period will be extended by at least three additional Working Days after such revision in the Price Band, subject to the Bid/Offer Period not exceeding 10 Working Days. In cases of force majeure, banking strike or similar unforeseen circumstances, the Company in consultation with the BRLMs, may for reasons to be recorded in writing, extend the Bid/Offer Period for a minimum of one Working Day, subject to the Bid/Offer Period not exceeding 10 Working Days. Any revision in the Price Band and the revised Bid/Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges, by issuing a public notice, and also by indicating the change on the respective websites of the BRLMs and at the terminals of the Syndicate Members and intimation to SCSBs (as defined hereinafter), Designated Intermediaries (as defined hereinafter) and the Sponsor Banks (as defined hereinafter) as applicable.

This is an Offer in terms of Rule 19(2)(b) of the SCRR read with Regulation 31 of the SEBI ICDR Regulations. This Offer is being made through the Book Building Process in compliance with Regulation 6(1) of the SEBI ICDR Regulations wherein not more than 50% of the Net Offer shall be available for allocation on a proportionate basis to QIBs (such portion the **"QIB Portion"**) provided that the Company, in consultation with the BRLMs, may allocate up to 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations (**"Anchor Investor Portion"**), of which 40% shall be reserved as under: (i) 33.33% for domestic Mutual Funds; and (ii) 6.67% shall be reserved for Life Insurance Companies and Pension Funds, subject to valid Bids being received from domestic Mutual Funds, Life Insurance Companies and Pension Funds at or above the price at which Equity Shares will be allocated to the Anchor Investors (**"Anchor Investor Allocation Price"**), in accordance with the SEBI ICDR Regulations. Any under-subscription in the reserved category specified in clause (ii) above, may be allocated to domestic Mutual Funds. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the QIB Portion (excluding the Anchor Investor Portion) (**"Net QIB Portion"**). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIBs (other than Anchor Investors) including Mutual Funds, subject to valid Bids being received at or above the Offer Price. However, if the aggregate demand from Mutual Funds is less than 5% of the Net QIB Portion, the balance Equity Shares available for allocation in the Mutual Fund Portion will be added to the remaining QIB Portion for proportionate allocation to QIBs. Further, not less than 15% of the Net Offer shall be available for allocation to NIBs of which (a) one third portion shall be reserved for NIBs with application size of more than ₹ 0.20 million and up to ₹ 1.00 million; and (b) two-thirds of the portion shall be reserved for NIBs with application size of more than ₹ 1.00 million, provided that the unsubscribed portion in either of such sub-categories may be allocated to Bidders in the other sub-category of NIBs in accordance with SEBI ICDR Regulations, subject to valid Bids being received at or above the Offer Price and not less than 35% of the Net Offer shall be available for allocation to RIBs in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. Further, Equity Shares will be allocated on a proportionate basis to (i) Eligible SBIFM Employees and Eligible SBI Employees Bidding under the Employee Reservation Portion, subject to valid Bids being received from them at or above the Offer Price (net of Employee Discount, if any); and (iii) Eligible SBI Shareholders Bidding in the SBI Shareholder Reservation Portion subject to valid Bids having been received at or above the Offer Price. All potential Bidders (except Anchor Investors) are required to mandatorily utilise the Application Supported by Blocked Amount ("ASBA") process by providing details of their respective ASBA accounts and UPI ID (in case of UPI Bidders using the UPI Mechanism (as defined hereinafter)), in which case the corresponding Bid Amounts will be blocked by the SCSBs or under the UPI Mechanism, as applicable to participate in the Offer. Anchor Investors are not permitted to participate in the Anchor Investor Portion of the Offer through the ASBA process. For details, see ***"Offer Procedure"*** beginning on page 501 of the RHP.

Bidders/Applicants should ensure that DP ID, PAN and the Client ID and UPI ID (for UPI Bidders bidding through UPI Mechanism) are correctly filled in the Bid cum Application Form. The DP ID, PAN and Client ID provided in the Bid cum Application Form should match with the DP ID, PAN, Client ID and UPI ID available (for UPI Bidders bidding through the UPI Mechanism) in the Depository database, otherwise, the Bid cum Application Form is liable to be rejected. Bidders/ Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPI ID (for UPI Bidders bidding through the UPI mechanism) as provided in the Bid cum Application Form, the Bidder/Applicant may be deemed to have authorized the Depositories to provide to the Registrar to the Offer, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These Demographic Details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders/Applicants' sole risk.

Contents of the Memorandum of Association of the Company as regards its Objects: For information on the main objects of the Company, please see ***"History and Certain Corporate Matters"*** on page 275 of the RHP. The Memorandum of Association of the Company is a material document for inspection in relation to the Offer. For further details, see ***"Material Contracts and Documents for Inspection"*** on page 548 of the RHP.

Liability of the Members of the Company: Limited by shares.

Amount of Share Capital of the Company and Capital Structure: As on the date of the RHP, the authorised share capital of the Company is ₹2,100,000,000 Equity Shares divided into 2,100,000,000 Equity Shares of face value of ₹1 each. The issued, subscribed and paid-up pre-Offer Equity Share capital of the Company is ₹2,036,827,612 divided into 2,036,827,612 Equity Shares of face value of ₹1 each. For details of the capital structure of the Company, see ***"Capital Structure"*** beginning on page 98 of the RHP.

Names of the Signatories to the Memorandum of Association of the Company and the number of equity shares subscribed by them: The signatories of the Memorandum of Association of the Company are as follows: subscription of one Equity Share each by Dipankar Basu and Ramanathan Viswanathan. For details of the share capital history of the Company please see ***"Capital Structure"*** beginning on page 98 of the RHP.

Listing: The Equity Shares that will be offered through the Red Herring Prospectus are proposed to be listed on the Stock Exchanges. The Company has received 'in-principle' approvals from BSE and NSE for the listing of the Equity Shares pursuant to their letters each dated May 7, 2026. For the purposes of the Offer, the Designated Stock Exchange shall be NSE. A signed copy of the Red Herring Prospectus and the Prospectus shall be delivered to the RoC in accordance with Sections 26(4) and 32 of the Companies Act, 2013. For details of the material contracts and documents available for inspection from the date of the Red Herring Prospectus till the Bid/Offer Closing Date, see ***"Material Contracts and Documents for Inspection"*** on page 548 of the RHP.

Disclaimer Clause of Securities and Exchange Board of India: SEBI only gives its observations on the offer documents and this does not constitute approval of either the Offer or the specified securities stated in the Offer Documents. The investors are advised to refer to page 451 of the RHP for the full text of the disclaimer clause of SEBI.

Disclaimer Clause of NSE (the Designated Stock Exchange) : It is to be distinctly understood that the permission given by NSE should not in any way be deemed or construed that the Offer Document has been cleared or approved by NSE nor does it certify the correctness or completeness of any of the contents of the Offer Document. The investors are advised to refer to page 460 of the RHP for the full text of the disclaimer clause of NSE.

Disclaimer Clause of BSE : It is to be distinctly understood that the permission given by BSE Limited should not in any way be deemed or construed that the RHP has been cleared or approved by BSE Limited nor does it certify the correctness or completeness of any of the contents of the RHP. The investors are advised to refer to the page 460 of the RHP for the full text of the disclaimer clause of BSE.

General Risks: Investments in equity and equity-related securities involve a degree of risk and investors should not invest any funds in the Offer unless they can afford to take the risk of losing their entire investment. Bidders are advised to read the risk factors carefully before taking an investment decision in the Offer. For taking an investment decision, investors must rely on their own examination of the Company and the Offer, including the risks involved. The Equity Shares in the Offer have not been recommended or approved by SEBI, nor does SEBI guarantee the accuracy or adequacy of the contents of the Red Herring Prospectus. Specific attention of the investors is invited to ***"Risk Factors"*** beginning on page 24 of the RHP.

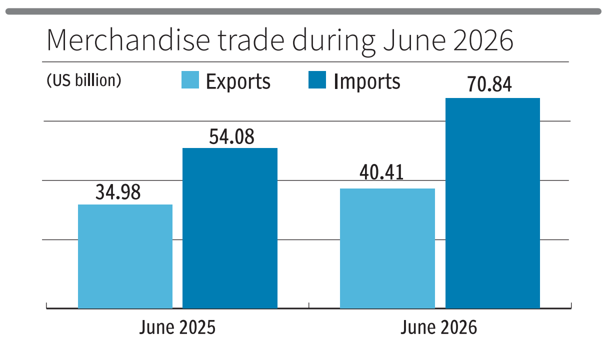
June goods exports up 15.5% led by electronics

IMBALANCE. Import surge pushes trade deficit to 5-month high

Amiti Sen
New Delhi



Goods exports increased 15.5 per cent year-on-year in June to $40.41 billion, driven by sustained shipments across key sectors, but the trade deficit widened to a five-month high of $30.43 billion as imports surged 31 per cent to $70.84 billion during the month.

"India has been on a positive trajectory. Our exports have been going up.... The trade deficit is mainly from sectors, including petroleum products, electronics and gold (gems and jewellery) where our net trade balance is down," Commerce Secretary Rajesh Agrawal explained at a media briefing on Monday to share the trade numbers for June and the first quarter of FY27.

IMPORT OF CRUDE

Crude oil imports increased 40 per cent to $19.32 billion in June, while electronic goods imports jumped 58.77 per cent to $13.36 billion, per the quick estimates released by the government. Other products whose imports increased substantially during the month include fertilizers, gold, non-ferrous metals and chemicals.

Agrawal noted that export growth in June was driven by electronics, rice, iron ore, handicrafts, meat and dairy products and marine products. Engineering goods exports also performed well, rising 20.74 per cent in June, to $11.47 billion. "Some of the key factors that have contributed to the double-digit growth in exports include free trade pacts with key partner countries, exporters' product and market diversification strategy, and the rising competitiveness of Brand India products," said Pankaj Chadha, Chairman, EEPC India.

> **In the first quarter (April-June) of the current fiscal,** exports increased 15.92 per cent to $129.32 billion, while imports rose 19.89 per cent to $216.18 billion

ROBUST Q1

In the first quarter (April-June) of the current fiscal, exports increased 15.92 per cent to $129.32 billion, while imports rose 19.89 per cent to $216.18 billion. Merchandise trade deficit in April-June 2026-27 was $86.86 billion, compared to $68.75 billion in the same period last year.

"On quarterly basis, this is the highest we have achieved so far [in goods exports]," said Agrawal. India's exports posted high growth, mainly to countries such as South Africa, Singapore, China, Oman and Malaysia, per the Commerce Department.

W. ASIA CONFLICT

While India's exports to West Asia declined significantly in April due to the conflict in the region, they evened out by June, posting 7.29 per cent year-on-year growth to $5 billion, said Agrawal. "Recovery has started. We went down in March. We improved in April. We caught up around May and in June, we are evened out... Whatever challenges we faced in March, April and May have evened out," he said.

India's exports to the US, its largest export destination, declined 1.21 per cent to $8.17 billion in June, while imports grew 33.86 per cent year-on-year to $5.5 billion, according to government data.

Happiest Minds stock rally reignites stake sale talk; mid-tier IT sector in consolidation phase

Sanjana B
Bengaluru

Shares of Happiest Minds rallied after reports suggested that Founder Ashok Soota was in talks to sell a part of his promoter stake, reviving speculation that first emerged earlier this year.

Happiest Minds' shares surged 21.35 per cent to close at ₹407.60 on Monday, while the Nifty IT index gained 3.59 per cent to end at 29,015.85.

NEW OPPORTUNITIES

A company statement to the exchanges said that as part of its business strategy, it keeps exploring various strategic opportunities intended to be in the best interest of its stakeholders.

Happiest Minds also declined to comment on media reports, noting that its shares are freely traded on stock exchanges. The company added that it has disclosed, and will continue to disclose, all material events in compliance with SEBI's listing regulations as and when required.

Tushar Badjate, Director of Badjate Stock and Shares, explained that interest from global private equity firms and strategic buyers suggests the market is beginning to place a premium on scale, execution speed and specialised digital capabilities across the mid-tier IT sector.

MID-SIZE DILEMMA

"Clients no longer view AI as a separate technology programme. They want it embedded across operations, customer engagement and decision-making. Mid-size IT firms understand this opportunity, but building the required talent, IP and global distribution demands capital," said Badjate.

"Happiest Minds' improved growth outlook, supported by its AI strategy, indicates that this may not be a distressed transaction, but a recognition that the next leg of growth may require a larger platform. More mid-tier IT promoters may confront the same trade-off as AI raises the cost of remaining competitive," he added.

MATURING PHASE

Pareekh Jain, Founder and CEO, EIIR Trend, observed that as the IT services industry is entering a more mature phase, winning new deals has become more challenging. As a result, companies are increasingly looking at acquisitions to gain capabilities like access to new clients, geographies, industries and service offerings.

"Earlier, these companies commanded higher valuations, but uncertainty has led to a significant correction. Private equity firms were previously active in acquiring smaller IT services companies. However, they have shifted their focus towards AI companies, resulting in a further decline in valuations. This has left IT service providers as primary acquirers of such firms," he said.

Over the past three-four months, cash-rich IT service providers with growth ambitions have become more aggressive in pursuing acquisitions, resulting in deals such as Coforge-Encora and Persistent-Nagarro.

Many acquisition targets currently in the market are smaller firms with annual revenues of less than $500 million.

India, US fully engaged in balanced trade deal: Goyal

Amiti Sen
New Delhi

> Both sides are committed to a deal that is commercially meaningful, delivers tangible benefits for businesses
>
> **PIYUSH GOYAL**
> Commerce Minister

Negotiating teams from India and the US are fully engaged in achieving the objective of reaching a balanced and commercially meaningful bilateral trade agreement, said Commerce Minister Piyush Goyal. "I had fantastic meetings with US Trade Representative Jamieson Greer when he visited Delhi in June," the Minister posted on social media platform 'X', underlining that things were moving smoothly while dismissing some reports suggesting otherwise.

The Minister said both sides remained committed to an agreement that is balanced, commercially meaningful and delivers tangible benefits for businesses, farmers, workers and consumers in both countries. "Our teams remain fully engaged in achieving this objective," he said.

ADVANTAGE INDIA

Reinforcing the Minister's view, Commerce Secretary Rajesh Agrawal said that the framework deal was ready, and it would be signed at the right time once the preferential market issue, giving India a comparative advantage over competitors, was structured.

"The framework deal is ready. Whenever it is the right time, it will be signed. My Minister has also said in public very clearly we are ready to sign, we are just waiting... because deals are about comparative advantage. If you do a deal, you get preferential market access in India. India gets preferential market access in there, isn't it? That is also an essential part of any trade deal..," Agrawal told reporters on Monday.

He added that it was something that was getting structured.

"Whenever it is ready, things will be signed. But we are on the same page, our understanding is same... and we are progressing well. We don't see any dissension, we don't see any challenge around it," said Agrawal.

India and the US had announced a framework deal in early February, under which tariffs on Indian exports would fall from 50 per cent to 18 per cent. But before it could be signed, the US Supreme Court ruled that the IEEPA did not empower the President to impose reciprocal and penal tariffs, forcing Washington to fall back on Section 122 duties (a uniform 10 per cent on all countries) set to lapse on July 24.

FORCED LABOUR

Since then, the USTR has pursued Section 301 investigations into forced labour and excess capacity across dozens of economies, including India, potentially pushing duties on Indian goods well above the negotiated 18 per cent.

Supreme Court upholds SEBI action against Kotak AMC in Essel fixed maturity plan case

Akshata Gorde
Mumbai

The Supreme Court on Monday upheld the Securities and Exchange Board of India's (SEBI) findings and penalties against Kotak Mahindra Asset Management Company, its MD Nilesh Shah and other senior officials in the Essel Group fixed maturity plan (FMP) case.

LITIGATION COSTS

Dismissing appeals filed by Kotak AMC, Kotak Trustee and six senior executives, the court upheld SEBI's findings that the fund house had failed to exercise due diligence, extended the maturity of debt securities beyond the tenure of the schemes without following regulations and had not made timely disclosures to investors and the regulator.

The court also imposed litigation costs of ₹30 lakh on Kotak AMC and ₹20 lakh on Kotak Trustee, in addition to upholding the monetary penalties earlier imposed by SEBI.

"The 1996 Regulations make no distinction between a breach resulting in profit and a violation resulting in loss. Neither do we," said the court.

"Market integrity being the paramount consideration, profit or loss to investors is immaterial to determine whether a regulatory infraction has occurred," a Bench of Justices Dipankar Datta and Satish Chandra Sharma concluded with a warning to the industry: "Mandate first, gains later; SEBI compliance, never falter."

KC Jacob, Partner at Economic Laws Practice, said: "The judgment is likely to strengthen governance standards across the mutual fund industry. It provides clarity on the role of trustee companies and their senior executives, reinforcing that effective compliance and independent fiduciary oversight are integral to maintaining investor confidence and the integrity of the capital markets."

THE DISPUTE

The dispute arose from investments made by six closed-ended Kotak Mutual Fund FMPs in zero-coupon non-convertible debentures issued by Essel Group entities Konti Infrapower & Multiventures and Edison Utility Works. The ₹266 crore investments were backed by pledged shares of Zee Entertainment Enterprises.

After the value of the pledged shares fell sharply in early 2019, Kotak AMC chose to restructure the debt, instead of invoking the pledged shares. As a result, portions of the FMPs were redeemed after their scheduled maturity dates. SEBI held that the fund house had effectively altered the maturity of the schemes without obtaining unit holder consent or complying with the regulatory framework governing rollovers.

"The manner in which the appellants have conducted themselves throughout, while keeping the unit holders, SEBI and us in the dark, meets our stern disapproval," said the order.

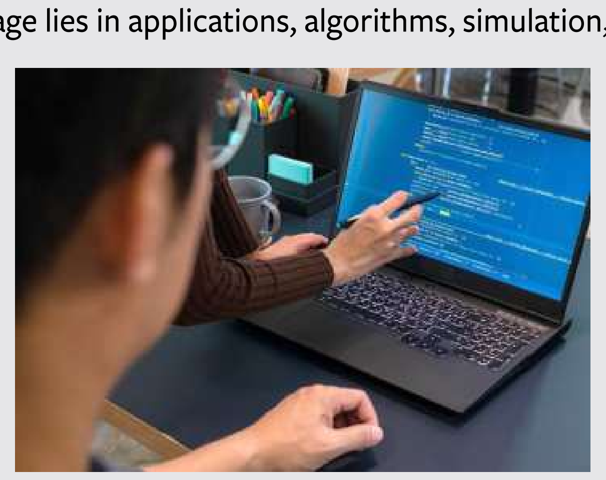
PERILOUS PASSAGE

NATURE'S FURY. A woman leads livestock to safety due to flooding caused by the rising levels of Brahmaputra river in Assam's Morigaon district on Monday. The latest spell of rain followed intense showers over the weekend. The India Meteorological Department has forecast heavy rain for the next 2-3 days PTI

India's first quantum winners are selling software, not computers

The nation's advantage lies in applications, algorithms, simulation, orchestration and quantum cloud services

Aishwarya Kumar
Bengaluru



THE WAY FORWARD. Customers are buying faster engineering simulations and optimisation software today while keeping the pathway open for future quantum hardware

India's first quantum success stories are being written without quantum computers.

Instead, start-ups are winning global customers with quantum-inspired software, algorithms and cybersecurity, signalling that the country's biggest commercial opportunity may lie above the hardware layer.

Bengaluru-based BQP (formerly BosonQ Psi), for instance, already serves more than 20 global aerospace, automotive and energy OEMs without selling a single quantum computer.

The company says customers are buying faster engineering simulations and optimisation software today while keeping the pathway open for future quantum hardware.

"The ecosystem's focus remains heavily skewed towards hardware development, whereas software, algorithms and applications will be the critical near-term drivers of the quantum economy," said Abhishek Chopra, Founder and CEO, BQP.

BEYOND START-UPS

However, India's commercial opportunity extends beyond start-ups. According to Kalyan Mangalapalli, Emerging Tech Consulting, Nasscom, India's strengths lie in software, algorithms, cryptography and application development, while the country is likely to remain dependent on imports for the physical layer, including quantum processors, cryogenic systems, photonics and specialised RF components.

"India's advantage sits in the upper and middle layers of the value chain — applications, algorithms, simulation, compilers, orchestration and quantum cloud services," he said, adding that post-quantum cryptography offers the most practical commercial pathway because it upgrades existing digital infrastructure, instead of requiring new quantum hardware.

Biju Mathews, Partner and Head of NextLabs at Mphasis, echoed this view, saying India's immediate opportunity lies in optimisation and software-led applications, rather than hardware.

"India, *per se*, could play from an optimisation perspective," he said, adding that while opportunities also exist in machine learning and other quantum applications, software remains the country's most natural commercial entry point.

Even hardware-focused start-ups are increasingly building software-led revenue streams. QpiAI, which has raised $42 million to date, expects to close the current fiscal with $8-10 million in revenue, backed by an order book of about $5 million for quantum computers.

Founder and CEO Nagendra Nagaraja said while software revenues are currently driven by proof-of-concept projects, recurring revenues are expected to increasingly come from Quantum Computing-as-a-Service (QCaaS) and software licensing as enterprise deployments mature.

He expects enterprise deal sizes, currently around $1-2 million, to rise substantially as customers begin integrating larger quantum systems into production workflows. Despite the optimism, industry executives say India's biggest challenge is no longer research funding but commercial demand.

Chopra noted that domestic enterprises continue to rely largely on pilot projects and proof-of-concept engagements, while meaningful recurring revenues are emerging from overseas markets.

Large NBFCs aim to grow gold loan book through acquisitions

K Ram Kumar
Mumbai

Robust growth in gold loans seems to be whetting the appetite of large non-banking financial companies (NBFCs) to either acquire smaller companies specialising in this line of business or buy out gold loan business from smaller but diversified NBFCs. This is underscored by Tata Capital Ltd's (TCL) Monday announcement that it will acquire 88.6 per cent stake in Thrissur-based Yogakshemam Loans Ltd (Yogloans) at a pre-money equity valuation not exceeding ₹318 crore. This will also include primary infusion of about ₹93 crore for growth.

In June 2025, L&T Finance Ltd (LTF) announced completion of the transfer of the gold loan business of Paul Merchants Finance Private Ltd (PMFL), a wholly owned subsidiary of Paul Merchants Ltd, to LTF for a total consideration of ₹711 crore by way of slump sale on a going concern basis.

Sanjay Agarwal, Senior Director, CareEdge Rating, said: "Larger NBFCs are looking for newer avenues of growth. All top NBFCs announced plans to get into the gold loan business in the last two-three years. Gold loan is seen as a very secure asset class by lenders. While the product operates at a higher opex, the yields are good enough to compensate this. So, the profitability is good."

NBFCs are notching up strong growth in gold loans (loans against gold jewellery). As of May-end 2026, their gold loan portfolio surged 69.9 per cent year-on-year (y-o-y) against 38.9 per cent y-o-y as of May-end 2025.

Gold loans have gathered steam on the back of jump in gold prices and NBFCs' own push towards secured borrowing. Agarwal observed that gold loan lenders are also doing a public good by serving those who otherwise don't have access to funding or would have tapped money lenders. "It's a high growth product. It's a product with a large industry size and growing. In India, the potential for growth is probably multiple times of what it is right now," he said.

COLLATERAL VALUE

HDFC Securities, in a report, said gold loans had a massive addressable market in terms of collateral value of household gold holdings (currently at 10 per cent penetration).

"Gold loan has been one of the key profit pools for NBFCs. Banks' gold loan portfolio largely comprises ETB (existing to bank) customers skewed towards higher ticket sizes and moderate yields (9-11 per cent). NBFCs' portfolio is skewed towards customers with lower ticket sizes (average customer exposure of ₹1-1.5 lakh) and significant pricing power (yields higher by 700-800 basis points vs banks)," said HDFC Securities research analysts Krishnan ASV, Deepak Shinde, Ayush Pandit and Samarth Desai.

