# Govt weighs delaying Adani's Mumbai airport shift plan

**MAJOR TRANSITION.** Ministry asks airlines, Adani Airports to submit firm proposal by Oct 20

**Our Bureau**
New Delhi

**ON THE CARDS.** The next meeting will be held on October 13 to firm up the plan for shifting operations from Mumbai Airport to Navi Mumbai

An extension of the October 26 deadline for shifting flights from Mumbai airport to Navi Mumbai airport, along with additional incentives for airlines, are among the proposals being considered to resolve the standoff between airlines and Adani Airports, official sources told *businessline*.

The proposals were discussed at a meeting chaired by the Civil Aviation Secretary and attended by representatives of Adani Airports Holdings (AAHL), the Airports Authority of India (AAI) and the Federation of Indian Airlines (FIA), including Air India, IndiGo and SpiceJet.

The airlines opposed the October 26 deadline, saying that several passengers had already booked tickets for flights departing from the Mumbai airport.

An extension of the timeline is under consideration, although a revised date is yet to be decided.

Additional incentives were suggested to encourage airlines to operate from Navi Mumbai Airport.

The discussions also covered the higher user development fee (UDF) at Navi Mumbai airport, with a proposal to levy the same fee at both airports, sources said.

**DECISION ON UDF**

The government is yet to take a decision on a uniform UDF. Pending a decision, a proposal was made to reimburse passengers for the additional UDF through vouchers. Adani Airports stated that shifting flights to Navi Mumbai was necessary to increase capacity.

The current condition of Terminal 1 (T1) at the Mumbai airport was cited as a reason for the shift.

Government sources said another consultative meeting is expected soon to take forward the discussions on the proposed transition and the concerns raised by airlines.

However, according to industry insiders, the Ministry has asked the airlines and the airport operator to submit a firm transition plan by October 20 for shifting operations to Navi Mumbai International Airport (NMIA). They said the Ministry proposed delaying the transition by a few weeks.

**NEXT MEETING**

The next consultation will be held on October 13 to firm up the plan for shifting operations from the Mumbai airport to Navi Mumbai. Another meeting will be held by October 20.

The meeting discussed the phased redevelopment of Terminal 1 at Mumbai's Chhatrapati Shivaji Maharaj International Airport (CSMIA) and the associated transition of airline operations to Navi Mumbai airport.

Additionally, Adani Airports outlined its preparedness to handle up to five million international passengers annually at Navi Mumbai, highlighting the airport connectivity, in-flight catering facilities, hotels, lounges and other support services.

# GST Council to review compliance measures, no big rate revision likely

**Shishir Sinha**
New Delhi

The GST Council will meet on Thursday to deliberate on five key reform areas aimed at easing business compliance spanning registration, returns, refunds and registration cancellation. However, apart from a few minor adjustments, tax rate changes are not on the agenda.

Sources said the focus would be on process reforms, structural reforms, ease of living and doing business, export of services and electronic commerce. On the issue of registration, a source said: "For 61 per cent of the taxpayers, registration is being granted in 3 working days without an officer. For the remaining taxpayers, the process is being streamlined to avoid unnecessary queries and avoid rejections."

**REFUND PROCESS**

Similarly, in case of a refund, the claim is to be acknowledged in 10 days, failing which it would be deemed acknowledged. Ninety per cent is to be released on a risk check, rising to the full amount, the source added. On closing a business, sources said once someone applies for cancellation of registration and if there is no liability or return due, it will be cancelled immediately and automatically. "A registration suspended for a procedural lapse is to restore itself (without officer intervention) once the lapse is made good," the source said.

**TAX CREDIT ISSUE**

On the issue of tax credit, the first source said: "A buyer who holds the invoice, has received the goods and has paid his supplier in full, including the tax, should keep his credit. It should not depend on whether someone further up the chain has paid." Further, refunds are proposed to be widened to the tax paid on services and on plant and machinery.

On the issue of arrest, the second source clarified that the proposal does not remove the arrest provision completely under GST law. "The proposal states that it [the power] should not be with tax collectors. Arrest should be only after criminality is proven and by a law enforcement officer," the source said.

Sources said rate changes are to be taken up once a year and take effect from April 1. The forthcoming meeting will take up a limited set of issues for rationalisation and to remove ambiguity.

Faceless assessment **p3**

Focus areas

| | |
|---|---|
| **Process reforms** | Easier and faster registration for all, invoice matching to curb mismatches, faster refunds, a common standard for notices, hearings and orders, and no notice at all below a threshold |
| **Structural reforms** | No ITC blocking for genuine taxpayers, refund to be widened to the tax paid on services and on plant and machinery |
| **Ease of living & doing business** | Easier cancellation, concept note on just one return filing in a year for certain small taxpayers |
| **Export of services** | Testing, repair, certification & research done in India for overseas client to be treated as export, billing by overseas branch for foreign client to be treated as export |
| **Electronic commerce** | Easier registration for small sellers on e-commerce platforms, simplified tax treatment for GST used by e-commerce companies |
| **Decriminalisation of offences** | Arrest power not for tax collectors, court to decide |

Rate changes in future are to be taken up once a year, to be effective from April 1

It's not just about building successful businesses.

# Sir Dorabji Tata Trust defends Tata Sons' restructuring plan

**WAR OF WORDS.** Backs Noel Tata; calls out fellow trustees Venu Srinivasan, Vijay Singh

**Aneesh Phadnis**
Mumbai

**THE LISTING ROW**

- SDTT is the largest shareholder in Tata Sons, with a 27.98 per cent stake
- Two trustees, Venu Srinivasan and Vijay Singh, raised concerns about Tata Sons' restructuring
- Trustees, led by Noel Tata, hit back and defended the restructuring plan
- They accused Srinivasan and Singh of taking contradictory positions

> Your letter suggests that the RBI's communication has overtaken the decisions of 2025. It has not
>
> **NOEL TATA, NEVILLE TATA, DARIUS KHAMBATA AND BHASKAR BHAT TO SINGH AND SRINIVASAN**

The Sir Dorabji Tata Trust (SDTT) has thrown its weight behind Noel Tata amid a rift with fellow trustees Venu Srinivasan and Vijay Singh over the proposed restructuring of Tata Sons and issues related to a potential listing of the holding company.

Srinivasan and Singh have filed complaints with the Charity Commissioner of Maharashtra (CCM) and raised concerns over the restructuring proposal following the Reserve Bank of India's September 11 decision to retain Tata Sons in the NBFC-UL category.

**STRONG MESSAGE**

"Your letter suggests that the RBI's communication has overtaken the decisions of 2025. It has not," Noel Tata, his son Neville Tata, and fellow trustees Darius Khambata and Bhaskar Bhat wrote to Singh and Srinivasan in a letter dated Sunday.

"The communication declined Tata Sons' application to surrender its registration. It does not mention listing, prescribe any particular step, or state that Tata Sons is in breach of any requirement. What it does is make it urgent to find a lawful course, other than listing, by which the settled objective of the Trusts and of Tata Sons can be achieved," the letter said.

On September 28, the Tata Trusts proposed the merger of Tata Consulting Engineers and Tata Electronics Systems Solutions Pvt Ltd with Tata Sons, a move aimed at keeping the holding company private and avoiding a public listing.

Srinivasan and Singh had argued that it was inappropriate for Tata Trusts to ask the Tata Sons board to consider and approve the proposal. SDTT, however, disputed this contention.

"The views of the shareholders (Tata Trusts), who hold about 66 per cent of Tata Sons, do not constitute an intrusion into the board's decision-making process," they said.

**'INCONSISTENT'**

The SDTT also rejected allegation that the merger proposal mooted by Tata Trusts puts its charitable status at risk. Further, the trust accused Srinivasan and Singh of adopting contradictory positions.

In their letter, the two trustees said they were kept in the dark about the restructuring proposal and argued that the Trust should act only after deliberations in formal meetings. In response, SDTT said: "Your letter, which insists on collective deliberation, does not mention you already asked [CCM] to prevent the trustees from meeting at all."

The trust said this stance was inconsistent with their stated demand for greater consultation and collective decision-making.

# Public banks lag in rate-cut transmission this easing cycle

**Sourashis Banerjee**
Chennai

As the monetary policy committee announces its rate decision on Wednesday, all eyes will be on the quantum of repo rate movement. But the RBI's rate action can be effective only if the commercial banks pass on the rate change through their deposit and lending rates.

**DATA FOCUS.**

RBI's current easing cycle has seen significantly weaker transmission than the previous one. Between February 2025 and July 2026, while the repo rate was cut by 125 basis points (bps), the transmission has been poor in both deposit and lending rates. It's been weaker in public sector banks compared with private sector banks.

**TRANSMISSION LAGS**

In the current cycle, against the 125-bps repo-rate reduction, the weighted average lending rate (WALR) on fresh rupee loans fell by 81 bps and WALR on outstanding rupee loans fell by 90 bps. Interest rates on one-year marginal cost of funds-based lending rate (MCLR) saw a much lower decline of 40 bps while the entire rate cut was passed on in the external benchmark linked loans.

Deposit rate transmission has also been muted this cycle. Fresh term-deposit rates declined by 72 bps, while outstanding term-deposit rates fell by only 51 bps.

During the previous easing cycle between February 2019 and April 2022, the WALR of scheduled commercial banks (SCBs) on fresh rupee loans declined by about 229 bps against a repo rate reduction of 250 bps. The median one-year MCLR, however, fell by only 155 bps. Transmission was also good in deposit rates in the previous cycle.

The lower transmission in this cycle is due to the strong growth in bank credit intensifying the competition for deposits. This made interest rates on deposits sticky, affecting the MCLR. Tighter liquidity due to RBI's forex interventions and variable reverse repo rate (VRRR) auctions also kept market rates high, impacting transmission to bank lending and deposit rates.

**PUBLIC BANKS TRAIL**

Public sector banks have been slower than their private and foreign counterparts to transmit the current rate cuts to borrowers in the current rate-cutting cycle. For fresh rupee loans, their WALR declined by only 61 bps during February 2025-July 2026, compared with 111 bps at private banks and 125 bps at foreign banks.

The slower pass-through at public banks could reflect the need to protect lending margins while balancing competition for deposits.

## Policy rate transmission

**Transmission of rate cuts lagged in both deposits and loans in the present cycle**

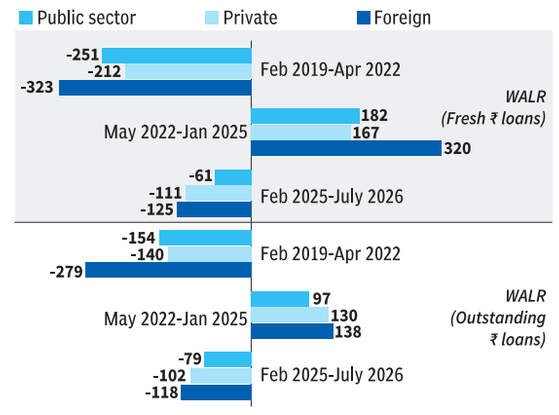

*Transmission to banks' deposit and lending rates (basis points)*

| Repo | Term deposit rates | | Lending rates | | | |
|---|---|---|---|---|---|---|
| | WADTDR-Fresh Deposits | WADTDR-Outstanding Deposits | EBLR | 1-Year MCLR (Median) | WALR - Fresh Rupee Loans | WALR-Outstanding Rupee Loans |
| -250 | -259 | -187 | -250 | -155 | -229 | -150 |
| 250 | 259 | 206 | 250 | 175 | 182 | 115 |
| -125 | -72 | -51 | -125 | -40 | -81 | -90 |

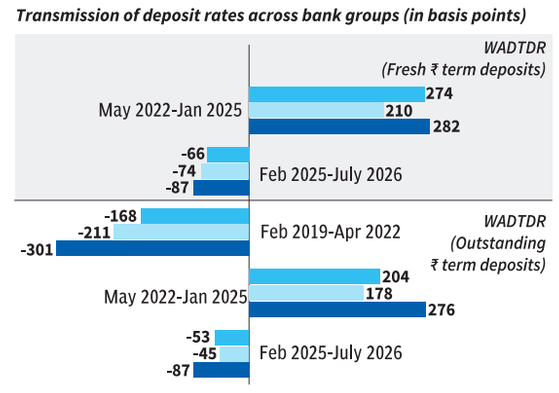

Easing phase Feb 2019 to Apr 2022 | Tightening cycle May 2022 to Jan 2025 | Easing cycle Feb 2025 to Jul 2026

# Steady demand despite a volatile quarter, say FMCG cos

**Meenakshi Verma Ambwani**
New Delhi

Leading FMCG players witnessed steady demand despite a volatile operating environment in the September quarter. Companies such as Dabur India, AWL Agri Business and Marico have indicated that they expect to post a double-digit revenue growth in the quarter under review.

**REVENUE OUTLOOK**

At a consolidated level, Dabur expects to record double-digit revenue growth while demand conditions remained "steady" in Q2, it said on Tuesday. This, despite a volatile operating environment marked by renewed geopolitical tensions in West Asia, persistent inflationary pressures across various commodities and deficit rainfall. Profit after tax is expected to continue to grow at a double-digit level, it added.

"The India FMCG business sustained its growth momentum and is expected to accelerate to double-digit growth, marking its strongest performance in recent quarters," Dabur stated. It also pointed out that general trade distribution continued to grow across urban and rural markets with rural continuing to outpace urban growth.

"The International Business, despite severe headwinds in the Middle East, is expected to post high-teens growth in INR terms, with key markets like Egypt, Turkey, USA, Bangladesh and UK, each recording strong double-digit growth in INR terms," Dabur added.

**RESILIENT DEMAND**

In its quarterly update for Q2, AWL Agri Business Ltd, known for its Fortune brand, said it delivered 12 per cent y-o-y volume growth and 24 per cent y-o-y revenue growth. "Food and FMCG [portfolio] delivered 33 per cent y-o-y revenue growth during the quarter, driven by broad-based growth across categories. The segment crossed ₹2,000 crore of quarterly revenue for the first time, marking its highest-ever quarterly revenue," it noted.

On Monday, Marico said it expects a double-digit growth in consolidated revenue in Q2 and its operating profit could grow "in the mid-twenties". "Domestic demand remained resilient during the quarter, even as the operating environment stayed volatile. The India business continued its strong momentum, delivering another robust quarter with underlying volume growth touching double digits," the company added.

Meanwhile, Godrej Consumer Products said at a consolidated level it expects "to deliver another quarter of strong performance, with high-teens revenue growth, high-single-digit underlying volume growth and double-digit EBITDA growth".

# Jaypee Infratech failed to keep up with deadline: NCLT panel

**Ankita Upadhyay**
New Delhi

A fact-finding committee appointed by the National Company Law Tribunal (NCLT) has concluded that Jaypee Infratech Ltd (JIL), taken over by a consortium led by Suraksha Realty Ltd under an approved resolution plan, failed to complete projects within the promised timelines, leaving thousands of homebuyers waiting for possession.

The two-member committee, comprising former NCLT members Prasanta Kumar Mohanty and Deepti Mukesh, submitted its final report on August 20, covering the progress of all 19 JIL projects as of June 30, 2026.

It found that homebuyers' grievances over construction delays and non-delivery were "correct and genuine" and urged the NCLT to take "urgent cognisance" of the lapses and issue appropriate compliance directions.

The NCLT had approved the resolution plan in March 2023.

The committee identified inadequate labour deployment as one of the principal reasons for the delays.

It also questioned the departure of Suraksha Realty, leaving Lakshdeep Investments and Finance Pvt Lt to carry out the plan.

# Cars, two-wheelers see best-ever September retail sales

**S Ronendra Singh**
New Delhi

Retail sales of both passenger vehicles (PVs) and two-wheelers recorded the best-ever September, growing 33 per cent and 32 per cent, respectively on a y-o-y basis, the Federation of Automobile Dealers Association (FADA) said on Tuesday.

PV retail sales grew to 4,27,213 units during the month compared with 3,23,391 units in September 2025. Similarly, two-wheeler sales grew to 17,90,188 units last month as against 13,45,153 units in the corresponding month of 2025.

Three-wheeler retail sales also grew 22 per cent y-o-y to 1,32,570 units in September as compared with 1,08,444 units in September last year.

## Break-out month

*Retail sales in September (in units)*

| Category | Sep 2025 | Sep 2026 | y-o-y growth (in %) | Remark |
|---|---|---|---|---|
| Passenger Vehicles | 3,23,391 | 4,27,213 | 32.1 | *Best-ever September* |
| Two-wheelers | 13,45,153 | 17,90,188 | 33.08 | *Best-ever September; 15% above 2018 peak* |
| Commercial Vehicles | 75,246 | 1,03,557 | 37.62 | *First-ever September with sales above 1 lakh* |
| Three-wheelers | 1,08,444 | 1,32,570 | 22.25 | *Best-ever September; ₹65% electric* |
| Tractors | 67,612 | 76,906 | 13.75 | *Soft: late festive + patchy monsoon* |

Source: FADA Research

Commercial vehicles, meanwhile, crossed the one-lakh mark for the first time, growing by around 38 per cent y-o-y to 1,03,557 units during the month, showed FADA data. Overall, vehicles sales across categories grew by 32 per cent y-o-y to 25,36,920 units in September.

"Dealers expect October to deliver the festival pick-up that September deferred. With Navratri (October 11-20) and Dussehra, demand held back during Pitru Paksha should convert into a concentrated burst of deliveries from mid-month, even if the first 10 days stay quiet," said Sai Giridhar, President, FADA.

"Booking pipelines are already building for 63 per cent of dealers. Importantly, with the GST 2.0 anniversary now behind us, October will be the first month to offer a clean, like-for-like y-o-y comparison." He said the October to December period sits in the window of the festival season, followed by the wedding season and year-end buying.

"FADA would, however, read the quarter for what it is. October-December 2025 was the first full quarter after GST 2.0 and absorbed considerable pent-up demand, so the quarter's real signal will be festival conversion in the showroom. The decisive variable is affordability: a substantial part of the GST 2.0 benefit still sits with the consumer, but successive input cost-led price increases are narrowing that cushion, and dealers rightly flag this as their top risk," said Giridhar.

**CAUTIOUS OPTIMISM**

Besides, manufacturer dispatch discipline matters, with PV inventory already at 43-45 days. The structural anchors remain supportive — rural consumption, infrastructure-led goods movement, a strong launch calendar and steadily deepening electrification — each a thread of the broader India growth story, he noted.

"Overall, the next three months appear cautiously optimistic — strong festival expectations tempered by a demanding base, with festive conversion, affordability and inventory discipline the key monitorables," he added.

## One in eight vehicles sold in India is now electric

**Amit Vijay Mohile**
Mumbai

One in every eight vehicles registered in India in September was electric, with EV registrations touching an all-time monthly high.

EVs accounted for about 13 per cent of the overall 25.37 lakh registrations during the month, according to FADA data.

Two-wheelers supplied more than 60 per cent of EV volumes; electric car registrations nearly doubled from a year earlier, while three-wheelers remained the most electrified category, with nearly two in every three registrations electric.

