The Trump administration said it would suspend the immigration programme for multiple tech firms, including Microsoft Corp, alleging widespread abuse of a worker visa system. "There has been no company in the US, unfortunately, that has abused this system more than Microsoft," Vice-President JD Vance said on Thursday during a briefing in Washington. **p8**

GST Council ends arrest powers of tax officers, lowers penalties

BIG REFORMS. Moves towards faster refunds, easier compliance, proportionate enforcement

Shishir Sinha
New Delhi

Finance and Corporate Affairs Minister Nirmala Sitharaman chairing the GST Council meeting on Thursday

The GST Council on Thursday recommended significant tax administration reforms, including the elimination of arrest powers for GST officers, an increase in the threshold for criminal prosecution and a reduction in general penalties. The Council also approved accelerated refund processing and simplified procedures for taxpayer registration and cancellation.

The approvals formed a sweeping package of process and enforcement reforms that will fundamentally change how businesses interact with the indirect tax system, shifting the emphasis from rate changes to faster refunds, easier input tax credit, automated compliance and a more proportionate enforcement.

MORE TRANSPARENT

In a social media post, Prime Minister Narendra Modi said: "The focus is clear: Faster decisions. Lower compliance costs. Automated refunds. Trust-based administration. These are in line with our constant efforts to make GST more efficient, transparent and citizen-friendly."

Addressing a press conference, Finance Minister Nirmala Sitharaman underlined that the arrest powers of tax officials had been removed. However, "in case of criminality, arrest can be made by enforcement agencies," she clarified.

PROSECUTION LIMIT

According to the Finance Ministry, the threshold for prosecution has been raised from ₹1 crore to ₹5 crore. The minimum punishment has been removed, while the punishment, whether a fine, imprisonment or both, will be left to judicial discretion in every case. The general penalty, which applies where no specific penalty is provided for, has been reduced from ₹25,000 to ₹10,000. A taxpayer who files late, makes a mistake or falls behind on payment will face recovery, interest and a proportionate penalty, and nothing beyond that.

However, issues related to allowing input tax credit for buyers even when the seller has not paid the tax, as well as input tax credit on motor vehicles, were referred to a Committee of Officers.

TECH SHIFT

The process reform package, coming a year after the Council's landmark rate rationalisation, seeks to put routine GST administration increasingly on the technology platform rather than in the hands of tax officers.

Rates were not reopened at the meeting, with the proposals instead looking to remove inconsistencies and ambiguities that have remained post the earlier exercise. Sitharaman said the GST Council had mostly addressed the aberrations because of ITC as also the duty inversion.

"I don't think there are many outstanding issues which are fundamental to ease of doing business or fundamental to anomalies and rates remain. So, yes, you can say GST next generation GST, 99 per cent issues have been addressed, rate or process," Sitharaman said.

The FM said the next-generation GST, which began with rate reductions, had emerged as a positive, transparent and stable source of revenue for both the Centre and the States. Rate revisions will now be done only once a year and made effective from April 1. The process reforms are scheduled to be implemented from April 1, 2027, and it will take about a year for the new system to fully stabilise, she added.

Coverage on **p2**

TCS beats Street expectations, with Q2 net rising 15% on AI-led growth

Vallari Sanzgiri
Mumbai

Tata Consultancy Services on Thursday reported a steady set of Q2 FY27 numbers, aided by growth in international markets and a rising contribution from AI-led engagements.

The tier-1 IT company posted a 14.9 per cent year-on-year rise in net profit to ₹13,884 crore, while revenue grew 11 per cent to ₹73,188 crore, surpassing street expectations of around ₹73,000 crore in revenue and ₹13,700 crore in profit. Growth was supported by large international deals, including engagements with Porsche and Best Buy, along with positive performance across most business segments.

AI REVENUE UP 19%

On a sequential basis, net profit rose 4 per cent, while revenue increased 1.26 per cent. The annualised AI revenue run-rate reached $3.1 billion, up 19 per cent quarter-on-quarter.

"This quarter, we announced two unique deals with Porsche and Best Buy, which represent a new category of transformation partnerships. Together with our clients, we are building repeatable value platforms that will industrialise AI at scale," said K Krithivasan, Chief Executive Officer and Managing Director. The total contract value (TCV) stood at $9.6 billion, slightly higher than the previous quarter. However, operating margin remained flat at 24 per cent, falling short of hopes for a stronger margin expansion. The board declared a second interim dividend of ₹12 per share.

Scorecard

TCS	Q2FY26	Q1FY27	Q2FY27
Revenue (₹ cr)	65,799	72,275	73,188
PAT (₹ cr)	12,960	13,420	13,884
Headcount	5,93,314	5,93,798	5,98,056
Attrition (%)	13.3	13.6	13.3
TCV ($ billion)	10	9.5	9.6

Source: Company results

MANY HEADWINDS

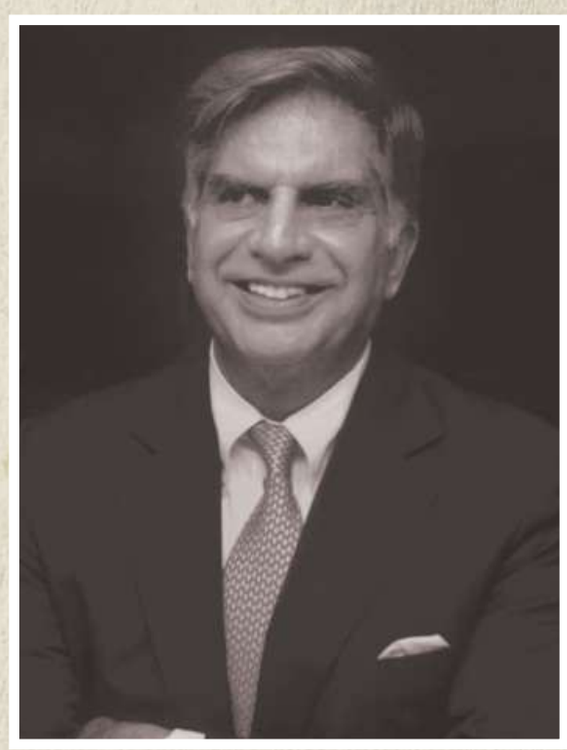

While the company outperformed consensus estimates, analysts pointed out that the growth remained heavily dependent on AI-related business, with headwinds from pricing pressures and the BSNL project affecting performance in India and the margins.

"Outlook remains dependent on identifiable growth catalysts rather than a broader demand recovery. Margins remain under pressure, with recovery dependent on the normalisation of investment-related costs," said Aarushi Sharma, Senior Analyst, Everest Group.

The TCS management said client demand remained focused on projects delivering measurable business outcomes, while discretionary spending continued to face scrutiny. "Demand for AI-native solutions, AI-led enterprise transformation and autonomous global business services (GBS) continues to accelerate, while cybersecurity remains a top priority for clients," said Aarthi Subramanian, Executive Director-President and COO, TCS.

The company ended the quarter with 5,98,056 employees, adding 10,000 freshers. Voluntary last 12 months (LTM) attrition stood at 13.3 per cent, while it increased bench strength and contractor hiring to support delivery requirements. It also stated a lower outlay of performance-linked bonus this time.

Faceless assessment of GST payers to come into effect next fiscal onwards

SINGLE-WINDOW SCRUTINY. To benefit around 2 lakh contributors falling under multiple CGST jurisdictions

Shishir Sinha
New Delhi

Finance Minister Nirmala Sitharaman on Thursday announced bringing in a faceless assessment system for around two lakh GST taxpayers registered under Central GST jurisdiction but having businesses in multiple States. The scheme will be launched in FY28.

RESOURCE UTILISATION
"We intend to bring a centralised tax administration for these multiple CGST jurisdiction taxpayers with a unified window for all their CGST-related functions," Sitharaman said on Thursday. The decision is not part of the GST Council meeting and was taken by the Central government, she told reporters after the meeting ended.

Currently, there are about 69.5 lakh taxpayers exclusively in the CGST jurisdiction. Nearly two lakh of them are under multiple CGST jurisdictions, either within one State or across different States. The Minister said the government had approved a concept note on the proposal of a single window for scrutiny of returns, audit, adjudications, appeals, taxpayer services and grievance redressal for CGST taxpayers.

SIMPLIFYING TAX MATTERS. Finance Minister Nirmala Sitharaman addressing a press conference with Central Board of Indirect Taxes and Customs (CBIC) chief Vivek Chaturvedi, CBIC GST member Sanjay Mangal and Revenue Secretary Arvind Shrivastava after the 57th GST Council Meeting at Bharat Mandapam in New Delhi ANI

Such a scheme eliminates the person-to-person interface between the taxpayer and the department to the extent technologically feasible, she said, and provides for optimal utilisation of resources and a team-based assessment with dynamic jurisdiction.

Under the proposed framework, tax notices, hearings and orders will be dealt with on a national platform rather than individual formations. It will be like the faceless assessment system, she added.

The framework will be put up for public consultation by the end of this year, said Vivek Chaturvedi, Chairman, Central Board of Indirect Taxes and Customs (CBIC).

CERTAIN ISSUES
Sudipta Bhattacharjee, Partner at Khaitan & Co, said faceless assessment in income tax has had mixed results, with recurring concerns about template notices, limited engagement with taxpayers' replies and orders set aside by courts. GST is more complex. "Before the model is extended to indirect tax, it would be prudent to address these issues and build in strong procedural safeguards, so that the reform reduces litigation instead of adding to it," he said.

Under the GST, taxpayers are divided between CGST and SGST officers, based on a formula decided by the GST Council to ensure a single interface. The division of assessees between the Centre and States is decided based on the turnover of the assessees on a proportionate basis. The assessees having turnover above ₹1.5 crore are to be assigned in the ratio of 50:50 between the Centre and the respective State, while those with a turnover under ₹1.5 crore must be assigned in the ratio of 10:90, with the balance tilting towards the States.

Key outcomes

The GST Council, on Thursday, made a series of changes to the rules. Here's an overview

Power of GST officers to arrest taxpayers removed

₹5 crore: Threshold for criminal prosecution raised fivefold

No changes to existing GST rates

A taxpayer who files late, makes an error or delays payment will face recovery, interest, and a proportionate penalty. Nothing beyond that

~~₹25,000~~ ₹10,000 General penalty reduced

Small enterprises can now be taken into the organised supply chain on price and quality

5% Rate on e-commerce platforms supplying to an unregistered person by any delivery mechanism

Exporters can now get refunds on taxes paid on services and plant and machinery, leading to an easing of working capital

Easing logistics woes: Only the States where a vehicle carrying goods originated from and destined to will have the power to stop it; not the ones it transits through

Small businesses with turnover up to ₹5 crore and making supplies exclusively to unregistered persons may soon be required to file returns annually and pay tax quarterly

GST IN NUMBERS

- Effective rate under GST has fallen to 10.84 per cent after the rates were rationalised in September last year, from 11.4 per cent in 2023
- Taxable supply is up 25.8 per cent, from ₹40.19 lakh crore a month to ₹50.58 lakh crore. In FY26, this grew by over 25 per cent against the 13 per cent rise in FY25
- Supplies to consumers reported in the system are up 26.7 per cent to ₹7.58 lakh crore a month. That is 31 per cent faster than taxable supply
- Gross tax liability is up 13.6 per cent to ₹6.64 lakh crore
- GST revenue has grown 11 per cent in FY27 over the previous year. For June to August, the growth is 14.7 per cent over the same period last year

Exporters to get refunds for tax on plant, machinery

Shishir Sinha
New Delhi

Exporters are set to get relief, with the GST Council recommending refunds on taxes paid on plant and machinery, widening the pool of recoverable taxes on services and simplifying rules governing when a transaction qualifies as an export.

According to a note on the outcomes of the GST Council meeting, four conditions that had restricted export benefits have been eased, an earlier restriction on refunds has been resolved in favour of exporters, and the refund process will be automated.

THE BENEFITS
The refund for exporters will be spread over five years. Those claiming duty drawback will also be eligible for GST refunds, while a cap that linked the refund claim to the price of the product sold in the market has been removed.

"About 38,700 taxpayers claim refund on exports, and about 13,100 of them carry tax paid on plant and machinery which could not be recovered until now," said a note. "Among businesses claiming refunds on an inverted rate structure, about 15,200 carry tax on plant and machinery, and about 17,300 carry tax paid on input services."

WHERE IT EASES UP
Under the existing rules, an export required the supplier and recipient not to be establishments of the same person. This meant that transactions involving an Indian company and its overseas branch could fail to qualify as exports. The council has recommended removing this condition.

On job carried out in India on goods owned by foreign clients, the place-of-supply rules had earlier treated the service as being supplied where the work was performed. "It will now follow the location of the customer," the note said.

Transactions related to goods sold to a foreign buyer but delivered, at the buyer's instruction, to a Special Economic Zone for storage or processing will now qualify as exports, provided payment is received in forex or in rupees.

The fourth is a clarification on when export payment is considered to have been received and the time limit for receiving it. The rule will be aligned with the RBI's framework, giving exporters a single standard to comply with.

Concerns over services exports addressed, says Nasscom

Press Trust of India
New Delhi

IT industry body Nasscom has said the council's recommendations on overseas branches and R&D services address longstanding concerns related to service exports. "Subject to the other export conditions, it should reduce tax uncertainty, litigation and unnecessary working capital costs," Nasscom said, noting that Indian companies frequently serve international clients through their overseas branch networks.

Ahead of the meeting, the industry body had flagged the GST treatment of head office-to-branch office transactions as a persistent source of litigation.

E-way bills to be rationalised to ensure smooth goods movement

Shishir Sinha
New Delhi

The GST Council has recommended curbing in-route checking of vehicles carrying goods. It also recommended a uniformity in GST on delivery charges by e-commerce companies.

THE OTHER CASE. Goods can be inspected, detained or seized in any jurisdiction if there is no e-way bill or the vehicle is not carrying papers to show its origin/destination

LESS CHECKS
According to a release by the Finance Ministry, the council recommended amendments in the CGST Act, 2017, saying a conveyance carrying goods can be intercepted only on specific intelligence and with the authorisation of an officer not below the rank of Joint Commissioner.

Inspection and further action for detention or seizure can be taken when either the supplier or the recipient is located or registered in the State where the interception is being made. "No interception in the transit States," it said.

On the other hand, goods can be inspected, detained or seized, irrespective of the jurisdiction, if there is no e-way bill generated, or the conveyance is not carrying any document to show the origin or destination of the said goods. The provision for confiscation of goods or conveyances under Section 130 of the CGST Act will not be applicable in respect of goods or conveyances in transit. "This will enable smooth movement of goods and conveyances and will improve businesses' supplies and transportation efficiency," the statement said.

The council also recommended bringing metro rail within the transport document requirements, on the same footing as other rail movement. This will facilitate freight movement by metro trains in cities. The DMRC has planned to initiate a pilot depot-to-depot cargo movement through Urban Freight Services, utilising the metro network as middle-mile connectivity.

E-COMM DELIVERY
The E-Way Bill portal is designed specifically for Indian Railways and does not adequately cater to the movement of goods through a metro rail system, resulting in operational difficulties which will now be removed.

Further, the delivery of goods ordered on an e-commerce platform has been brought down to a single rate. Such a delivery will attract a flat 5 per cent rate without credit in every case.

Platforms had been arranging delivery in different ways, some engaging the delivery partner themselves and some leaving the seller to arrange for it; and the tax on the same delivery varied with the arrangement. It will now be the same, whichever way the delivery is routed, which settles the position for the platforms and for the delivery partners alike.

Helicopter travel has also been brought within the exemption available to air travel. Passengers flying to or from an airport in specified regions were already exempt, and the same now extends to seat-sharing travel to and from a helipad.

Annual Return Quarterly Payment scheme for small taxpayers soon

Shishir Sinha
New Delhi

Small businesses with a turnover of up to ₹5 crore may soon get the option of filing returns once a year and paying taxes on a quarterly basis. Meanwhile, notices for disputed tax amounts up to ₹10,000 are to be extinguished, benefitting up to 12 lakh small businesses.

According to a Finance Ministry statement, the GST Council approved in-principle a concept note for an optional Annual Return Quarterly Payment scheme for taxpayers having an aggregate turnover equal to or less than ₹5 crore in the preceding financial year and engaged exclusively in B2C supplies.

According to an explanatory note, the frequency of filing exists so that a recipient may take credit in time. A taxpayer supplying only to unregistered persons passes on no credit, and nothing in the chain depends on how often they file. The cost of such a filing falls on taxpayers with limited administrative capacity who incur recurring professional charges each time a filing falls due.

THE BENEFICIARIES AND THE BENEFIT

- On average, about 16.85 lakh taxpayers report supplies made only to unregistered persons
- Nearly 99% of them have a turnover up to ₹5 crore
- The council also recommended simplified GST registration for small sellers on e-commerce platforms

For a very large body of small traders and service providers, this converts a recurring obligation through the year into a single annual filing. On average, about 16.85 lakh taxpayers report supplies made only to unregistered persons, and about 16.66 lakh of them, or 99 per cent, have a turnover up to ₹5 crore. "This simplified arrangement may partially benefit that body of taxpayers," the note said.

E-COMM REGISTRATION
In continuation of the in-principle approval for a simplified GST registration mechanism for small sellers given in the last meeting, the Council on Thursday declared the warehouse of an electronic commerce operator in States/UTs where they the sellers not have physical presence, and where they intend to pass on an input tax credit of not over ₹2.5 lakh per month, as the Principal Place of Business.

Registration in such cases will be granted automatically by the system, subject to certain conditions. "This will enable small sellers to expand their business to other States through e-commerce platforms without having to set up a place of business in each State and will give a significant boost to ease of doing business," a Finance Ministry statement said.

To provide benefit to small businesses, the council recommended a minimum threshold of ₹10,000 (CGST + SGST + IGST + Cess) for issuance of show-cause notices.

It also recommended a statutory provision to provide that any notices and appeals involving an amount under ₹10,000, and pending on the date of the provision for the said minimum threshold coming into force, will be decided as if the said threshold had been in force when the notice was issued.

No more input tax credit block for companies buying insurance cover

Shishir Sinha
New Delhi

Businesses will now be able to claim input tax credit (ITC) on health and life insurance bought for employees, as the GST Council has recommended easing several restrictions on blocked credits.

The changes are aimed at ensuring that taxes paid on genuine business expenses do not become an additional cost.

Under the current rules, a business cannot claim credit for GST paid on insurance cover provided to its employees. Now, only individuals buying health or life insurance for themselves and their families will continue to get no such credit, since they are consumers, and not businesses.

"Almost every organised employer provides cover for its workforce, so the cost of providing it comes down, which should assist the spread of cover as well as the insurance industry itself," said a Finance Ministry note.

"Rationalising blocked credits, including extending credit eligibility for health and life insurance, telecom towers and other legitimate business inputs, will reduce tax cascading and bring the framework closer to foundational design," said Saurabh Agrawal, Partner, EY.