However, high operational intensity and increasing competitive intensity are likely to drive longer break-even periods for new players.

FM asks banks to step up NRI outreach to boost forex inflows

DIASPORA DRIVE. Lenders report strong response to FCNR(B) deposit push, expect ECBs to rise

Shishir Sinha
New Delhi

Finance Minister Nirmala Sitharaman on Monday urged public sector banks (PSBs) to step up their outreach to Non-Resident Indians (NRIs) to sustain the momentum in foreign currency inflows, even as lenders said fundraising through external commercial borrowings (ECBs) is expected to gather pace in the October-December quarter.

Sitharaman chaired a meeting of Managing Directors and Chief Executive Officers of PSBs and public financial institutions (PFIs) to review progress under the Foreign Currency Non-Resident (Bank) [FCNR(B)] deposit, ECB and overseas foreign currency borrowing (OFCB) swap schemes.

While the government has not announced an official mobilisation target, the measures are expected to attract up to $50 billion.

"The Finance Minister appreciated the encouraging initial response and called on banks to intensify outreach

NRI PUSH. Finance Minister Nirmala Sitharaman chairing a review meeting of public sector banks in New Delhi on Monday ANI

to the NRIs, introduce innovative deposit products and sustain the mobilisation momentum during the remaining period of the schemes," the Finance Ministry said in a statement.

FCNR(B) deposits can be mobilised under the scheme until September 30, while the window for ECBs and OFCBs remains open until December 31.

HEALTHY RESPONSE

The Ministry said that the schemes had drawn encouraging interest from the Indian diaspora, with healthy participation across FCNR (B) deposits, ECBs and OFCBs.

Bank chiefs told the Finance Minister they were offering attractive returns on FCNR(B) deposits, including five-year tenures, helped by the suspension of the interest rate ceiling on fresh FCNR(B) deposits.

Banks reported strong interest from NRIs in Singapore, Hong Kong, West Asia, the United Kingdom, the US and other overseas markets.

They said targeted outreach through digital channels and customised engagement strategies had helped accelerate deposit mobilisation.

LEVERAGING GIFT CITY

Lenders also informed during the meeting that international banking units (IBUs) at GIFT City were being used to mobilise funds from multiple jurisdictions. Sitharaman urged banks to make full use of the financial and institutional infrastructure available at GIFT City, the Ministry said.

The bank chiefs outlined plans to build on the positive response and accelerate deposit mobilisation during the remaining tenure of the schemes. They also expressed the confidence that ECB mobilisation would gain stronger traction in the third quarter of the current financial year. During the meeting,

RBI Deputy Governor Swaminathan J assured participants that the central bank would continue to support banks and financial institutions in mobilising deposits and facilitating eligible overseas borrowings.

Driven by a surge in precious metals and food prices, retail inflation based on the Consumer Price Index (CPI) rose to 4.4 per cent in June from 3.9 per cent in May, the government reported on Monday. This is the first time since January 2025 that headline inflation has crossed the RBI's target of 4 per cent mark.

The June print is the highest reading under the new 2024-base CPI series introduced in January. Analysts said the trajectory of retail inflation will hinge on the progress of the monsoon, global geopolitical uncertainties, and their compounding pressure on crude oil and the rupee.

While the Monetary Policy Committee (MPC) is expected to hold rates steady in August, a rate hike remains on the cards for the second half of the fiscal year.

"June numbers underline three key developments — first, the full impact of crude prices pass-through after petrol and diesel prices were hiked from mid-May; second, the continued upward trajectory of food prices due to rain shortfall; and third, household mixed discretionary spending," said Megha Arora, Director, India Ratings & Research (Ind-Ra).

PRICEY FOOD

India Inc has urged policy intervention to rein in food prices following the latest inflation data. PHDCCI President Rajeev Juneja noted that although the headline inflation remains within the Reserve Bank of India's comfort zone, the June spike was driven by costlier food items. He cautioned that persistent food price pressures warrant sustained policy attention.

The general expectation is that the headline number will edge up but remain range-bound. "Over the next two quarters, inflation is likely to remain range-bound at 4-4.5 per cent, with food as the key swing factor amid uneven monsoon progress and El Nino-linked rainfall variability. Upside risks stem from a rebound in crude prices and sustained bullion strength, while a favourable monsoon could ease food prices and support continued RBI accommodation," said Rajeev Sharan, Head of Research, Brickwork Ratings.

"Given the evolving inflation dynamics, we expect the MPC to remain watchful and adopt a data-dependent approach before taking any further policy action," said Sujan Hajra, Chief Economist at Anand Rathi Wealth.

Aditi Nayar, Chief Economist at ICRA, said while the sharp correction in crude oil prices has lowered the probability of an immediate rate hike, renewed tensions in West Asia call for caution.

HCLTech to invest ₹3,500 crore in new AI data centres; company's Q1 net up 20%

S Ronendra Singh
New Delhi

Q1 Scorecard (₹ cr)

	Q1 FY27	Q1 FY26	% Change
Net profit	4,624	3,843	20.32
Revenue	34,579	30,349	14.00
EBITDA	6,870	6,035	14.00
EPS (Basic) (₹)	67.03	62.64	7.00

Noida-based HCLTech on Monday said its board has approved an investment of up to ₹3,500 crore to set up 50 MW data centres across India. The IT services major noted that the expansion is driven by enterprises rapidly transitioning from legacy physical infrastructure to high-value, AI-ready full-stack solutions.

"We will combine our capabilities across AI data centre design, as well as our software portfolio with the new AI data centre business for this. In this regard, we will make a strategic investment, up to ₹3,500 crore, and with the potential to scale to 50 MW of capacity," C Vijayakumar, MD & CEO, HCLTech, said while announcing the quarterly results here.

He said HCLTech was in conversation with several clients and was "very close" to establishing its first client with some committed capacity.

"The most important element here is, while it is AI data centre business, we are playing fundamentally a different game... for us, the MW is just the anchor. Our whole value is in delivering full stack AI services, which means it's data centre, the GPUs, the models and the applications that we will deliver on top of it. So, the overall value creation is significantly of a very different magnitude, and that's really what we want to play," he said.

RAPID GROWTH PATH

HCLTech is also looking at leveraging data centres for delivering managed services and outcome-based contracts for global clients because, today, token costs are a very important component of the overall delivery, he added. According to the company, India's data centre ecosystem is on a rapid growth trajectory, driven by strong demand from a vibrant digital economy, data localisation, and critical infrastructure. Data centre capacity is expected to grow to 5-7 GW by 2030 from the current 1.8 GW, with a significant part of that growth in AI data centres.

Q1 NET & DIVIDEND

HCLTech reported a consolidated net profit of ₹4,624 crore for the first quarter ended June 30 — a year-on-year growth of 20.32 per cent.

Consolidated revenue from operations rose 14 per cent to ₹34,579 crore. The board declared an interim dividend of ₹12 per equity share of ₹2 each for 2026-27.

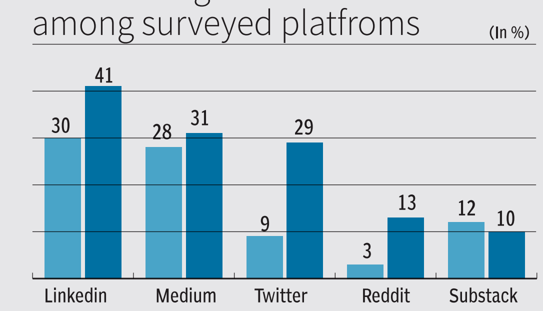
LADIES OF LORD'S

HISTORIC WIN. Team India celebrates after defeating England by 270 runs to win the historic first women's Test at the Lord's on Monday. India had set a mammoth 457-run target for the hosts, thanks to a century by Yastika Bhatia. Kranti Gaud headlined the bowling performance with a five-wicket haul, landing her name on the Lord's Honours Board. Needing four wickets to wrap up the game, India completed the formalities on Day 4 morning, dismissing England for 186 in 62.5 overs REUTERS

One in four social media posts is AI-speak

LinkedIn and Medium top the list as AI-generated posts proliferate, says Pangram report

Rohan Das
Chennai



If you visit LinkedIn you may feel disillusioned by how so many posts, even by trusted leaders, look like AI slop. The bot takeover of your social feed is all too real as a new report from Pangram, a company that builds AI detection algorithms, has flagged that one in four long form posts on surveyed social media platforms are fully AI-generated.

LinkedIn is where the loss of human voice is most with two out of three posts being AI-created. About 40 per cent of long form content(more than 250 words) on the professional networking platform has been flagged by Pangram as fully AI-generated while for short form content, it is 30 per cent.

Interestingly, LinkedIn had recently announced that it will downrank AI-generated content. But, ironically, it received major flak for using AI in the said announcement.

After LinkedIn and Medium, the blog creator platform, saw the highest share of AI generated content with 31 per cent of long form and 28 per cent of short form content flagged as fully AI-written.

X is not far behind. The report shows that nearly half of the articles on X were flagged to have some amount of AI-generated content.

AI content was also identified on more community-oriented platforms like Reddit, though at a much smaller share of 3-12 per cent.

Vikas Chawla, Co-founder, Social Beat, suggests that going forward, as more people get used to working with AI, such content is going to be even more ubiquitous.

"AI-generated content is going to be the base. It will be brands and creators who can and continue to bring in their authentic personal nuances that will be able to cut through and win more," he said.

The 'Dead Internet Theory', a lore that forecasts that soon there will be no human voice on the Internet, may be coming ominously true.

In a blog post, Max Spero CEO, Co-founder of Pangram, said that LinkedIn's higher share of AI content suggests that people are overwhelmingly willing to use AI to speak on their behalf in professional settings and less likely to use it on casual and anonymous platforms.

Grasim RE arm to buy Sprng Energy from Shell subsidiary in ₹17,200 crore deal

Our Bureau
Mumbai

Aditya Birla Renewables (ABRen), a subsidiary of Grasim Industries, has signed a definitive agreement to acquire Sprng Energy (formerly Solenergi Power) from Shell Overseas Investment BV, a wholly owned subsidiary of Shell Plc.

In one of the largest acquisitions in India's renewable energy sector, the transaction values the business at an enterprise value of ₹17,200 crore.

The equity consideration payable to the seller will be determined after adjusting for debt, cash and other items as specified in the transaction documents, Grasim Industries said in a statement on Monday.

The deal will be funded through a mix of debt and equity infusion from Grasim and funds managed by Global Infrastructure Partners (GIP), a part of Blackrock.

The transaction, expected to be completed later this year, adds a contracted portfolio of 5 GWp (giga watt peak) capacity, comprising 3.3 GWp of operational capacity and 1.7 GWp under construction, along with a robust development pipeline.

Sprng Energy is a leading renewable energy platform in India, focused on developing and operating large solar and wind projects and supplies solar and wind power to electricity distribution companies in India.

The acquisition accelerates ABRen's renewable energy growth ambitions by combining its strong presence in the commercial and industrial (C&I) segment with Sprng Energy's complementary utility-scale platform, Grasim Industries said.

Kumar Mangalam Birla, Chairman, Aditya Birla Group, said the acquisition brings together two highly complementary platforms and marks an important milestone in ABRen's evolution. "Together, we will have a diversified portfolio and a deep development pipeline that puts us on course to scale to over 20 GWp in the coming years," he said.

"More importantly, this deal positions the group to participate meaningfully in one of the largest energy transformations underway anywhere in the world," he added.

ASSET BASE

Aryaman Vikram Birla, Director, Aditya Birla Group and Aditya Birla Renewables, said Sprng Energy brings a high-quality asset base, creditworthy offtakers and strong contracted cash-flows.

"Having nearly achieved our 10 GWp target ahead of schedule, the group is now on track to double capacity in the next few years," he added.

Jayant Dua, Business Head, Aditya Birla Renewables, said the deal brings together two strong renewable energy platforms with complementary capabilities, geographical presence and a talented pool of professionals across key functional areas.

The collective expertise of both companies can unlock meaningful operational synergies, significantly deepen organisational capabilities, and accelerate project execution, he said.

ABRen is a leader in the C&I renewable power segment, serving leading corporates such as Grasim, Hindalco, UltraTech and Century Enka, among others. Its customer base also includes government utilities in Gujarat, Karnataka, Maharashtra and Odisha.

Ashok Leyland wins ₹223 cr arbitral award

Chennai: Ashok Leyland Ltd has secured ₹222.65 crore in a partial arbitral award, along with interest and legal costs, in its long-running dispute with the Delhi Transport Corporation (DTC). The company had originally sought ₹445 crore, while DTC had filed a counterclaim of ₹136 crore. The tribunal dismissed DTC's counterclaim. OUR BUREAU

Jindal Steel CEO resigns ahead of board meeting

New Delhi: Gautam Malhotra, Chief Executive Officer of Jindal Steel, has resigned ahead of the company's board meeting scheduled for next week. Malhotra, who was serving as the CEO of the company since October 28 last year, cited personal reasons for his resignation, which is effective from the close of business hours on July 15, 2026. PTI

TVS Capital looking at building capability in manufacturing

BETS ON BIGGER DEALS. Alongside sectoral shift, P-E firm to step up investments

Jyoti Banthia
Bengaluru

Growth-stage private equity firm TVS Capital Funds is sharpening its investment thesis around manufacturing, betting on India's evolving industrial ecosystem while increasing cheque sizes as it looks to back fewer but larger companies.

"We are now looking at building experience and capability in manufacturing," Krishna Ramachandran, Managing Partner, TVS Capital Funds, told *businessline*.

"In manufacturing, we don't look at everything. We are looking at very limited areas — precision manufacturing, components, electronic components for space and defence, smart meters, grid modernisation, specialty vehicles and other tech-driven manufacturing,. he added.

> Our cheque size has increased from Fund III to Fund IV...We will do between two and three investments every year
>
> **KRISHNA RAMACHANDRAN**
> Managing Partner, TVS Capital Funds

The firm, which is deploying its fourth fund with a target corpus of ₹4,000 crore and expects to reach nearly ₹5,000 crore including co-investments, has already deployed about ₹1,000 crore and plans to invest the balance over the next few years.

BUILD CAPABILITY

Ramachandran said TVS Capital has spent the past two years building expertise in enterprise technology and is now replicating the same approach for manufacturing by creating sector-specific capabilities and advisory networks before deploying capital.

The manufacturing strategy is centred on sectors benefiting from government support, where policy initiatives and production-linked incentives have created new opportunities.

"The VC industry will provide seed capital. When these companies want to scale and build governance, they need funds like us to bring in growth capital and capability," he said.

Alongside the sectoral shift, TVS Capital is significantly increasing its investment size. "Our cheque size has increased from Fund III to Fund IV. You can assume cheque sizes of ₹300-400 crore, with an average of about ₹350 crore. We will do between two and three investments every year," Ramachandran said.

The larger cheque sizes reflect the firm's strategy of backing growth-stage companies that require substantial capital to expand rather than making a higher number of smaller investments.

SECONDARY OPTIONS

Ramachandran also said the exit environment for private equity investors has improved materially over the past two years, driven by regulatory changes and the emergence of secondary buyers. "We have done about 37 investments so far and 27 exits, of which 14 have been through IPOs," he said. "The secondary options have opened up. We are actively looking at secondaries for our exit," he added.

He attributed the changing landscape partly to tax changes that have made secondary transactions more attractive, while noting that IPOs are increasingly becoming a mainstream exit route for Indian start-ups and growth companies.

Teacher deployment gaps leave many schools with no students or just one teacher

Yashaswani Chauhan
New Delhi

The school education system continues to face imbalances in teacher deployment, with thousands of schools operating either without students or with just a single teacher, according to the latest UDISE+ 2025-26 data.

The UDISE+ data show that 5,663 schools across the listed States and Union Territories reported zero enrolment. A significant share of these — 4,133 schools — were in West Bengal, where 19,502 teachers remain posted.

DATA FOCUS.

Uttar Pradesh followed with 313 zero-enrolment schools, while Jammu & Kashmir (188), Chhattisgarh (149), Rajasthan (140) and Arunachal Pradesh (134) also reported schools without any enrolled students.

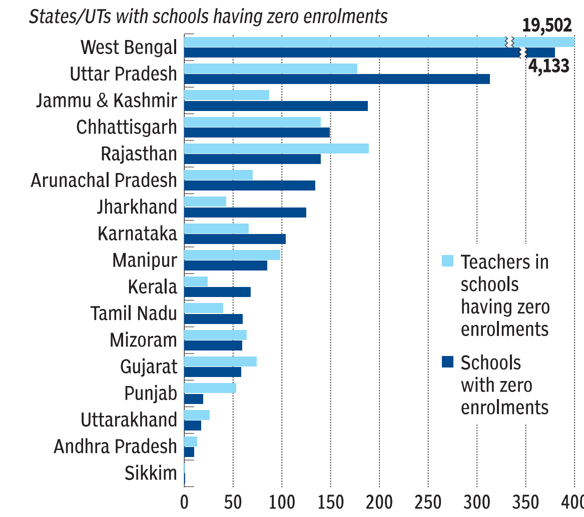
However, the large number of schools with no students in West Bengal should be viewed in the context of differences in data reporting. According to the UDISE+ report, all States and UTs except West Bengal, were directly uploading school-level data to the UDISE+ portal. West Bengal continues to maintain its own Management Information System and share its data with the national database through a bulk upload mechanism.

The large numbers recorded by the State could be due to difference in the manner of counting.

Where are the students?

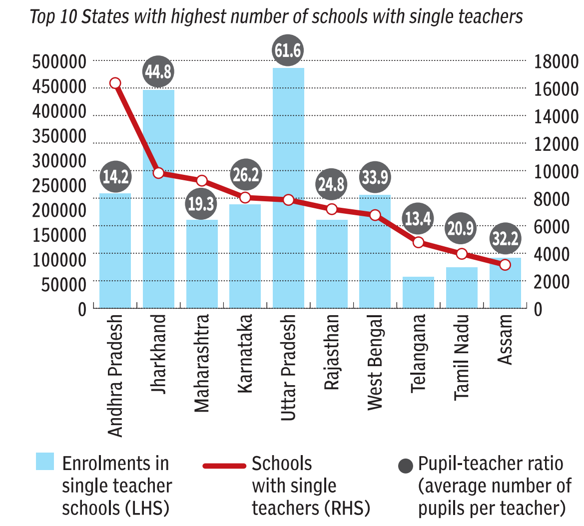
Over 19,000 teachers posted in 4,000+ zero enrolment schools in West Bengal

States/UTs with schools having zero enrolments



UP and Jharkhand face the highest burden of single-teacher schools

Top 10 States with highest number of schools with single teachers



Source: UDISE+

GEOGRAPHY FACTOR

States such as Jammu & Kashmir and Chhattisgarh which face geographical inaccessibility and dispersed populations, also featured among States with the most number of schools with no students.

"The presence of a large number of schools with no students should not be perceived as a policy failure but as a manifestation of several structural and demographic changes," said Suresh Kalpathi, CEO, Veranda Learning, citing migration, changing settlement patterns and a growing preference for private schools, while noting that school rationalisation has not kept pace with these shifts. The data also show that thousands of students continue to study in single-teacher schools. Andhra Pradesh reported the highest number of such schools at 16,357, followed by Jharkhand (9,827), Maharashtra (9,269), Karnataka (8,042) and Uttar Pradesh (7,874).

However, the burden on teachers was highest in Uttar Pradesh, where single-teacher schools recorded an average pupil-teacher ratio (PTR) of 61.6, followed by Jharkhand (44.8), West Bengal (33.9) and Assam (32.2) also recorded relatively high student loads,

In contrast, Andhra Pradesh, despite having the largest number of single-teacher schools, reported much lower PTR of 14.2, highlighting how States face different challenges depending on school size and enrolment patterns.

"These numbers point to different challenges rather than a single national issue. A high number of single-teacher schools often reflects geographical and infrastructure constraints, while a high pupil-teacher ratio indicates that teachers are managing larger classrooms with limited time for individual attention," said Swaminathan Ganesan, Co-Founder and CEO, Smartail.

Experts said real-time data and school mapping can help the government make better decisions on teacher transfers, recruitment, and resource allocation.

'LTM enters FY27 with positive momentum driven by AI spending'

bl.interview

Sanjana B
Bengaluru

LTM reported revenue of ₹11,608 crore in Q1 FY27, up 2.8 per cent sequentially and 18 per cent year-on-year, while net profit rose to ₹1,469 crore, increasing 9.5 per cent quarter-on-quarter and 17.1 per cent from a year earlier. The company also reported a 120 bps year-on-year and 40 bps sequential expansion in EBIT margin.

Venu Lambu, MD and CEO of LTM, discusses the company's Q1 performance, margin expansion, AI-driven client spending, deal pipeline, hiring outlook and growth expectations.

Edited excerpts:

> We declared AI revenue of $150 million quarterly. We also defined the types of AI work classified as AI revenue
>
> **VENU LAMBU**
> MD & CEO of LTM

Could you highlight the key announcements from the quarterly results?

We delivered 6.4 per cent year-on-year (y-o-y) growth on a constant currency (cc) basis, an improvement over last year's full-year growth; we are on a good trajectory. We also expanded our margin to 15.5 per cent with a steady order book. Our top clients grew by 4.5 per cent, and the top 10 by 4.3 per cent sequentially.

Two of our biggest industry segments, financial services and tech services, are past the productivity phase. They've delivered 3.2 per cent and 3.4 per cent respectively, sequentially. Consumer has delivered 18 per cent y-o-y growth. It's been a good quarter.

There was some softness in India and West Asia. India was affected by delayed access to certain computing infrastructure due to the conflict, the memory shipment issue, and the delayed ramp-ups. Our margins have expanded. The order book has been steady. And we declared AI revenue of $150 million quarterly. We also defined the types of AI work classified as AI revenue.

Today, we also announced a partnership with Anthropic. It positions us to help our customers bring the frontier model capabilities of Anthropic and our domain and contextual capabilities to accelerate deployment. So, we are entering FY27 with positive momentum.

Margins expanded despite a challenging environment, but revenue was slightly below expectations. What drove the margin gains, and what weighed on revenue?

We started the Fit for Future program last year to redefine our overheads and cost of delivery. It delivered margin expansion last year. Even this year, we want to continue that momentum in challenging the status quo, especially on the cost of delivery, which has fundamentally changed.

To achieve the new cost of delivery, we came out with a program called New Horizon so our delivery and market leadership can address the new horizons to conquer, both in cost and growth narrative. That requires us to have a different lens for pyramids, utilisation, and the pricing aspect, because of the opportunity for better margins and growth. We will expand this as we enter Q2 as well.

It was a satisfying quarter, but the softness was predominantly in the India delayed ramp-up, one-off seasonal revenue in our production segment, and the West Asia conflict. Those factors were beyond our control. On the aspects we could influence, we delivered a strong quarter.

How has client spending across the US and Europe evolved amid ongoing geopolitical uncertainty?

The spend has a new treatment approach from clients looking at prioritising AI-related spend, whether to modernise the systems to build agent AI services for their businesses, or working with us to create AI-friendly and AI-agentic services.

The second area that clients are spending on is accelerating product development for their business using AI-led software engineering. AI has given clients a fantastic opportunity to increase the throughput velocity and deliver products to their business at a faster pace. Hence, AI-led software engineering is another area that we see spending.

As clients are waiting for the macroeconomic situation to improve in parts of the world, they are prioritising this category of spend.

What's the hiring outlook for FY27?

We hired about 1,100 people this quarter, and expect the same momentum to continue, if not more, for the remaining quarters. As for lateral hires, there is demand for AI skills. There is no specific number. If we can get 500 AI-deployed engineers, we will hire them. However, availability has to match the demand.

BSNL's Q1 revenue up 10% to ₹4,418 cr: Scindia

Our Bureau
New Delhi

Bharat Sanchar Nigam Ltd (BSNL) has provisionally posted around 10 per cent increase in revenue from operations in the first quarter of fiscal year 2026-27, Telecom Minister Jyotiraditya Scindia said on Monday, adding that average revenue per user of the State-run company has also increased from ₹100 to ₹102.7.