**PROVIDING SCALE**

Electric two-wheeler penetration rose to 11.58 per cent in September from 8.17 per cent a year earlier, as registrations nearly doubled to about 2.07 lakh, an analysis of FADA's category-wise registrations and fuel-mix data shows.

That makes two-wheelers the principal volume engine of India's EV market. More than six of every 10 EVs registered in September were two-wheelers. Overall two-wheeler registrations rose 33.08 per cent year-on-year to 17.9 lakh.

Three-wheelers' EV share increased to 64.90 per cent from 56.65 per cent a year earlier.

**ELECTRIC CARS**

Passenger vehicles are emerging as another significant leg of the transition. EV penetration increased to 8.45 per cent from 5.74 per cent a year earlier. That translates into approximately 36,100 electric cars and SUVs registered in September, nearly double the 18,600 a year earlier.

Electric PV volumes, therefore, grew substantially faster than the overall PV market, where registrations increased 32.1 per cent year-on-year to 4.27 lakh.

The transition in cars is broader than battery electric vehicles. Hybrids' penetration in PVs increased to 9.44 per cent in September 2026 from 7.3 per cent in September 2025, while the share of CNG/LPG vehicles rose to 23.11 per cent from 22.02 per cent over the same period.

Commercial vehicles are also beginning to electrify, with EV penetration doubling, but the larger volume shift is occurring in personal mobility.

For two-wheelers, crossing the 10 per cent penetration is significant because of the category's scale. Combined with the near-doubling of electric car registrations, September's numbers suggest India's EV transition is moving beyond electrified three-wheelers and deeper into the much larger personal-mobility market.

## Trucks, tractors power H1 growth

**Amit Vijay Mohile**
Mumbai

Truck and tractor markets have grown by nearly a fifth in the first half of FY27, signalling strength across freight and farm-linked demand. But September has revealed a widening split in momentum.

CV registrations rose 21.48 per cent during April-September to 5,85,217 units, while tractors increased 19.81 per cent to 5,56,862, according to FADA data. The two categories entered September with remarkably similar first-half growth rates before moving in sharply different directions.

"CVs maintained robust momentum," said FADA President Sai Giridhar, attributing the strength to replacement demand, infrastructure and mining activity, and bulk fleet purchases for steel and cement movement, alongside higher rural incomes and purchases ahead of expected price increases.

The acceleration was strongest among heavy CVs whose registrations surged 46.22 per cent y-o-y to 32,310 units in September. Light CVs rose 34.13 per cent y-o-y, while medium CVs increased 33.96 per cent.

Electrification is also beginning to make inroads into commercial transport, with EVs accounting for 4.04 per cent of September CV registrations, nearly double their 2.16 per cent share a year earlier.

**MOMENTUM LOST**

Tractors moved differently. September registrations remained 13.75 per cent higher y-o-y at 76,906 units but fell 12.58 per cent from August, contrasting with their 19.81 per cent growth through H1.

Giridhar attributed the sequential decline to "patchy monsoon conditions and the later festive calendar".

# Lower demand, high costs to hurt cement firms' profits

**LOOKING AHEAD.** Experts say the outlook for the December quarter seems relatively favourable, with a recovery in demand

**Suresh P Iyengar**
Mumbai

Cement companies' profits are expected to come under pressure in the September quarter owing to high costs and lower realisation. That said, weak demand prevented leading companies from passing on the higher cost to consumers.

The slowdown in construction activities and real estate projects due to the South-West monsoon in major markets also impacted cement demand.

**BETTER Q3**

Cement companies' profitability will remain under pressure in the September quarter due to elevated fuel, power and freight costs, coupled with limited pricing pass-through, said Vincent KA, Senior Research Analyst, Geojit Investments.

But the outlook for the December quarter, he said, appears relatively favourable, with demand expected to recover, supported by a resumption in construction activity, and recovery in real estate launches towards the end of the September quarter. This, even as power and fuel expenses are expected to remain elevated amid the volatility in global energy markets.

Cement sales volume should grow 7-8 per cent, but Rajesh Singla, CEO and Fund Manager, Alpha AMC. But margins are squeezed with the EBITDA expected to fall by about 15 per cent y-o-y as prices were flat while cost increased by ₹80-150 per tonne.

**SLOW IMPROVEMENT**

Ashutosh Murarka, Cement Analyst, Choice Institutional Equities, said the demand will improve gradually post-monsoon, but it may remain uneven given slower real estate activity and delays in few construction projects. "Infrastructure-led demand should remain relatively supportive, but a sharp volume acceleration looks unlikely in the near term. We therefore remain watchful on pricing discipline, especially with incremental capacity coming on stream."

Monjit Gogoi, Founder, AlphaVERSE, said the bigger issue in the sector was the recovery in volumes without much pricing power in the hands of cement companies. With elevated power, fuel and freight cost, cement makers may try to raise prices, but passing on the entire increase could be difficult in a soft market, he added.

"The Q3 performance depends on how much cost increase cement companies can pass on rather than how much they can sell," he added.

# Centre plans faceless assessment for GST payers

**TECH-DRIVEN.** The scheme will begin with assessees under Central formulations

**Shishir Sinha**
New Delhi

The Finance Ministry is launching a faceless GST assessment system, initially targeting taxpayers under Central formulations. Industry experts anticipate significant benefits for multi-State enterprises, exporters and large manufacturers.

"We plan to introduce a faceless assessment scheme in a few months under the GST. Initially, we would like to bring assessees under Central formations under the scheme. Later, it could be offered to the States as optional," a top government official said here on Tuesday.

A faceless assessment scheme is already in place for Income Tax and Customs Duty assessees.

**ENHANCING EFFICIENCY.** As on date, there are over 1.7 crore registered assessees under GST

**OPTIMAL UTILISATION**

Such a scheme eliminates the person-to-person interface between the taxpayer and the department to the extent technologically feasible and provides for optimal utilisation of resources and a team-based assessment with dynamic jurisdiction.

As on date, there are over 1.7 crore registered assessees under GST, of which over 73.5 lakh are under Central formulations, while over 97 lakh are under the States and UT (with legislatures).

The division of assessees between the Centre and the States is decided based on the turnover of the assessees on a proportionate basis. The assessees having turnover above ₹1.5 crore are to be assigned in the ratio of 50:50 between the Centre and the respective State while those having turnover less than ₹1.5 crore have to be assigned in the ratio of 10:90 between the Centre and the respective State.

Harpeet Singh, Partner at Deloitte, said if implemented thoughtfully, faceless assessment could mark the next phase of the GST's digital evolution, balancing administrative efficiency with ease of doing business and fostering a more trust-based tax ecosystem. "For businesses, particularly those operating across multiple States, a faceless regime could lead to more objective decision-making, reduced compliance disruptions and better predictability in tax outcomes," he said.

Some experts advocated phase-wise implementation. "The implementation should start with routine scrutiny and smaller demands and gradually expand once the system has demonstrated its effectiveness," said Brijesh Kothary, Partner at Khaitan & Co. For taxpayers, the biggest gain is reduced dependence on and interaction with any single officer.

"When cases are allotted at random and every notice, reply and hearing is recorded online, there is far less room for arbitrariness and unnecessary interface," he said, adding that exporters, e-commerce operators and large manufacturers stand to gain the most. "Combined with single-window registration and faster risk-based refunds, it could shift GST disputes from the discretion of the individual officer to the evidence, which is where they belong," Kothari said.

Experts also advised leveraging key learnings and best practices from the implementation of faceless assessments in Income Tax and Customs.

**MOST EFFECTIVE**

"A GST faceless assessment regime may be most effective if it is designed from inception with robust taxpayer safeguards. These may include adequate and reasonable response timelines before any adverse order is passed, a statutory right to seek personal hearings through video conferencing wherever material additions or adverse views are proposed, and online availability of video hearing recordings to maintain complete transparency and an auditable record of proceedings," Vivek Jalan, Partner at Tax Connect, said.

# Cabinet approves ₹10,000-crore SME growth fund

**S Ronendra Singh**
New Delhi

The Cabinet on Tuesday approved ₹10,000 crore towards the establishment of the SME Growth Fund (SGF) aimed at catalysing growth-orientated capital for India's small and medium enterprises (SMEs).

These are across manufacturing, services, technology, innovation-driven sectors, and strategic value chains as per Budget 2026-27. This was part of the holistic set of announcements that were made in the Budget, focussing on providing equity, liquidity and professional support for the MSME ecosystem as a whole.

Ashwini Vaishnaw, Minister for Electronics and Information Technology

There are existing funds which provide equity support, but the majority of them focus on early-stage enterprises and cover majorly microenterprises. A structural gap exists for equity growth capital for SMEs, Ashwini Vaishnaw, Minister for Electronics and Information Technology, said. He said SMEs constitute the backbone of the Indian economy, contributing significantly to employment generation, exports, manufacturing output and innovation. While various initiatives had enhanced access to credit for SMEs, a gap remained in the availability of long-term risk capital required by enterprises seeking to scale, expand internationally, adopt advanced technologies, undertake acquisitions and transform into industry leaders.

"The SGF is designed to address this critical financing gap by providing patient growth equity capital to high-potential SMEs with demonstrated business viability and scalability," he said.

The fund is envisioned as a transformational instrument to support enterprises at critical inflection points in their growth journey. Majority allocation from the SGF will be towards small and medium manufacturing-focused enterprises. The fund will also consider SMEs operating in industrial clusters in tier-II and -III cities.

The initiative will enable SMEs to scale operations, invest in technology and manufacturing capacity, expand into international markets, integrate into global value chains and undertake strategic investments.

# Cabinet clears Integrated Transport & Logistics Authority

**Our Bureau**
New Delhi

The Union Cabinet on Tuesday approved the setting up of a special purpose vehicle (SPV), Integrated Transport & Logistics Authority (ITLA), to strengthen research, planning, appraisal, monitoring and impact assessment of transportation and logistics.

"The approval seeks to address the long-standing challenges arising from fragmented planning and implementation across multiple transport-related Ministries and agencies," per a government statement.

A long-term transport plan covering roads, railways, ports and shipping, civil aviation, inland waterways, coastal shipping, urban mobility and logistics, will be prepared by the ITLA, Union Minister Ashwini Vaishnaw said at a media briefing following the Cabinet meeting.

The ITLA is expected to enhance the sustainability and effectiveness of transport infrastructure development in India by fostering greater coordination and multi-modal integration.

It will evaluate short-term sectoral plans (five years or so) and annual plans of the transport ministries to ensure consistency and alignment with the National Transport Master Plan and promote multi-modal infrastructure development.

ITLA will also build a National Transport Data Repository, integrating datasets including GSTN e-way bills, FASTag, Vahan, GPS and urban traffic systems for freight-flow and origin-destination analytics.

# Boost for renewables

*Govt rightly lays emphasis on grid capacity, storage*

**The ₹1.86 lakh crore Green Energy Corridor-III scheme, approved by the Cabinet on September 30, addresses a crying need of the hour — a robust power transmission infrastructure. The focus in the renewable energy industry has shifted from adding capacities to evacuation transmission systems that move energy from generation to consumption centres; within this, the GEC-III seeks to fill two critical gaps — intra-State evacuation infrastructure and more energy storage.**

The latter is urgently needed to avoid curtailing cheap, green solar power. The problem is not simply that solar power is generated when demand is low. Transmission congestion and the grid's limited flexibility also lead to curtailment. Storage can help by shifting surplus solar power to hours when it is needed. About 73 per cent of the proposed outlay goes to buttress intra-State transmission; the other 27 per cent to build 50 GWhr of Battery Energy Storage system (BESS) capacity. The Central government chips in with ₹54,082 crore for financial assistance. The rest will, presumably, have to come from the States, which are responsible for implementing the scheme, and lenders. The precise mix has not been spelt out.

The GEC-III is refreshingly different from its predecessors in many ways. First, it is large in outlay, scope and geographical coverage. GEC-I, approved in 2015 with an outlay of ₹10,142 crore, was designed for an evacuation ambition of 24 GW of renewable energy. The ₹12,031 crore GEC-II, unveiled in January 2022, was meant to evacuate 20 GW of green power. More than eight times bigger than the two put together, GEC-III wants to build, or strengthen existing transmission capacities for moving 135 GW of green energy.

Second, while the first two were designed for transmission lines and substations, GEC-III brings in storage for the first time in a GEC scheme, if one excludes the storage component in GEC-I meant specifically for Ladakh. There is, however, no specific Central allocation for storage. This is a trifle surprising because the high cost of BESS, despite recent declines, remains a barrier to its deployment at scale.

Third, while GEC I and II covered eight and seven RE-rich States, GEC-III is more widespread, taking under its wing 13 States and Union Territories. Implicit in this is the recognition that renewable energy development is spreading to more States, such as Odisha and Assam, not covered by the earlier schemes, and that their intra-State transmission networks need support. Fourth, GEC-III makes way for two procurement routes, allowing both bidding-based (for greenfield projects) and cost-plus-based (for brownfield projects). This distinction was absent in the earlier two GEC programmes. This can help in the faster implementation of brownfield projects. Finally, without being explicit, GEC-III seems to set a new target of 900 GW of installed non-fossil fuel-based energy capacity for 2035, higher than the CEA's target.

# The faultlines in GDP growth

**TIME TO BUCKLE UP.** Constraints in manufacturing, real estate, employment, private investment and consumption expenditure call for a fresh policy rethink

MC SINGHI

The Indian economy after the pandemic has so far maintained a sustained growth of over 7 per cent at constant prices, and has continued to be among the fastest-growing large economies. The growth has largely been driven by domestic consumption and key infrastructure support from government capital expenditure. There have, however, been concerns around the sustainability of this growth over the next five years due to global uncertainties and domestic turnaround of the developments in employment, investment and productivity segments. There are some emerging faultlines, which suggest that interventions different from the current approach are necessary.

Overall GDP growth in 2022-2026 (after the rebasing of GDP series to 2022-23) averaged 7.3 per cent, with a significant contribution (58 per cent) from manufacturing, trade and transport, financial, real estate and professional services. However, these sectors had a share in employment of just 31 per cent. The manufacturing sector had the most robust growth with the lowest Incremental Capital Output Ratio (ICOR) of 3.2 against an average ICOR of 4.5 during this period. In the current year, the growth is expected to remain in the same range. More important, however, is to look at these five emerging constraints.

## EMERGING CONSTRAINTS

First, while the manufacturing sector has performed extremely well in last three years, are there problems in the MSME sector. In 2025, this sector, while employing nearly 50 per cent of the total persons engaged in manufacturing, accounted for just 13 per cent of the total value added. This sector recorded a growth of 8.5 per cent in 2025, significantly lower than overall manufacturing. Further, the value added per MSME worker at ₹9,856/month was even lower than the minimum wages prescribed. Per worker emoluments and value added recorded only a growth of

**The cost of funds has been high. The spread of 10-year par yield and repo rate has increased from just 40 basis points** in October 2025 to 130 basis points in March 2026. Geopolitical uncertainty has impacted investment sentiment

Some characteristics of macro economy

| | GDP Growth | Contribution to growth | Share in GDP | Share in GCF Per cent | Ratio of GCF/ GVA | ICOR | Share in employment |
|---|---|---|---|---|---|---|---|
| | 2022-2026 in per cent | | | 2022-2025 | | | |
| Agriculture & allied | 3.08 | 7.37 | 17.35 | 5.85 | 11.5 | 3.74 | 44.93 |
| Mining & quarrying | 5.97 | 1.57 | 1.82 | 1.51 | 27.98 | 4.69 | 0.27 |
| Manufacturing | 11.17 | 21.2 | 13.32 | 12.93 | 35.32 | 3.16 | 11.67 |
| Electricity & utilities | 4.94 | 1.5 | 2.43 | 6.71 | 81.18 | 16.42 | 0.58 |
| Construction | 8.09 | 9.03 | 7.81 | 6.92 | 30.83 | 3.81 | 12.33 |
| Trade & transport | 8.94 | 15.57 | 12.71 | 18.27 | 46.44 | 5.2 | 18.05 |
| Financial & Prof. services | 8.44 | 26.96 | 23.64 | 30.94 | 43.32 | 5.14 | 2.99 |
| Other services | 5.89 | 9.26 | 11.74 | 16.88 | 46.29 | 7.86 | 9.17 |
| GVA | 7.4 | 92.44 | 90.81 | 100 | 36.36 | 4.91 | |
| Private consumption | 6.41 | 49.81 | 56.69 | | | | |
| Fixed capital formation | 6.91 | 30.58 | 31.87 | | | | |
| GDP | 7.29 | 100 | 100 | | 33.02 | 4.53 | |

Note: Share in employment is an average of PLFS 2022-23, 2023-24 and 2025 employment

4.4 per cent and 4.8 per cent, respectively, in real terms, which is not very encouraging. Persons in this sector are vulnerable and work for subsistence rather than as entrepreneurs.

Second, the real estate sector, on which the construction sector growth and employment are critically dependent, has been facing affordability challenges, unsold inventories and lack of liquidity and financing challenges.

Developers, particularly in Tier 3 cities and rural households, are facing problems of availability of land at reasonable prices, shrinking demand and project delays. Complex land acquisition and land titles result in shanty towns and unauthorised colonies. The real estate sector is witnessing a big shake-up and a major segment of demand faces uncertain future.

Third is unemployment and underemployment. Though overall unemployment rate in 2025 was only 3.1 per cent, nearly 30 per cent of the youth fell in the category of those neither employed, nor in education, and nor in training (NEET). The NEET crisis spotlights a significant missed opportunity for society. This is untapped potential that could drive innovation, economic growth and social progress. Failing to integrate them results in about 15 per cent of income forgone (based on average informal sector income).

Fourth is the issue of stagnating private investment. Data from the NSSO on private sector estimate capital expenditure intentions in 2025-26 are estimated at ₹1143,879 crore. Based on the responses received, the aggregated capex for 2026-27 is estimated at ₹955,281 crore. The NSSO survey clearly indicates hesitation on the part of private investors. Sectoral data on credit by the RBI also indicate that growth in credit disbursement to large industries at 5.4 per cent is less than half of the overall credit growth. The cost of funds has also been high. The spread of 10-year par yield and repo rate has increased from just 40 basis points in October 2025 to 130 basis points in March 2026. Geopolitical uncertainty has further impacted investment sentiment. Further, NAS data indicate average gap in imports and exports during 2022-26 at 1.91 per cent, which sets a ceiling on overall capital transfers. This gap of around 2.5 per cent is sustainable, creating space for capital flows for growth.

Fifth and foremost is the lopsided development of private consumption expenditure. Two issues are related to private consumption: first per capita consumption in rural areas is just 58 per cent of per capita consumption in urban areas; second, the limitation due to a restricted basket. The data of National Accounts indicate that non-durables goods and services account for 88 per cent of total consumption, half of which are low-value services. The consumption of durables and semi-durable goods, which are income-elastic, accounts for just 12 per cent of consumption.

## DOMESTIC PRESSURES

Further, geopolitical shifts, emerging trade restrictions, interest rate increases and pressures on global commodity prices for fuel and metals will have varying domestic impacts. Trade restrictions may require identifying new sources of supply and demand and the economy would need to calibrate these appropriately.

