New Kotak Mahindra Bank chief to focus on lending

Mumbai: Anup Kumar Saha is set to take the reins at Kotak Mahindra Bank (KMB) on January 1, 2027, for three years. Currently, a Whole-time Director (Executive Director) at KMB, Saha is expected to give a renewed thrust to home loans, loans against property, personal loans, business loans, credit cards and microcredit, among others, in view of his rich experience in these segments. **p10**

ON THE FAST TRACK

Maruti, Tata, M&M see wholesales surge in Sept

New Delhi: Domestic automobile wholesales (dispatches to dealers) continued to skyrocket in September, with most manufacturers reporting double-digit growth, both in passenger vehicles (PVs) and two-wheelers. Total PV sales grew over 21 per cent y-o-y to 4,63,081 units during the month compared with 3,81,435 units in September 2025, per industry sources. **p2**

ITC reliefs top GST Council agenda for October 7 meeting

RELIEF PLAN. Law panel for unblocking Input Tax Credit on insurance, catering, free samples

Shishir Sinha
New Delhi

TAX TWEAK

- Section 17(5) of the CGST Act prescribes restrictions on ITC for certain input goods and services
- Restrictions imposed for some inputs, which are prone to personal consumption, used for non-business purposes
- Restrictions also apply where onward supply is either exempt or outside GST
- Representation received to unblock ITC for eight categories

The GST Council is expected to consider a proposal to unblock Input Tax Credit (ITC) for employee insurance policies, outdoor catering, free samples and goods destroyed or written off.

The proposal also leaves the decision on unblocking ITC for motor vehicles, including their leasing, renting or hiring, to the Council's discretion.

FIVE AMENDMENTS

"The Law Committee of the GST Council has recommended five amendments to Section 17(5) of the CGST Act to unblock ITC on various goods and services to help businesses. These are expected to be considered by the Council at its October 7 meeting," a senior official told *businessline*.

One key change is omitting life and health insurance and outdoor catering from the section blocking ITC.

He explained that life and health insurance, particularly group insurance policies provided by companies to their employees, can be considered a business expense. "Denial of credit on these items creates an inconsistency as life and health insurance have been removed from the tax net. This leaves primarily group insurance as taxable, which is *prima facie* a business expense," he said, adding that this makes a case for unblocking of ITC.

OUTDOOR CATERING

The official said outdoor catering services could constitute a genuine business expense incurred for business events, conferences and staff functions integral to business operations. As of now, ITC is already available "where it is obligatory for an employer to provide the same to its employees under any law".

Canteen services are presently a baseline infrastructure that is becoming a standard operational necessity, especially for large enterprises. Also, no ITC is permissible if outward catering is used for personal or non-business purposes. Considering these nuances, the Law Committee favours unblocking ITC for outdoor catering, the official said.

On free samples, he said, "It is part of normal business operations in sectors such as pharmaceuticals and FMCG to distribute free samples for market development and customer acquisition. Denial of ITC will add to the cost of business."

Thus, the Law Committee recommended that blocking ITC for such supplies may be done away with. Similarly, ITC may not be denied where goods are destroyed or written off due to expiry of their shelf life, as required under law.

However, the official added that there was no consensus in the Law Committee on allowing ICT on motor vehicles and leasing/renting/hiring of motor vehicles.

There was also a suggestion to provide relief for vehicles alone. The matter was left for the Council to decide.

For third month in row, GST collections top ₹2 lakh crore in September

For the third consecutive month, GST collections in September crossed ₹2 lakh crore, GST portal data showed.

Experts believe this trend sets the stage for process reforms by the GST Council, which will meet on October 7.

Gross GST collections from domestic activities rose 10.1 per cent to about ₹1.38 lakh crore, and import revenues grew 26 per cent to ₹65,525 crore. Net GST collections rose 18.1 per cent to over ₹1.76 lakh crore.

Economy faces inflation and investment hurdles: FinMin report

Shishir Sinha
New Delhi

A Finance Ministry report on Thursday flagged concerns over inflation and sluggish investments, though it anticipated that these challenges will be resolved in the near term.

The report also pointed to ongoing trade tensions with the US following the passage of the Lindsey O Graham Sanctioning Russia and Iran Act of 2026, which grants the US President the authority to levy tariffs of up to 100 per cent on countries importing Russian crude oil, including India.

ECONOMIC HEADWINDS

"India's economic outlook faces some upside inflation risks driven by compounding climate, geopolitical and monetary headwinds," said the latest edition of the *Monthly Economic Review*, prepared by the Economic Affairs Department.

Further, a strong El Nino event could pose risks to the rabi crop through heat stress and reduced soil moisture, although a positive Indian Ocean Dipole (IOD) may partially offset these effects.

INFLATION PRESSURES

"Geopolitical tensions and elevated crude oil prices could also add to imported inflation pressures, particularly amid the US Federal Reserve's 25 bps rate hike in September," it added.

The report noted that the RBI's open market operations to absorb excess system liquidity could help maintain balanced financial conditions

In the context of the geopolitical turbulence, the report noted that the RBI's recent open market operations to absorb excess system liquidity could help maintain balanced financial conditions and contain any undue demand-side overheating.

FESTIVE DEMAND

Festival demand and higher input costs could add near-term pressure to prices, the Review said. However, "proactive supply-side and market measures by the government could contain these upside risks and provide a cushion against temporary price pressures," it said.

It said geopolitical and geoeconomic uncertainty mean that India cannot afford to rest on its post-Covid growth laurels.

"It has to be earned every quarter. That is the challenge for policymakers," the report cautioned.

On the issue of investment, the report acknowledged that India, like other developing countries, faces a stiff challenge in attracting capital flows.

INVESTMENT HURDLES

It said near-term uncertainties pertaining to the state of the trade relationship with the US, tariff pressures, uncertainty over crude oil prices and supply, and the absence of an India angle to the AI-related global developments cast a shadow on India as an attractive investment destination.

"Indications are, however, that foreign direct investment inflows, on a net basis, should do better this financial year than last. Thus, short-term pressure on Indian assets, including the currency, remains," it said.

Inflation arising from supply shocks will also restrain economic growth. "Interest rates in the developed world are rising sharply. This will spill over into domestic bond yields as well," it said.

In a first, 'an outsider' & ICICI veteran Anup Bagchi to helm HDFC Bank

K Ram Kumar
Mumbai

Anup Bagchi

For the first time in its near-32-year existence, HDFC Bank will have an outsider helming its operations. ICICI Group veteran Anup Bagchi will be the new Managing Director and Chief Executive Officer of India's largest private sector bank.

The RBI approved HDFC Bank's application for the appointment of Bagchi, currently serving as Chief of ICICI Prudential Life Insurance, as MD and CEO for three years with effect from October 27, 2026.

The announcement on the appointment comes in the wake of Sashidhar Jagdishan deciding not to seek re-appointment for a third term as the MD and CEO of HDFC Bank amid a controversy that started with the abrupt resignation of the bank's Part-Time Chairman Atanu Chakraborty in March.

Sashidhar has been helming HDFC Bank since October 27, 2020, and his term ends on October 26, 2026.

Aditya Puri headed the Bank for the longest period — since its incorporation in 1994 till October 26, 2020. So, Bagchi will be the bank's third chief in 32 years.

Kaizad Bharucha, Deputy Managing Director, HDFC Bank, was believed to be a strong contender for the top position, but now it is not clear if he will continue with the bank. He has been on its board since 2014.

DIVERSE CAREER

In a regulatory filing, HDFC Bank said Bagchi, who had been with the ICICI Group since 1992, had built a diverse career spanning treasury, retail, wholesale and investment banking, as also digital financial services. The bank noted that over the course of his career, he had held several key leadership positions, including CEO and MD of ICICI Securities, Executive Director of ICICI Bank, and currently MD and CEO of ICICI Prudential Life Insurance.

"Bagchi's vast experience across the financial services space at ICICI Bank should hold him in good stead while he helms India's largest private sector bank. It is a huge responsibility to steer a domestic systemically important bank such as HDFC Bank," said a market expert.

MARKET THUMBS UP

The Street probably had an inkling about the appointment as the HDFC Bank stock bucked the broader market weakness to end 1.36 per cent higher at ₹719.35 on the BSE.

Vijay Singh, Venu Srinivasan raise concerns over plan to merge two group firms with Tata Sons

Aneesh Phadnis
Mumbai

Tata Sons Trustees Vijay Singh and Venu Srinivasan have expressed concerns over the proposed restructuring of Tata Sons through the merger of two group outfits into the holding company.

In a joint letter to the trustees of Sir Dorabji Tata Trust (SDTT) on Wednesday, they said the proposed reorganisation could have significant financial implications for Tata Sons, the Trust and other stakeholders.

GROUP-WIDE IMPACT

"These include consequences for group companies, employees and regulators arising from the proposed amalgamation and a change in Tata Sons' regulatory status. These matters, therefore, require appropriate analysis and deliberation, including consideration of the interests of Tata Sons," Singh and Srinivasan said.

The two trustees, who have also complained to the Maharashtra Charity Commissioner about alleged governance lapses within the Trusts, said they were unaware of the proposal to restructure Tata Sons.

On Monday, Tata Trusts announced a proposal to merge Tata Electronics Systems Solutions Pvt Ltd and Tata Consulting Engineers with Tata Sons.

According to Tata Trusts Chairman Noel Tata, the proposal would help Tata Sons avoid a mandatory listing of its shares.

The two trustees said they became aware of the Trust's letter to the Tata Sons board "to consider and approve" the merger through public sources.

NO TRUSTEES MEETING

"To our knowledge, no meeting of the trustees of SDTT was held to discuss or deliberate on the issue before the letter was sent to Tata Sons. As no meeting of the trustees of SDTT authorised either the letter or the press release, neither can be said to reflect the collective institutional position of SDTT," they said.

Both trustees further questioned whether it was appropriate for a shareholder to direct the Tata Sons board to approve a specific course of action.

While Tata Trusts said the proposal was consistent with its July 2025 resolution to preserve Tata Sons' private status, Singh and Srinivasan argued that the resolution could not be treated as determinative in light of the RBI's decision to retain Tata Sons in the NBFC-Upper Layer category.

Tata Trusts did not comment on the joint letter. In a statement, it said it had not been served copies of the complaints filed with the Charity Commissioner, but denied the allegations and the assertions made in them.

Who moved my cottage cheese?

FSSAI clampdown is reshaping paneer industry, with growing traction for branded products

Meenakshi Verma Ambwani
Prabhudatta Mishra
New Delhi

India's paneer market is estimated at ₹1 lakh crore; it has been growing at 15-18%

The paneer industry is undergoing a massive shakeup as a regulatory crackdown on "analogue" paneer triggers a structural market shift. With at least eight States already banning imitation products and the Food Safety and Standards Authority of India (FSSAI) preparing to restrict the sale of analogue products as paneer nationwide, consumers are abandoning cheaper lookalikes mixed with vegetable fat in favour of trusted, branded products.

Organised dairy players are reporting a spike in demand for their branded paneer and are increasing manufacturing capacity.

Jayatheertha Chary, Managing Director, Mother Dairy, said, "At Mother Dairy, we witnessed a 60-70 per cent year-on-year growth in demand for our packaged paneer during the current quarter, with the growth rate nearly doubling from the previous quarter."

Chary said modern retail, quick commerce and institutional channels are also contributing to the acceleration, and to keep pace with demand, the company had doubled its paneer capacity over the last two years.

Jayen Mehta, Managing Director, GCMMF, said Amul is the market leader with a 30-35 per cent share in the branded paneer segment and produces it in 35 plants across the country while growing capacity steadily. He added that there will be no constraints in meeting the demand as more consumers shift to branded paneer.

Demand for authentic paneer is also spiking in the B2B segment. VPS Malik, Chief Marketing Officer, VRS Foods Ltd (Paras Dairy), which sells in both B2C and B2B channels, said the company was earlier making 7-8 tonnes of paneer daily, but now its plants are at full capacity, producing 14-15 tonnes. "We plan to add another paneer unit," he added.

Recently, Parag Milk Foods announced an investment of about ₹100 crore to expand its paneer manufacturing capacity. "Paneer is a key growth category, having recorded approximately 28 per cent annual growth over the last two years. We continue to see sustained consumer demand for branded paneer, driven by increasing awareness around quality, consistency and authenticity," said Akshali Shah, Executive Director, Parag Milk Foods.

DOUBLE-DIGIT GROWTH

India's paneer market is estimated at ₹1 lakh crore, and the category has been growing at 15-18 per cent, indicating significant headroom for organised players, noted K Rathnam, CEO & Whole-Time Director, Milky Mist Dairy Food.

"The increased regulatory focus will further accelerate the shift towards quality and compliance, and manufacturing capacity for paneer will certainly increase," he said.

Bond yields hit a two-year high amid inflation pressure

Ashokamithran T
Mumbai

The benchmark 10-year G-Sec yield hit a two-year high of 7.21 per cent on October 1 as global yields hardened and domestic inflation expectations strengthened.

The last time the government bond yielded a similar return was on April 19, 2024, when it touched 7.22 per cent.

A combination of rising global bond yields and higher inflation expectations has made domestic government bonds cheaper, pushing yields higher.

The US 10-year Treasury yield, for instance, inched up to 5.33 per cent, a two-decade high, as investors grew concerned about rising government debt and soaring crude oil prices.

Mahindra, Embraer pick Nagpur to assemble C-390

Mumbai: The Mahindra Group and Embraer have identified Nagpur as the preferred location for a potential final assembly line for the C-390 Millennium military transport aircraft, subject to the aircraft being selected for the Indian Air Force's Medium Transport Aircraft programme. The proposed facility will support local manufacturing, assembly, supply chain development and MRO activities under the Make in India initiative. The companies are working with the Maharashtra government to create the required infrastructure. OUR BUREAU

Adani Green Energy expands BESS capacity

New Delhi: Adani Green Energy Ltd has expanded its operational battery energy storage system capacity to 6.63 GWh. With this, the company has achieved almost 70 per cent of its FY27 target. The 6.63 GWh BESS supports peak electricity demand of cities like Nagpur, Patna or Visakhapatnam for several hours. PTI

Maruti, Tata and M&M see sales growth in September

VROOMING AHEAD. Hero Moto, TVS Motor have a good outing; Bajaj Auto sales fall 12%

S Ronendra Singh
New Delhi

Domestic automobile wholesales (dispatches to dealers) continued to skyrocket in September with most manufacturers reporting double-digit growth, both in passenger vehicles (PVs) and two-wheelers.

Total PV sales grew over 21 per cent y-o-y to 4,63,081 units during the month compared with 3,81,435 units in September 2025, per industry sources.

MARUTI LEADS

Market leader Maruti Suzuki India reported a 37 per cent growth in its domestic wholesales to over 1.81 lakh units in September, as compared with 1,32,820 units in the same month last year.

"We have outpaced the industry, both in the 18 per cent and 40 per cent slabs [of GST], because of which we have gained the highest market share among all manufacturers in the second quarter as well as in the first half of this financial year," said Partho Banerjee, Senior Executive Officer, Marketing & Sales, MSIL. The company has pending bookings of more than 2 lakh vehicles.

Tata Motors Passenger Vehicles grew its dispatches by 15 per cent y-o-y to 68,810 units during the month, against 59,667 units in the corresponding month last year. 'Thar' maker M&M, too, saw its wholesales growing 14 per cent y-o-y to 64,092 units in September in the domestic market, compared with 58,233 units in the same month last year.

Hyundai Motor India saw an 11 per cent uptick in monthly domestic wholesales, selling 57,166 units compared with 51,547 units in September 2025.

"We are delighted to close September 2026 with our highest-ever total monthly sales of 77,916 units [including exports], registering a healthy double-digit growth of 10.8 per cent y-o-y. This number surpasses our previous record achieved in July 2026," said Tarun Garg, MD and CEO, HMIL.

Kia India, too, reported a 41 per cent y-o-y growth with domestic wholesales of 32,017 units during the month as compared with 22,700 units in September last year.

Companies like Toyota Kirloskar Motor and Renault India, however, reported a decline in their respective sales, despite having some strong product lines and new launches.

TWO-WHEELERS

In the two-wheeler segment, market leader Hero MotoCorp grew sales by 14 per cent y-o-y to over 7.39 lakh units during the month compared with more than 6.47 lakh units its sold in the same period last year.

Honda Motorcycle & Scooter India (HMSI) grew sales by 26 per cent to 6,36,768 units in September from 5,05,693 units in September 2025, while 'Ronin' maker TVS Motor Company witnessed a 17 per cent uptick to 4,82,073 units during the month compared with 4,13,279 units in the same month last year.

Bajaj Auto reported a 12 per cent decline in its motorcycle sales during the month.

In the commercial-vehicle segment, too, all manufacturers, including Ashok Leyland, Tata Motors, M&M and Volvo Eicher, reported double-digit growth in sales.

Tata nearly doubles EV sales, M&M overtakes JSW MG Motor

Amit Vijay Mohile
Mumbai

Passenger vehicle registrations accelerated 30.9 per cent year-on-year to over 4.14 lakh in September 2026 from over 3.16 lakh in September 2025, while electric cars grew thrice as fast, nearly doubling to 34,894 units, according to Vahan data.

Sequentially, overall PV registrations rose 2.1 per cent from 4.05 lakh units in August, while EV registrations increased by a much stronger 9.9 per cent.

CLOSING IN

The EV surge has also reshuffled the race among carmakers. Tata Motors nearly doubled its EV registrations to 14,721 while Mahindra & Mahindra's rose 94.9 per cent to 7,743 and overtook JSW MG, whose registrations increased 8.9 per cent to 5,226 units.