EXCLUDED
Individuals buying health or life insurance for themselves and their families will continue to get no such credit, since they are consumers, and not businesses

Sajja Praveen Chowdary, Director and CEO – Policybazaar for Business, said the 18 per cent input tax credit on employee health and life insurance can make group insurance more affordable for smaller businesses, which often rely on such benefits to attract and retain talent. The savings could either be channelled towards business growth and expansion or used to enhance employee benefits.

"Over the medium to long term, wider insurance coverage among the MSME workforce can also reduce the dependence of lower-income households on government-funded healthcare and social security schemes," he said.

MORE EASING
ITC will also be allowed when businesses buy and resell certain services in the same line of business. This includes restaurant and catering services, hotel rooms costing up to ₹7,500 a night, and fitness services. The change will particularly help aggregators, tour operators and companies that procure such services before supplying them to customers or employees.

For example, a hotel room booked through an intermediary will no longer carry an additional tax cost at the intermediary stage because the intermediary will be able to claim a credit. This should put direct bookings and bookings through intermediaries on a more equal footing.

The credit restriction will also be removed for outdoor catering, beauty treatment, healthcare, cosmetic and plastic surgery and fitness services when these are bought for onward supply in the same line of business. This could benefit hotels and resorts that offer restaurants, spas and gyms as part of their operations.

RELIEF FOR PHARMA
Pharmaceutical companies are also expected to get relief. ITC will be available for free medicine samples given to doctors and on medicines and other goods that have to be destroyed after expiry under the law.

The council, however, referred the issue of ITC on motor vehicles to a committee of officers for further consideration.

Businesses can now get 90% of claimed refunds in 13 days

Shishir Sinha
New Delhi

Businesses will now be able to get 90 per cent of eligible GST refunds within 13 days. This was one of the several changes recommended by the GST Council on Thursday to speed up the refund process.

The changes also allow refunds on input services and some capital goods under the inverted duty structure.

SHORTER WINDOW
The Finance Ministry said the time for acknowledging a refund claim will be cut to 10 days from 15.

If no acknowledgement or deficiency memo is issued within that time-frame, the claim will be treated as acknowledged. The system, based on a risk assessment, will then sanction 90 per cent of the claim within three working days, instead of the current cycle of seven days.

Additionally, the refund of excess money lying in a taxpayer's GST cash ledger will also become fully automatic, without an officer's intervention.

The government said 65 per cent of refund claims relate to exports or the inverted duty structure, of which 55 per cent are already classified as low-risk.

Another 19 per cent relate to excess cash balances already lying with the government.

Under the inverted duty structure, businesses currently cannot claim refunds on GST paid on input services when their inputs are taxed at a higher rate than their final products.

This will change for credits availed from November 1.

CASH FREED UP
Refunds will also be allowed on GST paid on plant and machinery. For credits availed from April 1, 2027, the refund will be spread over 60 months, reflecting the asset's useful life.

Industry stakeholders said the changes could ease working-capital pressures by getting money back to businesses faster.

"The intent is clearly positive, though the real test will be how smoothly and consistently these measures translate into faster refunds on the ground," said Sohrab Bararia, Partner, Grant Thornton Bharat.

Pratik Jain, Partner, Price Waterhouse & Co LLP, said that the inclusion of input services and capital goods in the refund mechanism will help those businesses that are affected by the inverted duty structure.

Automated payment of 90 per cent of refunds will allow businesses to put the money back into operations, Jain added.

WTO raises 2026 goods trade forecast to 3.9%

MIXED BAG. Asia to lead export growth at 9.9%; services outlook downgraded as West Asia conflict hits transport, travel

Amiti Sen
New Delhi

The WTO has sharply upgraded its outlook for global merchandise trade despite the ongoing West Asia crisis, with goods trade volume now expected to grow 3.9 per cent in 2026, more than double its earlier forecast of 1.9 per cent in March.

In a potential boost for Indian exporters, Asia is projected to lead merchandise export growth in 2026 at 9.9 per cent, followed by North America at 5.7 per cent and Africa at 5.6 per cent, according to the WTO's latest *Global Trade Outlook and Statistics*, released on Thursday.

BRIGHTER OUTLOOK

The brighter prospects reflect supply chains proving more adaptable to geopolitical disruptions and a surge in AI-related investment driving trade in AI-enabling goods.

However, the WTO downgraded its services trade forecast as the conflict weighed on transport and international travel.

Merchandise trade growth is projected to accelerate further to 4.1 per cent in 2027, while services trade growth is expected to slow to 3.3 per cent in 2026 from the earlier forecast of 4.8 per cent, before rebounding to 6.4 per cent in 2027.

"The numbers reflect trade resilience in action. When disruptions strike, an integrated world economy and a rules-based trading system provide economies flexibility to keep essential products flowing to businesses and households that need them," WTO Director General Ngozi Okonjo-Iweala said.

The upgrade to the goods trade outlook follows stronger-than-expected performance in the first half of 2026, when merchandise trade volume grew 3.5 per cent despite disruptions to energy, fertilizer and transport markets, the report said.

AI PUSH

Trade in AI-enabling goods rose 67 per cent year-on-year in the first half and accounted for 47 per cent of merchandise trade growth.

But some countries have felt the shock more than others and not everyone can access emerging opportunities such as AI, Okonjo-Iweala cautioned. "It is essential to ensure that the rules-based trading system continues to absorb shocks and bridge gaps so that opportunities are open to all," she said. Exports from West Asia are forecast to contract 17.2 per cent, while those from the Commonwealth of Independent States are projected to decline 3.9 per cent.

The stronger-than-expected merchandise trade growth reflects two opposing forces, the report said. On the one hand, AI-related investment has increased demand for AI-enabling goods, which accounted for 47 per cent of global merchandise trade growth in value terms in the first half of 2026.

On the other, reduced shipments of oil, natural gas and fertilizers have weighed on merchandise trade, but the former has outweighed the latter so far this year. Supply chains have adapted by sourcing from alternative suppliers and re-routing trade through different ports and corridors.

DIGITAL DRIVE

While high commodity prices may persist as bottlenecks constrain flows of fuels and fertilizers, continued AI investment and the broader digitisation of the global economy are expected to keep merchandise trade growth above world GDP growth in 2027, the report said. AI investment and the West Asia conflict are also affecting the services trade outlook, but in different ways.

"AI is lifting trade in computer and financial services. However, the impact of the conflict in the Middle East is prevailing in traditional services such as transport, tourism and construction," the report said.

India eyes land-based power transmission link to Singapore

Rishi Ranjan Kala
New Delhi

India is eyeing a 3,000 km-long land-based transmission corridor to Singapore through Imphal via Myanmar, Thailand and Malaysia with capacity to supply 2,000 MW of clean energy.

Minister of State for Power Shripad Yesso Naik, who represented India at the 20th East Asia Summit Energy Ministers' Meeting in Manila, Philippines, stressed on cooperation under the Asean India Plan of Action 2026–2030, including the Asean Power Grid, regional power transmission, multilateral power trade, clean energy and energy security.

Speaking at the event, Naik said India and Singapore were exploring options for a 2,000 MW cross-border power interconnection.

One option under consideration is a land-based transmission corridor of 3,000 km connecting Imphal in India to Singapore through Myanmar, Thailand and Malaysia.

The proposed interconnection had the potential to facilitate reliable cross border electricity trade, support clean energy integration and strengthen regional energy security, the Minister added.

Depositors unlikely to see immediate benefit from rate hike: CS Setty

bl.interview

Ashokamithran T
Mumbai

State Bank of India Chairman CS Setty expects the recent rate hike to support banks' margins over the next two to three quarters, with deposit rates unlikely to rise immediately due to ample liquidity. He said credit growth is likely to moderate to sustainable levels and ruled out any risk of excessive lending driven by FCNR(B) inflows.

Edited excerpts:

What should depositors expect from the rate hike?

If you see the last policy rate cuts, while loans were repriced due to liquidity constraints, deposit rates were not reduced. So, I believe that over the next two to three months, there may not be any rate action on deposits because we have sufficient liquidity in the system, and credit growth is being supported by the liquidity available. However, if credit growth continues at this pace, banks will eventually have to consider increasing deposit rates.

> If credit growth continues at this pace, banks will eventually have to consider increasing deposit rates
>
> **CS SETTY,** SBI Chairman

Do we expect credit growth to slow because of the rate hikes?

The current growth rates of 18-19 per cent that we are witnessing are on a low base. At SBI, we believe credit growth should be 2-3 percentage points higher than nominal GDP growth. If nominal GDP grows at 12 per cent, a credit growth rate of 14-15 per cent will sustain the momentum of economic growth. Therefore, I believe credit growth will eventually reach a level that is sustainable and aligned with the economy's growth rate.

The central bank has asked banks to be prudent in deploying FCNR(B) funds. How do you expect this prudence to play out?

I think concerns over changes in lending behaviour are somewhat overplayed for two reasons. First, this liquidity arising from FCNR (B) deposits will probably be available for only two to three quarters. In the interim, while there may be a spike in liquidity, the RBI is also taking measures to absorb it. I think this combination of RBI's liquidity absorption measures and the demand for credit growth will ensure that there is neither exuberance nor imprudence in lending.

SBI's house view was for a 50-bps hike in December. Would this warrant a reassessment of NIMs, given that EBLR-linked loans form a growing share of SBI's loan book?

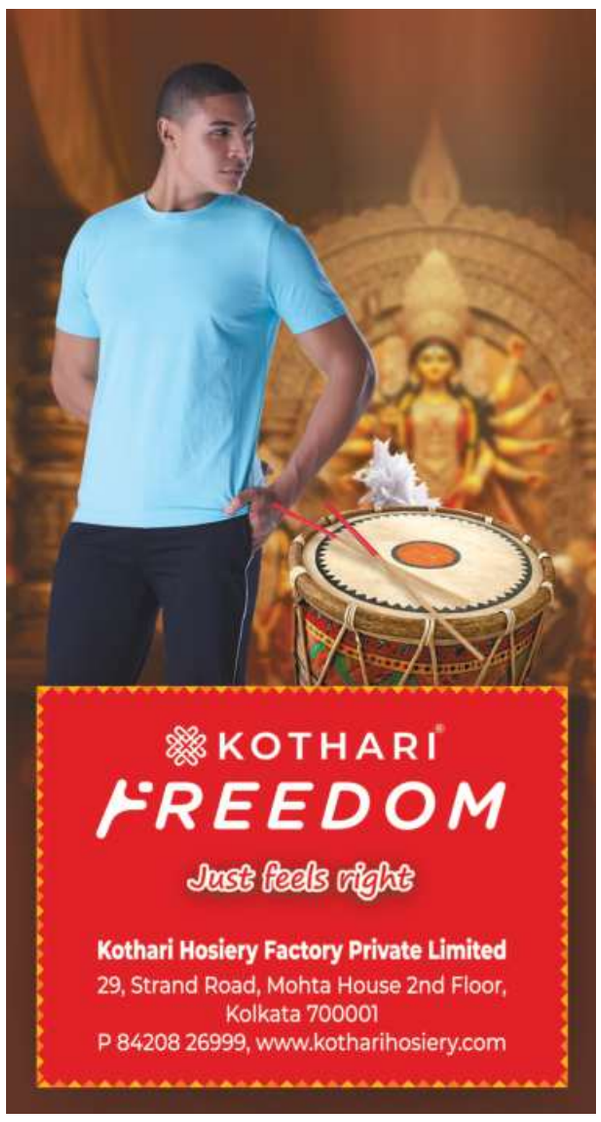

As I mentioned yesterday, there is a two-to-three-quarter window for these benefits to play out. If credit growth continues at this level, there will naturally be greater demand for deposits, prompting deposit rates to adjust accordingly, which will eventually moderate NIMs (net interest margins). However, over the next two to three quarters, the impact remains positive for NIMs. Whether the expected 75 basis points of tightening comes through two or three hikes, the benefit will still be available for the next two to three quarters.

Will this be reflected more in FY27 or FY28?

Today, more than 50 per cent of banking system loans are linked to external benchmarks, which means they are repriced automatically. When I refer to the two-to-three-quarter window, it is primarily in the context of deposit rates moving up and NIMs stabilising thereafter. So, the industry is likely to enjoy this NIM benefit for the next two to three quarters.

Does SBI's 3 per cent NIM target inch up because of this benefit?

The overall banking industry is expected to remain positive on the NIM front over the next two to three quarters.

Snuff it out

Sale of nicotine pouches should be banned

In a laudable move, the Centre recently instructed State governments to crack the whip on the sale of nicotine pouches. The initiative follows a series of warnings, starting with the World Health Organization's May 2026 report. The health body highlighted the rapid proliferation of these products among youth, thanks to deceptive marketing.

It has urged governments to protect gullible users from manipulative campaigns as these products are engineered for addiction. A joint study by the ICMR and National Institute of Cancer Prevention and Research cited nicotine pouches as a public health concern, noting they reach consumers aged 18-40 via e-commerce platforms, hookah shops and gig delivery services. The Drugs Technical Advisory Board has also urged the government not to approve such nicotine formulations. These pouches have so far ducked strict regulatory action because they do not conveniently fall under laws that govern the sale of medicines, cigarettes or food. In contrast, for example, nicotine gums and transdermal patches used in the treatment of nicotine addiction, are regulated under the Drugs Act. The tobacco-free pouches also bypass the Cigarettes and Other Tobacco Products Act, 2003 (COTPA), which regulates only cigarettes and other tobacco products. Further, the Prohibition of Electronic Cigarettes Act prohibits only vaping devices.

This regulatory grey area will hopefully be resolved as the government has clarified that the sale of nicotine pouches is unapproved and illegal. Indeed, nicotine exposure during adolescence impairs brain development, attentiveness and learning, amplifying the likelihood of long-term dependence. Research has also shown that nicotine triggers adrenaline surges and irregular heartbeats, narrows blood vessels, causes endothelial dysfunction, spurs platelet aggregation and is a major cause of atherosclerosis. In a recent impasse between the Adani Group's Mumbai airport duty-free operations and the government over imported pouch brands — such as Philip Morris's Zyn and Sweden's White Fox — the defendants contended in court that international departure area shops operate 'beyond the customs frontiers of India' and outside domestic jurisdiction. Yet, local law enforcement would retain jurisdiction over a criminal offence in these zones. Fiscal exemptions cannot be taken to mean that regulatory immunity applies as well.

It is the responsibility of both the Centre and State governments to swiftly bring to an end nicotine pouch sales. Tobacco firms view these pouches as a lucrative frontier beyond cigarettes. Tobacco major BAT predicts industry pouch revenue will reach $15 billion by 2030, almost trebling from 2025. Meanwhile, Philip Morris reported that its US pouch business yielded eight times the gross profit per thousand units of its international cigarette business in 2024. With private estimates valuing India pouch sales at about $550 million, the government must step in to snuff out this business.

The deposit debate's blind spot

A NEW ORDER. The question should change from 'are deposits growing fast?' to 'what kind of deposits are banks getting?'

SAUMITRA BHADURI
SHUBHAM ANAND

India's banking debate has increasingly narrowed to a single number: the credit-to-deposit (CD) ratio. But that number tells only a part of the story. CD ratio rose from 68.6 per cent in September 2021 to 82.2 per cent in March 2026, and has been read as evidence that banks have lent too much while failing to mobilise enough deposits.

The warning is simple: credit has run ahead of savings, and banks may hit a funding constraint. But that diagnosis does not fit the rest of the evidence. The banking system is healthier than it has been in years, with gross bad loans at 1.8 per cent, capital adequacy at 17.7 per cent and liquidity coverage well above the regulatory floor.

The CD gap also looks less alarming in rupees than in growth rates. For instance, Rangarajan and Sambamurthy (*businessline*, August 19) noted the annual difference between credit and deposit accretion has mostly been modest, around ₹1-3 lakh crore in years when credit exceeded deposits, barely 1-1.5 per cent of the deposit base.

And when large foreign currency inflows recently swelled banking liquidity, the RBI drained nearly 60 per cent of the surplus within weeks. A system truly running out of funding does not usually coexist with liquidity absorption on this scale.

SAVINGS IN DIFFERENT FORM

The issue, therefore, is not that India has run out of savings. It is that banks are receiving savings in a different form. The old funding model relied on stable, granular, low-cost household deposits. The new one increasingly depends on money that reaches banks indirectly, in larger blocks, and with higher run-off risk.

That raises the marginal cost of funds and weakens the monetary transmission even when headline deposits look adequate. The RBI's latest rate hike to 5.50 per cent only sharpens this point: in a tightening cycle, the question is not whether deposits exist, but how quickly their cost reprices.

QUALITY GAP

The simplest way to see the change is to stop asking whether deposits are growing and ask what kind of deposits they are. A household fixed deposit and a mutual fund's bank balance are both deposits. But they are not the same liability for a bank. One is sticky and predictable. The other is larger, more mobile, and reprices faster when returns change. In technical terms, the deposit beta rises, and funding volatility rises with it.

Chart 1 captures the shift. Deposits above ₹1 crore rose from 37 per cent of the total deposits in March 2020 to 44 per cent in March 2024. This does not mean households stopped saving. It means savings are returning to banks increasingly through institutional balance sheets.

The issue is whether a bank-led credit system can remain stable and cheap when its funding base shifts from sticky household money towards bulk, market-intermediated, and sometimes externally sourced deposits

This ownership shift is why the claim that stock markets are "draining deposits" is incomplete. At the system level, money does not vanish. It changes ownership. It moves into market products and returns as bulk deposits, which behave differently from retail money. The friction is not the existence of savings. It is the stability and pricing of bank liabilities.

This is the first break in the old model: savings are becoming market-led, while credit remains bank-led. The second break comes through the government's borrowing programme. Government borrowing does not create deposits when bonds are issued. Deposits return only when the government spends through salaries, transfers, subsidies, or contractor payments.

Fiscal cash management is, therefore, not just a treasury operation. It is a monetary variable. That would matter in any banking system, but it matters more today because the buyers of government securities have changed.

Chart 2 shows the shift. Non-bank institutions have overtaken commercial banks as the largest holders of Government of India (GoI) dated securities. When a bank buys government securities in primary issuance, it largely swaps one asset for another. But when a mutual fund, insurer, or pension fund funds the same borrowing, it pays from a bank deposit, and that deposit leaves the banking system until the government spends the proceeds.

What does this imply? If the state borrows early and spends late, banks compete for money that has temporarily moved out of their balance sheets. Paying more may help one bank win deposits from another, but it cannot create stable household deposits for the system. The result is a higher funding premium, not a larger funding base.

The same logic extends to the RBI balance sheet. Slower deposit growth can reflect weaker foreign asset accretion, lower net RBI credit to government and larger government cash balances at the central bank, all of which affect reserve money.

When the RBI runs a tighter, more hawkish liquidity stance, surplus is absorbed more aggressively; when it is more dovish, liquidity is allowed to persist. Either way, these are system flows, not branch-level failures.

The external account completes the story. Export receipts create deposits when dollars are converted into rupees. Import payments do the opposite. A current account deficit, therefore, pressures bank deposits as well as the rupee. When foreign inflows surge, deposit comfort can improve briefly, sometimes helped by rate-sensitive dynamics. The RBI may then sterilise part of the surplus to maintain its operating stance. Useful liquidity management, yes. A domestic funding base, no.