The constraints occur from different perspectives, both structural and systemic, and call for multi-pronged strategy not based on freebies, but by reinventing our mindset itself, both for the government and the real executors.

The writer is former Senior Economic Adviser, Ministry of Finance. Views are personal

# Jeffrey Archer — mightier than the sword

A tribute to the self-confessed Indophile who kept generations hooked on to his books with its twists and turns

NS Vageesh

One of the privileges of being a journalist is meeting celebrities in the course of a day's work. A dream gets fulfilled when one meets an icon, especially an author who kept you riveted at an impressionable age.

That fanboy moment came for me when I got a chance to meet Jeffrey Archer, the globally recognised best-selling novelist, along with a senior colleague, on behalf of this paper two decades ago. Archer had then come to India on a book promotion tour.

## ROCKSTAR RECEPTION

He admitted to being taken aback by the rockstar reception he received, mobbed as he was at various book stores across the country. He had gone viral in the pre-social media era. He remarked, a trifle wistfully, that if he had realised the extent of his following he would have come to India much earlier and more often. After two decades, a few highlights from that meeting stand out in my memory. He called himself an average writer, but a very good story teller. What was the difference, I wondered, assuming that good writing and storytelling were synonymous. He explained that his endeavour was to tell a good story and keep his audience hooked, on the edge of the seat, as it were. And added with a twinkle in his eye: "After you have read a few of my books, you think you know where the plot is going. And that's my challenge. I try to surprise you with a twist!"

The effort involved in crafting those narratives was painstaking. Figuratively. And literally. Archer did not type his work. He wrote laboriously by hand. And as he explained, many of his works went through over a dozen drafts. Imagine the effort it would have taken to write whole pages again and again. Without the easy cut and paste function of a laptop. Or for that matter the readymade stories of today's artificial intelligence.

## WRITING IS REALLY REWRITING

In that simpler era, he was quietly exemplifying the maxim that writing is really rewriting. When I asked a bit gingerly if he ever encountered a writer's block, his response was a withering look and an exposition of his work ethic and discipline.

**JEFFREY ARCHER.** A memorable character who will live on

He got to his work desk at 6 am and worked in two-hour stretches followed by two-hour breaks. That's a staggering eight hours writing and thousands of words every day. Success didn't come easy. Nor did he rest on his laurels, maintaining this punishing schedule throughout his five-decade writing career.

## TRUE INDOPHILE

Archer was a self-confessed Indophile, greatly charmed by Bollywood, cricket, especially Sehwag and Sachin Tendulkar, and authors such as RK Narayan. His personal life resembled the arc of some of his characters: a steady rise to the top and a sudden fall from grace after being enmeshed in a scandal, proving that reality can be stranger than fiction. Or follow it with eerie precision.

Still, as his post jail term work showed, there is redemption for every sinner. His recovery, like a phoenix to resume his career as a best-selling novelist, is now the stuff of legend. And proved him to be as resilient as the many memorable characters in his books. For delighting millions of readers across generations, thank you. His end, according to reports, came last night between his writing sessions. An author could not have a more fitting finale. RIP.

The writer is a former journalist who worked with this newspaper

## LETTERS TO EDITOR

Send your letters by email to bleditor@thehindu.co.in or by post to 'Letters to the Editor', The Hindu Business Line, Kasturi Buildings, 859-860, Anna Salai, Chennai 600002.

### Hit the ground running

This is with reference to the editorial 'Underwhelming Show' (Oct 6). The 2026 Asian Games saw India's second-highest medal tally in the history of continental games, finishing with 85 medals, including 21 golds. Indian athletes have set several notable national and personal records in the Games. Vithya Ramraj from Tamil Nadu scripted history by breaking the 42-year-old national record of PT Usha in the 400 metre hurdles. Indian men and women have brought cheers to India by winning both hockey and cricket. With its huge population, the nation could have achieved more in the Games. Lack of funds, inadequate international coaching and low priority for physical education may have contributed to the poor performance. The government must address these problems.

**P Victor Selvaraj**
Palayamkottai, TN

### Save the consumer

The article on analogue paneer (Oct 6) raises an important question about consumer protection. If products made with non-milk ingredients have been recognised under the 'analogue in dairy context' category and sold in the market for years, why has the issue of consumer confusion become a major concern only now? If these products are unsafe, why were they permitted to be manufactured and sold for so long? And if they are not inherently unsafe, is the present concern primarily about misleading consumers who believe they are buying conventional paneer? More importantly, what monitoring and testing were carried out in the past? Consumers deserve clarity, not just a change in regulation after years of consumption.

**Krishna Uppuluri**
Hyderabad

### SIR not convincing

I refer to the news report 'Did SIR Impact TN Assembly Elections?' (Oct 6). The answer to this question cannot be a blunt a no. Streamlining electoral rolls is important in a Parliamentary democracy such as ours. In that sense the Special Intensive Revision (SIR ) is vital and must ensure that all eligible voters are on the list, although exercising franchise is the people's choice. But, the Election Commission of India does not seem to have done the job well. Its team was working for weeks to streamline the electoral rolls, though. The outcome is not convincing. With lakhs of genuine voter names deleted across the country, Indian democracy has gone for a toss. The DMK has every reason to doubt the SIR.

**S Ramakrishnasayee**
Chennai

### Foreign capital concerns

This is with reference to 'Foreign Capital: Need for Diversity, Not Dominance' (Oct 6). India needs foreign investment, but excessive dependence on a few countries or investors can create vulnerabilities during global financial disruptions. A wider and more diversified pool of capital will provide greater stability and strengthen the bargaining power. The priority should, therefore, be to create a predictable policy environment, simplify regulations and ensure that investors have confidence in contracts and taxation. At the same time, domestic savings and long-term institutional capital should be encouraged so that development does not depend excessively on foreign flows. India should welcome foreign capital without allowing it to have disproportionate influence over the nation's critical sectors. Diversity, transparency and stable rules can make foreign investment a lasting source of growth.

# Mule accounts issue

## Banks haven't done enough to deal with it

**Anil Katia**
**Ganga Narayan Rath**

India's escalating wave of cyber-enabled financial frauds has prompted the Supreme Court to intervene with significant interim directions aimed at strengthening the banking system's response to money-mule accounts and digital fraud. The Court has directed the RBI, all States, Union Territories and law enforcement agencies to act in a coordinated manner. In particular, the RBI has been asked to adopt and circulate a Standard Operating Procedure (SOP) prescribing the action to be taken by banks for placing temporary debit holds on amounts or accounts linked to money-mule activity and cyber-enabled fraud.

A "mule account" is simply a bank account or UPI ID used to receive, hold, or move money on someone else's behalf — usually money that has come from fraud or cybercrime. What makes the mule-account problem so hard to root out is that most mules are not career criminals. They are ordinary account-holders, lured through channels, for a small fee, that look entirely unremarkable.

The scale this has reached is striking. India's Cyber Crime Coordination Centre (I4C) had, by early 2026, flagged more than 24.7 lakh such accounts, and 13.3 lakh were frozen through 2025 alone. Reported cyber fraud cases nearly quadrupled between FY23 and FY24, and India lost close to ₹23,000 crore to cyber fraud in 2025. Recovery tells the starker story: a Parliamentary Standing Committee found that only about 10.4 per cent of reported fraud amounts were recovered over 2020-22.

**FRAUD AMOUNTS.** Minuscule portion is only being recovered

### BANKS BEST PLACED

Banks are the parties best placed to prevent this, and the ones who bear the cost when they don't — compensation claims, reputational damage, and the operational burden of freezing and investigating flagged accounts. They already hold the account-opening and KYC relationship needed to warn every customer, at essentially zero marginal cost. Unlike fraud-detection technology, this does not require new infrastructure to build — only the will to use what already exists.

That this did not happen as a matter of ordinary practice, well before any external push, is hard to justify. India spent the last decade deliberately optimising account opening for speed and inclusion — Jan Dhan accounts, video KYC, frictionless UPI onboarding — all genuine achievements. But that same speed was never matched with an equally simple safeguard: telling account-holders, clearly and in their own language, what they are risking if their account is misused.

A short, standardised undertaking-cum-declaration can close this gap. It should explain what a mule account is and describe the kinds of offers used to recruit one — money for "renting" an account, payment for opening a new account and surrendering its credentials, a fee for forwarding on a received payment. It should state that agreeing to any of these is a criminal offence, regardless of whether the account-holder personally committed the underlying fraud. And it should be precise about where liability actually falls: merely receiving an unexplained payment, without any further act, does not by itself make an account-holder liable — liability arises specifically when they permit the money to move further. This undertaking should be executed once at account opening, in vernacular language and rolled out across the existing account base.

The response of RBI has so far been weighted almost entirely towards technology, has been slow to become mandatory, and arrived later than the scale of the problem warranted. MuleHunter.AI, an artificial intelligence tool developed by the RBI Innovation Hub, can reportedly flag around 20,000 suspicious accounts a month. But adoption has been strikingly slow for a tool banks are given free of cost: six banks had implemented it by August 2025, 23 by December 2025, and roughly 26 by mid-2026. It took a Ministry of Home Affairs directive, not an RBI mandate, to set a deadline of December 2026 for universal integration.

Katia is Director, Ducturus Advisory Services; Rath is a former central banker. Views are personal

## THE WIDER ANGLE.

**PARAN BALAKRISHNAN**

REUTERS

Gulf crude is flowing again despite eye-watering tanker costs, while Russia's oil grip on India is slipping

It's the ultimate sellers' market for crude oil. Yet Saudi Arabia's oil giant Aramco has just slashed the flagship crude price for Asian buyers to $5 a barrel below the Dubai/Oman benchmark. This isn't wild generosity on the part of the Saudis. It's effectively a rebate to compensate buyers for the extraordinary costs and risks of getting the oil out of the Gulf.

The *Wall Street Journal* reckons VLCCs, the giant tankers that carry two million barrels of crude, are charging as much as $40 million for a round trip in and out of the Gulf through the Strait of Hormuz. Even crews are cashing in, with Indian and other sailors getting bonuses of up to $25,000, equivalent to a full year's normal salary, for the journey.

But here's the surprise. Despite all the danger and disruption, Gulf oil is flowing again, with shipments at 80 per cent of pre-war levels thanks to US naval protection and strikes that knocked out Iranian radar and communications along the waterway.

Around three million barrels a day (bpd) from Middle Eastern producers reached India in September, with Saudi Arabia, Iraq and Kuwait once again supplying large quantities. That's pushed total crude imports to 5.3 million bpd, the highest this year and broadly back to pre-war levels. The Gulf producers, India's main suppliers before cheap Russian oil flooded the market following the Ukraine invasion, are suddenly back in business.

So where does that leave Russia, whose oil helped keep India humming through the worst months of the Hormuz crisis? In June and July, Russia supplied roughly half of India's crude, with purchases peaking at 2.65 million bpd in July. By September, Russian imports dropped to 1.75 million bpd, their lowest since April.

Part of the explanation is there was simply more Middle Eastern oil available. "Middle East barrels regained share as availability and logistics improved," says Sumit Ritolia, senior analyst at trade consultancy Kpler.

But something else happened. China came roaring back into the market for Russian oil. During the early stages of the Hormuz crisis, China sharply reduced its crude purchases just as the rest of Asia was scrambling for supplies. Beijing entered the crisis with enormous oil stockpiles and appears to have relied heavily on those reserves while its refineries cut back production.

China is now buying aggressively again, putting it into direct competition with India for Russian barrels. Traditionally, the two countries have bought somewhat different Russian grades. China takes large quantities of ESPO crude shipped from Russia's Pacific ports, while India has become the dominant buyer of Urals crude shipped from western Russia.

But China has also been looking for Urals. That means Indian refiners suddenly have a formidable rival for the very barrels they have come to depend on. When India first started massively buying Russian oil in 2022, Moscow desperately needed new customers for crude that could no longer easily be sold in Europe because of Western sanctions. Russian crude came with such hefty discounts that it remained a bargain even after paying to ship it thousands of extra kilometres to Indian refineries.

**China is now buying aggressively again, putting** it into direct competition with India for Russian barrels

### TIGHT MARKET

That bargain has largely disappeared. Russian oil that once came at a steep discount has at times been selling at a premium in today's exceptionally tight market. Yet India cannot simply walk away from Russia. It imports close to 90 per cent of the crude it consumes and needs enormous quantities every day. There simply aren't many producers capable of replacing Russian volumes at short notice.

And that brings us to the multibillion-dollar question hanging over India's oil trade: what does Washington do next? The US has threatened up to 100 per cent sanctions on countries buying Russian energy, putting India and China, the two biggest Russian crude purchasers, in the firing line. Beijing has plenty of ways to retaliate. India is a much easier target, particularly when New Delhi and Washington are at a trade stalemate.

That raises the possibility India could once again come under intense US pressure to cut its Russian purchases further. Fortunately for India, more Gulf oil is getting through.

For Indian refiners, the turmoil has created winners and losers. Reliance Industries is one of the biggest winners. Its giant Jamnagar complex buys crude, turns it into petrol, diesel and other fuels and sells those products. With refining margins soaring, it's become an extremely lucrative business.

India's state-owned refiners face a much tougher situation. Indian Oil, BPCL and HPCL are having to buy increasingly expensive crude and fuel on world markets. But petrol and diesel prices at Indian pumps haven't risen to match those higher costs. That means they're being forced to absorb the difference.

A few months ago, the overriding worry was whether India could find enough crude. Now India is having to juggle its old suppliers in the Gulf, its crucial new supplier in Russia, a resurgent China competing for the same barrels and the worry of US sanctions.

# How mutual funds play across market caps

Domestic mutual funds spread their investments across companies of different sizes, with each market-cap segment offering a distinct risk-return profile. Large-cap stocks typically provide greater stability and tend to be less volatile, making them a core component of many portfolios. Mid-caps offer a balance between relative stability and higher growth potential, while small- and micro-cap stocks can deliver stronger long-term gains but come with significantly greater volatility and downside risk. The mix varies depending on a fund's mandate, valuations, economic conditions and the fund manager's assessment of future opportunities. Holding stocks across market-cap segments can help funds capture growth opportunities while reducing their dependence on any single segment and moderating overall portfolio risk. Top 10 holdings:

**Market cap break-up (%) of mutual funds**

**Large-cap**

# US software stocks jump as AI disruption worries fade

**Joel Jose**
**Purvi Agarwal**

US software stocks are touching fresh 2026 highs, supported by a sharp rise in earnings expectations,which according to several analysts indicate that fears over AI-led disruption in the sector were largely overstated. The S&P 500 software and services index rose 1.3 per cent on Tuesday to its highest levels since November 2025.

Strong earnings from software companies such as Salesforce, ServiceNow and Accenture, along with partnerships with AI labs, helped fuel a recovery in the sector that had been underway since late June. Cybersecurity stocks have stood out, with Crowdstrike, Fortinet and Palo Alto Networks notching triple digit percentage gains this year as companies spend heavily on cybersecurity in the age of AI.

"AI has been more of an enabler for a lot of these software companies, more than a disruptor," said Adam Turnquist, chief cross-asset strategist at LPL Financial. "We're seeing more of a trend change now where software has recaptured the leadership reins, and we think there's a window here for outperformance in software over semiconductors." REUTERS

## TWENTY YEARS AGO TODAY.

October 7, 2006

### PM for more reforms to boost debt market

The Prime Minister, Dr Manmohan Singh, said he was confident of forging a consensus on financial sector reforms to get an annual growth of 8-10 per cent. He said a higher level of investment could be facilitated by making the financial markets more globally competitive. "We need to promote a widely held pension fund system. We need a much larger insurance sector with a higher capital base and more diverse products," the Prime Minister said.

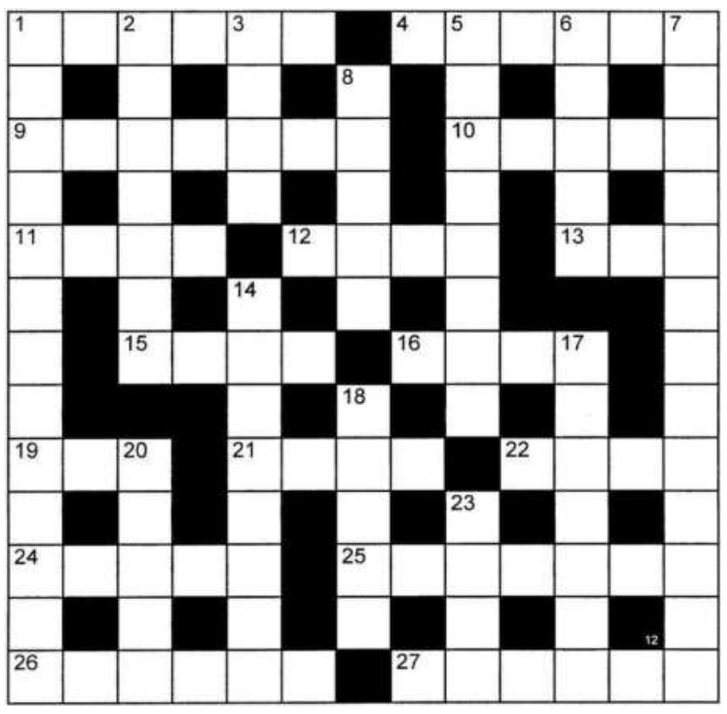

### Govt sets up panel to open up legal services

In a signal that the Government intends to move forward on opening up the legal services sector, the Minister for Commerce and Industry, Mr Kamal Nath, said that a panel of lawyers had been constituted under the UK-India Joint Economic and Trade Committee (JETCO) to work with a similar group in the UKand deliberate on opening up the legal services sector.

### Taiwan IT cos plan to invest $2 b in India

Information, communication and technology (ICT) companies from Taiwan plan to invest $2 billion in their Indian operations in next three years, if suitable infrastructure is created and adequate tax incentives are provided to them.

## QUICKLY.

### Swara Baby gets SEBI nod for ₹1,000 crore IPO

**Mumbai:** Swara Baby Products, one of India's largest contract manufacturers of disposable hygiene products by value, has received approval from SEBI for a ₹1,000 crore initial public offering (IPO). The IPO comprises a fresh issue of shares worth ₹500 crore and an offer for sale (OFS) of ₹500 crore. The OFS includes ₹300 crore by promoter Brainbees Solutions Ltd and ₹200 crore by Anadya Bon Merchari LLP. The company may also consider a pre-IPO placement of up to ₹100 crore. Proceeds from the fresh issue will be used to fund a manufacturing facility in Madhya Pradesh at a cost of ₹198.2 crore, debt repayment of ₹127.5 crore across the company and its subsidiaries. JM Financial and Avendus Capital are managing the issue. OUR BUREAU

### ASK Alternates mops up ₹500 cr for 2nd credit fund

**Mumbai:** ASK Alternates, the alternative investment arm of Blackstone-backed ASK Asset & Wealth Management Group, has raised over ₹500 crore for its ASK Private Credit Fund — Series B within five months of launch, the company announced on Tuesday. The fund targets a corpus of ₹1,000 crore with a green-shoe option of up to ₹1,500 crore. More than 100 Indian family offices and ultra-high net worth individuals participated in the fundraise, including a sizeable number of repeat investors from the firm's earlier private credit strategy. Of the capital raised so far, 30 per cent has been called and is slated for deployment into two transactions in the healthcare and entertainment sectors. OUR BUREAU

# Bulls hold for second day, but rupee hovers near record low

**ALL-ROUND GAINS.** Nifty, Sensex, Midcap and Smallcap indices rose sharply

**Anupama Ghosh**
Mumbai

**INTEREST PERKS UP.** Bank Nifty rose 414.3 points to 55,128.4, led by Kotak Mahindra Bank that gained 3.82%

Markets extended their recovery for a second straight session on Tuesday, clawing back ground after an eight-week slide that dragged the Nifty 50 down 8.8 per cent, its longest losing streak since 2020.