The Minister noted that BSNL's core business engines — enterprise business and consumer mobility — had recorded positive growth, driving the revenue increase to ₹4,418 crore in Q1 FY26–27 from ₹4,017 crore during the corresponding period last year.

Scindia added that the final numbers will be out in about a week.

He said that the enterprise business segment of BSNL has grown 19.2 per cent to ₹1,745 crore in the June quarter from ₹1,463 crore a year ago.

BSNL's consumer mobility vertical, has grown 8 per cent to ₹1,724 crore during the quarter from ₹1,594 crore in the June quarter of 2025.

"As far as our total revenue is concerned, directly from business operations, we have posted close to about a 10 per cent increase in revenue over last year. Last year, we closed Q1 at ₹4,017 crore. This year, we have closed Q1 at ₹4,418 crore. So there's a delta of ₹401 crore, an increase," Scindia said.

TVS Supply Chain Solutions aims for double-digit revenue growth

Our Bureau
Chennai

TVS Supply Chain Solutions is confident of achieving a double-digit revenue growth going forward, banking on expanding integrated supply chain offerings, higher-margin services and growing demand from global manufacturers diversifying their supply chains, said its Chairman R Dinesh in the company's FY26 annual report.

In FY26, the company reached its highest-ever revenue of ₹11,003 crore, a 10 per cent growth over FY25.

India continues to be one of the most attractive long-term growth markets globally.

A 6–7 per cent growth in GDP in FY27, with the world in flux, makes India even more attractive in the short term, Dinesh said in the report.

Traditionally, logistics companies across the world have grown at twice the rate of GDP.

However, TVS SCS has demonstrated in the past that, by increasing the sophistication of our offerings and providing integrated solutions, our growth rates can be much higher, Dinesh noted.

"Therefore, we remain confident that even in geographies with lower growth rates, we will be able to deliver our target of double-digit revenue growth," he said.

Honda plans to enter the sub-4 metre SUV segment, accelerate electrification

T E Raja Simhan
Chennai

Honda Cars India is preparing to enter India's highly competitive sub-4 metre SUV segment in 2028 as part of a broader strategy to regain market share.

This reflects the structural shift in India's passenger vehicle market, where compact SUVs have emerged as the fastest-growing category, Kunal Behl, Vice-President, Sales and Marketing, Honda Cars India Ltd, told *businessline*. "The sub-4 metre space was missing from our portfolio. It is important for us to be present in both SUV segments," he said. Hatchbacks have been shrinking at a compound annual growth rate of around 4 per cent over the past five years, while sub-4 metre has grown by more than 20 per cent annually, he added.

Kunal Behl, VP, Marketing and Sales, Honda Cars India Ltd BIJOY GHOSH

The proposed compact SUV will be offered with multiple power train options, although Honda has not disclosed whether these will include petrol, hybrid or battery electric variants.

EV PUSH

Behl said Honda is also accelerating its electrification roadmap with plans for its first India-developed battery electric vehicle SUV to be launched in the second half of the current financial year.

Honda plans to offer petrol, hybrid and battery electric vehicles based on customer preferences while continuing to stay away from diesel, he said.

On fresh manufacturing investments, Behl said the company's Tapukara facility in Rajasthan, with an installed annual capacity of 1.8 lakh units, is currently operating at 60-70 per cent utilisation and caters to both domestic and export markets. The Japanese auto major will focus on improving utilisation through an expanded product portfolio before committing to additional capacity, he said.

FRESH INVESTMENTS

"As demand grows, we will evaluate expansion options, but the first objective is to utilise the existing plant better," Behl said, adding that the company is evaluating multiple expansion options without specifying a utilisation threshold for fresh investments.

Honda has lined up six launches during the current calendar year, including the new electric SUV. The broader product offensive is aimed at boosting plant utilisation and strengthening the company's position in India's evolving passenger vehicle market, said Behl.

Tamil Nadu contributes nearly 12 per cent of the overall domestic sales for Honda. The company has a warehouse for spare parts in the State but no immediate plans for manufacturing.

Supreme Court orders mediation in decade-long Kalyani family dispute

Suresh P Iyengar
Mumbai

The long standing dispute between Kalyani siblings — Bharat Forge Chairman Baba Kalyani and his sister Sugandha Hiremath — has now been referred to mediation by the Supreme Court.

A three-member bench of the Supreme Court presided over by the Chief Justice of India, Justice Surya Kant, directed the siblings to participate in mediation.

The court appointed a former judge, L Nageswara Rao, as the mediator.

The matter has now been listed for hearing after two weeks.

The order, passed on Monday by Chief Justice Surya Kant and Justices Joymalya Bagchi and V Mohana, was delivered in the backdrop of multiple litigations pending between Baba (77), Hiremath (74), Gaurishankar Kalyani (72) and their family members.

The matter reached the Supreme Court after Hiremath moved it against an order passed by the Bombay High Court on May 4 rejecting mediation between the Kalyani siblings.

Senior counsels appearing on behalf of the defendants submitted that there had already been three unsuccessful attempts at resolving the family dispute.

They highlighted that the first mediation attempt took place before the Supreme Court in 2018. The second attempt occurred before the district court in 2024 but never progressed meaningfully as the parties did not engage themselves in the process. A third effort this year also yielded no results.

COMPLICATED HISTORY

It was argued that, against this backdrop, directing another mediation would merely consume judicial time without any realistic prospect of settlement, the lawyers said.

It was submitted that the complexity of shareholding arrangements had itself been one of the reasons the previous mediation efforts had collapsed.

At stake is ancestral wealth estimated over ₹1 lakh crore, including vast immovable properties and several listed companies under the Kalyani Group.

When the matter came up for hearing in the SC on Monday, Hiremath was represented by Karanjawala & Co, RJD & Partners and Senior Counsel Shyam Divan. The other side was represented by senior counsels Abhishek Manu Singhvi, Kapil Sibal and Aryama Sundaram.

The SC bench insisted that the parties must consider mediation. Kalyani's side insisted that the mediation should be time-bound, and that proceedings in the High Court should continue during this time.

The SC bench, however, ordered that all proceedings be stayed during the course of mediation. The bench ordered the approach Justice (retired) L Nageswara Rao without any delay and the mediation process begin on Tuesday itself, citing the possibility of a settlement.

QUICKLY.

SC allows CBI, ED to lead ADAG probe

New Delhi The Supreme Court on Monday refused to question the choice of people arrested during the investigation into financial fraud allegations against the Anil Dhirubhai Ambani Group and promoter Anil Ambani, allowing the Central Bureau of Investigation and the Directorate of Enforcement to steer the probe. A three-judge Bench exercised restraint even as the petitioner side highlighted that the investigation had so far only seen the arrests of "low-level" officers. Appearing for the petitioner, EAS Sarma, advocate Prashant Bhushan continued to term Ambani as "the kingpin". The senior lawyer said he was not rooting for Ambani's arrest, but the probe agencies should at least disclose "what they have found about the role played by him". Bhushan said the allegations involved losses to the tune of over ₹20,000 crore to public sector banks. "This is not a small amount," he said. But Chief Justice Surya Kant said any comment made by the Supreme Court during an ongoing investigation, even though unintentional, would impact the trial. KRISHNADAS RAJAGOPAL

US must control Hormuz and get paid for it: Trump

TRANSIT THREAT. We'll become the guardian of the Strait, says US President

Reuters
Washington

"We're going to get paid for guarding it... going to be reimbursed, because the other nations are very wealthy

DONALD TRUMP
US President

President Donald Trump said on Monday that the US would probably take over the Strait of Hormuz and should be reimbursed for controlling the vital waterway.

"We're going to keep the Strait, and we'll probably run it. We'll become the guardian of the Strait. Maybe we'll call it the guardian angel of the Strait. And we should be reimbursed for that," he said in a phone interview on *Fox News*' 'Fox & Friends' programme.

Control of the Strait of Hormuz, a vital route for global oil supplies, has become one of the main battlegrounds of the conflict. Iran's effective blockade of the strait has pushed up energy prices and increased concerns about inflation globally

. "We're going to guard it. We're going to get paid for guarding it — a lot of money," Trump said. "We're going to be reimbursed, because the other nations are very wealthy. They're on our side, and we can't be expected to do that for nothing," he said.

After announcing the waterway's closure on Saturday following what it described as an unauthorised transit, Tehran said on Sunday that passage remained suspended and that permits would be issued once "stability and calm" were restored. "We had a deal. It was a done deal, and then they broke it. They always break it. We've had 10 deals with these people, and so we're just going to hit them very hard," Trump said.

Iran's Revolutionary Guards said in a statement on Monday that the only way to restore regular shipping traffic through the strait was to end US military interventions in the waterway, and warned that "continued interference could lead to greater incidents in the global oil and gas sector."

DRONE ATTACKS

US and Iranian forces exchanged heavy missile and drone attacks over the weekend and into Monday, with Tehran saying it had struck US military facilities across the Gulf and kept the Strait of Hormuz closed, driving oil prices higher.

Explosions were heard on Monday in the Iranian port city of Bandar Abbas on the Strait of Hormuz and on nearby Qeshm Island, the semi-official Mehr news agency reported, citing local residents.

The latest exchanges mark a sharp escalation in both the pace and geographic reach of attacks over the past week, casting doubt on an interim US-Iranian agreement signed last month to reopen the strait and halt hostilities while the sides pursued a further 60 days of negotiations.

India keenly watching West Asia situation as tension spirals

Amiti Sen
New Delhi

Indian exporters are worried about the development, fearing it could further delay a return to normalcy

India is assessing the evolving situation in West Asia as tensions escalate to evaluate the potential impact on trade, shipping routes, energy supplies and overall economic interests, with officials closely monitoring developments before deciding on future action, sources said.

"West Asia has seen its share of ups and downs, but this round of escalation looks far more serious. We are watching the situation closely, and if it continues, we will decide on the policy interventions required," an official said.

FRAGILE CEASEFIRE

The latest flare-up comes after a fragile ceasefire between the US and Iran, announced only weeks ago following months of regional unrest, collapsed this month. Washington carried out fresh strikes on Iranian military infrastructure, saying the action followed attacks on commercial shipping and threats to regional security. Tehran retaliated with missile and drone strikes on locations linked to US interests in the Gulf, including facilities in Bahrain, Jordan, Kuwait and Oman, deepening fears of a wider conflict.

Adding to the uncertainty, US President Donald Trump said on Monday that the US would position itself as the 'guardian' of the Strait of Hormuz and reinstate a blockade on Iranian vessels, while demanding a 20 per cent reimbursement on the value of all other cargo transiting the waterway to cover security costs. The proposal, posted on Truth Social, has raised fresh questions over shipping costs and trade flows through one of the world's busiest energy corridors.

Officials noted that Indian refiners have so far managed supply through a diversified import basket, with Russian crude anchoring a significant share of purchases, supplemented by barrels from Saudi Arabia, the UAE and other sources. However, LNG and LPG shipments are seen as more vulnerable given fewer short-term substitution options.

Indian exporters are worried about the development, fearing it could further delay a return to normalcy.

"If ships are not allowed through the Strait of Hormuz, freight rates will go up and lead times will increase. Both exports and imports will be impacted. Buyers will also prefer sourcing from countries with shorter lead times and lower freight costs," said Sanjay Jain, a leading textiles exporter.

Rupee closes at a 4-week low of 95.62 per dollar

Our Bureau
Mumbai

The rupee closed 29 paise weaker on Monday at a four-week low, weighed down by rising crude oil prices and FPI-related dollar outflows amid escalation in the West Asia war. The rupee closed at 95.62 per US dollar against the previous close of 95.33. Intra-day, it tested a high/low of 95.58/95.86 per USD, per CCIL data.

Brent crude oil price rose to $79 per barrel level from previous week's $76 level even as the US and Iran attacked each others strategic assets in the West Asia war.

Foreign portfolio investors pressed on the sell button in the Indian equity markets. They net sold equities to the tune of $331 million, per NSDL data.

Kunal Sodhani, Head of Treasury, Shinhan Bank India, observed that the rupee is currently being influenced by a combination of global and domestic factors – elevated crude oil prices continue to increase India's import bill and demand for US dollar, while a resilient dollar, supported by expectations around Federal Reserve policy and higher Treasury yields, has kept emerging market currencies under pressure.

"Geopolitical tensions have further dampened global risk sentiment, resulting in cautious foreign portfolio flows. On the domestic front, the RBI remains focused on containing excessive volatility through calibrated intervention, while the gradual reduction in its forward short book has enhanced its flexibility to manage the currency," he said.

CERC offers one-time relief to RE developers for unlocking stranded transmission capacity

Rishi Ranjan Kala
New Delhi

60-DAY RELIEF. The regulator has relaxed some provisions of the GNA Regulations, providing developers with a 60-day window to choose an option REUTERS

In a development that can help free up to 15.7 gigawatt (GW) of stuck transmission capacity, the Central Electricity Regulatory Commission (CERC) has introduced a one-time option for renewable energy projects that await signing of power purchase agreements (PPAs), but are holding on to transmission capacity.

The regulator in a *suo motu* order last week said that connectivity is a "scarce resource", and the need of the hour is to utilise the stranded transmission capacity in a timely manner.

The General Network Access (GNA) Regulations provide for a letter of award (LoA) issued by renewable energy implementing agency (REIA) as one of the routes to seek connectivity by a renewable energy generating station (REGS).

GNA ROUTE

The regulator opined that the GNA route was permitted considering that the LOAs issued by the REIA shall convert into PPAs and power sale agreements (PSAs), thereby bringing certainty to RE generation development. However, it was learnt that for a large quantum of connectivity, granted on the basis of LoAs issued by different REIAs, PPAs have not been entered into by the REIAs with REGS due to the non-signing of the PSAs by buyers, it added.

"We are of the view that REIAs instead of waiting indefinitely for signing of PSA and keep holding on to LoAs knowing fully well that such LoA is an eligible document for seeking

"Connectivity (a scarce resource) should have taken appropriate action to find a way forward including cancellation of LoAs, enabling generating station to whom LoA has been issued, to either exit the connectivity or convert to land or land BG route," the regulator said in its order.

In fact, some of the later LoAs of REIAs or discoms have culminated in PPAs, but such projects are unable to get any connectivity since connectivity is blocked by LoAs that did not culminate into PPA, it added.

TRANSMISSION CAPACITY

On stranded transmission capacity, the CERC pointed out that the total LoAs issued by the four REIAs from 2019 to June 2025 is 40,420 megawatt (MW), a PPA has been signed for only 2,338 MW. Using such LoAs, connectivity granted (in-principle or both in-principle and final connectivity) for which a PPA has not been signed, totals 22.054 GW. Out of this, around 6.35 GW (6,346.8 MW) connectivity involves transmission planning issues.

"This implies that out of 40.4 GW LoAs, the connectivity which was obtained using such LoAs, that may get released or utilized under the instant Order, are of the order of about 15.7 GW only," the regulator added.

After consultations with stakeholders, the regulator has relaxed some provisions of the GNA Regulations providing developers with a 60-day window to choose one of the four options.

The options are exit from the LoA route without surrendering connectivity; substitution of the LoA with a PPA signed under another LoA; surrendering of such connectivity with return of Conn-bank guarantees and continue to be governed in terms of the GNA Regulations.

The concerned RE project will have to obtain a no-objection certificate (NoC) from the concerned REIA to choose any of the four options.

ALMM solar cells: MNRE extends deadline for submitting plea for project exemptions

Our Bureau
New Delhi

The Ministry of New & Renewable Energy has extended the deadline for renewable power project developers till July 23 to seek exemption from the Approved List of Models and Manufacturers List-II for solar PV cells, which came into effect on June 1.

On May 25, the Ministry had clarified that there will be no extension in the ALMM list for solar PV cells. However, in order to protect investments already made in public interest, it allowed certain net-metering, open access and RE power projects for time extension based on a case-to-case basis.

Under this arrangement, the RE power project developers had to electronically submit their claims through a portal developed by National Institute of Solar Energy by June 30. "In view of the requests received in the Ministry for re-opening of the portal, the matter was examined in the Ministry and, it has been decided to re-open the portal for submission of applications up to July 23.

Birla Tyres looks to widen distribution reach in TN, Andhra Pradesh, Telangana

Mithun Dasgupta
Kolkata

Birla Tyres is looking to ramp up its distribution reach in Tamil Nadu, Andhra Pradesh and Telangana as the tyre manufacturer wants to focus more on the South.

Capacity utilisation at the tyre maker's Balasore plant in Odisha is increasing in every quarter, said Anurag Choudhary, CMD & CEO, Himadri Speciality Chemical, one of the owners of Birla Tyres.

"Currently, we are exporting products to the Middle East and African countries. We expect the Balasore plant to attain full capacity utilisation in the next three years. After that we will start exporting the products to the US and Europe as well," Choudhary told *businessline*.

The current daily capacity of the Balasore plant is around 400 tonnes. Birla Tyres manufactures tyres for commercial vehicles, agriculture, construction–industrial–mining (CIM).

Birla Tyres Ltd is currently a wholly owned subsidiary of Himadri Speciality Chemical, India's largest speciality carbon black maker. Himadri and Dalmia Bharat Refractories jointly acquired the tyre company in 2023 through the corporate insolvency resolution process.

The Kolkata bench of the National Company Law Tribunal had approved the resolution plan for the acquisition of BK Birla group firm Birla Tyres under the Insolvency and Bankruptcy Code.

"The Birla Tyres plant, recommissioned during the year, is scaling operations around a modernisation and automation roadmap. The division's product portfolio is being expanded across agricultural, mining and speciality tyre segments, with new products already introduced. Moreover, plans are underway to commission its PCR facility in the next two years to cater to tyres for EVs and SUVs," Himadri Speciality Chemical said in its annual report for 2025-26.

BUSINESS TARGET

From revenues of a mere ₹187 crore in the last financial year, the business is expected to scale to around ₹3,000 crore in the next few years, catalysed by product diversification, operational efficiency and expanding market presence.

"We are getting good response from all the regions generally. The South is where we have to focus more. Our products are going strong in the North, East, and West.

"In the South, basically, we will be focussing on Tamil Nadu, Andhra Pradesh and Telangana. We are looking to ramp up distribution reach in these States," Choudhary added.

In the annual report, Himadri said Birla Tyres business is being repositioned from a legacy bias-tyre manufacturer into a premium but affordable, technology-backed, application driven mobility solutions business.

"This transformation is being enabled through targeted investments in manufacturing modernisation, product development, distribution architecture and brand renewal," it said.

Frontloaded inflows of $9 b at systemic level possible via fresh FCNR(B) deposits: SBI

Our Bureau
Mumbai

Inflows under the foreign currency non-resident (bank) deposit are likely to be front loaded under the RBI's limited period concessional swap window for banks, with the flows estimated in the range of $8-9 billion on systemic level currently, said SBI's Economic Research Department (ERD).

The ERD officials noted that built upon the ramparts of the successful 2013 edition (when RBI opened swap window in the nature of a simple buy/sell foreign exchange swap from its side covering just the principal portion of the deposits), but much carefully calibrated by the regulator, this time the FCNR(B) flows are likely to be front loaded this time.

FOUR REASONS

They cited four reasons for the inflows, including entire hedging cost on fresh FCNR (B) deposits (principal) being borne by RBI, providing Banks much respite on cost / spread front.

Further, clarity on SBLC (standby letter of credit) and leverage has been front loaded this time ensuring an early initiation and building of momentum (as against the earlier scheme when 60 per cent of inflows had come in last month).

Referring to a longer runway of four months this time, SBI economists observed that this allows Indian banks and their foreign counterparts / correspondent banks to take stock of the evolving situation and fine tune / tweak the structure / covenants appropriately.

The ERD officials noted that despite flows from these sources and good buying seen from FPIs through June'26 especially in debt segment ($7.1 billion) driven by the government's offers on tax treatment, the impact on rupee has not been as expected though FCAs (foreign currency assets) have gone up marginally.

Beyond commerce

India's Pacific foray cuts China's maritime reach

Prime Minister Narendra Modi's just-concluded visits to Indonesia, Australia and New Zealand mark the transitioning of India's "Look East" stance into a more muscular "Act East" policy that deploys bilateral partnerships to extend New Delhi's maritime and defence footprint across the South China Sea and the wider Indo-Pacific.

Of particular importance is Indonesia 's wholehearted support to India's participation in the integrated development of Sabang Port. Sabang lies just 160 kilometres (100 nautical miles) from India's upcoming Great Nicobar trans-shipment port project, overlooking the Strait of Malacca, one of the world's most critical maritime chokepoints. For China, it is a vital economic lifeline for its trade and energy supplies. India's maritime cooperation bid was reinforced by deepening of defence ties, with Indonesia signing an agreement to purchase BrahMos supersonic missiles and Astra beyond-visual-range air-to-air missiles. Together, these initiatives signal a relationship that has moved decisively beyond commerce.

Equally critical was the emphasis on adherence to the UN Convention on the Law of the Sea, freedom of navigation and a rules-based Indo-Pacific. These are diplomatic formulations, but they unmistakably respond to China's aggressive maritime posturing in the South China Sea while steadily expanding its presence in the Indian Ocean. India is responding firmly to Beijing's growing influence through its "string of pearls" i.e. the network of port investments stretching across Pakistan, Sri Lanka, Bangladesh and the Maldives. PM Modi's Indonesian sojourn marks a continuum with earlier engagements with countries like Seychelles. India is steadily deepening its defence and maritime partnerships with key Indo-Pacific countries — from Vietnam and Indonesia in South-East Asia to Japan and Australia in the Pacific — to extend its strategic presence directly into China's maritime periphery. Australia completes this strategic geometry. The new defence and security declaration goes well beyond symbolism. Twelve years after the two countries inked a civil nuclear cooperation pact, Modi's visit to the country paved the way for commercial uranium supplies to fuel India's expanding nuclear power programme. Alongside closer coordination through the Quad, the relationship reflects New Delhi's growing view of the Indo-Pacific as a single maritime theatre rather than two separate oceans.

None of this amounts to an overt policy of containment. India has carefully avoided joining military alliances or framing its diplomacy as explicitly anti-China. Yet, the drift is unmistakable. By weaving together bilateral partnerships with Indonesia, Australia and island nations in the Indian Ocean, New Delhi is building a network of like-minded maritime partners. China will inevitably read these moves as an attempt to balance its influence. India would describe them differently: as an effort to preserve a free, open and rules-based Indo-Pacific.

Food safety rules, or weapons of trade?

CULINARY MATTERS. India must ensure food exports conform to global safety norms, while tightening rules for food imports

AJAY SRIVASTAVA
SHANTWNA DIXIT

BLOOMBERG

The fruits, vegetables, spices and grains we eat often contain very small amounts of pesticides and insecticides used by farmers for crop protection, as well as preservatives and additives added during processing. Food-safety regulations set safe limits for these substances in food product to protect consumers.

Some countries impose excessively strict standards or residue limits. Such measures often do little to improve public health but make it harder for foreign products to enter their markets. As a result, food safety rules have increasingly become trade barriers.

India therefore faces a double challenge. It must strengthen its own food-safety system so that food sold at home and exported abroad meets high standards. It must also ensure that foreign food-safety rules are not used as disguised barriers to its exports. India is falling short on both fronts: its exports face repeated rejections overseas, while imported food often receives far less scrutiny at home.

Recently, Japan suspended imports of India's Alphonso and Kesar mangoes after identifying deficiencies in fumigation and pest-control procedures at approved facilities.

EXPORT REJECTIONS

The European Union, the UK and several other developed markets have repeatedly rejected consignments of Indian spices, sesame seeds, rice products, seafood, fruits, vegetables and herbal products. The reasons include excessive pesticide residues, the fumigant ethylene oxide in spices and food additives, aflatoxin contamination in grains and nuts, veterinary drug residues in seafood, and heavy metals in certain products.

