## TECH DIGEST.

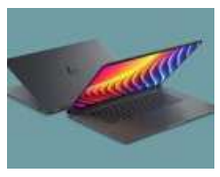
### Apple launches a trio of smart home devices

Apple has unveiled the HomeView smart display, Apple TV 4K and HomePod mini 2, aimed at expanding its smart home ecosystem.

The new HomeView marks Apple's entry into the smart display category, combining a 7 inch liquid retina display with face recognition for up to six users, personalised content, FaceTime support and smart home controls. The new Apple TV 4K brings a more conversational and capable Siri AI experience to the living room. Powered by the A19 chip, the streaming device features built-in far-field microphones for hands-free voice control, faster performance, AV1 decoding support and deeper integration with Apple's connected home platform. The HomePod mini 2 gains Siri AI capabilities, new colour options and enhanced audio powered by the S10 chip and a new Sound Glow interface that synchronises lighting effects with music playback. HomePod mini 2 is priced ₹18,900 and will be available from October 30. The Apple TV 4K (4th generation) and HomeView are priced ₹39,900 each, with availability beginning November 13.

### HP launches ZBook Ultra G3a mobile workstation

HP has launched the ZBook Ultra G3a 16-inch mobile workstation in India, targeting professionals across AI, engineering, design and content creation.



Powered by AMD's Ryzen AI Max+ Pro processors, it is coupled with a 55 TOPS NPU for AI tasks. The laptop is designed to deliver workstation-grade performance in a thin-and-light form factor.

It supports up to 192 GB of unified memory, including as much as 160 GB of dedicated VRAM, enabling users to run large language models of up to 300 billion parameters and multi-agent AI workflows directly on the device.

Weighing around 1.9 kg and measuring 17.9 mm thick, the workstation features a redesigned thermal architecture that can deliver up to 100 W of performance. Other highlights include a 16 inch 2.8K OLED display with a 120 Hz refresh rate, up to 14 hours of battery life, optional 5G connectivity, USB-C GaN charging adapters and HP Wolf Security. According to HP, the laptop is priced ₹2,89,990 (excluding taxes) and is available through HP's commercial channel partners.

# A welcome upgrade

**SENNHEISER MOMENTUM 5.** Refined audio quality with a unique replaceable battery

**Ashwin Rajagopalan**

**SUSTAINABILITY FOCUSED.** This is one of the first brands to comply with new EU rules on replaceable batteries that come into effect in 2027 ASHWIN RAJAGOPALAN

Almost every time I've tried Sennheiser's Momentum headphones over the years, I'm transported to the interiors of a German luxury car or a Lufthansa premium cabin. No busy instrument cluster, no excessive design elements, but a reassuring fit and finish. It's been about four years since Sennheiser launched the Momentum 4. The brand recently unveiled the Momentum 5 that aims to build on the brand's signature sound. The new 2026 Momentum also aims to address a perceived weak link vis-à-vis the competition: Active noise cancellation. Do these new upgrades give the Momentum 5 a much-needed audio boost to counter rivals like Bose, Sony and Apple? Here's what I found out after nearly 3 weeks with the Momentum 5:

**DESIGN**

Over-the-ear headphones remain my preferred form factor for headphones for multiple reasons. While TWS earbuds work well for calls, I'd recommend a pair of headphones if you listen to a lot of music as part of your regular lifestyle. The key benefit is distance from your eardrum. Most ear experts also recommend the 60/60 rule for your ears. 60 minutes per music session at 60 per cent volume. The Momentum 5 features the familiar Sennheiser design language.

If you're moving from a Momentum 4, the differences are subtle but significant. Both models weigh around 290 g, but the 2026 version is a tad more comfortable for long sessions thanks to a softer headband and larger, deeper ear cups. The Momentum 5 comes in a unique denim shade that sets it apart. I never felt the weight of these headphones while catching up on naps during long domestic flights. The biggest change is under the hood.

The Momentum 5 is one of the first brands to comply with new EU rules on replaceable batteries that come into effect in 2027. This is a great sustainability feature and also adds to the longevity of the headphones. The battery (in the left ear cup) is easy to replace, and the additional cost justifies the long-term cost of ownership.

The headphones don't fold, but the flat case doesn't occupy too much space in backpacks or messenger bags. The headphones don't have an ingress protection rating. I did use them during sweaty workouts, but I'm not sure I can recommend them for an intense run in humid weather. The ear pads are easy to remove if you need to clean them. I found the touch controls a tad too sensitive, especially during weight training in the gym, but you can customise these controls on the app.

**SOUND**

Most audiophiles will tell you that Sennheiser's signature sound delivers a balanced tonality. While you can pump up the bass in the settings, the Momentum 5 doesn't overdo the bass and stays in Sennheiser's strong zone. These headphones are powered by HD 600-inspired 42 mm drivers with Dolby Atmos spatial tracking and Lossless codec support.

The acoustic and electric guitars in Phoebe Bridgers' *Lost Weekend* shone through on these headphones, as did the pop arrangement in *For Your Entertainment* by Ellie Goulding. Vocals are quite lifelike. Overall, the Momentum 5 offers one of the best acoustic experiences in its class; it's something we have come to expect from Sennheiser. It's in the noise cancellation department where it has levelled up.

Sennheiser tells us that the 8-microphone hybrid ANC system delivers up to 3x stronger midrange noise suppression over its predecessor. ANC was impressive, shutting out sounds in loud environments like airplane cabins. It's a big improvement from the Momentum 4, but this is an area where Bose and Sony still set very high standards.

The Sennheiser companion app (I paired this with an iPhone and a Samsung device) allows a lot of options and is easy on the eye.

**BATTERY**

Most premium over-the-ear headphones have excellent battery performance; the Momentum 5 is no exception. Sennheiser claims 57 hours of battery life with ANC on. I used these headphones almost every day over three weeks, and Sennheiser's estimates are quite accurate based on my initial experience.

While a full charge could take about two hours, you can get up to 10 hours of playtime with a quick 10-15 minute charge. You also have the convenience of an analogue cable that's bundled in the case.

**VERDICT**

The 2026 Momentum 5 sticks with Sennheiser's signature sound and makes some key improvements in areas like Active Noise Cancellation. Battery life is impressive; the replaceable battery feature gives it bragging rights over the competition for now.

But most of all, it's the soundstage that is the Momentum 5's calling card. It's something audiophiles and casual listeners will appreciate, making the Sennheiser Momentum 5 one of the best premium over-the-ear headphones you can buy in 2026.

**SNAPSHOT**

**Price**: ₹39,990
**Pros**: Excellent sound, replaceable battery, great design and comfort
**Cons**: No ingress protection rating, no big design change over the Momentum 4

# Endurance is its calling card

**REDMI NOTE 17 PRO MAX.** Massive battery, vibrant display and ready for heavy usage

**Ashwin Rajagopalan**

Almost every smartphone launched in 2026 in the ₹35,000– ₹50,000 price range has tried to find a niche, whether it's camera performance, design or raw power. If I can think of one word to describe the 17 Pro Max, it's endurance. That word can mean different things to different users, but if there are two key endurance factors that define this smartphone, it's battery life and durability.

It's not an easy sell; the 17 Pro Max takes over from the Xiaomi 15 Pro Plus, which features a better chipset and rear camera. Xiaomi is hoping that the new upgrades in the battery and durability departments can compensate for its limitations in other areas. As I found out after a fortnight with the 17 Pro Max, that might well boil down to what your primary purchase drivers are.

**DESIGN**

You'll never guess that the Redmi Note 17 Pro Max houses a massive battery when you hold it in your hand. Xiaomi opts for a flat design with curved edges that make the device easy to clasp. It's under 9 mm thick and weighs 229 g; Xiaomi has done a good job with the weight management and overall ergonomics to ensure the device doesn't feel like a brick.

Xiaomi calls it a "high-strength fibreglass back panel"; it looks refined and doesn't feel slippery, thanks to the matte finish. It survived my drop tests (Xiaomi claims it's ready for drops up to 3 m) on a wooden floor. I also used a water jet spray to test Xiaomi's IP66/IP68/IP68/IP69K ratings for dust and water resistance. The Redmi Note 17 Pro Max sailed through both tests unscarred, validating Xiaomi's endurance claims.

**DISPLAY**

The display is one of the areas where the Xiaomi 17 Pro Max surpasses its predecessor. While most of the specs are the same, the improved peak brightness is a welcome change. You get a 6.83 inch AMOLED display with a 1.5 K resolution (2772 x 1280 pixels/120 Hz refresh rate).

**ERGONOMIC DESIGN.** Xiaomi opts for a flat design with curved edges that make the device easy to clasp ASHWIN RAJAGOPALAN

The peak brightness now reaches 3500 nits, with excellent visibility across lighting scenarios. The 17 Pro Max offers Dolby Vision and HDR10+ support across platforms like Netflix. I watched the Nimisha Sajayan starrer *Babita Singh Reporting* on Amazon Prime Video, and the 17 Pro Max did a great job with colour reproduction.

**CAMERA**

The device opts for an uncomplicated camera setup that combines a 50 MP primary lens with an 8 MP ultrawide, and there's also a 32 MP selfie camera in the mix. While images shot with the primary lens are generally good across lighting conditions, the video performance is just average.

The primary cam does a good job with portraits and low-light scenarios thanks to optical image stabilisation. The ultra-wide camera is one of the weak links in the camera; this is a compromise we've seen with multiple devices in this segment this year.

It captures good low light images

**PERFORMANCE**

We've seen quite a few brands resort to extreme measures to cope with the rising input costs and RAM shortages. Xiaomi seems to have taken a step back with its choice of chipset, opting for a Snapdragon 6 Gen 5 processor. You get a choice of 8 GB/256 GB and 12 GB/256 GB storage variants.

Extreme gamers are unlikely to be impressed with the performance. It clocked just under 3000 in our Geekbench 7 (multi-core) benchmark test, which doesn't put it in the top tier in its class. While this might work well for most average users, it is not for heavy-duty users. The device is powered by Hyper OS 3, which is built on Android 16. You get quite a few customisation options, but the pre-installed apps are a dampener. Xiaomi offers four years of OS updates that puts it ahead of some of its rivals.

**BATTERY**

Think of the 10,000 mAh battery under the hood of the 17 Pro Max as a power bank inside a smartphone. This is easily the device's strongest selling point, a battery that outclasses most of the competition. It comfortably lasts two days despite heavy usage. Xiaomi has bundled a 100 W charger in the box that powers this device in about 80 minutes — impressive. It's not just an antidote to battery anxiety but can also power your other devices thanks to 27 W reverse charging.

**VERDICT**

The Redmi Note 17 Pro Max doesn't compare favourably with its predecessor on the performance and camera fronts, but it makes some significant upgrades in areas that enhance its reputation as an endurance champ. The device is geared for anyone who needs a rugged smartphone with an Energiser-bunny-type battery that complements a vibrant display. It might be a tough sell at its price tag for users looking for a more well-rounded smartphone.

**SNAPSHOT**

**Price:** ₹49,999 onwards
**Pros:** Massive battery, rugged form, four years of Android updates
**Cons:** Processor is a step down, ultra-wide camera

# Playing it smart

A smartwatch built on refinement, but is it worth the upgrade?

**Siddharth Mathew Cherian**

The Samsung Galaxy Watch series has been a cornerstone of Samsung's wearable portfolio since 2018. Eight years and many iterations later, the Galaxy Watch 9 arrives with a focus on refinement rather than reinvention. The question is whether these upgrades are enough to justify an upgrade. After spending time with the watch, here's my take.

**DESIGN**

The Galaxy Watch 9 melds a lightweight aluminium chassis with a clean, understated design, making it comfortable for all-day wear. Samsung offers the watch with Sport, Misty and Fabric band options; for this review, I used the 44 mm Silver model with the Sport Band. Made from a soft rubber-like material, the strap sat snugly on the wrist without causing discomfort or excessive sweating, remaining comfortable throughout the day.

**DISPLAY**

The 44 mm Galaxy Watch9 features a 1.47 inch Super AMOLED display with a sharp 480 × 480 pixel resolution. The display remains easy to read indoors and outdoors, and worked even after contact with water. The haptics were precise, and the touchscreen well calibrated, making navigation feel intuitive.

**PERFORMANCE**

The Galaxy Watch 9 is powered by Qualcomm's Snapdragon Wear Elite chipset, delivering smooth and responsive performance. Navigation, app launches and health tracking feel fluid, while notifications arrive swiftly without any lag and scrolling remains consistently smooth throughout the review.

On the software front, the Galaxy Watch 9 doubles down on health and wellness with new features such as Vitals, Heart Health Score and Fitness Index. Working alongside Samsung's BioActive Sensor, these tools track sleep, activity and cardiovascular health, while tighter One UI 9 integration enhances the experience for Galaxy users. Samsung Wear and Samsung Health continue to be central to the Galaxy Watch 9 experience.

While Samsung Health is available across Android smartphones, ECG and blood pressure monitoring require Samsung Health Monitor and a compatible Samsung Galaxy smartphone. Features such as Energy Score and other advanced wellness insights also benefit from deeper integration with Samsung's ecosystem. The downside is that this limits the full experience on non-Samsung Android devices.

Samsung Galaxy Watch 9 BIJOY GHOSH

**BATTERY**

The Galaxy Watch 9 places a strong emphasis on endurance. The 44 mm model packs a 445 mAh unit, providing dependable all-day battery life alongside continuous health and fitness tracking. On average I was able to get around 1.5-2 days when using it standalone, and close to a full day when using it in tandem with a smartphone. Charging is handled via Samsung's magnetic charging puck, with support for up to 10 W wireless charging.

**VERDICT**

The Galaxy Watch 9 is firmly positioned as a premium smartwatch. It gets the fundamentals right with a comfortable fit, bright display, fluid performance and dependable battery life.

While the improvements over the Watch 8 are largely iterative, the Watch 9 comes across as a polished and easy-to-recommend wearable, especially for those already invested in Samsung's ecosystem.

**SNAPSHOT**

**Price:** ₹45,999 (44 mm, LTE)
**Pros:** Comfortable fit, bright display, fluid performance, excellent wrist ergonomics and reliable all-day battery life
**Cons:** Samsung ecosystem lock-in, iterative upgrades and minimal design changes

**IN ACCORDANCE WITH THE RECOMMENDATION OF THE COMMITTEE OF INDEPENDENT DIRECTORS OF OUR COMPANY, PURSUANT TO THEIR RESOLUTION DATED OCTOBER 10, 2026 THE ABOVE PROVIDED PRICE BAND IS JUSTIFIED BASED ON QUANTITATIVE FACTORS/KEY PERFORMANCE INDICATORS DISCLOSED IN THE *'BASIS FOR OFFER PRICE'* SECTION BEGINNING ON PAGE 109 OF THE RHP *VIS-A-VIS* THE WEIGHTED AVERAGE COST OF ACQUISITION ("WACA") OF PRIMARY AND SECONDARY TRANSACTION(S), AS APPLICABLE, DISCLOSED IN *'BASIS FOR OFFER PRICE'* SECTION BEGINNING ON PAGE 109 OF THE RHP.**

## RISK TO INVESTORS

***For details refer to section titled "Risk Factors" beginning on page 20 of the RHP***

1. **Risk related to supplier dependencies:** We depend on a limited number of suppliers for procurement of raw materials and components required for our manufacturing operations. Our largest supplier is Bonfiglioli Riduttori S.p.A, a related party. Purchases from our related parties represented 15.53%, 16.75%, 15.18%, 17.00% and 19.98%, and purchases from our top 10 suppliers represented 40.84%, 41.74%, 41.20%, 45.62% and 47.52% of our total purchases of raw materials and components in the six months periods ended June 30, 2026 and 2025 and in Fiscals 2025, 2024 and 2023, respectively. As we do not have definitive agreements with our suppliers, any interruption in the availability of raw materials and components on account of any disruption, breakdown or shutdown of our suppliers' operations could adversely impact our operations.
2. **Risk related to cost of Raw material:** Our ability to manufacture gearboxes at competitive prices depends on the continued availability of parts and materials including motors, gears, machined parts and other commercial components required for our manufacturing operations, at prices acceptable to us. The cost of such raw materials and components are typically tied to their underlying raw materials such as steel, aluminium and cast iron. As a result, our operations and our suppliers' ability to provide parts and materials to us at competitive prices is affected by global commodity prices, inflation and our ability to negotiate with our suppliers effectively. Continued or significant fluctuations in the cost of commodities, supply interruptions or shortages could cause our suppliers to increase their costs, which in turn may have an adverse impact on our ability to manufacture our gearboxes in line with targeted costs. Any increase in the prices of raw materials and components required for our operations or levy of duties on the materials we import for our operations, could adversely affect our business, financial condition, results of operations, and cash flows.
3. **Risk related to Operations:** Any unscheduled, unplanned or prolonged disruption of operations at our manufacturing facilities could materially and adversely affect our business, financial condition, results of operations and cash flows.
4. **Risk related to quality of Product/service:** Any actual or perceived defects in our gearboxes and drive systems or the sales and after-sale services provided through dealers or third parties may adversely impact our brand, reputation, and ability to sell our products, which could have an adverse impact on our operations.
5. **Risk related to dependence on Promoter:** We depend on BSPA, one of our Corporate Promoters, for certain aspects of our operations, including the license to manufacture and sell products under its intellectual property including the "Bonfiglioli" trade name and trademark for which we pay a consideration of 6% of our annual sales of the specified products (excluding sales to BSPA and net of discounts and allowances). Any adverse change in our relationship with BSPA could have an adverse impact on our business, financial condition, results of operations, cash flows and reputation.
6. **Risk related to dependence on Promoter & Group Companies:** We depend on BSPA, one of our Corporate Promoters, and other companies in the Bonfiglioli Group for certain aspects of our operations including administrative and corporate services. Any adverse change in our relationship with BSPA and the companies in the Bonfiglioli Group could have an adverse impact on our business, financial condition, results of operations, cash flows and reputation.
7. **Risk related to related party transactions:** We have entered into and will continue to enter into related party transactions with BSPA and companies within the Bonfiglioli Group that may involve conflicts of interest, which could adversely impact our business. The arithmetic aggregate absolute total of income from related parties represented 19.91%, 14.29%, 15.59%, 17.66% and 17.70% of our total income in the six months periods ended June 30, 2026 and 2025 and in Fiscals 2025, 2024 and 2023, respectively, while the arithmetic aggregate absolute total of expenses from related parties represented 32.71%, 32.38%, 24.83%, 25.20% and 28.66% of our total expenses in the six months periods ended June 30, 2026 and 2025 and in Fiscals 2025, 2024 and 2023, respectively.
8. **Risk related to Customer concentration:** We depend on a limited number of customers for our sales, and revenue from our top 10 OEM customers represented 31.72%, 37.83%, 36.60%, 34.38% and 32.82% of our total revenue from operations (continuing operations) in the six months periods ended June 30, 2026 and 2025 and in Fiscals 2025, 2024 and 2023, respectively. As we do not have long-term binding agreements with all our customers, any reduction in orders from, or loss of, any of our major customers could adversely affect our business, financial condition, results of operations and cash flows.

| Particulars | For the six months period ended June 30, 2026 | For the six months period ended June 30, 2025 | For the year ended December 31, 2025 | For the year ended December 31, 2024 | For the year ended December 31, 2023 |
|---|---|---|---|---|---|
| **Revenue from largest customer** as a % of revenue from customers-continuing operations | 9.40% | 11.60% | 11.43% | 9.92% | 7.48% |
| **Revenue from top-five customers** as a % of revenue from customers-continuing operations | 25.29% | 29.86% | 28.77% | 26.17% | 23.43% |
| **Revenue from top-10 customers** as a % of revenue from customers-continuing operations | 31.72% | 37.83% | 36.60% | 34.38% | 32.82% |

9. **Risk related to co-engineered products:** Failure to successfully commercialise co-engineered products could adversely affect our business, financial condition, results of operations, and cash flows.

| Particulars | For the six months period ended June 30, 2026 | | For the six months period ended June 30, 2025 | | For the year ended December 31, 2025 | | For the year ended December 31, 2024 | | For the year ended December 31, 2023 | |
|---|---|---|---|---|---|---|---|---|---|---|
| | *Amount (₹ million)* | *Percentage of total revenue from operations – continuing operations (%)* | *Amount (₹ million)* | *Percentage of total revenue from operations – continuing operations (%)* | *Amount (₹ million)* | *Percentage of total revenue from operations – continuing operations (%)* | *Amount (₹ million)* | *Percentage of total revenue from operations – continuing operations (%)* | *Amount (₹ million)* | *Percentage of total revenue from operations – continuing operations (%)* |
| Revenue from co-engineer products | 5,980.50 | 52.84% | 5,185.82 | 54.00% | 10,817.98 | 53.73% | 9,948.37 | 53.65% | 8,886.26 | 52.66% |

10. **Risk related to dependency on Dealer network:** We partly depend on our dealer network for the sale of our gearboxes and the provision of services, including after-sale services to customers under our Industry & Automation Solutions ("I&A") vertical. Any disruption in this network could adversely affect our business, financial condition, results of operations, and cash flows.
The table below sets forth channel-wise split of sales for the periods/years indicated:

| Sales Channel | Six months period ended June 30, 2026 | | Six months period ended June 30, 2025 | | Year ended December 31, 2025 | | Year ended December 31, 2024 | | Year ended December 31, 2023 | |
|---|---|---|---|---|---|---|---|---|---|---|
| | *Amount (₹ million)* | *Percentage of total revenue from operations (%)* | *Amount (₹ million)* | *Percentage of total revenue from operations (%)* | *Amount (₹ million)* | *Percentage of total revenue from operations (%)* | *Amount (₹ million)* | *Percentage of total revenue from operations (%)* | *Amount (₹ million)* | *Percentage of total revenue from operations (%)* |
| Dealer sales | 2,145.72 | 18.96% | 1,865.11 | 19.42% | 3,909.41 | 19.42% | 3,535.58 | 19.07% | 3,333.07 | 19.75% |
| Direct sales | 6,741.06 | 59.56% | 6,210.11 | 64.66% | 12,746.32 | 63.30% | 11,756.65 | 63.41% | 10,556.18 | 62.56% |
| Inter-company sales[1] | 2,263.99 | 20.00% | 1,294.75 | 13.48% | 3,064.77 | 15.22% | 2,775.09 | 14.97% | 2,722.21 | 16.13% |
| Others[2] | 167.92 | 1.48% | 233.59 | 2.44% | 414.76 | 2.06% | 474.51 | 2.56% | 261.84 | 1.55% |
| **Total** | **11,318.69** | **100.00%** | **9,603.55** | **100.00%** | **20,135.26** | **100.00%** | **18,541.83** | **100.00%** | **16,873.30** | **100.00%** |

*Notes: [1] Inter-company sales includes sale of finished goods such as yaw drives and swing drives to related parties for onward sale to their customers. [2] Others includes non-core sales such as the sale of components to vendors.*

...continued from previous page.

11. Our EBITDA (excluding Other Income) Margin and PAT Margin were the lowest among our listed industry peers in Fiscals 2024 and 2023, and lower than certain of our listed industry peers in Fiscal 2025. Our inability to improve our operating and profitability margins in the future may adversely affect our business, financial condition, results of operations and cash flows, and our ability to compete effectively with our listed peers.
12. The Price/Earnings ratio based on diluted EPS for 2025 for the issuer at the upper end of the Price band is as high as 46.32 as compared to the average industry peer group PE ratio of 51.61
13. Weighted Average Return on Net Worth for Fiscal 2023,2024 and 2025 is 22.45%
14. **Weighted average cost of acquisition of all shares transacted in the one year, 18 months and three years preceding the date of the Red Herring Prospectus:** The weighted average cost of acquisition of all Equity Shares transacted in one year, 18 months and three years preceding the date of the Red Herring Prospectus is as set forth below:

| Period | Weighted average cost of acquisition per Equity Share (in ₹)[#] | Cap Price is 'X' times the weighted average cost of acquisition | Range of acquisition price per Equity Share: lowest price - highest price (in ₹) |
|---|---|---|---|
| Last one year | Nil | NA | Nil to Nil |
| Last eighteen months | Nil | NA | Nil to Nil |
| Last three years | Nil | NA | Nil to Nil |

*As certified by J.C. Bhalla & Co., Chartered Accountants (FRN No. 001111N), by way of their certificate dated October 10, 2026.

[#]Computed based on the Equity Shares acquired/allotted/purchased - There were no acquisitions or purchases of Equity Shares during the period other than allotment pursuant to the bonus issue on January 25, 2026.