The rebound came even as the rupee slipped to near all-time lows and the country braces for the RBI's rate decision due on Wednesday.

"The correction has brought valuations to more reasonable levels, while Q2 business updates triggered stock-specific buying," said Siddhartha Khemka, Head of Research at Motilal Oswal Financial Services.

The Nifty 50 closed at 22,776.1, up 220.35 points and the Sensex gained 685.34 points to 73,067.81. Bank Nifty rose 0.76 per cent, to 55,128.4, with Kotak Mahindra Bank among the standout performers, gaining around 3.82 per cent.

The broader markets outperformed the benchmarks, with the Nifty Midcap 100 rising 1.08 per cent and the Smallcap 100 advancing 1.56 per cent.

Market breadth turned positive after five consecutive negative sessions, with the advances-declines ratio at 1.82, its highest since July 10. India VIX fell sharply to 13.61, signalling easing near-term volatility.

**SECTOR GAINS**

The sectoral performance was largely positive. Chemicals led gains, rising over 2 per cent, followed by Pharma up at 1.7 per cent, Oil & Gas 1.6 per cent and FMCG 1.4 per cent. Nifty Bank rose 0.8 per cent, underpinned by healthy Q2 business updates.

However, IT shed nearly 2 per cent, while PSU Banks and Realty also closed in the red.

All eyes are now turned to the RBI's Monetary Policy Committee decision on Wednesday.

The consensus expects a 25 basis point repo rate hike from 5.25 per cent to 5.5 per cent, which would mark the first increase since February 2023. The GST Council is also scheduled to meet on Wednesday.

"Volatility is likely to stay high... because of the RBI Monetary Policy Committee meeting scheduled for tomorrow, along with its commentary, given the challenging macro backdrop," said Ajit Mishra, SVP Research at Religare Broking.

# SEBI calls Jane Street's demand for more documents a delay tactic

**Ashokamithran T**
Mumbai

The Securities and Exchange Board of India on Tuesday called Jane Street's demand for more documents to respond to the allegations of manipulative derivatives trading a delay tactic while arguing the case at the Securities Appellate Tribunal.

Advocate Gaurav Joshi, representing SEBI, said that the concern was whether the American hedge fund's trading conduct was correct and that Jane Street had refused to answer that.

"The case is based on the manner in which you traded on the given day... you and your Singapore companies traded on a given day. Taking differing positions in different markets can by no stretch of imagination be called hedging," said Joshi.

Jane Street came under the scanner for taking ₹4,370 crore in the futures market of the index and taking a reverse position worth over ₹32,000 crore in the options market and profiting from the difference. The losses were made by the Indian entity JSI and the profits by the Singapore entity of the same group. India's foreign exchange rules do not permit foreign investors to take intra-day positions in the stock markets.

**ONLY RELEVANT DOCS**

When SEBI passed interim orders and slapped a fine, Jane Street paid the fine but approached the tribunal claiming there was no manipulative intent in the trading behaviour. It demanded more documents from SEBI to respond to the allegations. It is this demand that the SEBI called delay tactics.

"We have given not only the material which has been referred to in the show cost notice, we have given other material running into over 10 GB of data. And I assure you that conduct is dilatory tactics, fishing and rowing inquiries," Joshi said, adding that Jane Street really wanted to investigate SEBI's conduct rather than answer theirs.

"In this case, it's an order and we are not required to give them every possible document which they seek relevant to the case at this stage because it's still pending investigation, everything is being looked into, it would not be right to permit them to look into documents which we are still looking into," Joshi said.

SEBI's argument will continue on October 7, and Jane Street will respond later.

# Over 59% of NSE stock futures volume clustered around Sept expiry: Vtrender

**Madhu Balaji**
Bengaluru

More than half of the trading activity in NSE single-stock futures was concentrated in the four sessions around expiry in September, highlighting how average daily volumes can overstate the liquidity available on a typical trading day, according to a study by market analytics platform Vtrender.

The four sessions from September 24 to 29 accounted for 59.4 per cent of the total volume across the 100 most actively traded single-stock futures contracts tracked by Vtrender.

Shai Coelho, Founder, Vtrender, said the 59.4 per cent share of stock-futures volume concentrated around expiry is a recurring pattern driven by rollover activity, rather than an unusual feature of September.

Vtrender compared average daily contracts with the median session and the quietest trading session for each stock. It also calculated a rollover multiple. The median rollover multiple across the Top 100 was 4.4 times.

PB Fintech provided one of the starkest examples. It ranked 11th by average daily volume, at 16,505 contracts, but its median session volume was only 2,661 contracts. Its rollover multiple stood at 15.7 times, and the stock did not feature among the top 50 names in an ordinary trading session, the report said.

However, the pattern was not uniform across the market. Solar Industries and Paytm had rollover multiples of just 1.9 times and 2 times, indicating relatively steadier activity.

Coelho said the derivatives market typically assigns a higher implied volatility to the front-week settlement compared with the following week's expiry. "Historically, this has happened but the uncertainty of CAS spiked it up more," he said.

# SRIT India jumps 19% on listing day to ₹155.09, Shah Investors Home scores 4% gain on day 1

**Our Bureau**
Bengaluru

Jaswant Jain (second from right), Chief Manager, NSE, with SRIT India officials at the listing ceremony

Shares of SRIT India and Shah Investor's Home made a positive debut on the stock exchanges on Tuesday, with both listing above their respective IPO prices.

SRIT India was the star performer, gaining nearly 19 per cent and ending on the upper circuit at ₹155.09 on the NSE over the IPO price of ₹130 after listing at ₹148. On the BSE, the stock debuted at ₹139.80, and closed at ₹155.05.

The strong debut followed intense demand for the IPO, which was subscribed 125.16 times. The company raised ₹218.4 crore through a fresh issue, with the proceeds earmarked primarily for working capital and capital expenditure.

Ravi Singh, Chief Research Officer at Master Capital Services, said investors should track revenue growth, profitability, execution of expansion plans and cash-flow generation, with long-term prospects supported by rising demand for digital transformation and technology infrastructure.

**SHAH'S MODEST DEBUT**

Shares of Shah Investor's Home made a more modest debut, listing at ₹171 on both the NSE and the BSE, representing a 2.39 per cent premium over the IPO price of ₹167. It ended at ₹173.79 and ₹173.75 on the NSE and the BSE, respectively, with 4 per cent listing gains.

Shah Investor's issue was subscribed 38.12 times overall. The company raised around ₹90 crore, with the proceeds mainly intended to meet its working capital requirements.

# 'Markets may remain cautious in near term, but positive for long-term'

bl.interview

**Madhu Balaji**
Bengaluru

> We believe that from now, the outflow of capital by FPI is finally going to reduce and reverse over the long time
>
> **PRADEEP GUPTA**
> Chairman & MD, Anand Rathi Share and Stock Brokers

Domestic economic fundamentals remain strong, with real GDP growth at 7.8 per cent in the first quarter, while private capital investment has also started picking up, said Pradeep Gupta, Chairman & MD, Anand Rathi Share and Stock Brokers.

He expects sectors such as infrastructure, engineering, financial services, electronic manufacturing and specialised medical industries to see growth.

*Edited excerpts:*

**What is your outlook for Indian equities for the rest of FY27 given the uncertainty?**

We personally believe that the Indian economy from a macro perspective is definitely constantly growing. I would say long term, I think I'm quite positive on the economics as well as the capital market terms.

But in the short term — two-six months — one has to have a cautious approach because of the global market scenario. The corporate sector has also started looking at investments, which is a positive.

**Which sectors are likely to lead earnings growth in FY27?**

I am quite positive on the infrastructure side because the government is spending heavily on that, and I see lots of positivity on the capex market-related activity. Also, the precision engineering kind of sector or segment will flourish.

The next sector is the financial markets' sector. Not only banking companies, which have been in high demand, one should start looking at NBFCs too.

There are new kind of companies in the listing space, such as asset management companies, as well as insurance companies, growing at a constant level. So, I think one should start looking at them.

Similarly, electronic manufacturing is definitely growing. And, I think specialised chemical industries are also going to grow.

**What could trigger a revival of foreign investor flows?**

In my opinion, the FII has gone out because of two major reasons. One, money always pays a safe return, and the day we have seen almost 5.34 per cent kind of a 10-year in the US market, people start drawing money from anywhere and start investing in those kind of markets, and that's the reason you are seeing outflows.

And the second biggest thing is comparable valuation versus return. In the past two years, if you really look at it, our markets have not given any kind of return.

I personally believe that from now the outflow of capital is finally going to reduce and reverse over the long term, and the key factor is, I think, people will start looking at the Indian macro story.

If you really look at it, in two months we have seen real GDP growth. And, I personally believe the upcoming Q2 results are definitely going to change the mindset of these people.

On the domestic front, the RBI's policy stance and clarity on inflation would also be important for the market. I personally feel that the policy is going to set the trend.

In addition, the clarity of the monsoon and its impact on the demand and consumption front need to be watched closely.

**What are the biggest risks to the FY27 market and earnings outlook?**

The geopolitical situation is one concern. The war is continuing, and consequently you are seeing volatility in crude prices, which is impacting inflation worldwide.

There is also disruption in supply chain management, and people are sceptical about how demand is going to shape up and what is going to happen in the future.

Similarly, the rise in the dollar and 10-year yield is impacting flows, as money is moving from emerging markets.

# Fusion CX may launch ₹800 cr IPO next week

**Press Trust of India**
New Delhi

AI-powered customer experience solutions provider Fusion CX is likely to launch its IPO as early as next week, with the issue size estimated at ₹700-800 crore, down from the ₹1,000 crore planned earlier, people familiar with the development said on Tuesday. It received SEBI's nod to proceed with the IPO in December 2025. The proposed IPO comprises a fresh issue and an OFS. The IPO proceeds will be used for repayment of debt, investment in step-down subsidiaries Omind Technologies Inc and Omind Technologies Pvt Ltd for upgrading IT tools, pursuing inorganic growth and other strategic initiatives.

## BROKER'S CALL.

### InCred Equities

**TECHNO ELECTRIC & ENGINEERING (BUY)**
Target: ₹1,600
CMP: ₹994.8

We visited Techno Electric & Engineering Company's edge data centre facility to understand the company's data centre infrastructure, operating model, customer traction and expansion plans. The facility currently has 800 kW of total capacity, with around 430 kW IT load capacity, 50 racks and a PUE (Power Usage Effectiveness) of 1.86. The visit provided insights into the economics of the business, including colocation and managed services, current occupancy, RailTel-led demand and the company's planned expansion across Noida, Chennai, Mumbai and Gurgaon.

Management indicated capex of ₹18-20 crore for the current facility due to readily available civil structure. The company charges approximately ₹9,000-11,000 per kW per month for colocation capacity, while yields across the broader portfolio are currently in the range of ₹10–11 crore per MW. Management indicated 40-45 per cent margins for the current business, with margins potentially reaching 70-75 per cent excluding power costs. With about 60 MW of projects under development and significant planned capex over the next two years, data centres are emerging as a key growth opportunity for Techno Electric.

We have a Buy rating on Techno Electric & Engineering with a target price of ₹1,600, based on SOTP valuation, implying 31x P/E on FY28 EPS.

### Monarch Capital

**TAJGVK HOTELS (BUY)**
Target: ₹475
CMP: ₹319.8

We initiate coverage on TajGVK Hotels & Resorts (renamed as Krishna GVK) with a BUY rating and TP at ₹475. TajGVK is entering a structurally stronger phase of growth, with a combination of premium hotel assets, Taj's operating expertise and a renewed expansion cycle positioning it well for India's evolving luxury hospitality opportunity. After a prolonged period of limited owned-asset additions, the company is now moving towards a more active growth phase, supported by the upcoming Bengaluru hotel in H2FY27e, consolidation of Taj Santacruz, Mumbai and a pipeline of further organic and inorganic opportunities. At the same time, strong occupancy across its existing portfolio, particularly in Hyderabad, provides a solid base for ARR-led growth and refurbishment-led premiumisation. We expect the combination of improving pricing, incremental room capacity and operating leverage to drive superior earnings over FY26-FY29E. With revenue and EBITDA expected to grow at about 26.4 per cent and around 26.6 per cent CAGR, respectively over FY26-29E, we believe the current valuation does not fully reflect the earnings potential from the company's upcoming expansion cycle.

**Key risks:** High reliance on Hyderabad market; slowdown in travel and tourism; cyclical slowdown in the hospitality industry; promoter share pledge; and dependence on the Taj brand.

## TODAY'S PICK.

### Cyient (₹1,119.20): BUY

**Gurumurthy K**
bl. research bureau

The short-term outlook is bullish for Cyient. The price action since September indicates a rounding pattern on the daily chart. Support is at ₹1,100, which held very well during the fall witnessed on Tuesday. Cluster of supports are there in the ₹1,100-₹1,030 region. The moving average cross over on the daily chart also strengthens the bullish case. It indicates that any further downside from here will be limited. The Cyient share price could rise to ₹1,300 in the coming weeks.

Traders can buy Cyient shares now at ₹1,119. Accumulate on dips at ₹1,105. Keep the stop-loss at ₹1,030 initially. Trail the stop-loss up to ₹1,135 as soon as the stock goes up to ₹1,160. Revise the stop-loss higher to ₹1,170 and ₹1,220 when the price touches ₹1,205 and ₹1,250 respectively. Exit the long positions at ₹1,280.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading

### Services sector growth at three-month high in Sept

**New Delhi:** India's services sector growth touched a three-month high in September, as new orders increased sharply, supported by strengthening domestic demand, a monthly report said. The HSBC India Services PMI Business Activity Index rose to 55.2 in September, from 54.1 in August, signalling the strongest upturn since June. PTI

# RBI's new foreign exchange reporting framework raises some concerns

**FILING REQUIREMENTS.** For freelancers and small exporters, the change brings in more paperwork

**Sindhu Hariharan**
Chennai

The RBI's new foreign exchange reporting framework that went live October 1 will help policymakers track the growing pool of India's non-software services exports, but individual and small-ticket service providers who have never had to file such paperwork are up in arms. The new RBI FEMA Regulations require all services exporters to file an Export Declaration Form (EDF) with their bank (or STPI for software) within 30 days from the end of the invoice month.

For software exporters, the change is just a transition from the erstwhile SOFTEX Forms to the new EDFs. However for freelancers, consultants and other small firms, the change brings in a new set of documentation and filing requirements.

The friction comes from the lack of clarity at the ground level, as many bank branches are still figuring out their own standard operating procedures (SOPs) around this, financial advisors and small service exporters told *businessline*. The service providers question the need for such a new declaration, particularly for low-value service exports. Social media has been abuzz with individual entrepreneurs and consultants noting that the additional form puts their payments and reconciliation at the mercy of the efficiency of the banking partners.

**KEY FACTS**

**What is EDF?**
An Export Declaration Form (EDF) is a mandatory form that declares the value of your export to RBI

**What is changing in EDF from October 1, 2026?**
From October 1, 2026, EDF filing applies to all service and software exporters, including freelancers, consultants and others with no minimum threshold on services

**What is the challenge?**
The EDF itself is not complex but individuals and small service providers anticipate friction in aligning invoicing, payments, reconciliation and timely filing. They seek more support from banks

**What are other changes in new reporting?**
Exporters can set off export receivables against import payables and payment discipline has tightened. Proceeds have to be realised within nine months down from 15 months earlier

**IMMEDIATE CONCERNS**

Rohan Sewani, Head of Operations & Customer Experience, Skydo, a cross-border payments platform, said they are already seeing customers reach out for help. The "immediate friction" relates to bankers preparing themselves for this with adequate SOPs and also communicating this with exporter customers.

"Freelancers and small service firms now have to understand what the EDF is, where to file it, what details are needed, how to identify fields such as SAC codes and AD branch codes, and how to map their export invoices and remittances correctly," he said.

Ajay Srivastava, Founder, Global Trade Research Initiative, said with smaller service providers included, without a threshold limit, it will increase the paperwork for these businesses. Benefits will depend heavily on implementation by banks, he added.

"It is a good change for software exporters who used to file a much larger and complex SOFTEX form. But it is bad for exporters like me who provide low-ticket services. I now need to engage someone to do this," a Chennai-based tech consultant said. "We are at the mercy of the subjectivity and bureaucracy of banks now."

Neha Aggarwal, Partner, Deloitte India, notes a fair bit of worry around the kind of documentation and details that banks would now ask from the freelancers and others. Banks have been given directions under the Rule to set up SOPs and they should now try to keep documentation burden minimum; all eyes are on how the banks respond, she said.

**'NOT COMPLICATED'**

Asish Philip Abraham, Executive Partner, Lakshikumaran Sridharan Attorneys, pointed out that there is also a provision to consolidate all export invoices of the month in a single EDF which should make things manageable. "The immediate challenge is understanding the process and coordinating with the AD banks," he said.

Sunil Badala, Head of Tax, KPMG in India, said the framework strikes a pragmatic balance between regulatory oversight and ease of doing business. The shorter timelines for realising export proceeds and tighter credit controls, however, make stronger receivables management and credit controls essential, he added.

# Increase participation in financial inclusion schemes, FinMin urges private banks

**Press Trust of India**
New Delhi

The Finance Ministry, on Tuesday, urged private sector banks to increase their participation in financial inclusion schemes, including Pradhan Mantri Mudra Yojana and Stand Up India.

Chairing a review meeting with heads of all public sector banks and senior officials of major private sector banks, Financial Services Secretary Sanjay Lohiya urged banks to participate wholeheartedly in the forthcoming Financial Inclusion saturation campaign from October 21 to December 31.

Lohiya asked private sector banks to give more thrust to serving marginalised sections of society and fulfilling their banking needs.

**DETAILED REVIEW**

During the meeting, a detailed review of the progress under various Financial Inclusion schemes was done, including Pradhan Mantri Jan Dhan Yojana, Pradhan Mantri Jeevan Jyoti Bima Yojana, Pradhan Mantri Suraksha Bima Yojana, Atal Pension Yojana and Pradhan Mantri Mudra Yojana, the Finance Ministry said. The meeting also reviewed progress on Stand Up India, PM Street Vendor's Atma Nirbhar Nidhi, PM Vishwakarma, PM Surya Ghar and Kisan Credit Card. The progress of opening brick-and-mortar branches of banks and deployment of banking correspondents in unbanked villages was also reviewed.