In the overall PV market, Maruti Suzuki maintained its top spot with over 1.68 lakh registrations during the month.

The race behind it tightened sharply with Tata registering 56,972 vehicles against M&M's 56,745, leaving just a 227 unit gap between them. Last September, the gulf was wider at 3,011 units.

Beyond the top three, Hyundai remained the fourth-largest player, with registrations rising 31 per cent year-on-year to 49,998 units.

Another contest tightened further down the table. Toyota grew 21.3 per cent to 27,652 units, while Kia jumped 45.4 per cent to 26,555 units. Toyota's lead over Kia consequently shrank from 4,541 vehicles in September 2025 to 1,097 in September 2026.

The acceleration indicates PV demand is gaining momentum, helped by the festival season, improved consumer sentiment, and manufacturers bringing new models and offers to the market, said Kranti Bathini, Director-Equity Strategy at WealthMills Securities.

TATA CLIMBS UP

The January-September Vahan numbers show a bigger change in the pecking order. Tata's registrations rose 36.8 per cent to 5.53 lakh units while M&M's rose 23.7 per cent to 5.31 lakh. During the same period last year, Tata was trailing M&M by nearly 25,000 vehicles.

It was a dog-fight in the EV category. Tata's registrations rose 89.3 per cent to 1,01,862 units during the period from 53,820 a year earlier. Mahindra's, meanwhile, jumped 128.8 per cent to 57,943, while MG's registrations increased 13 per cent to 48,793.

In other words, Mahindra swung from 17,868 EVs behind MG in the same period last year to 9,150 ahead this year.

KIA BEATS MARUTI

In monthly registrations, Kia's EV count went up 47.6 per cent to 1,255 in September while Maruti's fell 25.6 per cent to 1,095. VinFast remained ahead with 2,961 registrations, up 32.2 per cent m-o-m.

The stronger registration numbers suggest that the demand is translating into retail rather than being driven only by manufacturer dispatches, said Vinkesh Gulati, Chairman of the Automotive Skills Development Council and former President of the Federation of Automobile Dealers Associations.

Faster EV growth also indicates that electric cars are becoming a more meaningful part of the PV market, he added.

Domestic wholesale data reported by Maruti Suzuki, Tata Motors, Mahindra & Mahindra, Hyundai Motor India and JSW MG Motor India broadly corroborated the Vahan retail trend for September 2026, with the five retaining the same relative order on both measures.

With retail demand strengthening and EVs adding another growth engine, the passenger-vehicle market is increasingly being set up for a record year, said Bathini.

CEAT expands Chennai plant, to focus on premium tyres

Our Bureau
Chennai

CEAT Ltd on Thursday announced an expansion of manufacturing capabilities at its Chennai plant across passenger car, SUV, commercial vehicle and two-wheeler tyre categories. The expansion strengthens the plant's ability to manufacture advanced premium products for customers in India and key international markets, including Europe and North America, the company said in a release.

The investment details were not shared.

PREMIUM SUV TYRES

Among the key products manufactured at the plant is 4SeasonDrive+, which brings European standard all-season tyre capability to India, with performance designed around changing weather conditions and a particular focus on wet grip.

The plant at Sriperumbudur also manufactures CrossDrive RT, CEAT's rugged terrain tyre developed around the requirements of the US rugged and off-road tyre market. CEAT has also developed capability for SportDrive SUV ZR22, making it the first Indian tyre company to manufacture 22-inch tyres in India.

"The Chennai plant is an important part of CEAT's growth in India and international markets... This investment strengthens our ability to compete in premium segments," said Arnab Banerjee, MD and CEO.

CEAT has also expanded the truck and bus radial manufacturing capability to address the requirements of CV fleets in advanced markets.

CAFE-III gazette shows 10x difference in EV metric in English, Hindi texts

Amit Vijay Mohile
Mumbai

LOST IN TRANSLATION

- The English gazette specifies electricity consumption in "kilowatt hour per one hundred kilometres"
- The corresponding Hindi text says kWh per 1,000 km
- Another provision describes October 1-31 as a "30-day" credit-trading window
- The inconsistencies may require clarification as carmakers prepare for the fuel-efficiency regime beginning April 2027

India's final CAFE-III gazette contains a 10-fold discrepancy between its English and Hindi texts in the unit used to measure electric-vehicle energy consumption.

While the English gazette specifies electricity consumption in "kilowatt hour per one hundred kilometres", the corresponding Hindi text says kWh per 1,000 km. Existing CAFE procedures and CAFE-III's petrol-equivalent conversion work on a 100-km basis, indicating the 1,000-km reference requires clarification or correction.

Next is essentially a procedural inconsistency. Manufacturers trading compliance credits are simultaneously given a "30 day" period and dates covering 31 calendar days. It creates uncertainty over the legally applicable deadline rather than changing the CAFE target itself.

A closer examination of the final CAFE-III framework shows something important for carmakers and consumers: its FY32 benchmark of 3.327 litres/100 km, mathematically about 30 km/litre, is a regulatory compliance benchmark and need not equal the physical fuel consumed by a compliant fleet.

For industry, the rules tighten fleet-efficiency requirements while providing several routes to compliance through powertrain multipliers, technology allowances, carbon neutrality factors, and compliance credits. For consumers, CAFE-III should push manufacturers towards more efficient fleets, but the 30 km/l equivalent figure is not a mileage guarantee for individual cars or necessarily the unadjusted fleet average.

TECHNOLOGY REWARDS

ForeSee's analysis also highlights how CAFE-III treats different technologies. The underlying procedure defines "PHEV/REEV" together as a strong hybrid capable of off-vehicle charging, yet PHEVs receive a 2.5x multiplier and REEVs 3x, alongside BEVs, without a specified minimum battery capacity or electric range separating the rewards.

"The multiplier is earned by label, not by capability," said Randheer Singh, founder of ForeSee Consulting. CAFE-III also does not require actual PHEV charging or electric-distance data for the multiplier.

Former NITI Aayog CEO Amitabh Kant said India should bypass transitional technologies altogether. "Hybrids are the electric typewriters of our time," he wrote on X on Thursday. "They are a bridge, not the destination... India needs to go straight to electric."

Adani Ports doubles Colombo terminal capacity at $750 million

Our Bureau
Ahmedabad

Adani Ports and Special Economic Zone (APSEZ) has doubled the capacity of its Colombo West International Terminal (CWIT) to 3.2 million twenty-foot equivalent units (TEUs) with a total investment of $750 million, as the company looks to strengthen its position in the Indian Ocean's transshipment trade.

The expanded terminal is expected to handle nearly a quarter of the Colombo port's targeted 13 million TEU capacity by 2028. The additional infrastructure will allow CWIT to berth three ultra-large container vessels simultaneously.

CWIT, which is Sri Lanka's first fully automated deepwater container terminal, handled 2 million TEUs within the first 18 months of operations.

"Doubling CWIT's capacity is a direct statement of confidence from APSEZ and from the global shipping lines," said Ashwani Gupta, Whole-Time Director and Chief Executive Officer of APSEZ.

Amazon ramps up Ashray centres, vans for gig workers ahead of festival season

It will add 50 centres, taking the total to 200 across India

Vallari Sanzgiri
Mumbai

WELFARE INITIATIVE. The centres have scaled rapidly since their launch in Delhi-NCR in 2024

Gearing up for the festival season, Amazon India has planned for 50 new 'Ashray centres', or dedicated rest stops for gig workers across India.

"With the festival season driving a sharp increase in deliveries, it's more important than ever that drivers across the industry have access to rest on their routes," said Salim R Memon, Director-Operations, Amazon India. "Ashray was built on a simple idea: every delivery driver, whether they deliver for Amazon or not, deserves a clean, cool place to rest during their workday."

PLANS FOR MORE

The expansion will take the total number of pan-India Ashray centres to 200, with plans to reach even 250 by the end of 2026.

The company has also announced the expansion of its mobile Ashray vans to Bengaluru, the fourth city after Delhi NCR, Mumbai and Hyderabad. "This expansion is part of Amazon India's broader investment of over ₹2,800 crore in 2026 to strengthen associate safety, health, and financial well-being across its operations network," said Memon.

GOOD AMENITIES

The centres are equipped with air-conditioned seating, drinking water, mobile charging points, clean washrooms, first-aid kits and comfortable resting spaces. Each centre accommodates 10-15 people at a time, allows free access for up to 30 minutes per visit with convenient parking, and operates year-round from 9 am to 7 pm at high-footfall locations like petrol pumps and commercial spaces. These centres are also listed on Google Maps for easy discovery.

Mobile Ashray vans bring similar convenience along high-footfall delivery routes. Each van is equipped with air-conditioned seating, drinking water, free Wi-Fi connectivity and charging points for mobile phones.

Govt cuts windfall tax on diesel, jet fuel

New Delhi: The Finance Ministry has cut windfall tax on diesel and jet fuel (aviation turbine fuel) with effect from Thursday. There is no change in domestic levy. Per the notification, the export levy on diesel has been cut to ₹16 a litre from ₹20 a litre. On ATF, it will be ₹10.5 a litre as against ₹15. There is no change in levies on petrol, and it will remain at ₹0.50 a litre. "There is no change in the existing excise duty rates on petrol and diesel cleared for domestic consumption," the Ministry said. OUR BUREAU

NMDC iron ore output jumps 23% in Apr-Sept

New Delhi: NMDC has reported a 23 per cent growth in iron ore production to 27.27 million tonnes during April-September of the ongoing financial year. The company had produced 22.2 million tonnes of iron ore during the six-month period of FY26, as per an exchange filing. Cumulative sales remained steady at 22.23 mt during H1 of FY27. PTI

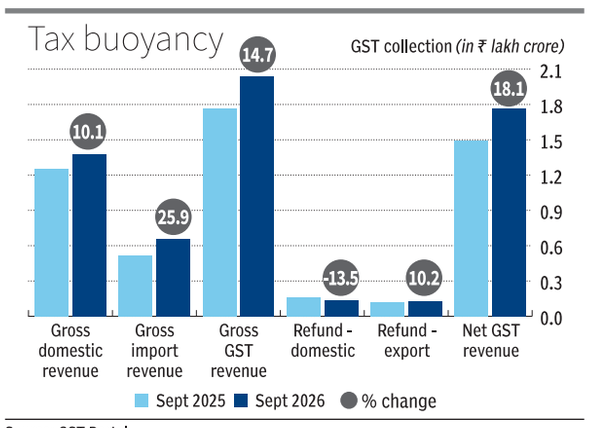

GST collections top ₹2 lakh cr in Sept, third month in a row

SET FOR REFORMS. Growth reflects festival season preparations, strong tax compliance

Shishir Sinha
New Delhi

For the third consecutive month, GST collections in September crossed ₹2 lakh crore, GST portal data showed.

Experts believe this trend sets the stage for strong process reforms by the GST Council, which is scheduled to meet on October 7.

Source: GST Portal

REVENUES RISE

According to data available on the GST portal, gross GST collections from domestic activities rose 10.1 per cent to about ₹1.38 lakh crore, while import revenues rose 26 per cent to ₹65,525 crore. Refunds, however, fell 3 per cent year-on-year to ₹27,001 crore in September. After adjusting for refunds, net GST collections rose 18.1 per cent to over ₹1.76 lakh crore.

Vivek Jalan, Partner at Tax Connect Advisory Services, said that despite a drastic reduction in GST rates under GST 2.0, collections had remained resilient, with net revenues growing around 7 per cent between September 2025 and September 2026.

"With GDP expanding at 7.8 per cent, the Indian economy continues to show resilience amid global headwinds. Part of the September 2026 growth reflects a low-base effect, as September 2025 turnover was subdued due to the gap between the announcement and notification of GST 2.0," he said.

Saurabh Agarwal, Tax Partner at EY India, said growth is broad-based, with Uttar Pradesh, Telangana, Gujarat and Karnataka each notching up 16 per cent to 18 per cent.

Assam, Manipur, Arunachal Pradesh and Nagaland had shown considerable growth, showcasing holistic development across the country.

GST ON IMPORTS

GST on imports is growing faster than domestic collections. "The government deserves credit for the work done under the production-linked incentive schemes, which have laid a solid base for domestic manufacturing. But the import numbers suggest it is time to recalibrate some of these schemes so that the gains from this groundwork are fully realised," Agarwal said.

Kulraj Ashpnani, Partner at Dhruva Advisors, said the GST collections growth reflected preparations for the upcoming festive season and strong tax compliance.

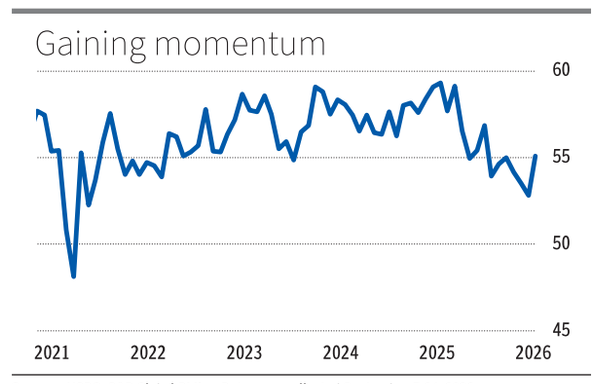

"The significant expansion in import revenues suggests that manufacturers and traders are bringing forward purchases and stocking up ahead of peak festive demand. Collections may also have been supported by extensive audit proceedings and departmental scrutiny undertaken over recent months. This performance thus appears to reflect two factors: businesses gearing up for seasonal demand and authorities stepping up compliance efforts," he said.

Experts said the collection trends could facilitate reform measures.

"Building on this success, the GST Council in its October meeting can now focus on the next level of reforms — including allowing refunds of input services under the inverted duty structure, streamlining registration for large taxpayers and showing compassion by reducing GST rates on autism centres," Jalan said.

Manufacturing PMI rises to 7-month high of 55.1 in Sept

Our Bureau
New Delhi

Sources: HSBC, S&P Global PMI Data were collected September 7-24, 2026

Amid strong growth in August, the manufacturing sector appears to be accelerating further, as the Purchasing Managers' Index (PMI) for manufacturing rose to a 7-month high in September, S&P Global reported on Thursday. Hiring was also good.

"India's factory sector ended the quarter on a firmer footing. The PMI rose to 55.1 in September, up from 52.8, as stronger domestic and overseas demand lifted sales and production. Hiring resumed at its fastest pace since May, and manufacturers became more optimistic about the months ahead," Pranjul Bhandari, Chief India Economist at HSBC, said.

RISING INPUT COSTS

On the price front, input costs and selling prices rose faster, but inflation remained mild by historical standards. Firms also procured more materials for production and added to inventories. Overall buying levels expanded faster than in August.

"Companies bought more materials and built-up stocks to prepare for anticipated sales. Finished goods inventories recorded their second-largest increase in nearly 12 years, signalling a clear shift from leaner stock levels," Bhandari said.

STRONG DEMAND

Strong demand across electronics, food, pharma, and textiles pushed total sales growth to its highest level since February.

Moreover, export orders also expanded faster from clients in Brazil, Europe, the UAE and the US.

According to the panellists, job growth resumed in September after a blip the previous month, and the pace of employment expansion was solid and the most pronounced since May.

Indian manufacturers upgraded their output forecasts in September, with overall positive sentiment rising to a four-month high.

LOOKING POSITIVE

A healthy pipeline of new inquiries and expectations of sustained strong demand drove this positive outlook. Expecting stronger demand ahead, manufacturers actively built up inventory.

"Holdings of finished products increased for the third month in a row and at the second-fastest pace in 11-and-a-half years (behind July)," the report said.

S&P Global compiles the HSBC India Manufacturing PMI from responses to questionnaires sent to purchasing managers in a panel of around 400 manufacturers.

Oil refiners shift tactics, hire ships to cross Hormuz

Bloomberg

Indian oil refiners are hiring tankers to sail through the Strait of Hormuz to pick up crude from within the Persian Gulf, a change of tactics to help them cut costs and secure their supply chains.

Processors have issued tenders and are negotiating with shipping lines, according to people familiar with their efforts. So far, Sinokor Group and Dynacom Tankers Management Ltd have been awarded tenders, said the people, asking not to be named as they're not authorised to speak to the media. The Shipping Corporation of India and Lila Global also made bids but those tenders were cancelled.

The move marks a shift for Indian refiners, who have avoided sending their own tankers through Hormuz since early in the US-Iran war due to the risk of attacks.

Instead, they relied on gulf producers and international traders to shoulder the risk of transiting the contested waterway and delivering barrels to India, which involved paying a hefty premium for the service on a so-called cost and freight basis.

In recent weeks, however, Indian Oil Corporation, Reliance Industries, Bharat Petroleum Corporation and HPCL-Mittal Energy Ltd have bought Iraqi crude on a free-on-board basis.

Such sales require the buyers to handle logistics of sending a vessel to load the cargo and then delivering it to its destination.

KEY ISSUE

"The discount is attractive, but the key issue is that the crude still needs to be sourced from inside the Strait of Hormuz, where shipping and operational risks remain elevated," said Sumit Ritolia, Senior Manager of Modelling at analytics firm Kpler. "Those who can manage that risk will likely try to leverage the discount and increase purchases."

Indian Oil, Reliance, Bharat Petroleum, HPCL-Mittal, Sinokor, Dynacom, Shipping Corporation of India and Lila Global didn't immediately respond to emails seeking comment.