15. The 4 BRLMs associated with the Offer have handled 104 public issues in the past three years, out of which 29 issues closed below the issue price on listing date:

| Name of BRLMs | Total Issues | Issues closed below IPO Price as on listing date |
|---|---|---|
| Axis Capital Limited* | 30 | 7 |
| BNP Paribas* | 1 | 0 |
| ICICI Securities Limited* | 31 | 14 |
| Jefferies India Private Limited* | 4 | 1 |
| Common Issues of all BRLMs | 38 | 7 |
| **Total** | **104** | **29** |

*Issues handled where there were no common BRLMs

## THE EQUITY SHARES OF OUR COMPANY WILL GET LISTED ON MAIN BOARD PLATFORM OF BSE AND NSE

In case of any revision in the Price Band, the Bid/Offer Period shall be extended for at least three additional Working Days after such revision of the Price Band, subject to the total Bid/Offer Period not exceeding 10 Working Days. In cases of *force majeure,* banking strike or similar unforeseen circumstances, our Company, may in consultation with the BRLMs, for reasons to be recorded in writing, extend the Bid/Offer Period for a minimum of one Working Day, subject to the Bid/Offer Period not exceeding 10 Working Days. Any revision in the Price Band, and the revised Bid/Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges by issuing a public notice and also by indicating the change on the respective websites of the BRLMs and at the terminals of the Members of the Syndicate and by intimation to the Designated Intermediaries and the Sponsor Bank(s), as applicable.

The Offer is being made in terms of Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended (the "**SCRR**"), read with Regulation 31 of the SEBI ICDR Regulations. The Offer is being made through the Book Building Process in accordance with Regulation 6(1) of the SEBI ICDR Regulations wherein not more than 50% of the Net Offer shall be available for allocation on a proportionate basis to QIBs (the "**QIB Portion**"), provided that our Company, in consultation with the BRLMs, may allocate up to 60% of the QIB Portion to Anchor Investors and the basis of such allocation will be on a discretionary basis by our Company, in consultation with the BRLMs, in accordance with the SEBI ICDR Regulations (the "**Anchor Investor Portion**"), of which, 40% shall be reserved in the following manner, (I) 33.33% shall be available for allocation to domestic Mutual Funds, and (ii) 6.67% shall be available for Life Insurance Companies and Pension Funds, subject to valid Bids being received from domestic Mutual Funds, Life Insurance Companies and Pension Funds at or above the price at which allocation is made to Anchor Investors ("**Anchor Investor Allocation Price**"). In the event of under-subscription in (ii) above, the allocation may be made to domestic Mutual Funds. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the QIB Portion (other than the Anchor Investor Portion) ("**Net QIB Portion**"). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis only to Mutual Funds, subject to valid Bids being received at or above the Offer Price, and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIBs (other than Anchor Investors), including Mutual Funds, subject to valid Bids being received at or above the Offer Price. Further, not less than 15% of the Net Offer shall be available for allocation to Non-Institutional Investors ("**Non-Institutional Portion**") of which one-third of the Non-Institutional Portion shall be available for allocation to Bidders with an application size of more than ₹ 200,000 and up to ₹ 1,000,000 and two-thirds of the Non-Institutional Portion shall be available for allocation to Bidders with an application size of more than ₹ 1,000,000 and under-subscription in either of these two sub-categories of Non-Institutional Portion may be allocated to Bidders in the other sub-category of Non-Institutional Portion in accordance with the SEBI ICDR Regulations, subject to valid Bids being received at or above the Offer Price. Further, not less than 35% of the Net Offer shall be available for allocation to Retail Individual Investors ("**Retail Portion**"), in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. Further, Equity Shares will be allocated on a proportionate basis to Eligible Employees applying under the Employee Reservation Portion, subject to valid Bids received from them at or above the Offer Price. All Bidders (except Anchor Investors) shall mandatorily participate in this Offer only through the Application Supported by Blocked Amount ("**ASBA**") process and shall provide details of their respective bank account (including UPI ID (defined hereinafter) in case of UPI Bidders (defined hereinafter)) in which the Bid Amount will be blocked by the Self Certified Syndicate Banks ("**SCSBs**") or the Sponsor Bank(s), as the case may be. Anchor Investors are not permitted to participate in the Offer through the ASBA process. For details, see ***"Offer Procedure"*** on page 441 of the RHP.

**Bidders/ Applicants should ensure that DP ID, PAN, Client ID and UPI ID (for UPI Bidders bidding through the UPI Mechanism) are correctly filled in the Bid cum Application Form. The DP ID, PAN and Client ID provided in the Bid cum Application Form should match with the DP ID, PAN, Client ID available in the Depository database, otherwise, the Bid cum Application Form is liable to be rejected. Bidders/ Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPI ID (for UPI Bidders bidding through the UPI Mechanism) as provided in the Bid cum Application Form, the Bidder/Applicant may be deemed to have authorised the Depositories to provide to the Registrar to the Offer, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These Demographic Details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders'/Applicants' sole risk. Investors must ensure that their PAN is linked with Aadhaar and are in compliance with CBDT notification dated February 13, 2020 and press release dated June 25, 2021, read with press release dated September 17, 2021 and CBDT circular no.7 of 2022, dated March 30, 2022 read with press release dated March 28, 2023 and any subsequent press releases in this regard.**

**Contents of the Memorandum of Association of our Company as regards its objects:** For information on the main objects of our Company, please see the section "***History and Certain Corporate Matters***" on page 249 of the RHP. For **BONFIGLIOLI TRANSMISSIONS LIMITED**
On behalf of the Board of Directors
Sd/-
**Sunil Kumar**
Company Secretary and Compliance Officer

**BONFIGLIOLI TRANSMISSIONS LIMITED** is proposing, subject to applicable statutory and regulatory requirements, receipt of requisite approvals, market conditions and other considerations, to make an initial public offering of its Equity Shares and has filed the RHP with SEBI, RoC, Tamil Nadu at Chennai and the Stock Exchanges on October 9, 2026. The RHP shall be available on the website of SEBI at www.sebi.gov.in, and is available on the websites of the Stock Exchanges i.e. BSE and NSE at www.bseindia.com and www.nseindia.com, respectively, on the website of our Company at www.bonfiglioli.in and the websites of the BRLMs, i.e., Axis Capital Limited, BNP Paribas, ICICI Securities Limited and Jefferies India Private Limited at www.axiscapital.co.in, www.bnpparibas.co.in, www.icicisecurities.com and www.jefferies.com, respectively. Any potential investors should note that investment in equity shares involves a high degree of risk and for details relating to such risk, see ***"Risk Factors"*** beginning on page 20 of the RHP. Potential investors should not rely on the DRHP filed with SEBI and the Stock Exchanges, and should instead rely on their own examination of our Company and the Offer, including the risks involved, for making any investment decision.

This announcement does not constitute an invitation or offer of securities for sale in any jurisdiction. The Equity Shares have not been and will not be registered under the U.S. Securities Act or any state securities laws of the United States and, unless so registered, may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (a) in the United States only to persons reasonably believed to be "qualified institutional buyers" (as defined in and in reliance on Rule 144A) and referred to in the Red Herring Prospectus as "U.S. QIBs"; for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in the Red Herring Prospectus as "QIBs" in transactions exempt from or not subject to the registration requirements of the U.S. Securities Act and in reliance on Rule 144A and (b) in "offshore transactions" as defined in, and in reliance on, Regulation S and in compliance with the applicable laws of the jurisdiction where those offers and sales occur. There will be no public offering of the Equity Shares in the United States.

**AUCTION MECHANISM**

**SEBI market committee to review CAS feedback**

**Mumbai:** The Securities and Exchange Board of India has convened a meeting of its Secondary Market Advisory Committee (SMAC) on Thursday to discuss feedback on its proposed Closing Auction Session (CAS) framework, as the regulator considers changes to the recently introduced mechanism. The meeting will focus on responses to SEBI's consultation paper, which received around 20,000 comments by the October 3 deadline. **p6**

**PRICEY FOOD, EDUCATION**

**Tamil Nadu sees highest consumer inflation in Sept**

**Chennai:** Tamil Nadu recorded the highest Consumer Price Inflation (CPI) among all the States in September at 6.8 per cent as against the 5.54 per cent print for the country. A *businessline* analysis shows that the price rise in the State largely comes from pricey food, education and personal care products in urban areas. **p2**

# Cabinet clears ₹52,000 crore sale of IDBI Bank to Fairfax

**MEGA FDI DEAL.** Govt to get ₹26,500 cr for offloading 30.48%, LIC ₹26,300 cr for 30%

**Shishir Sinha**
New Delhi

The Union Cabinet on Wednesday approved the sale of a 60.72 per cent stake in IDBI Bank to Canada-based Fairfax Financial Holdings Ltd. This is the biggest foreign direct investment in India's financial sector till date, involving an amount of over ₹52,000 crore.

"The Cabinet Committee on Economic Affairs, in its meeting held on October 14, approved Canada Inc (parent entity Fairfax Financial Holdings Ltd) as the strategic buyer for this transaction for a purchase consideration of ₹52,878 crore for the acquisition of 60.72 per cent stake in IDBI Bank Ltd," a Finance Ministry statement said. Under the process, the winning bid was ₹81 per share. The government is offloading 30.48 per cent of its stake and is expected to get over ₹26,500 crore, while LIC is to sell 30.24 per cent and likely to get over ₹26,300 crore. The deal is expected to be completed by the end of the fiscal year. After the completion of the deal, the government will have residual shareholding of 15 per cent and LIC 19 per cent. Neither the government nor LIC will have a seat on the board of IDBI Bank. Also, they will not have any contingent liability.

Finance and Corporate Affairs Minister Nirmala Sitharaman ANI

The LIC will have to dilute 4 per cent stake in IDBI bank within two years to retain ownership of LIC Housing Finance.

**'NO WORRY FOR STAFF'**

Assuring employees that the strategic sale had no material impact on their well-being, Finance Minister Nirmala Sitharaman said, "During the last one- and-a-half years, DIPAM (Department of Investment and Public Asset Management) Secretary talked to every union. Employees have nothing to worry." DIPAM Secretary Arunish Chawla said service conditions of employees are determined by the board, and they will remain the same. Pension is paid out of a dedicated fund and the same mechanism will continue.

**CSB STAKE ISSUE**

The RBI regulations prescribe that a company cannot hold ownership of two banks. As on date, FIH Mauritius Investments Ltd, a wholly owned subsidiary of Fairfax India Holdings Corporation, holds 40 per cent in CSB Bank (formerly Catholic Syrian Bank). Fairfax has been given two years either to merge CSB with IDBI Bank or offload its holding in CSB. Also, Fairfax will have a five-year lock-in for its holding in IDBI Bank. However, going by the RBI regulation, Fairfax has to bring down its holding in IDBI bank to 24 per cent.

According to a Finance Ministry statement, the successful bidder will be required to present its credentials to the RBI in accordance with the 'fit and proper' assessment conducted at the EoI stage, and submit its roadmap for the compliance of regulatory conditions prescribed therein.

"Having supported the bank's recovery, we are now enabling its next phase of growth through the infusion of FDI while retaining a minority stake. This will not only strengthen the banking ecosystem but also help banking services surpass global benchmarks," Sitharaman said.

# MCR mop up to now top ₹90,000 cr, will provide relief to govt finances

**Shishir Sinha**
New Delhi

With the proceeds from the stake sale in IDBI Bank, the amount under 'Miscellaneous Capital Receipts' (MCR) is set to exceed the Budget Estimate for 2026-27. Also, the proceeds from disinvestments will be the highest this year since 2018-19; if the minority stake sale in CPSEs continues, it could exceed ₹1 lakh crore, for the second time between 2014-15 and now.

This mop up will provide relief to government finances as collections from excise are set to dip while expenditure on subsidies and welfare schemes is set to go up. "This completion was hanging for five years. The Cabinet decision has to be honoured. This decision is not solely aimed at boosting government finances but certainly, it will help the exchequer," a top government official told *businessline*.

The term 'disinvestment' is now out from the Budget document, replaced by MCR, and widened too. It includes proceeds from share sale (minority stake sale, strategic disinvestment or buy back) of central public sector enterprises (CPSEs) and mop up through asset monetisation. For fiscal year 2026-27, the government estimated collecting ₹80,000 crore under MCR. With expected earnings of ₹26,500 crore, the proceeds under MCR will exceed ₹90,000 crore, the highest after the ₹84,927 crore in 2018-19.

**Garnering funds** *(Fiscal year 2026-27 / Amount in ₹ cr)*

| Name of CPSEs | % of GoI's shares disinvested | Receipts (in ₹ cr) | GoI's shareholding post disinvestment |

**EXCISE RECEIPTS HIT**

Revenue collections through direct taxes, Customs duty and GST have been good so far, but there is an issue about central excise. On May 25, Finance Minister Nirmala Sitharaman said the government is estimated to take a revenue hit of over ₹1 lakh crore in fiscal 2026-27 after the central excise duty cut on petrol and diesel by ₹10 per litre. During the first five months of the current fiscal, expenditure has already gone up by 10 per cent. At the same time, 46 per cent of the Budget Estimates on major subsidies (food, fertilizer and fuel) have been exhausted in just first five months of the current fiscal. Now, the expectation is that the outgo on fertilizer subsidy will go up.

### Noel, Neville Tata file caveats in courts

**Mumbai:** Tata Trusts Chairman Noel Tata and his son Neville have filed caveats in city courts in the row surrounding Venu Srinivasan and Vijay Singh, sources said on Wednesday. The caveats filed in the Bombay High Court and also in the Mumbai city civil court will ensure that they are heard before the passing of any orders. The duo moved the courts with their caveats on October 7, per records. PTI

### Hotel Leela's Q2 net profit grows 27% to ₹94.6 crore

**Mumbai:** Hotel Leela Palaces, Hotels and Resorts reported a 27 per cent year-on-year growth in net profit to ₹94.6 crore in the second quarter FY27 on the back of strong demand for luxury travel and contribution from meetings and events segments. Revenue from operations rose 33 per cent y-o-y to ₹411.9 crore, led by a 30 per cent growth in average daily rates. OUR BUREAU

# Hyundai eyes No 2 spot in India's PV market again

**GROWTH ENGINES.** Bets on Pune plant's expansion, additional capacity, new launches

**Amit Vijay Mohile**
Mumbai

Hyundai Motor Group plans to invest $15.5 billion in India through 2032, with a significant share earmarked for manufacturing expansion and upgrades. This, as the South Korean automaker seeks to reclaim its position as India's second-largest passenger vehicle maker through increased capacity, new product launches and deeper localisation.

**NEWLY OPENED.** Maharashtra Chief Minister Devendra Fadnavis with Hyundai's Executive Chairman Euisun Chung and other officials during the inauguration of the company's manufacturing plant in Talegaon, Pune, on Wednesday ANI

**BIG PLANS**

The strategy was outlined at a media briefing in Pune on Wednesday, following the inauguration of Hyundai's Talegaon manufacturing facility. Of the total investment, around 20 per cent each ($3.1 billion) will be allocated to new technologies, including AI and start-ups, and to R&D. The announcement follows the company's Executive Chair Euisun Chung's meeting with Prime Minister Narendra Modi on Tuesday.

Hyundai has already invested ₹7,000 crore in Maharashtra and plans to invest another ₹4,000 crore by 2030, taking its total commitment to the Pune facility to ₹11,000 crore.

"Beyond expanding manufacturing capacity, the facility will drive industrial development, innovation and employment generation in the region," said Tarun Garg, MD and CEO. The investment is being supported by 55 supplier partners, who have collectively invested nearly ₹4,600 crore in Maharashtra. Including tier-II vendors, the ecosystem has created more than 18,000 jobs, with nearly half the supplier base located within a 50-km radius of the plant.

Hyundai plans to nearly double the Pune plant's annual capacity to 320,000 vehicles by 2030. Combined with its Chennai operations, Hyundai Motor India's total manufacturing capacity will approach 1.14 million vehicles annually.

The expansion is central to Hyundai's efforts to regain market share amid intense competition from Mahindra & Mahindra and Tata Motors.

"As you know, we are going to launch 26 new models to marry this capacity so that we can get back the market share as well," said Garg.

**LOCALISATION LEVELS**

Hyundai aims to increase localisation levels from 83 per cent to 92 per cent, strengthening its domestic supply chain. "And Maharashtra is going to play a very important role," a senior executive said.

The automaker also plans to raise exports to 30 per cent of production, up from 24 per cent currently, while continuing its EV push with four EV launches by 2029 and the introduction of hybrid models.

# At 6.8% in September, TN tops States in consumer inflation

**Sourashis Banerjee**
**Sindhu Hariharan**
Chennai

Tamil Nadu has recorded the highest Consumer Price Inflation (CPI) among all States in September at 6.8 per cent as against 5.54 per cent inflation in India. The price rise in the State largely comes from urban prices with food, education and personal care recording high growth, a *businessline* analysis shows.

**DATA FOCUS.**

Official data show that the gap between the State's and the national inflation has also widened steadily through the year from 0.6 in January to 1.2 percentage points in September.

**WHAT COST THE MOST**

An analysis of State-wise inflation shows that seven of the top 10 States reported CPI above the national average in September. Gujarat, Maharashtra and West Bengal reported below-average inflation.

Tamil Nadu's urban inflation rate of 6.5 per cent is highest among all States, but its rural rate of 7.17 per cent is only fourth behind Madhya Pradesh (7.31 per cent), Odisha (7.24 per cent) and Telangana (7.21 per cent). Product-level analysis shows that growth in inflation in food, education and personal care and other associated services could have influenced the State's inflation.

Food and beverages (10 per cent in Tamil Nadu vs 7.3 per cent for India) was the largest contributor, making Tamil Nadu the highest among the top five States. Similarly, education services inflation in the State at 7.8 per cent is almost double the national rate. As for personal care, the States's inflation was again the highest.

Rice, which is more commonly consumed in Tamil Nadu compared to wheat, saw almost eight times as much inflationary pressure compared to wheat in September. Similarly, in beverages, coffee saw 1.5 times as much inflation in Tamil Nadu compared to overall India. In education, cost of 'early childhood and primary education' saw an 8.51 per cent inflation in Tamil Nadu as against India's 4.81 per cent.

Vivek Iyer, Partner and Financial Services Risk Advisory Leader, Grant Thornton Bharat, said Tamil Nadu's dependence on food products from other States could have put it at the receiving end of higher transport costs and supply shocks. "We have also seen that in an election year, when a new government comes in, inflation usually shoots up on account of populist policies," he added. However, he flagged that inflation numbers at a State level and a national level are more a function of statistical aggregation of State-wise weighted data and the larger trend of high national inflation stands.

Soaring prices

# Indian buyers eager to spend on mobility: JLR India MD

**Sindhu Hariharan**
Chennai

JLR India expects higher sales this year as the automotive sector, especially the premium segment, has bounced back well after a sluggish last year.

**INDIA ENTRY**

"It's not just the GST cut, as that is well behind us. India's buyers are now eager to spend money on their mobility amid rising aspirations. We sold around 6,183 units last year in India and are expecting to close this at a higher number this year," Rajan Amba, Managing Director, JLR India, told *businessline*. Adding to rising consumer demand, the company's electric range of vehicles such as the Range Rover Electric and Range Rover Sport Electric are also set to make their India entry around April next year, said Amba, anticipating a higher growth rate then. "JLR India is currently growing on par and slightly higher than the industry," he added.

> The units made here (at the Panapakkam plant near Chennai) are for the India market now, and we have not yet taken a call on exports as yet from here
>
> **RAJAN AMBA**
> MD, JLR India

On India manufacturing, Amba said JLR has already started making vehicles at its Panapakkam plant near Chennai. "The units made here are for the India market now, and we have not yet taken a call on exports as yet from here."

**LUXURY SALES**

Amba was in Chennai for JLR India's inauguration of a new retail presence.

This comprises a modern luxury sales showroom and a dedicated service and spare parts facility created in partnership with KUN Auto Works. The new facilities will cater to Range Rover, Defender and Discovery clients across Chennai and neighbouring regions.

JLR India's distribution network now comprises 30 outlets across 25 cities in the country.

Interestingly, JLR India is also working on setting up a retail showroom at Madurai, which will open shortly.

Arunkumar Uppuswamy, Managing Director of the auto-dealership brand KUN Auto Works, said the new showroom and dedicated aftersales facility reflect KUN and JLR's shared commitment to deliver exceptional customer experiences and world-class ownership support.

# Centre proposes battery durability norms, vehicle passport under BS VII

**Our Bureau**
New Delhi

The Centre has proposed minimum battery durability requirements for electric passenger vehicles and plug-in hybrids, along with an Environmental Vehicle Passport, as part of its draft Bharat Stage VII (BS VII) norms.

According to a draft notification issued by the Ministry of Road Transport and Highways, the proposed norms will apply to M1-category vehicles, which include passenger cars and SUVs, in three phases beginning April 2029.

Besides exhaust emissions, the proposed norms will cover particles released from brakes, tyre wear and systems to monitor vehicle emissions and fuel consumption.

**THE DETAILS**

Under the proposed battery durability requirements, pure EVs and plug-in hybrids will have to retain at least 75 per cent of their original battery energy capacity during the first five years or 1 lakh km, whichever comes first. For the subsequent period, extending up to eight years or 1.6 lakh km, whichever comes first, the minimum requirement will be 67 per cent. These requirements are proposed for vehicles manufactured on or after April 1, 2029.

Furthermore, the draft proposes an 'Environmental Vehicle Passport', which will be made available to users along with documents certifying the vehicle's compliance with the prescribed standards.

Accordingly, users will have access to updated information on fuel consumption, battery health, pollutant emissions and other relevant information generated by the vehicle's monitoring systems. Provision will also be made to display the passport inside the vehicle.

The draft notification which was published in the Gazette on October 14, seeks objections and suggestions within 30 days.

**THREE PHASES**

As per the proposed implementation schedule, the first phase will begin on April 1, 2029, followed by the second phase on April 1, 2031, and the third on April 1, 2035. The proposed norms include emission testing under laboratory and real-world driving conditions, along with systems installed in vehicles to identify faults and monitor emissions.

Meanwhile, limits on particles released from vehicle brakes are proposed from April 1, 2031.

For pure EVs, the proposed limit will be 3 mg per km per vehicle, while ICE vehicles, hybrids and fuel-cell vehicles will have a limit of 7 mg per km. Subsequently, from April 1, 2035, a common limit of 3 mg per km per vehicle will apply across these vehicle types.

In addition, requirements relating to tyre wear are also proposed from April 2031. However, the applicable limits and certain testing requirements will be notified separately. The draft also includes measures to prevent tampering with emission control equipment, traction batteries, and odometers.

# Despite wage hike impact, Tech Mahindra's margins may hold up

**Vallari Sanzgiri**
Mumbai

Tech Mahindra is expected to report flattish to modest margin expansion in the September quarter, offsetting the impact of wage hikes through ongoing cost-efficiency initiatives such as Project Fortius.

Analysts at Nuvama Research and JM Financial expect margin expansion of 10-20 basis points, even as business investments and wage hikes are estimated to exert a 70-80 bps drag on margins.

**MARGIN GUIDANCE**

"Tech Mahindra is likely to report over 1.6 per cent CC (constant-currency) q-o-q growth and over 1.5 per cent q-o-q growth in USD terms, led by telecom. This is despite an approximately 1.3 per cent headwind, which should be mitigated by the Orange deal. We expect the management to maintain its 15 per cent FY27 margin guidance," said Nuvama in a research note.

On the revenue front, analysts expect 1.2-1.7 per cent sequential growth in constant-currency terms, driven largely by the retail and healthcare verticals, along with contributions from the Orange deal.

The company is also benefiting from the ramp-up of strong deal wins from previous quarters, partly offset by a decline in Pininfarina revenues.

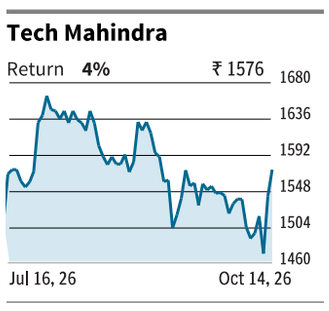
"The Avant Techno Solutions acquisition will contribute two months of revenue. Deal momentum should remain healthy. BFSI, manufacturing, communications and healthcare are expected to remain the key growth areas," said Motilal Oswal Financial Services.

Meanwhile, Kotak Institutional Equities said the rupee's depreciation of 0.8 per cent sequentially and 8.4 per cent annually may not immediately boost net profit for many IT companies due to cash-flow hedging practices.

"Tech Mahindra is likely to report meaningful forex losses. We expect a forex loss of $25 million for the quarter," it said. Deal wins are expected to remain in the $800 million to $1 billion range during the quarter.

"The turnaround is taking hold, with growth returning to around 6 per cent annually, backed by strong bookings and revenue visibility. Project Helix is helping the company transition from Fortius-led efficiency gains to AI-led growth, supported by strong execution under CEO Mohit Joshi," said Anand Rathi.

**Tech Mahindra**



# Hero Motors to raise stake in UK's Hewland to 90%

**Amit Vijay Mohile**
Mumbai

Hero Motors Ltd will increase its stake in Britain's Hewland Engineering to 90 per cent from 51 per cent for approximately £600,000 (nearly ₹7.5 crore), strengthening its economic interest in the high-performance transmission and drivetrain business.

The acquisition will give the newly listed auto-component maker a larger share of Hewland's future profits and losses, although the British subsidiary reported declining revenue and a net loss in FY26. The company will acquire 8,039 equity shares, representing a 39 per cent stake, from existing shareholders. The transaction is expected to be completed in about six months.

Hero Motors already controls and consolidates Hewland's financial performance. The acquisition will therefore increase its economic ownership without adding a new business or additional revenue to its consolidated accounts.