The scale of these setbacks is substantial. Over the past two years, the EU alone issued 365 food safety alerts involving Indian products. These incidents expose weaknesses in India's food-safety ecosystem, from farm-level traceability and pesticide management to laboratory capacity and regulatory enforcement.

While Indian exports face intensive scrutiny abroad, imported food often enters India with comparatively little inspection. This is striking because developed-country agriculture generally uses far more pesticides than India. The EU has nearly 600 registered pesticides, compared with 372 in India. In 2023, EU farmers used about 300,000 tonnes of pesticides, while India used only around 40,000 tonnes. Pesticide use per hectare in the EU stands at 2.67 kg — more than 11 times India's 0.24 kg. (FAO data)

European farmers are also permitted to use many more pesticides on several crops. For example, the EU allows 256 pesticides for apple cultivation, while India permits only 54. The US is also among the world's largest pesticide users. Yet imported European apples, California almonds and dates from West Asia rarely undergo the intensive residue testing or border inspections that Indian exports routinely face overseas. This highlights the weakness of India's own testing, surveillance and enforcement systems.

Food safety standards are indispensable for consumer safety. Yet many economies increasingly use these to control imports — the EU being a prime example.

For example, when a pesticide loses approval for domestic use, the EU frequently reduces the import residue limit to a default level of 0.01 parts per million (ppm). Critics argue that this default is often adopted without a fresh scientific risk assessment and therefore operates more as a trade barrier than a food safety threshold. The consequence is that exporters must comply with requirements that are often much stricter than internationally recognised benchmarks.

The controversy surrounding the fungicide tricyclazole illustrates this concern. In 2022, the European Food Safety Authority concluded that the residue limit for tricyclazole in rice could safely be increased from 0.01 ppm to 0.09 ppm based on scientific evidence. Nevertheless, the European Parliament rejected that recommendation and retained the stricter 0.01 ppm limit, making exports more difficult for rice-producing countries, including India.

> **While the EU-India FTA pledges enhanced cooperation on food-safety regulations, the EU has concurrently** proposed eliminating import tolerances for all pesticides not approved within Europe.

During discussions at the WTO, the EU acknowledged that it could not establish an Maximum Residue Level (MRL) through a conventional risk assessment and instead applied the default 0.01 ppm limit using a hazard-based approach.

FTA CONUNDRUMS

The issue has become particularly important as India and the EU prepare to implement their free trade agreement. While the agreement pledges enhanced cooperation on food-safety regulations, the EU has concurrently proposed eliminating import tolerances for all pesticides not approved within Europe.

This would automatically trigger the application of a default MRL of 0.01 ppm for those pesticides — a practice that stands in direct conflict with international Codex standards, which mandate adequate scientific justification before any modifications to MRL limits can be made. If such policies continue, market access for many Indian agricultural products would become increasingly difficult.

India, therefore, needs a strategy that is both defensive and offensive. The priority is to build a world-class domestic food-safety system. A national farm-to-port traceability framework should be developed for export-oriented agricultural products.

India needs many more internationally accredited laboratories near major production and export hubs, routine monitoring of pesticide residues and contaminants throughout the supply chain, and stronger guidance for farmers on pesticide use and Pre-Harvest Intervals. The enforcement capabilities of the Food Safety and Standards Authority of India, customs authorities and plant and animal quarantine agencies must also be significantly strengthened.

The second priority is regulatory reciprocity. India should inspect imported food as rigorously as it inspects its own exports abroad. Imported consignments should undergo risk-based sampling and laboratory testing, particularly for products with a history of food safety concerns. Shipments that fail to meet Indian standards should be rejected, just as Indian exports are rejected overseas.

China provides a useful model — between 2013 and 2019, it rejected an average of 740 European Union food consignments annually for failing food-safety standards. China demonstrated that a major trading nation can strictly enforce food-safety standards on imports while maintaining robust international trade. India should adopt a similarly science-based import inspection regime to protect consumers, strengthen regulatory credibility and create a level playing field for Indian farmers and exporters.

Finally, India must become far more proactive in defending its export interests. A dedicated monitoring and response unit should track regulatory changes in major export markets, provide early warnings to exporters and help them comply with evolving standards.

At the same time, India should vigorously challenge food-safety measures that lack scientific justification through bilateral consultations, free trade agreement mechanisms and the WTO Committees.

An inexplicable resignation, and collateral damage

Chakraborty's resignation from HDFC caused losses to shareholders. With the bank cleared now, shareholders need answers

Somit Dasgupta

After the abrupt resignation of Atanu Chakraborty, the former HDFC Bank non-executive chairman who was also an independent director, in March, the bank had set up an external review by two law firms. The former chairman had tendered his resignation quoting 'incongruence between his personal values and bank practices'. This rather cryptic message had sent shock waves in banking circles as the contents of the resignation letter had hinted that all was not well within the bank.

The law firms have finished their assignment and have come to the conclusion that there is nothing amiss in the functioning of the bank. They have apparently not found a single document with any irregularity.

That being the case, one is at a loss to understand why the former chairman wrote what he did in his resignation letter. His refusal to discuss anything with the law firms has also not helped in the matter and in fact, led one to believe that he is at a loss to explain his actions. Chakraborty during several interviews has been asked pointedly to elaborate upon the aberration he found in the functioning of the bank (albeit in comparison to his code of ethics). But unfortunately, he was unable to throw any light.

Chakraborty's resignation letter, revealed on March 18, had a deleterious effect on HDFC Bank's share value; about ₹1 lakh crore was wiped out in a day (March 19). The main shareholders of the bank are foreign institutional investors (FIIs), mutual funds and domestic institutions, retail investors and insurance companies.

There has been a lot of speculation as to why the chairman quit. There have been some media reports that he had been unhappy with certain decisions taken by the bank but that didn't mean the bank itself was guilty of any wrongdoing.

On hindsight, it appears it had something to do with inter-personal equations with the top management. Chakraborty was the non-executive chairman and there is a difference in the role of a non-executive chairman *vis-a-vis* an executive one. Broadly, a non-executive chairman does not get involved in day-to-day operations but helps in formulating long-term strategy, ensures compliance with rules and regulations and protects shareholders' interests are protected. No doubt, this distinction at times becomes wafer thin and can be a source of friction.

HDFC BANK SAGA. Unanswered questions

SHAREHOLDERS' LOSS

But what one say when a bank chairman (that too of the top private sector bank) throws innuendos that the practices being followed are unethical but in the same breath, but states that nothing is wrong with the functioning of the bank. Nobody has the right to cause a capital loss by suggesting malpractice but not backing it up with evidence. It is a matter of regret that Chakraborty has not seemingly expressed any emphatic remorse over the fact that investors, including small investors, lost money.

The time is ripe for SEBI to probe further, now that the law firms have given a clean chit to the bank. SEBI should seek an explanation from the former chairman in case it has not already done so. It would be difficult to punish the former chairman at this juncture since SEBI does not have any response regulation under which action can be taken for hurting investor confidence. There are regulations, including in the SEBI Act, under which action can be taken if investor confidence is harmed through some sort of illegal activity/trade, etc., which is not the case here.

Having said that, SEBI also has the responsibility to ensure that such instances do not occur in future, where investors lose money just because some senior functionary chooses to shoot from the hip.

Boost storage

Apropos, 'Good problem', (July 13), India's exponential expansion of solar power generation epitomises its renewable energy ambitions, yet the glaring inadequacy of storage infrastructure remains a formidable bottleneck.

Consequently, substantial quantities of surplus electricity produced during peak daylight hours are curtailed or dissipated, undermining economic efficiency and sustainability.

The transition to a dependable clean-energy ecosystem demands large-scale investments in battery storage, pumped-hydro facilities, and intelligent grid management systems capable of balancing intermittent supply with fluctuating demand.

Without synchronising storage capacity with generation growth, India's solar revolution will remain structurally constrained, compromising energy security, decarbonisation objectives, grid stability, and the nation's long-term developmental aspirations.

N Sadhasiva Reddy
Bengaluru

Maritime peril

Apropos 'Hormuz closure threatens India's gas, crude supplies' (July 13), the attack on a merchant vessel off the Oman coast, leaving one Indian crew member missing, underscores the grave risks posed by escalating tensions in the region.

With the threat of Strait of Hormuz's closure, India's crude oil and LNG supplies face growing vulnerability. The government's swift intervention and condemnation of the attack are timely, but they also highlight India's dependence on a volatile maritime corridor.

Safeguarding Indian seafarers and ensuring uninterrupted energy security remain paramount.

PV Prakash
Mumbai

Mutual conviction

This refers to 'Lessons from SBI's presence in mutual funds biz' (July 13), DN Ghosh's account of pitching the mutual fund idea to Rajiv Gandhi within 10 minutes is a reminder of how much institution-building once depended on individual conviction rather than committee consensus.

What strikes me most is the lesson for today's public sector financial institutions: professional management insulated from political interference, as SBI Mutual Fund evidently enjoyed, produces far better outcomes than bureaucratic caution.

Other public sector fund houses struggling with stagnant AUM growth would do well to study this model rather than continuing to operate as extensions of parent bank hierarchies.

AI shouldn't suck India dry

Expansion of data centre infra needs closer scrutiny

Rajesh Mehta
Tanya Nagpal

WATER STRESS. Proliferation of data centres can aggravate it

As countries race to secure a place in the AI economy, an uncomfortable question is beginning to emerge: what are the hidden resource costs of becoming an AI hub? India is making an increasingly ambitious bet on digital infrastructure. India's installed data centre capacity, estimated at roughly 1.3-1.5 GW today, is projected to expand to between 5 GW and 8 GW by 2030, driven by demand for cloud services, AI workloads, and data localisation requirements.

Large industrial groups, including Adani and Reliance, are investing aggressively in hyperscale infrastructure, while several States are competing to become digital hubs. According to Jefferies and Bernstein estimates, the scale-up could involve tens of billions of dollars in investment over the decade.

RESOURCE ALLOCATION

But digital infrastructure raises a resource allocation problem that India is uniquely vulnerable to, i.e., water. India is already the world's largest user of groundwater, accounting for roughly a quarter of global extraction. In many regions, withdrawals exceed natural recharge rates, particularly in urban and industrial centres. Bengaluru, Chennai, Hyderabad, and Delhi have all faced recurring concerns around water stress, while the World Economic Forum's Global Risks Report 2025 identified water supply shortages as India's most severe environmental risk over the coming two years. Against this backdrop, the expansion of data centre infrastructure deserves closer scrutiny.

Water demand varies significantly across data centres, depending on how facilities are designed, cooled, and located. Some newer facilities rely on closed-loop systems, liquid cooling, wastewater reuse, or hybrid approaches that significantly reduce freshwater dependence. Others may be located near coasts, allowing access to non-potable cooling alternatives. Yet even under more efficient designs, infrastructure at gigawatt scale creates a significant resource demand, especially when concentrated in already stressed regions. As India builds the infrastructure needed for an AI-driven economy, how should it weigh economic priorities against environmental constraints?

Countries like Ireland and Mexico have already gone down this path. In Ireland, data centres accounted for 21 per cent of total metered electricity consumption in 2023, eventually prompting restrictions on new grid connections around Dublin as infrastructure struggled to keep pace. In Mexico's Querétaro region, rapid data centre expansion has heightened concerns about water availability during periods of prolonged drought.

Several policy interventions are available and already visible in different parts of the world.

First, regulators could prioritise treated wastewater, recycled water, or harvested rainwater over freshwater withdrawals for industrial cooling wherever feasible. Second, environmental approvals could incorporate more rigorous water impact assessments, especially in regions already classified as water-stressed.

Third, policymakers could create stronger incentives for seawater cooling for hyperscale facilities where geography permits. Finally, greater disclosure requirements around data centre energy and water intensity would improve transparency in a sector where reporting remains uneven. This matters because current environmental accounting remains incomplete. Most companies report at the data-centre level rather than distinguishing AI-specific workloads, making precise estimates of AI's environmental footprint difficult. Policymakers are therefore making long-term infrastructure decisions amid meaningful uncertainty.

AI may be digital, but its costs are profoundly physical. India's challenge is not whether to build for the AI economy, but whether it can do so without exhausting the very resources that sustain growth.

Nuances in IBC-PMLA balance

JUDICIAL TASK. An adjudicatory Tribunal's role is to interpret, not recalibrate, the policy balance struck by the legislature

RAJASEKHAR VK

POWERS. NCLT's jurisdiction under IBC cannot be expanded into a general supervisory jurisdiction GETTY IMAGES

Judicial decisions require courts to reconcile competing statutory objectives. But that exercise is one of interpretation, and not of legislative revision. Where Parliament enacts two statutes serving different public purposes, the judicial task is to ascertain how they operate alongside each other within the statutory framework, not to redefine that framework according to broader notions of public policy.

The recent decision of the National Company Law Appellate Tribunal (NCLAT) in the case of *Value Wise Consultancy Private Ltd v. Deputy Director, Directorate of Enforcement*, raises this question on the interface between the Insolvency and Bankruptcy Code, 2016 (IBC) and the Prevention of Money Laundering Act, 2002 (PMLA), an area that has generated considerable litigation since the Code came into force. The NCLAT upheld the powers of the Enforcement Directorate (ED) to proceed against the corporate debtor, notwithstanding the pendency of insolvency proceedings. The result may not surprise practitioners familiar with the existing line of authority, but the reasoning adopted by the Tribunal deserves closer scrutiny.

What distinguishes the judgment is not merely its conclusion on jurisdiction, but the language through which that conclusion is reached. The judgment contrasts the interests of creditors with 'national interest,' describes the Code as not being intended to create a 'holy Ganges' to wash away criminality and cautions against insolvency becoming a camouflage for ill-gotten wealth. These observations frame the Tribunal's understanding of the relationship between the IBC and the PMLA, and provide the backdrop to its conclusion. But they also invite a larger inquiry: is it the function of an adjudicatory Tribunal to recalibrate the policy balance struck by the legislature, or simply to interpret and apply the balance that Parliament has built?

THE LEGAL ISSUE

The facts were relatively straightforward, though the legal issue was not. Before the commencement of the corporate insolvency resolution process, ED had provisionally attached certain assets of the corporate debtor, which was confirmed by the Adjudicating Authority under the PMLA but overturned by the Appellate Authority. During the moratorium, it also withdrew over ₹2.29 crore from the Corporate Debtor's bank account and issued directions affecting the recovery of its receivables. Following liquidation, the liquidator challenged these actions before the NCLT. The NCLT declined to entertain the challenge, holding that the issues fell within the statutory framework of the PMLA. On appeal, the NCLAT affirmed that view.

Had the judgment rested there, it would have simply reaffirmed an established jurisdictional principle. The Supreme Court had already made it clear in *Embassy Property Developments* that the NCLT's jurisdiction under section 60(5) of the Code cannot be expanded into a general supervisory jurisdiction over statutory authorities acting under other enactments. The real significance of *Value Wise* lies in the broader philosophy that the Tribunal invokes to explain why the insolvency process must yield where allegations of money laundering arise. It is that aspect of the judgment that merits closer examination, rather than the conclusion itself.

The NCLAT's reasoning proceeds on a broad conceptual distinction between the purposes served by the two enactments. It describes the PMLA as legislation enacted to fulfil India's international obligations to combat money laundering, deprive offenders of the proceeds of crime and protect the integrity of the financial system. By contrast, the IBC is characterised as legislation intended to resolve the financial distress of an insolvent company and maximise value for its stakeholders. On that premise, the Tribunal concludes that the two statutes operate in distinct domains and that the protections available under the IBC extend only to legitimately acquired assets. Assets alleged to represent the proceeds of crime fall outside the insolvency process.

> **Whether the relationship between insolvency law and anti-money laundering** enforcement should be recalibrated is ultimately a question for Parliament

There can be no quarrel with the proposition that the two enactments pursue different objectives. The PMLA combats money laundering; the IBC seeks timely resolution of insolvency and, failing that, an orderly liquidation. But that does not resolve the legal issue before the Tribunal.

The Tribunal was not required to decide whether combating money laundering serves an important public purpose. Parliament has already answered that question by enacting the PMLA. Nor was it required to determine whether insolvency proceedings should become a refuge for criminality. No one suggested that they should. Its task was the narrower question of identifying how Parliament intended these two statutes to operate when they converged upon the same factual situation.

COMPETING OBJECTIVES

This is not to suggest that Parliament ignored this tension. It recognised that insolvency law and criminal enforcement may intersect. Section 32A illustrates Parliament's legislative approach. When Parliament chose to accommodate competing objectives, it did so through carefully calibrated language. The significance of section 32A lies not in answering the present dispute, but in demonstrating that Parliament addressed the interface through legislation rather than broad appeals to public policy. Whether one agrees with that legislative choice is beside the point. The point is that the balance was Parliament's to strike.

By invoking national interest and the holy Ganges metaphor, the Tribunal explains why the conclusion appears intuitively compelling. But those considerations cannot themselves answer the question before it. Once Parliament has legislated upon the relationship between competing public objectives, and the constitutional validity of section 32A has been upheld by the Supreme Court in *Manish Kumar v. Union of India*, the court's task is to give effect to that legislative choice. It is not to reformulate it by reference to broader notions of public policy. Viewed in that light, *Value Wise* may ultimately be remembered less for the conclusion it reaches than for the questions it raises about the limits of judicial interpretation.

NCLAT's decision in *Value Wise* is undoubtedly an important addition to the evolving jurisprudence on the interface between the IBC and the PMLA. Its reaffirmation of the jurisdictional limits of the insolvency Tribunal is unlikely to be controversial. What may invite closer debate is the reasoning adopted to reach that conclusion. Whether the relationship between insolvency law and anti-money laundering enforcement should be recalibrated is ultimately a question for Parliament. Until then, the legitimacy of adjudication lies in giving effect to the balance that Parliament has so carefully crafted.

HCL, Teradyne of US in $70-m outsourcing deal

Global IT services company HCL Technologies has entered into a five-year, $70 million multi-service outsourcing deal with Teradyne, a US-based supplier of automatic test equipment. The deal will see HCL taking over the entire IT operations of the $1-billion company.

KKR of US to invest $515 m in Indian IT sector

The US-based private equity fund Kohlberg Kravis Roberts & Company (KKR) would be pumping in $515 million (₹2,300 crore) in India's information technology sector. According to the proposal submitted to the Foreign Investment Promotion Board (FIPB), the company, through its subsidiaries, would be engaged in the business of information technology and will also acquire majority stake in Flextronics Software Systems Ltd.

Nilgiri's in talks to offload stake

Nilgiri Dairy Farm, the Bangalore-based family-run retail chain, is in final-stage talks to offload substantial equity to a private equity firm and possibly another strategic investor. The UK-based private equity major Actis is believed to have emerged as the frontrunner for picking up the stake, estimated at 28 per cent.

Oil tankers still cross Hormuz on Oman side despite flare up

Julian Lee

At least two oil supertankers, both controlled by the same company, appeared to cross the Strait of Hormuz on a US protected route through the waterway, despite conflict reigniting in the region this week. The Nissos Kea popped up inside the Persian Gulf several hours after its Automatic Identification System signal stopped when approaching the waterway while the Nissos Heraclea made the opposite move, ship-tracking data compiled by Bloomberg show.

The two very large crude carriers are run by Piraeus, Greece-based Kyklades Maritime Corp. The company didn't immediately respond to a request for comment. The level of observable oil tanker traffic through the strait has slowed in the past 24 hours, after the US and Iran traded missile and drone strikes while an interim peace deal teeters on the edge of collapse. A growing number of tankers had been shuttling through Hormuz 'dark,' prior to the renewed hostilities and it's unclear what impact the latest flare up has had.

Both tankers appear to be engaged in ferrying crude from Qatar, with one loading at the Al Shaheen field and the other appearing to be heading in the direction of Halul Island, the tracking data show. Neither ship broadcast a destination while in the Persian Gulf, although both kept their transponders on for much of their time in the region.

US FORCES. Facilitating transit of oil

Partial position data from the inbound Greek ship as it crossed Hormuz suggest that it most likely used the southern route through the waterway, hugging the Omani coastline. The outbound carrier was also relatively close to the Oman side before it was going into Hormuz.

Separately, the US dismissed Iranian claims that only Tehran-designated routes are permitted.

In a post on social media late Thursday, Central Command said that US forces had helped to facilitate the transit of 380 million barrels since early May. A start date of May 1 would imply a flow rate of 5.4 million barrels a day. Adding Iranian flows would take the figure to well over six million barrels a day. Several ships using the Omani route in recent days have come under attack from Iran, with Tehran seeking to limit traffic to a northerly route passing through its waters. BLOOMBERG

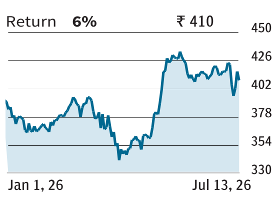
Biocon to see block deals, as Viatris plans to exit



Chennai: Viatris-owned Mylan plans to sell 5.64 per cent stake or 9.2 crore shares in the Bengaluru-based Biocon through block deals on Tuesday. According to a term-sheet seen by *businessline*, the floor price for the transaction has been fixed at ₹378.50 a share, which is at a 7.9 per cent discount to the current market price of ₹410.95. At the floor price, the deal size would be around ₹3,480 crore. This will mark a complete exit from the company by Mylan. In January 2026, Biocon had acquired Mylan's stake in Biocon Biologics through a combination of a share swap and cash consideration. As part of the transaction, Mylan had received a preferential allotment of Biocon shares. OUR BUREAU

Laser Power and Infra IPO subscribed 38.94 times

Bengaluru: Laser Power and Infra's ₹742-crore initial public offering (IPO) was subscribed 38.94 times on the final day of bidding, driven by robust demand from qualified institutional buyers (QIBs) and non-institutional investors (NIIs). The QIB category was subscribed 92.25 times, while the NII portion saw bids for 43.34 times the shares on offer. The retail investor segment was subscribed 6.59 times. According to a circular uploaded on the BSE website, the company allotted 1.04 crore shares to anchor investors at ₹214 per share, the upper end of the IPO price band, aggregating to ₹222.6 crore. SBI Funds Management expects its public issue to bring back investors

BUSINESS OUTLOOK. Fund house plans to sharpen focus on scaling up institutional fund management vertical

Our Bureau
New Delhi

SBI Funds Management, the asset management company of SBI Mutual Fund, on Monday expressed confidence that its upcoming initial public offering (IPO) will bolster market sentiment. The fund house also announced plans to sharpen its focus on scaling up its institutional fund management vertical.

The IPO is opens on Tuesday and closes on July 16 with a price band of ₹545–574 per share.

Under the IPO, while SBI will offload 6.3 per cent of its holding, the joint venture partner Amundi will sell 3.7 per cent of its holding. Following the IPO, SBI's holding will decline to 55.46 per cent and Amundi's to 32.56 per cent.

REDUCED SIZE

The issue size was earlier planned at ₹11,693 crore but was reduced after SBI last week raised ₹1,655 crore from a group of investors. At the higher end of the price band, the company is valued at ₹1.2 lakh crore.

"Amid global uncertainties, trust is certain," Debasish Mishra, MD & CEO of SBI Funds Management, said.

He also hoped that this IPO will boost the sentiment in the market.

"We want to bring confidence in the market," he said, while adding that the fund aims to become fund manager of every Indian.

He also expressed confidence that the offering will revive investor interest and pave the way for more public issues.

"The IPO market has been dry due to geopolitical uncertainties, so someone had to take the responsibility. We are confident our issue will bring investors back to the market," Mishra said.

Echoing a similar view, Joint CEO DP Singh said the offering is expected to encourage more companies to tap the primary market.

SBI Mutual Fund provides Portfolio Management Services (PMS) and Alternate Investment Fund (AIF) under the institutional fund management business. "Beyond mutual funds which are bread and butter, we would like to grow substantially into PMS and expand international investment... with Amundi, we will penetrate markets across the world... So, PMS, international and alternates will be our priority in addition to mutual funds," Mishra said.