Another reason Indian refiners may have changed tactics is that SOMO, Iraq's state-owned oil marketer, has been offering buyers discounts of as much as $37 a barrel below regional benchmarks for contracted supplies for October.

PNG DRIVE. Petroleum and Natural Gas Minister Hardeep Singh Puri with Neeraj Mittal (left), Petroleum Secretary, and Alok Tripathi, Joint Secretary (Gas), at the launch of the GOBARdhan Scheme in New Delhi on Thursday PTI

'Disruption of supply routes driving up oil prices'

Our Bureau
New Delhi

Emphasising that there is no global supply shortage of crude oil, Minister of Petroleum & Natural Gas Hardeep Singh Puri said on Thursday that the higher prices are a reflection of choked supply routes, which are driving up freight rates.

Speaking to the media on the sidelines of the 20th Foundation Day celebrations of the Petroleum and Natural Gas Regulatory Board (PNGRB), Puri said the current challenge in the global energy market is not a shortage of oil but disruptions to supply routes.

'NO SUPPLY SHORTAGE'

"There's no supply shortage in the world. The world has 104 million barrels of oil a day. It's only that the supply routes are choked and freight charges and others are high, and that's higher prices," Puri said.

Global oil consumption currently is below the available supply, consuming around 94 million barrels against 104 million barrels a day of available oil.

The Minister emphasised that since 2022, the government had been constantly working to make available critical energy commodities to its 1.4 billion citizens at affordable rates.

India had so far successfully navigated disruptions to crude oil and natural gas supplies amid the ongoing West Asia crisis and disruptions in the Strait of Hormuz. India had remained insulated from the turbulence in global energy markets despite the uncertainty, he added.

CLOSE MONITORING

Puri pointed out that the global energy situation remained challenging, but the government is closely monitoring the situation.

India has diversified its crude oil sources from 27 to 41 to ensure supply disruptions can be handled.

Productive discussion with USTR on trade deal: Goyal

Press Trust of India
Washington

Commerce Minister Piyush Goyal with USTR Jamieson Greer in Milwaukee, Wisconsin PTI

Commerce Minister Piyush Goyal had a "productive discussion" with US Trade Representative Jamieson Greer towards the early conclusion of a mutually beneficial interim trade agreement between India and the US.

Goyal met Greer on Wednesday on the sidelines of the G-20 Trade Ministers' meeting in Milwaukee, about 1,200 km from here.

The meeting came on a day when Prime Minister Narendra Modi and US President Donald Trump held a telephone conversation to review progress in bilateral cooperation across trade, defence, energy, critical technologies and other areas of mutual interest.

"Had a productive discussion with USTR Greer towards early conclusion of a mutually beneficial interim agreement under the India-US Bilateral Trade Agreement," Goyal said in a post on X.

Goyal also held bilateral meetings with his counterparts from Brazil and Mexico, countries facing the brunt of the trade tariff policy pursued by the US.

Goyal met Brazilian Trade Minister Marcio Fernando Elias Rosa and Foreign Minister Mauro Vieira on the sidelines of the G-20 Trade Ministers' Meeting on Wednesday at Milwaukee, Wisconsin. Goyal also held discussions with Mexican Secretary of Economy Marcelo Ebrard on deepening trade and investment ties.

The discussions with the Brazilian leaders focused on expanding the India-MERCOSUR preferential trade agreement, strengthening sectoral cooperation and investment ties, and enhancing coordination at the G20 and WTO.

Later in the day, Goyal met European Trade Commissioner Maros Sefcovic and reviewed the progress towards signing the India-EU Free Trade Agreement.

Nobody is allowed to cap fuel sales: Petroleum Secretary

Rishi Ranjan Kala
New Delhi

Petroleum Secretary Neeraj Mittal said on Thursday that oil marketing companies (OMCs) are not allowed to cap fuel sales, and that the government will convey the same to the companies.

The government's response came amidst reports of private retailers such as Jio-bp and Nayara Energy capping diesel sales.

While Jio-bp is understood to have capped sales at 50 litres of diesel per transaction per day, Nayara has reportedly restricted sales in the range of 70-200 litres per transaction per day.

"Nobody is allowed to put a cap on sales, so if they are putting a cap on sale, we will take it up. We will tell them that it is not acceptable, it is not done. In the past also, letters have been issued. So, the same thing applies even today," Mittal said.

"There is no change in the government's view on this," he said, responding to reporters on the sidelines of the launch event of GOBARdhan scheme.

The government's response comes amidst reports of private retailers such as Jio-bp and Nayara Energy capping diesel sales

Responding to the same issue, Oil Minister Hardeep Singh Puri said, "We are always in touch with them."

PRICE TREND

On the current price trend in crude oil, the Minister said international prices had eased from the recent highs and could slip further south.

"Why don't you rejoice in the fact that the price of Brent is down to (around) $95 (per barrel)? And it is available also. All these concerns should come if the price is higher. But now, the prices hopefully will come down," he added.

Bulk diesel users such as telecom tower companies, industries are thronging at retail fuel outlets to procure diesel meant for retail users.

Retail petrol and diesel prices have remained unchanged since May despite extreme volatility in global crude prices.

The OMCs have raised the prices of diesel for industrial and other bulk consumers.

Responding to media queries, a jio-bp spokesperson said on Tuesday, "Given the prevailing demand dynamics, we are taking appropriate measures to ensure equitable availability of fuel for mobility and transportation needs, particularly in view of demand from industrial and other non-transport use. These measures are intended to support the broadest possible access to fuel for customers based on demand conditions. Our focus remains on ensuring fuel availability and a seamless customer experience across the Jio-bp network."

On the other hand, Nayara Energy, in a statement, said, "As the country's largest private sector fuel retailer, our only priority is to ensure optimum supplies to over 7,000 stations and other channels, including bulk customers."

PNGRB, Oil Ministry launch drive to add 50 lakh D-PNG connections by March

Rishi Ranjan Kala
New Delhi

The Ministry of Petroleum & Natural Gas (MoPNG) and the Petroleum and Natural Gas Regulatory Board (PNGRB) on Thursday launched a drive aiming to add 50 lakh domestic piped natural gas (D-PNG) connections by March 2027.

The National PNG Drive 3.0 will run from Thursday to March 31, 2027, with the objective of accelerating PNG adoption, facilitating transition from LPG to PNG, and promoting the effective utilisation of PNG infrastructure across the country. The drive was launched by Oil Minister Hardeep Singh Puri.

"An ambitious target of 50 lakh new D-PNG connections, converting around 40 lakh connected connections into active PNG users, and obtaining an additional 50 lakh D-PNG registrations across the country has been set," the PNGRB said.

WEST ASIA CONFLICT

The PNG Drive 3.0, launched on the 20th foundation day of the PNGRB, will get the benefit of the traction created by the government's efforts to migrate domestic and commercial consumers of liquefied petroleum gas (LPG) to piped gas. This was done as the West Asia conflict led to closure of the Strait of Hormuz choking almost half of India's LPG requirement.

India's city gas distribution (CGD) network now spans 309 geographical areas, serviced by 40 PNG suppliers. Currently, DPNG infrastructure for around 1.79 crore domestic consumers have been created, out of which over 1.22 crore consumers are already using PNG.

Reaffirming the commitment to increasing the share of natural gas in the primary energy basket from the current level of around 6 per cent, the Minister pointed to the momentum generated by National PNG Drive 2.0.

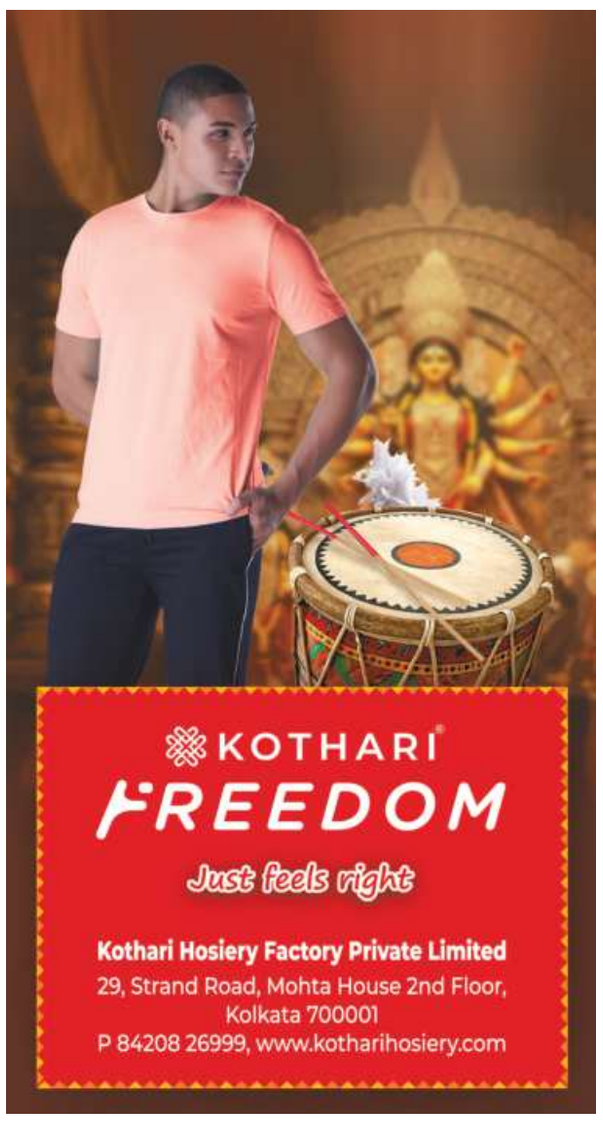

During January to June 2026, around 12.1 lakh new PNG connections and 15.31 lakh D-PNG registrations were achieved. The pace of daily DPNG additions also increased from 4,702 to around 7,000, while daily additions of billed consumers rose from around 2,781 to around 7,500 during the same period, he added.

PNG PORTAL

Puri also highlighted the rapid expansion of the gas distribution ecosystem. Nearly the entire country has now been authorized for CGD with around 35,000 km of natural gas pipelines being authorised. Besides, the unified tariff framework has helped reduce regional disparities and improve access to gas in distant and underserved regions.

To simplify the PNG connection process, enhance customer convenience, a Unified PNG Portal has also been conceptualised.

PMS promise

SEBI's new rules can help expand PMS segment

The Portfolio Management Services (PMS) industry is among the fast-growing segments of India's financial markets. It is just as well that the Securities and Exchange Board of India has turned its attention towards this space. Assets under management of the PMS industry have grown at a compounded annual growth rate of 13 per cent over the last seven years and currently stand around ₹45 lakh crore; which amounts to almost half the assets managed by the mutual fund industry.

The SEBI's PMS regulatory framework was last reviewed in 2020. But given the addition of numerous asset categories since then and the changing requirements of the market, an overhaul of these rules was in order. The changes being made by SEBI to PMS regulations will expand its reach while increasing investment avenues for PMS managers. The most significant change in the regulation is the creation of a new category of PMS players through Portfolio Management Route for Investing in Mutual Fund units (PRIM). With mutual funds becoming the primary vehicle for savings for most mass affluent investors, there was a need to make PMS affordable to this cohort, so that they can manage their fund portfolios better. SEBI is trying to cater to this demand, creating a new category of portfolio managers who manage only direct plans of mutual funds including index funds, exchange traded funds and specialised investment funds. The minimum investment for this route is lower at ₹25 lakh, compared to ₹50 lakh under regular PMS schemes. The management fee in PRIM is also lower, at 1 per cent of assets under management, though profit-sharing arrangements are allowed.

The lower investment limit will help increase the PMS client base beyond the high networth individual cohort. Though the AUM of the PMS industry has grown steadily in recent years, the number of clients stands at just 2.19 lakh, and the number of portfolio managers is just 515. The regulator is trying to increase the number of portfolio managers by encouraging them to choose the PRIM route. The qualification criteria for the principal officers of PRIM have been lowered to include graduates with two years' market experience, while net worth of these entities has been set at a lower level of ₹2 crore. This opens the path for mutual fund distributors, who are already advising their clients informally, to obtain PRIM registration and manage the portfolios for a fee.

SEBI has also increased the basket of securities in which portfolio managers can invest. Allowing PMS managers to invest in securities overseas is a good idea, given the opportunities in the technology sector. These investments must however be within the permissible LRS limits of the client. PMS schemes can also invest in initial public offerings and investment grade, non-convertible debt securities under discretionary PMS. Given that the clients of PMS have higher risk-taking ability, opening these markets for PMS schemes can improve demand for these securities.

REUTERS

India must own its energy security

ACTION PLAN. For this, raising oil storage capacity, boosting the energy produced at home, and completing projects on time are vital

CKG NAIR
V SHUNMUGAM

Indian equities markets have recorded their eighth straight weekly loss. Over the last weekend, President Trump rejected Iran's proposal to end the conflict and reopen the Strait of Hormuz. Brent crude rose above $100, the Sensex and the Nifty explored near six-month lows, and the rupee declined to below 96 to the dollar. Peace remains elusive, and financial upheaval is underway. Investors seek safety, and economies like ours are hit first.

In March 2026, the West Asia conflict led to the closure of the Hormuz Strait, which affected 14 per cent of the world's oil and gas. Since July, the Houthis have resumed attacks in the Red Sea, controlling Mokha and Perim Island at Bab al-Mandab. On September 10, drones attacked Saudi Arabia's East-West pipeline, which bypasses Hormuz. These assaults have cut Qatar's gas exports by 17 per cent for an estimated three to five years. About two-thirds of global energy trade depends on maritime chokepoints. As regional rivalries grow, disruptions are becoming commonplace.

WHAT A LONG SHOCK DOES

Oil fundamentally influences all prices in India. It affects the rupee, bus fares, fertilizer costs, and vegetables transported by diesel trucks. Since January 1, Brent oil has increased by about 63 per cent. Every ten-dollar increase in oil price results in approximately $18 billion leaving the country.

The damage is evident in the data. Wholesale inflation reached 9.92 per cent in August, with fuel and power costs up 22.93 per cent. Retail inflation stands at 4.82 per cent, and the RBI forecasts it will be 5.9 per cent between October and December. Foreign portfolio investors withdrew ₹2.45 lakh crore from Indian shares by September 18, surpassing the total for all of 2025. Additionally, the rupee has depreciated by about 6 per cent since January, despite a bumper $135 billion inflow, thanks to the RBI's recent efforts.

On the street, restaurants struggled when cooking gas was rationed at the peak of the war, and small factories saw their margins shrink. A prolonged shock is a slow tax on every household.

THE VIKSIT BHARAT QUESTION

To become a developed nation by 2047, India must grow around 8 per cent a year for 20 years. This growth depends on energy, and 88.7 per cent of our crude oil, an all-time high, is imported. Half of our gas arrives by ship. Our target was to cut oil import dependence to 67 per cent, but we are 22 percentage points short. Each external shock takes away a slice of the growth that Viksit Bharat relies on.

Every energy security initiative should have a public deadline, a designated owner, and penalties for delay

India has never lacked plans. The Turkmenistan-Afghanistan-Pakistan-India pipeline agreement of 2010 remains on paper. At home, too, projects slip. The ONGC's deepwater KG-DWN-98/2 project was to produce oil in March 2020. But it did so only in January 2024. The second phase of expansion of our strategic oil reserves, approved in July 2021, remains incomplete. Power trends mirror this pattern. By August 2026, renewable capacity reached about 296 gigawatts, yet grid growth hasn't kept pace. Over five years, India achieved only about 80 per cent of its transmission targets. In the first quarter of 2026, 300 gigawatt-hours of clean energy were wasted because of grid limitations. Additionally, transmission lines in Rajasthan and Gujarat are embroiled in legal disputes concerning the habitat of the Great Indian Bustard.

Every crisis prompts strategies. When prices ease, they are shelved. Onion prices at least lead to action. Oil evokes nothing. Rhetoric and lament won't solve a problem that has persisted for 50 years. India needs a delivery system. Every energy security initiative should have a public deadline, a designated owner, and penalties for delay. An annual Energy Security Report to Parliament should monitor each project.

THE PLAN, IN THREE BUCKETS

Here is a plan with numbers we should hold ourselves to.

Now — the next 12 months: **Caverns and oil company** tanks hold about 74 days of net oil imports, and there is no gas reserve. Raise oil cover to 90 days and build the first gas reserve.

Install 4 gigawatts of two-hour battery capacity at renewable pooling stations to capture most of the clean power now lost.

Rupee crude and gas contracts on Indian exchanges hedge both the fuel and the dollar. Listed importers, airlines and power producers must publish a board-approved hedging policy.

Require agricultural pump sets and industrial motors to carry star labels. Nudge offices to adopt remote work on days when supply is at risk.

Electric vehicles made up 12.3 per cent of August 2026 registrations. This should rise to 15 per cent in a year, and make every new government vehicle and city bus electric.

Next — one to five years: **Bypass both straits.** Oman's Ras Markaz terminal near Duqm lies outside Hormuz and the Red Sea. India should co-invest, book capacity and store crude there, and set a feasibility deadline for the Oman-Gujarat deep-sea gas pipeline.

The Mahanadi find off Konark and the Andaman find at Sri Vijayapuram should reach first gas within five years.

Switch fuels. Retrofit our 25 gigawatts of gas plants to run on imported or domestic gas, ethanol or compressed biogas.

Meet 100 per cent of this year's transmission target of 25,146 circuit kilometres. Set up special benches be set up to settle grid expansion-related disputes within a year.

Meet the goal of 30 per cent electric vehicle sales by 2030. Put a solar-powered, battery-equipped charging station every 25 kilometres on national highways.