Hero Motors' six subsidiaries together generated ₹58.24 crore in revenue against a combined net loss of ₹11.78 crore in the June quarter, before consolidation adjustments. Hewland's individual quarterly contribution was not disclosed.

# Toyota Kirloskar Motor expects better sales to continue till Q1 next year

**S Ronendra Singh**
New Delhi

The festival season in the current quarter and the next will continue to draw sales, as demand from both urban and rural markets continue to draw footfalls at the showrooms, said a senior executive at Toyota Kirloskar Motor on Wednesday.

"We feel the first quarter of the next year also should be positive," said Sabari Manohar, Executive Vice-President, Sales-Service-Used Car Business, Toyota Kirloskar Motor.

It's however difficult to say whether the growth would be in single or double-digits, he said.

**PRODUCTION CAPACITY**

Manohar added that the company will ramp up its production capacity at Karnataka's Bidadi from early next year to reduce the waiting period for certain models and also for newer products. It has two plants in Bidadi, with an annual production capacity of 3.42 lakh units.

The additional capacity, which was expected to come up this year, will be at an upcoming third plant in Bidadi.

Toyota is also setting up a new plant in Bidkin Industrial Area, Maharashtra, that will also have a capacity of 1 lakh units per annum. It is expected to come up by the first half of 2029.

**NEW LAUNCH.** Toyota Kirloskar Motor's Deputy MD Tadashi Asazuma at the launch of Glanza's facelift version, starting at ₹7 lakh, in New Delhi on Wednesday

# Haier Appliances India eyes 40% festival growth

**Meenakshi Verma Ambwani**
New Delhi

Haier Appliances India is eyeing 35-40 per cent growth this festival season while strengthening its premiumisation play.

The company on Wednesday launched new premium products, including the M3 Series washing machine and the In-Vista five-door built-in refrigerator.

**RENEWED FOCUS**

"The premium segment currently contributes 30-35 per cent to our business and is witnessing a strong growth trajectory. As a challenger brand in the country, our endeavour is to reimagine what premium products can deliver," said NS Satish, CEO, Haier Appliances India.

"We are seeing consumers are willing to upgrade and pay for the right value propositions. So we want to focus on developing products that enable us to create new sub segments within the premium category."

The consumer durable major also launched the M96 and M70 mini LED Series TVs and its extended line-up models. Other launches included its Velox water heaters range, along with a strategic entry into the kitchen space with the Halo chimney range. The category remains under-penetrated and offers huge growth potential, Satish noted.

**VALUE GROWTH**

On early festival demand trends, Satish said the company was seeing strong demand across regions, led by the premium segment. "We are expecting to garner 35-40 per cent value growth year-on-year and over 30 per cent volume growth this festival season," Satish said.

**FM in Thailand to attend IMF, World Bank meets**

**New Delhi:** Finance Minister Nirmala Sitharaman is on a four-day official visit to Thailand from Wednesday to attend the annual meetings of the International Monetary Fund (IMF) and the World Bank Group, along with meetings of G20 and G7 Finance Ministers and Central Bank Governors. During the visit, Sitharaman will participate in multilateral meetings and discussions on key global economic and financial issues, including the global economic outlook, development priorities, and financial sector matters, the Finance Ministry said in a statement. She is scheduled to hold bilateral meetings with Thailand's Deputy Prime Minister and Finance Minister Ekniti Nitithanprapas, and the Finance Ministers of Switzerland, Japan, Luxembourg and Bhutan. PTI

# From 31% bad loans to sale-ready, how IDBI Bank turned around

**BACK IN THE PINK.** The bank, which exited the RBI's PCA framework, posted a record net profit of ₹9,513 cr in FY26

**Our Bureau**
New Delhi

**ROAD TO RECOVERY.** Years of balance sheet clean-up, coupled with a capital infusion of about ₹25,000 crore by the Centre, helped make the bank saleable

The Centre's decision to sell a controlling stake in IDBI Bank follows a turnaround that took the lender from the RBI's Prompt Corrective Action (PCA) framework, with gross non-performing assets (NPAs) at 31.78 per cent, to a position where its balance sheet was clean enough for a strategic sale.

While official committees had recommended such a move for nearly 25 years, the government continued to infuse capital into the bank from 2010 onwards. In 2018, its gross NPAs had climbed to nearly a third of its advances, while its capital adequacy ratio had fallen to 6.22 per cent.

**BAD LOANS**
The crisis followed a series of bad loans during the 2006-08 lending boom, when loans were extended to well-connected promoters with a history of defaults. A government factsheet cites ₹860.92 crore sanctioned to Kingfisher Airlines in 2009, of which ₹807.82 crore remains unrecovered; exposure of about ₹3,639 crore to ABG Shipyard, which turned NPA in November 2013; defaults of about ₹114.79 crore by Winsome Diamonds; and claims of about ₹9,903 crore in Videocon's insolvency proceedings.

In 2006, the distressed United Western Bank was merged with IDBI Bank under an RBI-led resolution.

Years of balance sheet clean-up, coupled with a capital infusion of about ₹25,000 crore by the Centre between 2010 and 2020, helped make the bank viable for a strategic sale.

**HEALTH IMPROVES**
IDBI Bank's gross NPAs fell from 31.78 per cent in September 2018 to 2.32 per cent in March 2026. Net NPAs declined from 17.30 per cent to 0.15 per cent, while its capital adequacy ratio rose from 6.22 per cent to 26.65 per cent.

After years under the RBI's PCA framework, the bank posted a record net profit of ₹9,513 crore in FY26. Its total business crossed ₹6.27 lakhcrore as of September 30, 2026, registering an 18 per cent y-o-y growth.

**WHAT FOR CUSTOMERS**
Officials said customers will see little change following the sale. The RBI will continue full regulatory and prudential supervision, while deposits will remain insured up to ₹5 lakh under the Deposit Insurance and Credit Guarantee Corporation. The 40 per cent priority sector lending target will continue to apply, as it does to all private sector banks.

IDBI Bank will continue to implement government schemes such as Jan Dhan, PMJJBY, PMSBY and the Atal Pension Yojana. It will also support small businesses through Mudra loans and GeM Sahay, which provides collateral-free digital working capital based on records on the Government e-Marketplace.

The government expects the sale to bring in foreign banking expertise, including from G7 countries, along with investment, competition and employment opportunities. Other public banks will remain under government ownership. The Centre said these banks posted a record aggregate net profit of ₹1.98 lakh crore in FY26, with gross NPAs at 1.93 per cent.

The case for a strategic sale is not new. Government officials said the decision followed recommendations by various committees. The Narasimham Committee recommended in 1998 that the government's stake in nationalised banks be reduced to 33 per cent. In 2008, the Raghuram Rajan Committee, set up by the Planning Commission, said most of its members favoured selling smaller, underperforming public sector banks to strategic investors.

A government-RBI committee on financial sector assessment suggested in 2009 that government ownership be reduced to below 51 per cent.

# After winning IDBI Bank bid, Fairfax faces CSB Bank conundrum

**K Ram Kumar**
Mumbai

**A possible merger, outright stake sale or RBI-approved** dilution are among the options for the Canadian group to resolve the dual-control issue

While Fairfax Financial Holdings Ltd (FFHL)-backed 10955230 Canada Inc has emerged as the successful bidder for a controlling stake in IDBI Bank, the group faces a regulatory challenge over its existing 40 per cent stake in CSB Bank, held through its step-down subsidiary, FIH Mauritius Investments Ltd.

As regulations restrict a single entity or group from holding controlling stakes in two banks, Fairfax may have to consider merging CSB Bank with IDBI Bank, selling its stake in CSB Bank or seeking time from the Reserve Bank of India (RBI) to pare its holding while relinquishing control.

**MERGER COULD OFFER SYNERGIES**
A merger of CSB Bank and IDBI Bank could be a synergistic option. While IDBI Bank has a pan-India presence across retail, MSME and corporate banking, CSB Bank has strengths in gold loans and Kerala's NRI banking market.

As of March-end 2026, IDBI Bank's deposits and advances stood at ₹3,47,163 crore and ₹2,53,626 crore, respectively. CSB Bank's deposits and advances were ₹44,246 crore and ₹39,848 crore, respectively.

The two banks had 2,174 and 862 branches, respectively.

IDBI Bank has experience in amalgamations. In 2006, the RBI and the government amalgamated Satara-based United Western Bank with Industrial Development Bank of India, which had become a banking company in 2004.

While changes at the board level are likely following the acquisition, Fairfax is unlikely to disrupt IDBI Bank's current operational momentum by bringing in an entirely new management team, an industry expert said.

**STAKE SALE OPTION**
An outright sale of Fairfax's 40 per cent stake in CSB Bank could attract interest from Axis Bank, Kotak Mahindra Bank and YES Bank, the expert said.

Alternatively, Fairfax could relinquish control of CSB Bank by withdrawing its nominees from the board and seek time from the RBI to reduce its shareholding. The regulator may also view this route favourably, the expert added.

According to a Finance Ministry statement, the successful bidder will have to present its credentials to the RBI in line with the fit-and-proper assessment conducted at the Expression of Interest (EoI) stage and submit a roadmap for complying with the prescribed regulatory conditions.

IDBI Bank shares rose nine per cent to close at ₹90.44 on the BSE on Tuesday, while CSB Bank gained 4 per cent to ₹320.95, as investors cheered the outcome of the IDBI Bank stake-sale process.

Once completed, the transaction will mark the largest foreign direct investment (FDI) in India's financial sector to date.

# IDBI exit brings ₹26,337 cr to LIC, but limited gains for shareholders

**Ashokamithran T**
Mumbai

The government-approved sale of a majority stake in IDBI Bank to Canada's Fairfax Group is set to unlock over ₹26,337 crore for the Life Insurance Corporation of India (LIC).

However, analysts say the transaction is unlikely to deliver meaningful gains for LIC shareholders as the investment was largely funded with policyholders' money and is already reflected in the insurer's valuation.

Under the transaction approved by the Cabinet Committee on Economic Affairs (CCEA), the Union government and the LIC will together divest 60.72 per cent of IDBI Bank for over ₹52,878 crore at ₹81 a share.

The LIC will sell 30.24 per cent, while the government will divest 30.48 per cent. The LIC will receive about ₹26,337 crore from the sale.

Following the transaction, it will retain around 19 per cent of IDBI Bank, equivalent to roughly 204.3 crore shares and valued at nearly ₹18,566 crore at the transaction price.

While the sale marks a significant monetisation event for the LIC, market experts say the benefit to its public shareholders will be limited.

"Shareholders benefit only to a limited extent (mainly the ~10 per cent share of surplus), because the IDBI stake was funded from policyholders' money and sits largely in the participating (Par) fund framework," said Siddharth Rajpurohit, Lead Analyst, Banking and Non-Lending Financials, at Systematix Group.

The LIC's investment in IDBI Bank was largely funded with policyholders' money rather than shareholder capital. Consequently, the gains from the stake sale will primarily accrue to the policyholders' fund, with only a small portion potentially flowing to shareholders through LIC's surplus-sharing mechanism.

**VALUATION IMPACT**
Analysts do not expect the transaction to have a material impact on LIC's market valuation.

The insurer's shares closed flat at ₹394 on Tuesday.

"The position is already reflected in Embedded Value (EV)," Rajpurohit said.

Echoing this view, Piran Engineer, Investment Analyst at CLSA, said the transaction should not materially affect the LIC's stock, as shareholder funds were not deployed for the IDBI investment.

While the sale will generate substantial cash proceeds and leave LIC with a sizeable residual stake in IDBI Bank, analysts say it does little to change the investment case for the LIC's shareholders.

The value of the holding is already reflected in the insurer's embedded value, while the proceeds largely belong to the policyholder pool rather than equity investors.

For the LIC's shareholders, therefore, the IDBI Bank sale is more a balance-sheet event than a trigger for value creation.

# Wholesale inflation jumped to 11.4% in Sept

**Shishir Sinha**
New Delhi

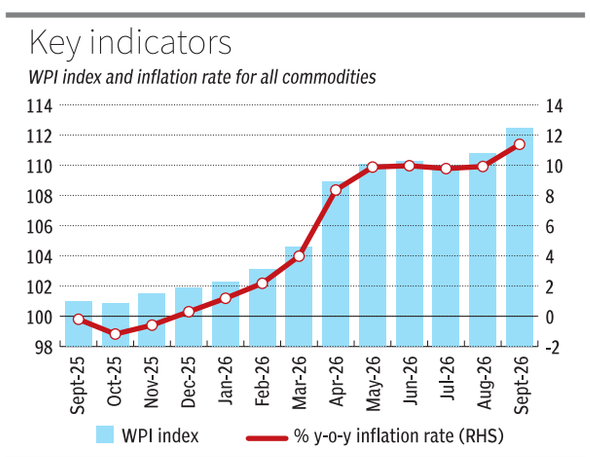
Wholesale inflation, based on the Wholesale Price Index (WPI), surged to 11.4 per cent in September from 9.9 per cent in August, driven by higher food, fuel and commodity prices, according to government data released on Wednesday.

The latest reading is the highest in the current WPI series, which uses 2022-23 as the base year. Inflation in Primary Articles, Fuel and Power, and Manufactured Products rose to 8.67 per cent, 25.85 per cent and 9.76 per cent, respectively, in September 2026, from 7.76 per cent, 22.93 per cent and 8.37 per cent in August, the Commerce Ministry said.

**COMMODITY PRICES**
Mineral oils, food articles, crude petroleum and natural gas, coal and lignite, basic metals, chemicals, textiles, rubber and plastic products, and electrical equipment were the key drivers of WPI inflation in September, the Ministry said. Rajni Sinha, Chief Economist at CareEdge Ratings, said fuel and power inflation remained elevated as crude petroleum, natural gas and mineral oil prices rose amid uncertainty over key maritime chokepoints. While retail fuel prices remained unchanged, oil marketing companies had raised bulk diesel prices to nearly ₹50-60 a litre above retail rates.

"Persistently elevated crude oil prices could raise freight, agricultural and irrigation, and transportation costs. Beyond energy, prices of select base metals, particularly copper and aluminium, have also remained firm, with copper touching an all-time high," she said.

Supply disruptions and strong demand from electrification, renewable energy expansion and data centres have supported metal prices. Elevated commodity prices could sustain wholesale inflation and indirectly feed into the consumer price index (CPI) basket, she added.



**CORE INFLATION**
Rahul Agrawal, Principal Economist at ICRA, said core WPI inflation, excluding food and fuel, rose to a record 9.8 per cent in September from 8.1 per cent in August, with 13 of the 21 sub-sectors reporting higher inflation. Sequentially, core WPI rose 1.5 per cent in September, reflecting the surge in global commodity prices in August and September following heightened tensions in West Asia.

Economists expect inflationary pressures to persist in the coming months.

"Looking ahead, the inflation outlook remains vulnerable to geopolitical and weather-related risks. Uncertainty surrounding key shipping routes and attacks on energy infrastructure continue to keep energy prices volatile. On the domestic front, a deficient monsoon poses risks to agricultural production," Sinha said.

CareEdge Ratings has revised its projection for average WPI inflation in FY27 to around 10 per cent.

# India-Mauritius pact brings in Principal Purpose Test

**Shishir Sinha**
New Delhi

The Finance Ministry has notified an amendment to the India-Mauritius tax treaty, introducing a treaty-level Principal Purpose Test (PPT) to curb treaty abuse.

The amendment came into force on August 10, 2026, while investments made before April 1, 2017, remain outside the scope of the PPT.

The amendment also revises the treaty preamble to state that the agreement seeks to eliminate double taxation "without creating opportunities for non-taxation or reduced taxation through tax evasion or avoidance, including treaty-shopping arrangements" designed to secure treaty benefits indirectly for residents of third jurisdictions.

**TREATY CLAIMS**
Richa Sawhney, Partner – Tax at Grant Thornton Bharat, said the amendment was significant because the India-Mauritius treaty was not a Covered Tax Agreement under the Multilateral Instrument (MLI) and had, therefore, not automatically incorporated its anti-abuse provisions.

"The amended preamble along with the introduction of the Principal Purpose Test (PPT) will bring the treaty in line with OECD BEPS minimum standards," she said, adding the PPT would strengthen the Revenue's ability to challenge treaty claims.

Nishant Shah, Partner at Economic Laws Practice, said, "With the introduction of Article 27B through bi-lateral amendment, the commercial purpose of investment structures routed through Mauritius is put in sharper focus."

Under the PPT, treaty benefits may be denied if it is reasonable to conclude that obtaining those benefits was one of the principal purposes of an arrangement or transaction.

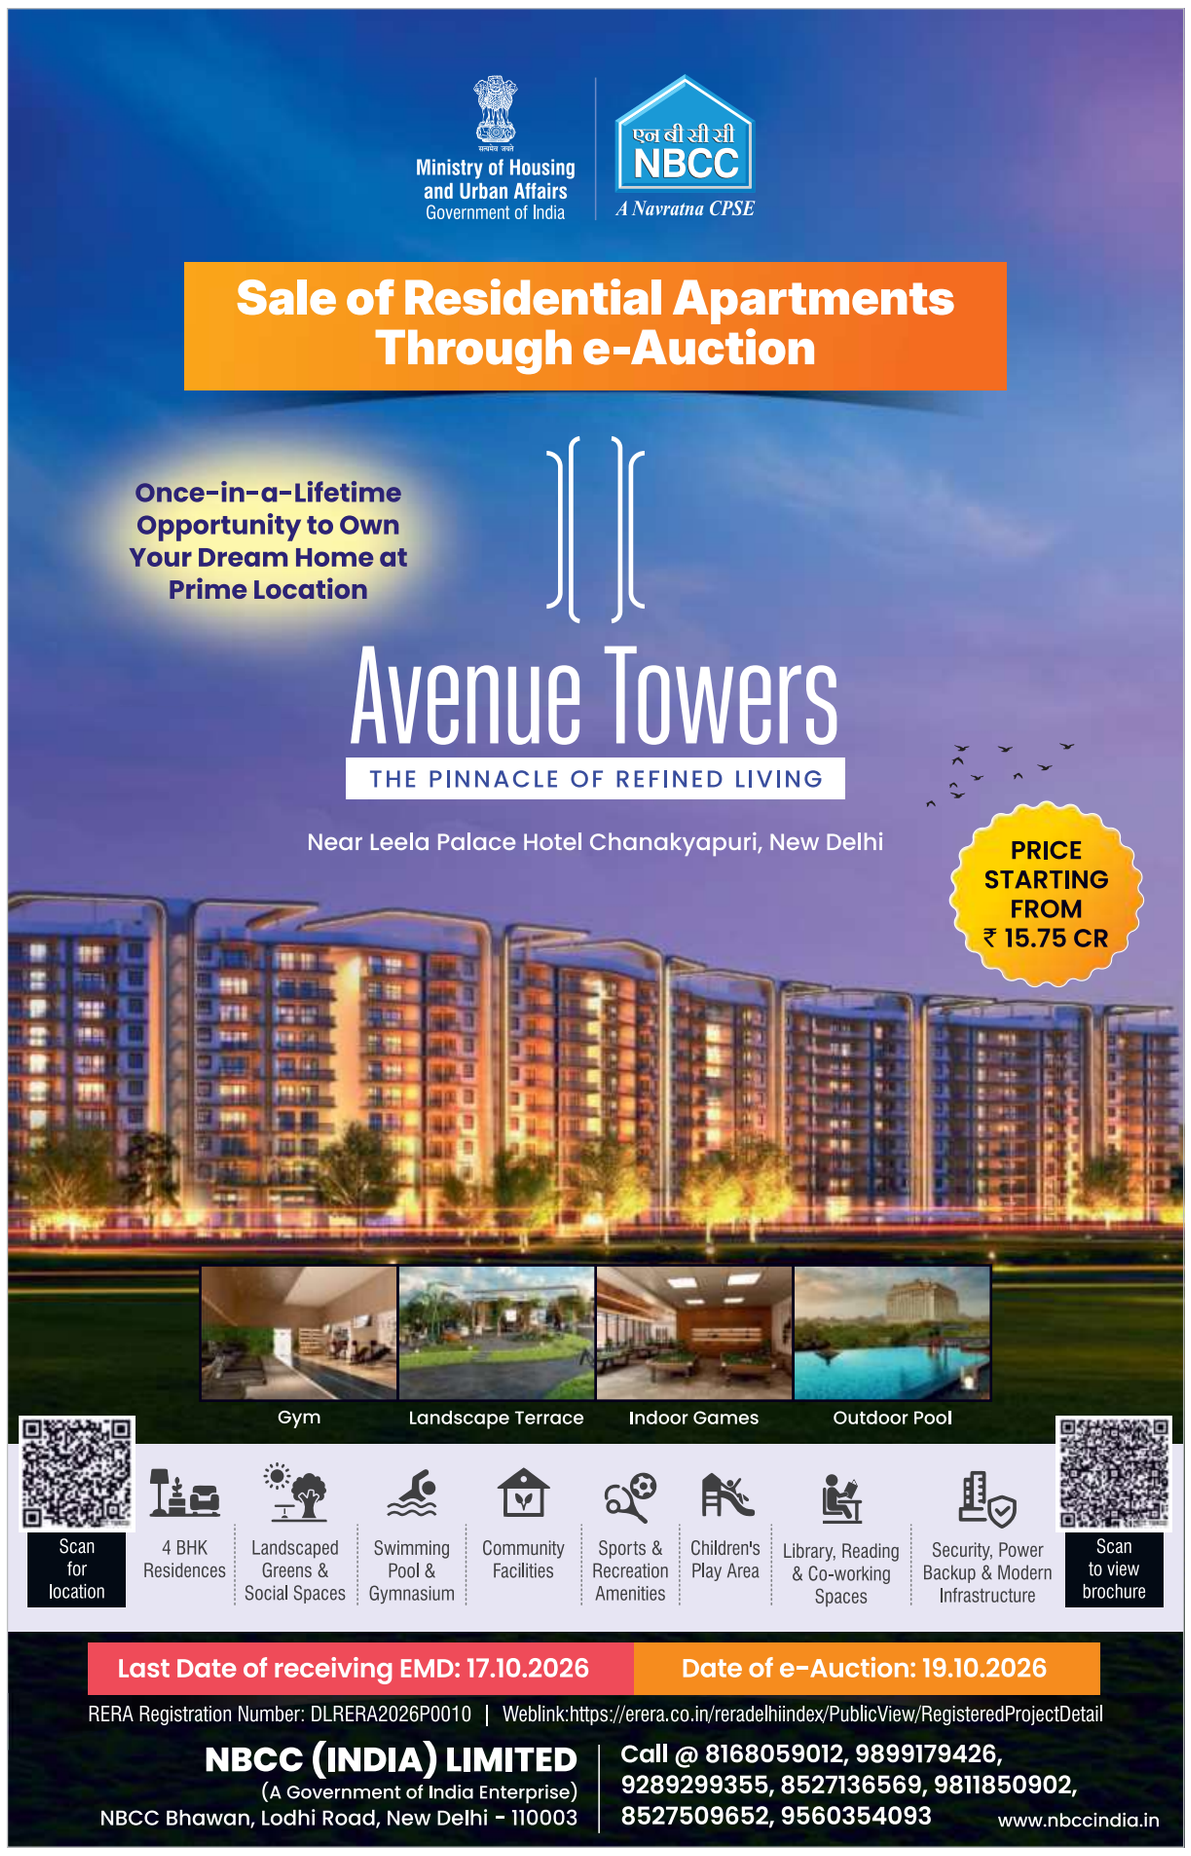
However, investments routed through Mauritius or arrangements that provide tax advantages will not automatically be treated as abusive.

**COMMERCIAL RATIONALE**
Maneesh Bawa, Partner at Nangia Global, said genuine investors should focus on substance rather than disruption. Capital gains on shares acquired before April 2017 remain grandfathered, as clarified by the Central Board of Direct Taxes (CBDT) in January 2025.

The key areas of scrutiny are dividends, interest and other income arising now, as well as structures lacking a genuine commercial rationale in Mauritius, he said.

Funds and holding companies should document their governance, decision-making and commercial purpose. Clear CBDT guidance on applying the PPT would also help, he added.

Vishwas Panjiar, Managing Partner at SVAS Business Advisors LLP, said the commercial rationale, decision-making and actual circumstances of an investment structure could be relevant alongside formal residence and documentation.



the hindu businessline.
THURSDAY - OCTOBER 15, 2026

# PERM challenge

*India should turn an impediment into an opportunity*

**The immediate business impact of the Trump administration's suspension of the Permanent Labour Certification (PERM) process for several major technology companies may be limited. Indian IT services companies have spent years insulating themselves from US immigration policy by increasing local hiring and building larger US-based operations. However, this could alter the movement of talent between India and the US.**

PERM is a critical step in the employment-based green-card process. The US Labour Department has suspended the participation of companies including TCS, Infosys, Wipro, HCLTech, Cognizant and Capgemini, as well as Microsoft and Adobe, amid a broader administration scrutiny of foreign-worker programmes. The move does not itself terminate H-1B visas, but it makes the route from temporary skilled-worker status to permanent residency more uncertain. It is only the latest in a series of measures under President Donald Trump to tighten the US skilled-immigration regime, including higher fee for H-1B visas, and moves to eliminate the automatic extension of employment authorisation for foreign workers awaiting renewal.