AIF PLANS

On AIF, he said, the company is going to build more capability and is contemplating a special situation fund. The company is also looking at the private equity space, he said, adding, so "you will see a lot of products on the AIF side."

LAUNCH PAD. (from left) Amandeep Sidhu, Vice President, ICICI Securities; Debasish Mishra, MD & CEO; and DP Singh, Joint CEO, SBI Funds Management, at a press conference in New Delhi

S&P 500, Nasdaq decline as Iran tensions jolt sentiment

Reuters

The S&P 500 and the Nasdaq fell on Monday as a fresh escalation between the US and Iran in the Gulf pushed oil prices higher and unnerved investors, while chip stocks extended their recent declines.

Iran and the US exchanged attacks over the weekend and Tehran said it had closed the Strait of Hormuz, a vital conduit for global energy supplies. The escalation undercuts an interim US-Iran agreement signed last month that aimed to reopen the strait and end the war after 60 days of negotiations.

The tech-heavy Nasdaq led declines, with semiconductor stocks among the biggest losers.

"The escalating Iran conflict is testing whether the stock market's broad-based growth can hold, and the market will have to balance the positive of corporate earnings strength with the negative of geopolitical risks," said Alex Guiliano, Chief Investment Officer at Resonate Wealth Partners.

Memory-chip makers, which have had a sharp rally this year,extended their recent pull back, with Micron Technology and Sandisk dropping 7.2 per cent and 9.5 per cent, respectively.

Four out of 11 sectors on the S&P 500 were trading in the red, with information technology declining 1.3 per cent to become the top loser.

US-listed shares of South Korean chipmaker SK Hynixfell 7 per cent after a blockbuster Nasdaq debut on Friday.

At 9.59 am ET, the Dow Jones Industrial Average rose 186.23 points, or 0.35 per cent, to 52,831.59, the S&P 500 lost 12.56 points, or 0.17 per cent, to 7,562.31 and the Nasdaq lost 213.76 points, or 0.82 per cent, to 26,067.85.

Markets stage comeback, ignoring Korea rout

Anupama Ghosh
Mumbai

The markets defied a sharp sell-off in Korea and Japan on Monday, staging a dramatic intra-day comeback after opening deep in the red. Robust earnings from the IT sector gave investors reason to buy the dip rather than flee.

With much of Asia crumbling — Seoul's market fell 9 per cent and Tokyo dropped nearly 2 per cent following fresh US strikes on Iran and Iranian retaliations across four countries — India's resilience stood out.

The Nifty 50 closed at 24,211.65, up 4.75 points, after recovering more than 250 points from day low of 24,000.20. The BSE Sensex ended at 77,616.40, gaining 47 points. The Nifty IT index was the session's standout, surging 3.60 per cent, with TCS, Infosys, HCL Technologies, and Tech Mahindra among the top Nifty gainers.

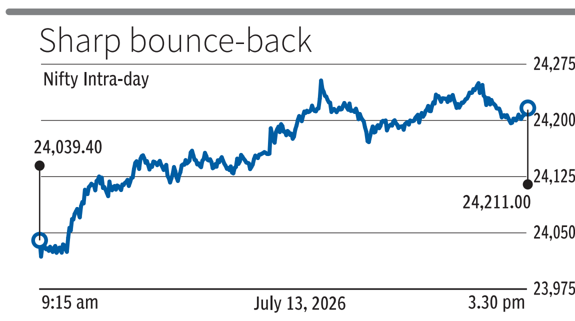
LTIMindtree reported a 17 per cent jump in profit and 18 per cent revenue growth over the weekend, extending the positive momentum from TCS results.

"Monday's session was more impressive than the flat close suggests... India ended flat. That is a statement," said Sarvam Goel, Founder, Pocketful.

On the sectoral front, gains were concentrated. IT, Media, and Consumer Durables outperformed, while FMCG, Metals, Cement and Healthcare ended in the red, with FMCG the worst performer.

The Nifty Midcap 100 edged up 0.01 per cent and Nifty Smallcap 100 gained 0.03 per cent. Notably, the Nifty Midcap 100 registered a fresh all-time high during the session.

The Q1-FY27 earnings season has so far provided some relief. "The initial batch of broader Q1 earnings has come in better than expected, suggesting that earnings downgrades for the quarter may be less severe than previously anticipated," said Siddhartha Khemka, Head of Research at Motilal Oswal Financial Services.



Goldman Sachs sees Nifty at 26,500 by June 2027 on return of foreign flows

Our Bureau
Bengaluru

Global brokerage Goldman Sachs has turned positive on India, setting a June 2027 target of 26,500 for the Nifty, implying around 10 per cent upside from current levels, as it expects foreign institutional investor flows to return and domestic recovery to strengthen.

The brokerage said India's outlook had improved on the back of lower commodity prices, a stable rupee and resilient growth. It added that ultra-light foreign positioning leaves ample room for overseas inflows to return to Indian equities.

Goldman Sachs expects a rotation in market leadership from growth to value stocks and from mid-cap companies to large-caps.

The brokerage said banks and large-cap stocks are likely to be key beneficiaries if foreign outflows reverse. It added that stable rupee conditions and bond inflows favour domestic sectors over exporters.

The brokerage has identified banks, utilities, tourism and defence as its preferred investment themes in the Indian market.

SECTOR CHANGES

As part of its sector changes, Goldman Sachs upgraded utilities to overweight and raised industrials to market weight. The brokerage downgraded staples to market weight from a more positive stance, while cutting metals and mining as well as cement to underweight.

Goldman Sachs retained its overweight stance on banks, energy refiners, technology, media and telecom, and defence stocks.

It maintained underweight ratings on IT exporters, pharma exporters and oil marketing companies and downstream oil businesses.

Goldman Sachs said a potential super El Niño could emerge as a headwind for rural-focused stocks but may act as a catalyst for power utilities.

SC refuses to stay SAT relief for Bombay Dyeing, Wadias

Our Bureau
Mumbai

The Supreme Court on Monday refused to stay the Securities Appellate Tribunal's (SAT) order exonerating Bombay Dyeing and Wadia Group chairman Nusli Wadia in an alleged fraudulent accounting case, while issuing notice on SEBI's appeal against the ruling.

A Bench of Justices BV Nagarathna and R Mahadevan, however, said that the SAT's 2:1 split verdict would not be treated as a precedent in similar matters before the tribunal. "Since the impugned order is a split verdict, 2:1, we observe that the same shall not be a precedent in similar matters before SAT," the Bench said.

The court directed Bombay Dyeing, Wadia and other respondents to file their counter affidavits and ordered that all four connected appeals be heard together.

The dispute relates to 11 memoranda of understanding (MoUs) executed between Bombay Dyeing and group firm SCAL Services Ltd for the bulk sale of flats in Mumbai.

SEBI had alleged that the transactions enabled Bombay Dyeing to recognise revenue of ₹2,492.94 crore and profit before tax of ₹1,302.20 crore between FY12 and FY18.

SEBI ALLEGATIONS

According to the regulator, the MoUs were sham transactions designed to artificially inflate the listed company's financial statements and mislead investors. In its October 2022 order, SEBI imposed monetary and market access penalties exceeding ₹15 crore on Bombay Dyeing, promoters Nusli, Ness and Jehangir Wadia, SCAL Services, senior executives and directors.

However, in January this year, SAT, by a 2:1 majority, set aside SEBI's order. Technical Members Meera Swarup and Dheeraj Bhatnagar held that the projects were genuine and that the flats were eventually constructed and sold, concluding that SEBI had failed to establish fraud or artificial inflation of profits. However, Presiding Officer Justice PS Dinesh Kumar said SCAL functioned as an extended arm of Bombay Dyeing and that the company had recognised revenue and profits in a deceitful manner.

Appearing for SEBI, senior advocate Arvind Datar said Bombay Dyeing had reduced its stake in SCAL from 49 per cent to below 19 per cent on March 29, 2012, causing SCAL to cease being an associate company.

Datar told the court that 11 MoUs worth about ₹3,333 crore were executed over two years and alleged that while Bombay Dyeing recognised sale proceeds in its books, SCAL did not record corresponding purchases and instead accounted only for an agency commission.

Senior advocates Abhishek Manu Singhvi and Darius Khambata, appearing for Bombay Dyeing and the Wadia Group, opposed SEBI's request for a stay, submitting that SAT had fully exonerated the respondents on facts and that several findings upholding the genuineness of the transactions had not even been challenged by the regulator.

Wadia Group Chairman Nusli Wadia

DMart slips 2% after Q1 earnings

Our Bureau
Bengaluru

Avenue Supermarts (DMart) Ltd shares closed 2 per cent lower at ₹3,994.10 on the NSE after hitting a day's low of ₹3,908 on Monday after it reported June quarter results and announced plans to raise up to ₹1,000 crore through NCDs.

The company reported a 12.8 per cent y-o-y rise in standalone profit after tax (PAT) to ₹936 crore for the quarter ended June 30, 2026.

BULLISH VIEWS

Elara Capital, which initiated coverage with an 'Accumulate' rating and a target price of ₹4,700, said it expects revenue CAGR of 18.1 per cent and PAT CAGR of around 18 per cent during FY26-FY29.

Morgan Stanley maintained its 'Overweight' rating with a target price of ₹5,083. It said Q1 margins were broadly in line with expectations and continues to like the stock because of its large addressable market and strong business model, while awaiting further commentary from management at the annual investor meet.

Bernstein reiterated its 'Outperform' rating with a target price of ₹5,000, saying it expects the cost curve to become more supportive over the next two to three quarters. "DMart Ready remains a distraction rather than a differentiator."

Citi maintained its 'Sell' rating and cut its target price to ₹3,400 from ₹3,650. The brokerage said metro same-store sales growth has stalled as quick commerce pressure intensifies. It said that profit growth has trailed revenue growth in 10 of the last 13 quarters due to rising quick commerce competition, lower other income and higher interest costs.

Goldman Sachs maintained its 'Sell' rating with a target price of ₹4,000. It said revenue growth slowed despite a large number of store openings towards the end of the March quarter and higher FMCG inflation.

BROKER'S CALL.

YES Securities

INDIAN BANK (BUY)
Target: ₹1,050
CMP: ₹842.05

Net Interest Margin (Global) was at 3.29 per cent, up 6 bps q-o-q and 6 bps y-o-y. Yield on advances was at 8.09 per cent, up by 2 bps q-o-q but down -49 bps y-o-y. Indian bank has remained cautious on thinly priced loans, either exiting the loans or improving rates.

The bank may achieve the upper end of the prior guidance of 3.1-3.25 per cent. Incrementally, MCLR could impact margin negatively by 2 bps, ceteris paribus.

Management does not see any trigger for margin to either go up or down from here. Advances are up 2.6 per cent q-o-q and 13.9 per cent y-o-y.

Management stated that one should be mindful of the gap between credit and deposit growth and the same should not start eating into net interest margin.

Gross NPA additions amounted to ₹1,300 crore for Q1-FY27 (₹1,390 crore during Q4-FY26), translating to an annualised slippage ratio of 0.77 per cent for the quarter. Provisions were ₹1,190 crore, down by -2.5 per cent q-o-q but up 73 per cent y-o-y, translating to calculated annualised credit cost of 72bps. The bank has also made an incremental floating provision of ₹1,000 crore towards ECL during the quarter.

We maintain Buy rating on with a revised price target of ₹1,050. We initiated Indian Bank with Buy, in our report released in March 2022, since then, it has returned nearly 6x. We value the bank at 1.4x FY28 P/BV for an FY27/28/29E RoE profile of 15.9/15.6/15.1 per cent.

SBI Securities

INDIA NIPPON ELEC (BUY)
Target: ₹1,325
CMP: ₹1,238.05

India Nippon Electricals Ltd (INEL) is an automotive electronics and ignition systems manufacturer, primarily serves 2W, 3W & general-purpose engine OEMs.

It operates three manufacturing facilities located in Tamil Nadu, Puducherry and Haryana, supported by a dedicated R&D and Technology Centre in Hosur.

It exports to more than 10 countries across North America, Europe, ASEAN, and other international markets. INEL retained its No 1 position in the Flywheel Magneto segment and continued to gain market share across key OEM platforms, premium motorcycles, ISG products, and electronic components.

The company's aftermarket business contributed ₹117 crore in FY26 (11 per cent of revenue), up from 8 per cent (₹38 crore) of revenue in FY21, reflecting growing brand strength and distribution reach. INEL is transforming from a traditional ignition systems supplier into a mobility electronics company, expanding its portfolio across EFI ECUs, sensors, ISG systems, motor controllers, traction motors, DC-DC converters, TPMS, and display clusters. The company is expanding its presence across North America, Europe, ASEAN, Japan and other global markets. Increasing exports provide diversification and reduce dependence on the domestic market. Company derives major portion of revenue from TVS Motors which has been outperforming the overall two-wheeler industry growth.

TODAY'S PICK.

Firstsource Solutions (₹265): BUY

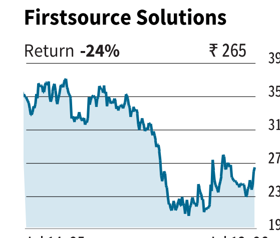
Gurumurthy K
bl. research bureau

The short-term outlook is bullish for Firstsource Solutions. The stock has been moving up very well over the last few days.

The recent rise has taken the share price well above a key resistance level of ₹253. The 2 per cent rise on Monday indicates that the upmove is gaining momentum.

The level of ₹253 will now act as a good resistance-turned-support and limit the downside. Firstsource Solutions share price can rise to ₹285-₹290 in the coming weeks.

Traders can buy Firstsource Solutions now at ₹265. Accumulate on dips at ₹256.



Keep the stop-loss at ₹247 initially. Trail the stop-loss up to ₹270 as soon as the stock goes up to ₹275. Revise the stop-loss higher to ₹277 and ₹283 when the share price touches ₹281 and ₹287 respectively. Exit the long positions at ₹290.

Note: The recommendations are based on technical analysis. There is risk of loss in trading

Jio Platforms replaces CEO Thomas with Pawar

New Delhi: Jio Platforms has replaced Kiran Thomas as Chief Executive Officer with Pankaj Pawar ahead of its planned initial public offering, according to the company's draft IPO papers. The draft papers, submitted to capital markets regulator SEBI in June, mentioned that Thomas resigned as CEO on March 23, with Pawar taking charge the following day, March 24. Pawar, 53, also serves as Managing Director of Reliance Jio Infocomm Ltd. PTI

Intellect Design bags 3 NBFC customer deals

Chennai: Intellect Design Arena on Monday announced three strategic customer wins for its eMACH.ai Custody business to establish modern custody and asset servicing businesses. eMACH.ai Custody, part of Intellect's AI-First Wealth and Capital Markets portfolio, helps non-bank financial institutions to expand beyond their traditional brokerage, wealth management and capital markets businesses into custody and asset servicing. It also helps them with adjacent capabilities such as fund accounting, transfer agency, investor servicing and post-trade operations. OUR BUREAU

'Govt shielded domestic carriers from global stress'

POLICY CUSHION. Interventions helped insulate airlines from global disruptions: Minister

Rohit Vaid
New Delhi

The Centre views civil aviation as a priority sector and is prepared to intervene to ensure operational as well as financial stability whenever the industry faces external shocks, Civil Aviation Minister Kinjarapu Rammohan Naidu told *businessline*.

In an exclusive interview, Naidu said that the government's response during the recent West Asia crisis reflected this approach, under which the aviation sector received strategic policy support in view of its growing contribution to the economy and its increasing importance for millions of Indian travellers.

"Today, aviation is a priority sector. The government is keeping a watch and doing what is necessary to bring stability to the sector," Naidu said.

SERIES OF MEASURES

According to the Minister, the Centre's intervention helped insulate Indian carriers from the financial stress witnessed by several airlines globally following the disruption in West Asia.

> The idea was that when the sector faces a challenge, every stakeholder has to contribute
>
> **K RAMMOHAN NAIDU,**
> Civil Aviation Minister

During the crisis, the government introduced a series of measures to cushion the sector, including capping aviation turbine fuel (ATF) prices, limiting increases in landing and parking charges at airports, extending the emergency credit line guarantee scheme to airlines and creating a ₹10,000-crore price stabilisation fund to address fuel price volatility. It also engaged with States to reduce value added tax (VAT) on ATF, particularly at major aviation hubs.

"The idea was that when the sector faces a challenge, every stakeholder has to contribute," Naidu said.

The Minister said aviation had evolved into a critical pillar of India's economic growth over the past decade.

"As aviation has grown, it has become closely linked with the aspirations of the common man. Because of the growth we have achieved, the government now considers aviation to be a priority sector," he said.

UDAN SCHEME

India currently operates around 165 airports with a fleet of about 800 aircraft, while daily passenger traffic has crossed the 5 lakh-mark, a level Naidu described as "the new normal."

He said the modified UDAN regional connectivity scheme would anchor the next phase of aviation growth. Approved with an outlay of around ₹29,000 crore, the revamped programme extends Viability Gap Funding from three years to five years on a tapered basis, increases the minimum weekly flight requirement from seven to 14, provides operations and maintenance support for smaller airports and envisages the development of 100 airports under a challenge-mode framework.

"This is not merely an extension of the existing scheme. We have studied what worked well over the last 10 years, understood the feedback and redesigned it into a much more comprehensive programme," Naidu said.

Looking beyond regional connectivity, the Minister said the government is repositioning aviation public sector undertakings as strategic growth enablers rather than pursuing privatisation.

He cited that organisations such as Alliance Air, Pawan Hans, AI Engineering Services Ltd and AI Airport Services Ltd continue to play a strategic role in regional connectivity and specialised aviation operations, with government support intended as growth capital rather than financial assistance.

Tata Capital to acquire 88.6% stake in Yogakshemam Loans

Our Bureau
Mumbai

Tata Capital Ltd (TCL) said it will acquire about 88.6 per cent of the issued and paid-up share capital (on a fully diluted basis) of Thrissur-based Yogakshemam Loans Ltd, providing it an access to an established gold loan platform with an existing branch network, customer franchise and experienced management team.

TCL, an upper layer non-banking finance company (NBFC), will subscribe to equity shares of the unlisted, base-layer NBFC for an aggregate consideration of approximately ₹93 crore. As at March-end 2026, the target company had assets under management of approximately ₹708 crore.

EQUITY BUYING

The consideration payable by TCL for purchase of equity shares from the sellers (Unnikrishnan Idicharm Veetil, Sathyalakshmy M, Abhijith Unnikrishnan, Ramachandran Ottapathu, Jalajkumari Ramachandran, Vidya Sanooj and Sathianarayanan M) will be determined in accordance with the terms of the securities subscription and purchase agreement (SSPA), based inter alia on the net worth of the target as on September 30, 2026, per TCL's regulatory filing. The cost of acquisition, in each case (seller) is subject to a pre-money equity valuation of the target not exceeding ₹318 crore.

Rajiv Sabharwal, Managing Director & CEO, TCL

As at March 31, Yogakshemam Loans Ltd, which was incorporated in February 1991, operated through a network of 162 branches across Kerala, Karnataka, Tamil Nadu and Andhra Pradesh. As per the audited financial statements of the target for FY26, it generated a turnover of ₹140.38 crore, with a profit after tax of ₹14.21 crore.

Rajiv Sabharwal, Managing Director & CEO, TCL, said: "This transaction marks Tata Capital's entry into the gold loan business, adding a secured lending product with significant growth potential to our retail lending portfolio and supporting our strategy of building a diversified lending franchise."

It may be pertinent to mention here that in June 2025, L&T Finance Ltd (LTF) had announced the completion of the transfer of the gold loan business of Paul Merchants Finance Private Ltd (PMFL), a wholly-owned subsidiary of Paul Merchants Ltd., to LTF. The acquisition includes PMFL's 130 branches, approximately 700 employees, and business transfer of its gold loan book size of ₹1,350 crore to LTF.

Sudipta Roy, Managing Director & CEO of LTF, then said: "LTF has one of the largest rural franchises of approximately 1.6 crore rural customers and hence, this acquisition is a natural contiguous cross-sell product extension of our business.

"Our rural workforce of 20,000 feet-on-street will provide an immediate force multiplier, enabling active generation of gold loan leads within our existing customer base... The gold loans business will fill a crucial gap in our portfolio, introducing a secured, high-yield product that will benefit both our rural and urban customers."

We will deposit ₹50 cr in 45 days, SpiceJet tells HC on dispute with Kal Airways

Press Trust of India
New Delhi

SpiceJet and its promoter Ajay Singh on Monday assured the Delhi High Court that they will deposit ₹50 crore in 45 days with the court registry in connection with a legal dispute with media baron Kalanithi Maran and Kal Airways.

Justice Subramonium Prasad, who has earlier directed SpiceJet and Singh to deposit around ₹144 crore in the case arising from an arbitral award against them in their dispute with Maran, was told that the remaining ₹94.50 crore would also be deposited in the next 90 days.

On May 4, the bench dismissed pleas by SpiceJet and Singh seeking a review of a January 19 order to deposit over ₹144 crore in the case.

The Supreme Court, on May 19, however, asked the airline to approach the High Court for extension of time to make the deposit.

Senior counsel for SpiceJet and its promoter on Monday informed the court that they had received financial assistance from the Central government amid the ongoing West Asia crisis and undertook to pay ₹50 crore as the first instalment.

He further said the balance would be paid in the next 90 days.

Considering the stand, the court deferred the hearing till November on the airline's plea against the arbitration award. It listed the matter in September as well on the issue of deposit of ₹144 crore with the registry.

Senior advocate Jayant Mehta appeared for Maran, along with law firm Karanjawala & Co.

Senior advocate Mukul Rohatgi appeared for SpiceJet and Singh.

On January 19, the court had directed SpiceJet and Singh to deposit ₹144 crore with the registry within six weeks against an admitted liability of ₹194 crore pursuant to the arbitration award against them in their dispute with Maran. On March 18, the time to make the deposit was extended by four weeks.

The matter arises from a dispute regarding the non-issuance of warrants in favour of Maran after the transfer of ownership to Singh, the controlling shareholder of SpiceJet.

Cochin Shipyard bids for Bharat Container Shipping Line orders

V Sajeev Kumar
Kochi

Pinning its hopes on the Shipping Ministry's demand aggregation initiative to centralise India's shipbuilding requirements, Cochin Shipyard Ltd (CSL) has submitted bids under the newly-floated Bharat Container Shipping Line (BCSL) consortium to build various types of vessels, including tankers.

Jose VJ, Director (Finance) of CSL, told *businessline* that the consortium was formed to reduce India's dependence on foreign shipping lines and cut freight outgo, which currently stands at around $75 billion annually, largely paid to foreign-flagged vessels for crude oil imports.

It is estimated that India would require around 430 ships over the next 10 years, involving an estimated investment of ₹2 lakh crore, he said.

CAPEX PLAN

Against this backdrop, the Centre has launched the demand aggregation initiative to consolidate shipbuilding requirements of the four major PSU oil marketing companies, ONGC and SCI, with these ships to be built in India. The initiative is expected to benefit shipyards across the country.

Jose, who is also holding additional charge as Chairman and Managing Director, said CSL is well positioned to capitalise on the opportunity with a ₹6,000 crore capex plan and its newly commissioned large dry dock facility.

The Ministry's initiative would strengthen the domestic shipbuilding ecosystem as also envisioned under the Maritime India Vision 2030 and the Maritime Amrit Kaal Vision 2047, which aim to elevate India from its current global shipbuilding market share of less than 1 per cent to the 10th position by 2030 and fifth by 2047.

> We are strategically positioned to undertake commercial shipbuilding and ship repair orders for both domestic and export markets
>
> **JOSE VJ,**
> Director (Finance), CSL

"We already have export orders worth ₹7,300 crore. With shipbuilding/repair facilities in Malpe, Mumbai, Kolkata, the Andaman and Nicobar Islands, and an upcoming facility at Vadinar, we are strategically positioned to undertake commercial shipbuilding and ship repair orders for both domestic and export markets," he said.