Later — five years and beyond: **Reduce oil import** dependence from 88.7 per cent to 67 per cent by 2035.

Go nuclear. Reach 100 gigawatts by 2047, with small modular reactors beside steel mills and data centres, and private capital.

Build cities that need less fuel. Sixty per cent of city trips are under five kilometres. Add footpaths, cycle lanes and bus feeders, and zone homes and offices near metro stations.

Make all new two-wheelers, three-wheelers and city buses electric by 2035, and most new cars by 2047.

Finally, these three numbers will tell us whether the plan works: the days of cover we hold, the share of energy we make at home, and the share of energy projects completed on time. The first two are too low. We have never measured the third. The bell has rung from Hormuz and the Red Sea. It will ring again. We must be ready before it does.

Taking stock of IRDAI's distribution reset

Insurers should report how expense savings are passed on, through premium revisions and bonus declarations

P Saravanan
A Paul Williams

In India, insurance is still sold rather than bought, and for the past three years, the seller has often been paid far more than the service justified. On September 23, the Insurance Regulatory and Development Authority of India (IRDAI) released a consultation paper titled 'Recalibrating Economics of Insurance Distribution', proposing the most sweeping reset of how policies reach customers since it removed product-wise commission caps in 2023.

First, the fragmented universe of corporate agents, brokers, web aggregators, and motor service providers would collapse into three categories, namely Insurance Distribution Entities, Insurance Distribution Persons, and Market Infrastructure Institutions, with lower capital requirements, reduced fees, and the freedom to engage in other financial and non-financial business.

Second, the Expense of Management ceiling for life insurers would become a company-level limit of 15 per cent of gross direct premium within two years and 12.5 per cent within five years, while general insurers would glide from 30 per cent of gross written premium to 20 per cent of gross direct premium. Third, commissions would be capped by segment, channel and product complexity.

Health policies would carry 15-20 per cent on the first sale, and 5-10 per cent on renewal or porting; new vehicle motor cover would pay nothing on the third-party premium and 5 per cent on own damage; and life cover sold with loans would pay just 2 per cent on single-premium policies.

Fourth, conduct rules would tighten, with a ban on compulsory bundling with loans, documented suitability, the seller's identity linked to every policy, clawback of commission for mis-selling, and no volume-linked incentives for bank and NBFC staff.

THE CHANGING SCENARIO

Between FY23 and FY25, motor premiums grew 34 per cent, while motor commissions grew 259 per cent; in retail health, premiums rose 53 per cent, against an 118 per cent jump in commissions. Banks with multiple insurer tie-ups paid out an average of 33 per cent of new business premium, rising to 72 per cent in some cases, compared with 13 per cent for single tie-ups. The reset will redistribute this surplus. Lenders feel it first, since insurance fees make up roughly 16 per cent of pre-provision operating profit at Yes Bank and 12 per cent at IDFC First Bank, and brokerages estimate 3-25 per cent of pre-tax profit for select NBFCs.

PREMIUMS. Surging ahead GETTY IMAGES

Insurers may see weaker bank volumes at first but should gain from lower acquisition costs. IRDAI may cap what insurers pay banks, but staff remuneration within banks falls under the Reserve Bank of India, so sales targets could quietly reappear as general performance bonuses. The principle of 'same structure, same functions, same norms' also sits uneasily with a 25 per cent cap for agents, compared with 20 per cent for banks and brokers, when selling the identical long-term plan.

IRDAI need to use the consultation window to close these gaps without diluting its core intent. A joint IRDAI and RBI circular on incentives for bank and NBFC staff would stop arbitrage at its source. Insurers should report how expense savings are passed on, through premium revisions in general insurance and bonus declarations in life insurance. Clawback should be triggered by objective markers such as free-look cancellations, early lapses, and complaints upheld by the Insurance Ombudsman. Rewards for underserved areas should be tied to PIN codes verified through the Public Insurance Registry.

Commission should be disclosed in rupees at the point of sale, not as a percentage buried in a brochure. A clear transition schedule would ease the shock for agents and bank staff whose livelihoods depend on this chain, and a formal review after two years would allow correction based on evidence. If implemented with care, we could expect a shift from insurance sold to insurance bought.

OTHER VOICES.

The National

It's time to move beyond emergency aid

The conventional view of the international humanitarian system is that it is designed to tackle emergencies. Certainly, it is true that aid networks have a critical, often life-saving, role to play in sudden crises. Sadly however, many areas of conflict and displacement are now witnessing longer-term events that present an enduring backdrop to millions of people's lives. Protracted and increasingly interconnected conflicts in the Middle East and Africa, including in Yemen, several Horn of Africa countries as well as in Palestine and Lebanon, require further attention as traditional aid budgets – and accepted ways of doing things – seem unable to cope. OECD donor aid fell by 23 per cent last year, with global humanitarian assistance declining by 36 per cent. (ABU DHABI, SEPTEMBER 30)

GLOBAL TIMES

World gets turbulent, peaceful China becomes precious

Peace and security are defining features of China's governance and hallmarks of Chinese modernization. Peaceful China is a light that millions upon millions of Chinese people, secure in their daily lives, shine into a world that is far from peaceful. It safeguards the everyday lives of millions of families while contributing Chinese wisdom, Chinese solutions and Chinese strength to global security governance. A working conference on the Peaceful China Initiative was held in Beijing. A recent instruction made by Chinese President Xi Jinping was conveyed at the conference. Xi stated that since the 18th CPC National Congress in 2012, significant progress has been made in building a safe China, making the country one of the safest in the world. (BEIJING, SEPTEMBER 30)

AI security and safety

This is with reference to 'Guardrails challenge' (October 1). The AI safety pact between the US President Donald Trump and technology giants has certain limitations which weaken the framework. First is the self-regulation clause and second is that it is only "morally", but not "legally" binding. Self-regulation may not be effective as companies are driven by competition with not only domestic rival companies, but also rival nations. As pointed out in the editorial, public accountability through legally enforceable standards and international coordination through a suitable multilateral mechanism are essential components of a AI safety framework. Besides the six layers, there is a need for a seventh layer: third party stress testing of the frontier models prior to their release to the public. This would enable unbiased objective, and independent evaluation of the models with a critical mindset, keeping the AI safety boundaries in view.

Oil refining

This refers to 'India emerges as leading refinery' (October 1). Despite the tumultuous situation prevailing in energy security due to the never ending West Asia war, India has been consistently and diplomatically handling the situation in securing domestic energy needs. Besides, it has become one of the largest global refiners of crude oil having assured capabilities to supply refined oil products to countries in need. Energy sourcing has exceeded 40 countries, indicating the trust and confidence the India Inc enjoys in the global arena. Indian refineries have the unique capability of processing all types of crude including sweet, sour and heavy.

Protect pasture lands

This refers to 'India can no longer overlook its pasture lands' (October 1). Pasture lands deserve greater attention because they support livestock, rural livelihoods, biodiversity and the ecological health of dry regions. Their degradation can increase pressure on farmers, particularly those dependent on common grazing resources. Protecting these lands, however, requires more than declaring them conservation areas. Local communities should participate in mapping, restoration and management, since their livelihoods are directly connected to these commons. Governments can combine scientific monitoring with traditional knowledge to improve grazing practices and prevent encroachment. Pasture management should be treated as an environmental and economic priority. Protecting commons today can strengthen rural resilience tomorrow.

RBI's inflation-fix formula

FIT framework ensures macroeconomic stability

Abhinav Banka
Surjith Karthikeyan

India's monetary policy framework has witnessed evolution over the years, with no such frameworks in place during the first few decades after Independence. The Banking Regulation Act 1949 was enacted, followed by the Reserve Bank of India (RBI) operationalising the traditional tools — statutory liquidity ratio (SLR), bank rate, cash reserve requirements (CRR) and open market operations.

India saw credit planning from 1960s through the mid-1980s, and from the mid-1980s through the late 1990s, the RBI employed "monetary, targeting with feedback" framework coinciding with financial sector reforms. Though price stability was key objective, inflation remained in double-digit.

After liberalisation, the RBI considered additional macroeconomic variables — credit growth, exchange rate, trade balance — in addition to trends in growth and inflation. After FRBM Act enactment, interest rate gradually became the key policy tool. The RBI introduced liquidity adjustment facility in 1999 followed by inflation targeting. An expert committee recommended to the RBI to manage liquidity by offering term repos of different tenors. FY1990-91 witnessed around 13 per cent inflation, one of the highest, reducing to 8.3 per cent in FY2011-12 during the global financial crisis period. In 2013, inflation slipped to double-digit due to oil price fluctuations and domestic supply irregularities. Thus, these were phases of monetary instability in India.

RBI. More professional now

FIT TO THE RESCUE

In 2016, India adopted the flexible inflation targeting (FIT) framework. The Preamble in the RBI Act, as amended by the Finance Act, 2016, provides that the primary objective of the monetary policy is to maintain price stability, while keeping in mind the objective of growth. As per Section 45ZA of the RBI Act, the Central government shall, in consultation with the RBI, determine the inflation target in terms of the consumer price index (CPI) once every five years.

The extant framework has served India well over the last 10 years despite multiple challenges such as Covid and Russia-Ukraine conflict. Inflation levels witnessed a distinct decline during the FIT period — 7.3 per cent over pre-FIT period (Jan 2012 to Sept 2016) to 4.7 per cent (Oct 2016 to Oct 2025). FIT helped enhance the monetary policy credibility, instilling investor confidence. In this direction, the government notified inflation target for the period from April 1, 2026, to March 31, 2031, retaining the CPI inflation target at 4 per cent, with an upper tolerance level of 6 per cent and a lower tolerance level of 2 per cent. The FIT period till date reveals that the RBI hasn't become hawkish in its approach towards inflation management; rather it has become more data-oriented, professional and comprehensive.

The framework incorporates a strong accountability mechanism. In the event of failure to maintain inflation within the band for three consecutive quarters, as provided under Section 45ZN of the RBI Act, the central bank is required to submit a detailed report to the government, setting out the reasons for such failure, the remedial actions proposed to be taken and the estimated time period within which the inflation target would be achieved. This will further reinforce policy discipline and support inclusive and resilient growth.

The FIT framework improved policy credibility and enhanced data-oriented independent interest rate decisions. Before 2016, monetary policy faced frequent adjustments due to an unprofessional and biased approach to target inflation.

Financial stability also improved with reduction in speculation activities and low market volatility, enhancing trust among investors and businesses. Studies have indicated that prior to the implementation of FIT (2010-2016), inflation volatility reached 2.9 per cent. Inflation volatility dropped significantly to 1.6 per cent because of FIT implementation in 2017-2024. Thus, FIT framework is key for India's macroeconomic stability.

Banka and Karthikeyan serve as Deputy Director and Director at the Government of India. Views are personal

Genesis of the transshipment scam

PAYING A BIG PRICE. Trump has done his country a huge disfavour by using tariffs as a trade weapon. China has not been as hurt as the US itself

BLOOMBERG

BISWAJIT DHAR

The Trump administration's transshipment scam report released last month is an acknowledgment that his Liberation Day tariffs, unleashed in April 2025 and in several later rounds, have failed. The burden of this report is that Chinese businesses continue to reroute, or transship their goods to the US through third countries. In other words, a trend that began after the Trump administration slapped punitive tariffs on China in its first tenure, continues. The Liberation Day tariffs were perhaps expected to choke third country supplies, given the number of countries that were brought under its scope. That does not seem to have happened.

GOES SOFT ON CHINA

Meanwhile, President Trump looks reluctant to risk punitive action against China after issuing his 100 per cent tariff threat. China's President Xi Jinping's visit to the US bears this out. Trump's use of high tariffs created opportunities for tariff arbitrage, which were taken advantage of by Chinese and the American businesses based in China since the closing years of the previous decade. While the former began reducing their exports to an increasingly protectionist US by diversifying into new markets, some of the largest US multinationals that have been operating in China since the early years of the millennium, relocated at least a part of their production bases to countries that Donald Trump had not targeted in his first term.

Chinese businesses' disaffection for the US was quite dramatic since Donald Trump entered the White House for the first time in 2017. US imports from China was then almost 22 per cent of its total imports, according to the US Census Bureau. This was the highest share since 2003, the earliest for which US official trade data are available. However, China Customs reported that the US accounted for about 19 per cent of its total exports in 2017. The difference can possibly be ascribed to the costs of freight and insurance, which are included in the value of US imports. In 2021, when Donald Trump made way for Joe Biden, China's share of US imports had dropped to about 18 per cent.

BIDEN'S INITIATIVES

During Biden Presidency, the US administration took further measures against China, especially against the global production networks that were hinged on the "factory of the world". The most significant of Biden's initiatives in this regard was deepening cooperation among US and its 13 partners in the region through the Indo-Pacific Economic Framework for Prosperity (IPEF). A key objective of IPEF was to promote friend-shoring of supply chains with IPEF member countries to avoid over-dependence on China. Coinciding with this development, China's share in US imports declined even more steeply, to less than 14 per cent of the total in 2024. With Donald Trump directly targeting China with a sequence of tariff hikes, the US-China trade ties reached the lowest point since 1998, when just 7.5 per cent of US' total imports came from China.

A shake-up was happening in the involvement of American companies in China. Several US multinationals, including Apple, Dell and Nintendo, decided to relocate from China as early as in 2019, even before Trump's trade war against China took full effect.

A survey conducted by American Chamber of Commerce in China and AmCham Shanghai at the end of the previous decade showed that over 40 per cent of 250 companies surveyed had either relocated, or were considering relocating their manufacturing facilities away from China due to US-China trade tensions. Most of these companies eventually relocated a part of their China operations to several South-East Asian economies and India.

However, even before American companies could fully relocate to their new production hubs, the US President declared that the relocation of the industries from China was illegal. Now, he blames the great transshipment scam for the loss of federal revenue through higher import tariffs, which he perceived as the magic bullet to not only rein in the federal deficit, but also to restrict national debt that had topped $40 trillion, doubling since his first term in office.

What Trump views as a transshipment scam is, in effect, a failure of his administration's tariff-centric policy to 'make America great again' by bringing capital back to the US

PERIL OF INCOME, JOB LOSSES

The White House report argues that the annual tariff revenue loss from illegal transshipment could have exceeded $100 billion, by no means a small amount given the fiscal time bomb that the US economy is saddled with. But, while he would continue to reel out the hypothetical estimates of federal revenue losses arising from his inability to charge import tariffs at will, questions should be asked of Donald Trump about the income and job losses, that have resulted the world over, from his ill-considered tariff war.

In effect, what Donald Trump views as a transshipment scam is, in effect, a reflection of the failure of his administration's tariff-centric policy to 'make America great again' by bringing capital back to US. It is also a case of his failure to appreciate what the Biden administration had set into motion. Trump has helped China out through the transshipment scam.

The writer is a Development Economist and former Professor of JNU. Views are personal

The report and beyond

The report identifies 40 countries, including India, as being part of what it describes as China's shadow transshipment network, which allowed Chinese goods to enter the US market after minor modifications were made in their territories, including "minor processing, relabelling, repackaging, re-invoicing, or paperwork changes".

This tendency emerged, according to the White House report, after high tariffs under Section 301 of US trade Act of 1974 were slapped on imports from China to "counter China's unfair trade practices, forced technology transfer, intellectual property theft and state-directed mercantilism". While Section 301 tariffs were expected to cause economic injury on China, its businesses moved their exports to the US through "lower-tariff jurisdictions".

In his second tariff assault, the tariffs were slapped on a wider swathe of countries, but on an individualised 'reciprocal' basis, based on the extent of bilateral trade deficits with the US. Since these were departures from MFN rates, they created significant arbitrage opportunities in the process. However, the US Supreme Court struck down reciprocal tariffs last February as it was not ratified by the Congress.

The Trump administration then turned to using instruments such as Section 301 and Section 232 of US Trade Act against targeted countries, after conducting investigations on their alleged wrongdoings (the transhipment scam report is an example). With the US Congress empowering Trump to invoke tariffs by ratifying the Lindsey O Graham Sanctioning Russia and Iran Act of 2026, the US President's use of unilateral trade measures could well be ratcheted up.

Trump rallies in GOP strongholds to woo voters

Catherine Lucey
Mario Parker

Donald Trump is embarking on a travel blitz aimed at shoring up struggling Republicans in states he won two years ago, as the President's mood darkens about his party's prospects in the November midterm elections.

In the coming days, Trump plans to appear in Texas, Oklahoma, Ohio and Nebraska, GOP strongholds where a visit could deliver a jolt of energy to his base. But the choice of destinations points to a cold reality for Trump: a presidential appearance on behalf of office-seekers in competitive states might hurt more than it helps.

With less than five weeks until election day, Trump has become increasingly aware of the dire straits for Republicans after taking in polls showing his support cratering.

VOTERS ANGRY

Surveys show Republicans rapidly losing ground amid voter anger over the economy and the war in Iran, as Democrats grow increasingly bullish about retaking the House and possibly the Senate.

"His travel tells a lot. I think we've been hearing from the White House since last December that he would be traveling all over the country and he would be on the ballot," said Marc Short, a Republican who served in the first Trump administration.

"That just hasn't materialised." Trump recently has vacillated between publicly trying to absolve himself of any blame for his party's plight — noting during his UN address that he is "not running" — while also looking for ways to boost GOP candidates and telling voters to pretend they're voting for him.

On Wednesday, the President said he would be "making a tour" to help Republican congressional candidates and implored supporters to vote even if they "don't love" their congressmen or senators in order to keep Democrats out of power. He also blamed the GOP's predicament on messaging.