For decades, the US was the dream destination for ambitious Indian engineers, scientists and technology professionals. Indian talent found opportunities in the world's deepest technology ecosystem, while US companies gained access to a steady pipeline of highly skilled workers. If that door is gradually narrowed, India must ensure that the talent that stays is harnessed to build the next generation of technology. NITI Aayog's report, "Pathways to Progress: Analysis and Insights into India's Innovation Story," identifies the lack of long-term capital as a major constraint on deep-tech development. It notes that India's risk-averse investment environment, limited academia-industry collaboration and inadequate R&D hamper deep-tech startups and commercialisation of breakthrough technologies. India's R&D spending has remained around 0.6-0.7 per cent of GDP for more than a decade, compared with 2.6 per cent in China, 3.4 per cent in the US and 5.3 per cent in South Korea. But there is already a counter-trend. Microsoft has committed $17.5 billion to India, while Amazon plans to invest an additional $13 billion in cloud and AI infrastructure, taking its planned investment to $48 billion. Google too has announced a $15-billion investment. MNCs are expanding global capability centres, creating opportunities beyond traditional outsourcing.

The best-case scenario for India is that tighter US immigration policies create a shortage of STEM talent in US, prompting companies to move high-value work to India. But India must be ready. That entails creating world-class universities, stronger research institutions, patient capital, industry-academia collaboration and an environment where scientists and engineers can experiment without worrying about return on investments. It also means making Indian cities more liveable — to turn any crisis into opportunity.

# What about insider trading in land?

**UNJUST ENRICHMENT.** While market manipulation in stocks and commodities faces strict penalties, insider trading goes unchecked in real estate

VELANKANNI RAJ B

CKG NAIR
V SHUNMUGAM

Parandur, an area with paddy fields and lakes near Chennai, was selected in August 2022 for the city's second airport. After that, numerous land deals reportedly took place, driving land prices up two to threefold from 2022 to 2025. However, in August of this year, the new State government cancelled the project. The Assembly debate shifted focus from the airport to farmland and water bodies, with accusations flying between the current and previous ruling parties.

Parandur exemplifies a common pattern: new infrastructure projects like highways, metro lines, airports, or growing capitals often create early beneficiaries, typically those who learn about developments first. In financial markets, using confidential, price-sensitive information before it becomes public is known as insider trading. The Securities and Exchange Board of India (SEBI) enforces penalties for such activities under its insider trading regulations.

Real estate law does not include such provisions. Andhra Pradesh's former government prosecuted land buyers in Amaravati, claiming they knew about the capital site beforehand. However, in January 2021, the High Court dismissed the case, stating that insider trading is "totally alien" to the Indian Penal Code. The Supreme Court agreed with this interpretation. Therefore, private land purchases cannot be criminalised without a specific law that addresses them.

Shares are closely monitored, audited, and surveilled, which is why insider trading is detected. In contrast, land lacks such oversight, allowing insiders to quietly accumulate wealth. Commodities are regulated under the Essential Commodities Act and the 1980 anti-black marketing law against hoarding. Land remains the only major asset without such legal protections.

A few decades ago, land was plentiful and inexpensive, with big projects being uncommon. Lawmakers saw no reason to penalise anything beyond *benami* and black money deals. Now, land has become scarce and expensive, making mega projects commonplace. Insider trading in land now undermines public policy, and laws need to be updated.

The burden is on the public. Andhra Pradesh's 2019 three-capital proposal increased land prices across districts, and its reversal had a similar effect. When the government acquires land, it usually pays above the guideline value, allowing insiders to buy cheaply from unsuspecting farmers and pocket the difference. Public funds ultimately benefit private interests.

The bigger prize often lies just beyond a project's limits. Land adjacent to a new airport, expressway interchange, or metro station is rarely bought. However, its value can increase much more than the compensation paid by the State. Many insiders purchase property in that nearby area, not inside the project itself.

The problem is global. A working paper by four economists, including Stanford's Amit Seru, revealed that civil servants in Singapore had a 60 per cent higher likelihood than others to purchase flats close to metro stations that were not yet announced. This trend diminished only when enforcement measures were strengthened.

In India, land is a State subject, but the Centre also has authority. Registration and transfer of non-agricultural property are included in the Concurrent List. Central laws govern corruption, income tax, and money laundering. SEBI's approach provides a useful model: it specifies what constitutes sensitive information, identifies the holders, records their access, and compares trades with these logs.

### MODEL CODE OF CONDUCT

The Centre could develop a Model Code of Conduct and encourage States to adopt it. This code should specify project-sensitive information such as site studies, shortlists, draft alignments, station locations, land-use changes, and decisions to halt or modify a project. It should also define a project influence zone, encompassing the site and a surrounding belt, with size adjusted based on the project type — wider for airports or new capitals, narrower for metro stations or highway interchanges. Planning authorities, metro agencies, highway departments, and airport developers should name designated personnel, including decision-makers, officials, consultants, survey firms, and their immediate families.

**New infrastructure projects like highways, metro lines, airports, or growing capitals often** create early beneficiaries, typically those who learn about developments first

The design should be light-touch. India requires reliable data, collected discreetly, with intervention only in cases of severe violations. Honest buyers and sellers would then have nothing to worry about. Just a few simple measures are enough.

**Keep a digital log.** Each agency ought to log, with an unalterable timestamp, who viewed which map or file and at what time. If such a record had been available for Parandur, the Assembly might have focused on discussing facts rather than trading accusations.

**Observe a quiet period.** From the start of a site study until its public announcement, designated persons and their relatives should avoid buying, selling, taking power of attorney, or signing sale agreements in the project's influence zone. The 2013 land acquisition law already halts transactions after the preliminary notification; this freeze should begin even earlier.

**Build a real-time land database.** Where each registration of any significance includes the buyer's Permanent Account Number and the land parcel number. Over 37 crore parcels are already assigned such numbers. State registration data should be transmitted immediately into State databases connected to a central system. Analytics can detect anomalies like foreign buyers, new companies, chains of power of attorney, and groups within sensitive project areas. Interventions should be triggered only for significant violations.

**Take away the gain.** If a designated person purchases land during the quiet period and the State later acquires it, compensation should be limited to the purchase price plus interest, with the remaining amount going to the original seller. Most land in the influence zone is never acquired, but if such land is bought during the quiet period and sold within a specified timeframe, any profit should revert to the State. Parliament should amend the Prevention of Corruption Act to criminalise the misuse of such information and include this provision in the money laundering law.

**Shorten the secret.** Publish the shortlisted sites and draft alignments early, including reasons. Announce cancellations promptly when they are finalised. When information is accessible to everyone, no one gains an advantage. If values keep rising, a betterment levy can return some of the gains to the public.

Some fear this could delay infrastructure projects. However, it will actually accelerate them. Rumours of land deals have strengthened farmers' opposition, with the Parandur protest lasting over a thousand days. India has regained trust in its stock market through discipline, and land management should follow the same approach.

Eliminating insider trading in land doesn't require a stock exchange; it requires a straightforward law, transparent records, and the commitment to enforce them.

The writers are former Director, National Institute of Securities Markets, and Partner, MCQube, respectively

# Margin caps on cancer drugs examined

To curb profiteering and ensure fairer prices to patients, the Centre has capped the mark-up in prices

bl.explainer

PT Jyothi Datta

**Has the Centre brought down prices of cancer drugs?**
Earlier this month, the Centre approved a cap on the margins of non-scheduled anti-cancer drugs, i.e., medicines that are not already under price control. The margins will be limited to 30 per cent of the Maximum Retail Price (MRP), the Department of Pharmaceuticals (DoP) said. This is expected to reduce medicine prices by up to 70 per cent and help cancer patients save ₹2,500 crore annually. A committee of experts under the Directorate General of Health Services (DGHS) is finalising the medicines to be covered – and the list is expected anytime now. The final call on the list will be made by the National Pharmaceutical Pricing Authority (NPPA). The National List of Essential Medicines (2022) comprises 388 drugs covering 63 anti-cancer drugs.

**What triggered this action from the Centre?**
The concern over the pricing of cancer medicines is not entirely new. But a recent case on breast cancer drug Ribociclib in Kerala put the spotlight on medicines being priced beyond the affordability of patients. While the lady petitioner passed away during the course of the hearing, the case escalated to the Supreme Court — as civil society groups and others pointed to the inordinate delay with the case being listed 57 times. Parallelly, the apex court raised the issue of mark-ups on cancer and other medicines while hearing petitions filed by advocate Kishan Chand Jain and Dr Sanjay Kulshrestha — seeking regulatory action on the prices of drugs and medical devices.

The court hearings come even as State regulators, including regulatory authorities in Maharashtra, Rajasthan and Karnataka, flag steep mark-ups on medicines and consumables used in hospitals.

**Was there data illustrating "profiteering"?**
The DoP points to market data that revealed steep mark-ups, and cites the minutes from a recent NPPA meeting: "Analysis of Pharmarack data indicates that non-scheduled anti-cancer drugs carry an average trade mark-up of approximately 170 per cent, with mark-ups of up to 700 per cent in certain cases." The Authority further points to "substantial variations in transaction prices across retail, hospital and e-pharmacy channels, including significant differences in discounts from MRP." "In simple terms, the price rises sharply as the medicine moves through the supply chain before reaching the patient," says the DoP. In India, 60 in a population of one lakh are affected by cancer, it adds, pointing to the burden of out-of-pocket expenses for the patient family. The anti-cancer drugs market includes about 225 drugs and 500 formulations, with an estimated annual turnover of ₹12,500 crore, the NPPA said. Of this, scheduled cancer drugs account for approximately ₹2,250 crore, the rest being non-scheduled drugs.

**WORRISOME.** The steep rise in cancer drug prices KK MUSTAFAH

**Has the Supreme Court asked for similar action on other medicines as well?**
At a recent hearing, the Supreme Court judges are reported to have asked why the trade margin caps on cancer drugs could not be extended to other non-scheduled drugs and consumables as well, in patient interest.

**Did the Centre take similar action on cancer drugs in the past?**
Yes, in February 2019, the NPPA had capped trade margins on 42 selected non-scheduled anti-cancer drugs under Paragraph 19 of the Drugs (Prices Control) Order, 2013.

"That decision reduced MRPs by up to 91 per cent, with reported annual savings of ₹984 crore across 526 brands," the DoP said.

**How have pharma companies and hospitals reacted to the Centre's move to cap prices of cancer drugs?**
The Indian Pharmaceutical Alliance (representing major domestic drugmakers) pointed out that medicine prices in India were among the lowest in the world, and called for a balance between patient welfare and ensuring adequate margins to channel members.

The Association of Healthcare Providers of India (representing hospitals including major networks) called for an evidence-based approach in these pricing discussions. It said hospitals had high operating costs and capital investments, with operating margins for many hospitals in the 8-12 per cent range. "Labelling hospital pricing as "profiteering" without considering the complete cost structure," it said, presented "an incomplete picture of healthcare delivery."

### SEBI on the right track

With reference to 'What really protects the small investor?' (October 14), the slew of measures taken by the regulator to protect the small investors in the capital market, enthuse more investor confidence and provide a safety net from the regulatory perspective. As an additional measure, the regulator should aim to recalibrate valuation and pricing of IPOs and the ex-ante disclosures in the offer documents covering the substantial exits by institutional and private equity investors post mandatory lock-in period, to establish a robust investment ecosystem.

**Sitaram Popuri**

### Fairness in insurance

The editorial 'Unkind cut' (October 14) is well-argued, forceful, and much-needed. The medicare ecosystem in the country, especially the private, corporate sector needs greater regulation and strict watch. This is apparent from the recent reports of pricing of some life-saving medicines. The insurance providers also need to be watched. IRDAI has done well in the recent past trying to rein in the players and their practices. As the edit points out, insurers cannot make the insured pay for the actions (overcharging, etc) of hospitals and service providers. Insurance providers are an integral part of the health service delivery chain and must act in a fair manner.

### Catalysing AI

This refers to 'India isn't a zero in AI' (October 14). The IndiaAI Mission's funding for foundation models is welcome, but it must be matched by dependable access to affordable compute and fair procurement for domestic firms. Government departments and public-sector undertakings could become early customers for Indian language models, giving startups steady revenue. Equally, semiconductor and GPU plans need clear timelines and periodic public reporting. Sovereign models will matter only if they are used widely, and that depends on cost, reliability and trust.

# BRICS must rejig CBAM

## The mechanism should not be rejected completely

**Aditya KS**
**Kiran Kumara TM**
**Neha Tewari**

**CBAM.** It has a legitimate environmental objective GETTY IMAGES

The recently signed BRICS New Delhi Declaration opposed unilateral, punitive, discriminatory and protectionist measures that are not in line with international law, particularly Carbon Border Adjustment Mechanism (CBAM).

It expressed concern that such measures undermine efforts by countries, specifically the developing countries, aimed at addressing the adverse impacts of climate change, increasing adaptive capacity and resilience. Since then, both political and populist discourse have positioned CBAM as a concept to be completely rejected, which is not entirely true.

**HOW CBAM WORKS?**

CBAM is based on the principle that if EU producers face a carbon price (which they do under the domestic EU emissions trading system), imported competing goods should face a comparable carbon cost.

Taxing embedded carbon in goods is an approach to internalise the externality; it makes the price of traded goods reflect the embedded carbon (and the harm to the environment), and shifts the equilibrium to lower production or a transition to greener, cleaner production. But imagine what happens if the EU has a domestic carbon tax without a comparable instrument for imports; consumption will continue unabated, and only production will shift to a different country.

If we assume the new country supplying the imports is inefficient in terms of embedded carbon (the most likely scenario), then production may shift to countries with weaker climate policies. In the end, global net carbon emissions will increase, instead of decreasing as a result of the carbon tax. This is called carbon leakage. So, CBAM was introduced to bring parity; legally and institutionally, it is designed to mirror at the border the carbon cost faced by EU producers.

Though the carbon prices at the EU border are the same for all countries, the actual impact would differ. Industries in developed countries have access to climate finance, cheaper green alternatives and a whole ecosystem built around sustainability, all of which seldom exist in a developing country.

CBAM has a legitimate environmental objective, but its unilateral design can convert a climate instrument into a protectionist or developmental burden. Instead of rejecting the idea itself, countries, including BRICS, should negotiate to redesign CBAM, with an emphasis on fair procedures, financial support, technology transfer and revenue sharing.

**FAIR TREATMENT**

CBAM-like measures should be negotiated through a multilateral process involving developing countries, rather than imposed by individual importing blocs. BRICS and other member countries should have a place at the table where such decisions are made. Agreement should be reached on recognition of domestic carbon adjustment, measurement standards and MRV.

If an importing bloc, such as the EU, imposes a carbon border charge, a substantial share of the proceeds should finance decarbonisation and adaptation in affected developing countries.

This could involve low-cost, long-term loans; open or affordable access to green technologies; joint research and development; technical assistance for monitoring and verification; and recognition of domestic standards and certification systems.

**COMMON FRAMEWORK**

Finally, BRICS could develop a common framework for measurement, reporting and verification; carbon-intensity databases; mutual recognition of certification; carbon market interoperability; clean technology investment; common industrial benchmarks; and climate finance linked to measurable reductions.

CBAM, therefore, should not be rejected outright, but reformed into a negotiated instrument that aligns climate responsibility with development equity.

# Economics Nobel — key takeaways for India

**RELEVANT QUESTIONS.** Laureates Hall and Woodford showed that expectations steer the economy. India's task is to make sure they rest on accurate data

On Monday, the Royal Swedish Academy of Sciences awarded the 2026 Nobel Prize in Economics to Robert E Hall of Stanford University and Michael Woodford of Columbia University for showing how governments and central banks can steady an economy hit by shocks. Consider how the Reserve Bank of India's Monetary Policy Committee (MPC) works. It sets the repo rate, the rate at which the RBI lends to banks overnight.

Since 2019, many floating rate loans have had to be linked to an external benchmark such as the repo rate. It also announces a stance, a signal of where rates are headed: 'accommodative' leans towards cuts, while 'neutral' keeps the options open.

The stance matters because people act on what they expect the central bank to do next. That idea is at the heart of this year's prize. It also raises a question that deserves more attention in India: expectations are built on information, so how good is ours?

The Academy cited the two laureates "for microeconomic foundations of macroeconomic stabilisation". In plain terms, they explained booms, recessions and inflation by starting from how households and firms decide to spend, save and set prices. Hall showed that people spend based on what they expect to earn over time, not just on this month's pay.

Woodford, in interest and prices, built a framework linking household spending, firms' pricing and central bank policy. Its lesson is that economic behaviour depends not only on today's policy, but on what people expect policy to be, which is why central bank credibility and communication matter.

The resulting New Keynesian models are now used by central banks around the world. After the 2008 financial crisis, with interest rates at their lower bound, Woodford argued that explicit statements about future policy could still help. Within a year, the US Federal Reserve, the European Central Bank and the Bank of England were all using such forward guidance.

**INFLATION-TARGETING BET**

India formally adopted inflation targeting in 2016. The government, in consultation with the RBI, sets a consumer price inflation target of 4 per cent, with a tolerance band of 2 per cent to 6 per cent. In March, that target was renewed until 2031. A six-member MPC sets the repo rate.

The RBI's Quarterly Projection Model, built to support inflation targeting, is a New Keynesian model. Average inflation under the framework has been 4.9per cent, against 6.8 per cent before it.

India stretches the model's assumptions, and Hall's own work offers a clue why. In 1982, he and Frederic Mishkin found that about a fifth of the households in their study lived hand to mouth, spending as they earned. In India, many households borrow outside the banking system altogether: in 2019, 34 per cent of rural household debt was owed to non-institutional lenders such as moneylenders, against 13 per cent in urban India.

Supply shocks add to the strain. Data released on the day of the prize showed retail inflation rising to 5.54 per cent in September from 4.83 per cent in August, with food inflation at 7.74 per cent. Even in the formal system, Nomura estimates that changes in short-term rates take 13-14 months to reach bank lending and deposit rates, and that only about two-thirds of a repo cut reaches rates on outstanding loans.

**Expectations can be anchored only if everyone, from households to the** RBI, shares a reliable picture of the economy

These are often read as reasons to discount the framework here. The opposite is closer to the truth. When rate changes reach people weakly, the RBI's credibility and communication must do more of the work. Expectations matter more here, not less.

**THE MISSING LINK**

Expectations can be anchored only if everyone, from households to the RBI, shares a reliable picture of the economy. Three gaps stand out. The first is timeliness. GDP for April-June 2026 was released on August 31, two months after the quarter ended.

The second is revisions. In the same round, growth for January-March 2026 was revised up by about three quarters of a percentage point to 8.6per cent. Large revisions change the story after decisions are taken.

The third is coverage. The RBI's survey asking households for numerical inflation expectations covers 19 cities. Rural and semi-urban households are covered by a separate consumer confidence survey. India has made real progress. In February, GDP and the consumer price index moved to newer base years — 2022-23 and 2024. The labour force survey now produces monthly estimates, and the Statistics Ministry publishes a monthly index of services production.

**FORWARD GUIDANCE**

Three steps would help. First, more high-frequency and State-level indicators so that policymakers can see shocks as they spread. Second, a published revision calendar with clear explanations of why numbers change: forward guidance for statistics. If the RBI can tell markets what to expect from policy, statistical agencies can tell users what to expect from their data. Third, extending the household inflation expectations survey beyond 19 cities.

The next time the MPC changes a word, its power will depend on whether people trust the numbers behind it. Hall and Woodford showed that expectations steer the economy. India's task is to make sure those expectations rest on accurate data.

# Biggest tropical carbon sink sees deforestation accelerate

**Antony Sguazzin**

Trees in Africa's vast Congo Basin are being cut down at a faster rate even as deforestation in other tropical regions slows. The amount of land cleared in the Central African basin in 2025 almost matched tree loss in Latin America and the Caribbean for the first time since the Forest Declaration Assessment produced its first report in 2015.

About 2.43 million hectares (6 million acres) of tropical forest was lost in Africa last year, up 1.4 per cent from the year before.

That compared with 2.54 million hectares in the South and Central American region, which includes the Amazon.

**POLITICAL WILL LACKING**

The group, which assesses progress in halting deforestation, laid the blame for the persistently high rate in Africa on the uncontrolled expansion of small-scale farming, a lack of political will and inadequate regulation.

There is "increased pressure on land, on resources, from a combination of factors, including population growth, intensive logging, agro-industries, increased mining activities and investment in large infrastructure development," said Samuel Nguiffo, a lawyer who founded Cameroon's Center for Environment and Development.

"There is a deficit in government capacity and in government will to see a change in how the forest is being managed."

The Congo Basin, a region larger than India that stretches across 12 African nations from Cross River in Nigeria to the Rift Valley in East Africa, is the world's second-biggest tropical forest area and its biggest tropical carbon sink. It's vegetation absorbs 600 million tonnes of planet-warming carbon dioxide a year, equivalent to Germany's emissions.

**CONGO BASIN.** The region larger than India needs a fresh green cover GETTY IMAGES

**BIODIVERSE AREAS**

It ranks among the world's most-biodiverse areas, boasting 10,000 plant species and forests that provide homes for four species of great apes, as well as forest elephants and okapis — an endangered relative of the giraffe.

"Once gone, the true value of service rendered by the forest to indigenous and local communities, to our national communities in Congo Basin counties and to the whole planet will be better perceived," said Nguiffo on a conference call. "This will be too late."

**POOR REGULATIONS**

In addition to poor regulations, he pointed to decades of conflict in the region, much of it in the east of the Democratic Republic of Congo, that had led to uncontrolled logging. Overall global deforestation fell 15 per cent last year from 2024, with just over 7 million hectares of forest harvested or burnt, an area the size of Ireland.

The area lost declined by almost a third in Latin America and the Caribbean, while in tropical regions of Asia it dropped by 11 per cent to 1.6 million hectares. BLOOMBERG

### TWENTY YEARS AGO TODAY.

October 15, 2006

**Sasol ready to invest $6 billion**

South African petrochemical major Sasol Ltd has approached the Union Ministry of Coal with a $6 billion (around Rs 27,000 crore) investment proposal for a coal liquefaction project. If the project comes through, it will constitute the largest foreign direct investment in India.

**Pact with EU could go beyond FTA**

The Trade and Investment Agreement (TIA) that India and the European Union have agreed to negotiate on is likely to go beyond a Free Trade Agreement and take into account various issues such as non-tariff barriers, export of services and movement of professionals between the two trading partners.

**Film industry running for insurance cover**

Film producers are increasingly reaching out for insurance to protect themselves from losses arising out of accidents at the sets, and starry tantrums. In the past year, regional and documentary makers have also been seeking insurance. United India Insurance, which pioneered film insurance in 1998, has so far insured 130 films. The tally in 2002 stood at 22.

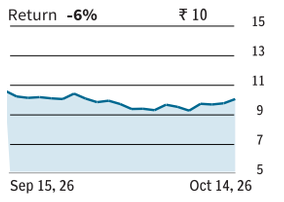
## QUICKLY.

### Allcargo promoter trust exempted from open offer



**New Delhi:** SEBI on Wednesday exempted the Shashi Kiran Shetty Family Trust from the open offer requirement for its proposed acquisition of a 34.41 per cent stake in Allcargo Logistics from one of its promoters. The trust plans to acquire 51.54 crore shares or a 34.41 per cent stake held by promoter Shashi Kiran Janardhan Shetty as part of an internal reorganisation of the promoter family's holding for succession planning and estate consolidation, as per SEBI. The regulator said that the proposed transfer would not change the aggregate shareholding of the promoter and promoter group. PTI

### Getfive Funds gets SEBI nod for ₹500-cr SME fund

**New Delhi:** Getfive Funds on Wednesday said it has received approval from SEBI to launch its second alternative investment fund (AIF), with a target corpus of ₹500 crore, to invest in high-growth small and medium enterprises (SMEs). The Getfive Opportunity Fund II, a Category-I AIF, will focus on emerging businesses in tier-1, tier-2 and tier-3 markets, with investments spanning defence, aerospace, space technology, deep-tech, healthcare, pharmaceuticals, financial services and renewable energy, education and waste management, the company said. While the first fund continues to focus on SMEs, the second fund will expand the investment mandate with a larger corpus, it said. PTI

# SEBI panel meets today to review feedback on CAS; majority for VWAP

**ALSO ON THE CARDS.** Volume weighted average price blended with closing auction price on F&O settlement day

**Akshata Gorde**
Mumbai

The Securities and Exchange Board of India has convened a meeting of its Secondary Market Advisory Committee on Thursday to discuss feedback on its Closing Auction Session (CAS) framework, as it considers changes to the recently introduced mechanism.

The meeting will focus on responses to SEBI's consultation paper that received around 20,000 comments. Beyond reviewing stakeholder feedback on its proposals, the regulator has not shared a detailed agenda.

**WANT ROLLBACK**
Market participants have largely favoured retaining the previous methodology for calculating derivatives settlement prices on expiry day, which was based on the volume-weighted average price (VWAP) of trades executed during the final 30 minutes of the continuous trading session, rather than immediately adopting a blended approach that incorporates data from both the CTS and the CAS.

SEBI introduced the CAS for stocks with futures and options contracts on August 3. The auction-based mechanism is designed to improve the closing price discovery process by matching buy and sell orders to arrive at a single equilibrium price.