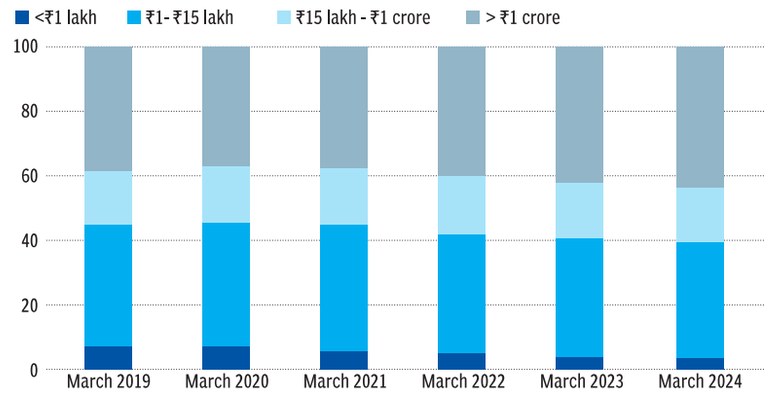

A STABLE OPTION?

The policy question should, therefore, change from "are deposits growing fast enough?" to "what kind of deposits are banks getting?" Deposit mix, run-off risk, maturity mismatch and reliance on market funding matter more than the headline CD ratio.

Put simply, the deposit debate is asking the wrong question. Savings exist. The issue is whether a bank-led credit system can remain stable and cheap when its funding base shifts from sticky household money toward bulk, market-intermediated, and sometimes externally sourced deposits. That is not a problem one ratio can diagnose. It is a transition the system must manage.

BRICS needs to address CBAM consequences

A common framework for carbon accounting and cap-and-trade norms can make a difference

Sangeeta Godbole

The BRICS climate agenda on unilateral trade and climate measures must develop credible cooperative alternatives in areas such as carbon accounting, where the need is urgent. Trade and climate policy are deeply intertwined and directly affect the industry in BRICS countries. On a closer look at the climate-related paragraphs, the 2026 Declaration shows substantial repetition of texts of BRICS Rio Summit Declaration 2025, alongside the disappearance of some of the key elements of the previous year's agenda, such as carbon accounting.

The climate section, particularly paragraphs 107-112, restates familiar positions on the UNFCCC, Paris Agreement, CBDR-RC, climate finance, unilateral climate measures, biodiversity and forests. Since BRICS issues a leaders' declaration every year, repeating them at length risks lesser focus on action points.

Unilateral climate-related trade measures (para 108), however, could have done with more emphasis. The parallel para 88 of the 2025 Rio Summit declaration explicitly identified "deforestation regulation, due diligence requirements, taxes and other measures" as unilateral and discriminatory measures of concern. It opposed protectionist measures that deliberately disrupt global supply and production chains and distort competition.

However, paragraph 110 brings in fresh perspectives and agendas. The Declaration welcomes knowledge-sharing through a 'high-level dialogue on people-centric community-based adaptation approaches', and a dialogue on aligning carbon markets with adaptation goals. More significantly, paragraph 110 recognises traditional knowledge systems, indigenous and local practices, local innovation and community experience, and welcomes the BRICS principles for advancing climate resilience through people-centric and community-based adaptation based on traditional knowledge.

Several BRICS members possess deep reservoirs of traditional knowledge and living community practices. With adaptation becoming increasingly urgent and critical in the fight against climate change, this approach connects climate adaptation to knowledge and practices that already exist within developing societies. The EU's deforestation regulation is due to apply from December 30 to large and medium operators, with later application to smaller operators. The EU's Corporate Sustainability Due Diligence Directive, following its 2026 simplification, is scheduled to apply from July 2029, with reporting requirements and remedial action reaching deep into value chains.

EMISSIONS. Need global cooperation for its reduction

SUBSTANTIAL DEMANDS

For BRICS and partner countries, these measures will create substantial demands for traceability, documentation, data, verification and supply-chain due diligence if firms are to retain access to the European market. Their omission from the 2026 Declaration ignores precisely the trade measures that are likely to become increasingly consequential. BRICS must raise these yet-to-be operationalised measures in COP 31 to assess them from a climate perspective. Carbon accounting, missing entirely from the 2026 Declaration, lies at the heart of the emerging trade climate problem. The 2025 Rio Declaration encouraged mutually recognised methodologies and standards for assessing greenhouse gas emissions, and welcomed the BRICS principles for fair, inclusive and transparent carbon accounting in product and facility footprints.

Different jurisdictions are developing different methodologies for determining embodied emissions. The result can be a fragmented carbon accounting landscape, in which the same product carries different carbon values depending on the importing market. For developing countries pursuing rapid industrialisation, this is particularly problematic.

A common methodology that can mutually recognise and establish equivalences in carbon pricing, while respecting the Paris Agreement pillars, will create a strong tool for global cooperation in emissions reduction effort.

LETTERS TO EDITOR

Send your letters by email to bleditor@thehindu.co.in or by post to 'Letters to the Editor', The Hindu Business Line, Kasturi Buildings, 859-860, Anna Salai, Chennai 600002.

RBI's latest rate hike

This refers to the editorial 'The Hike and After' (Oct 8). As a warrior against inflation, the RBI has hiked the repo rate by 25 basis points and changed its policy stance to calibrated tightening. Rising oil prices, a supply-side concern, continue to push inflation upward, for which a rate hike alone cannot be a sufficient solution to tame inflation. There can be a trade-off between controlling inflation and sustaining GDP growth. If inflation is to be tamed and brought within a tolerable range, some moderation in GDP growth may have to be accepted, particularly when monetary tightening is used aggressively to contain price pressures. The rate hike will further increase India's 10-year bond yields, thereby narrowing the yield spread between Indian and US 10-year bonds. The more the yield spread narrows, the higher the chances of foreign investors reducing their exposure to Indian bonds. This will also have a spiralling effect on the Indian equity market as foreign investors may shift their funds towards US assets.

Cuddalore, TN

Mis-selling a burden

This is with reference to the article 'Tackling Mis-selling Malaise in Insurance,' (Oct8). The suggestion to ask insurers to contribute 2 bps of annual gross premium, in addition to the PEPF created by the IRDAI for policyholder awareness and education, is a practical one. Mis-selling undermines the very purpose of insurance. While insurance is meant for the financial protection and security of the policyholder, mis-selling subverts the process and becomes a long-term burden on the policyholder, or often leads to discontinuation of the policy. The problem is partly rooted in the incentive structure governing insurance distribution, particularly commission and other sales-linked remuneration. Mis-selling by agents or other intermediaries should be penalised.

Kosaraju Chandramouli
Hyderabad

A coordinated approach

This refers to 'Modest Rate Hike Cycle Commences' (Oct8). The RBI's cautious rate hike is understandable as inflation risks have resurfaced amid weak monsoon conditions and higher crude oil prices. However, repeated rate increases could affect household budgets, borrowing costs and private investment. The Reserve Bank should proceed gradually, guided by actual inflation trends, rather than temporary shocks. Better liquidity management can also prevent excessive tightening of credit conditions. The government should address food supply constraints, strengthen storage and distribution systems and monitor fuel prices. A coordinated approach can contain inflation while preserving economic growth.

UP's mobile procurement

To be effective, this initiative needs to be tweaked

Sanjeev Kapoor
Kushankur Dey

Wheat procurement for the Rabi Marketing Season (RMS) 2026-27 has been concluded in Uttar Pradesh, a leading wheat-producing State that accounts for about 31 per cent of the country's total wheat output. However, its wheat procurement volume has significantly declined after 2022-23, standing at 2-4 per cent of the total marketed surplus of wheat in the State. As a corrective measure, the State government piloted mobile procurement (MP) at minimum support prices (MSP) in 2025-26.

The rationale for MP is threefold. First, MSP-based wheat procurement is extremely low compared to the PDS requirement. This is attributed to the increased quantity under various Central Government welfare and poverty alleviation schemes on the one hand, and a sharp decline in procurement on the other. To ensure food security through the PDS, the deficit has to be offset through inter-State transfers of wheat, especially from Punjab and Haryana, which carry serious cost implications. As an alternative, the State initiated MP for wheat.

Second, private parties' procurement of wheat at higher prices from the farm-gate affected government agencies' MSP-based procurement at static or physical procurement centres. Third, with the increased open-market wheat prices, especially in 2024-25, smallholder access to static procurement centres and their participation in procurement operations have declined. This was compounded by higher transportation costs and the hold-up problem of farmers' produce at static centres.

WHEAT. Procurement mainly driven by market prices

PROCUREMENT FIGURES

The Department of Food and Civil Supplies of the State reported that about 2.28 lakh tonnes (lt) incremental procurement (22 per cent of total procurement) was contributed by MP, and 18 per cent of the beneficiary farmers of MSP procurement (1,43,895) sold wheat at mobile procurement centres (MPCs) for RMS 2025-26.

This yielded ₹8.32 crore to the State government, including market fee of ₹5.54 crore and development cess of ₹2.77 crores for RMS 2025-26. The revenues collected through the market fee and development cess have been used to provide participating farmers with services, such as drinking water facilities, resting places, and vehicle parking at the static procurement centres.

Notwithstanding MP's potential to address the State's concerns about food security and farmers' welfare, market prices drive the fortunes of the incremental procurement strategy.

If market prices remain above the MSP, how can the State increase wheat procurement through MP in a highly competitive market? How can the commercial market operations in MSP-based wheat procurement be blended with food security?

First, an early-mover advantage at the start of the wheat marketing season, along with a calibrated policy framework for handling and transportation agencies, could help the State procure more wheat.

Second, mobile procurement should not replace static procurement, but it should be institutionalised to boost farmer participation in MSP-based procurement. Instead of implementing mobile procurement across the State, it should be implemented in selected districts where the alternative market is weak, and the marketable surplus of wheat is higher. The State procurement agencies need to map these districts based on historical wheat market price and quantity data.

Third, the State can frame standard operating procedures for MP, including mechanisms for payment for transportation when an empty transport vehicle travels from the physical procurement entrance to the MPC.

In sum, the government can rope in active farmer producer organisations to facilitate MP operations at the farm-gate, which can act as MPCs, aggregating wheat from member-farmers and selling it to procurement agencies at their own locations.

Will democracy ever return to Bangladesh?

DIVIDED NATION. The reins of power are firmly in the hands of Islamists. Hasina's proposed return to Dhaka provides a glimmer of hope for the nationalists

PRATIM RANJAN BOSE

The Indian High Commissioner to Bangladesh, Dinesh Trivedi, offered a bitter pill to Dhaka in his usual sugar-coated manner. "Bangladesh military aircraft came to India... Hasina *ji* was still the Prime Minister ...We had hardly any choice on that," he replied to a routine question about giving shelter to Sheikh Hasina during a conference.

He reiterated that the "extradition" request would undergo legal scrutiny. This was as good as asking Dhaka to prove the legality of its demand. The ruling dispensation is unlikely to dare do so, because that would open a Pandora's box over the retributive justice it has pursued over the last two years.

There is nothing extraordinary about Trivedi's response. These are facts, known to all. Extradition became a non-issue after Hasina announced plans to return to her country in December. The Indian High Commissioner merely used the opportunity to burst a major propaganda narrative designed to distract attention from real issues.

Beyond the typical Awami League-BNP binary and a winner-takes-all attitude, which is the bedrock of Bangladeshi politics, this small yet populous South Asian nation has slipped into an ideological battle following the 2024 transition.

Lines were drawn along the national identities defined in 1971. Power tilted to those opposed to that identity. Prime Minister Tarique Rahman's Bangladesh Nationalist Party is a beneficiary, but the reins remain firmly in the hands of the Islamists, led by Jamaat-e-Islami.

Democracy is a long-lost debate in Bangladesh. Probably, the country was never prepared for it. If Hasina was blamed for winning elections boycotted by the Opposition and manufacturing outcomes, the BNP rose to power in an even less democratic situation, where the Opposition did not even have the right to speak, let alone enjoy political freedom. Even that election was not free from allegations of rigging, as claimed by Jatiya Party chief GM Quader.

AWAMI LEAGUE OSTRACISED

The Awami League was equated with a terrorist organisation and banned. The International Crimes Tribunal (ICT) issued death sentences against Hasina and her colleagues in several cases. According to Prof Brahma Chellaney, the trial was so farcical that "calling the tribunal a kangaroo court would be an insult to kangaroos."

Anywhere between 100 and 150 former MPs and 30-odd ministers are jailed. Arrests continue under Tarique's rule. That is apart from tens of thousands of party activists imprisoned without trial. Prison deaths are rampant. According to Human Rights Watch, at least 10 Awami office-bearers, "most of whom were not charged with any crime," have died in prison during Tarique Rahman's BNP rule.

Ostracising the Awami League is the smaller part of the story. For those who believe in the founding ideals of the nation, Bangladesh is being reduced to Stalin's Russia. Doctors, professors, businessmen and journalists are either displaced, rotting in jail or maintaining silence out of fear. From fake murder charges to allegations of corruption, every possible instrument is weaponised against them. Their voices remain unrepresented in the heavily censored Bangladeshi media and public discourse. The interim administration of Dr Muhammad Yunus put this model in force. Tarique Rahman is following it to the letter, creating a false image that Bangladesh is against Hasina and India.

There had always been an undercurrent of anti-Hindu, and therefore anti-India, sentiments in Bangladesh. This originated from the Two-Nation theory and the religion-based Partition. The sentiments were evident even in 1971 and will remain so in the foreseeable future. We cannot do much about it.

Whether you call it security interests, geopolitics or people-to-people relations, backing Hasina on her return journey to Dhaka will be a great opportunity for India

The rest goes up and down, depending on political expediency and national frustration. A nation that is yet to convince everyone of its nationhood finds scapegoats. Delhi's poor political management gives scope. Islamists make maximum use of it. But the Awami League is no saint either. Hasina blamed India for her 2001 loss as late as in 2017.

But right at this moment, when the nation is as divided as it was before 1971, one half of the population is resting its case on Hasina and India. They are nationalists who trust the independence achieved under the leadership of Bangabandhu Sheikh Mujibur Rahman and want to reclaim their nation.

The Awami League as a political party has less to do here. The command structure of the party is broken. Top leadership, excluding Hasina, is discredited. It's all about people — including the grassroots activists of the Awami League and people at large — and Hasina. She is their last hope and, since Delhi gave her refuge, they trust India.

Unbelievable but true. There is a Bangladesh that is not visible, and its people are fuming. The common Awami supporters have regrouped. This author interacted with a couple of such groups. They did not hold any position in the party and did not benefit from its long stay in power. Many suffered jail terms over the last two years, but they are undeterred.

TO GET TURBULENT AGAIN

Bangladesh is all set to get turbulent again, with or without India. It is up to Delhi to make the best use of the opportunity. The Narendra Modi government failed to protect Bangladeshi Hindus. Chinmay Das is in jail for two years, merely for demanding political rights for minorities.

Tarique Rahman's BNP is playing cat and mouse with India. The power that Delhi had over Bangladesh has substantially eroded in the last six months by its policy surrender to Dhaka. Hasina is the greatest asset to the country for leaving a lasting impression on a sizeable population.

Whether you call it security interests, geopolitics or people-to-people relations, backing Hasina on her return journey to Dhaka will be a great opportunity. The grassroots Awami activists and people at large will take care of the rest. Like a cornered cat, they are living the dream to take revenge.

AI, defence shares most at risk as US midterms near

Matthew Griffin
Felice Maranz

Artificial intelligence regulation, along with government spending on healthcare and defence, are emerging as equity investors' chief points of focus as the final month of the US midterm campaign kicks into high gear. Polls show the Democratic party as a heavy favourite to win control of the House of Representatives, with an edge in key Senate races as well. Taking at least one chamber of Congress would give the party control of committees that can propose legislation and open investigations.

POTENTIAL RISKS AHEAD

Concerns about AI cross party lines, with voters worried about potential risks along with job losses and higher electricity prices. Some Wall Street strategists are positioning for a push from Democrats for tighter regulation, which could fuel selling pressure. "The midterms will be critical not for the immediate risk of federal policy restricting data centers, but to lay the groundwork for potential legislation toward that end in 2029," Ariana Salvatore, head of US public policy research at Morgan Stanley, said in a note.

History suggests that whatever happens, the midterm elections are unlikely to knock the stock market off its course. The S&P 500 Index has risen in the 12 months after every midterm election since 1946, according to Wells Fargo. President Donald Trump's veto powers can keep Democrats in check, a recipe for government gridlock that might create stability for investors. The Cboe Volatility Index signals little election-related turmoil, making it cheap to bet on price swings picking up.

AI REGULATION. Concerns about the tech cross party lines

Compared with the 2024 presidential election, "the equity impact for the upcoming midterms across election outcomes scenarios will likely be more nuanced and favour stock picking", JPMorgan Chase & Co strategists led by Dubravko Lakos-Bujas wrote in a note. Over the next two years, Trump is likely to veto any legislation that's too unfavourable to the technology industry. That may limit risk to fundamentals for chipmaker Nvidia Corp, the AI rally's poster child, and megacap peers such as Alphabet Inc, Meta Platforms Inc and Microsoft Corp.

Data centre real estate investment trusts and neocloud companies are negatively exposed to potential legislative proposals to levy a tax on computing power. Off-the-grid power providers such as Bloom Energy Corp, GE Vernova Inc and Cummins Inc may get a boost from more restrictive policies, the analysts said. BLOOMBERG

SEBI plans separate entity for surveillance, investigation
Capital market regulator SEBI plans to create a separate outfit with independent professionals for stock market surveillance and investigation, to make these two key activities more effective. According to a SEBI official, the idea is to rope in independent professionals such as practising chartered accountants, lawyers and financial experts to do this job.

SSP units may get higher concession
The Centre is considering raising the concession rate for single super phosphate (SSP) manufacturers in keeping with an Agriculture Ministry Task Force recommendation to treat sulphur on a par with nitrogen, phosphorous and potash for both price fixation and subsidy eligibility. SSP production has fallen from almost 40 lakh tonnes (lt) in 1997-98 to 26.95 lt in 2005-06.

Maharashtra Govt puts oil exploration plans on hold
The Maharashtra Government has put on hold its plan to enter the oil and gas exploration activities. According to State Government sources, some departments have opposed the plan on grounds of financial risk involved with the venture.

QUICKLY.