CSL also plans to establish a steel block fabrication facility near International Container Transshipment Terminal, Vallarpadam in Kochi with an investment of around ₹4,000 crore.

The company is also investing in a 72-year-old European ship design firm, Conoship, specialising in short-sea vessels, a move expected to strengthen CSL's position as a preferred shipyard for overseas clients.

In addition, CSL has formed a joint venture with HBL Engineering Ltd, Hyderabad to develop marine battery systems. The venture aims to localise marine battery solutions and energy management systems for ships, which are currently imported.

With an order book of ₹22,300 crore, CSL posted its highest-ever turnover of ₹5,022 crore in FY26 and a profit after tax of ₹717 crore. Backed by strong demand, the shipyard is targeting 12-15 per cent growth in the next fiscal.

Jose added that the ongoing West Asia crisis has disrupted supply chains and increased logistics costs, as the shipbuilding industry relies heavily on imported components, including propulsion systems and engines.

Bata India crosses 2,000 retail stores

Meenakshi Verma Ambwani
New Delhi

Footwear major Bata India said that it has crossed the 2,000 retail stores-mark, positioning it as the most expansive footwear network.

The company said it is eyeing 3,000 stores in the coming years, which will focus primarily on tier-3 and tier-4 markets through the franchise-led growth model.

Badri Beriwal, Chief Strategy & Business Development Officer, Bata India, said: "Our focus now is on building a future-ready organisation driven by retail scale, omnichannel capabilities and manufacturing strength. As Bata's most strategic market globally, India continues to offer significant headroom for growth, particularly across emerging towns and cities. Going forward, we will continue to expand accessibility through a balanced mix of company-owned and franchise-led stores while strengthening our digital and omnichannel capabilities."

With nearly 90 per cent of its stores operating as hyper-local fulfilment hubs, the company expects digital channels to contribute 20–25 per cent of overall business over the next few years as it continues to invest in younger consumer segments, app-led engagement and omnichannel retail experiences.

The company is also expanding its zero-based merchandising format to around 775 stores and plans to scale this to nearly 900 stores by the end of 2026.

Auto M&A, PE deals fall to $1.46 b in H1

Amit Vijay Mohile
Mumbai

The automotive sector recorded 55 mergers, acquisitions and private equity (PE) transactions worth $1.46 billion in the first half of 2026, against 59 deals valued at nearly $2.8 billion in the preceding six months, signalling a sharp slowdown in capital deployment despite only a modest decline in deal volumes.

The June quarter reinforced the trend, with transactions falling to 20 from 35 even as deal value eased only to $717 million from $745 million, according to Grant Thornton Bharat's latest *Automotive Dealtracker*.

The contrast between a 7 per cent decline in deal volumes and a nearly 48 per cent fall in investment value suggests capital has not disappeared from India's automotive sector — it has become far more concentrated, flowing primarily to businesses with scale, proven business models and differentiated technology. Public-market fundraises by Ather Energy ($156 million) and Ola Electric ($81 million), together with a handful of marquee transactions, helped cushion the decline in overall investment during the June quarter.

CAPITAL DISCIPLINE

Grant Thornton said the industry entered 2026 amid evolving trade policies, geopolitical tensions, supply-chain realignment and tighter capital allocation, prompting investors to back businesses with proven operating performance, differentiated products and clearer paths to profitability rather than broad exposure across the automotive value chain.

Automotive dealtracker

Metric	H1 2025	H1 2026	% Change	What it means
H1 deal volume	59 deals (H2 2025)	55 deals (H1 2026)	▼ 7	Activity remained relatively stable
H1 deal value	~$2.8 b	$1.46 b	▼ 48	Capital deployment slowed sharply
Q2 total deals	35	20	▼ 43	Lowest quarterly volume since Q2 2023
Q2 total value	$745 m	$717 m	▼ 4	Larger deals cushioned the decline
Private equity deals	28	13	▼ 54	Lowest PE activity since Q1 2021
Private equity value	$702 m	$341 m	▼ 51	Investors became more selective
M&A deals	7	5	▼ 29	Strategic acquisitions slowed
M&A value	$43 m	$138 m	▲ 221	Driven by KPIT-Cymotive acquisition

Source: Grant Thornton Bharat

Excluding the two QIPs, the sector recorded 18 M&A and PE transactions worth $479 million, down 36 per cent from the previous quarter. Private equity activity saw the sharpest correction, with deal volumes falling to 13 from 28 and investment value dropping to $341 million from $702 million, marking the weakest quarterly PE activity since Q1 2021. Overall deal volumes during Q2 were the lowest since Q2 2023.

"While deal activity slowed during the quarter, investment remained focused on businesses driving the future of mobility. We are seeing continued interest in EVs, mobility platforms and automotive technologies, with investors backing companies that have demonstrated scale, differentiated capabilities and a clear growth path," said Saket Mehra, Partner and Auto & EV Industry Leader, Grant Thornton Bharat.

KEY DEALS

The five largest PE transactions accounted for nearly 96 per cent of total PE value, led by Rapido's $240-million fundraise from Prosus, WestBridge Capital and Accel. JBM Ecolife Mobility followed with a $47-million investment, while Exponent Energy, Simple Energy and Astranova Mobility completed the list of the quarter's largest fundraises.

The report also highlighted a divergence within the EV ecosystem. Electric-vehicle companies accounted for 54 per cent of total PE volumes, but mobility-as-a-service captured 84 per cent of investment value, suggesting investors are increasingly backing scalable mobility platforms and recurring-revenue business models alongside vehicle electrification. M&A activity followed a different trajectory.

Although the number of acquisitions declined to five from seven, reported value rose to $138 million from $43 million, driven largely by KPIT Technologies' $120-million acquisition of Israeli automotive cybersecurity specialist Cymotive Technologies, which accounted for 87 per cent of total M&A value.

Cross-border acquisitions accounted for 60 per cent of M&A volumes and 94 per cent of reported value, underscoring the growing importance of overseas software, cybersecurity, connected mobility and advanced engineering capabilities as automakers prepare for software-defined and electric vehicles.

OUTLOOK

Grant Thornton expects investment to remain focused on electrification, mobility platforms and software-led automotive businesses even as companies navigate evolving emission regulations, critical mineral security and geopolitical risks.

It also expects the recently concluded India-UK Comprehensive Economic and Trade Agreement (CETA) to improve market access for Indian component makers and engineering companies while encouraging deeper cross-border collaboration in manufacturing, technology and R&D.

"As the sector evolves, technology-led investments are expected to continue shaping deal activity," Mehra said.

Volkswagen likely to cut 50,000 more jobs

Berlin: Volkswagen may need to cut about 50,000 more jobs to match the competitiveness of rivals, its CEO told staff in an internal memo. Oliver Blume is battling to streamline Europe's biggest carmaker, whose profits have slumped as it faces billions of euros in tariff costs, stiff competition in China and pressure on its German manufacturing network. REUTERS

Akzo Nobel rejects $8.6 b Nippon offer for paint unit

Akzo Nobel NV's board rejected an offer from Nippon Paint Holdings Co for its decorative paints business. The new €7.5 billion ($8.6 billion) offer follows multiple approaches for a deal with Akzo Nobel, which said on Monday that the proposal "significantly undervalues" the paints unit. The offer from Nippon is another bid to derail the proposed Akzo Nobel–Axalta deal as the industry undergoes a wave of consolidation. BLOOMBERG

TCS to take on larger share of AI model and inference costs

FRESH APPROACH. Model could signal a shift in IT firms' strategy with enterprise AI

Vallari Sanzgiri
Mumbai

Tata Consultancy Services (TCS) is beginning to shoulder a larger share of the infrastructure costs involved in deploying artificial intelligence solutions, signalling a shift in how IT services companies are commercialising enterprise AI.

While customers initially bore most of the AI model and inference costs, the company is now making upfront investments through partnerships with frontier AI providers and managing AI infrastructure as part of its offerings, Chief Financial Officer Samir Seksaria said.

"Initially it starts with the client bearing the cost but increasingly we are having it at our end as well. We have invested into a lot of frontier models through partnerships. We are doing pre-buy commits and an end-to-end management of the AI-related work. So, it is a combination right now," said Seksaria.

AI coding can cost up to ₹36 lakh per year, per a Gartner analyst in conversation with *businessline* previously. This cost is higher than the average annual salary of ₹12-24 LPA given to a software engineer with 5-8 years of experience.

> Initially, it starts with the client bearing the cost but increasingly we are having it at our end as well
>
> **SAMIR SEKSARIA**
> Chief Financial Officer, TCS

CAREFUL INVESTMENTS

In the latest quarter, TCS reported more cautious investments from clients of particular verticals like consumer business, owing to geopolitical headwind and inflation.

However, the company continues to count on long-standing verticals such as banking financial services, tech services and regional markets.

So much so that the company remains bullish on its margin aspiration of 26 per cent.

"We drive our projects, teams to get closer to 26 per cent. We have demonstrated in the past 3-4 years also that we can get to 26 per cent, make the right investments, required for long-term goals," said Seksaria.

For now, the company makes growth investments necessary to derive long-term value while managing efficiency levers, operating leverage.

Particularly, it talked about huge headroom in AI projects where almost every customer's business value chain has to be re-imagined to truly deliver the full potential of the technology.

"We do see scope in terms of continually pushing the levers. In fact, these investments also should lead to productivity improvement, which then we can reinvest back into the business," said Seksaria.

HR POLICY

The AI usage has shaped the company's HR policy as well. TCS has enough agents to deliver better productivity, experience, value to customers. In line with the aspiration to become the world's largest AI tech services company, the company is encouraging every one of its people to build agents.

"When we are going to the campuses and hiring, some of the talent that we are bringing are very naturally AI. They are able to very comfortably use this to augment themselves and deliver. That is what we are trying to build on and scale," said Sudeep Kunnumal, Chief Human Resources Officer at TCS.

Wipro Q1 preview: Brokerages see profits fall, guidance decline

Sanjana B
Bengaluru

Wipro is expected to report a muted June quarter when it announces its results on July 16, with brokerages forecasting a decline in constant currency (cc) revenue, lower profit and margin pressure, while also expecting the IT major to guide for another sequential revenue decline of 2 per cent to flat in the September quarter.

Brokerage estimates suggest Wipro will report revenue in the range of ₹24,601 crore to ₹24,922 crore for the quarter. This implies sequential growth of 2.2 per cent in reported terms, while cc revenue is expected to decline 1.2 per cent to 1.6 per cent. On a year-on-year basis, revenue is projected to increase 12.6 per cent to 12.9 per cent.

Net profit is estimated at ₹3,394 crore to ₹3,528 crore, reflecting a 3.1 per cent to 9 per cent sequential decline and a 1.4 per cent to 4 per cent drop year-on-year, according to brokerage estimates.

"Wipro's revenue growth continues to disappoint, and its guidance implies that organic revenue decline is yet to bottom out. While large buybacks are the board's attempt to find valuation support for the stock, weak execution and an inferior revenue mix remain a structural risk for the company at a time when the industry is going through a generational technology shift," a BNP Paribas report said.

MARGIN CONTRACTION

Motilal Oswal expects Wipro's IT services revenue to decline around 1.3 per cent QoQ in cc terms, despite an estimated 1 per cent inorganic contribution from the Mindsprint acquisition. The brokerage attributed the decline to delayed project ramp-ups, weakness in a large client account, and softer demand from the US BFSI segment, which are expected to outweigh the acquisition-led boost.

Brokerages broadly expect Wipro to guide for a 2 per cent to 0 per cent sequential decline in cc revenue for Q2FY27, indicating that the company is likely to remain on track for an organic revenue decline in FY27.

A JP Morgan report said, "We expect margin contraction on account of operating deleverage on the CC revenue decline and pricing pressure."

BNP Paribas expects Wipro's IT services revenue to decline 1.2 per cent QoQ cc, towards the lower end of the company's guidance range of a 2 per cent decline to flat growth. The brokerage attributed this largely to the deferment of the AlphaNet acquisition, which had been factored into the company's guidance.

On profitability, BNP Paribas forecasts a 35 bps sequential contraction in EBIT margin to 16.9 per cent, citing heightened pricing pressure, partially offset by favourable cross-currency movements and AI-led optimisation initiatives.

Other brokerages, however, expect a steeper margin decline of around 110 bps QoQ to about 16.1 per cent, reflecting the impact of wage hikes, lower-margin deal ramp-ups, and continued investments in AI.

India's data centres attracted $1.56 b foreign capital in H1

Vallari Sanzgiri
Mumbai

Foreign investors have poured an impressive $1.56 billion into India's data centre and digital infrastructure ecosystem in the first half of 2026, betting on surging demand for cloud services and artificial intelligence (AI), as well as India's emergence as a key digital infrastructure market.

Foreign funding into India's data centre segment alone reached $738 million in H1 2026, nearly seven times the $111 million invested across the broader digital infrastructure ecosystem in the first half of 2025, according to Tracxn data.

According to Rajiv Ranjan, Associate Research Director – Cloud and Data Centre at IDC, investors are being drawn to India's data centre sector primarily by the rapid growth of cloud and AI workloads.

"Outside of Amazon and Google, there will be dedicated data centres catering to banks and AI start-ups looking to train their models. Investors are anticipating strong demand and therefore want to invest. We expect that by 2028–2030, around 30-40 per cent of AI deployments will take place

outside the public cloud," said Ranjan.

India's data centre expansion is also outpacing growth in several South-East Asian markets. AI spending in the country is expected to grow at a compound annual growth rate (CAGR) of 39 per cent between 2025 and 2030, while public cloud spending is projected to expand at a CAGR of 23 per cent over the same period, Ranjan added.

SEEKING SCALE

Nxtra has emerged as the biggest beneficiary of investor interest, raising nearly $710 million in 2026 from private equity firms Carlyle Group, Alpha Wave Global and Anchorage Capital Partners. Meanwhile, CtrlS secured an additional $28 million in funding.

While India has several viable data centre operators, investors have gravitated towards companies that offer greater visibility into scale, growth prospects, customer access and monetisation strategies — factors that make them more attractive to foreign private capital, according to Greyhound Research.

"Nxtra's attraction for global investors stems from Airtel's telecom backbone, fibre reach, enterprise relationships, network adjacency, and the potential to integrate data centre capacity with sovereign cloud, edge infrastructure and telco-grade service delivery. The participation of global investors alongside Airtel is also significant because it allows strategic control to remain with the parent company while bringing in long-term expansion capital," said Sanchit Vir Gogia, Chief Analyst and Founder of Greyhound Research.

Similarly, CtrlS offers investors exposure to a specialist data centre operator with an established footprint, strong enterprise credibility and a compelling hyperscale expansion story.

Despite the optimism, a slowdown in AI demand or adverse geopolitical developments, including tariff-related uncertainties, could weigh on investor returns, Ranjan cautioned.

Adani Ports & SEZ, Gujarat Pipavav Port see higher container volumes in Q1

Avinash Nair
Ahmedabad

Container cargo remained resilient at Indian ports in the first quarter of FY27 despite heightened geopolitical tensions in West Asia, with Adani Ports and Special Economic Zone (APSEZ) and Gujarat Pipavav Port reporting growth in container volumes even as the US-Iran conflict raised concerns over shipping through the Strait of Hormuz, one of the world's busiest maritime trade routes.

APSEZ handled 138.1 million tonnes (mt) of cargo during the April-June quarter, up 15 per cent on year, driven by an 18 per cent increase in container volumes and a 12 per cent rise in liquid cargo. During June alone, the country's largest private port operator handled 46.8 mt — a 13 per cent increase over the year-ago period.

Gujarat Pipavav Port reported a 2.4 per cent increase in container throughput to 168,000 TEUs (Twenty-foot Equivalent) during the quarter from 164,000 TEUs a year earlier. However, dry bulk cargo declined to 0.52 mt from 0.55 mt, while liquid cargo nearly halved to 0.22 mt.

Auto retail sector chases three crore annual sales amid financing overhaul

Amit Vijay Mohile
Mumbai

The auto retail industry is on track to cross the three crore annual vehicle sales milestone this fiscal year, underpinning a vehicle finance market estimated around ₹2.65 lakh crore and a motor insurance industry nearing ₹1.25 lakh crore.

As the financial ecosystem expands, automobile dealers are urging banks, NBFCs and insurers to adopt dealer-centric credit models, real-time funding dashboards and integrated digital platforms to improve working capital, reduce settlement delays and enhance customer experience.

These issues came into sharp focus at the Federation of Automobile Dealers Associations' (FADA) fifth Banking & Insurance Summit on Friday, where FADA President CS Vighneshwar joined senior executives, including Abhinav Garg of AU Small Finance Bank, Baneswar Banerjee of Mahindra & Mahindra Financial Services, Puneet Dhawan of Tata Capital, Rohit Chhabra of ICICI Lombard General Insurance, Gurpreet Singh of New India Assurance, Neelakanta M of IFFCO Tokio General Insurance and Suraj Vasudev of SBI General Insurance, to deliberate on the next phase of automotive retail finance and insurance.

MEASURABLE GAINS

The discussions highlighted measurable gains across the ecosystem. Insurance claim turnaround has reduced from nearly two months to a matter of days, FADA's finance satisfaction score has improved to 841 from 786, and retail funding penetration has reached around 80 per cent. Dealers, however, said the next phase must focus on dealer-centric underwriting, real-time financial visibility and seamless digital integration.

"Insurance and finance are perhaps the two most important partners we work with. One covers the risk of the vehicle, while the other facilitates vehicle ownership. We also use this platform to highlight dealers' common pain points," said CS Vighneshwar, President, FADA.

Calling finance "the oxygen of our business," Sachin Sharma, Governing Council Member, FADA, said faster financing remains critical even as technology transformsecosystem. Panelists said AI-led underwriting, e-KYC, digital bank statement analysis and automated doc-

ument verification have reduced many loan approvals from days to minutes.

DEALER CREDIT

A key theme at the summit was the need to move beyond OEM-linked lending models. Dealers argued that funding should increasingly reflect a dealership's own financial strength, profitability and repayment record.

"Everybody should be scored based on dealer performance, financial strength and track record. It should not be purely from the OEM lens," said Baneswar Banerjee, Head of Automotive Loans, Mahindra & Mahindra Financial Services, reflecting the broader consensus that dealer-level credit assessment would create a more transparent funding framework.

Participants also backed integrated dealer portals offering real-time visibility into inventory funding, credit limits, interest costs and transaction history, replacing periodic statements with connected digital platforms.

"Dealers will definitely get a dealer portal where they can raise queries and access real-time information," said Puneet Dhawan, Business Head – Medium & Commercial Vehicle Finance, Tata Capital.

DIGITAL INTEGRATION

Insurance executives said digital claim intimation, e-surveys, automated documentation and AI-enabled workflows have significantly improved claims processing. However, a recent FADA survey found 65 per cent of dealers still cited survey appointments and claim approval turnaround as major pain points.

Rohit Chhabra, Head of Motor Insurance & Extended Warranty, ICICI Lombard General Insurance, said greater visibility across every stage of the claims process would improve transparency for both dealers and customers.

Participants added that total-loss settlements have improved by months, but still require tighter digital integration among insurers, financiers and authorities.

How GIFT City's first gold fund allows investors to redeem bars in physical form

Avinash Nair
Ahmedabad

Can an investment fund allow investors to walk away with physical gold bars? In GIFT City, that idea has moved from concept to structure. A new gold fund set up within the IFSC ecosystem is built around bullion depository receipts (BDRs), which represent actual gold stored in regulated vaults.

Unlike a traditional gold ETF that only tracks prices and settles in cash, this structure keeps gold fully backed in allocated form and adds a unique feature — investors can choose to redeem their holdings in physical gold or cash.

The fund is restricted to non-resident investors, including institutions, family offices, and high-net-worth individuals, and is designed as a long-term allocation product with optional physical delivery.

Sachin Sawrikar, Managing Partner, Artha Bharat Investment Managers IFSC LLP, spoke about the mechanics of the fund.

Edited excerpts:

How does the Artha Bharat FinMet Physical Gold Fund actually work?

The biggest distinction is that the fund is built around the IFSC bullion ecosystem rather than direct physical bullion holdings.

The fund invests almost entirely in Bullion Depository Receipts (BDRs), which represent underlying gold held within the GIFT City framework.

We have then built a redemption-in-kind mechanism over this structure, allowing investors to receive physical gold by extinguishing the underlying BDRs. To our knowledge, this combination of BDR-based exposure with investor-level physical redemption is among the first of its kind.

The fund is exclusively for non-resident investors. It caters to institutional investors, family offices, and high-net-worth individuals. Since Indian tax residents are not eligible, it operates entirely within the non-resident investment universe, under IFSC regulations.

What is the minimum investment and typical ticket size?

The minimum investment is $150,000, which comes down to $50,000 for accredited investors. Our target investors are those looking for meaningful allocations to physically backed gold, not small speculative exposure — but structured, long-term holdings with the option of physical redemption.

How is physical delivery operationalised within GIFT City? Can investors take delivery only within IFSC vaults or outside India as well?

Operationally the investor first opeans an account with IIDI. The fund then transfers the relevant BDRs into the investors' account.

The investor extinguishes those BDRs to take physical gold within the GIFT City vault network or through the global delivery route.

We facilitate and coordinate the process through the relevant depositary vault, exchange, and logistics arrangements. This remains subject to operational feasibility, documentation applicable law and the redeeming investor bears the associated costs.

UNIQUE FEATURE. Unlike a traditional gold ETF, bullion depository receipts keep gold fully backed in allocated form

Can investors actually take delivery of small quantities of gold?

Physical redemption is available in 100-gram units, which is the minimum delivery denomination. If an investor's holding does not match full 100-gram multiples, the remaining portion is settled in cash. So investors receive physical gold where possible, and cash for residual balances.

Who bears custody, insurance and purity risk at the point of redemption?

Purity risk is substantially mitigated by the structure. The underlying bars are serially numbered, sourced through approved channels, supported by supplier quality documentation, and matched to relevant BDR. At the point of physical redemption, delivery, insurance, transport and custody costs are borne by the redeeming investor. That is standard for physical delivery structures globally.

What happens if many investors request physical gold at the same time?

The fund is designed so that around 95 per cent of its exposure is in gold through BDRs. So the backing already exists. Redemptions are primarily about transferring and extinguishing BDRs.

The process depends on depository systems, vault operations and logistics, rather than availability of gold in the market. There is no need to source gold after redemption requests.

What makes this different from a normal gold ETF?

A traditional gold ETF provides price exposure and settles in cash. Investors do not interact with physical gold. In this case, the fund is built around BDRs, which represent actual allocated gold. The important distinction is the redemption mechanism — investors can either take cash or convert their holdings into physical gold.

How does the cost compare with global gold investment products?

The total expense ratio is 0.65 per cent per year, with no performance fee. This is higher than many global gold ETFs, which typically charge 0.2 per cent to 0.4 per cent, but those products only provide cash settlement. Here, investors also get the ability to redeem into physical gold.

Since the fund is denominated in US dollars and allows physical gold delivery, does it create an arbitrage opportunity with India's domestic gold market, and how should investors think about currency risk?

No. The fund is designed for non-resident investors and operates entirely outside domestic gold market. Any gold delivered through the fund remains outside India unless it is imported through the regular legal route, where it would be subject to the same customs duty, GST and import regulations as any other gold. So, the fund does not create an arbitrage opportunity between GIFT City and the domestic market.

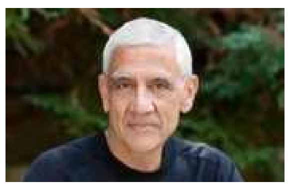
On currency, the fund provides straightforward US dollar-denominated exposure to gold and does not hedge foreign exchange risk. Returns will depend on the movement in global gold prices and the investor's home currency against the US dollar. Investors wishing to hedge currency exposure can do so separately.

Why would investors use GIFT City instead of established gold hubs like Singapore or Dubai?