While significant progress has been made in deepening financial inclusion in the country through various flagship schemes, banks should make efforts for further enhancing their digital outreach and focus on end-to end digital processing of loans, Lohiya said. Providing working capital loans through channels like credit lines on UPI and credit cards for micro-enterprises was also explained.

During the meeting, he directed private sector banks to increase awareness of claim eligibility in Jansuraksha insurance schemes so that the nominees receive the amount after the unfortunate demise of the beneficiary. Banks were advised to take specific care while handling grievances related to claims under these schemes.

# As coal supply fails to meet demand, 81 thermal power plants run on critical stocks

**Rishi Ranjan Kala**
New Delhi

As thermal power plants (TPPs) burn more coal to meet electricity demand, the supply seems to be failing to meet the daily requirement with 81 plants based on domestic coal running on critical stocks compared to 73 a week ago.

The Coal Ministry, on Monday, said that 1.75 million tonnes (mt), 1.87 mt and 1.81 mt was dispatched by Coal India on October 1-3, respectively, averaging at 1.81 mt. However, the daily requirement of 176 domestic coal-based (DCB) plants with roughly 207 gigawatt (GW) capacity is around 2.95 mt per day. Coal stocks at DCB plants stood at 18.22 mt on October 5, a decline of 3.8 per cent compared to stocks a week ago (September 29).

**HIGHER CDEMAND**

Sources said that Punjab, Haryana, Maharashtra and Uttar Pradesh are facing higher demand. The requirement from TPPs is high, as hydro-power generation this time was down roughly 12 per cent in September. Besides, evening and night peak electricity demand has also been on the higher side putting more stress on TPPs.

"States such as Punjab have asked for more supply from the resource pool. Coal consumption is high as industrial demand is strong, led by steel and cement production. Over that, power is also being consumed in the farm sector as deficient rains are leading to more use of pumps for irrigation," said one of the sources. During July-September, India's energy consumption rose 11.5 per cent year-on-year to roughly 502 billion units (BU). The consumption last month was at 162 BU, higher by 11 per cent annually.

Lack of power supply forced discoms to buy from power exchanges. The Indian Energy Exchange said that strong power demand led to a whopping 281 per cent increase in buy bids in the Day-Ahead Market in September, resulting in higher market prices.

The average market clearing price in the Day-Ahead Market at ₹7.3 per unit during September, increased 105 per cent. Similarly, the average market clearing price in the Real Time Market at ₹6.9 during September, increased 108 per cent.

While coal receipts rose 6 per cent in August and 3.3 per cent Y in April-August FY27, coal consumption rose 12.5 per cent in August and 9.2 per cent in April-August.

# Rupee remains vulnerable, dollar firm

**Akhil Nallamuthu**
bl. research bureau

The rupee depreciated 44 paise against the dollar over the past week, weighed down by persistent foreign outflows and strength in the greenback.

**WEEKLY RUPEE VIEW.**

On Tuesday, the local currency closed at 96.43 versus the dollar. According to NSDL data, net FPI outflows stood at about $3.7 billion over the past week. So far in October, net outflows stand at around $2.4 billion.

The US 10-year Treasury yield sustaining above 5.2 per cent continues to support the greenback, making dollar-denominated assets relatively attractive. Some relief, however, has emerged on the crude oil front. Saudi Aramco has reduced selling prices for Asian buyers, while the G7's decision to release crude and fuel from strategic reserves and an improvement in West Asia exports have eased immediate supply concerns. Geopolitical uncertainty and risks surrounding key shipping routes continue to keep the energy market on edge.

Attention now turns to the RBI's monetary policy decision today. The central bank is widely expected to raise the repo rate by 25 basis points to 5.50 per cent. Such a move could provide some support to the rupee.

Overall, the rupee continues to face pressure from a firm dollar and persistent foreign outflows. However,

easing crude oil prices and a potential RBI rate hike could provide some support to the local currency.

**CHART**

The rupee fell off the resistance at 95.80 last week. It slipped below the support at 96.10 last Thursday and continued to decline. The price action shows a clear bearish bias. The nearest support is at 96.60. Subsequent one is at 97. However, if the rupee recovers from the current level of 96.43, it can rise to 96, a resistance. Barrier above this is at 95.80. The dollar index has been rallying well over the past month. It hit 102.54 on October 5, the highest since April 10, 2025. Although it has moderated from the peak to the current level of 101.80, the broader trend remains positive. While the dollar index could witness a correction, possibly to 101.20, we expect it to eventually surpass the 102.54 and rally to 103 in the coming weeks.

**OUTLOOK**

The rupee is likely to remain under pressure, with the broader trend favouring a decline towards 96.60 and potentially 97. A correction in the dollar could provide temporary relief, but unless the rupee moves decisively above 95.80, any recovery is likely to be short-lived.

# Insurance brokers oppose commission caps, fear job losses

**Ashokamithran T**
Mumbai

Insurance brokers have opposed the provisions to cap commissions in the recent proposals issued by the Insurance Regulatory and Development Authority of India (IRDAI) to reform the industry's distribution economics, arguing that the move would lead to lower revenues and significant job losses across the sector.

Seeking an extension of the feedback submission deadline to December-end from the current October 25, brokers said the proposed framework does not exist anywhere else in the world and that such an "untested" overhaul requires wider consultation and more deliberation.

**COMMISSION CUTS**

At the heart of the opposition is the proposed reduction in commissions. The Insurance Brokers Association of India (IBAI) said the move could sharply reduce industry revenues and potentially threaten the livelihoods of nearly one million (10 lakh) people employed in the insurance distribution ecosystem.

"Our concern is that the paper's central approach, involving more than 30 commission caps across products and distribution channels, coupled with a one-third reduction in insurers' overall expense limits, will harm the very policyholders it seeks to protect. The cost savings would effectively be transferred from distributors' and insurers' employees to insurance company owners, with no mechanism to ensure that the benefits are passed on to policyholders," IBAI said in a letter addressed to the Prime Minister's Office.

**The IBAI also suggested that the methodology for calculating** the Expense of Management should remain unchanged from the 2023 framework

The association also questioned whether the proposed measures would enhance policyholder choice and freedom. It expressed doubts that the reduction in costs resulting from the new framework would ultimately be passed on to customers.

In its representation, IBAI also suggested that the methodology for calculating the Expense of Management (EoM) should remain unchanged from the 2023 framework, although the computation rules could be tightened.

**EOM REPRESENTATION**

Brokers further proposed that if an insurer's claims ratio falls below a prescribed threshold, say 65 per cent, or if a policy is found to have been mis-sold, insurers should be required to either refund part of the premium or reduce renewal premiums.

The association pointed out that similar mechanisms already exist under schemes such as PMFBY and Ayushman Bharat.

# G-Sec yields thaw on dip in crude oil prices

**Our Bureau**
Mumbai

Yields of government securities (G-Secs) thawed on Tuesday as crude oil prices dipped below the $100 a barrel mark and value buying emerged on bond markets discounting an expected 25 basis points (bps) repo rate hike announcement by the RBI's rate setting panel, whose three-day meeting will conclude on October 7.

The softening of the G-Sec yields can be underscored by the fact that yield of the widely traded 10-year benchmark security (6.94 per cent GS 2036) dipped 2 bps to close at 7.19 per cent against the previous close of 7.21 per cent. The bond market has pencilled in a 25 bps repo rate hike (from 5.25 per cent to 5.50 per cent).

**EXCESS LIQUIDITY**

On possible RBI measures to drain out excess liquidity from the banking system, he noted that if the objective is to move toward a tighter monetary policy, tighter liquidity conditions are needed as well. He opined that the RBI may issue Cash Management bills to suck out surplus liquidity from the banking system.

The rupee closed at 96.42 per US Dollar, down 13 paise vis-a-vis previous close of 96.29.

Dollar sales by banks, apparently at the RBI's behest, is believed to have pulled back the currency from the low levels.

# HPCL EV charging network grows 8% to 5,826

**Amit Vijay Mohile**
Mumbai

HPCL's EV charging network reached 5,826 facilities across 25,238 retail outlets as of September 1, up nearly 8 per cent from about 5,400 in March, as the State-owned oil marketing company deepens its electric mobility push by deploying 240-kW ultra-fast chargers for electric trucks and buses across 50 highway corridors.

The scale of the network is significant in the context of India's broader EV charging ecosystem. The country currently has 52,718 public EV charging stations, according to government data. HPCL's 5,826 facilities account for roughly 11 per cent of that total, although the figures may not be directly comparable because of differences in how charging infrastructure is classified.

Most of HPCL's additions came during the first quarter of FY27, with the network expanding to 5,806 stations by June-end. The new 240-kW chargers are being rolled out under the PM E-DRIVE programme, as HPCL scales up charging and battery-swapping infrastructure for commercial vehicles.

**HEAVY EV PUSH**

HPCL's existing network comprises AC and DC chargers ranging from 3.4 kW to 120 kW. The move to 240-kW ultra-fast chargers reflects the significantly higher energy requirements of commercial EVs and marks an expansion of its charging strategy beyond passenger vehicles.

In July, HPCL partnered with Energy In Motion to develop charging and battery-swapping infrastructure for electric heavy commercial vehicles at select retail outlets.

Its partnership with Blue Energy Motors covers battery-swapping and ultra-fast charging facilities along key highway routes. An MoU with EKA Mobility spans commercial EV charging, battery swapping, green hydrogen, and sustainable logistics solutions.

**ENERGY HUBS**

Rather than creating a separate network for electric mobility, HPCL is leveraging its extensive fuel-retail footprint while bringing in technology, operational expertise, and investment through strategic partnerships. "Electric mobility is an important part of HPCL's broader energy-transition journey," said Debashish Basak, Executive Director (Retail), HPCL.

He said the company's combination of infrastructure and specialised partners would help meet the needs of passenger vehicles, two-wheelers, and heavy commercial vehicles, while making its retail network increasingly future-ready.

HPCL is also expanding infrastructure for smaller EV segments. Its partnership with Honda has grown to more than 140 battery-swapping stations across Delhi-NCR, Gurugram and Mumbai, catering largely to the e-commerce sector. It has also partnered with Mahindra to deploy 180-kW dual-gun ultra-fast chargers and with V-GREEN to expand charging and battery-swapping infrastructure.

The expansion is steadily transforming the conventional petrol pump into a multi-energy hub.

**NOTICE OF LOSS OF SHARE CERTIFICATES**

BHARATKUMAR MANILAL DALAL (Deceased), was holding 400 shares of Face Value Rs. 1/- in United Breweries Limited (formerly: McDowell & Co. Limited), UB Tower, #24 Vittal Mallya Road, Bengaluru - 560001 in Folio UB044860 bearing Share Certificate Number 102362 with Distinctive Numbers from 770751 - 771150.

I, TUSHARBHAI BHARATKUMAR DALAL, being the claimant, hereby give notice that the said Share Certificate(s) are lost and I have applied to the Company for issue of duplicate Share Certificate.

The public is hereby warned against purchasing or dealing in anyway with the said Share Certificate. The Company has informed me that if they do not receive any objection within 15 days from the date of issue of this advertisement for withholding of transfer to IEPF Authority, Company will submit its response to IEPF Authority for transferring the aforesaid shares to the demat account of the undersigned, after which no claim will be entertained by the company in that behalf.

# Rahul Gandhi, Priyanka arrested after leading protest against poll panel

**ELECTORAL STIR.** MPs march to ECI headquarters, demanding action over alleged electoral roll irregularities

**Dalip Singh**
New Delhi

Leader of the Opposition in the Lok Sabha, Rahul Gandhi, and his Congress colleagues, including Priyanka Gandhi, were arrested on Tuesday night from Akashvani Bhavan, where they had been sitting on dharna for nearly eight hours after the police refused to allow them, along with other INDIA bloc leaders, to march to Nirvachan Sadan.

The protesters were seeking the resignation of Chief Election Commissioner Gyanesh Kumar over his alleged involvement in the *vote chori* scandal. They were taken to Kingsway Camp in North Delhi, Congress leaders said.

Delhi Police personnel, who had been requesting them throughout the day not to assemble, saying it violated legally enforced restrictions on mass gatherings, forcibly removed him, along with Congress leaders KC Venugopal, Pawan Khera, K Suresh, Amarinder Singh Raja Warring and Imran Pratapgarhi, from the All India Radio premises.

"Do you think arresting us will silence us? We are the Congress, the party of Gandhi. Our Satyagraha will never fail," Venugopal said following their detention.

Earlier in the day Rahul Gandhi posted on X, "Gyanesh, it's done, bro. Time to resign," reiterating the INDIA bloc's resolve to seek accountability for irregularities in the electoral roll revision through SIR and other infirmities in the process, which, he alleged, had led to the deletion of 13 crore voters so far.

Rahul Gandhi, Priyanka Gandhi and other party leaders entered the Akashvani Bhavan premises and sat under a tree, refusing to leave as the police tried to stop them from proceeding further and demanded the resignation of Chief Election Commissioner Gyanesh Kumar.

Deputy Commissioner of Police Sachin Sharma reached the spot with a large posse of policemen and tried to persuade the protesting Opposition members to leave the place.

**TAKING TO THE STREETS.** Leader of the Opposition Rahul Gandhi during a protest march from Parliament House to Nirvachan Sadan in New Delhi on Tuesday SUSHIL KUMAR VERMA

**SEEKING ANSWERS**

Addressing the media, Rahul Gandhi reiterated, "There will be action against them. None of them will be spared, be it PM Modi, Home Minister Shah, RSS chief Bhagwat or CEC Gyanesh Kumar. What has been done to our country is treason. Nobody is going to escape." Gandhi also said around 300 MPs from both the Lok Sabha and the Rajya Sabha had come there earlier and wanted to meet Election Commissioner Gyanesh Kumar and his two colleagues, but the police stopped them.

"We are representatives of the country... We represent the voice of the nation. I don't know why 300 MPs were stopped here and made to sit like this. The Election Commission headquarters is just 50 yards away, yet they aren't letting us go. It's incomprehensible... What is the problem?" he said.

The Election Commission, however, said it had not received any request from any political party for a meeting till 4 pm, after which the Delhi Police informed it that a delegation led by Rahul Gandhi sought to submit a memorandum, the ECI said in a statement.

The Commission said it later learnt that the meeting was intended to be with 240 MPs at the Parliament House Annexe. It rejected the proposal, citing established protocol that such meetings should take place at the ECI premises through designated representatives. Although the ECI offered to send its most senior executive official to receive the memorandum, the MPs declined the proposal, the statement said.

**POLITICAL SLUGFEST**

On the INDIA bloc MPs' protest, Union Minister Kiren Rijiju said, "The time has come to put an end to the daily drama orchestrated by the Congress party, specifically Rahul Gandhi and his associates, who constantly attack institutions like the Election Commission and the Supreme Court. This drama has been ongoing since 2014; how long will it continue?"

The police briefly detained Samajwadi Party chief Akhilesh Yadav, Trinamool Congress leaders Derek O'Brien and Abhishek Banerjee, along with other Opposition leaders. Akhilesh Yadav accused the EC of bias and said, "It's not a new thing that allegations have been made against the Election Commission. It should take impartial decisions that do not appear biased."

"The BJP should set up its office in the Election Commission," the SP chief said in a snide remark.

# West Bengal bypolls see high turnout amid claims of rigging by Opposition

**DEMOCRACY IN ACTION.** Voters queuing outside a polling station to cast their ballots in the Rejinagar Assembly bypoll in Murshidabad district, West Bengal PTI

**Our Bureau**
Kolkata

West Bengal on Tuesday saw a high voter turnout in the high-stakes by-elections to two Assembly seats — Nandigram and Rejinagar — with the ruling BJP claiming it would win both by huge margins, while the Congress and the Mamata Banerjee-led Trinamool Congress alleged "blatant rigging" and "vote theft" at several polling booths.

Voter turnout in the Nandigram and Rejinagar bypolls stood at 80.89 per cent and 80.07 per cent, respectively, according to the data released by the Election Commission of India.

"We will win both the seats by huge margins. In Nandigram, we are going to beat our own record with a margin five times higher than the last time. In Rejinagar our party will win too. People are rejecting appeasement politics and choosing the BJP," West Bengal BJP President Samik Bhattacharya told media.

Even as opposition parties alleged massive polling irregularities, voter intimidation and police inaction in Nandigram in Purba Medinipur district, Chief Minister Suvendu Adhikari said polling in the byelection was "peaceful". "Here, we will win by a big margin. In Rejinagar too, the BJP has got the votes needed to win," Adhikari said after casting his vote in Nandigram. The BJP fielded Hasirani Rath in Nandigram, mother of Chandranath Rath, a former aide of Adhikari who was shot dead on May 6, two days after the party won the Assembly elections.

**OPPOSITION CLAIMS**

Congress candidate Milan Pradhan alleged that polling agents were being prevented from entering booths and accused the police of failing to act on complaints of polling irregularities.

Congress spokesperson Mita Chakraborty said the images emerging from Nandigram and Rejinagar were deeply disturbing. "There is blatant rigging taking place at booths 216 and 232 in Nandigram."

Congress workers, led by party leader Adhir Ranjan Chowdhury, staged a protest outside the District Magistrate and Collector's office in Berhampore in Murshidabad district. Party candidate Mohammad Abdullahil Kafi also staged a sit-in outside a local police station. Aam Janata Unnayan Party Chief Humayun Kabir was arrested after a verbal altercation with police in Rejinagar. For the Rejinagar seat, the TMC chose Rabiul Alam Chowdhury against BJP's pick Shankharavh Sarkar.

# Bypolls voting ends peacefully in Tamil Nadu, Puducherry

**Press Trust of India**
Chennai

Polling ended peacefully on Tuesday for byelections to two Assembly constituencies in Tamil Nadu and one in Puducherry, which are being seen as a test of popularity for the incumbent coalition governments headed by the TVK and AINRC, respectively.

Since morning, people turned up enthusiastically at the polling stations to exercise their franchise and the pace, after a lag in the afternoon, picked up momentum later.

The voting, which began at 7 am and ended at 6 pm, was peaceful and minor technical glitches in respect of EVMs in some booths were swiftly addressed by officials.

**BIGGER STAKES**

In Tamil Nadu, Madurantakam and Dharapuram Assembly Constituencies, both reserved segments, registered a turnout of 85.99 and 80.31 per cent respectively at 6 pm, according to election authorities.

The Thattanchavady segment in Puducherry recorded a turnout of 80.81 per cent at 6 pm.

The high-stakes bypolls in Tamil Nadu will have a bearing not only on the incumbent TVK regime, but also be crucial for both the main opposition DMK and the AIADMK, which had been relegated to the third spot in the April Assembly election.

**LITMUS TEST**

In Puducherry, the bypoll is seen as a test of popularity for the four-month-old NDA government led by Chief Minister N Rangasamy, whose resignation from Thattancvahady necessitated the electoral exercise.

No major untoward incidents were reported, and officials swiftly addressed some minor technical glitches in EVM-VVPAT equipment at a few booths.