Adani Group stocks end lower; Green falls 7.5%

New Delhi: Stocks of Adani Group companies ended lower on Thursday, in tandem with a sharp sell-off in the equity market, with Adani Green tumbling 7.5 per cent. Shares of Adani Green Energy dived 7.53 per cent, Adani Enterprises tumbled 5.43 per cent, Adani Energy Solutions dropped 5.08 per cent, Adani Power was down 4.37 per cent and Ambuja Cements fell 4.07 per cent on the BSE. Also, NDTV slipped 3.73 per cent, Adani Total Gas fell 3.48 per cent, ACC shed 3.05 per cent and Adani Ports was down 2.59 per cent. The combined market valuation of all the group firms stood at ₹16.32 lakh crore. PTI

Vedanta declares interim dividend of ₹5 a share

Mumbai: Vedanta Ltd has declared its first interim dividend of ₹5 per share for FY27, with a total payout of ₹1,955 crore. The dividend marks Vedanta's first payout since the completion of its demerger, reinforcing the company's focus on delivering value to shareholders as it enters a new phase as a more focused and diversified natural resources company. The record date for the interim dividend is October 14. The dividend comes soon after a strong Q2 FY27 operational performance, with Vedanta reporting broad-based momentum across its businesses, including record quarterly, half-yearly production across key operations. Nifty slumps to 52-wk low as crude, FII selling weigh

BLEAK SCENARIO. Selling was broad-based, with all sectoral indices ending lower; Nifty Midcap 100 tumbles 2.53% and Nifty Smallcap 100 falls 2.34%

Anupama Ghosh
Mumbai

The Nifty hit a fresh 52-week low on Thursday as Indian equities came under broad-based selling pressure, with rising crude oil prices, sustained foreign outflows, elevated global bond yields and expectations of tighter domestic monetary policy weighing on sentiment.

The index fell 1.64 per cent to close at 22,231.8, while the Sensex declined 1.44 per cent to 71,593.24.

"The market is currently caught in a perfect storm: crude above $100, persistent FII selling, a hawkish RBI, elevated US yields and a weakening rupee," said Sandip Jha, Chief Product Officer, Godrej Wealth.

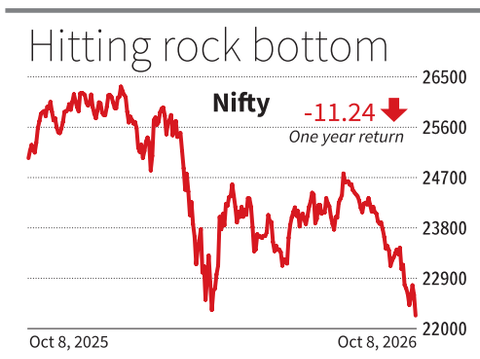

He said the market was repricing the risk of a higher-for-longer interest rate and inflation environment, and advised investors to remain focused on long-term asset allocation.

The Nifty opened at 22,599.05 and fell through the session to an intra-day low of 22,179.9, breaching its April 2, 2026 low of 22,182.55. The Sensex also remained under pressure, moving between 72,693.97 and 71,327.75, before closing near the day's low.

Nandish Shah, Deputy Vice-President, HDFC Securities, said the Nifty had corrected more than 10 per cent from its early-August swing high of 24,774 and was nearly 16 per cent below its all-time high of 26,373.

BROAD SELLING

Selling was broad-based, with all sectoral indices ending lower. Metal, realty, media, auto, energy and FMCG stocks were among the major laggards, while IT showed relative resilience. The Nifty Midcap 100 fell 2.53 per cent and the Nifty Smallcap 100 declined 2.34 per cent, with the advances-declines ratio falling to 0.30, according to HDFC Securities.

The RBI's 25-basis-point repo rate hike to 5.5 per cent and a shift towards calibrated tightening have added to concerns over financial conditions. "The RBI's 25-bps rate hike has failed to provide comfort, while global risk aversion is prompting foreign investors to move towards dollar assets," said Shrikant Chouhan, Head Equity Research, Kotak Neo.

Pabitro Mukherjee, Deputy Vice-President-Research, Bajaj Broking, said the Nifty had moved below the 200-week EMA at 22,379 and that any pullback could face resistance at 22,400-22,600.

He said a follow-through decline could take the index towards 22,000 and the 21,750 level.

Despite the pressure from global and domestic macro factors, earnings are likely to provide a key domestic trigger. "The only credible near-term trigger is the earnings season," said Siddhartha Khemka, Head of Research, Wealth Management, Motilal Oswal Financial Services. He said he expects aggregate earnings for the firm's universe of about 400 companies to grow 22 per cent year-on-year in the second quarter of FY27, with Nifty-50 earnings expected to grow 27 per cent.

With the Nifty now below the April low, market participants will track crude prices, currency movements, foreign flows and global yields for signs of stabilisation. The earnings season, which began with TCS results, could provide a domestic trigger, although elevated macro risks are expected to keep volatility high in the near term.

Smaller pie, new winners in India's investment banking

Our Bureau
Mumbai

India's investment banking industry is increasingly becoming a battle for market share rather than market growth.

While deal activity remained robust across equity offerings, debt capital market issuances and mergers and acquisitions, the industry's overall revenue pool contracted during the first nine months of 2026, intensifying competition for mandates.

According to Dealogic, total investment banking revenues year-to-date in India fell to about $780 million in 2026 from $796 million in 2025, signalling a smaller fee pool despite a healthy pipeline of transactions.

The biggest beneficiary of this reshuffle was Citi, which vaulted from fifth place in the 2025 rankings to the top spot in 2026. The bank nearly doubled its investment banking revenues to $52 million from $29 million a year earlier, lifting its market share from 4 per cent to 7 per cent.

Citi said it helped clients raise nearly $16 billion through equity and debt transactions during the period and advised on about $36 billion worth of M&A deals.

However, JPMorgan, which topped the rankings in 2025, slipped to second place with revenues of $43 million, down sharply from $66 million. Morgan Stanley, the second-largest player last year, also ceded ground and dropped out of the top tier.

Among domestic institutions, Kotak Investment Banking strengthened its position, with revenues rising to $35 million from $32 million.

Evonile Pharma board approves ₹900 crore rights issue

Press Trust of India
New Delhi

Evonile Pharma Ltd, formerly known as Novartis India, on Thursday said its board has approved raising funds of up to ₹900 crore through a rights issue.

The company's board approved the issuance and allotment of partly paid-up shares of face value of ₹5 each for an aggregate amount not exceeding ₹900 crore on a rights basis to eligible equity shareholders, Evonile Pharma said in a regulatory filing.

Ola plunges 10% amid rights issue plans

Amit Vijay Mohile
Mumbai

Ola Electric's shares plunged nearly 10 per cent intra-day on Thursday, confronting shareholders with a difficult choice: Invest more money to protect their ownership in an electric two-wheeler maker struggling with shrinking market share and continued cash outflows or risk dilution, after the company announced a ₹1,000-crore rights issue at a 26 per cent discount, barely four months after raising ₹780 crore from institutional investors.

The stock touched ₹32.7 on the NSE, down 9.96 per cent from Wednesday's ₹36.32 close, before recovering to ₹34.63, a decline of 4.65 per cent. The two fundraising exercises would together raise approximately ₹1,780 crore, assuming full subscription, highlighting the capital required to support Ola's turnaround.

The rights issue offers two shares for every 25 held at ₹27 each, with October 13 as the record date. Full subscription would expand the equity base by approximately 8 per cent.

NO BIG LOSS

However, the 26 per cent discount does not mean an equivalent loss in shareholder value. A simplified theoretical ex-rights calculation indicates an adjusted price of ₹35.63, approximately 1.9 per cent below Wednesday's close, assuming fully paid shares.

The sharper intra-day decline, therefore, suggests investors are looking beyond the discount to Ola's funding requirements and business performance.

'Women account for 25% of India's capital market participation'

Our Bureau
Mumbai

SEBI Chairman Tuhin Kanta Pandey on Thursday said women account for around 25 per cent of capital market participation and about 27 per cent of individual mutual fund investors, while calling for wider financial inclusion for women investors.

He was speaking at the AMFI-Pinkathon Investor Awareness Programme, held as part of World Investor Week 2026, an event connecting women across more than 80 locations.

Tuhin Kanta Pandey, Chairman, SEBI

WOMEN INVESTORS

Pandey said India now had more than 1.6 crore women mutual fund investors, with them comprising around 23 per cent of mutual fund distributors. He noted that SEBI had introduced additional incentives to onboard women investors and new individual investors from beyond the Top 30 cities to widen access.

PROJECT JAGROOK

The Chairman also referred to Project Jagrook, launched to mark World Investor Week, which brings together SEBI, the stock exchanges, depositories, AMFI and the National Institute of Securities Markets under the theme "Samajh Se Investing Simple." He said the initiative's WhatsApp campaign had delivered over 24 crore messages over the past three days.

World Investor Week is a global campaign promoted by the International Organization of Securities Commissions to raise awareness about investing and investor protection.

Pandey said financial well-being depends on informed, consistent decisions rather than one-time efforts, and stressed that lasting trust in the market requires clear communication, honest risk disclosure and responsible distribution practices across the investment ecosystem.

BROKER'S CALL.

Anand Rathi

RAYMOND REALTY (BUY)
Target: ₹879
CMP: ₹679.85
Raymond Realty is transitioning from a Thane-led developer into an asset-light MMR platform, with ₹52,000 crore of development potential across ₹25,000 crore of owned land in Thane and ₹27,000 crore across eight JDAs. The key differentiator is its ability to selectively secure mature, execution-ready opportunities, enabling faster conversion from signing to launch and scaling across Mumbai without acquiring land. The strategy is already ahead of plan: JDA contribution to bookings rose from 22 per cent in FY25 to 54 per cent in FY26 and 64 per cent in Q1FY27, crossing the company's 50 per cent target a year early. We see Thane as the cash engine and JDA as the growth engine, with annual cash generation of ₹600-750 crore from the combined portfolio to fund further expansion. We forecast bookings/collections to clock around 24/46 per cent CAGR over FY26-29e. We estimate debt rising from ₹1,010 crore in FY26 to ₹2,010 crore by FY29E, with D/E peaking at 0.7x, below management's 1x threshold, before moderating as collections scale.
We initiate coverage with a Buy rating with a TP of ₹879, based on an NAV methodology. The valuation is supported by the value of the identified development portfolio and the longer-term potential of its JDA-led development franchise, with the implied 6.6x FY29E embedded EV/EBITDA.
Key risks: Delay in launches; rising competition; and higher debt.

ICICI Securities

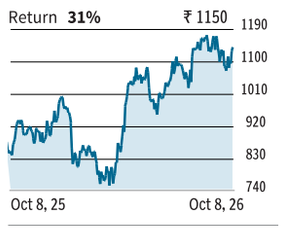

ETERNAL (BUY)
Target: ₹425
CMP: ₹323
Blinkit, subsidiary of Eternal, has continued to deliver strong growth, supported by dark-store expansion and increasing category penetration. We estimate Blinkit's net order value (NOV) to grow 76 per cent y-o-y in Q2FY27E, with adj. EBITDA at ₹150 crore and an adj. EBITDA margin (per cent of NOV) at 0.8 per cent (up 15 bps q-o-q).
Blinkit remains the market leader and the only major QC player to have achieved EBITDA-level profitability. It remains the only major quick commerce (QC) player to have achieved EBITDA-level profitability; and notably, has sustained profitability despite heightened competitive intensity. We estimate EBITDA margin to improve to 3.1 per cent by FY29E, supported by operating leverage, higher store productivity and improving store economics.
We estimate the food delivery (FD) business to generate adj EBITDA of ₹3.8 billion by FY29E (~5.7 per cent of NOV), providing a significant source of cash generation and supporting overall FCFF.
We think Blinkit's value proposition of convenience appears appealing and could improve further as its dark-store count nears ~3,000. We see limited near-term risk to the existing duopoly structure in food delivery. As both food delivery (FD) and QC turn into cash-generative engines, we see room for value discovery in 'going out'. Maintain BUY; TP revised to ₹425, rolling forward by six months.
Risks: Slowdown in discretionary spending; and negative externalities disrupting business operations.

TODAY'S PICK.

PNB Housing Finance (₹1,150): BUY

Gurumurthy K
bl. research bureau

The short-term outlook is bullish for PNB Housing Finance. The 5 per cent rise this week gives an early sign that the corrective fall that had been in place since late August is coming to an end. There is resistance at ₹1,160. But the stock can breach this hurdle. Such a break can take the PNB Housing Finance share price to ₹1,250-₹1,270 in the coming weeks. Immediate support is at ₹1,120. Below that ₹1,100-₹1,080 is the next important support.

Traders can buy PNB Housing Finance shares now at ₹1,150. Accumulate on dips at ₹1,130.

Keep the stop-loss at ₹1,075. Trail the stop-loss up to ₹1,170 as soon as the stock goes up to ₹1,195. Revise the stop-loss higher to ₹1,200 and ₹1,230 when the price touches ₹1,220 and ₹1,245 respectively. Exit the stock at ₹1,260.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading

Centrum Capital allots 1.17 crore shares to promoter entity

Our Bureau
Mumbai

Centrum Capital Ltd on Thursday allotted 1.17 crore shares to JBCG Advisory Services Private Ltd, a promoter group entity, following the exercise of an equivalent number of convertible warrants.

The shares were issued at ₹28.52 each — comprising a face value of ₹1 and a premium of ₹27.52 — with JBCG paying the balance 75 per cent of the issue price, amounting to ₹24.99 crore (₹21.39 per warrant). The upfront 25 per cent consideration for this tranche was ₹8.33 crore.

Following the allotment, the promoter group's shareholding has risen from 39.44 per cent to 40.86 per cent.

On the NSE, Centrum Capital shares closed at ₹19.44 on Thursday, down 4.47 per cent. The stock has fallen about 42 per cent over the past year.

Motilal Oswal's realty fund closes with 20.4% IRR after exiting 37 investments

Our Bureau
Mumbai

Motilal Oswal Alternates announced on Thursday the closure of its fourth real estate fund, India Realty Excellence Fund IV (IREF IV), after exiting all 37 investments in the portfolio with a portfolio internal rate of return (IRR) of 20.4 per cent.

The ₹1,155-crore fund, of 2020 vintage, provided structured capital to developers at the pre-approval stage across seven cities.

Its developer partners included Casagrand, Puravankara, Kolte Patil Developers, Urbanrise, Phoenix, Rajapushpa, Ashwin Sheth and Radiance Realty.

FUND EXITS

The closure comes roughly 18 months after MO Alternates fully exited IREF II in April 2025, which returned an IRR of 18.3 per cent.

With IREF IV now wound down, three of the platform's six real estate funds have been fully exited, while two others are making payouts and working toward full exit.

The sixth fund, IREF VI, is currently in its investment phase.

IREF IV navigated significant headwinds during its lifecycle, including the Covid-19 pandemic, rising interest rates, cost escalations and geopolitical tensions that pressured sales and collections across the real estate sector.

REALTY AUM

MO Alternates manages a cumulative real estate AUM of over ₹11,000 crore across six funds, and has made more than 200 investments and completed over 150 exits.

The platform, part of the Motilal Oswal Group, manages over $3 billion in total AUM across real estate, private equity and private credit.

QUICKLY.

Sun Mobility names CEOs for battery swapping, energy biz

JSW Steel production up 5% to 7.27 mt in Q2

New Delhi: JSW Steel on Thursday said that its consolidated crude steel production increased 5 per cent to 7.27 million tonnes (mt) in the second quarter of the current fiscal. Its crude steel output was 6.95 mt in the year-ago period. The production at its Indian operations rose 5 per cent year-on-year to 7.07 mt during the quarter, over the corresponding quarter. In a regulatory filing, JSW Steel said that the capacity utilisation of its Indian operations stood at 88 per cent during the July-September quarter of FY27. PTI

Govt reacts to Musk's 'oligarchs' post, rebuts discrimination allegations

LAUNCH HURDLE. The SpaceX CEO had expressed displeasure over Starlink's India security clearance delay

S Ronendra Singh
New Delhi

In a fresh charge on Thursday, Elon Musk, CEO, SpaceX and Tesla, attacked the Ambanis, blaming them for Starlink not getting a licence to operate in India, even as the government maintained that it has put in place a fair and non-discriminatory authorisation framework for all telecommunication services, including Satcom services.

"Starlink is licensed in over 165 countries and has spent five years complying with every single law and requirement of the government of India, so why still no license?" Musk asked on X, adding, "Is Ambani the real boss of India?"

The government had earlier reacted to Musk's allegations on Wednesday, alleging that "certain oligarchs" have blocked his company's satellite communication (Satcom) services in India. "A post is being circulated on social media regarding the fairness of India's regulatory framework for satellite communication services and suggesting that it is being applied in a discriminatory manner. The government has put in place a fair and non-discriminatory authorisation framework for all telecommunication services, including satellite communication services," the Ministry of Communications said.

> Starlink is licensed in over 165 countries and has spent five years complying with every single law and requirement of the govt of India, so why still no license? Is Ambani the real boss of India?
>
> **ELON MUSK**
> CEO of SpaceX and Tesla

Telecom licences have been granted to three global mobile personal communication by Satellite services, based on non-geosynchronous satellite orbit-based satellite communications, it said. The companies include Bharti Airtel, Reliance Jio and Starlink to provide Satcom services in India.

Speaking on the sidelines of the IMC 2026 here, Sunil Bharti Mittal, Chairman of Bharti Airtel, said that even his satcom venture, Eutelsat OneWeb, was awaiting approvals from the government to start operations. "We are waiting for our own approvals," he said.

MONOPOLY CHARGES

Musk, on Wednesday, took to X to express his displeasure at Starlink not getting security clearance to launch services in India. He said the Satcom services provider was being "blocked by certain oligarchs" to maintain "their monopolistic chokehold" on Indians. "This is a crime against the people of India," he wrote.

His post came on the first day of the India Mobile Congress (IMC), the apex telecom sector event, inaugurated by Prime Minister Narendra Modi on Thursday. On Wednesday, a senior official of Musk-led SpaceX announced that the company's Satcom arm was ready to start services in India. Speaking at IMC 2026, SpaceX's Starlink Business Operations Vice-President Lauren Dreyer said, "We've built our Starlink operations specifically for India in recognition of Indian security requirements and other regulations, establishing controls at every layer for India and keeping Indian user data within India."

'PROCESS UNDER WAY'

However, the Ministry of Communications' statement said that, under the terms and conditions of licence, every such licencee is required to demonstrate compliance with security conditions. "This is aimed at ensuring that services provided meet various security requirements to ensure the safety of all users and their data. Security assessment as part of this process is currently under way in respect of all the three licencees," it explained.

The Ministry further said that as and when this process is completed for a licensed entity, it may proceed to the next step of seeking assignment of spectrum. "Currently, all three entities are broadly at the same regulatory stage. The suggestion that the framework or its application is unfair or discriminatory is baseless and misconceived," it added.

According to the Minister of State for Communications, Chandra Sekhar Pemmasani, the Ministry of Home Affairs (MHA) was looking into security-related issues with Satcom services. He said while the Department of Telecommunications has issued licences as well as provisional spectrum to all Satcom companies, it was MHA who has to provide security clearance.

"Now the issue is pending with MHA for security clearance. As soon as it is cleared, they will get it. It has nothing to do with one company," Pemmasani said on the sidelines of the IMC.

PM moots global framework to curb digital frauds

Our Bureau
New Delhi

Prime Minister Narendra Modi on Thursday said that as cyber crimes increase across the world, there should be a global framework and urged governments, technology companies and global telcos to create a mechanism to curb digital frauds.

Inaugurating the 10th edition of the India Mobile Congress (IMC) 2026, Modi said as telecom has become so important in our lives, the security measures have become vital. "I urge the GSMA and telecom operators across the world, come, let us create a global mechanism that can stop such fraud before it reaches the people. India has learnt a lot from its experiences in this direction, and India is always ready to share its experiences with the world," he said.