Singapore, Dubai and London are established centres for allocated gold. The difference is the structure — a regulated fund within GIFT City combined with a direct path to physical redemption. Eligible investors may also benefit from tax efficiencies under the IFSC framework, subject to conditions under Section 10 (4D). The broader ecosystem, including infrastructure like IIBX and IIDI, also supports this model.

QUICKLY.

Vinod Khosla to acquire Seattle Seahawks for $9.6 b



Tech billionaire Vinod Khosla has agreed to buy the National Football League's Seattle Seahawks for $9.6 billion, Sportico reported, citing people familiar with the details. Khosla is buying the defending Super Bowl champions from the estate of late owner Paul Allen in a deal that marks one of the biggest valuations ever in a sports team transaction, according to the outlet. Khosla's group beat out other bidders that included a group led by billionaire Aditya Mittal, CEO of steel and mining company ArcelorMittal, Sportico said. It isn't immediately clear how the deal is being financed and Khosla didn't immediately respond to an email seeking comment, according to Sportico. Deal surpasses previous NFL franchise valuation record.

The first round of bids for the Seahawks were due on June 29, people familiar with the process said previously. BLOOMBERG

'India must build own AI, cybersecurity mechanism'

RED FLAG. Cybersecurity is a priority to preserve the benefits of digitisation: MeitY Secy

S Ronendra Singh
New Delhi

With the financial sector rapidly adopting emerging technologies like cloud computing, AI and real-time payment systems, cyberattacks are becoming faster, more sophisticated and increasingly systemic, the government said on Monday. To mitigate these evolving threats, the government emphasised the urgent need to develop robust domestic capabilities for these technologies.

Releasing the second edition of *Digital Threat Report 2025-26* for the banking, financial services and insurance (BFSI) sector, S Krishnan, Secretary, Ministry of Electronics and Information Technology (MeitY), said these technologies have also dissolved traditional boundaries and expanded the threat surface into a distributed mesh across partners, platforms, models and infrastructure layers.

"A critical area we need to act on is ensuring that in the AI space, what is the infrastructure and the capability we build as a country, both in terms of models, data, how we use this, how this infrastructure is something that we can support ourselves with, and the critical thing here is building domestic capacity," he said.

> Notable findings also show that some firms struggle to translate compliance into real-world resilience, where controls that pass periodic assessment fail under adversarial pressure
>
> **S KRISHNAN**
> Secretary, MeitY

ATTACK METHODS

Krishnan emphasised that cybersecurity is one of the most important concerns to be prioritised for preserving the benefits derived from digitisation. The Indian Computer Emergency Response Team (CERT-In) and Computer Security Incident Response Team - Finance Sector (iCSIRT-Fin) have noticed a clear acceleration in the pace and sophistication of cyberattacks targeting the financial industry, he noted. "Malicious actors are using advanced tactics, techniques and procedures to get beyond traditional defences. The landscape is changing with generative AI, large language models and machine-speed payment systems. Adversaries are exploiting gaps between systems, institutions and workflows. Notable findings also show that some firms struggle to translate compliance into real-world resilience, where controls that pass periodic assessment fail under adversarial pressure," he explained.

Threats previously considered emerging or episodic like social engineering, credential theft, supply-chain compromise and cloud exploitation are now established attack methods. The consequence is a threat environment where the most damaging attacks no longer resemble traditional intrusions at all, the report highlighted. "As India's financial ecosystem becomes more interconnected, real-time and technology-driven, cyber resilience must be treated as a shared responsibility across institutions, regulators and the wider digital supply chain," Sanjay Bahl, Director General at CERT-In, said.

Meta's reply on CSAM received, action only after scrutiny: MeitY Secretary

S Ronendra Singh
New Delhi

The Centre on Monday said it has received a reply from Meta to the notice over child sexual abuse material (CSAM) ads on Instagram, which was being examined after, which it would take appropriate action.

The Ministry of Electronics and Information Technology (MeitY) had issued a stern notice to Meta recently on Child Sexual Exploitative and Abuse Material (CSEAM) in paid advertisements on Instagram, ordering the social media platform to disable all ads and content promoting and facilitating access to CSEAM, and demanded a detailed explanation bound to a deadline.

NOTICE TO META

Confirming receiving the responses, S Krishnan, Secretary, MeitY told reporters that the Ministry has received Meta's reply on Saturday (July 11), which was the last due day for the reply.

"On the CSAM content, we had issued a notice to Meta, and the reply has been received. It is currently under examination and based on an examination of the reply, appropriate action would be taken. They have taken a week or 10 days to respond, so we will also take some days to examine," Krishnan said.

> **Meta detailed the company's ongoing efforts to combat child exploitation across its apps** and its clear laid-out policies against child abuse and exploitation

COMBATING CSAM

Within a few days of the notice, Meta outlined its efforts to combat CSAM across its apps, highlighting AI-powered detection and large-scale enforcement actions, and, in a blogpost, promised to continue investment in technology and resources to keep young people safe and strengthen its ad review processes.

The company even said that it was categorically inaccurate to suggest that it knowingly and deliberately target ads featuring children to people based on an inappropriate interest in children.

"Quite the opposite; we use technology to identify accounts that have shown potentially suspicious activity related to children, and we automatically removed over four-million of these accounts last year," Meta said, adding that it removed 1.6 lakh accounts in India in the last six months using AI tools to detect suspicious links and child exploitative activity signals.

CHILD EXPLOITATION

Meta also detailed the company's ongoing efforts to combat child exploitation across its apps, highlighting AI-powered detection tools, its clearly laid-out policies against child nudity, abuse, exploitation, and the large-scale enforcement action.

"We're aware of recent news reports about Instagram ads in India that violated our policies against child exploitation. And we want to be clear: we take these concerns seriously, we never want this content on our platforms, and we're committed to improving our efforts to combat it," it said.

Air India and Air New Zealand discuss JV for non-stop flights

Aneesh Phadnis
Mumbai

Air India and Air New Zealand are discussing a joint venture partnership to launch non-stop flights between the two countries.

Air India has already signed MoUs with Lufthansa and Singapore Airlines for joint business agreements covering route planning, flight schedules, joint sales and marketing. A similar arrangement is being considered with Air New Zealand, too, given the long distance and comparatively low yields on the routes between the two countries.

NEW OPPORTUNITIES

"We signed an MoU with Air India in March 2025 to make travel between New Zealand and India more convenient.

Since then, we've implemented a codeshare agreement to provide customers with more travel options, and are continuing to work together, alongside Singapore Airlines, to explore opportunities to strengthen air links between the two countries," said Air New Zealand on Monday.

"India is an exciting market for New Zealand, and continuing to grow air connectivity is part of making that opportunity real. Both airlines are now exploring the longer-term possibility of direct flights between India and New Zealand," it added.

AAI says airport expansion projects are on track to boost operations

Aneesh Phadnis
Mumbai

The Airports Authority of India (AAI) has said construction of terminals and expansion of facilities at 14 facilities is on track for completion in CY 2026. Prime Minister Narendra Modi inaugurated the new terminal at Jodhpur airport on July 4. Air India and IndiGo moved operations there on Sunday.

In the coming months, new facilities would be opened at 14 airports, including Chennai and Goa. "The projects are on track. This will support the expansion plans of new airlines and the second phase of UDAN," said an AAI official.

NETWORK EXPANSION

Domestic airlines added over 30 aircraft in first half of 2026. Network expansion has been led by Akasa Air and IndiGo. Akasa Air is targeting 30 per cent expansion in this fiscal year. AAI is carrying out ₹4500 crore capex in FY27 to support the growth. This is in addition to around ₹4500 crore incurred last year. "The capex has primarily focused on capacity expansion and modernisation of airport infrastructure. This includes construction of new terminals, expansion or upgradation of existing terminals, airside infrastructure like runways, aprons, taxiways and other facilities," the official said.

Nexon Geochem ties up with Russia's Giredmet for permanent magnet facility

Rishi Ranjan Kala
New Delhi

Hyderabad-based Nexon Geochem has signed an MoU with Russia's State Research and Design Institute of Rare Metal Industry (Giredmet) for joint R&D of deep-processing technologies for rare and rare-earth metal raw materials, NdFeB rare-earth permanent magnet technologies.

Neodymium-iron-boron (NdFeB) rare earth permanent magnets are key intermediate components of permanent magnet synchronous (direct drive) generators in wind turbines (especially for offshore turbines) and electric synchronous traction motors for propulsion systems in battery and hybrid electric vehicles.

The advanced materials company aims to establish an integrated, full-cycle platform spanning rare earth oxide inputs through to finished magnet production. As an immediate objective, Nexon Geochem plans to establish a highly scalable sintered NdFeB permanent magnet manufacturing facility in Hyderabad, positioning itself as the one of the first integrated rare earth oxide-to-magnet platforms. Nexon Geochem is targeting a 1,200 mtpa production capacity of NdFeB permanent magnets by FY33.

Praveen Choudhary, Founder of Nexon Geochem, said, "Bringing a fully integrated sintered NdFeB magnet manufacturing facility to life requires world-class technology transfer and collaborating with an institution that holds nearly a century of rare metal expertise is a massive milestone. The real work begins now."

SC seeks Centre's new rules to regulate volatile airfares

Aaratrika Bhaumik
New Delhi

The Supreme Court on Monday asked the Union government to place on record the new aviation rules framed under the Bharatiya Vayuyan Adhiniyam, 2024, which seek to regulate volatile airfares and predatory pricing.

The court was informed that the regulations had already been finalised and were currently undergoing translated into Hindi and other official language versions before being tabled before Parliament.

A Bench, comprising Justices Vikram Nath and Sandeep Mehta, was hearing a public interest litigation (PIL) petition filed by social activist S Laxminarayan seeking the formulation of binding regulatory norms to address arbitrary airfare pricing and ancillary charges imposed by private airlines during festive periods, holidays and emergencies.

Appearing for the Directorate General of Civil Aviation (DGCA) and the Union Government, Additional Solicitor General Anil Kaushik submitted that the draft rules had been prepared and were currently undergoing translation. He further apprised the Bench that the regulations would be placed before Parliament during the upcoming monsoon session, which is scheduled to commence on July 21.

"The draft rules are ready. They are to be tabled before Parliament. Please give us some time," he said.

Senior advocate Ravindra Srivastava, appearing for the petitioner, however, contended that under the provisions of the 2024 Act, the new rules must first be published for public consultation before being tabled before Parliament. "After the

rules are framed, they have to be published for public consultation. Only thereafter can they be placed before Parliament," he submitted.

Finding merit in the submission, the Bench granted the Centre two weeks' time to place the draft aviation rules before the court in a sealed cover.

"Respondents need to peruse the rules before this court without awaiting the placing of the same before Parliament. Considering the aforesaid submissions, we grant two weeks' time to the respondents to place before this court the rules that are being framed, irrespective of the fact whether they are placed before Parliament or not, in a sealed cover," the Bench ordered.

'SORRY SITUATION'

Srivastava also contended that the sharp surge in airfares during festivals was exploitative and blamed the continued inaction of the DGCA for the prevailing state of affairs. He further pointed out that the Union Government had, in April, kept in abeyance a March 18 direction issued by the DGCA requiring airlines to offer at least 60 per cent of seats without any seat selection fee.

The March 18 direction had also required airlines to ensure that passengers travelling under the same passenger name record (PNR) are seated together, "preferably in adjacent seats", among other passenger-friendly measures.

"The DGCA, which is the regulator, is issuing directions and the government withdraws those directions... It is a sorry situation. Your Lordships must consider putting in place a very robust and independent regulatory mechanism," he submitted.

This prompted Justice Mehta to observe that recent reports suggesting that Iran may close the Strait of Hormuz, despite the ceasefire announced last month, had once again given airlines a "window" to sharply increase airfares on the pretext of a looming oil crisis.

Srivastava, however, pointed out that an affidavit placed on record showed that the fuel component constituted no more than 10 per cent of the airfare, even though fares had risen exponentially.

"The fuel component in the airfare is a maximum of 10 per cent. The rise is 100 to 300 per cent during this period.

"This is a very pitiable condition. Your Lordships have to do something," he submitted.

NEXT HEARING

Agreeing to examine the concerns raised, the Bench posted the matter for further hearing on August 3.

The petition pointed out that there is currently no regulatory authority vested with the power to review or cap airfares, enabling airlines to exploit consumers through hidden fees and unpredictable pricing.

It said such practices disproportionately affect economically weaker passengers, who are often compelled to purchase tickets during periods of peak surge pricing, while wealthier travellers can plan and book in advance.

Transport Ministry plans 4 airport-style private bus ports; Nagpur to lead

Amit Vijay Mohile
Mumbai

Private inter-city bus passengers, many of whom still wait on the roadside without access to clean wash rooms, hygienic dining spaces or sheltered seating, could soon get dedicated airport-style terminals with comfortable lounges and safer boarding facilities.

The Ministry of Road Transport and Highways (MoRTH) plans to develop four such bus ports for private operators through the public-private partnership model, beginning with Nagpur and followed by three facilities in southern India, a top industry source told *businessline*.

The proposed hubs will replace informal roadside boarding points with organised bus parking, separate wash rooms for women and men, hygienic food areas, passenger lounges and spaces where travellers can rest before catching their next bus.

Road Transport and Highways Minister Nitin Gadkari shared this development with top leaders of the inter-city bus transport operators, at the recently concluded Prawaas 5.0 in Gandhinagar, saying the "government was planning airport-like bus ports for private operators."

The ministry has not yet publicly disclosed the plan which includes the locations, investment requirements, concession structure or implementation timelines.

However, industry sources said Nagpur is expected to become the first test of whether the airport-style PPP model can be made commercially viable for private intercity transport with accessible locations, strong last-mile connectivity

CLOSING THE GAPS. The proposed bus ports will address basic infrastructure gaps in the private inter-city bus market PTI

and a concession structure that allows commercial revenues to support construction and maintenance without making terminal charges unaffordable for operators or passengers.

KARNATAKA MODEL

Industry sources added that MoRTH has been advised go lean into the Karnataka's bus-terminal redevelopment program offers a template for how the proposed national PPP model could work. Under the structure, government agencies or transport corporations retain ownership of the land, while private concessionaires design, finance, build, operate and maintain the terminals.

The private developer recovers its investment through rentals from shops and restaurants, parking fees, advertising, terminal services and other commercial revenues, reducing the need for the government to bear the entire capital cost.

Karnataka's 2025-26 Budget announced the redevelopment of Bengaluru's Majestic bus-station complex into an integrated transport and commercial hub under Project Majestic. It also proposed a new satellite bus terminal at KR Puram in Bengaluru East through the PPP route. KSRTC subsequently appointed a consultant to structure the Majestic redevelopment, estimated to require an investment of about ₹1,800 crore. The project seeks to integrate KSRTC and BMTC services with metro and railway networks while using commercial development to improve financial viability.

PASSENGER AMENITIES

The Centre's proposed bus ports seek to address a basic infrastructure gap in India's private intercity bus market. Unlike State transport undertakings, which generally operate from designated terminals and depots, many private operators depend on travel-agency offices, temporary parking areas and roadside pick-up points.

As a result, passengers frequently have to stand beside busy roads with their luggage while waiting for buses. Many locations lack clean and separate wash rooms for women and men, hygienic places to eat, adequate seating or sheltered spaces where passengers can wait safely. The proposed bus ports would bring arrivals, departures, parking, ticketing, food outlets and passenger amenities into regulated complexes. They could also provide connections to city buses, metro services, taxis and autorickshaws.

Copper firms up as weaker $ offsets conflict fears

London: Copper prices held firm as the dollar eased, but gains were capped as the US and Iran war escalated. Benchmark copper on the London Metal Exchange traded 0.1 per cent higher at $13,501 a tonne in official rings. A lower US currency makes dollar-priced metals cheaper for holders of other currencies, which could boost demand. REUTERS

Gold drops as West Asia tensions escalate

Gold prices fell nearly 3 per cent on Monday after US President Donald Trump said he was reinstating a naval blockade on Iran, boosting oil markets, reigniting inflation concerns and raising prospects of higher-for-longer US interest rates. Spot gold was down 2.8 per cent to $4,005.59 per ounce by 10:38 am EDT (1438 GMT), the lowest level since July 1. Prices were down for the second straight session. US gold futures were down 2.4 per cent to $4,013.40. REUTERS

Crude oil rally lifts Malaysian palm oil futures

Jakarta: Malaysian palm oil futures gained on Monday, with support from stronger rival soybean oil in the Chicago market and a jump in crude prices also lending support. The benchmark palm oil contract for September delivery on the Bursa Malaysia Derivatives Exchange was up 22 ringgit, or 0.49 per cent, at 4,535 ringgit ($1,113.98) a tonne at the close. "Support from crude and Chicago soybean oil is expected to underpin market sentiment," a Kuala Lumpur-based trader said. REUTERS

Sowing deficit narrows as 48% of normal area covered; paddy acreage down 9%

GROUND REALITY. Overall, coverage is down 16% despite 180 lh being brought under cultivation last week

Our Bureau
New Delhi

Sowing during the ongoing kharif season has reached 531.25 lakh hectares (lh) as of July 10, which is 48 per cent of the season's normal area of 1104.46 lh. However, it is 16 per cent less than 632.69 lh in the year-ago period.

However, expansion of the area might not see a similar level of rise next week, even as over 180 lh got planted last week. This was against nearly 190 lh in the year-ago period, as the monsoon rainfall in key states has slowed down.

The deficit in kharif season's main cereal, paddy, has narrowed further to 9 per cent as of July 10 against 13 per cent until July 5. According to data released by the Agriculture Ministry, paddy has been transplanted on 114.69 lh against 125.53 lh a year ago.

AREA OF CONCERN

A fall in pulses and oilseeds acreage may be a concern for the government as the country is dependent on imports to meet domestic demand.

The area under all pulses reached 56.63 lh against 73.85 lh a year ago. Oilseeds' acreage was 117.83 lh against 149.18 lh. The coverage of nutri/coarse cereals was reported 21 per cent lower at 98.69 lh against 127.30 lh.

Cotton acreage is 15 per cent lower at 79.54 lh from 94 lh, while soyabean is down to 90.51 lh from 107.72 lh, and groundnut is down to 23.40 lh from 35.45 lh.

Among pulses, arhar sowing was 19.54 lh, down 30 per cent from 28.03 lh, moong (green gram) 21.52 lh from 24.08 lh and urad (black gram) at 9.34 lh from 13.29 lh.

SUGARCANE UP

Among the coarse/nutri cereals, jowar acreage dropped to 6.88 lh against 9.01 lh a year ago, whereas bajra coverage dipped to 33.76 lh from 45.98 lh. The area under ragi was 0.93 lh against 1.11 lh a year ago, and maize was sown on 55.97 lh compared with 69.56 lh. Sugarcane sowing has been completed, and it is reported at 57.58 lh against 56.72 lh a year ago, while jute and mesta sowing too has been completed. It was 6.28 lh as of July 10, against 6.16 lh a year ago, data showed.

After the revival of monsoon from July 1, the overall deficit, which was 37 per cent (as per revised data) in June, has now been reported at 19 per cent during June 1-July 13, the India Meteorological Department (IMD) data show. The seasonal rainfall deficit until July 10 was 14 per cent. The pan-India rainfall deficit during July 11-13 was 42 per cent, sources said, adding the gap may further widen as there is no prediction of rainfall in major agricultural states over the next few days.

The government has fixed a production target of 176.16 million tonnes (mt) of foodgrains, which includes 123.15 mt of rice, 8.4 mt of pulses, 31.04 mt of maize and 13.56 mt of nutri-cereals. The oilseeds target is 28.92 mt (soyabean 14.85 mt and groundnut 11.35 mt).

Kharif sowing* (lakh hectare)

	2025	2026	% change

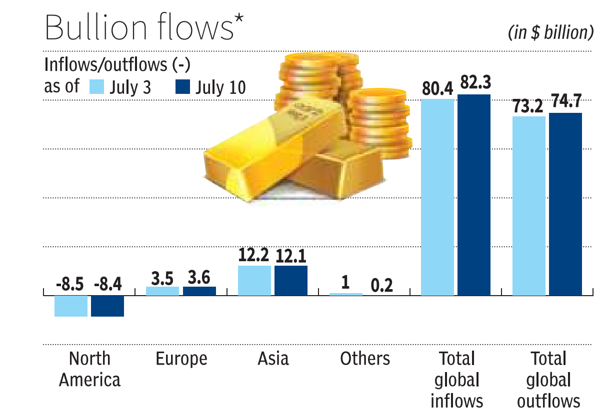
Mixed trend in gold ETFs in past 2 weeks



*Year-to-date as of July 10 Source: WGC

Subramani Ra Mancombu
Chennai

Physically backed gold exchange-traded funds (ETFs) witnessed a mixed trend in the past two weeks, with inflows being positive in the week ending July 10 and negative in the week ending July 3, data from the World Gold Council (WGC) showed.

Led by France, the US and Australia, inflows turned positive last week at $1.8 billion, but the UK and Chinese investors exited, taking outflows to $1.51 billion, resulting in $0.34 billion net inflows.

In the week ending July 3, investors in the US, China, Germany and Canada led the exits, with total encashment at $3.19 billion. The UK and India saw investors still being positive on the yellow metal, as inflows totalled $2.15 billion.

AWAITING US DATA

"Gold lost ground last week, giving up its brief rebound as renewed US-Iran military tensions stirred inflation worries and pushed up the odds of another Fed rate hike," said Renisha Chainani, Head of Research at Augmont.

Jateen Trivedi, VP Research Analyst - Commodity and Currency, LKP Securities, said market participants now await the US CPI inflation data due on Tuesday evening, which will be a key input for the Federal Reserve's interest rate outlook and could determine the next direction for bullion.

With gold prices hovering between $4,000 and $4,200 an ounce, investors have kept a low profile over the past two weeks. Inflows into and outflows from gold ETFs have been low-key over the past fortnight. Gold, which soared to a record high of $5,608 an ounce on January 29, hovered around $4,060 an ounce on Monday.

NORTH AMERICA LEADS

In the week ending June 3, outflows in North America from gold ETFs were $1.2 billion, followed by Asia at $206 million. In Europe, investors put in money to the tune of $457 million.

Last week, inflows in Europe were $163 million, followed by North America at $105 million. Asia saw $40 million in outflows, while investments by other continents were $113 million.

As of date, ETF inflows have been negative in the US at $8.57 billion, followed by Italy at $211 million. Investments have been positive at $5.31 billion in China, $3.88 billion in India, $2.11 in the UK and nearly $2 billion in Switzerland.

Crude oil up over 2% as fresh strikes threaten Hormuz shipments

Reuters

Crude oil prices surged more than 2 per cent on Monday after renewed military strikes between the US and Iran reignited concerns over energy shipments through the Strait of Hormuz.

Brent crude futures were up $1.67, or 2.2 per cent, to $77.68 at 0955 GMT, while US West Texas Intermediate crude was up $1.59, or 2.23 per cent, to $73.00 a barrel.

"The focus will remain on the number of inbound tankers as a lower number could impact production, so currently we see a risk premium but as well a disruption risk supporting prices," said UBS analyst Giovanni Staunovo.

TENSE WATERS. Iran said the strait will be closed "until further notice," though Western navies insist that it remained open REUTERS

Fresh US and Iranian strikes over the weekend fuelled fears of a renewed escalation. Tehran targeted US facilities across the Gulf on Sunday and said it had again closed the Strait of Hormuz. Iran's Revolutionary Guards said on Monday they had attacked US military bases in Kuwait and Bahrain.

Before the conflict began in late February, the Strait of Hormuz handled about one-fifth of global daily oil and liquefied natural gas supplies.

VESSEL TRAFFIC

"Shipping operators are adopting a cautious approach and inbound movements have slowed under heightening security concerns," ANZ analysts said.

Vessel traffic through the strait fell to a five-week low on Sunday, ship-tracking data showed. Six vessels transited the strait on Sunday, according to Kpler.