# Tata Power Renewable adds 1.68 lakh rooftop solar installations in H1 FY27

**Our Bureau**
Ahmedabad

Uttar Pradesh, Maharashtra, Rajasthan and Kerala emerged as key markets for Tata Power Renewable Energy Ltd's rooftop solar business in the first half of FY27, as the company added more than 168,530 installations during the period, a 50 per cent year-on-year increase.

Uttar Pradesh led the company's installation drive, with 44,014 rooftop solar installations adding around 172 MWp of capacity in the six months ended September 2026. Maharashtra followed with 22,165 installations and nearly 100 MWp, while Rajasthan recorded 21,275 installations, contributing 99 MWp. Kerala added another 15,477 installations, with around 65 MWp of capacity.

Tata Power Solaroof, the rooftop solar division of Tata Power Renewable Energy Ltd (TPREL), said strong state-level performance contributed to the addition of 801 MWp of rooftop solar capacity in H1 FY27, up 25 per cent from 639 MWp in the corresponding period of FY26. The company added 88,397 rooftop solar installations in the July-September quarter, up 33 per cent year-on-year from 66,447 installations recorded in Q2 FY26. Capacity added during the quarter stood at 426 MWp, up 15 per cent from 369 MWp a year earlier.

The latest additions have taken Tata Power Solaroof's cumulative rooftop solar installations to 575,000, with total installed capacity crossing 5.67 GWp across residential, commercial and industrial (C&I) segments nationwide.

**MAHARASHTRA LEADS**

While Uttar Pradesh was the largest contributor to installations during H1 FY27, Maharashtra has the highest cumulative capacity among the key states, with 73,578 installations aggregating 1,041 MWp. Uttar Pradesh has recorded 116,254 cumulative installations, with a total capacity of 528 MWp. Kerala has contributed 69,734 installations, aggregating more than 310 MWp, while Rajasthan has recorded 44,798 installations with a cumulative capacity of 390 MWp.

The company said the performance across these states highlights the growing adoption of rooftop solar across major residential and C&I markets.

# PepsiCo, Monster, Reliance win reprieve on 'energy drink' label ban in India

**Reuters**
Bengaluru

**RETAIL SHOCK.** Reliance and PepsiCo said that their products labelled "energy drink" had been abruptly taken out of circulation since the ban REUTERS

PepsiCo, Monster Beverageand Reliance Industries can keep the "energy drink" label on products in India after a court put on hold a ban by the food regulator, a breather for the companies after a dispute they say disrupted operations.

The regulator in June ordered makers of high-caffeine beverages sold as "energy drinks" to stop using the description, rejecting the industry's efforts to stall the move in a market expected to be worth $1.6 billion by 2028. On Tuesday, the Delhi High Court put the directive on hold for PepsiCo and Monster in a hearing that followed their pleas last week, according to a lawyer present atthe hearing. The order follows similar reprieves the court granted to Reliance earlier on Tuesday and to Austria's Red Bull last week.

The legal showdown is being closely watched as the Food Safety and Standards Authority of India (FSSAI) has embarked on a broader India-wide food safety push this year. Its crackdown has ranged from raids and shutdowns to new ingredient warning-label requirements, driven by growing concern over thehealth risks posed by junk food and beyond. As it heard Reliance's arguments, the court asked FSSAI's lawyer why the regulator had not allowed the company enough timebefore passing the order, telling the agency it was "never too late" to correct its mistake.

**FINANCIAL LOSSES**

The court will continue to hear the cases in the coming weeks. FSSAI did not immediately respond to a request for comment.

The label ban has threatened the ambitions of PepsiCo, Monster Beverage and Reliance in India's fast-growing energy drinks market, where retail sales are expanding 12.6 per cent a year, outstripping growth in the US and China, according to Euromonitor.

Reliance and PepsiCo have said that hundreds of millions oftheir beverage products labelled "energy drink" have been abruptly taken out of circulation since the ban. State authorities have seized their stock, causing financial losses and impacting investment plans, the companies have said.

Such moves "are causing substantial disruption" to business operations, the beverages' arm of Reliance said in a court filing dated October 1, a copy of which was reviewed by *Reuters*.

# 'Manufacturing sentiment improved in Jul-Sep'

**Press Trust of India**
New Delhi

India's manufacturing sentiment improved in the July-September quarter as factories reported higher capacity utilisation and higher or the same levels of production as compared to the previous quarter, according to the latest edition of the Ficci Manufacturing Survey.

The survey, which covered around 225 firms, assessed the performance and sentiment of manufacturers for nine major sectors, namely automotive & auto components, capital goods, chemicals and allied products, electronics & electricals, glass, machine tools, metal & metal products, textiles, apparels & technical textiles and miscellaneous. According to Ficci, the findings reflect a rebound in the sentiment for production in Q2-FY27 compared to the previous quarter, indicating signs of recovery from the West Asia crisis.

# Amazon Prime bets on tier-2, -3 cities and prime-only discounts to drive festival shopping

**Jyoti Banthia**
Bengaluru

Amazon Prime is seeing its customer base deepen beyond the metros, with 70 per cent of new members coming from tier-2 and tier-3 cities, even as the company expands its proposition around savings, speed and convenience.

Amazon is on track to double its 2023 Prime membership base by the end of this year, noted Akshay Sahi, VP – Prime & Customer Fulfilment Experience, India and Emerging Countries, Amazon.

**MEMBER GAINS**

Prime members shop five times more frequently than non-members on *Amazon.in*, while the top 10 per cent of members save more than eight times their membership cost through savings and benefits. Half of Prime members get back more than five times their membership cost.

Ahead of the Great Indian Festival, Amazon is looking to deepen that value proposition through Prime-only offers. Members will get an additional 5 per cent discount across lakhs of products, while customers who build carts worth ₹2,500 can get ₹250 back, over and above prices offered by sellers and brands.

Sahi said the expansion into smaller cities reflects the evolution of Prime from a metro-focused proposition into a broader India offering.

Akshay Sahi, VP – Prime & Customer Fulfilment Experience, India and Emerging Countries, Amazon

"Over the past five years, around two-thirds of our new Prime members have come from Tier-2 and Tier-3 cities."

Amazon is also seeing higher shopping frequency among Prime members, with grocery emerging as an important driver of repeat purchases. Sahi said customers who have had a good experience in one category are increasingly willing to explore others, while the combination of convenience and savings further encourages shopping frequency.

**LOGISTICS PUSH**

The company is stepping up its logistics infrastructure to support the expected festive demand. Amazon said it has invested ₹2,800 crore in its operations network and associate safety and wellbeing in 2026. It has also added 20 fulfilment centres, six sort centres and 150 last-mile delivery stations, while creating more than 1.6 lakh seasonal work opportunities across 400 cities.

Sahi said Amazon's strategy is to use the increased engagement of Prime members to create value for brands and sellers as well.

"If a Prime member actually chooses your brand, then repeat rates are higher versus when you're just giving deals to every person, and they're taking it just for the deal."

The company is also expanding ultra-fast delivery through Amazon Now, which is now available in 120 cities and is planned to reach 300 cities.

Sahi said Prime's expansion is about delivering value rather than simply offering faster delivery. "Prime is a Bharat phenomenon, not a Metro or rich phenomenon."

This shift is also reflected in seller ecosystem, with more than 20 lakh sellers on the platform and over 3 lakh joining in the past year.

# Solinas Integrity targets ₹100 crore revenue in 2 years, eyes deeper global play

**Rohan Das**
Chennai

Moinak Banerjee, Co-Founder, Solinas Integrity

IIT-Madras-incubated robotics start-up Solinas Integrity expects to achieve a topline of ₹100 crore by FY29 as it looks to scale its international business and deepen its presence in Middle East and South-East Asia. It posted 2X revenue growth in FY26 and expects to close the current fiscal with a topline of ₹45-50 crore, Moinak Banerjee, Co-Founder, Solinas Integrity, told *businessline*.

Solinas builds AI-powered robotic systems for water and sanitation infrastructure. These robots can be used to clean and maintain pipelines, tanks, manholes, sewers and storm drains. International markets already account for four-to-five per cent of its business, with plans to scale it to 30 per cent in 3-5 years. Banerjee said that the firm is looking to bag larger orders from public departments while also expanding into tier-2 and tier-3 cities. "We are in a growth phase, and we believe that we have only touched the tip of the iceberg when it comes to smaller cities in India. The government funding for such infra has increased in recent years, and this is helping create demand," he said.

Solinas currently deploys its solutions in over 30 cities, including Chennai, Hyderabad, and Bengaluru.

It operates a production facility in Chennai with a capacity of about 100-120 robots a year. It is exploring plans for another facility in Maharashtra or Delhi.

On firms that import and assemble Chinese robots, Banerjee said that given the unique requirements of the Indian ecosystem, only companies with significant local R&D can build robots specifically for such conditions.

About 80 per cent of the overall cost of Solinas' robots is localised, while 15–20 per cent of the components are imported, including critical chips, power electronics, high-density motors, and camera components.

### IEA to decide details of G7 diesel and oil stocks

**Rome/London**: The governing board of the International Energy Agency (IEA) is expected to decide at an October 14-15 meeting the details of the diesel and crude oil stocks release announced by the Group of Seven last week, two people close to the matter said. G7 countries agreed last Friday to release 100 million barrels of diesel and crude oil from emergency reserves and pledged to refrain from energy export restrictions after pressure from US President Donald Trump. However, they did not provide the volumes of crude, diesel and other products to be released or say which countries would participate. REUTERS

### Neuberg, NM Medical to ramp up Maharashtra ops

**Chennai:** Neuberg Diagnostics has announced the consolidation of its Maharashtra operations with NM Medical. Patients across Mumbai and Maharashtra will benefit from convenient access to routine and highly specialised testing, advanced imaging and comprehensive preventive wellness, the company said. OUR BUREAU

### Russia denies plague cases in Siberian city

**Geneva:** Russian authorities told the World Health Organization on Tuesday that they had no cases of plague in the city of Irkutsk in Siberia, where a laboratory worker at a plague research institute died last week, according to a spokesperson for the UN health agency. Moscow, which is required under global health rules to respond to WHO requests within 24 hours, previously told the WHO that authorities were investigating whether pneumonic plague caused her death. "No case of this dangerous disease has been recorded in the city of Irkutsk, Russian Federation," Russian authorities said in an official response to a WHO request, read out by WHO spokesperson Christian Lindmeier at a Geneva press briefing. REUTERS

# World Bank raises India's FY27 growth forecast to 7.1 per cent

**CAUTIOUS STANCE.** Lender says medium-term prospects are strong but "external risks are elevated"

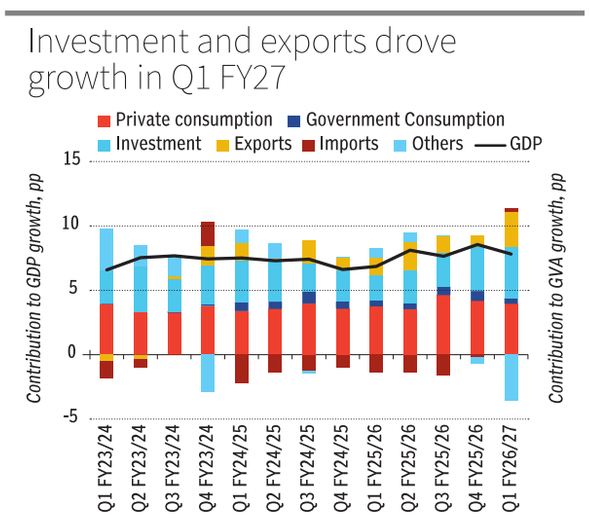

**Shishir Sinha**
New Delhi

The World Bank on Tuesday raised India's growth forecast for the current fiscal by 50 basis points to 7.1 per cent. However, it cautioned that growth during the second half of the current fiscal year is likely to slow down.

In its latest India Development Update, the multilateral agency noted that medium-term prospects are strong but also cautioned that "external risks are elevated, including downside risks related to global oil prices, El Nino and stock market corrections that would result in capital flow volatility."

Last month, the Asian Development Bank (ADB) and the OECD and other global agencies like S&P and Fitch raised India's FY27 GDP growth projection to around 7 per cent, boosted by robust June quarter economic activity and resilient domestic demand despite the West Asia conflict.

Paris-based Organisation for Economic Cooperation and Development (OECD) upped GDP growth forecast by 80 basis points to 7.1 per cent for FY27.

Source: National Statistics Office (NSO), CEIC, and World Bank staff calculations

**STRONG GROWTH**
India's growth accelerated to 7.8 per cent in FY26 from 7.2 per cent in FY25, driven by strong investment and solid private consumption, as favourable policy and credit environments outweighed trade tensions.

The medium-term prospects are strong, but also cautioned that external risks are elevated, including downside risks related to global oil prices, El Nino, and stock market corrections that would result in capital flow volatility.

It noted that rural consumption initially outpaced urban demand, supported by strong agricultural performance, while urban consumption strengthened later in the year following income-tax relief and GST cuts.

The momentum has carried into FY27, with GDP growing 7.8 per cent in Q1, above expectations, before moderating in subsequent quarters, it said.

Private consumption is expected to remain the main driver of growth, although a rainfall deficit through August is likely to weigh modestly on rural demand, while subdued government consumption will stay muted.

**INVESTMENT OUTLOOK**
The investment outlook is broadly unchanged, with heightened global uncertainty weighing on private investment as frontloading fades, partly offset by supportive financial and policy conditions, including stronger public investment, it said.

India's exports have performed better than expected and are likely to provide the main upside to the FY27 growth outlook relative to the April forecasts, it said.

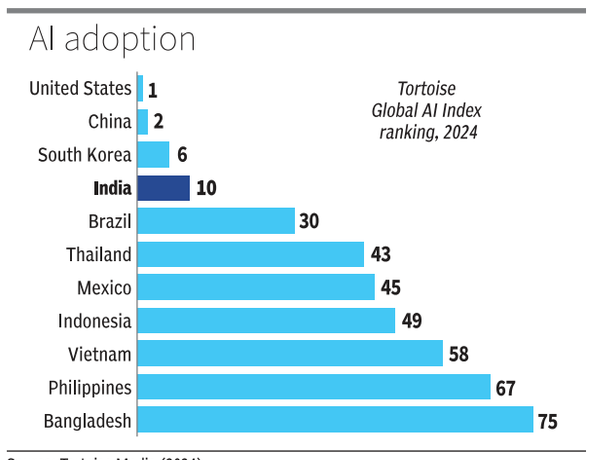

On the supply side, it said, the industry is now forecast to perform better than initially expected and offset a weaker agricultural outlook. Since April, industrial activity has exceeded expectations despite global headwinds.

This partially reflects the stronger-than-expected front-loading earlier in the year, with infrastructure and construction goods growth accelerating to 7.2 per cent in Q1 from 6.1 per cent last year, as well as the higher summer utility demand, which drove the electricity sector to expand by 9.3 per cent in Q1 compared to a 1.5 per cent contraction last year. Although above-average rainfall since July narrowed the monsoon deficit, the overall rainfall shortage during the south-west monsoon has weakened agricultural prospects, it said.

It also said the services sector growth remained elevated despite a slowdown from the high base in FY26.

Assuming the energy supply chain returns to pre-conflict (West Asia conflict) conditions in early 2027, it said growth is projected to accelerate to 7.2 per cent in FY28 and ease to 7 per cent in FY29, in line with the economy's medium-term potential.

# India among top 10 leading emerging markets in AI readiness: World Bank

Source: Tortoise Media (2024)

**Shishir Sinha**
New Delhi

Noting that India figures in the top 10 economies in AI readiness, the World Bank on Tuesday said India is well-positioned to harness artificial intelligence (AI), with the help of its large technical workforce, globally integrated IT sector and digital public infrastructure.

"India is one of the top 10 leading emerging-market performers on AI readiness," said Paul Procee, World Bank Acting Country Director for India. Further harnessing AI as a development tool – not just a technology – could be one of the most powerful levers India has to boost productivity and improve public services.

**AI IN INDIA**
In its latest report titled 'India and Artificial Intelligence: Seizing the Development Opportunity', the World Bank said private investment in AI in India more than tripled to $4.1 billion in 2025 from $1.2 billion in 2024.

At the same time, the number of professionals employed by Global Capability Centres (GCCs) rose to 2.36 million in 2025 from 1.9 million a year ago, it said.

It called for cross-cutting policy measures to deepen AI-enabling infrastructure, improve the business environment, broaden access to AI and enhance labour capacity so that the benefits of the technology are widely shared.

It recommended strengthening workforce skills, creating a more business-enabling environment, and improving physical as well as digital infrastructure.

The World Bank Group is also investing through AgriConnect in 'small AI' targeted and locally adapted tools aimed at ensuring that the benefits of AI reach a wider section of the population while supporting workers through the transition, he said.

**LOCAL CONDITION**
The India Development Update is a companion to the World Bank Group's South Asia Economic Update, which examines economic developments and prospects in the region.

The latest South Asia Economic Update projects that South Asia will grow 6.9 per cent in 2026, retaining its position as the world's fastest-growing region, the report said.

For most of South Asia, the biggest gains from AI are likely to come from adopting and adapting the technology to local conditions.

"The adoption of AI has the potential to transform South Asia's development trajectory by boosting labour productivity, expanding export opportunities, and improving public service delivery," said Franziska Ohnsorge, World Bank Group Chief Economist for Asia. However, to reap these benefits, governments need to address the foundational gaps that hold back adoption, she added.

# Beyond the GI tag, Tamil Nadu looks to build premium farm brands for export

**T E Raja Simhan**
Chennai

Tamil Nadu is shifting its Geographical Indication (GI) strategy from just securing tags for traditional agricultural products to getting the stakeholders to monetise the geographical identity of those products.

The State has already secured GI registration for nine agricultural commodities and has filed applications for another 32 products, which are under scrutiny at the GI Registry.

It plans to apply for GI registration for 11 more agricultural products during 2026-27, taking its pipeline to 52 products, said Chandra Sekhar Sakhamuri, Director of Agricultural Marketing and Agri Business, Government of Tamil Nadu.

The test is whether the GI tag can translate into better prices and wider markets for farmers, he told *businessline*.

**USER CERTIFICATES**
"We have begun addressing that gap by pushing Authorised User Certificates for farmers producing GI registered commodities. During 2026-27, applications for authorised user registration have been filed for 2,622 farmers and are under scrutiny at the GI Registry," he added.

**The GI certification allows** producers within the notified geographical area to legally use the GI name and logo

The certification allows producers within the notified geographical area to legally use the GI name and logo. According to the State, it can help safeguard genuine producers, prevent misuse of the GI identity and improve branding, market access, value addition and export opportunities.

**GROWING PORTFOLIO**
Tamil Nadu's GI portfolio is increasingly broad.

The nine products that have already secured registration include Panruti jackfruit, Panruti cashew, Chettikulam small onion, Puliyankudi acid lime, Kavindhapadi *nattu sakkarai* (raw cane sugar) and Thooyamalli rice.

The next batch includes products ranging from 'Salem Kannadi Kathiri' and Krishnagiri panneer rose to Kolli Hills pepper and Meenambur seeraga samba rice. The State's proposed applications for 2026-27 include Salem manjal (turmeric), Ooty poondu (garlic), Manapparai kathirikkai (brinjal), Kancheepuram parimilagai (chilli) and Cuddalore vetiver (khus grass), he said.