Technology can achieve scale only when it gains people's trust, he noted. "A person sitting in one country, with the help of a person in another country, can commit a crime in a third country," Modi said, adding that deepfakes have become a big challenge across the world.

Modi recalled launching 5G from the very same stage in 2022 and predicting its massive expansion in 2023. He announced that 5G networks, now operating from over 5.5 lakh base stations, have successfully reached every single district, boosting Internet speeds 10-fold.

Prime Minister Narendra Modi addressing the IMC

TELECOM REFORMS

He said the 'Reform Express' was moving rapidly in the telecom sector, with decades-old laws being modernised and a modern regulatory framework created through the Telecommunications Act. "Work is also being done from our side to rationalise structural burdens such as adjusted gross revenue (AGR) and bank guarantees, to turn burdens into wonders," Modi said.

He said the IMC had an important role to play in shaping the roadmap for the next decade of the mobile market, not just in India but globally.

India targets 1 billion 5G users by 2030: Scindia

Our Bureau
New Delhi

India aims to double its 5G user base to one billion by 2030 from 550 million now, Jyotiraditya Scindia, Minister of Communications, said here on Thursday.

Speaking at the India Mobile Congress (IMC) 2026, he also said that 5G in India has become the fastest-adopted 5G technology in the world.

"Today, we have 550 million users on 5G...But, we will not rest here. By 2030, our target is to take that number from 550 million to a billion customers on 5G," he said.

6G DOMINANCE

On 6G, Scindia said the Bharat 6G Alliance, which has 90 institutions involved with it, has established 7,700 patents, of which 4,400 are international.

Union Minister for Communications Jyotiraditya Scindia

"We were behind the world in 4G. We marched with the world on 5G. But it is our resolve that we will lead the world on 6G," he said, adding that the International Telecommunication Union (ITU) Council has also accepted India's proposal to host the Plenipotentiary Conference in 2030.

Tracing India's telecom journey since the first IMC in September 2017, he said the number of broadband customers has grown from 60 million to over 1.1 billion. The country now has 1.35 billion mobile customers. The cost of 1 GB of data has also fallen from ₹268 in 2014 to ₹8 now, which he described as the cheapest in the world.

WORK IN PROGRESS

On digital connectivity, Scindia said that work was in progress to connect the unconnected villages in the country and for the development of telecom ecosystem, the government has worked on schemes such as production linked incentive (PLI) scheme, and setting up a Telecom Manufacturing Zone (TMZ), which will be a full plug-and-play for the sector.

"It is our effort to make sure that we invite investment. We put PLI in place... has resulted in close to ₹1.1 lakh crore incremental sales, ₹25,000 crore incremental exports, without setting up a TMZ. For the first time in the history of telecom, I would say not in India, but worldwide... the concept we knew as SEZ, we are setting up a TMZ," Scindia mentioned.

He also noted that the $15 billion government-funded BharatNet programme would provide middle-mile connectivity to close to 2.65 lakh *gram panchayats*.

It would also give on-demand connectivity to the remaining 3.8 lakh villages, with a 100-Mbps connection to every home as demanded by citizens.

On manufacturing, he said the mobile phone industry was worth about $2-3 billion in 2014 and is now a $63-billion industry, and India is now the world's second-largest mobile phone producer, and exports are close to $29 billion.

IPO will be the beginning of Jio's next phase of growth: Akash Ambani

Our Bureau
New Delhi

Reliance Jio on Thursday said that the upcoming initial public offering (IPO) will mark the beginning of Jio's next growth phase, which will also provide value to shareholders.

"From my perspective, Reliance has had a very strong history on shareholders' value and that's what we need to focus on the further journey from the IPO. Of course, the IPO is the biggest step for our 10-year-old company, and we truly believe that the future journey is very exciting," Akash Ambani, Chairman, Reliance Jio Infocomm, told reporters on the sidelines of the India Mobile Congress (IMC) 2026 here.

He said the company was "working very hard" on bringing this IPO.

TIME FOR GROWTH. Reliance Jio Infocomm Chairman Akash Ambani at the India Mobile Congress 2026 ANI

The company is expected to open for public subscription in the second half of this month.

BROADBAND FOR ALL

The company is also awaiting spectrum from the government, he said.

Ambani said, "I have always said that Jio has stood for the consumers, and satellite plays a part... The biggest use-case of satellite technology today is in the home-connect part of it."

He said that Jio was making sure that every home has broadband connectivity with a mission, and satellite is only going to increase that very rapidly.

"But today, we can say that we cover 99 per cent of Indian homes, and anyone who wants it can avail from Jio technology," he said.

When asked about tariff hikes for its mobile services to get more average revenue per user, Ambani said Jio aimed to deliver a lot of value, and it has always stood for inclusivity.

"We brought 50 crore Indians to data-centric mode... We keep on driving that, and when we are launching these services, we look to explore all the avenues. But we have always stood for inclusivity, and we have always stood for affordability," he added.

Meanwhile, Ambani also said that Jio was working to develop an indigenous satellite technology stack and had already filed patents in the pre-6G space, as it looks to strengthen India's position in next-generation telecommunications.

Adani targets $100 billion annual investment capacity by 2033

Avinash Nair
Ahmedabad

The Adani Group, which is targeting annual investments of about ₹2 lakh crore this financial year, is now aiming to build the capacity to deploy nearly 4.8 times that amount — or about $100 billion (₹9.7 lakh crore) — every year by 2033.

"I would like us at Adani to build the capability and capacity to invest up to $100 billion a year by 2033, so that when 2035 comes, it would be a success for us," Jugeshinder Singh, Chief Financial Officer, Adani Group, said while speaking at the second anniversary of the CareEdge Global event at GIFT City.

The Group aims to have a portfolio that can sustain that level of investment for the following decade from 2035, Singh added. "For the last at least eight years, we have maintained investments at a rate of about 1.6-1.7 times our EBITDA and we have maintained that at a higher and higher level. This year, we are attempting — and broadly we will succeed also — ₹2 lakh crore of annual investments. To put that in context, in the infra space, there will be roughly about 12-14 per cent of the total infra spend in the country."

The Adani Group currently funds a substantial portion of its forward investment internally. "Today, 72 per cent of our forward capex comes directly from our own internal cash flow," Singh said, adding that the remaining 28 per cent could be provided by domestic and global banks and capital markets.

LONG-TERM PLAN. The Group aims to have a portfolio that can sustain that level of investment for the following decade from 2035 REUTERS

SUFFICIENT CAPITAL

"We frankly do not need anybody's capital. We are okay," he said. According to company disclosures and management commentary, the Adani Group spent ₹1,52,967 crore on new projects in FY26, its highest annual capital expenditure, taking the Group's total asset base to ₹7,85,098 crore.

Chairman Gautam Adani had said earlier that the Group's infrastructure investments in FY26 accounted for "more than 30 per cent of India's private-sector capital expenditure" during the year.

"India is a tremendous opportunity and it is for us to lose. And I do not want to lose," Singh said at the GIFT City event. He argued that elevated interest rates do not necessarily prevent infrastructure investment when the assets being created continue to meet the marginal utility of their users.

"In India, even at these elevated rates, we will invest more this year than we did last year. We will attempt to invest more next year than we are doing this year because we can still produce the asset that Indians want to use," Singh said. The Group did not see external conditions as a fundamental constraint on India's investment cycle unless domestic policy was mismanaged.

Singh flagged two fundamental risks to India's long-term economic set-up. The first was the historically "extractive" nature of Indian corporate investment, with companies often investing to exploit arbitrage rather than acting as foundational investors. The second risk, he said, was the relative absence of foundational academic and intellectual literature from the eastern world compared with the West over the past several centuries.

PepsiCo's India biz witnessed "broad-based" growth in Q3

Meenakshi Verma Ambwani
New Delhi

PepsiCo on Thursday said its India business reported "broad-based increases" in terms of unit volumes in both snack and beverage segments in Q3 CY2026. The company also noted that India was among the markets that "aided" beverage organic revenue growth for its international business.

In terms of the performance of its International Franchise Business, the company noted that unit volume grew 5 per cent, primarily reflecting "broad-based increases led by India" in the quarter under review. In its filing on the Asia-Pacific Foods business, it stated, "Unit volume grew 11 per cent, primarily reflecting broad-based increases, led by India."

In the prepared remarks, the management said that the convenient foods' organic revenue growth for the international business was broad-based, as markets including India and China "performed well. Beverages' organic revenue growth (for international business) was aided by the UK, Colombia, Argentina, Egypt, Türkiye, France, Poland, Saudi Arabia and India, among others," it added.

The snacks and beverage major said that international organic revenue growth accelerated to 8 per cent in Q3 CY2026.

RBI's 29 day VRRR auction receives tepid response

Mumbai: The RBI 29-day variable rate reverse repo (VRRR) auction received a tepid response on Thursday, even though banking system liquidity is in a huge surplus. However, the central bank's second VRRR auction, with a one-day maturity, received a good response, reflecting banks' reluctance to park money with the RBI for a longer tenure. The central bank received bids worth ₹79,655 crore against a notified amount of ₹2 lakh crore, which it accepted fully at a cut-off and weighted average rate of 5.49 per cent. PTI

DailyObjects raises ₹332 cr in Series C funding

New Delhi: DailyObjects has raised ₹332 crore through a combination of primary and secondary transactions in its Series C funding round. Pankaj Garg, Co-founder and CEO, DailyObjects told ***businessline***, "We will use these funds to scale up our retail presence to 150 new exclusive brand outlets in the next five years. Overall, we are looking at this capital to build a ₹ 1,000 crore business over the coming years and become a global design-led consumer brand from India." OUR BUREAU

Debt mutual funds turn volatile on RBI repo rate hike

INVESTORS' CHOICE. Short- and medium-duration funds may fare better as yields rise

Suresh P Iyengar
Mumbai

IN TANDEM. Whenever the RBI raises the benchmark repo rate, borrowing costs increase across the banking and debt capital ecosystems REUTERS

The rise in repo rate by 0.25 per cent by RBI will reduce the net asset value and yield trajectories of fixed-income mutual fund schemes in the short term.

Whenever the RBI raises the benchmark repo rate, borrowing costs increase across the banking and debt capital ecosystems. Hence, government securities and corporate papers issued after the rate hike carry higher coupon rates to move in tandem with the higher repo rate. This makes the coupon rate of existing bonds held by investors seem relatively lower, which then reduces their value in secondary market trading.

Mutual funds are mandated to value their debt holdings on a mark-to-market basis every day, and thus a decline in bond prices translates directly into lower net asset values for existing investors.

RBI POLICY STANCE

Moreover, RBI has changed its policy stance from 'neutral' to 'calibrated tightening,' which reflects the central bank's commitment to an extended period of tightening.

Abhishek Bisen, Head of Fixed Income, Kotak Mahindra AMC, said while the 10-year G-Sec yield moved higher after the RBI's rate hike, the 30-year yield softened marginally, suggesting investors believe most of the tightening cycle may already be priced in.

Currently, the bond market is already factoring in nearly 100 basis points of repo rate hikes (including 25 bps delivered), so a hawkish signal is not entirely unexpected. Investors should avoid reacting to a single policy move and increase exposure to high-quality short- and medium-duration funds through SIPs, he added.

LOWER VOLATILITY

Sandeep Agarwal, Head of Fixed Income, Sundaram AMC, said while the change in policy stance from "neutral" to "calibrated tightening" was a surprise move, it suggests that the rate cycle is yet to peak.

In the near term, he added investors may gravitate towards lower-volatility categories such as ultra short term, money market funds, or other short-term investment opportunities. Over time, as markets stabilise, higher accrual yields are likely to enhance the attractiveness of debt funds and support higher inflows.

Subhendu Harichandan, Executive Director, Anand Rathi Wealth, said the change in RBI stance shows its willingness to take a difficult decision to bring in price stability while navigating the current challenging market conditions. Though there can be some pressure on the NAVs of debt funds in the short term, he said short- and medium-duration funds are in a better position because they can reinvest at the new, higher rates, even as long-duration funds can see more volatility in the near term.

Piyush Jhunjhunwala, Founder and CEO, Stockify, said when yields go up, investors may get a chance to invest in the market at higher interest rates, subsequently enhancing their portfolio's potential return. While higher yields may present certain challenges, it does not have to translate into negative experiences with debt funds, as fresh investments will benefit from better rates, he added.

US suspends visa programme for top tech global companies

Bloomberg

VISA CRACKDOWN. US Vice-President JD Vance making an announcement during a press conference on anti-fraud initiatives on the White House campus in Washington, DC REUTERS

The Trump administration said it would suspend the immigration programme for multiple tech firms, including Microsoft Corp, alleging widespread abuse of a worker visa system.

"There has been no company in the US, unfortunately, that has abused this system more than Microsoft," Vice-President JD Vance said on Thursday during a briefing in Washington.

Labour Secretary Keith Sonderling said other companies that would be suspended from the permanent labor certification programme included Cognizant Technology Solutions Corp, Infosys Ltd, Tata, Wipro Ltd, HCL Technologies Ltd and Capgemini SE. He said there were multiple active federal investigations ongoing into the matter.

Vance said the suspensions would be indefinite, indicating they would be in place until the administration believed its concerns were addressed.

The firms named by Vance and Sonderling didn't immediately respond to requests for comment nor did the Vice-President's office and Labour Department.

Shares of Cognizant were down nearly 1.4 per cent in New York trading on Thursday, while Microsoft pared earlier gains. American depositary receipts of Infosys and Wipro each fell more than 3.5 per cent.

IMMIGRATION DEBATE

Silicon Valley's reliance on foreign workers has become a major flashpoint in the debate over immigration, with the administration and allies pressing tech giants to do more to train and hire US workers.

President Donald Trump has also moved to make it harder for companies to use H-1B visas to attract foreign talent, targeting a key pipeline for the industry. "The fraud is that they're making representations when applying for this programme that are fundamentally illegitimate and therefore ultimately illegal," Vance said.

The suspensions marked the latest move by the Trump administration to crack down on both legal and undocumented pathways to migration. The programme at issue allows US employers to help sponsor foreign workers for permanent residency.

In a nearly simultaneous announcement on Thursday, the administration also said it had opened investigations into foreign exchange visa holders at nine top colleges, including Harvard University, Stanford University and MIT. The Labour Department's inspector general said the inquiries will focus on J1 visa holders, which are often international PhD candidates or visiting scholars at universities.

Vance urged the companies to shift their policies to employ more US workers, singling out Microsoft as well as Adobe Inc. "Stop defrauding the American worker. Stop importing an indentured servant to do a job that an American worker would happily do," the Vice-President said.

US plans $70,000 fee for foreign students seeking work training

Reuters
Washington

The US Department of Homeland Security (DHS) has proposed that international students pay at least $70,000 in training fees if they want to work in the country, according to a government notice posted online on Wednesday, part of the Trump administration's wider crackdown on foreign visa holders.

Under the proposal, non-immigrant students with F-1 visas would be required to pay $70,000 to a certified institution for on-the-job training, known as Optional Practical Training (OPT) and $30,000 for any additional work training. The DHS said the new rules were meant "to combat fraud, strengthen the integrity of the immigration system, and protect US workers." Under the OPT system, foreign students can engage in work training for up to 20 hours per week while school is in session,as well as for a limited time after graduation, with an additional allowance for those with degrees in science,technology, engineering and mathematics.

Those who enrol are currently expected to pay around $500.

"DHS is now setting a fee to ensure employers, students, and institutions are engaging in appropriate activities consistent with admission as an F-1 non-immigrant," the agency said.

Non-life insurance industry premium up 8.92% in H1

G Naga Sridhar
Hyderabad

The non-life insurance industry recorded an 11.7 per cent year-on-year growth in gross direct premium underwritten during the first half of FY27, excluding specialised insurers. Including specialised insurers, the industry's premium grew 8.92 per cent to ₹1,79,712 crore from ₹1,64,987 crore in H1 FY26.

However, agriculture insurance premium contracted, according to flash figures released by the General Insurance Council on Thursday. Gross direct premium of non-life insurers excluding specialised companies rose to ₹1,76,105 crore during April-September 2026 from ₹1,57,609 crore in the corresponding period last year, according to provisional data from the Insurance Regulatory and Development Authority of India.

KEY GROWTH

Agriculture Insurance Company's premium fell 57.2 per cent to ₹2,866 crore in H1 FY27 from ₹6,703.98 crore a year earlier.

Its premium also declined 51 per cent year-on-year in September alone to ₹1,995.43 crore from ₹4,119.16 crore.

The standalone health insurance segment remained a key growth driver, with premiums rising 30.69 per cent to ₹25,586 crore in H1 FY27 from ₹19,578 crore.

Care Health, Aditya Birla Health, Niva Bupa and ManipalCigna reported strong year-on-year growth during the period.

Private general insurers recorded a more moderate 9 per cent growth in cumulative premium to ₹1,50,518 crore from ₹1,38,031 crore.

Among larger private players, HDFC ERGO grew 26 per cent, Tata AIG 25 per cent, IFFCO-Tokio 19 per cent and SBI General 21 per cent.

Premium growth in September was 6.1 per cent for the industry as a whole, with gross direct premium rising to ₹32,951 crore from ₹31,052 crore a year earlier.

Excluding specialised insurers, however, September premium growth was much stronger at 15 per cent, with premium increasing to ₹30,820 crore from ₹26,798 crore.

Private general insurers supported the September performance, with the premia up 13 per cent, while standalone health insurers grew 27 per cent.

The sharp 50 per cent decline in specialised insurers, mainly due to the fall in agriculture insurance premiums, continued to weigh on overall industry growth.

FSSAI issues notice to Dr Reddy's, Nestle Health, e-comm cos over misleading Celevida GLP+ claims

Our Bureau
New Delhi

The Food Safety and Standards Authority of India (FSSAI) on Thursday said it has issued notices to Dr Reddy's and Nestle Health Science Ltd besides Flipkart India, Amazon India, Netmeds Healthcare and Tirupati Wellness Pvt Ltd over alleged non-compliant claims and ads regarding a nutritional supplement. The regulator said the notice was issued regarding "non-compliant advertising and claims" for 'Celevida GLP+' on e-commerce platforms."

In a social media post, the regulator said the product was found to be advertised as "high protein support for lean muscle preservation during GLP1/GLP therapies". "Such claims were found to imply suitability for a specific physiological condition. The brand name 'Celevida GLP+', along with the GLP-1/GIP therapy-related claims, was found to create a misleading association between the product and such therapies," FSSAI added. It added that claims of "help maintain lean muscle", "support muscle strength" and "preserves lean mass" were found "to imply that the product may help mitigate loss of lean body mass during weight loss and GLP-1/GIP therapy."

In a separate enforcement action, the FSSAI has suspended the licence of Shreyas Retail for repeatedly being involved in the sale of expired or rotten food products. It has also sanctioned prosecution against Nex International over the issue involving "unsafe loose raisins."

Fuel surcharges to pinch festival season flyers as ATF costs rise

Our Bureau
New Delhi

Festive season airfares are expected to pinch passengers as airlines across the board introduce or revise fuel surcharges amid rising aviation turbine fuel (ATF) prices. On Thursday, Air India Group as well as Akasa Air announced changes to fuel surcharges amid a sustained increase in ATF prices, days after IndiGo revised its levies.