While Trump has sought to project confidence, he has acknowledged that Democratic wins could subject his administration to investigations and oversight. BLOOMBERG

ASK Investment to buy SageOne for ₹2,000 crore

Mumbai: ASK Investment Managers has signed definitive agreements to acquire SageOne Investment Managers, an asset management firm operating across portfolio management services and alternative investment funds. The deal is estimated around ₹2,000 crore, according to an industry executive, though neither company disclosed financial terms. As part of the deal, SageOne Founder Samit Vartak will reinvest in ASK and take on the role of Chief Investment Officer (Equities) for the combined unit. Blackstone, which majority-owns ASK, will retain its controlling stake. The combined entity will manage over ₹85,000 crore in assets. OUR BUREAU

Equities post 8th straight weekly loss, longest in 25 yrs as FPIs escalate selling

NO RESPITE. Foreign institutions pull out another ₹9,500 cr on Oct 1 after selling around ₹36,000 cr in Sept

Anupama Ghosh
Mumbai

Equity benchmarks ended the week with their eighth consecutive weekly decline, marking the longest such losing streak in nearly 25 years as persistent foreign fund outflows, elevated US bond yields and crude oil prices near $100 a barrel weighed on investor sentiment.

The latest streak surpassed the seven-week decline recorded during the Covid-led market correction, with geopolitical tensions in West Asia and sustained weakness in the rupee adding to concerns over India's macroeconomic outlook.

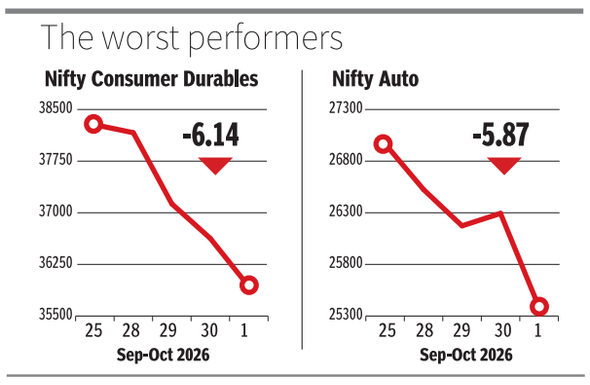

The Sensex on Thursday declined 570.59 points to 71,909.70, while the Nifty 50 fell 198.5 points to 22,421.95.

The benchmark indices witnessed selling pressure throughout the week, with the Nifty losing 3.1 per cent and the Sensex slumping 2.7 per cent.

RELENTLESS SELLING

Foreign institutional investor (FII) outflows remained a significant overhang, with market participants attributing the selling to the relative attractiveness of dollar assets amid rising US Treasury yields. On Thursday, they sold shares worth ₹9,484 crore. This is after selling over about ₹36,000 crore in September.

Selling was broad-based across sectors, with the BSE Consumer index declining 6.15 per cent and the Auto index falling 5.85 per cent during the week. Metals, FMCG, realty and power stocks also witnessed pressure.

Among Nifty constituents, Infosys gained 4.1 per cent in Thursday's session, while Bajaj Auto fell 7.6 per cent and Maruti Suzuki declined 4.9 per cent.

The broader markets also remained weak, with the Nifty Midcap 100 declining 1.01 per cent and the Nifty Smallcap 100 losing 0.97 per cent on Thursday.

"The combination of elevated US Treasury yields and Brent crude prices above $100 remains a key risk for investor sentiment," said Sunny Agrawal, Deputy Vice-President, Fundamental Research, SBI Securities.

Vishnu Kant Upadhyay, AVP – Research & Advisory at Master Capital Services, said a moderation in US borrowing costs, stabilisation in the rupee and lower crude prices could help improve foreign investor flows. He added that stronger September-quarter earnings and sustained earnings growth would also be important for sentiment.

Meanwhile, Kruti Shah, Quant Analyst at Equirus Securities, said the record IPO pipeline and pressure on margin trading funding (MTF) books put additional constraints on secondary-market liquidity. However, short positioning could leave room for a recovery if global sentiment stabilises, she said.

Inox Air Products files for IPO; shareholders to offload

Our Bureau
Ahmedabad

Inox Air Products Ltd, an integrated industrial, medical, electronic and specialty gases company, has filed its draft red herring prospectus (DRHP) with the Securities and Exchange Board of India for an initial public offering (IPO) comprising an offer-for-sale (OFS) of up to 7.72 crore shares.

The proposed IPO will see existing shareholders sell up to 7.72 crore shares of face value ₹1 each. The selling shareholders include Prodair Corporation, Inox Chemicals LLP, Siddho Mal Trading LLP, Siddhomal Air Products Pvt Ltd and Sitashri Trading and Finance Pvt Ltd.

MARKET SHARE

Since the issue comprises entirely an OFS, the company will not receive any proceeds from the proposed offering.

According to the Crisil report cited in the DRHP, Inox Air Products had a 22.4 per cent market share in India by revenue in fiscal 2026 and was the country's largest integrated industrial, medical, electronic and specialty gases company by revenue.

Established in 1963, Inox Air Products operates across the industrial gases value chain through three business verticals — on-site, merchant, and packaged and specialty gases.

Its product portfolio includes oxygen, nitrogen, argon, hydrogen, carbon dioxide, acetylene, helium, silane, ammonia and nitrous oxide, as well as medical oxygen, welding mixtures and specialty gas mixtures.

The proposed IPO is being managed by Kotak Mahindra Capital Company, Citigroup Global Markets India, ICICI Securities and JP Morgan India, which are the book running lead managers to the offer.

Adani Group-backed Vishakha Renewables files for listing, eyes ₹1,250 cr in fresh issue

Our Bureau
Ahmedabad

The Adani Group-backed Vishakha Renewables Ltd, a manufacturer of critical solar module components, has filed its draft red herring prospectus (DRHP) with the Securities and Exchange Board of India for an initial public offering comprising a fresh issue of up to ₹1,250 crore and an offer for sale of up to 1.82 crore shares.

The company is jointly promoted by the Vishakha Group and the Adani Group. Adani Properties Pvt Ltd is a promoter of Vishakha Renewables and will also be a promoter selling shareholder in the proposed IPO.

The company may also consider a pre-IPO placement of up to ₹250 crore. If such a placement is completed, the size of the fresh issue will be reduced accordingly.

TO PAY DEBT

Vishakha Renewables plans to use ₹900 crore of the net proceeds from the fresh issue to repay or pre-pay certain borrowings, with the balance earmarked for general corporate purposes.

As of June 30, the company had consolidated outstanding borrowings of ₹2,700 crore. Vishakha Renewables has built a presence across multiple components of the solar module supply chain, including solar glass, EVA/EPE encapsulants, aluminium frames and backsheets.

According to a Crisil report cited in the DRHP, the company was the second-largest solar glass manufacturer in India as of March 31, 2026, with installed capacity of 660 tonnes per day (TPD). It was also the second-largest EVA/EPE encapsulant manufacturer, with capacity of 23 million linear metres and the largest aluminium frame manufacturer in India, with installed capacity of 14,508 tpa.

CAPACITY EXPANSION

The company is expanding its manufacturing capacity at Mundra, Gujarat, with solar glass capacity set to increase from 660 TPD, equivalent to 4.4 GW, to 1,920 TPD, or 12.8 GW. It is also expanding its aluminium frame and encapsulant capacities.

The IPO will be managed by SBI Capital Markets, ICICI Securities and IIFL Capital Services, which are the book running lead managers. MUFG Intime India Pvt Ltd is the registrar.

Anarock Property files papers for ₹1,000-crore IPO

Press Trust of India
New Delhi

Anarock Property Consultants has filed draft papers with SEBI to raise ₹1,000 crore through an IPO to fund its technology push, business expansion and acquisitions. The proposed IPO comprises a fresh issue of ₹550 crore and an OFS of ₹450 crore, according to the draft red herring prospectus filed on Wednesday.

The company may also consider a pre-IPO placement of up to ₹110 crore.

The company said it plans to deploy the proceeds from the fresh issue towards organic and inorganic growth.

Religare's former chairperson seeks extension in SAT case

Our Bureau
Mumbai

Rashmi Saluja

Former Religare Enterprises Ltd Executive Chairperson Rashmi Saluja has sought additional time before the Securities Appellate Tribunal (SAT) in her appeal against a SEBI insider-trading order.

The matter has been adjourned and is scheduled for hearing on October 9.

The case pertains to Saluja's sale of REL shares on September 21 and 22, 2023, just days before the Burman Group announced its open offer for the company on September 25. SEBI alleged that Saluja was aware of the impending open offer at the time of the transactions and was, therefore, in possession of unpublished price-sensitive information.

In its final order issued in May 2026, SEBI held that Saluja's trades enabled her to avoid losses of ₹1.99 crore. It directed her to disgorge the amount, with 12 per cent interest per annum and imposed a penalty of ₹40 lakh.

BROKER'S CALL.

ICICI Direct

SYMBIOTEC PHARMALAB (BUY)
Target: ₹1,570
CMP: ₹1,199.3
Madhya Pradesh-based Symbiotec Pharmalab Ltd (SPL) is an API company with focus on corticosteroid (man-made drugs that copy natural cortisol) and steroidal-hormone APIs with a global leadership. It manufactures these products using fermentation and multi-step complex chemical reactions.
Symbiotec enjoys a strong global leadership position in corticosteroid and steroidal hormone APIs, with a global volume market share of 38.2 per cent and 23.8 per cent, respectively. Its portfolio comprises ~60 products across sterile and non-sterile formats, catering to a diversified customer base of over 200 clients across 40+ countries, including over 150 export customers. Strong customer stickiness is reflected in an average relationship tenure of nearly 10 years with its top 10 customers.
SPL has been on a capex drive over the past 3-4 years and has invested ~₹1,000+ crore in the new businesses, including ₹376 crore towards complex injectables and ₹584 crore towards CDMO.
We initiate Buy on SPL with a price target of ₹1,570 (valuing at 19x FY29E EBITDA of ₹542.4 crore). We believe the company has the required wherewithal to transition from a legacy API to complex APIs/CDMO model.
Key concerns: Ramp up in new business verticals; regulatory and compliance risk; and customer concentration risk.

Jefferies

CHALET HOTELS (BUY)
Target: ₹965
CMP: ₹830.2
We hosted Chalet's senior management for investor meetings in Singapore.
The management's vision extends beyond adding room inventory, focusing instead on building a scaled owner-operator ecosystem through large-format asset ownership, selective geographic expansion, growth of its owned brand Athiva and increased use of franchise-led models. Partnerships such as Marriott's Autograph Collection & IHCL's first Taj franchise with Chalet underscore its rising operating credibility, while stable annuity income from commercial RE provides the capital flexibility to fund future growth.
It has outlined its rapid growth plans, supported by its 2,036-key development pipeline (including recent Pune and Hyderabad additions of about 380 keys).
The management aims to increase leisure contribution from about 12-13 per cent of revenue currently to around 20 per cent over time, supported by growing staycation demand, destination travel and social events. That said, business hotels are expected to remain Chalet's core profit engine, benefiting from higher occupancies and recurring corporate demand.
Chalet's commercial RE portfolio is a key pillar of its growth strategy, generating ₹250-300 crore of annual EBITDA. These recurring CFs provide a stable earnings base, strengthen debt serviceability and support future expansion in Hotels, reducing dependence on the inherently cyclical hotel business.

Moneyview ends 59% higher at ₹53.88 above IPO price of ₹34

Our Bureau
Bengaluru

BRIGHT BEGINNING. (from left) Krishnan Iyer, Senior Vice-President, NSE, with Sanjay Aggarwal, ED & CTO, Moneyview, and Puneet Agarwal, MD & CEO, at the listing ceremony

Shares of Moneyview made their stock market debut on Thursday on a strong note.

The Moneyview shares debuted at ₹55.61 on the BSE, a premium of 63.5 per cent over the issue price of ₹34. On the NSE, the stock listed at ₹55, marking a premium of 61.7 per cent. It then settled at ₹54.03 and ₹53.88 on the BSE and NSE, respectively, marking 58-59 per cent gains.

Accel Founding Partner Subrata Mitra said the listing marked an important milestone and expressed confidence in Moneyview's continued expansion of responsible credit and other financial products.

Master Capital Services Chief Research Officer Ravi Singh said Moneyview's stellar market debut reflected its position as a consumer-focused, digital-only, credit-led financial services platform.

He said investors should track its revenue growth, loan disbursals, managed AUM, margins, asset quality and operating cash flow, rather than focusing only on its listing performance.

STRONG RESPONSE

The ₹1,092-crore IPO of digital lending platform Moneyview received 98.46 times subscription. The QIB category led demand, with 227.45 times subscription. The non-institutional investors' segment was subscribed 115.41 times, while the retail portion received 19.57 times subscription.

Moneyview raised ₹327.5 crore from anchor investors.

The IPO comprised a fresh issue of ₹750 crore and an OFS of ₹342 crore. From the fresh issue, ₹325 crore will be used to support the company's lending operations and ₹250 crore in augmenting the capital base of its NBFC subsidiary.

A-One Steels lists strongly, but fails to sustain gains

Our Bureau
Bengaluru

Shares of A-One Steels India made their stock market debut on Thursday, opening at a modest premium before ending lower.

A-One Steels India shares listed at ₹455 on the NSE, a premium of 12.3 per cent over the issue price of ₹405. On the BSE, the stock opened at ₹462, marking a premium of 14 per cent.

The stock then fell to settle at ₹416.55 on the NSE and at ₹417 on the BSE, representing only 3 per cent listing gain.

DEMAND GROWTH

Master Capital Services Chief Research Officer Ravi Singh said the company's positive debut comes against expectations of continued growth in finished, long and flat steel demand.

He said investors may focus on the company's ability to sustain revenue growth and utilise its manufacturing capacity, with upcoming results providing a key monitor for revenue growth, margins, capacity utilisation and operating cash flow.

The ₹405-crore IPO of A-One Steels India Ltd received 11.61 times subscription on the final day of the share sale.

The non-institutional investors' portion was subscribed 24.51 times, while the retail investors' segment received 8.64 times subscription.

The quota for Qualified Institutional Buyers (QIBs) was subscribed 7.3 times.

A-One Steels India raised ₹120.9 crore from anchor investors last week. The IPO had a price band of ₹385-₹405 per share.

The public issue comprised a fresh issue of shares worth ₹355 crore and an offer-for-sale (OFS) of shares aggregating up to ₹50 crore. The company reduced the issue size from the proposed ₹650 crore in its draft papers filed with SEBI in December 2024.

IPOs lap up record ₹94,205 cr in first half of FY27: Report

Press Trust of India
Mumbai

Fund-raising through initial public offers (IPOs) touched a record high of ₹94,205 crore in April-September FY27, courtesy big-ticket issues such as by the NSE, per a report released by Primedatabase.com on Thursday.

A total of 78 companies hit the market with main board IPOs in the six months totalling ₹94,205 crore. The money raised is 35 per cent higher than the previous all-time high of ₹69,533 crore mobilised by 65 IPOs in the same period last year, it said.

"This record fundraising has happened despite an extremely slow start to the year with only ₹3,794 crore being raised in the first three months and also despite volatile secondary markets through most part of the six months," the company's Managing Director, Pranav Haldea, said.

MORE ON PIPELINE

The outlook for IPO activity is also bright, with a total of 145 candidates proposing to raise around ₹2.78 lakh crore in the pipeline with SEBI approval, and another 102 companies entailing issuances of ₹1.87 lakh crore awaiting its nod.

Fund raising from IPOs, including SME IPOs, touched the ₹1 lakh crore mark in H1FY27, up from ₹76,330 crore in the year-ago period. Apart from the NSE's ₹22,563 crore IPO, other big issues included the ₹9,795 crore raised by SBI Funds Management and ₹9,275 crore by Manipal Health Enterprises. Of the 64 IPOs for which response data was available, 42 received a mega response of more than 10 times, which included 25 issuances with over 50 times subscription.

Carlsberg's India arm, 3 others get SEBI nod to float IPOs

Press Trust of India
New Delhi

Danish brewing giant Carlsberg's India unit, TMC Transformers (India) Ltd, Ujin Pharma Ltd and Matangi Rubber Ltd have received regulatory clearance from SEBI to proceed with their proposed initial public offerings (IPOs).

SEBI received the draft offer documents of the four companies between May and July.

The regulator issued its observations on their IPO proposals between September 28 and October 1, according to an update on Sebi's website on Thursday.

Carlsberg India Ltd, the Indian subsidiary of Danish brewing major Carlsberg Group, had submitted confidential pre-filed draft papers with SEBI on July 1.

TMC Transformers (India) Ltd's proposed ₹550-crore IPO is entirely a fresh issue.

Ujin Pharma's proposed IPO comprises a fresh issue of 1.18 crore shares and an OFS of 72.82 lakh shares by promoters Jinesh Rasiklal Sheth and Umang Ketan Mehta.

Matangi Rubber Ltd has also received SEBI's observations for its proposed IPO, according to the regulator's latest data.

Inox Clean Energy IPO papers kept in abeyance by SEBI

Press Trust of India
New Delhi

Markets regulator SEBI has kept in 'abeyance' the draft offer documents of Inox Clean Energy Ltd, which is planning a ₹10,000-crore IPO.

The proposed IPO comprises a fresh issue worth ₹8,000 crore and an OFS of shares, amounting to ₹2,000 crore by promoter Devansh Jain, according to the draft red herring prospectus (DRHP).