Closing prices play a critical role in derivatives settlement, index calculations and the determination of mutual fund net asset values.

**OFF-GUARD.** The auction-based mechanism, designed to improve the closing price discovery, hit trading activity

**SYSTEM NOT READY**
The market was initially unprepared for the new mechanism, which shifted trading activity toward the auction window. As a result, the average daily turnover in the F&O segment fell to ₹193.34 lakh crore in August, from ₹277.84 lakh crore in June and ₹214.3 lakh crore in July. Trading activity, however, rebounded after SEBI indicated that it would reconsider the methodology.

The regulator has proposed two alternatives: The first is a blended VWAP that incorporates trades executed during both the final 30 minutes of the continuous trading session and the subsequent 10-minute CAS, with traded value across both periods factored into the calculation; and the second is to retain the existing VWAP-based methodology for a year before considering a transition. Market participants have largely supported the latter option.

The consultation paper also sought feedback on alternative market timings, the dissemination of indicative index values during the auction session and certain order-handling rules. SEBI's final decision will follow an evaluation of stakeholder responses and deliberations on the proposed changes.

# SME IPO norms may undergo a major overhaul

**Suresh P Iyengar**
Mumbai

**CONSULTATION PAPER**
- Issuers with market capitalisation of up to ₹1,000 crore would be required to list on the SME platform
- The minimum application value halved to ₹1 lakh
- Qualified institutional investors would get greater flexibility to sell their holdings

The market regulator SEBI has proposed a comprehensive overhaul of regulations governing initial public offerings (IPOs) by small and medium enterprises (SMEs), including tighter profitability criteria, revised listing eligibility based on market capitalisation, lowering market lot and changes to shareholding lock-in requirements.

In a consultation paper issued on Wednesday, SEBI proposed raising the minimum profitability requirement for SME IPOs to an average operating profit of ₹3 crore annually over the preceding three financial years, compared with the existing requirement of ₹1 crore in at least two of the three years.

SEBI has invited public comments by November 4.

Issuers with a market capitalisation of up to ₹1,000 crore would be required to list on the SME platform, while those valued above ₹1,000 crore and up to ₹4,000 crore could opt for the segment, subject to additional financial reporting requirements, the paper suggested.

Companies in the higher band that have not adopted Indian Accounting Standards (Ind AS) would be required to prepare their restated consolidated financial statements under these standards.

However, companies that do not meet the profitability threshold could access the SME platform through an alternative route, provided the IPO follows the book-building process and at least 75 per cent of the net offer is allotted to qualified institutional buyers. If the prescribed allocation is not achieved, the entire subscription amount would have to be refunded, said the consultation paper. Under the proposed changes, the minimum application size for an SME IPO would be four lots, with each having a minimum value of ₹25,000, taking the minimum application value to ₹1 lakh. The current minimum lot size is ₹2 lakh ( 2 lots of ₹1 lakh).

The proposals follow the expansion of the SME capital market. As of July 31, a total of 1,496 entities had been listed on the platform since inception, including those migrated to the main board.

**FUND UTILISATION**
SEBI has also proposed to removing the ₹10 crore absolute cap on the use of IPO proceeds for general corporate purposes, while retaining the ceiling of 15 per cent of the issue size. It has also proposed a dedicated framework for offer for sale (OFS) transactions in SME IPOs, including a one-year holding requirement for shares offered for sale, subject to specified exemptions.

Qualified institutional investors would get greater flexibility to sell their holdings beyond the existing quantitative limits, though the relaxation would not apply to IPOs using the alternative route for issuers that fail to meet the profitability criterion.

# SEBI's order reconfirms ban on Rajesh Exports, promoter

**Akshata Gorde**
Mumbai

SEBI has confirmed its interim directions against Rajesh Exports (REL) and its promoter Rajesh Mehta on Wednesday, alleging continued gaps in financial disclosures, discrepancies in revenue figures and inadequate information on transactions involving related parties.

The regulator said Mehta would remain barred from buying, selling or dealing in the company's securities, directly or indirectly, until further orders. The company has also been directed to provide the information sought by investigators and continue making accurate and complete disclosures of its financial statements and related-party transactions.

**FORENSIC AUDIT**
SEBI also directed a new forensic auditor appointed in the matter to complete work expeditiously and asked the investigating authority to conclude its investigation without delay.

The confirmatory order follows an interim direction issued on June 3 after SEBI began investigating REL's financial statements for the period from April 2020 to March 2024, following a complaint about large trade receivables outstanding for more than two years.

# 'Accredited investors likely to touch 4 lakh after new classification'

**Our Bureau**
Mumbai

Greater flexibility for alternative investment funds (AIFs) will also mean greater responsibility for the industry to strengthen governance and protect investors, SEBI Whole-Time Member Sandip Pradhan said on Wednesday.

The markets regulator expects its revised accreditation framework to significantly expand the pool of accredited investors, potentially taking the number to four lakh from around 2,000 currently, Pradhan said at a Confederation of Indian Industry (CII) summit on alternative investments.

The changes could take the number of accredited investors to four times the existing total AIF investor base of around one lakh, he said.

**INVESTOR ELIGIBILITY**
SEBI's board approved changes to the accreditation framework in September, including allowing investors to qualify based on their securities market investments and permitting fund managers to determine investors' accredited status.

Pradhan said the revised framework would help widen participation by investors who have the financial capacity to take on higher risks. A circular detailing the approved changes will be issued soon, he said.

"Today, the challenge is more nuanced," Pradhan said, adding that the industry's demand for greater flexibility in investment structures, co-investment, leverage and differentiated rights for sophisticated investors.

At the same time, the growing size and interconnectedness of private markets requires closer attention to governance, conflicts of interest, valuation transparency and investor protection, he said.

# Groww Q2 profit rises 54% to ₹725 crore

**Our Bureau**
Bengaluru

Billionbrains Garage Ventures, the parent company of stockbroking platform Groww, reported a 54 per cent year-on-year (y-o-y) rise in consolidated net profit to ₹725 crore in the September quarter of FY27, despite regulatory changes affecting derivatives trading volumes across the broking industry.

The Bengaluru-based wealth-tech firm had posted a net profit of ₹471 crore in the corresponding quarter last fiscal. Revenue from operations rose 44 per cent to ₹1,541 crore (₹1,071 crore).

The profit growth comes amid the impact of SEBI move to introduce a Closing Auction Session (CAS), which has affected derivatives trading activity across brokers.

**Scorecard**

| | Q2 FY26 | Q2 FY27 |
|---|---|---|
| Revenue (₹ cr) | 1,018.7 | 1,501.5 |
| PAT (₹ cr) | 471.3 | 725.6 |
| Active users (in crore) | 1.8 | 2.4 |

Source: Company report

Groww has been working to reduce its dependence on equity derivatives by expanding its presence across other business segments, including commodities trading and its margin trading facility (MTF).

The contribution of equity derivatives to overall revenue declined to 44.8 per cent in Q2 FY27 from 56.9 per cent in the year-ago quarter. Meanwhile, commodities trading accounted for 6.2 per cent of revenue, up from 0.2 per cent a year earlier, while MTF's contribution increased to 10.1 per cent from 7.4 per cent.

# WPI shock and crude keep market in check

**Our Bureau**
Mumbai

Equities surrendered a chunk of the previous session's gains on Wednesday as a sharp jump in wholesale inflation and crude oil prices hovering above $107 a barrel kept investors cautious.

The Nifty 50 closed at 22,622.70, down 99.25 points, while the Sensex fell 251.89 points to end at 72,781.89. Bank Nifty settled at 55,316, down 0.30 per cent. The Nifty Midcap 100 declined 0.08 per cent and the Nifty Smallcap 100 fell 0.32 per cent.

"A hotter-than-expected domestic WPI print pushed bond yields higher, reviving concerns over a tighter monetary policy trajectory and weighing on automobiles, private banks and metals," said Vinod Nair, Head of Research, Geojit Investments.

# NSE IX, London Stock Exchange explore cross-listings, trading links

**Our Bureau**
Ahmedabad

**JOINING HANDS.** Dame Julia Hoggett, CEO, LSE plc, and V Balasubramaniam, MD and CEO, NSE IX, after signing an MoU to explore derivatives listed on NSE IX using FTSE Russell indices

NSE IFSC Ltd (NSE IX), the international exchange at GIFT City, and the London Stock Exchange plc (LSE) have signed a memorandum of understanding to explore dual and cross-listing of equities, fixed-income securities and exchange-traded funds (ETFs), along with cross-border trading connectivity and new financial products.

**DERIVATIVES FOCUS**
The proposed collaboration will also explore derivatives listed on NSE IX using FTSE Russell indices as underlying benchmarks, joint development of equity indices, trading of existing financial products and market data distribution, an official release stated here on Wednesday. The agreement provides a framework for the exchanges to identify opportunities for issuers and investors in both markets, with the potential to expand investor access and improve liquidity.

V Balasubramaniam, MD and CEO of NSE IX, said the seeds of this collaboration germinated from the India-UK Comprehensive Economic and Trade Agreement (CETA), which aims to open new avenues in capital markets connectivity and financial services integration between London and India.

The LSEG and NSEIX have taken this first step towards collaboration through dual listings and cross listings across products and exploring a cross-border connect between the two exchanges to provide seamless bidirectional trading opportunities leading to higher liquidity and a larger pool of investors.

## BROKER'S CALL.

### JM Financial

**PEARL GLOBAL (BUY)**
Target: ₹1,610
CMP: ₹1,303.30
Pearl Global Industries (PGIL) is not a bare cut-and-sew job worker; it is a turnkey global apparel manufacturer with 25 plants in five countries — India, Bangladesh, Vietnam, Indonesia and Guatemala — offering design, sourcing and full-package manufacturing to global apparel brands. The platform has scaled up over recent years to installed capacity of 10.80 crore pieces ) at optimum utilisation and shipments of 7.81 crore pieces in FY26.
Production is allocated across the five countries by tariff exposure, customer needs, product complexity and proximity to end markets. Bangladesh anchors scale, Vietnam carries higher-value and excels at technical products, Guatemala is a speed saviour with near-shore access to the US, Indonesia is mid-ramp, and India — largest single pool of under-utilised capacity — is where the next recovery sits.
FY26 was an acid test. The US duties briefly put India at a steep disadvantage. PGIL absorbed ₹36 crore of tariff burden; yet EBITDA margin rose to 9.2 per cent as the company moved orders to Bangladesh and Vietnam.
All in all, we estimate revenue, EBITDA and PAT CAGR would be 16, 24 and 29 per cent, respectively, over FY26–29 with the balance sheet turning net cash by FY29E factoring in capex of about ₹200 crore a year. Initiating PGIL at Buy with a TP of ₹1,610 (25x FY29E EPS).
**Risks:** US consumer demand, trade policy, concentration (geo, customer), India ramp-up, Vietnam realisation, forex.

### Emkay Global

**RBL BANK (BUY)**
Target: ₹475
CMP: ₹385.10
RBL Bank's Q2 PAT stood at ₹480 crore/ROA at 0.9 per cent, which is 4 per cent below our estimates largely due to higher provisions (32 per cent above our estimate). However, the bank continues to report accelerated growth driven by broad-based growth along with FCNR(B) leverage, while its cards portfolio is muted. RBL carries surplus liquidity, which it plans to deploy into wholesale and secured retail lending. Margins are expected to moderate in Q3-FY27 due to the full-quarter impact of FCNR(B)-led leverage and surplus funds parked in lower-yielding assets, and partly offset by repo rate hike benefits, before recovering gradually in Q4-FY27. Asset quality continued to improve, with gross slippages at 2.5 per cent of loans, albeit still elevated. So far, the management has not seen any stress from the rural business or the West Asia conflict, although it remains watchful.
Over the longer term, the bank expects to reduce its cost of funds through rationalisation of retail and savings deposit rates, alongside improvement in the CASA mix.
However, the management expects card slippages to stabilise at ₹400 crore in Q4/Q4FY27. We tweak our earnings estimates and retain Buy on RBL, while raising TP by 10.5 per cent to ₹475 from ₹430 (roll forward to 1.6x Sep-28E ABV).
**Key risks:** Delay in asset quality recovery in MFI/cards, slower business growth and KMP attrition.

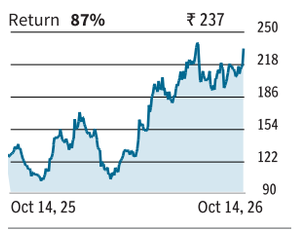
## TODAY'S PICK.

### Rain Industries (₹237.30): BUY

**Gurumurthy K**
bl. research bureau

The short-term outlook is bullish for Rain Industries. The stock surged over 7 per cent on Wednesday. This rise has taken the share price well above a key resistance level of ₹230. It also marks the end of the consolidation that was in place since August. Moving average indicators are also giving positive signals. The region between ₹230 and ₹225 will now act as a good support and limit the downside. The Rain Industries share price can rise to ₹270 from here.

Traders can buy Rain Industries now at ₹237. Accumulate on dips at ₹232.



Keep the stop-loss at ₹218 initially. Trail the stop-loss up to ₹242 as soon as the stock goes up to ₹249. Revise the stop-loss higher to ₹252 and ₹258 when the price touches ₹257 and ₹264 respectively. Exit the long positions at ₹268.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading

### CEAT net falls 40% on margin pressures

**New Delhi:** CEAT Ltd posted a 39.6 per cent decline in its consolidated net profit to ₹112 crore for the quarter ended September, even as the tyre maker's revenue from operations rose 26.2 per cent. The drop in net profit comes as West Asia crisis resulted in higher raw material prices, which dented its margins. PTI

# Airtel expects to get Satcom nod 'significantly' ahead of Starlink

**AWAITING GO AHEAD.** Ground network has been ready for past 3 years: Sunil Mittal

**Our Bureau**
New Delhi

Sunil Bharti Mittal, Founder and Chairman, Bharti Enterprises BLOOMBERG

Bharti Airtel on Wednesday said its satellite communication (satcom) venture with Eutelsat OneWeb is significantly ahead of Elon Musk's Starlink in the queue in India, with the licence applied five years ago, and the company expected to receive the go-ahead at least a few days before the US space firm.

Speaking at the Bloomberg New Economy Forum 2026, Sunil Bharti Mittal, Founder and Chairman, Bharti Enterprises said his ground network had been ready for the past three years and noted the company is yet to receive permission to begin services.

**AHEAD IN THE RACE**

"I believe we are significantly ahead of him (Musk) in the queue because we applied five years ago. Our ground networks have been ready for the past three years, and our satellites have been hovering over India for the past five years. We still do not have the necessary permission, so we would be very happy to receive it, even a few days before him," Mittal said. The industrialist's remarks come after Musk last week accused powerful business interests of blocking Starlink's entry into India.

Musk also alleged that some business groups are seeking to preserve a "monopolistic chokehold" on Indian consumers. However, the Ministry of Communications has rejected the charge, describing suggestions that the regulatory framework or its application was unfair or discriminatory as "baseless and misconceived."

**THREE VENTURES**

Communications Minister Jyotiraditya Scindia also said that three ventures — Musk's Starlink, Reliance's Jio Satcom and Bharti-backed Eutelsat OneWeb — had secured satcom licences, and Amazon's Leo (earlier Project Kuiper) has also expressed interest, but must follow the established procedure.

Speaking to mediapersons last week, Scindia further said spectrum would be assigned once the government finalised a revenue-based charging framework and individual operators fulfilled security requirements.

The Telecom Regulatory Authority of India (TRAI) and the Department of Telecommunications (DoT) were close to a decision on satellite spectrum pricing, he added.

Reliance is also developing its satellite ambitions, including a proposed constellation of about 1,600 low-earth-orbit satellites aimed at extending internet connectivity to six lakh villages. That would put Jio in more direct competition with Starlink, which is seeking access to a vast market where satellite broadband could serve remote communities and locations poorly covered by terrestrial networks.

Ironically, both Reliance and Airtel had signed an agreement respectively last year, to explore ways of bringing Starlink services to Indian customers through their retail networks.

# India to strengthen resilience against AI, financial shocks, says Vaishnaw

**Our Bureau**
New Delhi

Minister of Electronics and Information Technology Ashwini Vaishnaw

Minister of Electronics and Information Technology Ashwini Vaishnaw on Wednesday said that India was strengthening its economic and technological resilience to shield its growth from external shocks, as tech disruptions arise from artificial intelligence (AI) and financial risks.

Speaking at the Bloomberg New Economy Forum 2026, he also said that global technology supply chains would continue to span multiple countries and geographies, but companies and governments would need to repeatedly evaluate their partners and ensure that dependence on a particular country or company did not compromise resilience.

"The global value chains will definitely be multi-border, multi-country, multi-geography. That is the nature of this industry, that will remain as such... strategic dependencies — which are the countries you can trust, which are the places where you believe that your production, your design, your dependency on a particular country or a company — doesn't make you lose your resilience. Those are the decisions which will have to be taken again and again, continuously, evaluate the partners," he said.

**BUTTERFLY EFFECT**

He said the 'turbulence' is going to be much more than what it was in the past decade. "The turbulence will come both from technology as well as from the way the financial world is moving, the whole debt levels in the rich countries that is going to unfold today or tomorrow, may be three-five years," Vaishnaw mentioned.

When that unravels, it is going to ... be bigger because by that time AI would have brought in many other disruptions in the employment sector, especially the services industries, work, and the debt levels getting unravelled, he said.

Vaishnaw warned that the combination of these factors could make the coming years extremely challenging.

He added that trust was becoming as important as cost in technology supply chains, particularly as cybersecurity risks increased and concentration in some semiconductor segments grew.

Meanwhile, Cisco Chairman and CEO, Chuck Robbins backed India's approach, saying the country had the scale, engineering capabilities and technological expertise to develop critical capabilities while partnering with trusted companies for other requirements. "India has been an incredible trusted partner for lots of American companies, in particular, and global companies... it really does create an environment where we are comfortable investing," Robbins said.

# India-US talks heading towards landing point but clarity needed on competing economies: Jaishankar

**Amiti Sen**
New Delhi

External Affairs Minister S Jaishankar BLOOMBERG

External Affairs Minister S Jaishankar has said India-US trade talks were heading towards a "landing point," but certain issues, including how India would fare vis-à-vis competing economies, needed to be resolved.

"When countries negotiate with an economy like the US, obviously one part of it is what you work out between yourselves and the US and one part of it is how do you fare vis-a-vis competitive economies. And that part is not entirely clear. Because not everybody has worked out the deal. So I think the USTR and our Commerce & Industry Minister are ironing it out," Jaishankar said at the Bloomberg New Economy Forum in New Delhi.

The Minister added that the two sides were waiting on a few things.

Negotiations on the Bilateral Trade Agreement (BTA) have yet to yield a deal, despite the two countries announcing an interim framework in February, as talks have been complicated by changes in the US tariff regime, particularly the US Supreme Court's verdict invalidating reciprocal tariffs. This has made India reassess the terms of the proposed agreement. Uncertainty has also been heightened by ongoing US Section 301 investigations into India, including a probe into excess industrial capacity, and legislation authorising steep tariffs on countries buying Russian oil.

Jaishankar said the US had repositioned itself and changed the manner in which it engages the world. "So I think every country, in a way, has to recalculate and reset its relationship with the United States," he said.

Washington's shift comes to light in its use of trade measures to pressure India over Russian oil purchases while simultaneously rebuilding ties with Pakistan, including through closer engagement with its military and leadership.

**INDIA-CHINA TIES**

On India's relationship with China, Jaishankar noted that while India was not making a final boundary settlement a precondition for doing business with Beijing, maintaining peace and tranquillity along the frontier was essential for a normal relationship.

"We do believe today that we are not getting a level playing field in China," he said.

In another discussion, Jaishankar said that various choke points, apart from rare earth, had emerged in the world, such as unilateral sanctions and weaponisation of finance.

# India working to rebuild ties with China but last word yet to be scripted, says Goyal

**Our Bureau**
New Delhi

Union Minister for Commerce and Industry Piyush Goyal (file photo)

Commerce Minister Piyush Goyal has said that India was working to rebuild ties with China once again but it was not yet known how it would pan out.

On relations with the US, the Minister said that India's ties with the country were "very good" and said he did not see any problem.

"We are open to all countries around the world as long as we get a fair deal... we ensure a continuity in the engagement. I think we had some concerns in the past. We are working to develop relations with China once again, but the last word has not yet been scripted on this journey," Goyal said addressing the Bloomberg New Economy Forum on Wednesday.

The remarks on China come amid continuing concerns over the unresolved border question, which has been a major source of strain in bilateral ties since the 2020 eastern Ladakh standoff. Although ties have shown signs of a thaw following steps to ease border tensions and revive bilateral engagement, lingering uncertainties over the boundary question continue to cloud the rapprochement.

Prime Minister Narendra Modi stressed on the need to observe existing agreements and understandings on border-related issues in his meeting with Chinese President Xi Jinping on the sidelines of the BRICS Summit last month that provide an opportunity for the two leaders to take stock of progress in stabilising relations and discuss the way forward.

**TRADE DEFICIT**

China is one of India's largest trading partners but the widening trade deficit remains a key concern for New Delhi. Investment flows from China is another area of strife. India has tightened its foreign direct investment policy for countries sharing land borders with it, making investments from these countries subject to government approval. Beijing wants India to ease the restrictions.

On India's relationship with the US under President Donald Trump, the Minister said that ties with the country are very good. "I don't see any problem as we speak," he said. India and the US are trying to work out a bilateral trade agreement amid various tariff measures taken by Washington over the past year. Goyal said that the two countries continue to have a very consequential relationship and engaged in areas such as defence exercises, ensuring open supply chains for technology, goods, and services.

# AI cannot replace clinical trials soon, says Moderna's Afeyan

**Our Bureau**
New Delhi

> It (AI) could also improve cancer screening by reducing false-positive results
>
> **NOUBAR AFEYAN**
> Co-founder & Chairman of Moderna

Artificial intelligence (AI) could transform scientific discovery and accelerate drug development, but replacing clinical trials with digital simulations remains a distant prospect given the complexity of human biology, Noubar Afeyan, Co-founder and Chairman of Moderna, said at the Bloomberg New Economy Forum in New Delhi.

Afeyan cautioned against exaggerated claims about AI's potential to cure diseases such as cancer, arguing that scientific progress must be accompanied by greater humility about what researchers understand about human physiology.

"I think the hardest thing will be to do what is out there these days in terms of speculation, which is simulating clinical trials and avoiding them altogether," he said.

He said AI could help address bottlenecks in clinical research, including identifying patients most likely to respond to treatments by analysing electronic medical records and molecular profiles. It could also improve cancer screening by reducing false-positive results, which can lead to unnecessary investigations and increase healthcare costs.

**EXPAND SCOPE**

"We have to be more humble," he said, adding that reducing the time and complexity involved in clinical trials and regulatory processes could significantly lower the cost of developing new medicines.

Afeyan argued that AI could fundamentally change how scientists understand biology by helping them identify relationships that conventional research might miss. He said researchers had traditionally focused on understanding nature's intelligence but were now also trying to understand machine intelligence. AI could help scientists investigate complex biological systems, including the immune system and viruses.

He also challenged the assumption that scientific discoveries must be fully understood before they can be used, pointing out that the mechanisms of action of many existing medicines remain incompletely understood despite evidence of their effectiveness.

**CALLS FOR REGULATION**

Afeyan called for closer regulation of autonomous AI agents, warning that systems capable of adapting, acting independently and interacting with one another could create risks beyond those associated with conventional AI tools.

He distinguished between large language models, which provide capabilities, and AI agents, which can use those capabilities to pursue objectives and take actions.

"To me, LLMs are capability. Agents are intentionality," he said.

Drawing a parallel with pharmaceutical regulation following the thalidomide tragedy, Afeyan said companies commercialising AI agents should demonstrate their safety before deploying them beyond their own organisations. He also flagged risks from AI-enabled synthetic biology and new biomaterials, saying regulation must account for both deliberate misuse and unintended consequences.

Lila Ibrahim, Chief AI Readiness Officer at Google DeepMind, agreed that AI needed effective regulation and said the company had worked with policymakers and researchers on the ethics and risks of advanced AI systems.

Kiran Mazumdar-Shaw, Founder and Executive Chairperson, Biocon, said AI could accelerate drug innovation and improve affordability.

She also highlighted its potential to develop new approaches to diseases such as Alzheimer's and Parkinson's, where targeting individual points in biological pathways has yielded limited progress.

# ED seizes RPower assets of ₹2,032 crore under FEMA

**Our Bureau**
New Delhi

The Enforcement Directorate (ED) has seized assets worth ₹2,032.81 crore of Anil Ambani Group's (RAAG's) Reliance Power Ltd (RPL), including its bank balances and shareholding of Sasan Power Ltd, which is equivalent in value to the foreign exchange held outside India in contravention of Section 4 of the Foreign Exchange Management Act (FEMA), 1999.

The ED's Headquarter Investigation Unit carried out the seizure under Section 37A of the FEMA.

Investigation was initiated on the basis of information received from the Securities and Exchange Board of India (SEBI), pertaining to write-offs/provisions aggregating ₹2,101.46 crore made by RPL in its books of account, the ED said in a statement on Wednesday. These write-offs were related to overseas investments and advances made to companies in the British Virgin Islands (BVI) and the Cayman Islands.