While Air India and Air India Express revised surcharges across domestic and select international routes, Akasa Air introduced a domestic fuel surcharge and revised its existing international levy.

The revised charges will apply to new bookings made from October 9, from midnight for Air India Express, 12.01 am for Akasa Air and 11 am for Air India. As per the airlines, the changes were intended to partially offset the pressure on operating costs arising from higher fuel prices.

FUEL SURCHARGE

On domestic routes, Air India and Air India Express will levy a one-way fuel surcharge ranging from ₹400 to ₹1,200, depending on the distance travelled.

In terms of select international routes, the revised one-way surcharge will be $215 for North America, $210 for Australia, $135 for Europe, including the UK, and $55 for West Asia.

On its part, Akasa Air will levy a domestic fuel surcharge of ₹375 for flights covering up to 500 km and ₹600 for distances of 501-1,000 km.

On international routes connecting India with Kuwait, Qatar, Saudi Arabia, the UAE, Thailand and Vietnam, Akasa Air will levy a fuel surcharge of ₹2,500.

At that time, IndiGo said the latest month-on-month increase in ATF prices exceeded 14 per cent, taking fuel costs to among their highest levels in the last decade.

Meanwhile, the Centre is considering reviving its ATF Price Stabilisation Fund scheme amid rising jet fuel costs and their impact on airfares, Civil Aviation Minister K Ram Mohan Naidu had told reporters on Tuesday.

In July, *businessline* had reported that the Centre's ₹10,000-crore ATF PSF scheme had lapsed after no domestic airline signed the mandatory memorandum of understanding with State-owned OMCs within the prescribed timeframe.

'Rate hike unlikely to derail affordable housing demand'

Ashokamithran T
Mahesh Ravidas Nayak
Mumbai

Ajai Kumar Shukla, MD & CEO, PNB Housing Finance

The Reserve Bank of India's recent 25-bps repo rate hike is unlikely to significantly dent demand in the affordable housing segment, according to Ajai Kumar Shukla, Managing Director and Chief Executive Officer of PNB Housing Finance, who believes the increase will have only a marginal impact on monthly loan repayments for the company's core customer base.

"A rise of 25 basis points translates into only a modest increase in EMIs for affordable housing borrowers, whose average loan ticket size is around ₹16-18 lakh. On an ₹18 lakh loan, the increase would amount to only a few hundred rupees a month, making it manageable for most customers," he said.

He also downplayed concerns over expectations of further policy tightening. While some economists have projected another 50-75 basis points of rate hikes in the coming months, Shukla said he does not expect rates to rise by as much as 100 basis points and believes any further action by the RBI will remain measured. "I don't see anything beyond an additional 25 bps hike in rates for FY27," he added.

SEASONAL TAILWINDS

Importantly, he sees seasonal tailwinds offsetting any pressure from higher borrowing costs. "The festive season, which includes Navratri, Dussehra, Deepavali and year-end celebrations, typically boosts income levels for many of our self-employed customers, improving repayment capacity and supporting housing demand in the second half of the financial year. As a result, we do not currently foresee a slowdown in loan growth."

The optimism is also backed by government measures aimed at expanding affordable housing. Shukla pointed to higher budgetary allocations for the segment, which he expects will increase credit flow to lower-income homebuyers and strengthen housing finance demand across the industry.

On the funding side, the lender said the recent upgrade to the highest credit-rating category by all four rating agencies should gradually lower borrowing costs.

However, the benefit is expected to be modest, at around 10-15 basis points, and is likely to accrue gradually rather than immediately.

Every FTA entered into by India protects sensitivities, says Goyal

Our Bureau
New Delhi

Commerce & Industry Minister Piyush Goyal has assured that every free trade deal entered into by India protects sensitive sectors, including agriculture, fisheries and MSMEs, while opening up opportunities for exports of farm, marine, and high precision items and MSME products.

The Minister also expressed confidence that exports of goods and services in the current fiscal year would achieve the target of $1 trillion. "I can assure each one of you that every free trade deal we have entered into protects the sensitive sectors, particularly of Indian agriculture, our fishermen and our MSMEs, yet opens up huge opportunities for export of agri products, marine products, high precision items, engineering and electronic products, as well as for MSMEs. It opens up huge investment opportunities for countries and companies around the world to come to India and enjoy the fruits of the large market...," Goyal said at a CII event on Thursday.

Piyush Goyal, Commerce & Industry Minister

NINE FTA PACTS

The nine trade agreements pursued by India in the last four-five year period involve key partners such as Mauritius, the UAE, Australia, the EFTA nations, the UK, Oman, New Zealand, the EU, and the US.

While most of the FTAs have been signed and many implemented, the one with the US is still hanging fire due to uncertainty on tariffs levied by the Trump regime, despite a framework deal signed in February this year. For better utilisation of FTAs by exporters, especially MSMEs, Goyal suggested that industry chamber CII should set up an FTA utilisation cell.

"I would urge CII to set up FTA utilisation desks across every State council to help our MSMEs to use the FTAs to good effect, to learn about new market access opportunities, to understand ROO, to understand how to join delegations, to go across the world, and to participate in exhibitions to showcase their offerings...," he said.

Goyal said India's exports were growing despite global challenges. In 2025-26, the country's exports touched a record high of $863 billion.

"We have set a target of big growth in exports... we are looking at $1 trillion in exports. I am confident after looking at the first half numbers, that we will achieve this," Goyal said.

‘Unsettled relationships’ with US a headwind to growth: CEA

GROWING CONCERN. Higher logistics costs also weigh on economy, says Nageswaran

Ashokamithran T
Mumbai

> All components of GDP are actually working in tandem and rising quite rapidly
>
> **V ANANTHA NAGESWARAN**
> Chief Economic Advisor

“Unsettled relationships” with the US is a near term headwind facing the economic growth of India, said Chief Economic Advisor V Anantha Nageswaran.

“Relationships with the US have been somewhat unsettled, as we saw in the trade barriers,” said Nageswaran while speaking at an event here on Thursday. He spoke about the headwinds against the backdrop of slower growth in public debt as compared with other countries and the resulting long term resilience in the fundamentals of the economy.

“Many other advanced countries have a very high debt to GDP ratio for the government and as a result of this, in the last two weeks rather, bond yields have spiked tremendously. The point is Indian bond yields have not spiked as much.” Nageswaran stated.

Underlining the sectoral growth rates of the gross domestic product (GDP), he said that “all components of GDP are actually working in tandem and rising quite rapidly.”

He said that higher freight and insurance costs were another headwind that the domestic economy is facing.

“The state of the energy market, the higher freelance insurance costs, and the uncertainties related to natural gas, fertilizer prices, etc., have also made investors wonder whether India’s competitiveness will be sustained in the face of higher energy prices,” he said.

AI ABSENCE

Nageswaran further highlighted the absence of India in the global AI boom. “India does not have frontier labs, nor does it have the jeans and shovels equivalent of the gold mining era. We don’t make chips like Korea or Taiwan do, nor do we have the frontier labs,” he said.

He, however, reassured that, a year from now, India’s absence from global AI play will “turn up to have been its strength.”

The planned AI spending of nearly $8 trillion, is a borrowing story and a shake-off will ease pressure on global economies.

Capital will then look for growth that does not depend on AI, he said, adding that it is then when India will reap benefits, as investors will look for “a non-AI alternative.”

Brigade plans ₹40,000 cr investment, expansion

Aishwarya Kumar
Bengaluru

M R Jaishankar, Executive Chairman

Brigade Enterprises plans to invest about ₹40,000 crore over the next three years to develop a 40-million-sq-ft pipeline across residential, commercial, retail, hospitality and emerging businesses such as warehousing, Executive Chairman M R Jaishankar said.

The pipeline is spread across the company’s key markets, with Brigade looking to reduce its dependence on Bengaluru by increasing its presence in Chennai and Hyderabad.

The investment will be funded through a combination of internal accruals, project-level debt, customer advances and bookings. About a third of the funding is expected to come from each of these sources.

APPROVAL DELAYS

Jaishankar said delays in obtaining project approvals, particularly in Bengaluru, had affected the company’s execution and its stock-market performance. Brigade has a larger concentration of projects in Bengaluru compared with some of its peers, making approval-related delays more significant.

He also acknowledged that Brigade’s valuation remains below that of some Bengaluru-based peers. The company’s P/E multiple is around 24-25, compared with 57-58 for some peers, he said, adding that improving investor perception and execution would be important.

Jaishankar said rising land and construction costs were making housing increasingly difficult to afford for middle-income buyers.

UPI MDR decision likely today; industry expects deferral to Jan

Jyoti Banthia
Bengaluru

The 22-member UPI and Services Steering Committee is expected to meet tomorrow to take a final call on whether to defer the merchant discount rate (MDR) on UPI transactions, sources said. “The steering committee is meeting to take the final call on MDR and the decision is expected to be announced after it,” sources added. Industry sources said MDR is likely to be pushed to January 2027, as the festival season is around the corner and industry bodies have raised concerns about the levy at this time.

The panel comprises the Indian Banks’ Association (IBA), the Payments Council of India (PCI), and representatives of banks, payment service providers (PSPs) and various associations.

India could achieve 300 GW of wind capacity by 2035, says industry

Our Bureau
Chennai

With India on track to achieve a second consecutive year of annual wind energy installations in excess of 6 GW, industry stakeholders believe that an upward revision of the country’s long term wind capacity targets is now on the cards.

As of September 2026, installed wind capacity stood at 59 GW. Girish Tanti, Co-Founder and Vice-Chairman of Suzlon Group, said that given the scale-up over the past few years and the under construction and soon to be commissioned capacity, the prior target of 100 GW by 2030 is a ‘done deal’.

“Now, we are talking about what will be achieved by 2035. The target for us is 155 GW, but considering the demand, supply and resource allocation plans that the government has laid out, this target will likely get revised to a higher number,” he said.

Speaking at the Windergy 2026, an international trade fair and conference dedicated for the wind energy sector, Tanti and other representatives believe that India can scale its installed capacity to as much as 300 GW by 2035. “If we were to accelerate the pathway to net zero, especially given the current concerns of energy security, then we can easily reach 250 gigawatts by 2035. There is also a scenario that if we use the full economic and technical potential of wind as it is available in our country then we can cross 300 GW of wind,” Tanti said.

CLEAN ENERGY. (from left) Girish Tanti, Chairman, IWTMA and Vice-Chairman, Suzlon Group; Pralhad Joshi, Minister for New and Renewable Energy; and CTR Nirmal Kumar, TN Minister for Energy Resources, at Windergy India in Chennai BIJOY GHOSH

Pralhad Joshi, Minister for New and Renewable Energy, said that “around 20-25 GW of turbines could be replaced with larger, more efficient machines. We have requested the industry to give their feedback on this so that we can start a pilot project on repowering. The government will provide the required support,” he said. For 2026, he said that the country is targeting capacity of 6-8 GW.

Mayank Tewari, Additional Secretary, MNRE, said that offshore turbines would be a significant part of the next phase of wind expansion, particularly as land becomes increasingly constrained.

Joshi suggested that the Centre is planning 500 MW of offshore wind capacity in Tamil Nadu with a ₹7,000-crore-plus investment planned.

He added that the project is currently held up over tariffs, with the Centre seeking a power purchase agreement at around ₹5 per unit from Tamil Nadu.

Amazon festival sale opens with 100% y-o-y growth

Meenakshi Verma Ambwani
New Delhi

Aman Deep Lohan, Director, Home, Kitchen and Outdoors, Amazon India

Amazon India is witnessing strong growth in order volume as per early trends for its key festival sale event, amidst macroeconomic concerns around inflationary pressures.

The e-commerce major said the Amazon Great India Festival 2026, opened with 100 per cent year-on-year growth in terms of shopping volume. This was driven by strong traction for premium products supported by affordability levers.

It added that consumers in nearly all pin codes placed an order. At the same time, in over 120 cities served by Amazon Now, one out of every two products were delivered within minutes.

Aman Deep Lohan, Director, Home, Kitchen and Outdoors, Amazon India, told *businessline*, “Early trends from the Amazon Great Indian Festival 2026 have beaten our most optimistic expectations reflecting a positive consumer sentiment.”

PREMIUM PRODUCTS

“We are witnessing clear trends in terms of consumers opting for premium products in categories such as appliances and smartphones. This is fuelled by some of the affordability levers offered by the banks that we have partnered with, in terms of options such as the no-cost EMI,” he added. One out of two customers shopped using EMI and one out of every three units bought were rewarded with cashbacks, the e-commerce major said.

Lohan added that health and wellness products are also witnessing strong traction with high shopping orders being witnessed for premium wearables, air fryers and air purifiers among others.

Amazon lays off nearly 1,000 employees globally; 106 in India

Our Bureau
Bengaluru

Amazon has laid off nearly 1,000 employees globally, with about 106 of them in India, according to sources.

The affected employees in India are from the customer care services and retail segments. Sources said the move is aimed at making processes more streamlined and linear.

NEW STRUCTURE

In a statement, an Amazon spokesperson said: “We’re always looking at our team structures to ensure we are best set up to move fast as we innovate for customers. We have adjusted parts of our stores business because we believe this structure will better enable us to deliver on our priorities.”

The statement did not share country-wise numbers.

The latest cuts follow far larger rounds at the e-commerce major. Amazon announced 16,000 layoffs on January 28, its second major wave in four months after 14,000 cuts in October 2025.

NOTICE OF POSTAL BALLOT

Notice is hereby given that the following items of special business are proposed for approval by the Members of the Company by means of Postal Ballot, only by way of remote e-Voting process (“e-Voting”) as set out in the Postal Ballot Notice dated October 08, 2026, pursuant to the provisions of Sections 108, 110 and other applicable provisions, if any, of the Companies Act, 2013 (“the Act”) read with Rule 20 and 22 of the Companies (Management and Administration) Rules, 2014 (“the Rules”), General Circular No. 03/2025 dated September 22, 2025 read with General Circular Nos. 14/2020 dated April 08, 2020, 17/2020 dated April 13, 2020 and all other relevant Circulars issued by the Ministry of Corporate Affairs from time to time (collectively referred to as “MCA Circulars”), Regulation 44 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (“SEBI Listing Regulations”), Secretarial Standard on General Meetings (“SS-2”) issued by the Institute of Company Secretaries of India and any other applicable laws, rules and regulations (including any statutory modification(s) or re-enactment(s) thereof for the time being in force).

Description of the Resolution(s)	Type of Resolution
Transfer of the ISRF Undertaking of the Company pursuant to the provisions of Section 180(1)(a) of the Act and Regulation 37A(1) of the SEBI Listing Regulations.	Special
Material Related Party Transaction with the joint venture company proposed to be incorporated by Cochin Shipyard Limited and Drydocks World – Dubai FZCO.	Ordinary

In compliance with the MCA Circulars, the Company has sent the Postal Ballot Notice through electronic mode only, to those Members whose names appear in the Depositories’ records as on the cut-off date Tuesday, October 06, 2026 and whose email address is registered with the Company/ Depository Participants/ Depositories. The Company has completed dispatch of the said Notice on October 08, 2026. The Postal Ballot Notice is also available on the Company’s website www.cochinshipyard.in, websites of the Stock Exchanges i.e., BSE Limited and National Stock Exchange of India Limited at www.bseindia.com and www.nseindia.com respectively and the website of Central Depository Services (India) Limited (“CDSL”) at www.evotingindia.com.

In compliance with Regulation 44 of the SEBI Listing Regulations and pursuant to the provisions of Sections 108 and 110 of the Act read with the Rules made thereunder and the MCA Circulars, the manner of voting on the proposed resolution is restricted only to e-Voting i.e., by casting votes electronically instead of submitting postal ballot forms. Accordingly, physical copies of the Postal Ballot Notice along with postal ballot forms and pre-paid business reply envelopes are not being sent to the Members for this Postal Ballot. The communication of the assent or dissent of the Members would only take place through the e-Voting system. The Company has engaged the services of CDSL as the agency to provide e-Voting facility.

The Members whose names appear in the Depositories’ records as on the cut-off date i.e., Tuesday, October 06, 2026, may cast their vote electronically. The detailed procedure for e-Voting is provided in the Postal Ballot Notice. The votes can be cast during the following voting period:

Commencement of e-Voting	**09:00 Hrs. IST on Friday, October 09, 2026**
End of e-Voting	**17:00 Hrs. IST on Saturday, November 07, 2026**

The e-Voting facility will be disabled by CDSL immediately thereafter and will not be allowed beyond the said date and time. Once the vote on the resolution is cast by the Member, he/she shall not be allowed to change it subsequently. The voting right of Members shall be in proportion to their share in the paid-up equity share capital of the Company as on the cut-off date i.e., Tuesday, October 06, 2026. A person who is not a Member as on the cut-off date should treat the Postal Ballot Notice for information purpose only. The last date of e-Voting, i.e., November 07, 2026, shall be the date on which the resolution would be deemed to have been passed, if approved by the requisite majority.

The Board of Directors of the Company has appointed CS Sreekumar P. S. (FCS No. 8130, CP No. 8067) Partner, M/s. SVJS & Associates, Practising Company Secretaries, Kochi, as the Scrutiniser for conducting the Postal Ballot, through e-Voting process, in a fair and transparent manner.

The Scrutiniser will submit his report to the Chairman or any person authorised by him in writing. The results of e-Voting will be declared on or before Tuesday, November 10, 2026, 17:00 Hrs. IST. The results declared along with the Scrutiniser’s Report, will be placed on the website of the Company www.cochinshipyard.in and on the website of CDSL www.evotingindia.com immediately after the declaration of results by the Chairman or any person authorised by him in writing. The results shall also be immediately forwarded to the Stock Exchanges where the Company’s shares are listed viz., BSE Limited and National Stock Exchange of India Limited. The results shall also be displayed on the notice board at the Registered Office of the Company.

In case of any queries/ grievance regarding e-Voting, you may refer the Frequently Asked Questions (FAQs) on the e-Voting system and e-Voting user manual available under Help section of www.evotingindia.com. FRIDAY - OCTOBER 9 - 2026

QUICKLY.

Gold edges up as markets weigh Fed rate path

Gold prices edged up on Thursday after hitting a two-month low in the previous session, as investors assessed the minutes of the US Fed's meeting for clues on its interest rate trajectory. Spot gold rose 0.3 per cent to $4,122.12 per ounce by 1128 GMT. US gold futures for December delivery were little changed at $4,146.60. REUTERS

Copper holds firm on tight supply

London: Copper prices edged higher buoyed by top consumer China's return to the market even though a strong dollar and rising oil prices weighed on industrial metals. Benchmark three-month copper on the LME was up 0.2 per cent at $14,495.50 a tonne by 0930 GMT. Aluminium fell 1.1 per cent to $3,083.50. REUTERS

Crude oil rises as supply concerns persist

London: Crude oil prices jumped on persistent worries about supply from West Asia amid an increase in attacks on shipping in the Gulf and the Strait of Hormuz. Brent crude futures were up $4.55 at $104.75 a barrel by 1205 GMT. US WTI crude gained $4 to $92.28. REUTERS

Unfolding El Nino may be the strongest since 1950s, says WMO

GAINING STRENGTH. Record rise in Central, eastern tropical Pacific temperatures likely by late 2026; IOD could offer a twist

Srikrishnan PC
Chennai

A rapidly strengthening and drought-bearing El Nino could push central and eastern tropical Pacific temperatures to record levels by late 2026, according to the World Meteorological Organization's Global Seasonal Climate Update.