# 'India is an important sourcing and manufacturing base for Crocs'

**Meenakshi Verma Ambwani**
New Delhi

Footwear major Crocs has identified India as among its priority markets, which has also emerged as a strategic sourcing and manufacturing hub for its global operations.

The brand, known for its signature clogs, witnessed double-digit growth in India in the June quarter and is also looking to open more company-owned stores to complement the partner-owned retail footprint in the country.

It is also focusing on expansion into newer categories while strengthening omni-channel play.

Varun Sehgal, SVP & General Manager – APAC, Crocs, told *businessline* that the company recently elevated India among its "tier-1 priority markets."

**DOUBLE-DIGIT GROWTH**
"In the APAC region, India, China and Japan are among the critical markets that we are focusing on in terms of growth, and we see huge potential in the Indian market. In the June quarter, India was among the markets that delivered double-digit growth, and the momentum continues," he added.

> In the APAC region, India, China and Japan are among the critical markets that we are focusing on in terms of growth
>
> **VARUN SEHGAL**
> SVP & General Manager – APAC, Crocs

India has also emerged as a global strategic sourcing and manufacturing base for the footwear major, through five partner-run factories.

"We have a diversified supply chain, and India is an important sourcing and manufacturing base for us. So that's also helped address some of the geopolitical concerns. We continue to expand the capabilities around our supply chain in the country, which services not just India but also our other global markets," he added.

**RETAIL STRATEGY**
Talking about the company's retail strategy, Sehgal said, "At the start of the year, we had about 300 stores, and this year we have added over 20 stores. The majority of them are partner-led. Opening company-owned stores is a new part of our strategy that we are executing in India. We will be opening a new company-owned store in Greater Noida later this year, as part of this strategy."

The casual footwear major said expansion by partners is enabling the brand to garner broader geographic reach, especially in tier-2 and tier-3 markets. He added that the company is also focusing on an omni-channel expansion growth strategy, considering India is home to a large base of younger consumers who are digitally-savvy.

"While the classic clogs are the foundation, we are focusing on product innovation and expansion into new categories with a continued focus on personalisation. We have seen great results with sandals in the Indian market," he said.

"We have also gone into accessories and launched bags. We have also launched the Echo franchise and Echo II collection," Sehgal further added.

# MEA condemns Hormuz attack on commercial vessel that injured 11 Indian seafarers

**Amiti Sen**
New Delhi

The Ministry of External Affairs (MEA) has condemned an attack on a Panama-flagged commercial vessel on Tuesday while it was transiting the Strait of Hormuz, in which 12 crew members, including 11 Indian nationals, were injured.

The MEA called for an immediate end to attacks on commercial shipping in the region.

"We condemn the attack... The continuing incidents of attacks on shipping in the region remain a cause of deep concern for India. We reiterate our call for an immediate cessation of such attacks in the interests of peace and stability in the region," the MEA said in its statement.

For India, the security of the route is particularly important given the large number of Indian seafarers working on merchant vessels operating through the Gulf and the country's dependence on energy supplies passing through the region.

The vessel, *MT On Peace*, was struck by a projectile off the coast of Oman early on Tuesday.

Of its 19-member crew, 17 are Indian nationals, and 12 crew members were injured, including 11 Indians, the MEA said. With assistance from Omani authorities, the injured sailors were evacuated to Khasab, where they are receiving medical treatment.

## QUICKLY.

### Gold gains on softer Fed rate expectations

Gold edged up on Tuesday as receding expectations of a Federal Reserve interest rate hike this month countered pressure from a firm US dollar and elevated Treasury yields. Spot gold rose 0.7 per cent to $4,168.89 per ounce by 1139 GMT. US gold futures for December delivery added one per cent to $4,196.90. Silver gained 0.6 per cent to $61.4419 per ounce. REUTERS

### Copper drifts higher on rally in tech stocks

**London:** Copper prices gained for a third straight session boosted by a rally on stock markets, a weaker dollar and expectations of firmer demand. Benchmark three-month copper on the LME was up 0.1 per cent at $14,420 a tonne. LME copper has climbed 16 per cent so far this year. Aluminium gained 0.7 per cent to $3,148. REUTERS

### Crude oil slips as G7 stocks ease supply woes

**London:** Crude oil fell by more than $2 as rising West Asian crude exports and a G7emergency stockpile release eased supply concerns. Brent crude futures were down $2.77 at $97.55 a barrel at 1302 GMT. US WTI crude futures fell $2.15 to $87.28. REUTERS

# Red chilli area likely to rise 30 per cent

**CROP PROGRESS.** Recent wet spell aids transplanting in AP, Telangana; MP arrivals weigh on Teja prices

**Vishwanath Kulkarni**
Bengaluru

Red chilli acreage is expected to rise 20-30 per cent this year as farmers expand cultivation in key producing States, including Andhra Pradesh, Telangana, Karnataka and Madhya Pradesh. However, despite the increase in area, the crop is likely to be similar to last year's or only marginally more as dry weather and high temperatures linked to El Nino could affect yields, industry stakeholders said.

"The overall area increase could be 20-30 per cent this year. In Andhra Pradesh and Telangana, the area is up around 30 per cent, while in Karnataka, the increase is about 25-30 per cent," said Velagapudi Sambasiva Rao, President, Chilli Exporters Association, Guntur.

Recent rain enabled farmers to take up transplantation, he said. But concerns over El Nino kept the expansion below potential.

**WEATHER WOES.** Women workers grade red chillies in Prakasam district of Andhra Pradesh. El Nino-linked dry weather and high temperatures are affecting crop yields KOMMURI SRINIVAS

"If not for the fear of El Nino conditions, acreage could have been higher by around 50-70 per cent as farmers had got good prices last year," Rao said.

**MP LEADS**

Sandeep Voddepalli, Vice-President, Spices and Herbs, BigHaat India, said overall acreage was expected to rise, but below the earlier estimate of about 40 per cent because of lower rainfall and high temperatures.

Madhya Pradesh is expected to see the strongest growth, with acreage rising 40-50 per cent. The crop is performing well, harvesting has begun and arrivals have started at *mandis*. The crop size could be about 50 per cent higher than last year, Voddepalli said.

Harvesting in Madhya Pradesh starts in October, followed by Karnataka in November, Andhra Pradesh in December and Telangana in January.

**KARNATAKA WEATHER**

In Karnataka, acreage could rise about 50 per cent, particularly for the colour-rich Byadgi varieties such as KDL and Dabbi, following good prices last year.

However, acreage under coloured hybrids such as 5531 is up about 20 per cent, while high temperatures and deficient rainfall have affected the crop. About half the chilli-growing area in Karnataka is performing well, while the rest is affected by water shortages, he said.

Recent rain in the Bellary region helped complete the transplantation process. The recent spell of rain in north Karnataka is seen benefiting the crop, said Basavaraj Hampali of Hampali Traders in Hubballi.

**AP, TELANGANA LAG**

In Andhra Pradesh and Telangana, transplantation is delayed by nearly 40 days, compared with last year. The acreage is expected to be 15-20 per cent higher, but crop performance has been affected by weather conditions, Voddepalli said.

Andhra Pradesh's crop is expected to be similar to last year's. In Telangana, the acreage under major varieties such as Teja has increased 15-18 per cent, but high temperatures are affecting crop growth. The State could see a 20-25 per cent drop in yields, potentially resulting in a crop 5-10 per cent lower than last year.

The overall chilli crop was about 1,200 million kg (mkg) last year. This year, it could range between 1,200 mkg and 1,350 mkg, depending on weather conditions, he said.

**TEJA PRICES SOFTEN**

Arrivals from Madhya Pradesh, coupled with weak demand from China, have softened the prices of Teja chilli, the pungent variety, while the prices of other varieties remain steady, Rao said.

Teja prices had declined about 10 per cent and were currently around ₹210 a kg, he said.

Rao estimated current stocks at 70-80 lakh 40-kg bags, against the monthly consumption of about 20 lakh bags.

# Kashmir saffron farms face heat stress as prolonged dry spell threatens crop

**Gulzar Bhat**
Srinagar

A prolonged dry spell and unusually high temperatures are taking a toll on saffron farms spread hundreds of hectares in Kashmir, particularly in Pulwama and the Karewa plateau of Budgam district.

The Valley has experienced predominantly dry weather since September, with temperatures in October rising to unusually high levels. Srinagar recorded a maximum temperature of 31.2°C on October 4, the second-highest October temperature since 1935, said Mukhtar Ahmad, Director, Meteorological Centre, Srinagar.

On October 5, the city recorded 31°C, around 5.6°C above normal, Ahmad told *businessline*.

**MOISTURE DEFICIT**

Amid the heat, saffron growers are struggling to maintain adequate soil moisture, raising concerns over vegetative growth and flowering.

Ali Mohammad, a farmer cultivating more than six *kanals*, said he dug a well in the middle of his field to secure a water source. "I am planning to install drip irrigation," he said.

The prolonged heat and lack of moisture have begun affecting saffron corms — the underground structures from which the plant grows. "The corms have started drying up because of the continuous heat," Mohammad said.

**FLOWERING AT RISK**

October is crucial for saffron as the crop enters its vegetative growth and flowering stages. Adequate soil moisture is important for healthy growth and flowering, while prolonged dryness can stress the crop.

**The prolonged heat and lack of moisture** have begun affecting saffron corms — the underground structures from which the plant grows

Abdul Majeed, another saffron grower, said farmers faced the prospect of significant losses if the dry spell continued. "If the current dry weather persists for a few more days, it will spell doom for an already declining crop," he said.

**POOR SEASON?**

Saffron cultivation is a key source of livelihood for around 20,000-25,000 families in Kashmir, which typically produces 13-14 tonnes of the spice annually.

Growers are increasingly worried about another poor season, saying repeated production fluctuations and rising input costs had left them with little financial cushion to absorb further losses.

"We have been witnessing a significant dip in yields over the last few years amid the loss of farmland and erratic weather conditions. Another poor season would put further pressure on growers who are already struggling with rising input costs and declining returns," Majeed said.

# Monsoon transition keeps South wet as Bay system brews

**Vinson Kurian**
Thiruvananthapuram

The South-West monsoon showed little sign of retreating on Tuesday, with its withdrawal line unchanged from Monday even as heavy rain continued across the South Peninsula, setting the stage for a potentially wet transition to the North-East monsoon.

The India Meteorological Department (IMD) expects the conditions to become favourable for the monsoon's withdrawal from more parts of East and North-East India and adjoining areas of north Peninsular India during this week and into the next. But the transition could be less orderly than usual, with the retreating South-West monsoon and advancing North-East monsoon potentially overlapping.

The situation could become more significant with a weather system likely to develop over the Bay of Bengal.

**MORE RAIN AHEAD**

Several rain-producing systems remained active on Tuesday. Cyclonic circulations persisted over south coastal Odisha and the adjoining north-west Bay of Bengal, the south-east Arabian Sea off the Kerala coast and north Tamil Nadu.

**DIP IN MERCURY LEVELS.** For the second day, heavy rain lashed the hill station of Udhagamandalam SATHYAMOORTHY M

A trough extending from the Gulf of Mannar to Madhya Maharashtra across Tamil Nadu and interior Karnataka was also helping sustain moisture feed and unstable weather over the region. The IMD expects unsettled weather to persist over the next few days, with isolated heavy rain, fairly widespread to widespread rainfall, thunderstorms, lightning and gusty winds likely across large parts of the South Peninsula. The continuing rain could delay the further withdrawal of the South-West monsoon for a few more days.

A more consequential development could emerge over the Bay of Bengal. The IMD expects a cyclonic circulation to form over the north Andaman Sea by Monday. It could consolidate into a low-pressure area the following day and, if conditions remain favourable, intensify into a depression over the central and adjoining south Bay of Bengal around October 15, close to the normal onset date of the North-East monsoon.

# Kerala agri university teams up with flying club for drone pilot training

**Our Bureau**
Kochi

The Kerala Agricultural University (KAU) and Fuselage Flying Club Pvt Ltd have joined hands to expand drone pilot training and promote entrepreneurship in agriculture.

A memorandum of understanding (MoU) was signed by the KAU Registrar and Devika Chandrasekhar, Director, Fuselage Flying Club, to expand the activities of the Remote Pilot Training Organisation (RPTO) under the university's Agri-Business Incubator.

The RPTO was established under a Nabard initiative to promote technological innovation in agriculture. Fuselage Innovations, which develops and manufactures agricultural drones, has received the national award for outstanding agricultural start-up. The pact will combine Fuselage's expertise in agricultural drone technology with KAU's academic and research capabilities, Vice-Chancellor T Sajitha Rani said. Customers buying drones from Fuselage will receive free drone pilot training, she said.

**WIDER USE**

Drone technology has applications in precision farming, crop monitoring, crop management and crop protection, and could help address labour shortages and improve farm efficiency.

KAU's Drone Pilot Training Centre has trained around 300 people in drone-based agricultural technologies, of whom more than 100 have obtained licences, said KP Sudheer, Head, Agri-Business Incubator, KAU.

# 27% ethanol blending may expose sugar sector's shortcomings, says industry expert

**Subramani Ra Mancombu**
Chennai

The sugar industry could face a different problem in achieving the 27 per cent ethanol blending target, and it is something that will expose the sector's shortcomings, said Anand Mahurkar, Founder & CEO, Findability Sciences, a global applied AI and data logistics firm.

"Hitting 20 per cent (ethanol) blending five years ahead of schedule was a policy win. Getting to 27 per cent is a different kind of problem — it's an operations problem," he told *businessline* in an email interview.

For feedstock diversification, sugar mills have to run sugarcane, grain and surplus foodgrain streams through the same distillery infrastructure without losing consistency in ethanol yield or quality.

Anand Mahurkar, Founder & CEO, Findability Sciences

**OUTPUT SWINGS**

The reality is that sugarcane availability itself swings year to year with rainfall and acreage decisions. "You have a supply chain that has to plan months ahead, with imperfect information. The mills that struggle most aren't the ones lacking capacity," he said.

These mills are the ones who make sourcing, crushing and diversion decisions on gut feel rather than on real demand and yield signals. That will get exposed while trying to achieve a 27 per cent blend, he said.

Stating that most of that value chain runs on three separate clocks, Mahurkar said, "The farmer is estimating yield based on experience and the season so far. The mill schedules crushing based on cane arrivals it can see, not cane that's still three weeks from harvest. The distillery is deciding how much molasses to divert to ethanol based on last month's numbers, not next month's supply."

**REAL CONTRIBUTION**

AI's real contribution is collapsing those three clocks into one. Satellite and field data can tell a mill what's coming before it arrives at the gate. That forecast can feed directly into distillery diversion planning.

When pushed back to the farmer, the same data helps with harvest timing and crop health decisions.

Sugar pricing is set by government policy, global markets and MSP mechanisms. Cane cost is also largely fixed. "So when both ends of the profit and loss are constrained, the only lever left is what happens in between: Recovery rates, crushing efficiency, energy consumption per tonne and downtime," he said.

On how the company is helping sugar mills accelerate digital transformation through its AI-powered platform, he said its Stoma Suite does the job.

"Stoma Insight" works downstream, optimising crushing, recovery and energy use inside the mill itself. Together, the Stoma Suite gives an operator one continuous view from field to factory, instead of two disconnected ones.

# ANNAM.AI launches AI-based agri learning platform for children

**Our Bureau**
Mangaluru

IIT-Ropar's Centre of Excellence for AI in Agriculture, ANNAM.AI, has launched AVNI, a digital learning initiative combining AI and experiential learning to build agricultural awareness among children.

Supported by the Union Ministry of Education, ANNAM.AI has developed 'AVNI – Grow with Nature', a web and mobile app that uses AI-powered exploration to introduce children to agriculture and nature through their surroundings.

Designed by Mukesh Saini, Co-project Director, ANNAM.AI, the free platform enables children to identify and learn about crops, fruits, vegetables, spices, cereals and millets. It offers content in Hindi and English, along with audio for younger children.

**UNIQUE FEATURES**

The app includes daily challenges, Nature Points, a digital Nature Book and Nature Gallery, as well as interactive features such as Crop Compare.

"AVNI has been developed as a free, ad-free and privacy-focused learning platform, keeping the experience simple, safe and focused on learning and discovery," Saini said.

"AVNI is where AI meets experiential learning," said Pushpendra P Singh, Project Director, ANNAM.AI, IIT-Ropar. A crop in a school garden, a fruit at home or a plant in the neighbourhood can become an opportunity to learn, helping children understand the plants they see, the food they eat and the ecosystem, he said.

# India meets 84% of 2037 cold storage target, but chain remains fragmented

**Our Bureau**
Mangaluru

India has achieved 84 per cent of the cold storage capacity estimated to be required by 2037-38, but about three-fourths of the capacity is used for potatoes and more than half is concentrated in Uttar Pradesh and West Bengal, according to a report by Ficci and Grant Thornton Bharat.

The report, *India's cold chain: From storage to a chain*, said two decades of investment had created a substantial storage base, providing a foundation for the next phase of cold chain development.

India has 40.22 million tonnes (mt) of cold storage capacity across 8,815 facilities, against the 48 mt requirement estimated for 2037-38.

**INFRA GAP**

The report identified first-mile handling and refrigerated transport as priorities.

While cold storage has reached 84 per cent of the long-term target, pack-houses are at just 0.4 per cent, reefer vehicles at 3.8 per cent and ripening chambers at 7.1 per cent of their targeted requirements.

**MOUNTING LOSSES**

Building the pack-houses, reefer vehicles and ripening chambers envisaged under the India Cooling Action Plan could require about ₹1.75 lakh crore through 2037-38, or around ₹8,800 crore annually, the report said. The investment assumes wider economic significance as India loses an estimated 17-47 mt of food annually across horticulture, dairy, meat, poultry and fish. Post-harvest losses across 54 crops are valued about ₹1.5 lakh crore a year.

**POLICY PUSH**

The report recommended prioritising capital support for farm-gate pre-cooling, feeder pack-houses and pooled refrigerated movement.

It also proposed a unified national cold chain standard, under which every batch would carry a machine-readable temperature record throughout its journey.

The report showed that three-fourths of cold storage capacity is used for potatoes, while India loses 13.9-43.4 million tonnes of fruits and vegetables annually.

# Consider short positions in aluminium futures

**Akhil Nallamuthu**
bl. research bureau

Aluminium futures have been in a downtrend for over two weeks now. While there has been a rebound in the last two sessions, there are key resistances ahead which could cap the upside.

**COMMODITY CALL.**

The October futures, now trading at ₹341/kg, started the decline after facing a barrier at ₹355 two weeks ago. After marking a low of ₹333.2 on Monday, the contract has rebounded.

There is an upcoming trendline resistance at around ₹343, followed by another barrier at ₹345. Aluminium futures ought to breakout of ₹345 to establish a sustainable rally. Resistance above ₹345 is at ₹355.

However, if the contract resumes the downtrend, it could decline to retest ₹335. A breach of ₹335 could drag the contract to ₹327.