Searches were conducted on the premises of the company under FEMA from March 6 to March 8. The agency claimed that incriminating evidence were seized and statements of several persons were recorded during the searches.

**PROBE FINDINGS**

Investigation had revealed that Reliance Natural Resources Ltd (since merged with RPL) raised $300 million through Foreign Currency Convertible Bonds in 2006. Of this, $275 million was invested in its wholly owned Singapore subsidiary, Reliance Natural Resources (Singapore) Pte Ltd (RNRL-S), said the ED.

RNRL-S placed these funds on deposit with Deutsche Bank (Suisse) SA, Geneva. The deposits were used as collateral for loans extended to entities incorporated in the British Virgin Islands. The agency stated that its probe found that these BVI entities were controlled and managed from India by the RAAG through front persons, who acted as per the Group's directions.

Further investigation revealed that the loan proceeds were utilised for varied purposes, including temporary round-tripping of funds to India through foreign entities based in Mauritius. The funds were utilised for the benefit of the RAAG and parked outside India.

The BVI entities failed to repay the loans extended by Deutsche Bank.

As part of the cover up, documents were fabricated to show that RNRL-S and Indonesian subsidiaries of RPL had made advances to these BVI entities for apparent genuine business purposes, the agency alleged. The investigators allegedly found out that this documentation was backdated and prepared in order to project these transactions as genuine business transactions.

Sakthi Finance

**E-mail** : investors@sakthifinance.com | **Website** : www.sakthifinance.com

**NOTICE TO THE SHAREHOLDERS**

**SPECIAL WINDOW : RE-LODGEMENT FOR TRANSFER AND DEMATERIALISATION OF PHYSICAL SECURITIES**

Securities and Exchange Board of India **("SEBI")** had dispensed with the transfer of physical shares from 1 April 2019. However, a special window was opened by SEBI from 7 July 2025 to 6 January 2026 for re-lodgement of physical share transfer requests originally submitted before 1 April 2019 but returned due to deficiencies in documentation.

In order to facilitate the Investors, the SEBI has, by its Circular No. HO/38/13/11(2)2026-MIRSD-POD/I/3750/2026 dated 30 January 2026, decided to open another special window for one year from 5 February 2026 to 4 February 2027. While lodging request under special window for transfer of physical shares, one of the mandatory requirements is submission of original share certificate, the details of which are given below :

| Execution date of transfer deed | Lodged for transfer before 1 April 2019 | Original Security Certificate Available? | Eligible to lodge in the current window? |
|---|---|---|---|
| Before 1 April 2019 | No (it is fresh lodgement) | Yes | ✓ |
| | Yes (It was rejected / returned earlier) | Yes | ✓ |
| | Yes | No | x |
| | No | No | x |

Further, the following cases will not be considered under this window:

- Cases involving disputes between transferor and transferee.
- Securities which have been transferred to Investor Education and Protection Fund **("IEPF")**.

**NOTE** : All shares re-lodged during this period will be processed through the transfer-cum-demat route i.e, they will only be issued in dematerialised **("demat")** form after transfer and it will be subject to a lock-in for one year.

Shareholders who have missed the earlier deadline for re-lodgement of transfer deeds are once again encouraged to take advantage of this opportunity by providing the necessary documents to the Company's Registrar and Share Transfer Agent **("RTA")**, MUFG Intime India Private Limited and in case of any clarification, shareholders concerned can get in touch with the Company / RTA at any of the addresses given below.

# Gem, jewellery exports up 9% on better demand

**Our Bureau**
Mumbai

Gem and jewellery exports rose 9 per cent year-on-year to $2.95 billion in September from $2.7 billion, supported by a revival in global demand.

In rupee terms, exports increased 18 per cent to ₹28,158 crore from ₹23,814 crore, aided by rupee depreciation, according to data from the Gem and Jewellery Export Promotion Council (GJEPC).

Cut and polished diamond exports declined 5 per cent to $1.29 billion, while gold jewellery shipments rose 34 per cent to $1.19 billion (₹11,369 crore).

**EXPORTS FELL**

Silver jewellery and coloured gemstone exports fell 12 per cent and 7 per cent to $134 million and $74.94 million, respectively.

Polished lab-grown diamond exports, however, grew 41 per cent to $151 million. Kirit Bhansali, Chairman of GJEPC, said the industry registered reasonable export growth despite an uncertain global trade environment.

The growth reflected improved market access under the India-UK trade agreement and lower US tariffs, alongside strong performance in key markets such as Hong Kong, Singapore and France, he said.

Higher export volumes, improving diamond prices and growth in rupee terms pointed to a gradual recovery in the cut and polished diamond segment, Bhansali added. Gem and jewellery exports rose 3 per cent to $14.30 billion (₹1.36 lakh crore) in the six months ended September, despite global uncertainties. Growth in studded gold jewellery, silver jewellery and polished lab-grown diamonds supported the sector.

# Rupee continues to surge, touches intra-day high of 94.75 against dollar

**OIL JITTERS.** G-Sec yields rise, tracking high crude prices amid Houthi attack on Saudi Arabian infrastructure

**Our Bureau**
Mumbai

**PULL BACK.** Importer demand at higher levels pulled down the currency, which closed 13 paise stronger

The rupee continued to gain ground against the dollar, strengthening below the 95 level at one point during trading on Wednesday and ending at a near one-month high.

Buoyed by the RBI's measures to curb speculation and contain volatility in the forex market, the Indian currency tested an intra-day high of 94.75 per US dollar.

However, importer demand at higher levels pulled down the currency, which closed 13 paise stronger at 95.15 per dollar against the previous close of 95.28.

Amit Pabari, MD, CR Forex Advisors, said the RBI's latest measures have given the rupee a strong boost.

**CURBING SPECULATION**

Referring to Finance Minister Nirmala Sitharaman's openness to discussing LTCG tax and STT, and RBI Governor Sanjay Malhotra's clarification that the central bank's curbs target speculation, not capital flows, Pabari said the government and the RBI seem to be moving in the same direction — supporting equity markets while providing the rupee with an additional source of strength.

Dilip Parmar, Senior Research Analyst, HDFC Securities, said that the rupee continued its upward trajectory, bolstered by central bank market intervention and the unwinding of long dollar positions.

**STRONG DEMAND**

"Nevertheless, strong importer demand capped gains over the course of the trading session. Market participants are treading cautiously ahead of crucial US inflation figures scheduled for release today. In the short term, spot dollar/rupee is expected to trade within a range, with key support at 94.7 and resistance near 95.5," he said.

Meanwhile, Government Securities yields rose, tracking pricey crude oil prices amid step up in attacks by Yemen-based Houthi rebels on Saudi Arabia's energy infrastructure.

Yield of the benchmark 10-year Government Security (6.94 per cent 2036 GS) rose to 7.41 per cent before closing at 7.4 per cent against the previous close of 7.39 per cent.

Nuvama, in a report, noted that the 10-year G-Sec traded in the range of 7.39-7.41 per cent ahead of the WPI data.

India's WPI inflation rose to 11.39 per cent year-on-year in September from 9.92 per cent in August, exceeding market expectations of 10.6 per cent, driven by higher prices of fuel & power, food articles, and manufactured products.

# Canara Bank profit rises 8.4 % to ₹5,175 cr in Q2

Scorecard *(in ₹ cr)*

| | Q2FY26 | Q2FY27 | % change |
|---|---|---|---|
| Net profit | 4,774 | 51,75 | 8.40 |
| Net interest income | 9,141 | 11,005 | 20.39 |
| NIM (%) | 2.5 | 2.55 | - |

**Our Bureau**
Bengaluru

Public sector lender Canara Bank posted an 8.4 per cent year-on-year rise in net profit to ₹5,175 crore for the second quarter of FY27, while operating profit grew 1.98 per cent to ₹8,758 crore.

The bank's global business grew 15.88 per cent y-o-y to ₹30.72 lakh crore as of September 30, 2026, driven by a 19.46 per cent increase in global advances to ₹13.75 lakh crore.

Global deposits rose 13.13 per cent to ₹16.97 lakh crore, while global advances rose faster, by 19.46 per cent to ₹13.75 lakh crore. Domestic deposits rose 10.97 per cent to ₹15.48 lakh crore, while domestic advances grew 16.95 per cent to ₹12.65 lakh crore. Domestic advances grew 16.95 per cent y-o-y to ₹12.65 lakh crore, while domestic deposits increased 10.97 per cent to ₹15.48 lakh crore.

The bank's retail lending portfolio expanded 31.61 per cent to ₹3.31 lakh crore.

Its housing loan portfolio grew 17.35 per cent to ₹1.35 lakh crore. Credit to the retail, agriculture and micro, small and medium enterprises (RAM) segment rose 21.03 per cent to ₹8.12 lakh crore.

Asset quality improved during the quarter.

Gross non-performing assets (GNPA) declined to 1.33 per cent as of September 2026, from 1.57 per cent in June 2026 and 2.35 per cent a year earlier.

The net NPA ratio fell to 0.30 per cent from 0.36 per cent in the previous quarter and 0.54 per cent in September 2025.

Credit cost stood at 0.47 per cent, while the slippage ratio was 0.58 per cent, improving by 21 basis points and 18 basis points, respectively, year-on-year.

**PRIORITY LENDING**

Canara Bank said it had exceeded regulatory targets for priority-sector lending, with such credit accounting for 44.99 per cent of adjusted net bank credit, against the mandated 40 per cent. Agricultural credit stood at 20.61 per cent, above the 18 per cent target.

# BoB to defend any suit brought by NMC's Shetty

**Our Bureau**
Mumbai

The bank said it is pursuing enforcement proceedings against Shetty in India and the UAE for outstanding dues

Bank of Baroda (BoB) on Wednesday said it will defend any suit brought in by B M Shetty, Founder of the NMC Healthcare group and UAE Exchange, and take all steps necessary to protect its interests.

NMC Healthcare Founder Shetty has filed a $15 billion (approximately ₹1.44 lakh crore) civil suit in the Bombay High Court against BoB and 25 other defendants, accusing the state-run lender of facilitating corporate fraud linked to the collapse of the NMC and UAE Exchange groups.

The public sector bank, in an exchange filing, said: "We wish to inform that Bank of Baroda has seen media reports of a suit said to have been filed by Bavaguthu Raghuram Shetty in the Bombay High Court on 13th October, 2026.

The bank has not been served with such a suit and cannot comment on the contents of pleadings which are untested in court. If and when the bank is served, the bank will defend the suit firmly and take all steps necessary to protect its interests."

BoB's Q1FY27 standalone net profit had dropped 72 per cent year-on-year to ₹1,278 crore against ₹4,541 crore on account of the impact of the one-off exceptional payment amounting to $600 million due to the settlement in respect of the collapsed UAE-based NMC Group.

Excluding the aforementioned impact of ₹5,680 crore, the public sector bank's net profit would have been ₹5,528 crore.

In response to queries sent by *businessline* regarding the $15 billion suit, the bank said it is itself pursuing recovery and enforcement proceedings against Shetty in India and the UAE for outstanding dues of around ₹2,800 crore and had obtained several decrees against him. The bank also noted that the Karnataka High Court had restrained Shetty from dealing with or alienating his assets in 2021.

**BANK'S DUES**

Further, in proceedings before the National Company Law Tribunal (NCLT), Shetty had asserted that he was insolvent and unable to meet the bank's dues.

The bank added that Shetty had previously filed a suit against it before the Supreme Court of the State of New York, raising allegations similar to those contained in the suit reportedly filed before the Bombay High Court.

According to the bank, the New York suit was dismissed in July 2024.

# India Inc may hike salary by 9.1% in 2027

**Meenakshi Verma Ambwani**
New Delhi

India Inc is expected to increase salaries by an average of 9.1 per cent in 2027, up from 9 per cent in 2026, according to the latest estimates released by Aon Inc, reflecting resilience in compensation budgets despite geopolitical uncertainties.

Non-banking financial companies are projected to lead salary growth in 2027 at 10.1 per cent, followed by energy at 9.9 per cent and real estate and infrastructure at 9.8 per cent.

Aon's Annual Salary Increase and Turnover Survey projects salaries in India, analysing data from more than 1,200 organisations across 45 industries.

**KEY SECTORS**

"Strong domestic consumption, sustained investment and export growth continue to support business confidence, allowing employers to invest in talent while maintaining cost discipline. Stable salary budgets are enabling a more targeted approach to pay. A modest rise in non-merit adjustments, particularly in manufacturing and technology, reflects greater focus on market alignment, scarce skills and critical talent. Employers are increasingly focused not only on how much they spend, but where that investment can deliver the greatest workforce and business value," said Roopank Chaudhary, Partner & Rewards Consulting Leader, Talent Solutions, India, Aon.

By industry, auto and vehicle manufacturing, engineering design services, and technology platform and products sectors are expected to hike salaries by 9.5 per cent, while life sciences and funds and asset management are expected to hike salaries by 9.6 per cent.

Meanwhile, global capability centres, wealth management and retail sectors are expected to give a 9.4 per cent hike in salaries.

Engineering and manufacturing sectors are expected to give hikes of 9.3 per cent, while the FMCG sector is expected to give a hike of 9.1 per cent. The banking sector is expected to give a hike of 8.5 per cent, the chemicals sector 8 per cent, and the life insurance sector 8.4 per cent. The technology consulting and services sector is expected to see a 6.6 per cent hike.

**ATTRITION RISES**

Overall attrition increased to 18 per cent in 2026, up from 16.2 per cent in 2025 and 17.1 per cent in 2024. The report added that the increase suggested competition for talent remains strong despite broadly stable salary budgets.

Alongside retention, employers are reshaping workforce strategies as AI becomes more deeply embedded in day-to-day work. "Established adoption of AI productivity tools rose from 46.1 per cent in 2025 to 56 per cent, with usage increasing across every job cluster measured. Around 60 per cent of employers are prioritising upskilling employees, while investment in agentic AI and demand for AI skills continue to grow," it added. "The next priority is translating that momentum into measurable productivity and growth. Employers that establish credible baselines, identify the capabilities that create differentiated value and align workforce investment accordingly will be best placed to realise AI's full potential," added Chaudhary.

Workforce priorities are evolving alongside the payroll implications of the wage code. While 65.4 per cent of employers are already compliant and another 20.9 per cent expect to be ready within six months, 42.8 per cent anticipate payroll cost increases of at least 1 per cent.

**EARLY ACTION**

"Progress on wage code readiness is encouraging, but compliance is only the first step. Employers need to assess the workforce and cost implications, align any changes to cost to the company with their rewards philosophy and communicate the transition clearly. Early action will help organisations maintain pay competitiveness and workforce trust. With wage code implementation, AI investment and changing skill requirements all shaping workforce costs, organisations will need to be increasingly deliberate about where they invest in talent," said Amit Kumar Otwani, Associate Partner, Talent Solutions, India, Aon.

# UK seeks easier access for its food exporters

**Aneesh Phadnis**
Mumbai

UK Secretary of State for Environment, Food and Rural Affairs Angela Eagle

The United Kingdom will continue to work with India for easing of non-tariff barriers to enable its food exporters reap full benefits of the Comprehensive Economic and Trade Agreement (CETA), Secretary of State for Environment, Food and Rural Affairs Angela Eagle said on Tuesday.

Eagle and two ministerial colleagues are leading a trade mission to India that also includes seven Mayors from North England.

The visit comes two months after India and the UK implemented the trade deal, reducing duties on various items.

While the UK is marketing its premium whiskies, cheese and salmon, its meat exporters have not been able to sell to India despite a reduction in tariffs. Eagle said there were certain non-tariff barriers which her government would discuss the Indian side.

"A whole lot of people want to export lamb but can't get through borders yet. We are talking to resolve it. These are practical things that you come across when you start doing business in a place you haven't done regularly before. There's goodwill there in both directions to try and get them sorted," Eagle told *businessline*.

On Monday, Eagle met Union Minister for Fisheries, Animal Husbandry and Dairying Rajiv Ranjan Singh to deepen cooperation. On Tuesday, she interacted with Maharashtra Chief Minister Devendra Fadnavis and also visited an outlet of British cookie brand Ben's Cookies.

**FORGE TRADE LINKS**

Eagle said the main aim of her visit and the trade mission is to forge relations among business communities from both sides.

"From a food and drink point of view, it is important that we ensure that our producers can actually make good use of free trade agreement," she said.

While it is still early days, British businesses are taking advantage. "If you look at where we are now, Ben's Cookies has imported 70 tonnes of cookie dough since May," she said.

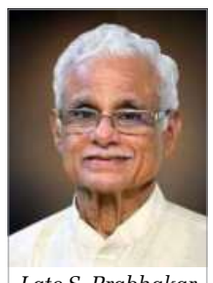
# A legacy of quality, taste, and innovation since 1975



*Late S. Prabhakar Kamath (Founder)*

*S. Mukund Kamath (Chairman & MD)*

Ideal Ice Cream is one of India's most respected ice cream brands, known for its uncompromising standards and consistently delightful taste. What began in 1975 as a modest ice cream parlour in Mangalore has today grown into a professionally managed private limited company — Ideal Icecream Private Limited (IIPL) — earning a distinctive place in India's ice cream industry.

Guided by the founding belief that ice cream should be treated as food, not merely as a dessert, IIPL continues to set uncompromising standards for ingredient selection, manufacturing, and purposeful innovation — while extending its reach across Karnataka, North Kerala, Goa, and now Maharashtra, through a network of 13,000+ retail outlets.

**How It All Began**

In the early 1970s, Late S. Prabhakar Kamath, fondly known as Ideal Pabba Maam, envisioned a business that could thrive year-round without compromising on quality. With no formal training but immense determination, he spent months mastering the craft of ice cream making through relentless experimentation.

On May 1, 1975, that vision became reality with the opening of the first Ideal Ice Cream parlour at Market Road, Mangalore.

Offering just 14 carefully crafted flavours, it quickly earned a reputation for exceptional quality and taste, laying the foundation for a trusted brand.

**The Rise of a Legend**

Within two years, Ideal Ice Cream had become a benchmark for quality, drawing long queues and loyal customers from across the region. Its success was built on a simple but uncompromising philosophy: ice cream should be treated as food.

This commitment to quality, innovation, and consistency transformed Ideal from a neighbourhood parlour into a respected brand. More than five decades later, that founding philosophy continues to shape every product, every process, and every milestone in the company's journey.

**A Professional Structure for Sustainable Growth**

As the business evolved, Ideal Ice Cream strengthened its foundations with a professional governance framework, while preserving the values that built its reputation.

Transitioned from a proprietorship to Ideal Ice Cream Private Limited, reflecting a commitment to professional management and transparent governance.

Established a robust operational structure with clearly defined responsibilities, while maintaining a unified brand identity and uncompromising quality standards.

Centralized manufacturing and research & development under IIPL, ensuring rigorous oversight of quality, innovation, and product excellence.

Today, IIPL combines the legacy of a heritage brand with the discipline and agility of a modern enterprise — driven by the same principles of authenticity, quality, and continuous refinement.

**Carrying Forward the Founder's Legacy**

Late S. Prabhakar Kamath built Ideal Ice Cream on a simple belief: quality is non-negotiable, and customer trust must be earned every day. That philosophy remains the cornerstone of the company.

Today, S. Mukund Kamath, Chairman and Managing Director and Chief Research Officer, continues this legacy by leading both the strategic direction and product innovation of the company. His hands-on involvement in research, product development, and quality ensures that every offering upholds the standards established by the founder.

More than five decades later, the spirit of Ideal Pabba Maam continues to inspire the company—championing integrity over shortcuts, refinement over compromise, and excellence in everything we do.

**Our Philosophy**

At Ideal Ice Cream, quality is not merely a process it is a culture.

Every product undergoes a rigorous cycle of research, testing, and refinement before reaching the market. From ingredient selection to texture, flavour balance, and consistency, every detail matters. Only products that meet the brand's exacting standards earn the Ideal name.

Customer delight remains the central focus, inspiring every aspect of manufacturing, innovation, and distribution.

**Our Vision**

To delight consumers across India with premium ice cream that combines exceptional quality, distinctive flavours, and a perfect balance of tradition and innovation.

**Our Mission**

To craft premium ice cream through meticulous research, carefully selected ingredients, and uncompromising quality — while growing responsibly and preserving our heritage.

# KARNATAKA BANK - From a Small Beginning to a Pan-India Banking Legacy

A century ago, banking meant a simple promise—standing beside the farmer, the small trader and the local vendor when they needed it most. Today, that same promise has grown into a pan-India banking institution serving individuals, MSMEs, businesses and large corporate customers.

The journey of Karnataka Bank is a story of transformation, resilience and an enduring relationship with customers. What began with a strong regional connect and a focus on serving agriculturists, small vendors, traders and local communities has, over the past 100 years, evolved into a banking institution with a growing presence across India.

For Karnataka Bank, growth has always been closely linked to the growth of its customers. In its early years, the Bank played an important role in supporting the financial needs of farmers, small traders and entrepreneurs. These customers formed the foundation of a relationship-driven banking model, where trust, personal connect and an understanding of local needs were central to the banking experience.

As the Indian economy expanded and business needs became increasingly diverse, Karnataka Bank evolved alongside its customers. Its customer base gradually expanded from agriculturists and small businesses to include MSMEs, entrepreneurs, emerging enterprises and large corporate customers. The Bank's ability to serve customers across different segments reflects its continuous evolution and its commitment to providing relevant financial solutions at every stage of a customer's journey.

*Raghavendra S Bhat, MD & CEO*

The geographical footprint of the Bank has also expanded significantly over the years. From its beginnings in a relatively small region, Karnataka Bank has progressively extended its presence across the country, bringing its banking services to customers in different markets and communities. This journey from a regional institution to a pan-India banking partner represents a significant transformation while retaining the relationship-oriented approach that has been part of its identity.

At the same time, the banking industry itself has undergone a fundamental transformation. Technology has changed the way customers interact with their banks, access financial services and manage their businesses. Karnataka Bank has embraced this transformation by making technology and digital banking an important part of its growth journey.

The Bank has progressively strengthened its digital capabilities through technology-enabled products, digital channels and innovative banking solutions. Digital banking has helped make financial services more accessible, convenient and efficient, allowing customers to undertake banking transactions with greater ease and speed. The increasing use of technology has also enabled the Bank to respond to the changing expectations of a new generation of customers who seek banking services that are available anytime and anywhere.

Digital transformation has not been limited to customer-facing services. Technology is also playing an important role in strengthening internal processes, improving operational efficiency and enabling faster delivery of financial solutions. Data-driven approaches, digital lending capabilities and technology-enabled processes are helping create a more agile banking environment.

For MSMEs and corporate customers in particular, the evolution of technology has opened new possibilities. Businesses today require banking partners who can understand their changing requirements and provide solutions with speed, efficiency and convenience. Karnataka Bank's digital initiatives complement its traditional relationship-based approach, enabling the Bank to combine personal understanding with technology-driven service delivery.

The Bank's centenary journey is therefore not merely a celebration of longevity. It is a celebration of relationships built over generations and the ability to evolve with a changing India. The same institution that once stood beside agriculturists, small vendors and local entrepreneurs has grown to serve businesses and corporate customers across the country.

What has remained constant through this transformation is the importance of trust. Technology may change the way banking is delivered, but the relationship between a bank and its customers continues to be built on confidence, reliability and understanding. Karnataka Bank's journey demonstrates how traditional values and modern capabilities can come together to create a banking institution that is relevant to both its heritage and its future.

As the Bank looks ahead, the focus is on building upon this strong foundation and embracing new opportunities presented by technology, innovation and changing customer expectations. The journey ahead will continue to be shaped by digital transformation, customer-centric solutions and the ability to serve an increasingly diverse and dynamic economy.

From the agriculturist and small vendor of its early years to the entrepreneur, MSME and corporate customer of today, Karnataka Bank's journey is one of continuous evolution—rooted in a century of trust, strengthened by technology and driven by a vision for the future. It is a journey that reflects not only how the Bank has grown, but also how it has grown with India.

...continued from previous page.

3. **End-Industry Dependence Risk:** We are dependent on the performance of the industries our customers operate in, including renewables, artificial intelligence infrastructure, oil & gas, consumer electronics, and defence & aerospace industries. Demand for our products across all three verticals is particularly sensitive to changes in government policies affecting the underlying end industries, including policies related to energy transition, fiscal incentives, domestic manufacturing and trade policies. Any adverse changes in such policies could have an adverse effect on our business, financial condition, cash flows and results of operations.