Goldman Sachs estimated that expanding pipeline capacity in the West Asia could shield more than 60 per cent of pre-war Gulf oil exports from any future Hormuz disruptions by end-2028.

The bank's base-case forecast assumes pipeline capacity bypassing Hormuz will rise by 3.8 million bpd by end-2027 and 7.3 million bpd cumulatively by end-2028, taking total effective bypass capacity to more than 14 million bpd by end-2028.

Soybean imports up at 7.77 lakh tonnes till June-end, estimates trade body SOPA

Our Bureau
Bengaluru

Soybean imports in the current oil year 2025-26, ending September, touched 7.77 lakh tonnes as of the end of June, up manifold against 2,000 tonnes the previous season due to a shortfall in domestic supplies. The trade body, Soybean Processors Association of India (SOPA), expects exports of soybean meal to slow down to 10 lakh tonnes against 20.23 lakh tonnes last season due to higher domestic prices.

As per the latest supply and demand data released by the Soybean Processors Association of India, about 77.5 lakh tonnes of the production of 110.26 lakh tonnes have arrived in the market so far, lower than 89 lakh tonnes a year ago.

Soymeal production during October-June of the current oil year was lower at 64.31 lakh tonnes (68.65 lakh tonnes). Exports of soymeal were 9.02 lakh tonnes (15.6 lakh tonnes a year ago), while domestic consumption for food was 6.7 lakh tonnes (6.15 lakh tonnes). Consumption by the feed segment was higher at 48 lakh tonnes (47 lakh tonnes). Meal stocks at the end of June were 1.27 lakh tonnes.

OUTLOOK. SOPA estimates the import of soybean during the 2025-26 oil year (October-September) at 9 lakh tonnes

IMPORTS TO TOP 9 LT

SOPA estimates imports of soybean during the 2025-26 oil year (October-September) at 9 lakh tonnes.

The export of soybean meal for the oil year 2025-26 is projected at 10 lakh tonnes (20.23 lakh tonnes), and the domestic offtake by the food segment is expected to be 9 lakh tonnes (8 lakh tonnes), and the feed sector at 63 lakh tonnes (62 lakh tonnes). "We have revised the soybean meal exports downward to 10 lakh tonnes from 11 lakh tonnes earlier and also increased the domestic consumption of soybean meal in food and feed to 9 lakh tonnes and 63 lakh tonnes, respectively, from the earlier 8 lakh and 62 lakh tonnes," said DN Pathak, Executive Director, SOPA, in a statement.

Exports of soybean meal for oil year 2025-26 projected lower at 10 lakh tonnes on higher prices

Tea Board postpones web-based auction rollout again; launch scheduled for July 21-22

V Sajeev Kumar
Kochi

The Tea Board has yet again postponed the rollout of its web-based auction platform in Kolkata, which was scheduled to go live on July 14.

In a trade notice, the Board said the decision was taken following feedback from the core committee after mock sessions conducted at the Kolkata and Coonoor auction centres on the implementation of the platform developed by Tradeforge Technologies.

According to the revised schedule, the platform will now go live at the Kolkata auction centre from Sale 31, scheduled for July 21-22, covering dust and leaf teas.

TECH DELAY. Industry sources said the rollout was deferred due to software readiness issues

MOCK SESSIONS

The rollout at the Coonoor auction centre has also been postponed to a later sale, the details of which will be announced separately, the Board said.

Besides, the scheduled mock session for the Guwahati, Siliguri, Cochin and Coimbatore auctions this week have also been postponed. The Board also directed all auction centres to continue uploading catalogues simultaneously on both the NSEIT portal and the Tradeforge platform for all upcoming sales until further orders.

Industry sources said that the rollout had been deferred because the software and related operational requirements were not fully ready to support live tea auctions with the same level of reliability demonstrated by the existing NSEIT platform.

Besides, the Core Committee, comprising representatives nominated by tea trade associations from various auction centres, concluded after reviewing the mock sessions that the new platform is not yet ready for implementation.

It would, therefore, be prudent to resolve the identified issues before the rollout to ensure seamless and uninterrupted auction operations, the sources said.

The web-based platform was scheduled to go live in Kolkata on June 30 and Coonoor on July 2. It was rescheduled, following discussions between the Board and the stakeholders.

The new platform is expected to offer a more user-friendly interface, enhanced security and improved cost efficiency, while retaining the existing auction mechanism and core processes.

While the NSEIT platform functioned effectively, the government appointed Tradeforge Technologies as the new service provider to develop and operate the system, industry sources said, adding that the migration is expected to improve transparency and operational efficiency, resulting in better price realisation.

At Delhi festival, 30 tonnes of fresh pineapples from Meghalaya sold

Our Bureau
Mangaluru

Over 30 tonnes of fresh Meghalaya pineapples were sold during the fourth Meghalaya Pineapple Festival in New Delhi last week.

A media statement said that this quantity was almost double the 15.4 tonnes sold in 2025 and nearly four times the 7.7 tonnes recorded during the festival's inaugural edition in 2023.

The first edition in 2023 introduced Meghalaya's premium pineapples to consumers in the national capital. By 2024, the festival had begun facilitating institutional partnerships. The 2025 edition expanded further with collaborations involving Reliance Fresh, Amazon Karigar and Blue Tokai Coffee Roasters, while also serving as a platform for launching the Meghalaya Agriculture Strategy 2028.

Meghalaya produces over 1.4 lakh tonnes of pineapples annually across nearly 12,600 hectares, largely concentrated in Ri-Bhoi, Garo Hills and parts of the Khasi and Jaintia Hills. Cultivated under rain-fed conditions, the fruit is recognised for its exceptional sweetness, rich aroma, low acidity and a Brix value of 16-18, significantly higher than the national average.

INTEGRATED APPROACH

The statement said Meghalaya adopted an integrated approach centred on farmer collectivisation, processing, branding and market development. Initiatives, including CM FARM+, MLAMP, the Meghalaya State Organic Mission and interventions led by the Meghalaya State Agricultural Marketing Board worked in tandem to build an ecosystem that extends beyond cultivation.

This ecosystem now includes 40 PRIME (Promotion and Incubation of Market-Driven Enterprises) hubs, of which 12 are operational, supported by over 650 spoke facilities for aggregation, storage and processing.

As bears dominate trade, go short on natural gas

Gurumurthy K
bl. research bureau

The price of natural gas has declined sharply in the past week. The natural gas futures contract traded on the Multi Commodity Exchange (MCX) tumbled 12 per cent last week. It touched a high of ₹320.70 per mmBtu on Wednesday and fell sharply to close the week at ₹280.30. It is currently trading at ₹279 per mmBtu.

COMMODITY CALL.

OUTLOOK

The strong fall below ₹290 last week turned the outlook bearish for the natural gas futures contract. Immediate resistance is at ₹282.

Above that, ₹290-₹292 is the next important resistance region. Even if the contract manages to rise above ₹282, the upside is likely to be capped at ₹290-₹292.

The natural gas futures contract could fall to ₹250 in the coming weeks. To avoid this fall, the contract has to rise past ₹292 decisively. Only then will the upside open up to revisit ₹300 levels. But that looks unlikely.

TRADE STRATEGY

Traders can go short now at ₹279 and add more shorts on a rise at ₹281 and ₹288. Keep the stop-loss at ₹295 initially.

Trail the stop-loss down to ₹276 as soon as the contract falls to ₹271.

Revise the stop-loss lower to ₹268 and ₹258 when the price touches ₹263 and ₹255, respectively. Exit the short positions at ₹252.

El Nino may lead to drop in oil sardine next year, says CMFRI

Our Bureau
Kochi

The ongoing El Nino event is likely to trigger intense marine heatwaves, leading to a significant decline in Indian oil sardine availability next year, according to the ICAR-Central Marine Fisheries Research Institute (CMFRI).

Grinson George, Director, CMFRI, said the warming linked to El Nino is expected to intensify during October-December, and its impact is likely to be felt on the northern Indian Ocean by April-May 2027.

Oil sardine stocks are abundant this year, but the resource is expected to be affected in 2027 if the projected warming occurs. Small pelagic fishes, particularly oil sardine, are the most vulnerable species to heatwaves and ocean warming, he said, adding that this would lead to a reduction in overall marine fish production.

HEAT THREAT

Highlighting the potential impact of El Nino, he said available information indicated the probability of marine heatwaves, rising sea surface temperatures and high salinity during April and May 2027.

Sustained warming could adversely affect coral reefs, causing coral bleaching and reducing the natural abundance of reef-associated species such as red snapper, George said.

CMFRI would provide El Nino advisories to fishermen and fish farmers during this year, he added. Urging fish farmers to brace for the situation, George said sudden rainfall following prolonged periods of high temperature and salinity could also trigger rapid salinity fluctuations, disrupting coastal aquaculture activities.

MARINE RESILIENCE

He stressed the need for continuous monitoring of ocean conditions and adaptive management to minimise the impact of climate-driven changes on marine resources and the livelihood of fishers and coastal fish farmers.

CMFRI scientists offered technical guidance on coastal fish farming, cage fish culture, marine fish seed production, black soldier fly-based organic waste management and feed formulation, and awareness on government schemes and subsidies for fish farmers.

QUICKLY.

EAAA wins ₹2,259 crore highway contracts

Mumbai: EAAA Alternatives, Edelweiss' alternatives investment platform, has won two highway contracts under the National Highways Authority of India's Toll, Operate, Transfer (TOT) Bundle 19 programme. The 20-year concession contracts cover Thanjavur–Tiruchirapalli and Madurai–Thoothukudi stretches in Tamil Nadu, spanning 170 km, with a concession value of ₹2,259 crore. OUR BUREAU

IndiGo, ALL Accor launch reciprocal tie-up

New Delhi: Airline major IndiGo and ALL Accor have entered into a reciprocal loyalty partnership that will allow members of their respective loyalty programmes to earn and redeem reward points across air travel as well as hotel stays. The development assumes significance as it marks one of the first such collaborations between the aviation and hospitality sectors in India. OUR BUREAU

Dhruva Space gets ₹60 cr Antariksh VC funding

Hyderabad: Dhruva Space, a spacetech start-up that offers complete engineering solutions, has bagged ₹60 crore in funding from the Antariksh Venture Capital Fund, a dedicated Space-Tech fund anchored by IN-SPACe and managed by SIDBI Venture Capital Ltd. This is the maiden investment from the AVCF. Established with a corpus of ₹1,600 crore, the AVCF aims to provide institutional capital to space-tech start-ups at various stages of development, supporting the scaling of operations and the commercialisation of new technologies. Supreme Court upholds royalty rules for iron ore 'sale value'

PRICING. Royalty, statutory payments are part of 'sale value' of mineral prices, it says

Press Trust of India
New Delhi

COURT CAUTIONS. The Bench said that the Judiciary should show 'deference' to law-making authorities in complex economic matters

The Supreme Court on Monday upheld the constitutional validity of the provisions governing the calculation of royalty on major minerals, while rejecting a challenge from Kirloskar Ferrous Industries Ltd against the Centre.

In a judgment having far-reaching implications for the mining sector and state revenues, a bench comprising Justices JB Pardiwala and KV Viswanathan held that the relevant rules include royalty and other statutory payments within the "sale value" used to calculate mineral prices.

In the 82-page judgment, Justice Viswanathan dismissed a petition filed by Kirloskar Ferrous against Rule 38 of the Minerals (Other than Atomic and Hydro Carbons Energy Minerals) Concession Rules. The plea had assailed the Rules as being *ultra vires* to Articles 14 (right to equality) and 19(1)(g) (freedom to conduct business) of the Constitution.

"We hold that the Explanations to Rule 38 of the 2016 Rules and Rule 45(8)(a) of the 2017 Rules, insofar as they provide for inclusion of royalty and payments made towards District Mineral Foundation and National Mineral Exploration Trust in the sale value for computing the average sale price for determination of royalty, are constitutional and valid," the Bench held.

"We hold that the impugned Rules are not violative of Article 14 and Article 19(1)(g) of the Constitution. We further hold that the impugned provisions are not *ultra vires* Section 9 of the MMDR Act. The writ petition is dismissed," it said.

The government had said that striking down these rules would result in a staggering loss of approximately ₹7 lakh crore to the state exchequer over the 50-year lease periods of auctioned mines.

'NO COMPARISON'

The verdict dismissed the claim of discrimination between coal and iron ore, stating the two cannot be compared.

It noted that coal production is largely a monopoly (Coal India), while iron ore involves many private players, necessitating a different regulatory mechanism to prevent under-invoicing.

The bench said that the judiciary should show "deference" to law-making authorities in complex economic matters.

It ruled that individual hardship cannot be a ground to strike down a fiscal policy intended for public welfare. Welfare of the people is the supreme law, and private rights must cede to the public interest and the financial health of the States, it said.

India-Japan Defence Dialogue: Focus on tech innovation and partnership

Our Bureau
New Delhi

STRONG TIES. Japan's Defence Vice Minister (International Affairs) Kano Koji and Defence Secretary Rajesh Kumar Singh at the 8th India–Japan Defence Policy Dialogue in Tokyo ANI

Ten days after India and Japan entered into a partnership for co-production of Naval Radio Antenna "UNICORN" during Japanese PM Sanae Takaichi's visit to New Delhi, Defence Secretary Rajesh Kumar Singh is in Tokyo to deepen cooperation in emerging domains, including defence industrial collaboration, technological innovation, cyber security, space and other areas of strategic interest. The move comes at a time when Japan, which continues to face off with China, is giving a push to its defence manufacturing ecosystem and mass drone production to sustain long-drawn conflicts.

Defence Secretary Rajesh Kumar Singh, leading the Indian delegation, met with Japanese Vice Minister of Defence for International Affairs Kano Koji.

STATUS REVIEW

The two countries held comprehensive discussions on the prevailing regional and global security environment and exchanged views on issues of mutual interest.

The dialogue reviewed the entire spectrum of bilateral defence engagements, including military-to-military exchanges, co-operation between joint headquarters, maritime cooperation, defence exercises, capacity building, defence equipment and technology cooperation including maritime technology, and enhanced institutional interactions.

Both sides expressed satisfaction with the growing convergence between India and Japan on regional and global security issues and agreed to continue working closely in the Indo-Pacific. They reiterated their commitment to promoting a free, open and rules-based Indo-Pacific region founded on respect for international law.

Japan has offered to transfer the complete design and local production rights of its advanced Mogami-class stealth frigates to India under the Make in India and Aatmanirbhar Bharat frameworks.

Serum Institute to supply doses for Phase I clinical trial of ebola virus vaccine

PT Jyothi Datta
Mumbai

The Serum Institute will provide doses for the world's first Phase I clinical trial for a vaccine against the Bundibugyo ebolavirus (BDBV), being undertaken by the Oxford University's Oxford Vaccine Group.

The BDBV strain is responsible for the ongoing ebola outbreak in the Democratic Republic of the Congo (DRC) and Uganda.

Over 600 deaths have been reported in DRC, according to latest reports. The trial will be conducted in Oxford and will assess the safety and immune response of the ChAdOx1 BDBV vaccine in 50 healthy adults between 18–55 years, they said in a joint statement.

SCREENING VISITS

"Recruitment of volunteers into the study is now underway, where they will then attend screening visits," the note said.

To speed up development of the vaccine candidate into clinical evaluation, "Serum Institute of India (SII) has manufactured and stockpiled approximately 620,000 doses of the ChAdOx1 BDBV vaccine candidate in two weeks for potential future use and has supplied 4,000 investigational doses for this Phase I trial," the note said.

SII has stockpiled and supplied doses of the ChAdOx1 BDBV vaccine candidate for Oxford Vaccine Group's trials

The Coalition for Epidemic Preparedness Innovations (CEPI) is funding the University of Oxford and SII, as part of a $8.6 million programme to advance the development of Bundibugyo vaccines, the note said.

ON FAST TRACK

Efforts are also underway, subject to regulatory approvals, to conduct clinical studies with partners including the Medical Research Council/Uganda Virus Research Institute and London School of Hygiene and Tropical Medicine Uganda Research Unit, it said. The said vaccine was developed by scientists at the Oxford Vaccine Group (OVG) and the Pandemic Sciences Institute and uses the same viral vector platform as the Oxford/AstraZeneca Covid-19 vaccine, the note explained.

Professor Teresa Lambe, Calleva Head of Immunology at the Oxford Vaccine Group and Pandemic Sciences Institute, and the study's Lead Scientific Investigator, said, "This milestone comes after only 57 days since the World Health Organization declared the outbreak a public health emergency of international concern."

Adar Poonawalla, Serum Institute's Chief Executive added, "During outbreaks, speed, preparedness and global collaboration are essential to advancing vaccine candidates quickly and responsibly." Dr Nicole Lurie, CEPI Executive Director (Preparedness and Response), pointed out that the Bundibugyo epidemic is already the third-largest Ebola outbreak on record, as infection numbers are continuing to rise.

If all goes to plan, CEPI expects to work with Oxford University and SII to support late-stage trials to generate data for emergency use authorisation or licensure, it said.

Earlier this month, the WHO had added the first molecular diagnostic test for the BDBV virus to its emergency use listing, paving the way for easy adoption in low-resource regions.

Supreme Court stays Madras HC order banning cow slaughter in TN

Aaratrika Bhaumik
New Delhi

The Supreme Court on Monday stayed a May 27 order of the Madras High Court directing the Tamil Nadu government to enforce a Statewide prohibition on the slaughter of cows and calves.

A Bench comprising Justices Vikram Nath and Sandeep Mehta was hearing a special leave petition filed by the Tamilaga Vettri Kazhagam (TVK) government challenging the High Court's order on the ground that the direction was contrary to the provisions of the Tamil Nadu Animal Preservation Act, 1958, which permits the slaughter of cows over 10 years of age if a competent authority declares them unfit for work and breeding. The State government also pointed out that laws such as the Prevention of Cruelty to Animals Act, 1960, the Prevention of Cruelty to Animals (Slaughter House) Rules, 2001, the Tamil Nadu Urban Local Bodies Act, 1998, and the Tamil Nadu Urban Local Bodies Rules, 2023, do not impose a blanket prohibition on slaughter, but regulate the manner and conditions of slaughter.

TN apprised that the High Court's order amounted to "judicial law making" and was internally inconsistent

Observing that the impugned order required *prima facie* "correction", the Bench issued notice on the appeal filed by the Tamil Nadu government. The petition, filed by the Secretary to the State government, arraigned as respondents K Surya, aka K Surya Prasanth, youth wing secretary of the Indu Makkal Katchi, who had moved the original writ petition before the High Court, along with the Director- General of Police and other State officials. The original plea alleged that local authorities had permitted the slaughter of cows and calves in places that had not been notified or designated as slaughterhouses ahead of Bakrid (Id-ul-Azha).

'JUDICIAL LAW MAKING'

The State government apprised the top court that the High Court's order amounted to "judicial law making" and was internally inconsistent. The State also submitted that it had already taken the necessary steps to prevent the slaughter of animals in public places and had consistently maintained that any animal sacrifice would be permitted only in enclosed spaces away from public view.

J&K pushes rooftop solar ahead of deadline

Gulzar Bhat
Srinagar

With just eight months left to meet the Centre's March 2027 target of one crore residential rooftop solar installations under the PM Surya Ghar: Muft Bijli Yojana across the country, Jammu and Kashmir has entered the most critical phase of the programme, where the pace of installations will determine whether the Union Territory achieves its rooftop solar goals.

FOCUS ON EXECUTION

Official data show the Union Territory has installed 37,138 residential solar rooftop systems against a target of 83,500, about 44 per cent of the target.

The immediate challenge appears to be translating enrolments into completed installations. Nearly 57,000 beneficiaries have already finalised vendor agreements, suggesting consumer demand is no longer the principal bottleneck. Instead, the focus has shifted to execution as the March 2027 deadline approaches. Officials said the residential programme has so far added 133.40 MW of rooftop solar capacity, while beneficiaries have received Central financial assistance of ₹291.38 crore.

The Jammu and Kashmir government has supplemented this with an additional subsidy of ₹10.5 crore to encourage wider adoption.

SIMILAR PATTERN

A similar pattern is visible in the government building solarisation programme.

Of the 22,494 government buildings identified for rooftop solar systems, installations have been completed on 8,131 buildings, covering just over one-third of the total. Under the capex model, projects have been completed on 3,338 government buildings, creating an installed capacity of 46.30 MW against a target of 65 MW. Officials said material had already been supplied for another 1,462 buildings, while supplies for 800 more are in transit, indicating that execution is likely to accelerate in the coming months.

Meanwhile, implementation under the Renewable Energy Service Company model is gathering momentum.

WORK ORDERS

Work orders have been issued for 1,360 government buildings as part of a plan to develop 175 MW of rooftop solar capacity across nearly 8,000 public buildings.

The simultaneous rollout of the capex and RESCO models indicate that the administration is attempting to scale up installations rapidly as it races to meet the March 2027 deadline.

Bhogapuram airport notified as immigration check post

Our Bureau
New Delhi

The Centre has designated upcoming Bhogapuram Airport in Andhra Pradesh as the 39th authorised immigration check post across the country, offering immigration clearance facilities for international travel. This would be the third immigration check post in the State after the ones at Visakhapatnam and Tirupati airports. Also, it would be the 13th immigration check posts in the southern part of the country.

Last week, the Ministry of Home Affairs (MHA) amended its September 1, 2025, notification, which lists the authorised immigration check posts across the country to this effect..

Alluri Sitarama Raju International Airport being developed at Bhogapuram near Visakhapatnam, is expected to enhance air connectivity in the region and cater to growing domestic and international passenger traffic. The airport is being positioned as a major aviation hub for north coastal Andhra Pradesh and is expected to complement the existing airport at Visakhapatnam.

Designed to handle nearly 40 million passengers annually, Bhogapuram International Airport features a 78,000 square metre terminal building. The Ministry of Civil Aviation issued an aerodrome licence to the greenfield airport on July 10.

Coimbatore student team wins the €25,000 global award at Monaco Energy Boat Challenge 2026

Sindhu Hariharan
Chennai

India earned a major boost on the global clean mobility stage thanks to a young student team, Team Sea Sakthi, from Coimbatore's Kumaraguru College of Technology. The team won the prestigious Foundation Prince Albert II Award at the Monaco Energy Boat Challenge de Monaco. The winning innovation addressed one of the key challenges in electric mobility — battery thermal management and safety.

The annual Monaco Energy Boat Challenge is one of the world's leading platforms for testing zero-emission boats and next-generation sustainable propulsion technologies.

This year's edition featured 46 teams from universities and institutions worldwide, and 26 teams competed in the Energy Class. Team Sea Sakthi emerged as the winner among these teams for the award that recognises innovations with the greatest potential to advance sustainable marine technology.

GLOBAL WIN. Team Sea Sakthi celebrating the Monaco Energy Boat Challenge 2026 win TEAM SEA SHAKTI

This marks the first time in the five-year journey of Team Sea Sakthi that the team has both been shortlisted for and won the award, making it a landmark achievement for the college and for the country.

KEY INNOVATION

The team developed an advanced three-module lithium-ion battery pack integrated with an active cooling system and custom-designed cell brackets.

To improve safety and battery performance, the battery pack also incorporated a phase change material (PCM) developed using paraffin wax and expanded graphite.

Members of Team Sea Sakthi told *businessline* that while there are existing solutions for thermal management, their innovation does not cut off the entire system but stabilises its temperature and keeps the system working as well.

The solution has potential applications beyond electric boats and could be adapted for electric vehicles, autonomous systems and other battery-powered mobility solutions where thermal safety is critical, they added.

*: Closing price is the average of trade price(s) for the last half an hour;52-Week High/Low figures pertain to BSE.

Shares of face value other than ₹10 is indicated in brackets immediately following the name of the company.

Qty (No of shares traded) is denoted in thousands.

The PE(price-earnings multiple) of each stock is based on the latest declared earnings.

The PE computation takes into account the per share earnings of each company for the latest 12 months.