The status of the issue was updated by SEBI on Thursday under the list of IPOs whose observations have been kept in abeyance.

Without specifying reasons, the regulator stated that the "issuance of observations (has been) kept in abeyance", according to an update on its website.

QUICKLY.

PFRDA targets 2-3 crore new NPS subscribers

New Delhi: Pension Fund Regulatory and Development Authority (PFRDA) Chairperson S Ramann on Thursday said it aims to add about 2-3 crore new subscribers to the National Pension System (NPS) in the next two years. Through the 'NPS Tatkal' scheme, PFRDA will onboard new NPS subscribers through UPI, beginning with NPCI's BHIM UPI application. So far, five banks have joined the plan – State Bank of India, HDFC Bank, ICICI Bank, Axis Bank and IDFC FIRST Bank.

"We are actually looking at about 2-3 crore subscribers coming in the next two years. NPS Tatkal will give us the ability to spread the reach of NPS," Ramann said on the sidelines of an NPS Diwas event. The scheme will also help in expansion of the pension coverage across tier 2 and tier 3 cities. PTI

Bond yields hit two-year high amid inflation pressure

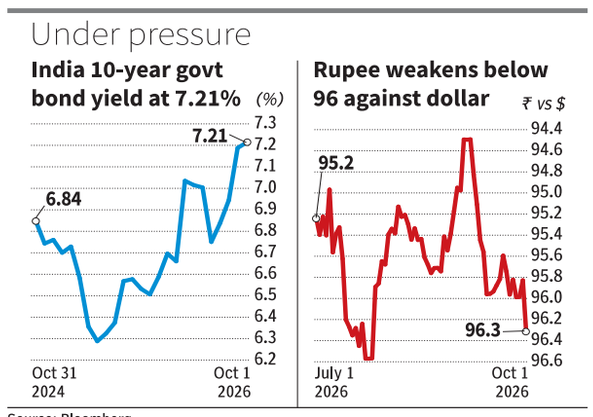

MARKET STRAIN. Foreign outflows and crude prices hit rupee and equity markets

Ashokamithran T
Mumbai

The benchmark 10 year G-Sec yield hit a two-year high of 7.21 per cent on Thursday, as global yields hardened and domestic inflation expectations strengthened.

The last time the government bond yielded a similar return was on April 19, 2024, when it touched 7.22 per cent.

A combination of rising global bond yields and higher inflation expectations has made domestic government bonds cheaper, pushing yields higher. The US 10-year Treasury yield, for instance, inched up to 5.33 per cent, a two-decade high, as investors grew concerned about rising government debt and soaring crude oil prices.

Source: Bloomberg

HIKE PRICED IN?
Persistent uncertainty in West Asia has kept crude prices above $100 per barrel. On the domestic front, markets have largely priced in a 25 basis point (bps) rate hike by the Reserve Bank of India at the upcoming Monetary Policy Committee meeting scheduled for October 7, 2026, to tackle elevated retail inflation stemming from a 13 per cent rainfall deficit.

"Bond markets have absorbed the global rise in yields, uncertainties arising from the West Asia crisis and soaring oil prices," said Venkatakrishnan Srinivasan, Managing Partner at Rockfort Fincap LLP.

"Current yield levels are unlikely to move below 7.2 per cent unless the crisis in West Asia subsides and crude oil prices fall below $80 a barrel and remain there," he added.

Higher crude prices have also weighed on the domestic currency, with the rupee trading at 96.25 against the dollar, 30 paise weaker than the previous day, according to CCIL data.

FOREIGN FUND
Forex dealers observed that the RBI's presence through dollar sales was not evident in the market. The currency pair could weaken further to 96.6 per dollar, according to Dilip Parmar, Research Analyst at HDFC Securities.

Persistent foreign fund outflows, elevated crude prices and a weakening rupee have deepened risk aversion among investors, pulling Indian equity markets lower for the eighth consecutive week.

This marks only the second instance of such a prolonged losing streak in the past 25 years.

The Nifty closed at 22,421.95, down more than 10.5 per cent since August 2026.

UPI processes 24 b transactions in September, sees a dip of 1.8%

Jyoti Banthia
Bengaluru

The Unified Payments Interface (UPI) processed 24.07 billion transactions worth ₹29.37 lakh crore in September, moderating 1.8 per cent from the record 24.51 billion transactions processed in August, according to data released by the National Payments Corporation of India.

Transaction value declined 1.5 per cent month-on-month from ₹29.82 lakh crore in August. However, the September decline was partly due to the month having fewer day.

DAILY TRANSACTION
On a daily basis, UPI transactions rose 1.4 per cent to an average 802 million, crossing the 800-million mark for the first time. Average daily transaction value also rose to ₹97,913 crore from ₹96,205 crore in August.

On a y-o-y basis, transaction volumes grew 23 per cent, while transaction value increased 18 per cent.

"UPI's September totals are slightly lower than August's only because September has one less day in the month. On an average day, Indians made 802 million UPI payments worth ₹97,913 crore, both the highest ever," said Reeju Datta, Co-founder, Cashfree.

Average daily transaction value also rose to ₹97,913 crore from ₹96,205 crore in August

UPI crossed the 23 billion monthly transaction mark for the first time in May, processing 23.2 billion transactions worth ₹29.90 lakh crore.

Volumes rose to 23.66 billion in July before reaching a record in August.

Datta attributed the rise in daily transactions to the beginning of the festival season, with Ganesh Chaturthi falling in mid-September. He said that while daily UPI value had remained around ₹96,000 crore between April and August as incremental payments were largely smaller-ticket transactions, festival spending lifted the average value in September.

FESTIVAL SALES
With the main festival sales beginning on October 8 and Diwali falling on November 8, Datta expects UPI transaction values to rise further through October and November as consumers make higher-value purchases.

The data comes ahead of the introduction of a merchant discount rate (MDR) on select UPI transactions from October 15.

Datta said he does not expect the new MDR structure to materially affect UPI volumes or value, citing the payment system's lower cost compared with cards and its widespread consumer adoption.

Banks lose pricing advantage as RBI's bulk deposit disclosure norm kicks in

Ashokamithran T
Mumbai

The Reserve Bank of India's (RBI) circular mandating banks to disclose interest rates on bulk deposits may place banks on a more level-playing field in terms of price competition, according to treasury heads at several banks.

The direction, which requires banks to disclose bulk deposit rates every morning between 10 am and 10.10 am, kicked in on October 1.

BULK DEPOSITS
Bulk deposits are defined as those above ₹3 crore. Some major banks disclosed the information, while others had yet to update their rates at the time of publishing.

SBI, ICICI Bank, Axis Bank and Kotak Mahindra Bank were among those that disclosed rates.

The rates ranged from 5.9 per cent to 6.05 per cent for a three-year deposit at Axis Bank. Kotak Mahindra Bank and ICICI Bank offer at least 6.35 per cent and 6.5 per cent respectively, on similar tenures, according to information available on their websites.

RBI amended the directions on interest rates on deposits, mandating banks to disclose interest rates on bulk deposits, defined as those above ₹3 crore

The RBI amended the directions on interest rates on deposits, mandating banks to disclose interest rates on bulk deposits, defined as those above ₹3 crore, on their websites between 10 am and 10.10 am each day.

Further, the RBI amended the directions to ensure that interest rates are uniform across all branches and customers on a particular day. However, the central bank has allowed lenders to price deposits differently depending on the run-off rates applicable under the Liquidity Coverage Ratio (LCR) framework.

The changes are expected to reduce distortions in competition among banks, as lenders will now have to fix rates in line with their broader funding strategy, said Gopal Tripathi, Head of Treasury at Jana Small Finance Bank.

"Everybody has the same advantage or disadvantage," he said.

Some banks have used the flexibility provided by the RBI to price deposits differently based on LCR run-off rates.

"A few banks have implemented it today. Most are expected to implement it over the next month," said Anshul Chandak, Head of Treasury at RBL Bank.

The direction has come into effect six days ahead of the RBI'sMPC meeting, where banking analysts and economists expect the repo rate to rise to 5.50 per cent from the current 5.25 per cent.

'Renaissance keen to invest ₹5,000 cr in Tumakuru'

Our Bureau
Bengaluru

As announced at Invest Karnataka 2025, Renaissance Solar and Electronic Materials (RSOLEC), an India-US solar and semiconductor materials company, has expressed interest in investing ₹5,000 crore in the Chennai-Bengaluru Industrial Corridor (CBIC) region in Tumakuru, Minister for Large and Medium Industries MB Patil said on Thursday.

He held a detailed discussion with RSOLEC Chairman and Chief Executive Officer Milind S Kulkarni, who met him at Khanija Bhavan in Karnataka.

Speaking on the occasion, Patil said the company has established a strong presence in the solar sector, particularly in single-crystal silicon growth and wafer manufacturing.

It has sought 100 acres of land in the CBIC region to establish a 5 GW solar ingot and wafer manufacturing facility.

Accenture's managed services momentum offers positive signals for Indian IT firms

Sanjana B
Bengaluru

Accenture's stronger-than-expected Q4 and record large-deal bookings point to improving technology spending, with Indian IT services firms also likely to benefit from rising demand for transformation work, analysts said.

Accenture reported revenues of $18.7 billion for the quarter, marking a 6 per cent increase in US dollars and 7 per cent in local currency.

This result exceeded the company's guided range of $17.75 billion to $18.40 billion, which represented expected growth of 1 per cent to 5 per cent in local currency.

For the full fiscal year, revenues reached $74.2 billion, representing an increase of $4.5 billion, or 6 per cent in US dollars and 5 per cent in local currency, compared to the previous year.

New bookings for the quarter stood at $22.2 billion, an increase of 4 per cent in US dollars and 5 per cent in local currency for the quarter. For the full year, it was $84.5 billion.

REVENUE GROWTH
For fiscal year 2027, Accenture expects full-year revenue growth of 3 per cent to 6 per cent in local currency.

Consulting new bookings were $9.40 billion, while managed services new bookings were $12.77 billion in Q4.

Generally accepted accounting principles (GAAP) net income for the quarter was $2.03 billion, compared with $1.45 billion for the fourth quarter of fiscal 2025.

Accenture Chair and CEO Julie Sweet said, "We exceeded our fourth-quarter revenue guidance range and capped off another year of broad-based growth across our business, grew adjusted EPS 8 per cent, returned a record $11.5 billion to shareholders, and reached a new high of 141 quarterly client bookings of $100 million or more."

FIRM'S HEADCOUNT
The company's headcount stood at around 814,000 at the fiscal 2026 year-end, up from 798,739 last quarter. Pareekh Jain, Founder and CEO of EIIR Trend, noted that Q4 results were better than expected, with the company showing optimism about the market.

He said Accenture's headcount growth is a positive sign amid concerns over job losses and revenue growth without corresponding hiring, while growth across verticals and geographies suggests broad-based strength.

LARGE CONTRACTS
Moreover, while Accenture's consulting generally sees fewer large deals, managed services is benefiting from larger contracts.

"Indian service providers are also winning large deals. They are benefiting from the ongoing transformation work."

Meanwhile, Praveen Bhadada, CEO & Managing Director, Neovay Global explained that Accenture's latest results reinforce that global technology spending is becoming more confident and increasingly concentrated around large, strategic transformation programmes.

Infosys ADR rose 8.09 per cent to $11.63, while Wipro ADR gained 7.88 per cent to $1.78 following Accenture's results announcement.

Indian Bank working on mechanisms to prevent UPI MDR from being passed on to consumers

Sindhu Hariharan
Chennai

With the government urging banks to ensure that the new Merchant Discount Rate (MDR) on UPI does not burden consumers, public sector lender Indian Bank is working on a combination of sensitisation measures and technological controls to ensure merchants do not pass on MDR to consumers.

"We can create awareness among the customers so that if somebody is charging, they can raise a complaint," Binod Kumar, MD and CEO, Indian Bank, told *businessline*, adding that they would also sensitise merchants about the benefits derived from promoting UPI.

The bank will monitor this through its merchant-acquiring and grievance-redressal mechanisms, where customers can report additional amounts sought by merchants on account of MDR.

"We will also have transaction-level data and merchant-level monitoring to identify unusual patterns or exceptions. We are also developing an API-based identification mechanism to strengthen this monitoring and enable more systematic identification of such instances," Kumar said.

TRANSACTION VOLUME
In cases where Indian Bank is the acquiring bank, it is considering waiving part of the MDR for merchants, based on transaction volumes and a cost-benefit assessment.

Under the new framework, 40 per cent of 0.4 per cent MDR will go to customers' banks, 30 per cent to payment gateways, 20 per cent to the UPI app, and the remaining 10 per cent to the sponsoring bank of the UPI app.

Binod Kumar, MD & CEO, Indian Bank BIJOY GHOSH

The total volume of Indian Bank's UPI transactions (remitter + beneficiary) is around 688 crore (490 crore remitter, 198 crore as beneficiary) so far this fiscal year (April-September 2026). Only around 12.1 crore (10.2 crore remitter, 1.9 crore as beneficiary) relate to P2M transactions over ₹2000. These 12.1 crore transactions aggregated to a value of roughly ₹1.05 lakh crore.

The MD and CEO said the impact of new MDR collections on the bank itself would be limited.

The new charge will be "minuscule", and we expect to generate just around ₹100 crore in income, which is not a significant impact on return on assets, he said.

Overall, he backed MDR as a measure aimed at the long-term sustainability of UPI, pointing to the recurring expenditure involved in running the payments infrastructure.

Given India's ambitions around internationalisation of this payment stack and its increasing use cases, there is a need for continued technology investments, he added.

Shriram Properties sees 10% increase in raw material costs

Our Bureau
Chennai

Rising raw material and construction costs are putting pressure on real estate developers, with Shriram Properties estimating an 8-10 per cent escalation in project costs following the Iran and West Asia crisis.

The increase is particularly pronounced in construction products linked to oil imports, including lifts, sanitary fittings and tiles.

While cement and steel prices have remained relatively under control, the increase in other inputs is becoming a significant cost burden for developers, said Murali Malayappan, Chairman & Managing Director, Shriram Properties Ltd.

Murali Malayappan, CMD, Shriram Properties BIJOY GHOSH

The company is currently absorbing most of the cost escalation, he said told newspersons on Thursday.

INCREASING IMPORT
The real estate company is hoping that increased imports from China could provide some relief.

The company recorded pre-sales of about ₹2,300 crore last year and is targeting ₹4,600-5,000 crore in pre-sales over the next two years.

It also aims to increase revenue from around ₹1,000 crore to ₹2,700-3,000 crore and profit from about ₹60-70 crore to ₹250-270 crore over the next three years, he said.

Murali said Chennai remains a key market in this expansion.

He plans to remain predominantly focused on housing while taking a more cautious approach to commercial real estate because of uncertainties around artificial intelligence and work-from-home trends. Nearly 10 per cent of the development is commercial, said Murali.

Gold up as softer inflation data dent rate hike bets

Gold prices rose on Thursday as softer than expected US inflation data reduced bets for a Federal Reserve rate hike in October. Spot gold rose 0.6 per cent to $4,181.02 per ounce by 1256 GMT. US gold futures for December delivery were up 0.6 per cent at $4,211.20. Silver rose 1.3 per cent to $61.21. REUTERS

Aluminium drifts to 12-week low on stronger $

London: Aluminium prices fell to a12-week low and copper hit its lowest in two weeks as a stronger dollar and thin trading volumes weighed on sentiment. Benchmark three-month aluminium on the LME was down 1.3 per cent at $3,130 a tonne. Copper fell 0.9 per cent to $14,287. REUTERS

Crude oil steadies as Gulf exports recover

New Delhi/Tokyo: Crude oil prices held firm as recovering Gulf crude exports and a rise in US inventories eased supply concerns. Brent crude futures were up 0.6 per cent to $98.67 a barrel by 0704 GMT. US WTI crude rose 0.5 per cent to $90.09. Meanwhile, the OPEC+ oil-producing countries are likely to keep their oil production targets steady for November. REUTERS

Tea exports may lose steam, drop 20% this year

TRADE HEADWINDS. Shipments declined 16.11% year-on-year to 128.56 mkg during January-July amid higher freight rates and logistics disruptions

Mithun Dasgupta
Kolkata

Tea exports could decline by about 20 per cent year-on-year this year due to a sharp rise in freight rates and major logistics disruptions stemming from the prolonged West Asia crisis.

Exporters fear that 2026 could be one of the worst period for Indian tea exports in a long time.

"This year is probably one of the worst years we have had in a long time because of logistic issues, probably even worse than the Covid period. Shipping costs have skyrocketed, and there is no surety that consignments will reach their destinations on time. It is a very bad scenario," said Anish Bhansali, Partner of Bhansali & Co, a major tea exporter.

KEY MARKETS SUFFER

The country's total exports fell 16.11 per cent year-on-year to 128.56 million kg (mkg) during January-July this year.

"Iran and Iraq, two major markets for Indian tea, want to buy but are finding it very difficult. Freight rates have gone up more than 10 times and there is no surety on when the goods will arrive. It is absolute mayhem. Freight rates have affected every market — some less, some more — but everywhere it is a major bottleneck. We alone are expecting a drop of at least 30 per cent, if not more, in exports. Indian tea exports will be down big time this year," Bhansali told *businessline*.

ROBUST OFFTAKE. Amid logistics bottlenecks, the silver lining is that overseas demand for Indian tea is "quite decent", industry leaders said

Overall tea exports stood at 285.53 mkg in 2025 — up 11.56 per cent from 256.11 mkg in 2024.