It is expected to persist into February 2027 and could raise global heat and shift rainfall patterns, increasing risks of drought, flooding and broader climate impacts across the globe.

"El Nino is firmly established and strengthening rapidly. WMO forecasts indicate a near-100 per cent likelihood that it will persist through February 2027, potentially being one of the strongest since at least 1950," said WMO Secretary-General Celeste Saulo.

ARID FORECAST. Drier-than-average conditions are forecast over India, southern Central America and parts of the Caribbean and north-western South America

HISTORIC HIGH
The Nino 3.4 index anomalies over the central-eastern equatorial Pacific jumped from an average of +1.6°C above normal in June 2026 to +2.5°C above normal in August. The seasonal average Nino 3.4 sea surface temperature anomaly is predicted to peak about +3.7°C for October-November-December, around December. This is the highest since observations began and is more intense than the previous record of +2.6°C from November 2015 to January 2016.

IOD TWIST
Other ocean basins are also playing a role in the seasonal outlook. The forecast indicates that the positive Indian Ocean Dipole, a climate pattern that can strongly influence rainfall around the Indian Ocean, will peak in October and then weaken.

The October-December seasonal anomaly is predicted to be around +0.5°C.

SURFACE TEMP
August was the hottest month on Earth since records began, according to monthly reports from the European Union's Copernicus Climate Service, the US National Oceanic and Atmospheric Administration and NASA. Record high global sea surface temperature was observed in August.

The Global Seasonal Climate Update said large parts of the world are very likely to experience above-average (1993-2009) temperatures in October-December.

This doesn't mean every place will be warmer than average every day, but it does mean there is a strong seasonal signal that increases the probability of heat extremes and heat-related impact.

Drier-than-average conditions are forecast over the Indian subcontinent, southern Central America and parts of the Caribbean and north-western South America.

Rain for TN, Kerala, Lakshadweep this weekend

Vinson Kurian
Thiruvananthapuram

After a lull of nearly a week, the South-West monsoon resumed its retreat on Thursday, withdrawing from the remaining parts of Maharashtra, as well as parts of Goa, Karnataka, Telangana and Odisha, and further areas of Jharkhand and Chhattisgarh.

The India Meteorological Department (IMD) said the withdrawal line now runs through Supaul, Ranchi, Sundargarh, Bargarh, Bijapur, Hyderabad, Belagavi and Panjim. This marks another decisive step in the four-month monsoon's seasonal retreat and arrival of the North-East monsoon.

The conditions are now becoming favourable for the monsoon to pull back from more parts of East India and the northern Peninsula, as well as many parts of the North-East, during the next three to four days.

While the monsoon footprint contracts across the country, the seasonal transition is simultaneously opening the door to a more convective pattern over the South Peninsula.

WET DAYS AHEAD. The European Centre for Medium-Range Weather Forecasts sees a wave of rain approaching south coastal Andhra Pradesh and north coastal Tamil Nadu by mid-week

RAIN, THUNDERSTORMS
Thus, even as the monsoon steadily retreats, the atmosphere remains primed for widespread pockets of rain and thunderstorms, a characteristic feature of the transitional season when the monsoon's withdrawal from the north coincides with renewed convective activity over the South Peninsula and the adjoining regions.

The pattern is expected to persist for much of the coming week. Isolated to scattered rainfall is likely over coastal Andhra Pradesh, Yanam, coastal Karnataka, Rayalaseema, south interior Karnataka, Tamil Nadu, Puducherry and Karaikal for next seven days.

Kerala and Mahe may see a similar unsettled spell for three days from Sunday.

KERALA & MAHE
Isolated thunderstorms, lightning and gusty winds, with speeds of 40-50 km/hr and gusting to 60 km/hr, are likely over Tamil Nadu, Puducherry and Karaikal for five days. Kerala, Mahe and Lakshadweep could see similar conditions for three days through Saturday.

Coastal Andhra Pradesh, Yanam and Rayalaseema are also likely to experience thunderstorms, lightning and gusty winds for three days through Saturday.

South interior Karnataka could see isolated thunderstorms and lightning on Friday and Saturday.

Food Ministry finds discrepancies in GST filings by sugar mills

Our Bureau
Chennai

The Food Ministry has found discrepancies in the goods and services tax (GST) details furnished by sugar mills between August 17 and 19 and has initiated action against them, a note said on Thursday.

"The discrepancies are being examined with reference to relevant GST records, sales invoices, buyers' particulars and dispatch/lifting records. Where the discrepancies are established, appropriate proceedings/actions are being initiated against the concerned sugar mills under the applicable provisions of law," said Arvind Kumar Rawat, Director (Sugar) in the Department of Sugar and Vegetable Oils.

The mills have been asked to furnish details of sugar sales from August 20 to 31 by October 10. The details will be cross-verified with GST and physical verification records, the note said.

MORE VERIFICATIONS
Rawat said the government had decided to carry out intensive physical verification starting October 9, and mills must ensure full compliance with the directive. Government authorities will continue to monitor compliance and undertake physical verification. Any deviation will attract "appropriate action in accordance with the provisions of law", the note said.

The government said mills had to meet the target — 45 per cent of the sales quota allocated for the first week of October and the rest in the second week. Any failure would be treated as a violation, and proceedings would be initiated under the Essential Commodities Act.

The note comes on the heels of the government's efforts to curb any surge in sugar prices, particularly with Dussehra and Diwali ahead.

REINING IN PRICES
Sugar prices, which soared to about ₹70 a kg in retail outlets (all-India average) in late August, are currently ruling at ₹55.06 a kg. A month ago, it was quoted at ₹61.33 and ₹59.05 a year ago.

The prices surged after domestic production was affected due to unseasonal rain and pest attacks, particularly in Uttar Pradesh. The production is now estimated at 30.6 million tonnes compared with initial estimates of over 34.3 mt.

TN INCENTIVE
Meanwhile, the Tamil Nadu government announced that it would provide an incentive of ₹709.5 per tonne of sugarcane to growers for 2026-27.

"This will take the returns to farmers to ₹4,000 a tonne (for 9.5 per cent sugar recovery)," said State Agriculture Minister R Vinod. This will cost the State exchequer ₹603.34 crore. For sugar recovery over 9.5 per cent, farmers will get more than ₹4,000 a tonne, he said.

The incentive is over the State Advised Price of ₹3,290.50 a tonne. However, the incentive will be given based on the recommendations of committees headed by District Collectors and officials of the Directorate of Sugar. Some 90,000 farmers will benefit from this, said Vinod.

Palm oil producing nations keen on strengthening ties with India

Our Bureau
Mumbai

The Council of Palm Oil Producing Countries (CPOPC) has reaffirmed its commitment to strengthening cooperation with India on edible oil security, sustainable palm oil production and resilient supply chains.

Highlighting India's strategic importance to palm oil-producing countries, Izzana Salleh, Secretary-General, CPOPC, emphasised the need for a collaborative approach to ensure reliable edible oil supplies, support for farmers and to promote sustainable growth.

"India is much more than an export destination for palm oil-producing countries. It is a partner in our shared pursuit of food security, resilient supply chains, productive farmers and sustainable growth," said Salleh at the recent GLOBOIL India 2026 event in Mumbai.

The Council has identified oil palm agronomy, improved planting materials, smallholder productivity, traceability and sustainable sourcing as key areas for deeper cooperation between producing countries and Indian stakeholders. Musdhalifah Machmud, Deputy Secretary-General, CPOPC, said evolving global edible oil market dynamics, particularly growing demand for biofuels in producing countries, will have implications for international trade.

"As national biofuel policies evolve, transparency and dialogue will help producers and Indian buyers plan ahead. Improving productivity, particularly among smallholders, is also essential to strengthening long-term supply," she said.

BIOFUEL DEMAND
The CPOPC said the growing use of palm oil for biofuels in producing countries could influence international trade flows, underscoring the need for greater transparency and dialogue between producers and consuming markets.

The Council is an intergovernmental organisation that facilitates cooperation among palm oil-producing countries and promotes dialogue with consuming markets. Its members are Indonesia, Malaysia, Papua New Guinea, Honduras, the Democratic Republic of the Congo and Nigeria, while Colombia, Ghana and Costa Rica are observer countries.

Together, CPOPC member countries account for about 90 per cent of global palm oil production.

Indonesia's palm oil export overhaul may lift global prices

Our Bureau
Mumbai

Indonesia's planned overhaul of its palm oil export regime, along with a higher biodiesel blending mandate, could tighten global supplies and push up palm oil prices from 2027, the Indonesian Palm Oil Association (GAPKI) said.

Indonesia, which accounts for about 57 per cent of global palm oil supply, is a key supplier to India. It plans to centralise exports of strategic commodities through the State-owned PT Danantara Sumberdaya Indonesia (DSI) from January.

Till December, exporters can continue to deal directly with overseas buyers while reporting transactions to DSI. From January, DSI will become the "exporter of record" for strategic commodity shipments, overseeing export contracts, permits, levies and foreign-exchange receipts.

Dr Mohamad Fadhil Hasan, Head of Foreign Affairs at GAPKI, outlined the evolving crude palm oil policy landscape at the recent GLOBOIL India 2026.

Indonesia is also moving towards a B50 biodiesel blending mandate, with full implementation targeted for 2027. While current domestic biodiesel production capacity is considered sufficient to support the higher mandate, GAPKI expects rising domestic consumption to progressively reduce CPO available for exports.

The association expects the impact to become more pronounced in 2027, potentially affecting export earnings, State revenue and industry financing.

GLOBAL PRICE IMPACT
GAPKI expects the B50, centralised exports through DSI and the new commodities exchange to reshape global palm oil supply and pricing dynamics. Higher domestic biodiesel consumption would reduce Indonesia's exportable surplus.

Grim situation in South

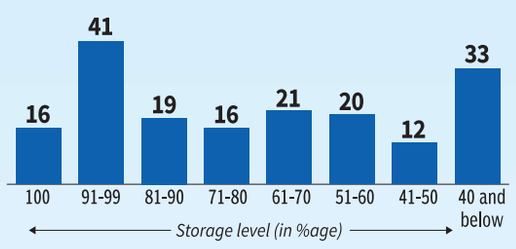

Storage in India's 178 major reservoirs dipped marginally this week to 71 per cent of capacity, with the situation remaining concerning in the southern region, according to data from the Central Water Commission (CWC).

Reservoir storage in the southern region fell to 47.2 per cent of capacity, with Tamil Nadu at 31.6 per cent and Andhra Pradesh at 32.5 per cent. The Aliyar dam in Tamil Nadu was empty, while storage in the Bhavani, Vaigai, Sholayar, Karayar and Manimuthar reservoirs was below 30 per cent.

Overall storage in the 178 reservoirs stood at 131 billion cubic metres (BCM), against a total capacity of 184.8 BCM. Storage in the eastern, western and central regions was above 80 per cent, while the northern region slipped below 70 per cent this week.

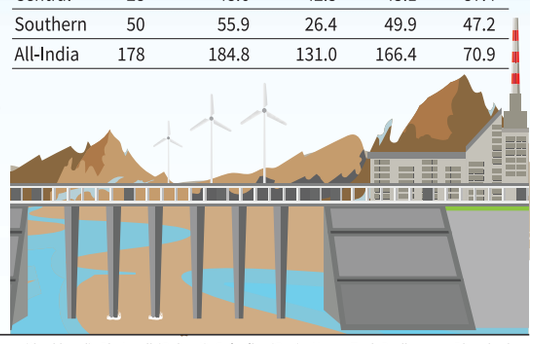

The number of reservoirs at full capacity fell to 16 from 18 last week. Four each were in Maharashtra and Jharkhand, while three were in Madhya Pradesh. At least 45 reservoirs were less than half full, while more than 41 had storage above 90 per cent.With the South-West monsoon drawing to a close, reservoir storage is expected to decline. However, the India Meteorological Department as forecast heavy rain in southern and eastern regions, which could help prevent a sharp fall in levels.

Improving storage — *Number of reservoirs*

Region-wise storage

Region	Number of reservoirs	Live capacity (in BCM*)	Storage (in BCM)	Storage last year (in BCM)	%age level to capacity
Northern	11	19.8	11.6	17.3	58.6
Eastern	31	21.9	18.7	18.4	85.4
Western	58	38.6	31.8	37.7	82.4
Central	28	48.6	42.5	43.1	87.4
Southern	50	55.9	26.4	49.9	47.2
All-India	178	184.8	131.0	166.4	70.9

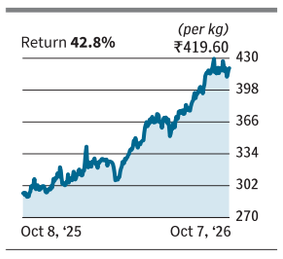

Rengali, Sapua (Odisha), Maithon, Panchet Hill, Tilaiya and Konar (Jharkhand), Shetrunji (Gujarat), Salaulim (Goa), Upper Tapi, Dudhganga, Bhandardara and Nira Deoghar (Maharashtra), Bansagar, Bargi, Rajghat (Madhya Pradesh) and Sirsi (Uttar Pradesh) are full. Aliyar Dam in Tamil Nadu is empty.

Hold the longs in zinc

Akhil Nallamuthu
bl. research bureau

Zinc futures have gained so far this week, rebounding from an important support. While the broader trend is bullish, the price action has started showing some weakness in the uptrend.

COMMODITY CALL.

The October futures bounced off the support at ₹408 early this week. Subsequent support is at ₹400. On Thursday, though, it rose to ₹429.85 before moderating to the current level of ₹418. That said, the trend has not turned bearish. As long as the support at ₹400 holds, the bulls will have an edge. Hence, there is a good chance for zinc futures to resume the rally, surpass ₹430 and touch ₹435. Resistance above ₹435 is at ₹440.

On the other hand, if the contract falls from the current level and breaches the support at ₹400, it could turn the outlook weak. This could potentially trigger a fall to ₹385.

Last week, we suggested buying zinc futures at ₹410. Hold on to the trade. Retain stop-loss at ₹395. When the contract rises to ₹430, tighten the stop-loss to ₹420. Book profits at ₹435.

Govt seeks fishers' views to frame National Plan of Action on small-scale fisheries

V Sajeev Kumar
Kochi

India's efforts to frame the National Plan of Action for Securing Sustainable Small-Scale Fisheries (NPOA-SSF) have entered a crucial phase, with the Centre spearheading community consultations across coastal States to seek fishers' views.

Community-led stakeholder consultations were held at Kakdwip in West Bengal and Baleswar in Odisha, while the Centre has asked the coastal States and Union Territories (UTs) to conduct their own consultations and consolidate fishers' views for the plan.

The Union Department of Fisheries is leading the process, with the Bay of Bengal Programme Inter-Governmental Organisation (BOBP-IGO) facilitating and coordinating the exercise.

About 30 million people in India depend on fishing and allied activities for their livelihoods

SHARING FEEDBACK
In a letter, the Department of Fisheries asked the fisheries departments in the coastal States and UTs to designate a nodal officer or team, organise stakeholder consultations this month and share feedback with the National Task Force drafting the NPOA-SSF.

Union Fisheries Secretary Abhilaksh Likhi said the consultations were not a formality to be completed before the plan is drafted, but the process through which the plan is being shaped.

The aim is to ensure that the NPOA reflects the concerns and priorities of fishing communities at the grassroots level.

Surabhi Rai, Joint Secretary, Union Department of Fisheries, said about 30 million people in India depend on fishing and allied activities for their livelihood.

BROADER ISSUES
The NPOA-SSF will address a range of issues affecting small-scale fishing communities, including access to fisheries resources, sustainable fisheries management, decent work, gender equality, climate change and disaster risk, said P Krishnan, Director, BOBP-IGO.

The draft NPOA-SSF is targeted for release on World Fisheries Day, November 21.

Telangana advises farmers to opt for crops requiring less water in rabi season

Our Bureau
Hyderabad

The Telangana government has asked farmers to choose short-duration pulses and oilseeds that require less water and investment during the upcoming rabi season, citing likely water shortages due to the continued impact of El Nino.

"Farmers should choose crops based on the availability of irrigation water and market demand," Telangana Agriculture Minister Tummala Nageswara Rao said.

He asked the agriculture and allied departments to work together to help farmers assess local conditions and prepare for alternative crops, particularly pulses and oilseeds.

PLEA TO SCIENTISTS
The Minister directed officials to draw up and implement irrigation plans under the supervision of District Collectors, taking into account water available in reservoirs to protect the standing crops.

He also asked scientists to develop groundnut varieties suited to farmers' requirements and market demand.

Responding to requests from farmers in the erstwhile Mahabubnagar district, he said steps would be taken to provide subsidised sprinklers.

QUICKLY.

Vi, Hindalco to build DigiMine in Odisha

Mumbai: Vodafone Idea's enterprise arm Vi Business has partnered with Hindalco Industries to deploy a dedicated private network at Hindalco's Baphlimali Bauxite Mine in Rayagada district, Odisha.
The company will be able to deploy multiple digital use cases including safety solutions, fleet management, drone and CCTV-based surveillance, real-time monitoring and efficiency. The multi-year managed services deployment includes a complete private network stack with spectrum, core, RAN and managed services. In a first for the company, the network will serve as the digital backbone for Hindalco's connected mining journey, enabling secure and reliable connectivity across the mine.OUR BUREAU

Cargo traffic at major ports up 8% in April-Sept amid geo-political tensions

SOME CONCERN. But recovery is uneven across segments with growth mainly due to POL, containers: Expert

T E Raja Simhan
Chennai

Cargo traffic handled by India's major ports rose 8.01 per cent year-on-year to 472.75 million tonnes during April-September, according to data released by the Indian Ports Association.

The overall growth in major port traffic was supported by containers, POL, iron ore and coal volumes, even as two ports — Chennai and Paradip — recorded lower throughput, according to the data.

Sources note that given the geo-political issues, the 8 per cent growth was quite healthy.

Deendayal Port in Gujarat (formerly Kandla port) recorded the highest traffic with a 42.97 per cent increase in petroleum, oil and lubricants (POL) handling. It also recorded the highest growth at 26.85 per cent.

Paradip port, on the East Coast, came second but registered a 1.06 per cent drop to 75.96 mt due to lower POL handling followed by Jawaharlal Nehru Port Authority (JNPA) thanks to increased container handling.