**TRADE STRATEGY**

Short aluminium futures at ₹342. Place initial stop-loss at ₹347. When the contract falls to ₹335, alter the stop-loss to ₹340. Book profits at ₹330.

# SunBridge BioEnergy starts new ethanol facility at Seoni

**Our Bureau**
Bengaluru

SunBridge BioEnergy Ltd, the bioenergy arm of the SunBridge Group, has commenced commercial production at its grain-based, fuel-grade ethanol manufacturing facility in Seoni in Madhya Pradesh.

The facility has a production capacity of 300 kilolitres per day (KLD), with a storage capacity of 11,000 kilolitres and spans approximately 117,560 sq m.

The company is further strengthening its ethanol portfolio, with capacity set to reach 700 KLD through the soon to be operationalised 400 KLD facility in Raipur, Chhattisgarh, the company said in a statement.

The SunBridge BioEnergy Seoni plant is designed to maximise resource efficiency in ethanol production, generating co-products, such as distillers dried grains with solubles (DDGS) and distillers corn oil (DCO), primarily used in poultry and cattle feed.

**SCALABLE PLATFORM**

The facility also incorporates water recovery and reuse systems, supported by zero liquid discharge operations, to promote efficient utilisation of natural sources.

Anuj Agarwal, Founder & Chairman, SunBridge Group, said, "The commencement of ethanol production at our Seoni facility marks an important step in SunBridge's journey into bioenergy. Our focus is to build a scalable bioenergy platform that brings together energy and resource efficiency, while creating meaningful value for farmers and rural economies. The Seoni facility is the beginning of this journey, and we see significant potential to build on this foundation as India's bioenergy ecosystem evolves transitioning towards sustainable energy and reducing dependence on fossil fuels," he added.

SunBridge BioEnergy utilises damaged foodgrains, including maize and broken rice, to produce fuel-grade ethanol. This grain-based ethanol production supports farming communities by utilising damaged and broken rice that is not suitable for human consumption.

**SMART CLEAN**
ROBOTIC CLEANING SOLUTION
Specially Formulated for Tiron Robot Vacuum Cleaner
Deep clean, finish fresh.
Deep Cleaning
Refreshing Fragrance
Safe for Robot Vacuum Cleaners
Leaves Floors Clean & Fresh

**TVC** Tiron Vacuum Cleaner
No cord, No bending, No dust.
- Powerful brushless motor for strong suction
- Cordless & lightweight
- Self-standing design
- Anti-tangle motorized floor brush
- Detachable & rechargeable battery
- Multiple speed/suction modes
- HEPA + stainless-steel filtration system
- One-touch dust disposal & wall-mount storage

**TVMR** Tiron Vacuum Mop Roller
Vacuum and mop in one go.
- 12,000Pa Suction
- 4000 mAh Battery
- Cordless Vacuum with Wet & Dry Cleaning Modes
- Separate Tank for Fresh & Waste Water
- LED Intelligent Display for Real-Time Updates
- Full Tank, Empty & Leakage Detection
- Self Clean Mode

**TSM** Tiron Steam Mop
Germ-free floors, zero chemicals.
- Steam mop, steam cleaner & garment steamer.
- Removes dirt, stains, and grease using only steam.
- Heats up in 25 seconds.
- Up to 100°C steam temperature.
- Anti-leak & overheat protection.
- Works on multiple surfaces.

**TRV 10P MAX**
Cleans while you're at work.
- 5000Pa Suction Power
- Anti Fall & Anti Collision
- 2600 mAh Battery
- 83mm Slim Design

**THS & TLS**
Sparkling sinks, no scrubbing.
- Motorized Spring Scrubber for Deep Cleaning
- Dual Speed Options
- Stylish, Modern Design for Comfort & Efficiency
- Perfect for Kitchen Counters, Sinks, Car Cleaning and More!
- Colorful Digital Display for Easy Control

**THVC**
Quick clean-ups for car and sofa.
- 14,000Pa Brushless Suction
- 3-in-1 Design (Vacuum + Blower + Portable)
- Cordless & Ultra-Lightweight
- Type-C Fast Charging
- Washable HEPA Filter

### Bitchat removed over law-and-order concerns

**New Delhi:** Amid the removal of Jack Dorsey's Bitchat from app stores in India following the IT Ministry's order, government sources on Tuesday said the Bluetooth messaging app was a law-and-order concern and had to be removed. The government is duty-bound to maintain law and order, sources asserted. Bitchat, they said, allowed anyone to turn on Bluetooth and send messages through several hops. Bitchat came under government scrutiny in July this year, coinciding with the Cockroach Janta Party's protests over exam paper leaks. PTI

### India, six others in race to host 2036 Olympics

**Berlin:** Seven countries, including India, Germany and Qatar, are in the running to stage the 2036 Summer Olympics, the International Olympic Committee said on Tuesday. Hungary, Turkey, South Africa and South Korea complete the list of interested parties, who are in preliminary talks with the IOC, with a shortlist to be drawn up in March next year and some countries progressing to a strategic dialogue phase. Preferred hosts will be named in 2028 and a final decision is expected in mid-2029, the IOC said in a statement. Any other interested countries have until October 31 to come forward but new candidates look unlikely with less than four weeks before the deadline. Los Angeles will host the 2028 Summer Games and Australia's Brisbane will stage them four years later. REUTERS

# Centre weighs revival of ATF price stabilisation scheme amid rising fares

**FAILED TAKE-OFF.** Framework may be reworked with airline and OMC inputs after ₹10,000 crore scheme lapsed

**Our Bureau**
New Delhi

The Centre is considering reviving its aviation turbine fuel (ATF) Price Stabilisation Fund (PSF) scheme amid rising jet fuel costs, and their knock-on effect on airfares, Civil Aviation Minister K Ram Mohan Naidu told reporters on Tuesday.

Speaking on the sidelines of the IFQM Symposium 2026 event in New Delhi, Naidu said the Ministry was in touch with airlines and OMCs over fuel surcharges and airfares.

He said the government was trying to find a middle ground through discussions with both sides, while noting the impact of the situation in West Asia.

**COSTLY TRAVEL.** The rise in fuel costs has prompted airlines to revise fuel surcharges, adding to the cost of air travel

**RISING COSTS**
The rise in fuel costs has prompted airlines to revise fuel surcharges, adding to the cost of air travel.

On Monday, airline major IndiGo announced revised fuel charges for all new bookings from October 6, ranging from ₹375 to ₹1,300 on domestic routes, and ₹1,000 to ₹10,000 on international routes. The airline cited a month-on-month increase of over 14 per cent in ATF prices, taking fuel costs to among their highest levels in the last decade.

In July, *businessline* had reported that the Centre's ₹10,000 crore ATF PSF scheme had lapsed after no domestic airline signed the mandatory memorandum of understanding (MoU) with State-owned OMCs within the prescribed timeframe.

According to sources cited in that report, the voluntary mechanism failed to take off despite the Centre operationalising the framework following the West Asia crisis. In June, the Cabinet had approved the one-time ₹10,000 crore fund to protect airlines from sharp volatility in global ATF prices triggered by geopolitical tensions in West Asia.

The scheme was designed to compensate OMCs for losses arising from supplying jet fuel to participating airlines at a predetermined benchmark price.

**WEST ASIA CRISIS**
Meanwhile, the Federation of Indian Airlines (FIA), in a letter dated September 25 to the minister, sought urgent intervention to address financial pressures arising from the continuing West Asia conflict, airspace restrictions, rupee depreciation and elevated fuel prices.

The federation, which represents Air India, IndiGo and SpiceJet, said fuel now accounts for around 55–60 per cent of airline operating costs, compared with 30–40 per cent historically.

Accordingly, it sought a shift to cost-plus pricing for ATF used in domestic operations, instead of international benchmark-linked pricing. The FIA also urged the government to replace the percentage-based excise duty on ATF with a fixed-rate levy.

**NEW CHARGES**
Furthermore, it sought continuation of the 7 per cent value-added tax (VAT) rate on ATF in Delhi and Maharashtra, similar relief in other key States, and an extension of the 25 per cent reduction in landing and parking charges for domestic flights.

The federation warned that airlines could be compelled to withdraw from financially unsustainable routes if timely relief was not available.

# Navi Mumbai airport to augment staff, cut cargo delays

**Aneesh Phadnis**
Mumbai

The Navi Mumbai airport is addressing system glitches, augmenting its staff and improving its customer support for cargo operations following complaints from airlines and agents.

On October 1, custom brokers complained that the airport lacks experienced manpower and equipment to handle cargo volume. Europe-based Challenge Group suspended its freighter service to Navi Mumbai after four flights said the current operational service at the airport does not allow them to deliver reliable cargo services.

Acknowledging the concerns, the airport's head of cargo, Suresh Nair, wrote to custom brokers that corrective measures were being taken to reduce delays and improve operations.

"We understand that this transition has caused inconvenience and difficulties to some of you and we regret these unintentional developments and sincerely appreciate your support and co-operation," he said.

The airport said it will provide freight forwarders up-to-date information on flight clearances and clear timelines for delivery. The airport will also work with custom house agents to ensure all system-related issues are resolved promptly.

The airport is also augmenting its manpower with experienced resources for faster turnaround, said Nair.

**EASING OPS.** The airport said it will provide freight forwarders information on flight clearances and clear timelines for delivery

**The airport has** decided to waive additional demurrage being levied post the free period until Oct 15

**ADDITIONAL WAIVER**
The airport has also decided to waive additional demurrage being levied post the free period until October 15.

"While transitions of this scale can present challenges, our responsibility is to ensure that the impact is minimised and the experience remains smooth," he said.

# Francis Halzen wins the physics Nobel for work on high-energy neutrinos

**Press Trust of India**
Stockholm

Francis Halzen won the Nobel Prize in physics on Tuesday for his contributions to the IceCube Neutrino Observatory and his discovery of high-energy neutrinos of astrophysical origin.

"Francis Halzen has led an international team of researchers and engineers who have provided us with a fantastic instrument.

His tenacity and scientific vision has paved the way for a new kind of astronomy," Mark Pearce, Chair of the Nobel Committee for Physics, said in a news release.

Born in Belgium, the 82-year-old scientist is affiliated with the University of Wisconsin–Madison.

Francis Halzen

**SOUTH POLE**
The IceCube Neutrino Observatory is a research facility located at the South Pole in Antarctica, according to its website, and the University of Wisconsin–Madison is its lead institution.

Neutrinos are tiny cosmic particles with a mind-bogglingly small mass. Yet, they are everywhere.

Scientists can't glimpse the mysterious ghost particles zooming around on their own. Instead, they measure what happens when the tiny particles collide with other bits of matter, producing flashes of light or charged particles.

**GHOST PARTICLES**
Halzen studied a rare gang of neutrinos that scientists consider messengers from the cosmos, offering clues to how the universe evolved. His research into capturing neutrinos at the South Pole dates back to the 1980s.

# British author Jeffrey Archer dead

**Press Trust of India**
London

Bestselling British author Jeffrey Archer, whose career as a politician was derailed by a perjury conviction, has died. He was 86. Archer died "suddenly and peacefully" at his home on Monday, a day before the global release of his final novel, *Adam and Eve*, publisher HarperCollins said.

His writing career spanned five decades and helped him bounce back from financial ruin following some bad investments. His debut novel, *Not a Penny More, Not a Penny Less*, hit the shelves in 1976 and was said to have been inspired by his own experience nearly going bankrupt.

He went on to spend 14 years and five months on Britain's *Sunday Times* bestseller lists and over five years on *The New York Times* bestseller lists, selling 300 million books worldwide, according to HarperCollins.

Jeffrey Archer

**POLITICAL CAREER**
Archer climbed the ranks of Britain's Conservative Party under Prime Minister Margaret Thatcher and was appointed in 1992 to the House of Lords by her successor, Prime Minister John Major.

Archer was cast out of his political party just before he was jailed on perjury charges in 2001.

While running for Mayor of London in 1999, allegations emerged that Archer had lied in court during a libel case more than a decade earlier. He had sued a newspaper that accused him of paying a sex worker and won £5,00,000 ($661,153) in damages.

**LAST NOVEL**
Some of Archer's literary works addressed similar themes of gender bias and inequality. His upcoming novel *Adam and Eve* follows the daughter of an Earl who wanted a son so he could pass down his estate, and the son of a shepherd who wanted a daughter because he knew a son would be sent off to war. A love story and class commentary, Archer said, "*Adam and Eve* has proved the most satisfying thing I have ever written."

Archer is survived by his wife of 60 years, Dame Mary Archer, their two sons, two granddaughters and three grandsons, his publisher said.

# Delhi airport plan targets 125 m passengers by 2036

**Our Bureau**
New Delhi

The national capital's Indira Gandhi International (IGI) airport's latest master plan envisages expanding its annual passenger handling capacity to around 125 million by 2036, with a new pier at Terminal 3 (T3) and an automated people mover (APM) connecting terminals.

At present, the airport, managed and operated by Delhi International Airport Ltd (DIAL), has an annual passenger handling capacity of over 100 million.

Speaking at a select media briefing, Pradeep Panicker, President and CEO of DIAL, said the plan seeks to accommodate long-term traffic growth while retaining flexibility to adjust domestic and international capacity.

**EXPANSION**
The proposed development would retain the existing Terminal 2 (T2), alongside capacity enhancements at Terminal 1 (T1) and T3.

Accordingly, T1's annual passenger handling capacity would rise to 45 million, while T2 would remain at 14 million.

Further, T3 would expand to around 66 million, comprising 27 million domestic and 39 million international passengers.

Meanwhile, Panicker indicated that further modifications could potentially take the airport's overall capacity to around 129 million passengers.

The plan, he said, aims to strengthen Delhi airport's position as an international hub.

However, Panicker acknowledged that the near-term traffic estimate for 2026–27 could fall short of the earlier projection, which had been prepared before the West Asia crisis.

**CONNECTIVITY**
Additionally, a key component of the plan is the proposed APM, which would connect T1 and T3, along with Aerocity and the cargo area.

**TRAFFIC SURGE.** The proposed development would retain the existing T2, alongside capacity enhancements at T1 and T3

The system would also provide connectivity to the existing airport metro station, while T2 would be accessible on foot from the station area.

The APM project has previously been reported to entail an investment of around ₹3,000-4,000 crore.

Additionally, a separate pedestrian tunnel connecting the airport metro station with T2 is under construction and is expected to be completed shortly.

On terminal expansion, the next major phase would centre on the development of Pier E at T3, with an additional annual domestic passenger handling capacity of around 12 million.

The airport plans to begin this development in 2027, with Panicker indicating a construction period of around one-and-a-half to two-and-a-half years.

As per the plan, Pier E would include 12 contact stands, along with remote stands and associated airside infrastructure.

The expansion would also create additional passenger processing facilities on the left-hand side of T3 as passengers enter the terminal.

**EIGHT LANES**
Notably, the plan includes widening the main spine road leading to T3 and T2 from six lanes in each direction to eight, along with changes to terminal drop-off and arrivals pick-up areas.

Overall, the airport is seeking to increase its approved daily aircraft movement capacity from 1,570 to around 1,700 by summer 2027 through the availability of the fourth runway and procedural improvements.

# Jeffrey Archer, cricketing lore, and the ultimate underdog story

Remembering an unforgettable meeting with the prolific writer who talked about going flat out until the final page

**Chitra Narayanan**
New Delhi

When the announcement about *Adam and Eve*, to be published on October 6, came from Harper Collins, it came with the line that it would be Jeffrey Archer's final novel. For those of us praying that the prolific writer who whipped out so many unputdownable stories would change his mind, the hope died on October 5, when he breathed his last.

Archer's life was as colourful, if not more, than his books. He sold more than 300 million books, was an athlete, a cricket fanatic and a scandal-ridden politician, who served as a Conservative Member of Parliament until his political career ended in disgrace.

He was far from perfect, but the world that had read his first novel *Not a Penny More, Not a Penny Less* and acclaimed it as a storytelling masterpiece with fantastic plot twists, loved him. It is by far my favourite book of his too, and according to the author himself, of at least 25 per cent of his readers.

**LOVE FOR ARCHER**
A note from his publisher said, "His readers meant everything to him, and just yesterday he met and signed books for hundreds of fans at a sold-out event at the Leicester Square Theatre in London."

That line took me back to March 2013 when Archer was in India to promote his book *Best Kept Secret*. I met him soon after that signing session for an interview and asked him about the reader interaction.

**HUGE FAN BASE.** Archer during the launch of his book *Only Time will Tell* in Bengaluru in 2011

He admitted, "I was very tired signing book after book and the queue was still stretching out and I thought, why do I bother? Then immediately the thought struck: Would I like it if there were only 10 people here at the signing? Of course not. So, I said to myself, you are lucky, very privileged, and get on with the signing!"

**A CRICKET FAN**
Archer could charm anyone with his humour and razor sharp repartees. I remember chuckling throughout my interview in which we talked more cricket than books.

When I met him, an India-Australia Test cricket match was being played at Mohali, and Archer had the television set on in the room, half an eye on the action on the screen, breaking the conversation to yell excitedly when a wicket fell and expostulating about the rain delays.

When I apologised for coming between him and cricket, he said, "Yes, utterly inconsiderate of you, young lady." But we did talk books.

He talked about how he liked to juggle between short stories and full length novels as he liked the change of pace. He described how he kept collecting stories wherever he went and, when there was a big enough pile, would create a book of short stories.

Anyone who has read Archer will get the impression that he always favoured the underdog, and specialised in telling rags to riches stories. Archer's favourite authors were surprisingly Charles Dickens, HH Munro, Scott Fitzgerald and Guy de Maupassant. Among Indian authors, he enjoyed the stories of RK Narayan and Vikram Seth.

Looking back on that afternoon, I cannot help thinking that Archer's own life was the ultimate underdog script — a roller coaster of spectacular highs, devastating lows and a relentless refusal to ever stay down.

# JioHotstar expands to Middle Eastern, North African markets

**Our Bureau**
Mumbai

Reliance Industries' JioHotstar on Tuesday announced its entry into the Middle East and North Africa as a streaming destination within the app and website of the region's leading Starzplay.

JioHotstar will be available through Starzplay's plus plan at 34.99 Dirhams per month, giving audiences access to its multilingual library.

**GLOBAL AUDIENCE**
The Mena entry brings one of the world's most important regions for South Asian audiences into JioHotstar's purview.

Commenting on JioHotstar's expansion into the region, Amit Malhotra, Head of International Business, JioStar, said, "The strong early response to JioHotstar across the United Kingdom, Canada and Singapore has reinforced our belief in the global opportunity for Indian entertainment. Mena is a crucial next market, with one of the world's largest South Asian diaspora communities and a deep appetite for entertainment across languages. Our partnership with Starzplay is an important step in taking Indian stories, talent and cultural moments to audiences around the world."

Speaking about the partnership, Maaz Sheikh, CEO of Starzplay, said, "Cricket has given Starzplay a strong and lasting relationship with South Asian audiences across the region. JioHotstar allows us to extend that relationship beyond the match and into the entertainment households return to every day."