According to Indian Tea Exporters' Association (ITEA) Chairman Anshuman Kanoria, tea exports are likely to be down by around 20 per cent year-on-year this year.

UNDER STRAIN

"To West Asia, we do not export expensive teas, so exporters cannot pass on the whopping increase in freight rates to buyers there. Their economies are already under strain," he said.

"But our exporters are taking huge risks in the West Asian region as stock positions are low and demand remains high. Shipments and payments are the major problems there," Kanoria said.

"In Europe, because of the tight pesticide laws, it is becoming difficult for Indian exporters to comply. So compared to last year, our shipments to European countries may drop this year," he said.

DECENT DEMAND

Amid this gloomy situation, the silver lining is that overseas demand for Indian tea is "quite decent", said Indian Tea Association Chairman Hemant Bangur.

"Overall exports will be lower than last year. While freight costs have definitely gone up, the silver lining is that demand is quite decent. So while volumes have come down, prices have held. A larger part of our exports is orthodox teas," Bangur said.

"Orthodox production has been higher than last year, and prices have also been slightly higher. So, net-net, exporters or importers have absorbed the higher freight cost," he added.

African tur firms up on fears of lower output

Vishwanath Kulkarni
Bengaluru

Prices of tur (pigeon pea) in key East African producing countries have increased over 10 per cent on concerns over a lower-than-expected crop. The African countries have emerged as the major sources of India's tur imports.

"African tur was very cheap. Prices have gone up by about ₹10 a kg in Africa due to concerns over a lower-than-expected crop. African tur is now selling at ₹70-75 per kg against ₹65 earlier," said Bimal Kothari, Chairman, India Pulses and Grains Association (IPGA). Despite the increase, African tur remains below India's minimum support price of ₹8,450 a quintal.

Kothari attributed the increase to lower crop expectations. "Earlier, we were expecting that there would be a better crop than last year. Now, the trade estimates are that the crop may not be as good as last year. There might be a shortfall in production in comparison with last year," he said.

ON THE RISE. In the first seven months of calendar 2026, tur imports rose 44 per cent to 5.79 lakh tonnes from 4.01 lakh tonnes in the year-ago period

IMPORTS UP 44%

India imports tur from Mozambique, Myanmar, Tanzania, Sudan and Malawi, among other countries. In the first seven months of calendar 2026 (January-July), tur imports rose 44 per cent to 5.79 lakh tonnes (lt) from 4.01 lt in the year-ago period.

Mozambique was the largest supplier at 2.18 lt, followed by Myanmar at 1.35 lt, Tanzania at 1.04 lt and Sudan at 68,499 tonnes. India's tur imports rose 5.42 per cent to 13.25 lt in calendar 2025.

On the domestic crop, Kothari said there were concerns over drought affecting tur in Karnataka and Maharashtra, the key producing States. "People are expecting the tur crop will be down. We need to give it more time. There have been rains in September, which should help the crop. The crop will be harvested in 2.5 months, and we still have a lot of time to go," he said.

Tur was planted on about 47.25 lakh hectares (lh) in the kharif 2026 season, up from 45.95 lh a year earlier. Karnataka saw a 6 per cent decline in area to 14.16 lh from 15.33 lh, while Maharashtra recorded a 1.5 per cent fall to 12.02 lh from 12.21 lh.

However, acreage rose 33 per cent in Uttar Pradesh to 4.95 lh and 11 per cent in Gujarat to 3.3 lh.

Centre halves sugar stock limit for traders to 100 tonnes

Our Bureau
New Delhi

The Centre has reduced the maximum stock holding limit of sugar for traders at 100 tonnes at any point in time with effect from October 15.

The order issued by the Food Ministry will be valid until November 30, an official statement said.

The government has also asked traders to liquidate surplus stock over the next 15 days to comply with the revised order.

Previously, the stock limit was 200 tonnes.

However, the stock limit for traders in Kolkata and its extended metropolitan areas and in Assam will be 200 tonnes, reduced from the 400 tonnes earlier.

Kolkata is a major centre of sugar trade as it caters to demand in the East and North-East States.

STORAGE PERIOD

The government has also stipulated that sugar dealers will be allowed to hold stock only for 15 days.

The maximum holding period was previously fixed at 30 days, allowing traders to sell after the date of receipt. With the new sugar season beginning October 1, the Centre said it was strengthening measures to ensure the availability of sugar to consumers at reasonable prices during the festive period.

"By restricting the quantity and storage period of sugar, the government aims to facilitate the orderly movement of sugar through the supply chain and ensure its continuous availability to consumers at reasonable prices," the Ministry said.

The objective of the amended rules is to ensure that there is no unnecessary accumulation of sugar in the distribution chain and that there is a smooth flow of supply from mills through dealers to the end consumer, it added.

RETAIL PRICES DOWN

The government also said that the average retail sugar prices had fallen 15 per cent from their August peak and were expected to decline further as lower prices in the supply chain are realised.

Ex-mill prices have dropped by around 28 per cent and have remained stable for the past three weeks.

India eyes Africa for edible oil; SEA, Mozambique's Nampula ink pact

Our Bureau
Mangaluru

The Solvent Extractors' Association of India (SEA) and the government of Nampula Province in northern Mozambique have signed a 'statement of interest' to explore a sustainable oilseed and vegetable oil corridor between Nampula and India.

Solidaridad Network Asia and Solidaridad Southern Africa have joined as partners to help ensure the corridor is developed on fair terms for farmers and without forest clearance. The agreement was signed on the sidelines of Globoil India 2026 in Mumbai on Wednesday.

Nampula, one of Mozambique's leading agricultural provinces, has considerable unused arable land and agro-climatic conditions suitable for several oilseed crops. Smallholders already grow groundnut, soybean and sesame, while oil palm is native to Africa.

SOLITAIRE PRICE INDEX
2nd October, 2026
4,586*
0.62% ↑ Over last Month
0.88% ↑ Over last Year
Nationwide Standard & Transparent Pricing since 2006.
Released on the 1st of every month.
*This is an average of Divine Solitaires Price List
DIVINE SOLITAIRES

THREE-YEAR STUDY

The statement of interest begins a three-year exploratory phase, during which the partners will assess the opportunity before taking commercial decisions.

Any investment or sourcing arrangements will be governed by separate agreements under Mozambican law, while the SEA members will decide individually whether or not to participate.

Nampula will provide data on land, agroecological zones, water and infrastructure, and share information on land-use rights, investment approvals and environmental licensing. It will also facilitate engagement with the district administrations, cooperatives and local businesses. The SEA will outline the Indian industry's requirements for oilseeds, crude and refined oils and oilmeal, including quality specifications, storage, extraction and refining capabilities. It will also explore potential Indian investment in cultivation, aggregation, crushing and refining.

A Joint Working Group will assess land suitability, social and environmental considerations, markets and costs, as well as road, rail, storage and port infrastructure.

It will also examine farmer finance and phytosanitary requirements and consult communities and producer organisations.

Each party will bear its own costs, while the partners will jointly approach development agencies and financial institutions to fund the studies.

SEA President Angshu Mallick said India could not continue relying on a few countries for most of its edible oil requirements. SEA Executive Director BV Mehta said any new origin would need to provide consistent volumes, quality meeting Indian specifications and competitive landed costs.

COMMODITY CALL.

Zinc futures: Buy on dips

KEY LEVELS
Target: ₹435
Stop-loss: ₹395

Akhil Nallamuthu
bl. research bureau

Zinc futures are on an uptrend. But there has been a slowdown in momentum as the recent breakout did not see a follow-through rally.

Nevertheless, important support levels are valid and so, the broader bullish bias remains.

The October futures, after breaking out of the resistance at ₹422, marked a high of ₹431.75 last week before moderating to the current level of ₹417.

The contract is hovering near the support at ₹415, where the 21-day moving average coincides. The nearest support below this is the price band of ₹400-₹405.

As long as ₹400 stays valid, the uptrend will not be negated. A potential recovery, either from the current level of ₹417 or after a dip to ₹405, could lift the contract to ₹435. A breakout of ₹435 could take it higher to ₹440.

On the other hand, if the base at ₹400 is breached, the contract could see a fall to ₹385.

TRADE STRATEGY

For a better risk-reward ratio, we suggest waiting for the zinc (October) futures to drop to ₹410 before buying.

Target and stop-loss can be ₹435 and ₹395, respectively.

Keralam fishers urge review of turtle-excluder device requirement

Our Bureau
Kochi

Fishing representatives have urged the authorities to reconsider the requirement for Indian shrimp-fishing boats to attach turtle-excluder devices (TEDs) to their nets, arguing that the measure could reduce the catch and add to the fishers' burden.

They also called for greater reliance on Indian research and certification.

TEDs are designed to allow turtles to escape from fishing nets. The Federation of Fishing Boats and Fishery Industries of Keralam said an estimated 8-10 per cent of the catch could also be lost when turtles exit the nets.

US MARKET ACCESS

The concerns follow the US restriction on shrimp imports from India over the risk of endangered sea turtles being caught in the shrimp nets.

The representatives that said the requirement applied to fishing-boat nets only, while gill nets were not subject to the same requirement. Therefore, they called for a review of the policy.

The federation proposed that the Central Marine Fisheries Research Institute (CMFRI) be authorised to certify Indian fish products under a national "Bharat Branding" system.

Federation General Secretary Joseph Xavier Kalapurackal said certification by Indian institutions, including CMFRI, the Central Institute of Fisheries Technology and the Marine Products Export Development Authority, could strengthen confidence in Indian seafood in international markets.

Rajnath moots shift from annual review to anytime review of defence budget

RESOLVING ISSUES. Minister calls for automating grievance redressal through a conversational AI ecosystem

Our Bureau
New Delhi

Defence Minister Rajnath Singh on Thursday suggested to the Defence Accounts Department to move away from 'annual review' to 'anytime review' of the budget, with real-time data enabling timely and informed decision-making.

Launching key digital and financial management initiatives at the Defence Accounts Department's 279th annual day celebration, Singh advocated that their approach must be firm, fair, sensitive and responsible, especially when dealing with the legitimate dues and service rights of personnel who had devoted their lives to defending the nation.

The Minister called for greater integration of financial systems of the Army, the Navy and the Air Force.

INTEGRATED SYSTEM

He stressed upon maximum digitisation, automation and transparency, with real-time updating of Management Information System data.

He also appreciated 'Saksham', the project for digitising and integrating the Defence accounting and payment ecosystem hosted on a secure dedicated data centre and operating on the department's WAN network. It uses the latest tech-stack with secure role-based access, enhanced validations and scalability, supporting the Department's move towards "One Nation, One Function, One Application".

The Minister called for greater integration of financial systems of the Army, the Navy and the Air Force

Union Defence Minister Rajnath Singh addressing the Defence Accounts Department Day 2026, in New Delhi ANI

He praised its integration with the Indian Army Financial Information System for budget, approval and bill data.

FULL UTILISATION

Highlighting the near 100 per cent expenditure during FY26, Singh lauded the joint efforts of the departments of all three Services.

On 'Sparsh' data cleaning, the Defence Minister suggested automating grievance redressal through a conversational AI ecosystem covering chat, SMS, WhatsApp, email and phone calls. He also emphasised quality audit, digital data cleaning and prompt resolution of grievances and court cases.

The Minister unveiled three major initiatives aimed at strengthening the integration of Financial Information Systems of the defence forces, improving accounting and tracking of defence expenditure and operationalising the Treasury Single Account system in the Ministry.

SC stays death sentence of Indian Mujahideen agent in Ahmedabad blasts case

The Hindu Bureau
New Delhi

Barelvi's counsel contended that his conviction rested entirely on the allegation that he was part of the conspiracy behind the blasts

The Supreme Court on Thursday stayed the execution of the death sentence awarded to an Indian Mujahideen operative in the 2008 Ahmedabad serial bomb blasts case, in which 56 people were killed.

A Bench of Justices Vikram Nath, AG Masih and Sandeep Mehta passed the interim order while hearing an appeal filed by Ahmed Bawa, alias Abbu Abubakar Barelvi, challenging the Gujarat High Court verdict affirming the death sentence imposed on him by the trial court.

The Bench issued notice to the Gujarat government and called for the trial court records, while directing that the death sentence not be executed in the meantime.

Appearing for Barelvi, his counsel contended that the conviction rested entirely on the allegation that he was part of the conspiracy behind the blasts.

"I have been convicted totally on the basis of conspiracy," the counsel submitted.

Solicitor General Tushar Mehta, appearing for the Gujarat government, however, opposed the plea, stressing the gravity of the case. "It is a serious case," Mehta submitted.

CASE HISTORY

On July 26, 2008, a series of 21 bomb blasts ripped through Ahmedabad within a span of 70 minutes, killing 56 people and injuring more than 200. Explosions also occurred at hospitals where victims of the attacks were being taken for treatment.

On July 7, the Gujarat High Court upheld the death sentences awarded to 38 convicts in the case and the life sentences imposed on 11. While upholding the capital punishment, the High Court cited the scale of the casualties, the "humongous nature of conspiracy" and the intention "to create an atmosphere of widespread terror in the society." It also took into account the roles and criminal antecedents of the convicts and their conduct during the trial.

"The manner in which the bomb blasts were executed speaks volumes about the mindset and the remorseless act of taking away the lives of innocent people," the High Court had said.

Among those convicted are Safdar Nagori, a former leader of the banned Students Islamic Movement of India, and his associates from several States, including Gujarat, Madhya Pradesh, Kerala and Uttar Pradesh.

Seventy-eight people stood trial in the case, which covered 20 FIRs over the Ahmedabad blasts and another 15 relating to unexploded bombs recovered in Surat. The special court convicted 49 of them.

Aadhaar required for SC Top Class scholarship applicants

Ankita Upadhyay
New Delhi

The Centre has made Aadhaar authentication a requirement for Scheduled Caste students seeking scholarships under its Top Class Education Scheme.

The Central sector scholarship for Top Class Education, run by the Ministry of Social Justice and Empowerment, offers full financial support to eligible students pursuing higher education beyond Class 12 at premier institutions such as the IITs, IIMs, AIIMS and NITs. It is funded from the Consolidated Fund of India.

In a notification dated September 18, the Ministry said a beneficiary "shall be required to undergo authentication or furnish proof of possession of Aadhaar number." Students without an Aadhaar number must apply for enrolment.

The Department has been directed to ensure that beneficiaries without Aadhaar are enrolled and that existing details are updated. Measures may include "coordination with Registrars and setting up enrolment centres at convenient locations or providing enrolment facilities by becoming a Registrar itself".

OTHER VERIFICATION

For a student below 18 without Aadhaar, the government will accept the enrolment acknowledgement carrying the enrolment ID,

along with a specified document such as birth certificate, passport or Class 10/12 certificate. He/she must also submit a document establishing the relationship with the parent or guardian, such as ration card, caste or domicile certificate, passport or Class 10/12 certificate.

Beneficiaries aged 18 or above can submit the enrolment acknowledgement along with documents including a voter ID, ration card, caste or domicile certificate, passport, driving licence, disability certificate or UDID card.

Where biometric authentication fails, another biometric mode or OTP authentication should be offered "wherever feasible and admissible".

If neither works, the benefit can be provided after offline verification of the Aadhaar QR code or the Aadhaar paperless offline e-KYC document.

EXCEPTION HANDLING

A key provision states that the benefit "shall not be denied to a child" who fails to establish identity through Aadhaar authentication, cannot furnish proof of possession or has only an enrolment application. In such cases, the child's identity and relationship with the parent or guardian will be verified through the prescribed documents.

The department will maintain records of cases handled through this alternative mechanism and ensure that they are periodically reviewed and audited. For beneficiaries aged 18 and above, it will follow an existing "exception handling mechanism" so that genuine beneficiaries are not deprived of the scholarship because of Aadhaar-related problems.

Chinese mobile covers likely to cost more as DGTR recommends anti-dumping duty

Shishir Sinha
New Delhi

Mobile covers imported from China are likely to cost more as the Directorate of Trade Remedies (DGTR), under the Commerce & Industry Ministry, has recommended an anti-dumping duty on them.

"The authority recommends imposition of final anti-dumping duty equal to the lesser of the margin of dumping and the margin of injury on imports of subject goods originating in or exported from the subject country to remove the injury to the domestic industry," a gazette notification said. It will be effective for five years and the rate recommended is $72 for 1,000 pieces.

MARKET EROSION

Based on investigation, the DGTR said that imports captured nearly half of the domestic market, while the market share of the domestic industry reduced to about one-fourth of the market.

TRADE SHIELD. The duty will be effective for five years and the rate recommended is $72 for 1,000 pieces

"It is seen that demand increased substantially over the injury period and has seen a growth of over 2.5 times that in the base year. Despite such increase in demand, the sales of the domestic industry and other producers have not increased commensurately with such growth in demand," it said. Further, imports of subject goods had shown a sudden increase in 2022-23, with further increase in 2023-24, and had declined in the period of investigation (POI).

MAJOR SOURCE

"Almost all of imports into India are from China. It is seen that imports in relation to production and consumption have also significantly increased over the injury period with decline in the POI," the DGTR said, adding that imports constituted 204 per cent and 51 per cent of the production of the domestic industry and Indian consumption.

PRICE PRESSURE

Also, imports are undercutting the price of the domestic industry and have prevented price increases, which would have otherwise occurred. Capacity utilisation remained low despite an increase in capacity and demand over the injury period.

Despite having the capacity to cater to a substantial part of the Indian demand for mobile covers, a significant portion of the domestic industry's capacity remained unutilised.