Traffic handled at major ports *(in million tonnes)*

Ports	April to September traffic		Change (%)
	2025	2026*	
SMP, Kolkata	33.41	34.75	4.01
Paradip	76.78	75.96	-1.06
Visakhapatnam	43.08	46.13	7.08
Kamarajar (Ennore)	23.84	25.98	8.98
Chennai	29.46	28.2	-4.28
V.O. Chidambaranar	21.28	22.11	3.87
Cochin	18.62	18.63	0.02
New Mangalore	22.61	24.18	6.93
Mormugao	9.4	9.53	1.10
Mumbai	35.15	36.65	4.26
JNPA	49.63	56.26	13.36
Deendayal	74.36	94.33	26.85
Total	**437.7**	**472.75**	**8.01**

*tentative

CONTAINERISED CARGO
Chennai Port reported a decline of 4 per cent due to lower POL throughput. However, in all other categories, including containers, the port reported an increase. Across commodities, containerised cargo emerged as a key growth driver.

Container tonnage handled by major ports increased 8.21 per cent to 112.90 mt from 104.34 mt. Container traffic rose 12.22 per cent to 8.17 million TEUs.

Iron ore traffic increased 7.25 per cent to 25.24 mt, while POL traffic grew 6.31 per cent to 140.97 mt. Coal traffic increased 5.78 per cent to 67.99 mt.

Interestingly, fertilizer traffic was the only major commodity segment to register a sharp decline, falling 26.89 per cent to 4 mt.

Jagannarayan Padmanabhan, Senior Director and Global Head-Consulting, Crisil Intelligence, said the 8 per cent growth in major-port traffic in H1 FY27 points to resilient trade activity. "However, the composition of growth is important: it is being driven disproportionately by Deendayal's surge in POL and JNPA's strong container volumes, while some traditional bulk cargo segments remain subdued. This suggests that port traffic is healthy, but the recovery is still uneven across cargo segments and gateways," he said.

It is up to SC to decide on SIR, says Murli Manohar Joshi

Our Bureau
New Delhi

Former Union Minister Murli Manohar Joshi

Veteran Bharatiya Janata Party (BJP) leader and former Union Minister Murli Manohar Joshi on Thursday waded into the Opposition's *vote chori* allegations, emphasising that the government by the people sustains only when the elections are fair, governance is accountable, and the bureaucracy remains transparent.

Joshi's lessons on democratic principles came on a day when the India bloc leaders, on the third day of their protest demanding the resignation of the Chief Election Commissioner Gyanesh Kumar, went to Rajghat to pay tribute at Bapu's memorial. They reiterated their charge that Prime Minister Narendra Modi, Union Home Minister Amit Shah, and Chief Election Commissioner Gyanesh Kumar together are stripping away the right to vote from the people across the entire country.

Speaking to reporters on the sidelines of the 21st Ficci Higher Education Summit, Joshi, invoked Abraham Lincoln's classic definition of democracy to assert that any constitutional violations must be examined by the Supreme Court. At the same time he recognised that a responsive Opposition is a vital pillar of democratic functioning.

'UP TO SUPREME COURT'
On the opposition demanding Gyanesh Kumar's resignation over alleged irregularities in the Special Intensive Revision (SIR) of the electoral rolls, Joshi said, "...government of the people, for the people and by the people, shall not perish from the earth, provided the elections are fair, the governments are accountable, and the bureaucracy is transparent."

"The opposition is responsive and responsible, and has a clear-cut alternative programme... The whole thing is to be done under the ambit of the Constitution, and if the Constitution is violated, then the Supreme Court should look into it. That is the principle on which democracy should work," emphasised Joshi.

Meanwhile, the opposition alliance, India bloc has sought an appointment from President Droupadi Murmu and is awaiting a response from the Rashtrapati Bhavan, Congress general secretary (organisation) KC Venugopal said. The first request letter was sent on October 2 and following the Rashtrapati Bhavan Office response, "We submitted the request again on October 5, along with the names, seeking an appointment on October 7, 8 or 9," Venugopal said. "So far, we have received no response. We will wait until Friday," he added.

Meanwhile, a group of 42 retired judges have defended the Election Commission against the "sustained attack" from the opposition. "Criticism of institutions is a democratic right. Denigration is not. Constitutional authorities are now branded 'thieves', 'puppets' and 'compromised' from public platforms," they lamented in an open letter.

Women safety: SC orders intensified patrolling, checks

Aaratrika Bhaumik
New Delhi

To curb sexual offences in the National Capital, the Supreme Court has ordered intensified patrolling around educational institutions, stringent verification of drivers operating public transport and app-based cabs, real-time monitoring of vehicle-tracking and SOS systems, and action against establishments serving liquor unlawfully.

A Bench of Justices JB Pardiwala and K Vinod Chandran sai, "There shall be enhanced beat patrolling on an immediate basis, across the NCT of Delhi, more particularly around educational institutions (including schools, colleges, universities and coaching institutions) and other zones which get flagged under the vulnerability mapping exercise."

The court added that the police chief must apprise the court whether control-room command centres or "war rooms" were operational in the capital and detail the protocols for real-time coordination and emergency response. The court has made the Chief Secretary and the Delhi Police Commissioner responsible for filing periodic compliance reports, and that they would be held "personally answerable" for any lapses.

The latest directions follow the court's September 28 order taking *suo motu* cognisance of a spate of rape cases reported across Delhi-NCR.

FINER DETAILS
Underlining the importance of preventive policing, the Bench referred to the "Broken Windows theory" of policing, noting that seemingly minor administrative lapses such as unattended street lights, dysfunctional CCTV cameras, dark stretches and unresolved public complaints could

eventually create a "heightened perception of insecurity" among citizens and deter them from using public spaces, fueling a "self-reinforcing cycle" that provides greater scope for crime.

The Bench also advised police personnel to interact with residents and exchange information on criminal or delinquent activity in their neighbourhoods, particularly around educational institutions and paying-guest accommodations for young women.

VERIFY CAB DRIVERS
Notably, the court also directed strict verification of drivers and assistants operating government and private buses, cabs, taxis and autorickshaws, including vehicles linked to app-based aggregators.

Only registered and verified persons would be permitted to operate such vehicles, with their names and photographs prominently displayed to enable passengers to identify and report unauthorised drivers.

The Bench also called for a review of the functioning of the "Shishtachar Squads", set up through a Delhi Police circular in March 2025 to tackle eve-teasing and sexual harassment in public places. The Delhi Police Commissioner has been asked to produce the squads' weekly reports for the past three months, together with details of the areas covered, frequency of drives, and action taken.

It posted the matter for further hearing on November 16.

India joins US-led move to tackle excess capacity

Amiti Sen
New Delhi

India has joined a US-led initiative of 15 countries to tackle structural excess manufacturing capacity in key sectors, including automobiles, batteries, solar panels, chemicals and semiconductors, amid scrutiny of its own manufacturing policies under a US Section 301 investigation into the same issue.

Experts say New Delhi must move carefully, balancing cooperation with its own manufacturing ambitions.

The country has so far maintained that its manufacturing capacity is geared to meet both domestic and global demand.

MARKET DISTORTIONS
India was among 14 economies that joined the US in signing a Joint Ministerial Statement on October 7, following discussions at the G20 Trade Ministers' meeting in Milwaukee on September 30-October 1.

The other signatories include the European Union, Japan, South Korea and Mexico, all of which, like India, are also subjects of the US Section 301 investigation into structural excess capacity. Argentina, Australia, Canada, France, Germany, Poland, Turkiye, and the UK are also part of the grouping.

The joint statement called on countries to end non-market policies and practices that distort markets and contribute to structural excess capacity.

"We note that in the absence of such steps, an increasing number of countries are taking action to defend their industries, workers, and economies from distortions resulting from such policies and practices...such individual efforts will be more effective if concerned countries cooperate, share information, and take complementary action, wherever possible," it highlighted. The initiative will initially focus on automobiles and electric vehicles, batteries, chemicals, foundational semiconductors and solar panels.

But with India itself a subject of the Sec 301 probe, experts caution against legitimising US pressure

The signatories will establish dedicated sectoral platforms to exchange information and explore complementary action to address the impact of excess capacity on domestic industries, workers and supply chains, per the statement.

'CAN CUT BOTH WAYS'
Trade policy think tank Global Trade Research Initiative (GTRI) said India was now joining Washington in tackling the very issue under scrutiny in its own manufacturing. The US launched its Section 301 investigation into structural excess capacity across 16 economies in March.

"The initiative also exposes a question of consistency: participating economies are coordinating against market distortions without confronting the US over its own trade-rule violations during the past two years," GTRI Founder Ajay Srivastava said.

For India, the test is whether this cooperation protects domestic manufacturing or gives Washington greater legitimacy to challenge India's industrial expansion, he added.

US Trade Representative Jamieson Greer said on Wednesday that the initiative aimed to tackle production that exceeded global demand and was sustained by government policies and interventions.

"Over the course of the US G20 presidency, numerous economies raised instances of structural excess capacity and production in economies that persistently exceeded global demand and were sustained by foreign government's non-market policies and practices... Left unchecked, these issues will continue to cripple domestic industries, displace local production, and hinder our ability to raise the standard of living for workers and their families," he said.

No specific tariffs, quotas or other trade restrictions have been announced under the initiative.

Senior officials have begun work and are expected to meet at the technical level before December to develop terms of reference, share non-confidential information and data, assess the impact of excess capacity and identify information gaps, the joint statement pointed out.

Other countries not in the OECD have also been invited to join the initiative.

IAF capabilities growing in the right direction: Air Chief Marshal AP Singh

Dalip Singh
New Delhi

"Our operational capabilities are growing in the right direction," Chief of Air Staff, Air Chief Marshal AP Singh said on the occasion of the 94th Air Force Day. He added that Operation Sindoor demonstrated the IAF's formidable power as well as the effectiveness of the air defence operations.

In his address at the Hindon Air Base on Thursday, he said the Indian Air Force has evolved into an "exceptional, capable, network-centric and multi-domain force ranked among the finest in the world."

He said the emerging conflicts across the world, have demonstrated that air power is the primary means of protecting national interests.

"Last year, the whole world witnessed the speed with which the Indian Air Force moved into combat operations. We saw firsthand the destruction power as well as the effective air defence operations of the Indian Air Force during Operation Sindoor," he told the gathering. "So, infallible, impervious and precise is just not a tagline. It is the manifestation of our strength and resolve," he said. On his superannuation on October 31, Air Chief Marshal Singh said serving as the IAF chief was "my biggest fortune" and a proud moment for him. Air Marshal Ashutosh Dixit will be the next Chief of Air Staff.

Kashmir's rooftop solar push hits hurdle as banks worry over vendor credibility

Gulzar Bhat
Srinagar

Banks are becoming cautious about financing rooftop solar projects in Kashmir because of concerns over the credibility of vendors, a senior banker said, as Jammu and Kashmir seeks to accelerate installations under the PM Surya Ghar scheme.

Of 61,566 loan applications submitted under the scheme in Jammu and Kashmir, 17,416 have been rejected, including 14,232 in areas served by the Kashmir Power Distribution Corporation Ltd (KPDCL), according to data presented at a government review meeting.

The senior banker, who spoke on condition of anonymity, said banks were wary of some vendors operating in the rooftop solar market. The vendors were making promises to customers that raised questions about the viability of projects, while the absence of adequate checks on vendors was making banks more cautious about financing such proposals.

CHALLENGES
He said the government needed to strengthen the process for authorising and monitoring vendors to give banks greater confidence while assessing loan applications. The administration has identified bank financing as one of the main hurdles to the rooftop solar programme and directed power distribution companies to examine rejected bank loan applications and resolve eligible cases. Around 75 per cent of rooftop solar installations in KPDCL areas depend on bank financing, according to officials. Jammu and Kashmir has received 89,680 applications against a target of 83,500 residential rooftop solar installations by March 31, 2026. So far, 46,133 systems have been installed. Of the loan applications, 38,773 have been sanctioned and disbursed, while 5,367 remain under process.

In KPDCL areas, 28,324 rooftop solar systems have been installed, with a combined capacity of 102.55 MW, compared with 17,809 systems with a capacity of 62.69 MW in areas served by Jammu Power Distribution Corporation Ltd (JPDCL).

"The administration has asked discoms to work with banks to review rejected applications and resolve eligible cases , said a government spokesperson.

CoRover wins MeitY agentic AI contract

Mumbai: CoRover, the company behind BharatGPT, has won a government contract to build a unified AI assistant and bot platform under the Ministry of Electronics and Information Technology (MeitY), with DigiLocker set to become the first government service to be deployed on the agentic AI framework. The contract was awarded by the National e-Governance Division, under MeitY, at a value of about ₹4 crore. OUR BUREAU

Indian carriers cancel flights to Riyadh

Mumbai: Indian carriers have cancelled their flights to Saudi Arabia's capital Riyadh after it came under attack from Houthi rebels on Wednesday and Thursday. An IndiGo aircraft operating on the Hyderabad-Riyadh route was diverted to Dammam. The airline also cancelled its Friday departures from Mumbai, New Delhi and Hyderabad following the attack. Akasa Air also cancelled its Kochi-Riyadh flight and said that it is monitoring the situation on a real-time basis. OUR BUREAU

Dr Reddy's gets 2 USFDA observations for AP unit

New Delhi: Dr Reddy's Laboratories has received a Form 483 with two observations from the US Food and Drug Administration following an inspection at its manufacturing facility in Pydibhimavaram, Andhra Pradesh. The US health regulator completed a pre-approval inspection at the company's FTO-11 manufacturing unit from October 5-7. PTI

Cancer drug prices likely to fall as govt caps trade margins at 30% of MRP

COST RELIEF. The move could result in annual savings of around ₹2,500 crore for patients

Ankita Upadhyay
New Delhi

In a move aimed at reducing high mark-ups and lowering the financial burden on patients undergoing cancer treatment, the government has decided to cap trade margins at 30 per cent of the maximum retail price (MRP) for all non-scheduled anti-cancer drugs.

The measure will cover all non-scheduled anti-cancer drugs — branded, generic, domestically manufactured, imported, patented and non-patented.

Officials said a committee formed by the Union Ministry of Health and Family welfare will finalise the list of drugs. "So far, a total of 110 drugs have been identified, of which 35 are patented," the official added. The process is expected to be completed within the next 7-10 days. The government estimates that the move could reduce the MRP of affected medicines by up to 70 per cent and result in annual savings of around ₹2,500 crore for patients undergoing cancer treatment.

WELCOME MOVE. The measure will cover all non-scheduled anti-cancer drugs

POSITIVE LIST

The list of medicines to be covered will be a positive list to be finalised by an expert committee under the Directorate General of Health Services. The government has also clarified that manufacturers' selling prices or revenue will not be affected by the measure, as the intervention is aimed specifically at capping trade margins.

According to the government, around 60 people per one lakh population are affected by cancer in India, while out-of-pocket expenditure accounts for around 75 per cent of total cancer-care expenditure. Market data cited by the government shows that the anti-cancer medicines market comprises around 225 drugs and 500 formulations, with an annual turnover of approximately ₹12,500 crore. Scheduled cancer medicines account for around ₹2,250 crore of this market.

An analysis by the National Pharmaceutical Pricing Authority (NPPA) found that the average trade mark-up on non-scheduled anti-cancer drugs is around 170 per cent, with mark-ups reaching as high as 700 per cent in some cases.

Concerns have been raised by State authorities, including Maharashtra, Rajasthan and Karnataka, as well as patients and civil society groups, over excessive drug prices and the disparity between procurement prices and the MRP charged to consumers. The government said high trade mark-ups, particularly on high-value oncology medicines, place a substantial burden on patients through out-of-pocket expenditure.

The latest decision builds on an intervention introduced by the NPPA in February 2019, when trade margins on 42 selected non-scheduled anti-cancer drugs were capped on a pilot basis by invoking extraordinary powers under Paragraph 19 of the Drugs (Prices Control) Order , 2013.

Drawing on the experience of the earlier intervention, the government has now decided to extend trade-margin rationalisation to all non-scheduled anti-cancer drugs covered by the forthcoming positive list.

SC directs Centre to double down on unethical pharma marketing

Aaratrika Bhaumik
New Delhi

Underlining the need to strengthen the existing regulatory regime to curb unethical pharmaceutical marketing practices and ensure access to "ethical and affordable healthcare", the Supreme Court on Thursday directed the Centre to constitute an expert committee within two weeks. The committee has been asked to consult stakeholders and domain experts and submit its recommendations to the Centre within two months of its first meeting.

"The committee so constituted shall undertake a holistic and comprehensive examination of all issues relating to unethical pharmaceutical marketing practices ... with a view to strengthening the regulatory framework and safeguarding the larger public interest," a Bench of Justices Vikram Nath and Sandeep Mehta directed.

The committee's mandate brings into focus the long-pending issue of whether pharmaceutical marketing practices should be brought under a statutory regime instead of continuing with the existing voluntary framework. The Centre has itself acknowledged difficulties in using existing drug and essential commodities laws to give such regulations statutory backing.

The Bench also directed the Centre to take a "reasoned decision" on the committee's recommendations and file a compliance affidavit within two weeks of the committee completing its exercise. It posted the matter for further hearing on January 29, 2027, to assess compliance with its directions. The top court issued the directions while hearing petitions filed by the Federation of Medical and Sales Representatives' Associations of India (FMRAI) and others contending that expensive gifts, foreign trips, other freebies and aggressive marketing practices were being used to influence doctors to prescribe particular medicines. Such practices, they said, could have serious public health consequences, including adverse drug reactions and antimicrobial resistance.

CITIZEN WELLBEING

The order, authored by Justice Mehta, also noted that the material on record indicated that the existing framework had not been entirely effective in curbing unethical practices in the pharmaceutical sector.

"In a sector which has a direct bearing upon the health and wellbeing of citizens, the efficacy of the regulatory framework cannot be assessed merely by the existence of prescribed norms; it must also be judged by their efficacy, implementation and enforcement," the Bench said.

The top court also clarified that its role was not to enter the domain of policy formulation but to facilitate a "meaningful and effective consultative process" so that the concerns raised and suggestions placed before it received due consideration.

Canadian writer and poet Anne Carson wins Literature Nobel

Reuters
Stockholm

Canadian poet Anne Carson

Canadian poet and writer Anne Carson won the 2026 Nobel Prize in Literature "for her bold and inventive *oeuvre* that, in playful dialogue with the classical tradition, has created new forms for contemporary literature," the award-giving body said on Thursday.

The prize is awarded by the Swedish Academy and is worth $1.2 million.

Poet and essayist Carson's work often blends verse, prose, dialogue and translation in a genre-defying mix.

She is widely known for her translations of classical Greek literature, which heavily influences her work, ranging ranges from opera libretti to literary criticism and verse novels such as *Autobiography of Red* from 1998.

GREEK INSPIRATION

Her style is exemplified in *Norma Jeane Baker of Troy* from 2019, a performance piece which mixes the stories of Helen of Troy in Euripides' play *Helen* and Marilyn Monroe. Carson takes a place beside luminaries such as Alexander Solzhenitsyn, Alice Munro and Ernest Hemingway as a recipient of the award, which often divides opinion among book lovers. The Academy has been lambasted for ignoring some of the literary titans of the last 120 years such as Leo Tolstoy, Virginia Woolf and Jorge Luis Borges, criticised for snubbing US authors — though it gave the prize to the singer-songwriter Bob Dylan in 2016 — and accused of being too obscure in its choices. Last year's prize was won by Hungarian writer Laszlo Krasznahorkai, dubbed the "master of the apocalypse" by American critic Susan Sontag.