**Represents figures from continuing operations.*

8. **Product Quality and Liability Risk:** We are subject to strict performance and quality requirements. Defects, perceived defects or failures to meet customer specifications, whether attributable to us or our suppliers, could result in order cancellations, recalls, liability and reputational harm.
9. **Global Manufacturing Footprint Risk:** As of June 30, 2026 we operated 26 own manufacturing facilities across India, Spain, the USA and Germany. Any adverse changes in economic or regulatory conditions affecting our supply chains in these jurisdictions could negatively affect our results of operations.
10. **Customer Order Visibility Risk:** We do not have firm, long-term purchase commitments with many of our customers. Our purchase orders are typically short-term and may be amended, rescheduled or cancelled, and customer forecasts are non-binding. Any order reductions, cancellations or delays may adversely affect our revenue visibility, capacity utilisation and margins.
11. **Offer Related Risk:** The Offer also consists of an offer for sale aggregating up to ₹ 21,823.28 million (approximately 43.54% of the Offer Size at upper end of the Price Band), the proceeds of which will not be available to our Company.
12. Our Company proposes to utilise an estimated amount of ₹21,600 million from the Net Proceeds towards repayment/ prepayment, in part or full, of all or a portion of certain borrowings availed by our Company and investing in certain of our Subsidiaries, in order to repay/ prepay in full or in part, certain or all of the borrowings availed by these Subsidiaries. Considering that the Net Proceeds will be utilised towards repayment of borrowings of our Subsidiaries, namely (i) Sharp Tanks and Structurals Private Limited; (ii) Terra91 International Private Limited; (iii) Smile Electronics Limited; (iv) Kryfs Power Components Limited; (v) Kryfs Transformers Private Limited; (vi) Unimacts Global LLC; (vii) Zetwerk Manufacturing SG Pte. Ltd.; (viii) Zap91 Solar India Private Limited; and (ix) Zet Town India Private Limited ("**Specified Subsidiaries**"), our Company shall deploy the Net Proceeds, to the extent of ₹8,600 million, for this Object in the form of debt investments, which involve extending inter-corporate loans to the Specified Subsidiaries. In relation to such inter-corporate loans, the key terms include interest rates up to 12% per annum subject to applicable annual arms' length benchmarking, a tenure of up to five years, being unsecured in nature, and do not include any prepayment charges.
13. Our diluted EPS for Fiscal 2026 is ₹(6.69); accordingly, the Price/Earning (P/E) ratio is not ascertainable. The market capitalisation to revenue from operations ratio for Fiscal 2026 at the upper end of the Price Band is 1.61 times. There are no listed companies in India or globally which operate in a similar business model as ours.
14. Weighted Average Return on Net Worth for Fiscals 2026, 2025 and 2024 is (15.64)%.
15. **The weighted average cost of acquisition per Equity Share by the Selling Shareholders as on the date of the Red Herring Prospectus is as follows and upper end of the Price Band is ₹ 151 per Equity Share:**

## THE EQUITY SHARES OF OUR COMPANY WILL GET LISTED ON MAIN BOARD PLATFORM OF BSE AND NSE

In case of any revision in the Price Band, the Bid/ Offer Period will be extended for at least three additional Working Days after such revision in the Price Band, subject to the Bid/ Offer Period not exceeding 10 Working Days. In cases of *force majeure*, banking strike or similar unforeseen circumstances, our Company may, in consultation with the BRLMs, for reasons to be recorded in writing, extend the Bid/ Offer Period for a minimum of one Working Day, subject to the Bid/ Offer Period not exceeding 10 Working Days. Any revision in the Price Band and the revised Bid/ Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges, by issuing a public notice, and also by indicating the change on the respective websites of the BRLMs and at the terminals of the Syndicate Members and by intimation to the Self-Certified Syndicate Banks ("**SCSBs**"), other Designated Intermediaries and the Sponsor Bank(s), as applicable.

This is an Offer in terms of Rule 19(2)(b) of the SCRR read with Regulation 31 of the SEBI ICDR Regulations. This Offer is being made through the Book Building Process in compliance with Regulation 6(2) of the SEBI ICDR Regulations wherein in terms of Regulation 32(2) of the SEBI ICDR Regulations not less than 75% of the Net Offer shall be available for allocation on a proportionate basis to Qualified Institutional Buyers ("**QIBs**" and such portion the "**QIB Portion**") provided that our Company in consultation with the BRLMs, have allocated up to 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations ("**Anchor Investor Portion**"), of which 40% of the Anchor Investor Portion within the 60% of allocation of the QIB Portion to Anchor Investors, was reserved in the following manner: (i) 33.33% was reserved for domestic Mutual Funds, and (ii) 6.67% was reserved for Life Insurance Companies and Pension Funds. In the event of under-subscription in the reserved category for Life Insurance Companies and Pension Funds, the balance Equity Shares was allocated to domestic Mutual Funds. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the QIB Portion (excluding the Anchor Investor Portion) ("**Net QIB Portion**"). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIBs (other than Anchor Investors) including Mutual Funds, subject to valid Bids being received at or above the Offer Price. However, if the aggregate demand from Mutual Funds is less than 5% of the Net QIB Portion, the balance Equity Shares available for allocation in the Mutual Fund Portion will be added to the remaining QIB Portion for proportionate allocation to QIBs. Further, not more than 15% of the Net Offer shall be available for allocation to Non-Institutional Bidders ("**NIBs**") of which (a) one- third portion shall be reserved for Bidders with application size of more than ₹0.20 million and up to ₹1.00 million; and (b) two-thirds of the portion shall be reserved for Bidders with application size of more than ₹1.00 million, provided that the unsubscribed portion in either of such sub-categories may be allocated to Bidders in other sub-category of the NIBs in accordance with SEBI ICDR Regulations and not more than 10% of the Net Offer shall be available for allocation to Retail Individual Bidders ("**RIBs**") in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. Further, Equity Shares will be allocated on a proportionate basis to Eligible Employees applying under the Employee Reservation Portion, subject to valid Bids being received from them at or above the Offer Price (net of employee discount). All potential Bidders (except Anchor Investors) are required to mandatorily utilise the Application Supported by Blocked Amount ("**ASBA**") process by providing details of their respective ASBA accounts and UPI ID (in case of UPI Bidders using the UPI Mechanism), in which case the corresponding Bid Amounts will be blocked by the SCSBs or under the UPI Mechanism, as applicable to participate in the Net Offer. Anchor Investors are not permitted to participate in the Anchor Investor Portion of the Net Offer through the ASBA process. For details, see ***"Offer Procedure"*** on page 663 of the RHP.

**Bidders/ Applicants should ensure that DP ID, PAN, Client ID and UPI ID (for UPI Bidders bidding through the UPI Mechanism) are correctly filled in the Bid cum Application Form. The DP ID, PAN and Client ID provided in the Bid cum Application Form should match with the DP ID, PAN, Client ID available in the Depository database, otherwise, the Bid cum Application Form is liable to be rejected. Bidders/ Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPI ID (for UPI Bidders bidding through the UPI Mechanism) as provided in the Bid cum Application Form, the Bidder/Applicant may be deemed to have authorised the Depositories to provide to the Registrar to the Offer, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These Demographic Details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders'/Applicants' sole risk. Investors must ensure that their PAN is linked with Aadhaar and are in compliance with CBDT notification dated February 13, 2020 and press release dated June 25, 2021, read with press release dated September 17, 2021 and CBDT circular no.7 of 2022, dated March 30, 2022 read with press release dated March 28, 2023 and any subsequent press releases in this regard.**

**Contents of the Memorandum of Association of our Company as regards its objects:** For information on the main objects of our Company, please see the section "***History and Certain Corporate Matters***" on page 362 of the RHP. The Memorandum of Association of our Company is a material document for inspection in relation to the Offer. For further details, please see the section titled "***Material Contracts and Documents for Inspection***" on page 719 of the RHP.

**Liability of the members of our Company:** Limited by shares

**Amount of share capital of our Company and Capital structure:** As on the date of the RHP, the authorised share capital of our Company is ₹ 47,403,412,496 divided into 45,605,618,966 Equity Shares of face value of ₹1 each, ₹ 487,050 divided into 48,705 Series A CCPS of face value of ₹10 each, ₹ 643,460 divided into 64,346 Series A1 CCPS of face value of ₹10 each, ₹ 731,270 divided into 73,127 Series B CCPS of face value of ₹10 each, ₹ 445,660 divided into 44,566 Series C CCPS of face value of ₹10 each, ₹ 845,220 divided into 84,522 Series D CCPS of face value of ₹10 each, ₹ 449,630 divided into 44,963 Series E CCPS of face value of ₹10 each, ₹ 421,300 divided into 42,130 Series F CCPS of face value of ₹10 each, ₹ 13,460,000 divided into 1,346,000 Series F1 CCPS of face value of ₹10 each, ₹ 278,109,170 divided into 27,810,917 Series F2 CCPS of face value of ₹10 each, ₹ 1,502,200,770 divided into 150,220,077 Series F3 CCPS of face value of ₹10 each. The issued, subscribed and paid-up share capital of our Company is ₹ 1,506,772,659 divided into 1,506,772,659 Equity shares of face value ₹1 each. For details, please see the section titled ***"Capital Structure"*** on page 123 of the RHP.

**Names of signatories to the Memorandum of Association of our Company and the number of Equity Shares subscribed by them:** The names of the initial signatories of the Memorandum of Association of our Company are: Balaraman Ramakkrushnan and Srinath Ramakkrushnan. For details of the share capital history of our Company, please see the section titled ***"Capital Structure"*** beginning on page 123 of the RHP.

**Listing:** The Equity Shares offered through the Red Herring Prospectus are proposed to be listed on the Stock Exchanges. Our Company has received 'in-principle' approvals from BSE and NSE for the listing of the Equity Shares pursuant to their letters each dated June 8, 2026. For the purposes of the Offer, the Designated Stock Exchange shall be NSE. A signed copy of the Red Herring Prospectus has been delivered to the RoC in accordance with Section 32 of the Companies Act, 2013, and the Prospectus shall be filed with the RoC in accordance with Section 26(4) of the Companies Act, 2013. For details of the material contracts and documents available for inspection from the date of the Red Herring Prospectus up to the Bid/ Offer Closing Date, see ***"Material Contracts and Documents for Inspection"*** on page 719 of the RHP

**Disclaimer Clause of the Securities and Exchange Board of India ("SEBI"):** SEBI only gives its observations on the Offer documents and this does not constitute approval of either the Offer or the specified securities or the RHP. The investors are advised to refer to page 629 of the RHP for the full text of the disclaimer clause of SEBI.

**Disclaimer Clause of NSE (Designated Stock Exchange):** It is to be distinctly understood that the permission given by NSE should not in any way be deemed or construed that the Offer Document has been cleared or approved by NSE nor does it certify the correctness or completeness of any of the contents of the Offer Document. The investors are advised to refer to page 635 of the RHP for the full text of the Disclaimer Clause of NSE.

**Disclaimer Clause of BSE:** It is to be distinctly understood that the permission given by BSE Limited should not in any way be deemed or construed that the Red Herring Prospectus has been cleared or approved by BSE Limited nor does it certify the correctness or completeness of any of the contents of the Red Herring Prospectus. The investors are advised to refer to page 635 of the RHP for the full text of the Disclaimer Clause of BSE.

**General Risk:** Investments in equity and equity-related securities involve a degree of risk and Bidders should not invest any funds in the Offer unless they can afford to take the risk of losing their entire investment. Bidders are advised to read the risk factors carefully before taking an investment decision in the Offer. For taking an investment decision, Bidders must rely on their own examination of our Company and the Offer, including the risks involved. The Equity Shares in the Offer have not been recommended or approved by SEBI, nor does SEBI guarantee the accuracy or adequacy of the contents of the Red Herring Prospectus. Specific attention of the Bidders is invited to ***"Risk Factors"*** on page 28 of the RHP.

For **ZETWERK MANUFACTURING BUSINESSES LIMITED**
*(formerly known as Zetwerk Manufacturing Businesses Private Limited)*
On behalf of the Board of Directors
Sd/-
**Mania Sarkar**
Company Secretary and Compliance Officer

**Place:** Bengaluru, Karnataka
**Date:** October 14, 2026

**ZETWERK MANUFACTURING BUSINESSES LIMITED** *(formerly known as Zetwerk Manufacturing Businesses Private Limited)* is proposing, subject to applicable statutory and regulatory requirements, receipt of requisite approvals, market conditions and other considerations, to make an initial public offering of its Equity Shares and has filed the RHP with SEBI, RoC, Bengaluru at Karnataka and the Stock Exchanges on October 11, 2026. The RHP shall be available on the website of SEBI at www.sebi.gov.in, and is available on the websites of the Stock Exchanges i.e. BSE and NSE at www.bseindia.com and www.nseindia.com, respectively, on the website of our Company at www.zetwerk.com and the websites of the BRLMs, i.e., Kotak Mahindra Capital Company Limited, Morgan Stanley India Company Private Limited, Goldman Sachs (India) Securities Private Limited, Avendus Capital Private Limited, JM Financial Limited, HSBC Securities and Capital Markets (India) Private Limited and Pantomath Capital Advisors Private Limited at https://investmentbank.kotak.com, www.morganstanley.com/india, www.goldmansachs.com, https://www.avendus.com, www.jmfl.com, www.business.hsbc.co.in and www.pantomathcapital.com, respectively. Any potential investors should note that investment in equity shares involves a high degree of risk and for details relating to such risk, see ***"Risk Factors"*** beginning on page 28 of the RHP. Potential investors should not rely on the UDRHP- I filed with SEBI and the Stock Exchanges, and should instead rely on their own examination of our Company and the Offer, including the risks involved, for making any investment decision.

This announcement does not constitute an invitation or offer of securities for sale in any jurisdiction. The Equity Shares have not been and will not be registered under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**") or any other applicable law of the United States and may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are only being offered and sold (a) to persons in the United States that are reasonably believed to be "qualified institutional buyers" (as defined in Rule 144A under the U.S. Securities Act) in transactions exempt from or not subject to the registration requirements of the U.S. Securities Act; or (b) outside the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdictions where those offers and sales occur. There will be no public offering of the Equity Shares in the United States.

## QUICKLY.

### L&T, TuTr Hyperloop in advanced mobility pact

**Chennai**: Larsen & Toubro (L&T) has signed a memorandum of understanding (MoU) with TuTr Hyperloop, an IIT Madras-incubated deep-tech mobility start-up, to explore opportunities in the development and deployment of next-generation mobility technologies and infrastructure in India.
The two organisations will jointly assess opportunities across a range of infrastructure and technology domains, including Linear Induction Motor-based propulsion systems, vacuum tube infrastructure, pressure management systems, civil and structural works, electrical infrastructure, signalling, telecommunications and systems integration. OUR BUREAU

### Bank of America profit hurt by $1.2 billion

Bank of America's profit fell in the third quarter as it set aside $1.2 billion to cover fines by US regulators over widespread failures to detect potential money laundering and other illicit activity. Shares of the Charlotte, North Carolina-based bank fell 4 per cent in premarket trading. The stock has slipped 1.9 per cent this year through last close. The fine, unveiled on the eve of BofA's third-quarter earnings, stems from the second-largest US bank's failure to report over $5 billion in suspicious activity to the US government. The bank had last month projected quarterly sales and trading revenue to be relatively flat compared to last year. REUTERS

# India's trade deficit with China crosses $100 billion in 2026

**WIDENING IMBALANCE.** Indian exports to China registered a robust 40.7 per cent, reaching last year's total

**Ananth Krishnan**
Beijing

India's exports to China grew 40 per cent in the first three quarters to $20 billion, although the trade deficit with China has continued to widen, already crossing $100 billion this year, according to data released on Wednesday by China's General Administration of Customs (GAC).

Two-way trade between January and September was up 25.4 per cent to $144.45 billion, while India's imports from China continued to rise, up 23.3 per cent to $125.19 billion.

Indian exports to China registered a robust 40.7 per cent growth, albeit from a much smaller base, to $19.26 billion after the first three quarters, already reaching last year's total.

**TRADE DEFICIT**

The trade deficit stood at $105.93 billion and is on track to surpass last year's record figure.

The widening imbalance has remained a source of concern for New Delhi, with the deficit figuring in last month's talks between Prime Minister Narendra Modi and Chinese President Xi Jinping on the sidelines of the BRICS summit. In 2025, the trade deficit grew to $116.12 billion and is set to be surpassed yet again this year.

Exports to China have, however, shown some promise, up by 40.7 per cent. India's major exports to China this year have included seafood products, naphtha, and printed circuit boards, which until recently India was buying in bulk from the neighbouring country.

**MAJOR EXPORTS.** India exported seafood products, naphtha, and printed circuit boards to China, which until recently India was buying in bulk from the neighbouring country

Indian officials say while there is no expectation for trade to be perfectly balanced, the broader concern is the heavily lop-sided trade relationship, a lack of market access for Indian firms, and the nature of India's imports.

While India requires large amounts of intermediates from China for manufacturing, the continued reliance on finished goods, including large quantities of electronics and machinery, remains a concern.

**EXPORT CONTROL**

India is also concerned by Chinese export controls in an increasing number of sectors, from fertilizers to rare earths.

At last month's meeting in New Delhi, both leaders "underlined the need to address each other's concerns, including structural trade imbalance and supply chain issues, and facilitation of meaningful and predictable market access", a statement from the Ministry of External Affairs said.

Both leaders also "took note of the progress in people-to-people ties and underscored the need to further promote cultural exchanges, business linkages and greater mobility between the two countries", the statement said, following the normalisation in relations since the October 2024 meeting between the two leaders.

A statement from China's Foreign Ministry after the meeting said the "two sides should also address each other's economic and trade concerns in a balanced way and promote the sound and steady development of economic and trade relations".

# CBI arrests Munitions India official, SMPP CEO over defence contract leak

**Our Bureau**
New Delhi

The Central Bureau of Investigation (CBI) has arrested Anil Kumar, Executive Director of Munition India Ltd (MIL), his brother B Harshavardhan and SMPP CEO Ashish Kansal on charges of leaking sensitive information about a defence contract worth ₹500 crore to a private company.

The CBI registered an FIR on October 12 against Kumar, alleging that while posted at MIL, Pune, as Executive Director, he, in connivance with certain private contractors/ vendors, allegedly demanded and accepted bribes in exchange for sharing official favours.

During searches at the accused public servant's premises in Pune, a CBI spokesperson said it recovered ₹1.73 crore in cash. Further, the CBI said it conducted searches at the premises of the accused in Mysuru, Bengaluru and Delhi and recovered about ₹50 lakh in cash and incriminating documents.

Kumar is an executive director (Level-14) at Munitions India Limited, Pune, while Kansal is the CEO and director-promoter of SMPP Limited, an ammunition manufacturing firm. Kumar is reportedly in police custody.

The accused will be produced before a magistrate so that the CBI can take them for custodial interrogation.

SMPP did not immediately react to the developments.

**CBI ALLEGATION**

"Such unauthorised disclosure has the potential to compromise the nation's strategic and security interests, undermine the integrity of defence-related processes, and pose serious risks to national security and public safety," the CBI alleged in the FIR.

Kumar is accused of routing and parking much of the illicit proceeds through his wife, his brother, and other relatives to conceal the ill-gotten money.

The wife and brother are accused of abetting the offence by helping hide and retain the money, it added.

**SMPP CONTROVERSY**

SMPP was also involved in a controversy in the past. In 2019, SMPP Ltd was accused of changing the bulletproof jacket material to Chinese materials after the testing and bidding phase of a ₹639-crore contract awarded by the Indian Army.

At the bidding phase, SMPP presented jackets built with raw materials sourced from Western nations across Europe and the United States.

However, once it secured the contract, the company was accused of switching to materials sourced from China.

Following the controversy, Kansal said the vests' overall quality remained uncompromised.

According to Kansal, the move effectively cut out Western middlemen, who often sourced from those same Chinese factories, and competing bids in the tender process also relied on Chinese materials.

# Steel prices surge for third straight month in Oct

**Suresh P Iyengar**
Mumbai

Steel companies have increased prices for the third consecutive by ₹2,000-2,700 a tonne in October on the back of buoyant demand and spike in raw material cost.

The ongoing geo-political uncertainty has pushed up cost on key imported raw materials including coking and thermal coal, ferro-alloys besides the rise in shipping cost, said senior steel company official.

This apart, the jump in domestic fuel and power cost has also led to cost push, he added. Hot rolled coil prices are up to ₹64,700 per tonne against ₹62,000 logged in September, according to data sourced from BigMint, an online market intelligence platform.

Despite broader macroeconomic inflation concerns, domestic steel demand remains resilient, supported by government-led infrastructure spending and urban real estate activity. India continues to outpace major global markets with steel consumption projected to grow by nearly 7.9 per cent.

**PRICE-SENSITIVE**

While price-sensitive retail segments may face short-term volume deferrals, institutional and infrastructure-heavy demand shows little sign of slowing down significantly.

Bhavik Bhagwanji Shah, Analyst (metals & mining), Choice Institutional Equities, said the steady rise in steel prices was driven by surging global coking coal costs, iron ore supply tightness and firming energy expenses.

On the domestic front, post-monsoon restocking and steady industrial consumption are providing manufacturers the pricing power to pass on these elevated input costs, he said. With key inputs such as coking coal and iron ore prices expected to remain firm or trend higher in the near term due to supply-side bottlenecks and geopolitical logistics pressures.

As long as input costs remain elevated, steel mills will maintain defensive pricing floors.

**SUPPLY CONSTRAINS**

Antu Eapen Thomas, Senior Research Analyst, Geojit Investments, said besides raw material rise, supply side constrains due to maintenance shutdowns at some mills have tightened near-term availability, while imports have become less competitive due to the safeguard duty and rupee weakness.

Higher inflation and rising interest rates could slow demand in sectors like housing and automobiles. This may slowdown pace of price hikes in near future, though demand should stay healthy,

Rajesh Singla, CEO and Fund Manager, Alpha AMC, said prices have already climbed by roughly ₹4,000 a tonne to a four-year high, with hot-rolled coil hovering about ₹64,000 a tonne.

Two things are driving this. Nearly 40 per cent of premium coking coal imported from Australia was priced much higher than last year's level and this has forced steel mills to pass on the cost, he added.

# Intex weighs fundraising and IPO plans as festival sales fuel expansion

**Amit Vijay Mohile**
Mumbai

Intex Technologies, which reported revenue of about ₹460 crore in FY26, is targeting more than ₹800 crore in FY27 and ₹1,500 crore by FY28. The management is weighing its future fundraise potential stock-market listing, as the Indian mass premium electronics maker is betting on festival sales, manufacturing expansion and digital distribution to sustain growth of 70-80 per cent despite rising input costs.

Keshav Bansal, Director, Intex Technologies, told *businessline* that the company remains cash-flow positive and has no immediate need for external capital.

"We are cash-flow positive, but as we scale our business, strengthen our direct-to-consumer (D2C) presence and expand into newer product categories, we will look to raise funds in the near future, followed by a potential IPO in the next 12-24 months," he said.

Keshav Bansal, Founder, Intex

Intex, previously known for mobile phones, now offers smart televisions, air conditioners, washing machines, refrigerators, fans, water heaters, and smaller kitchen appliances.

Revenue grew about 80 per cent last year and 70 per cent during April-September FY27, against low single-digit industry growth.

The company is targeting price-conscious households upgrading to higher-capacity appliances. by preserving a 15–20 per cent price advantage over leading competitors as consumers increasingly use financing schemes to upgrade. "The customer is moving towards premium, but he's still in the mass category," Bansal said.

**EXPANSION PLAN**

Intex's expansion plans include manufacturing investment at Kundli, 50 proposed Smart World stores and a wider product portfolio. Bansal said the company's ₹150-crore capex guidance remains unchanged.

Its established network of more than 500 distributors and 25,000 dealers reaches approximately 18,000 PIN codes.

Around 90 per cent of sales remain offline, while Intex aims to increase online sales to 15-20 per cent by FY28. Intex is discussing smart TV and air-conditioner listings with quick-commerce platforms. "Handling FMCG, fashion or grocery products is very different from a consumer-electronics product, given the size, scale, sensitivity and fragility of the product," he said.

The company is decentralising fulfilment through regional warehouses in Ahmedabad, Jaipur, Vijayawada, Coimbatore and Kolkata. It expects around 18 hubs by December, supporting more than 1,500 SKUs and one-to-two-day deliveries.

"Intex was known for its strong distribution, and we still are. But somehow the distribution gap has been plugged," Bansal said. Having hired more than 1,000 employees in six months, Intex is building manufacturing, retail and digital capabilities ahead of its proposed capital-market entry.

# Aegis Logistics to acquire 89.8% stake in Tristar for ₹7,700 crore

**Our Bureau**
Ahmedabad

Aegis Logistics Ltd has signed a definitive agreement to acquire an 89.8 per cent stake in Dubai-based Tristar Holdings Ltd for an equity consideration of $809 million (around ₹7,700 crore), marking a major step to expand beyond India and build an international energy logistics platform.

The acquisition will be undertaken through Aegis Logistics International Pte Ltd, the firm's wholly owned step-down subsidiary. The consideration includes contingent payments and interest on deferred consideration, Aegis said in a regulatory filing.

Tristar is an integrated liquid logistics solutions provider with operations in more than 30 countries.

The transaction is expected to be completed in the fourth quarter of FY27.

# HDB Financial Services' Q2 PAT up 34.5% to ₹780 crore

**Ashokamithran T**
Mumbai

HDB Financial Services net profit improved 34.2 per cent to ₹780 crore in the quarter-ended September 30, 2026 against ₹581 crore in the corresponding quarter of fiscal 2026.

The increase is largely attributed to a 15.6 per cent increase in the net interest income to ₹2,534 crore in the reporting quarter, compared with ₹2,192 crore in the corresponding period last fiscal.