"The average inventory of the domestic industry has increased over the injury period. The domestic industry's profitability has declined significantly, including cash profit," the DGTR said.

TN's first barrier-less, multi-lane free flow tolling system operational at Paranur on NH-179B

Our Bureau
Chennai

The National Highways Authority of India (NHAI) has rolled out Tamil Nadu's first multi-lane free flow (MLFF) based tolling system at Paranur toll plaza on the Tambaram–Tindivanam Section of NH-179B.

The MLFF system introduces barrier-less tolling, enabling vehicles to pass through toll locations without stopping. The system leverages advanced technologies, such as automatic number plate recognition (ANPR) and FASTag-based electronic toll collection, to ensure seamless and efficient toll operations, said a release.

By eliminating the need for vehicles to stop at the toll plazas, the system will significantly reduce human intervention in toll collection, cut down congestion, improve travel time, enhance fuel efficiency and lower vehicular emissions on National Highways.

The technology marks a transformational shift in electronic toll collection on the National Highways

BARRIER-FREE

The NHAI is implementing MLFF-based tolling at various National Highways across the country in a phased manner. In order to provide a faster, seamless and barrier-free travel experience, it has rolled out the MLFF tolling system at various locations, including the Chorayasi toll plaza on the Surat–Bharuch section of NH-48 in Gujarat; Mundka-Bakkarwala toll plaza on the Urban Extension Road-II in Delhi-NCR; Shahjahanpur, Daulatpura and Manoharpura toll plaza on the Delhi–Jaipur section of NH-48 in Rajasthan; and the Gharaunda toll plaza on the Panipat–Jalandhar section of the National Highway-44 in Haryana, the release said.

The NHAI is implementing the system on various National Highways in a phased manner to provide a faster and barrier-free travel experience

National Highway users are required to maintain functional FASTag with sufficient balance to avoid electronic notices.

TRAI asks telcos to display mandatory recharge plans

New Delhi: Telecom regulator TRAI has asked mobile service providers to prominently display mandatory recharge plans and special tariff vouchers on their websites, mobile apps and exclusive points of sale, according to an official order published on Thursday. PTI

PepsiCo moves court over 'energy drink' label ban

New Delhi: PepsiCo and Monster Beverage have sued the Food Safety and Standards Authority of India for ban of the 'energy drink' label, court filings show. In a court filing in New Delhi, PepsiCo India said the prohibition will hurt "substantial investments", given that it had 492 million bottles in circulation on July 31. Monster Energy India, said it was given no prior notice before the decision. REUTERS

PM Modi, Trump, Netanyahu hail Indian pilot's Tel Aviv flight heroics

BRAVE ACT. Despite being stabbed by co-pilot, Smit Machchhar saved 174 lives on the Dubai-bound flight

Our Bureau
New Delhi

EFFUSIVE PRAISE. Captain Smit Machchhar fought back his assailant with the help of passengers and helped safely land the flydubai Tel Aviv-Dubai flight in northwest Saudi Arabia REUTERS

Before Wednesday, Captain Smit Machchhar was like any other Indian commercial aviator operating for an international airline. But his swift response, an instinct natural to any seasoned pilot, backed by extraordinary grit and bravery, averted a mid-air disaster.

The flydubai Flight FZ1073, a Boeing 737 MAX 8 aircraft, departed Dubai for Tel Aviv on Wednesday, with Captain Machchhar and his co-pilot from Oman in the cockpit along with 174 passengers, mostly Israelis, and crew on board.

As the plane gained height, inside the high-security enclosure of the flight deck, Captain Machchhar was fatally assaulted by his co-pilot, who tried to regain the control and dive the aircraft in a suspected hijack attempt.

The Indian aviator resisted the knife attacks, taking the wounds over his body, and managed to open the door of the cockpit.

Seeing the Captain battling the co-pilot, Yaniv Hayun, an Israeli passenger on the flydubai flight, narrated to Israeli Prime Minister Benjamin Netanyahu that he stormed into the cockpit and pulled up the aircraft's controls to stop the plane from a quick descent.

Captain Machchhar declared an emergency and ultimately diverted the aircraft for a safe landing at Tabuk airport in northwest Saudi Arabia, earning him praise from within the country and also across the globe.

GLOBAL PRAISE

The Maharashtra-reared aviator is recovering in a hospital after an emergency surgery in a Tabuk hospital.

The Indian Embassy in Riyadh and the consulate in Jeddah have been following up on the health condition of Machchhar.

The Indian Embassy said that it is also in touch with his family.

Prime Minister Narendra Modi and US president Donald Trump both hailed Captain Machchhar as a "hero". Netanyahu, too, joined them with no less effusive words to praise his "extraordinary" fight back.

Modi said he had thwarted a 9/11 type tragedy. "And like Israeli PM (Benjamin Netanyahu) today said that this Indian thwarted 9/11 (like attack). For every Indian, Smit's bravery fills our heart with pride," Modi said while addressing the centenary celebrations of the Union Public Service Commission (UPSC).

REWARDS

Back home in Maharashtra and across the domestic aviation community, people have expressed immense pride in Machchhar's bravery.

The government of Gujarat announced that Machchhar will be honoured with the 'Visisht Gujarat Garima Award'.

To become a pilot was not Machchhar's immediate childhood dream. He took admission in a textile engineering course to further the family's textile business.

When Machchhar turned 19, he decided to become a pilot, after being attracted towards it during an aviation seminar he attended.

He joined SpiceJet in 2011, where he rose to become a Senior Commander and Line Training Captain over a 11-year period. SpiceJet, too, offered its appreciation for a former employee. "Your heroism saved countless lives today," the private airline said.

Machchhar joined Dubai-based flydubai as a Direct Entry Captain on the Boeing 737 family in June 2022, as per his LinkedIn profile and has 9,750 flight hours experience.

New Kotak boss to focus on lending biz

K Ram Kumar
Mumbai

Anup Kumar Saha, MD and CEO designate of Kotak Mahindra Bank

Retail banking could get a leg up at Kotak Mahindra Bank (KMB) under Anup Kumar Saha, who is set to take the reins at the bank on January 01, 2027, for three years, say industry experts.

Currently, Whole-time Director (Executive Director) at KMB, the MD and CEO designate is expected to give home loans, loan against property, personal loans, business loans, credit cards, microcredit, among others, renewed thrust in view of his rich experience in the segment over a quarter century.

SPOTLIGHT.

As at June-end 2026, the private sector bank's advances mix had a high component of institutional loans (49 per cent), followed by retail loans (39 per cent) and independent business — commercial vehicle/construction equipment and tractor finance (12 per cent).

Experts say, Saha, who joined KMB in January 2026 from Bajaj Finance, could change the advance mix in favour of retail loans, nudging it closer to 50 per cent in the next couple of years.

His appointment is part of leadership transition process at KMB, which started following incumbent MD and CEO Ashok Vaswani informing the bank's board late June 2026 that, for personal reasons, he does not wish to seek reappointment upon completion of his current term on December 31, 2026.

KMB veteran and Whole-time Director Paritosh Kashyap was also considered a strong contender for the top position at the bank.

After Vaswani was appointed Managing Director and CEO of KMB with effect from January 1, 2024, KVS Manian, Whole-time Director designated as Joint Managing Director stepped down from his position on April 30, 2024, to pursue other opportunities in the financial services sector.

Manian, who was with the Kotak Group for almost three decades, took charge as MD and CEO of Federal Bank with effect from September 23, 2024.

ABUNDANT EXPERIENCE

KMB insiders say the appointment of Saha, who is currently overseeing the entire retail bank, government business, data analytics and marketing functions, is unlikely to lead to any high-profile exits. Prior to joining the bank, Saha was associated with Bajaj Finance, from October 2017 to January 2026, where he held senior roles, rising to the position of the MD and CEO.

Prior to BFL, he spent 14 years at ICICI Bank, where he served in senior roles, leading retail secured assets, business intelligence, retail and rural collections, credit cards and retail structured finance.

China, Thailand TB drug ingredients face anti-dumping duty

Ankita Upadhyay
New Delhi

The Directorate General of Trade Remedies (DGTR) has recommended anti-dumping duty for five years on imports of ethambutol hydrochloride, a key ingredient used in tuberculosis (TB) medicines, from China and Thailand, after finding that low-priced imports had caused injury to domestic producer Lupin Ltd.

The recommendation follows an anti-dumping investigation initiated after Lupin complained that imports from the two countries were entering India at dumped prices and affecting its domestic production. The period of investigation was April 2024 to March 2025, with the preceding three financial years considered for assessing injury.

IMPORTS SURGE

According to the DGTR findings, imports increased from around 16 tonnes in 2021-22 to zero in 2022-23 and 4 tonnes in 2023-24, before rising to about 122 tonnes in 2024-25, including around 100 tonnes from China and 22 tonnes from Thailand.

The authority found that the increase in imports coincided with a decline in Lupin's share of the market outside its captive consumption. It also examined the company's capacity utilisation, sales, profitability and other injury parameters before concluding that the dumped imports had caused material injury to the domestic industry.

DGTR determined that the product was being exported from China and Thailand at prices below its normal

value and that there was a causal link between the dumped imports and the injury suffered by the domestic industry.

The dumping margin was found to be 30-40 per cent for Wuhan Wuyao Pharmaceutical Ltd, one of the Chinese producers that participated in the investigation. For other Chinese producers, it was determined at 40-50 per cent, while the margin for all Thai producers and exporters was 15-25 per cent.

LESSER-DUTY

Under the lesser-duty principle, the recommended anti-dumping duty is $5,347 per tonne for Wuhan Wuyao, $7,234 per tonne for other Chinese producers, and $6,584 per tonne for all Thai producers.

The lower rate for Wuhan Wuyao would be available subject to specified documentation identifying the company as the producer. Otherwise, the higher rate applicable to other Chinese producers would apply.

Three Chinese companies — Wuhan Wuyao Pharmaceutical, Sinobright Pharmaceutical Industries and Brilliant Pharmaceutical — participated in the investigation.

No Thai producer or exporter participated, and DGTR therefore determined the relevant figures for Thailand on the basis of facts available.

FSSAI suspends licences of two more companies

Our Bureau
New Delhi

The Food Safety and Standards Authority of India (FSSAI) has suspended the licences of Shivam Agro and TCF Chocolates & Gifts Pvt Ltd after they were found to be in gross violations of rules. In a social media post, the FSSAI informed that it had suspended the licences of the two companies with immediate effect "following serious food safety violations identified during inspection".

TCF CHOCOLATES

In the case of TCF Chocolates and Gifts, the FSSAI said it received a consumer complaint regarding food ordered through an e-commerce platform.

During inspection, the officials observed poor hygiene and sanitation conditions, including inadequate cleaning, improper waste disposal and poorly maintained food-processing area.

SHIVAM AGRO

In the case of Shivam Agro, severe hygiene and sanitation deficiencies were observed, including flies, garbage, stagnant sewage water, spider infestation and inadequate cleaning of floors, equipment, walls and ceilings.

Ineffective pest control measures, improper storage system, use of bad equipment, non-functional lab and labelling discrepancies were observed during the inspection, prompting the regulator to suspend the licence of the company.

As govt steps up action against nicotine pouches, experts warn of health risks

Ankita Upadhyay
New Delhi

New concerns over the use of nicotine pouches have emerged as health experts warn that regular use can lead to nicotine dependence, affect cardiovascular health and cause irritation and other changes in the mouth.

The Centre has directed authorities to step up action against nicotine pouches, citing health risks associated with the products. The development has also brought renewed attention to the health effects of nicotine pouches, which are placed between the lip and gum and release nicotine through the lining of the mouth.

India has a growing sector of contract manufacturers and bulk suppliers that produce tobacco-free nicotine pouches primarily for international export, alongside pharmaceutical nicotine extractors based in regions such as Gujarat and Andhra Pradesh.

At least 47 Indian companies manufacture nicotine pouches, including for private-label and export markets. The products are available through online and offline channels, despite not being approved for marketing in the country. Brands such as ZYN and White Fox have been reported as being sold in India.

Cipla's Nicotex transdermal patch is available on online pharmacies, while Amazon offers a variety of these patches.

According to Dr Suranjit

Chatterjee, Senior Consultant, Internal Medicine, Indraprastha Apollo Hospitals, Delhi, nicotine absorbed through the oral tissues enters the bloodstream and can temporarily raise heart rate and blood pressure. Regular users may experience headaches, nausea, dizziness and restlessness. It may also cause soreness of the mouth, dryness, swelling or changes in the appearance of the tissue. "The long-term health effects of nicotine pouches are still being studied, as these products are relatively new," he said.

YOUNG PEOPLE

Nicotine stimulates the brain's reward pathways and repeated exposure can contribute to dependence. It can affect pathways involved in attention, learning, mood and impulse control, he said.

"Nicotine can cause dependence whether it comes from cigarettes, vapes, pouches or other nicotine products," Chatterjee said.

Nicotine pouches should also not be equated with approved nicotine-replacement therapies such as patches, gums and lozenges, Chatterjee said.

SpaceX launches 4 astronauts into ISS

Press Trust of India
Cape Canaveral

Four astronauts blasted off on Thursday on a space station mission that will stretch until spring.

SpaceX launched commander Jessica Watkins and her crew for NASA after a three-week delay to fix the capsule's leaking fuel system.

Although their stay at the International Space Station will last six months, the flight there promised to be the quickest yet for Elon Musk's company: A mere eight-hour transit with an arrival well before bedtime.

After US firms agree on auditing AI models, experts call for India's own AI safety pact

Sanjana B
Bengaluru

India needs to develop an AI safety and governance framework tailored to its own languages, use cases, and scale of deployment, even as it aligns with global standards, as the country seeks to build indigenous AI capabilities while remaining one of the world's largest markets for AI deployment, industry players said.

On Tuesday, US President Donald Trump announced that technology executives had agreed to establish voluntary AI standards. Under the agreement, companies would work with 'independent auditors' to assess whether their AI systems operate as intended. They also committed to ensuring that their AI tools do not "hack or access technical systems in unintended ways".

Amit Sheth, Founding Director, Indian AI Research Organisation, explained that voluntary industry commitments can be useful in establishing a common baseline for responsible AI development. They can encourage companies to adopt practices such as pre-deployment testing, red-teaming, documentation, incident reporting, and ongoing monitoring before these become mandatory requirements.

AUDITOR ACCESS

Meanwhile, Ganesh Ramakrishnan, Founding Director of BharatGen, noted that the effectiveness of audits depends on the access provided to auditors, making it important to build trust and oversight into AI systems from the outset.

He also stressed the importance of provenance and auditability, which can support AI sovereignty and transparency for countries, build trust for businesses using AI in regulated sectors.

BUILDING AI

Sheth said India should not simply replicate a framework developed for a different AI ecosystem.

"India is a large-scale adopter of AI and an emerging developer of indigenous AI capabilities. As India moves from primarily an AI services and deployment market towards a global AI product and research nation, safety needs to be built into the development of our own AI capabilities," he said.

Devyani Gupta, Co-Founder & CEO of Arrowhead AI, said India's pact should not simply be copied from the US.

"India's AI story is also being written by companies that deploy AI at scale, not only by those training frontier models. An Indian pact should focus on how AI behaves when it reaches a customer: do they know they're talking to an AI, did they consent, and who is accountable when something goes wrong?" she said.

Sheth also said AI models should disclose their capabilities, limitations and known risks before commercial deployment.

"India needs to develop the capability to conduct these evaluations ourselves. A model that performs well on a global benchmark may behave differently across Indian languages, domains and social contexts. ," he said.

Forget WFH, try work from forests in Keralam!

KFDC unveils workation programme at Gavi in Pathanamthitta, Suryanelli in Idukki

Our Bureau
Kochi

Tired of working from office or home every day? Keralam is offering professionals a refreshing alternative — the chance to work amid forests and mountains, with reliable high-speed internet, fresh air and birdsong replacing the usual office distractions.

The Kerala Forest Development Corporation (KFDC) has unveiled a workation programme at Gavi in Pathanamthitta and Suryanelli in Idukki, offering professionals an opportunity to work away from office or home and in the lap of nature.

The initiative was mooted by Shibu Baby John, State Forest Minister, who suggested successful workation models by renovating existing forest accommodation.

To tackle connectivity issues, the authorities provided internet inside protected forest areas without laying kilometres of optical fibre with an alternative solution.

BSNL established an aerial link from Sabarimala to Gavi, offering speeds of around 100 Mbps at Gavi and up to 500 Mbps at Suryanelli. Back-up generators have also been installed to ensure continuity during power interruptions.

The workation rooms are equipped with additional power outlets and dedicated discussion spaces.

Outdoor routers allow guests to work from verandas and lawn tents, while meals, unlimited tea and fresh local coffee are included in the package.

NATURE WALKS. Once the workday is over, guests can step away from their screens and explore the surroundings

WILDLIFE TRAILS

Once the workday is over, guests can step away from their screens and explore the surroundings through guided nature walks, boating, birdwatching and wildlife trails. Gavi, located deep inside the Periyar Tiger Reserve, is an ecotourism destination centred around a scenic lake and surrounded by evergreen forests.

Suryanelli, near Munnar, offers a contrasting high-altitude setting amid tea plantations and sweeping mountain views.

The three night, four day package is priced at ₹14,000 per room, plus applicable taxes, working out to approximately ₹7,000 per person. Gavi has four duplex rooms accommodating up to eight guests, while Suryanelli has three rooms with capacity for up to six people.

With bookings now open through the KFDC website, the initiative has already attracted interest from creative professionals, film teams and companies looking to offer employees a change of scenery while they work.