On a quarter on quarter basis, the NII growth was moderate at just one per cent.

**LOAN BOOK GROWTH**

The non-banking finance corporation's net interest margin (NIM) improved annually but dipped sequentially. The NIM came in at 8.23 per cent — up 28 basis point from 7.95 per cent in second quarter of last fiscal.

Sequentially, it dipped 12 basis points from 8.35 per cent. The company increased its loan book by nearly 11.7 per cent to ₹1.24 lakh crore in the reporting quarter against ₹1.11 lakh crore in the year-ago period.

The low-risk stage one loans increased 12.4 per cent to ₹1.18 lakh crore.

**STAGE 2 LOANS**

The stage 2 loans, which are underperforming moderately risky lending, increased three per cent to ₹2,571 crore in the reporting quarter, but was up over 12 per cent sequentially.

The bank's asset quality improved as, the share of gross advances in Stage 3 NPA reduced to 2.43 per cent in the second quarter of fiscal 2027 against 2.81 per cent in the year-ago period.

Sequentially though, the asset quality worsened as the GNPA increased from 2.34 per cent. In the board meeting, HDB's directors declared an interim dividend of ₹2 per equity share.

# Jio Platforms sets IPO price band at ₹1,065-1,119

**Vallari Sanzgiri**
Mumbai

Reliance Industries' technology arm Jio Platforms Ltd (JPL) is set to launch India's largest-ever initial public offering (IPO) at a valuation of ₹28,755-30,213 crore, but lower than brokerage estimates that had pegged the fund raise at ₹33,000-38,000 crore. The company has filed its red herring prospectus with the Registrar of Companies. The issue will open on October 21 and close on October 23.

The company has announced a price band of ₹1,065-1,119 per equity share, along with an employee discount of ₹54 per share for eligible employees bidding under the Employee Reservation Portion. The IPO comprises a fresh issue of up to 27 crore equity shares with a face value of ₹10 each. The anchor investor bidding date has been fixed for October 19.

# Oil India will acquire overseas producing assets to diversify portfolio, says Chairman

bl.interview

**Rishi Ranjan Kala**
New Delhi

State-run Oil India Ltd (OIL) will aggressively pursue exploration of oil and gas assets in India's deep and ultra deep waters, Chairman Ranjit Rath said, adding that, the E&P major will also acquire stakes in producing fields abroad to build a diversified, balanced and resilient overseas portfolio.

*Edited excerpts:*

**How is Oil India planning its consolidation exercise?**

As part of our overseas assets, we would continue to look at more prospective areas. We would look at both producing and exploration assets, but primary interest will be producing assets, which will give us an immediate monetisation opportunity.

Recently, we dispensed with two assets (in two countries) as part of our consolidation effort. Two are in Bangladesh and one in Gabon. In our Mozambique asset, which was earlier in force majeure, on-ground work is going on full steam, and about 40 per cent is the construction progress.

As far as exploration is concerned, that will be our mainstay domestically. As part of our assessment, we are looking at all the geographies across the world, whether it is North America, South America or Africa, though we haven't identified a specific area. We scan this on a continuous basis and also talk to our sister companies for collaborations, and even acquisitions.

**How has your training as a geologist helped you conceptualise OIL's E&P expansion?**

While I am a geoscientist by training, I am also the Chairman of an oil and gas company. It gives me a two pronged vision.

One helps me understand the uncertainties associated with geological setting of the areas where we intend to do exploration.

Secondly, having had an understanding of it strengthens our ability to take risks in our capital commitments.

The no-go zone of about 1 million sq km, which was earlier not there for exploration, is now available under OALP IX, X, XI and going ahead.

> As far as our production is concerned, it will come from the north-eastern part of our main producing area
>
> **RANJIT RATH**
> Chairman, OIL

**What is the status of the blocks OIL secured under OALP?**

We have already got OALP IX block, 48,000-50,000 sq km. The initial geological analysis indicates that it is worth considering for doing exploration and absolute rank wildcat drilling.

Therefore, we have already identified a corpus of about ₹15,000 crore for this.

The exact release of location will be contingent upon the processing, which is underway and the interpretation thereof.

However, we are very hopeful that we will be able to look out at least four plus four wells.

**What are your thoughts on *Samudra Manthan*?**

We are very well-aligned with the *Samudra Manthan* Mission, which the Union government wants to support deep water and ultra deep water exploration efforts. I must tell you, globally, nowhere such an initiative has been taken where in a revenue-sharing regime, central government or any state government is sponsoring exploration efforts. We are very well-aligned, and this will be our mainstay.

While our onshore exploration will be carried out through our internal accruals. We will also take advantage of the *Samudra Manthan* Mission to carry out our drilling.

This also gives us access to the data, which as part of *Samudra Manthan* Mission about $2.5 billion is identified for carrying out 2d and 3d seismic (study) in East coast and West coast of India in its exclusive economic zone and in Andaman Basin.

So, we will benefit from the stratigraphic well. We'll benefit from the seismic data that will be made available, and this allows us to take that risk and commit that capital, which is also sponsored by government of India.

**What is the interest for technical partnerships for OALP bidding rounds?**

Our collaboration opportunities are in discussion stages. Since we have got confidence in the agreement, I will not want to reveal.

But when we will submit the bids, you will come to know. There is a quality response (on OALP).

More importantly, since we have got the Andaman discovery, which means we have established the Andaman Basin as a petroliferous basin. Now there is a push from the government in terms of data availability, in terms of sponsoring the wealth cost up to a threshold. So there is a lot of interest within the global (community).

**What are your production targets?**

As far as our production is concerned, it will come from the northeastern part of our main producing area.

This year, our target is to do 4 million tonnes of crude oil. It will come from the Northeast. Upside is happening in Rajasthan fields, where earlier we were doing about 200-300 barrels a day. Today we are doing 1200 barrels per day.

For natural gas, once the Duliajan feeder line happens, 18 months down the line, we'll be able to take it to five billion cubic feet. So the production focus will remain in the Northeast till we get a big discovery.

CHENNAI
businessline.
THURSDAY - OCTOBER 15 - 2026

## QUICKLY.

### Crude oil gains as Iran signals new tactics

**London:** Oil prices rose on Wednesday after an attack on the headquarters of Saudi Arabia's State-owned oil company, while Iranian officials told *Reuters* they were deploying new tactics to target ships, seeking to keep oil prices high and influence US midterm elections. Brent crude futures were up 91 cents to $106.6 a barrel at 1110 GMT. US West Texas Intermediate crude was up $1.65, or 1.8 per cent, to $95.79 a barrel, a more than two-week high. REUTERS

### Gold falls 1% as inflation lifts Fed rate hike bets

Gold fell over 1 per cent on Wednesday, extending losses for a third straight session, as a stronger-than-expected inflation reading increased US Federal Reserve rate hike bets for this month. Spot gold dropped 1.7 per cent to $4,086.06 per ounce by 9.03 am EDT, its lowest since October 7. US gold futures for December delivery fell 1.6 per cent to $4,108.60 per ounce. REUTERS

### Palm oil gains for third session on crude oil cues

**Jakarta:** Malaysian palm oil futures closed higher for a third straight session on Wednesday, buoyed by stronger crude oil prices and gains in rival edible oils on the Dalian market. The benchmark palm oil contract for December delivery on the Bursa Malaysia Derivatives Exchange gained 17 ringgit, or 0.36 per cent, to 4,699 ringgit ($1,151.72) a tonne at the close. REUTERS

# Copper's bull run to persist for months

**RED METAL RALLY.** Iran war, supply-demand imbalance and US tariff threats will keep prices elevated

**Subramani Ra Mancombu**
Chennai

Key industrial metal copper will likely continue its bullish momentum over the next few months on the Iran war leading to a sulphur shortage, supply-demand imbalance and the threat of US tariffs on the red metal.

"We have revised our 2026 average annual copper price forecast upwards to $13,500/tonne from $12,700 previously, reflecting tariff-driven distortions amplifying persistent supply-side tightness and reinforcing relentlessly bullish sentiment," said research agency BMI, a unit of Fitch Solutions.

**UP OVER 15% YTD**
JP Morgan Global Research expects copper price to reach $14,800 in the fourth quarter of the year, driven by sulphur shortages, tight mine supply, an industrial boom and the threat of US tariffs.

Copper outlook *(in kt)*

| | 2025 | 2026 | 2027 | 2028 | 2029 |
|---|---|---|---|---|---|
| Mine production | 23,654 | 23,792 | 24,339 | 24,799 | 25,540 |
| Refined output | 28,557 | 28,587 | 29,152 | 29,909 | 30,787 |
| Consumption | 27,906 | 28,338 | 29,141 | 29,908 | 30,779 |
| Closing stocks | 1,074 | 1,323 | 1,333 | 1,335 | 1,344 |

Source: Office of the Chief Economist, Australia

Australia's Office of the Chief Economist (AOCE) said copper's recent surge was driven by mine disruptions and the resumption of the Congo's copper concentrate export ban, limiting supply, combined with strong US import demand in recent months.

It expects prices to remain high through 2028 before easing to about $11,600 a tonne (real terms) by 2031.

The three-month London Metal Exchange (LME) copper contract is currently ruling around $1,4575 a tonne. The metal has gained over 15 per cent year-to-date (YTD) and more than 5 per cent in the past month.

BMI said copper had largely shrugged off macroeconomic headwinds and had averaged $13,471 year-to-date (as of October 7).

**TARIFF UNCERTAINTY**
"Throughout Q3 2026, copper has been marching higher amid tariff-driven uncertainty and mounting supply-side concerns, with the rally culminating in an intraday record high of $14,875 on September 10 2026...," it said. Thereafter, it underwent a sharp, albeit short-lived, correction after reports said the White House had yet to decide on refined copper tariffs.

JP Morgan said geopolitical conflicts in West Asia and the closure of the Strait of Hormuz drove up prices earlier this year. "West Asia is a major supplier of sulfur and sulfuric acid, which are used for copper leaching. That pressure helped push copper to an all-time high mid-year," said Gregory Shearer, Head of Base and Precious Metals Strategy.

Shearer said the medium-term environment for copper remained supportive, even at such elevated prices. "Continued tight mine supply, ongoing weak production and structurally supported demand trends around electrification tied to data centre capex have not changed, even with the threat of Fed hikes later this year," he said.

AOCE said global copper demand is expected to remain strong through to 2031, driven by demand for clean energy technologies, data centres and broader electricity infra. "Supply is expected to grow gradually due to mine disruptions, trade and supply chain challenges, and delays to new mines," it said.

JP Morgan's Shearer said that a material component of the rally in copper over the last six months is an embedded tariff uncertainty, which has created a tug of war between the US and China for copper units.

**CHINA NET SHORT**
"Globally, the refined copper market is pretty well supplied. But China, which is net short and still needs to import copper, is being challenged by the flow of copper going into the United States, which has raised China's buying floor," he said.

BMI said copper prices hadbeen elevated due to resilient Chinese demand signals and enduring concerns surrounding Chilean supply.

"For the remainder of the year, prices are set to oscillate sharply in response to tariff-policy headlines, with the eventual US decision likely to dictate near-term price direction," said the research agency.

# Oilmeal exports tumble 65% in July as soybean meal shipments slump

**Our Bureau**
Mangaluru

Indian soybean meal at $613 a tonne was uncompetitive against the global price of $428 in July 2026

Uncompetitive soybean meal prices, cheaper South American supplies and rising freight costs led to a 65 per cent decline in overall oilmeal exports in July 2026.

According to the Solvent Extractors' Association of India (SEA), India exported 1.48 lakh tonnes (lt) of oilmeals in July 2026, compared with 4.22 lt in July 2025.

BV Mehta, Executive Director of SEA, said Indian soybean meal faced stiff competition from cheaper supplies from Argentina and Brazil. Soybean meal exports fell by nearly 90 per cent year-on-year to 17,810 tonnes in July 2026, from 1,83,553 tonnes in July 2025.

Red Sea disruptions forced vessels to take longer routes, raising transportation costs and extending delivery times.

Indian soybean meal was quoted around $613 a tonne in July 2026, compared with international prices of approximately $428 a tonne, making Indian supplies uncompetitive in the international market. Higher domestic soybean meal prices and demand from poultry and livestock feed manufacturers reduced the incentive and availability for exports, he said.

Apart from soybean meal, India's rapeseed meal exports declined to 96,539 tonnes in July 2026, from 2,09,128 tonnes in July 2025.

**FOUR-MONTH FIGURE**
India's overall oilmeal exports declined 27 per cent to 11.05 lakh tonnes (lt) during April-July 2026-27, from 15.16 lt in the corresponding period of 2025-26.

Mehta said a 27 per cent decline in India's overall oilmeal exports during April-July 2026 was primarily driven by weak soybean meal shipments, intense competition from South American suppliers and elevated freight costs due to shipping disruptions.

Although higher exports of rapeseed meal, particularly to China, provided some support, they were insufficient to offset the overall decline.

India's rapeseed meal exports increased to 7.56 lt during the first four months of 2026-27 against 7.4 lt in the corresponding period of 2025-26.

However, soybean meal exports declined to 1.87 lt during April-July 2026-27 (6.76 lt in April-July 2025-26).

**MAJOR IMPORTERS**
China, Bangladesh and Vietnam emerged as the major importers of Indian oilmeals during April-July 2026-27.

China imported 3.55 lt of oilmeals from India during April-July 2026-27, compared with 2.83 lt in the corresponding period of the previous year.

India exported 1.72 lt of oilmeals to Bangladesh during April-July 2026-27.

Vietnam imported 1.08 lt of oilmeals from India during April-June 2026-27 (75,901 tonnes).

# Pesticides makers' body issues advisory for rabi sowing

**Our Bureau**
New Delhi

CropLife India, an industry body of pesticide manufacturers, has issued a four-point advisory to farmers for the Rabi 2026-27 season as sowing has commenced amid the weakest monsoon since 2015 that parched many areas and reduced moisture.

The industry body, in a statement, mentioned the judicious use of crop protection products to save on input costs without compromising on yields. "The advisory reflects established agronomic practice and is intended to help farmers make informed decisions at every stage of the rabi crop," it said.

On seed, the advisory identifies treatment before sowing as the most cost-effective safeguard against seed- and soil-borne diseases, including smut in wheat, which is aggravated by cool, moist conditions, and wilt and dry root rot in chickpea, which are aggravated by moisture stress and heat.

**SOWING PRECAUTION**
On sowing, it recommended termite treatment only in fields, with a history of infestation and where soil moisture is adequate for the treatment to be effective, and noted that mustard sown in the second fortnight of October, where moisture permits, faced lower aphid pressure at flowering.

The industry body mentioned judicious use of crop protection products to save on input costs

It advised that applications be guided by regular field monitoring rather than a fixed calendar; wheat aphids, for instance, warrant control only once they exceed 10-15 per tiller.

Unusual pest or disease outbreaks may be reported through the National Pest Surveillance System or the nearest Krishi Vigyan Kendra.

Farmers have been advised to purchase only from authorised dealers against a proper bill and also to verify the expiry date before use.

The association cautioned that a difficult season increased the risk of illicit products reaching farmers and reiterated its call for firm enforcement against unauthorised trade, including explicit regulation of online sales supported by licence verification and product traceability.

**MONSOON IMPACT**
"The weakest monsoon in over a decade has altered the starting conditions for rabi. Uneven soil moisture influences how crops establish, how pests and diseases behave and how effectively inputs perform, which means the decisions farmers take in the coming weeks will shape the entire season. The advisory is intended to help them make each of those decisions count. In a season such as this, precision is what safeguards both the harvest and the farmer's investment," said Durgesh Chandra, Secretary-General, CropLife India.

# Nendran banana to rule at ₹33-35/kg, says TNAU

**Gayathri G**
Chennai

Farmers in Tamil Nadu can expect farmgate prices of ₹33-35 a kg for Nendran bananas during October-November 2026, according to a price forecast by the Tamil Nadu Agricultural University (TNAU).

Poovan bananas are expected to fetch ₹23-25 a kg, while Karpooravalli prices are projected at ₹25-28 a kg during the two-month period, subject to favourable weather conditions, the TNAU said.

The Domestic and Export Market Intelligence Cell (DEMIC) at the TNAU's Centre for Agricultural and Rural Development Studies arrived at the estimates after surveying local markets and traders and analysing 20 years of price data for the three varieties in Coimbatore.

The university has advised farmers to take appropriate selling decisions based on the forecast.

**LARGEST PRODUCER**
Banana is a major horticultural crop in Tamil Nadu, supporting farmers, traders and allied value chains. The State cultivated the crop across 1.14 lakh hectares in 2024-25, producing 45 lakh tonnes at a productivity of 39,691 kg/hectare, according to final estimates released by the Union Ministry of Agriculture and Farmers' Welfare.

At the national level, banana cultivation covered 9.02 lakh hectares in 2024-25, with production at 383 lakh tonnes and productivity at 49,486 kg/hectare.

Tamil Nadu ranked third among the major banana-producing States, after Maharashtra and Andhra Pradesh.

Erode, Theni, Thoothukudi, Coimbatore and Tiruchirappalli are among the State's major banana-producing districts.

# Coffee research body seeks partnership to speed up development of new varieties

**Vishwanath Kulkarni**
Bengaluru

**BETTER BREWS.** In December last, the CCRI released two high-yielding Arabica varieties that are tolerant to white stem borer and leaf rust disease KK MUSTAFAH

The Central Coffee Research Institute (CCRI), under the Coffee Board, is seeking research partnerships with private companies, research institutions and coffee growers to accelerate the development of new varieties and improve productivity and quality.

The initiative aims to expand CCRI's crop improvement programme by identifying promising coffee varieties developed through natural cross-pollination or experimental breeding by growers and other researchers, said M Senthil Kumar, Director, CCRI. The institute believes such material, if scientifically evaluated, could offer potential for commercial cultivation.

The CCRI, which has a legacy of over 100 years, has traditionally undertaken coffee breeding and variety development through its research programmes and has released some 15 varieties in Arabica and three in Robusta.

**QUALITY ASSESSMENT**
Now, the institute is looking to collaborate with external partners to tap expertise, research facilities and manpower beyond its existing resources to strengthen the breeding programme in novel varietal identification, varietal development, diversity analysis, marker development and genotyping of coffee varieties/species, among others, he said.

"Some farmers may have exceptionally high-yielding plants with superior quality in their fields but may not know how to evaluate or promote them," Senthil Kumar said, adding that the institute could help assess such material and determine its potential for wider adoption.

The collaborative initiative will also help prevent the unauthorised introduction of planting materials in coffee-growing areas, he added.

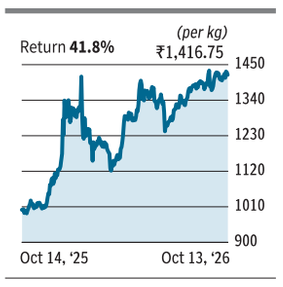
Under the proposed framework, interested parties will be required to follow guidelines such as material transfer agreements, intellectual property and how the benefits will reach growers and the wider industry. The partnerships will be open to private research organisations, government institutions, firms with research and development capabilities, and individual researchers with relevant qualifications and experience. The institute has already received four expressions of interest.

Already, the Coffee Board is working with Jain Irrigation Systems to scale up the production of tissue-culture planting material from select coffee varieties.

In December last, the CCRI released two new high-yielding Arabica varieties that are tolerant to white stem borer and leaf rust disease.

# Buy copper if prices top ₹1,432

**Akhil Nallamuthu**
bl. research bureau



Copper futures (₹1,420/kg), while maintaining a broader positive inclination, have been trading flat recently.

## COMMODITY CALL.

The October futures have been oscillating between ₹1,395 and ₹1,432 in the last three weeks. Nevertheless, the price action since July shows that it has been forming higher bases, retaining a bullish bias.

Supporting this, the price of the contract remains above both 21- and 50-day moving averages.

However, the chart shows that copper futures have not been able to crack the resistance at ₹1,432 despite bulls holding an edge.

In case the contract breaks out of ₹1,432, it could establish a fresh leg of rally, potentially taking the price higher to ₹1,480, a resistance. The next barrier is at ₹1,500. However, if copper futures fall from the current level of ₹1,420, it could find support at ₹1,400, ₹1,375 and ₹1,360. Only a breakdown below ₹1,360 will turn the outlook bearish. Notable support below ₹1,360 is at ₹1,340. Overall, the outlook continues to be positive.

However, a prolonged consolidation around the resistance of ₹1,432 increases the risk of a fall.

**TRADE STRATEGY**
Buy copper (October) futures on a breakout of ₹1,432. Place a stop-loss at ₹1,400. When the contract rises to ₹1,460, tighten the stop-loss to ₹1,440. Book profits at ₹1,480.

# Chhattisgarh tribal farmers' focus on fruit orchards to boost income

**Our Bureau**
Mangaluru

Tribal farmers in Jashpur, Balrampur and Surajpur districts of Chhattisgarh are turning to cashew, mango, pear, litchi, guava and apple to boost their income.

A media statement said around 3,500 farmers are growing pears on around 3,500 acres in the hills of Jashpur district. With an annual harvest of about 1.75 lakh quintals, farmers are generating income to the tune of ₹1-1.5 lakh per acre a year, it said.

**NEW POSSIBILITIES**
With support from Nabard, the Rural Education and Development Society (READS) and the Horticulture Department, the fruits are sold in Delhi, Uttar Pradesh, Odisha, Jharkhand and West Bengal. Quoting Chief Minister Vishnu Deo Sai, the statement said: "Diversification into horticulture and high-value cash crops is opening up new possibilities for farmers in Chhattisgarh, particularly in tribal farming communities. In districts such as Jashpur, farmers are increasingly taking up pear, mango, litchi, cashew and even apple cultivation."

"These efforts can create additional sources of income while making better use of the region's natural conditions. The government is committed to supporting farmers with improved technology, scientific cultivation practices, irrigation and better market linkages. Our focus is to ensure that tribal farmers benefit from these opportunities and move towards more sustainable and prosperous farming."

There are around 7,800 cashew farmers, 410 apple farmerss, 4,500 litchi and around 50 strawberry farmers in Jashpur. Oil palm is another crop introduced under the National Mission on Edible Oils. Jashpur has a target of 100 hectares of oil palm, of which nearly 43 hectares have been planted so far.

The initiative has been extended to neighbouring districts. In Balrampur's Shankargarh block, 1,000 farmers are cultivating the European variety of pear with support from Nabard and in collaboration with READS. In Rajpur block, mango and guava have been planted across 1,000 acres. In Surajpur's Pratappur block, mango and guava have been planted by 500 tribal families under the Nabard's Wadi development programme.

# Blenders, exporters lift tea prices at Coonoor auctions

**V Sajeev Kumar**
Kochi

Useful support from blenders and exporters lifted tea prices at the Coonoor auctions, with overall CTC leaf sales witnessing good demand.

In Sale 41, the medium and plainer sorts witnessed good demand and sold fully firm to ₹1 to ₹2 higher, with occasional increases of more than ₹2. High-priced teas declined by ₹3 to ₹4, though some lots sold ₹2 to ₹3 higher and occasionally more, depending on quality.

**LOW OFFERINGS**
However, traders pointed out that auction quantities had not improved despite showers across plantations. Offerings remained low and were not expected to improve over the next couple of weeks due to impending holidays. Global Tea Auctioneers said leaf tea offerings stood at 13,65,167 kg, with 98 per cent sold, while dust tea offerings totalled 3,24,455 kg, with 85 per cent sold.

In orthodox leaf tea, primary whole-leaf grades were barely steady to occasionally ₹2 to ₹3 higher. Broken grades witnessed fair demand and sold fully firm to ₹2 to ₹3 higher, while secondary grades and fannings declined by ₹1 to ₹2.

High-priced teas in CTC dust and better-liquoring sorts sold ₹3 to ₹4 higher. Better medium sorts were steady to occasionally ₹1 to ₹2 higher. Medium and plainer sorts declined by ₹1 to ₹2, with some lots withdrawn due to a lack of bids.

The primary orthodox dust grades were lower by ₹3 to ₹4, while secondaries and finer dusts were steady to dearer by ₹2 to ₹3.

# Goa launches fresh produce brand to boost farmers' market access

**Our Bureau**
Bengaluru

Goa has launched 'Goa Fresh', a brand initiative aimed at giving the State's agricultural produce a distinct identity, improving market access for farmers and reducing dependence on supplies from neighbouring States.

Launched as part of the government's Swayampurna Goa initiative, the programme seeks to connect local growers with high-value markets, including hotels, retail outlets and e-commerce platforms.

"When we launched Swayampurna Goa, our commitment was simple: Make our State self-reliant and back our own people. Goa Fresh is the next big step in that journey. It is not just another government scheme

Agriculture Minister Shivraj Singh Chouhan and Goa Chief Minister Pramod Sawant at the launch of Goa Fresh

on paper; it is our brand of pride. We want to give Goan farmers modern packaging, strict quality standards and direct access to high-value markets, whether that's our thriving hotel industry, retail stores or e-commerce," said Goa Chief Minister Pramod Sawant.

The initiative gains significance against the backdrop of supply disruptions during the Covid-19 pandemic, which exposed Goa's dependence on neighbouring States for daily food supplies. Over the past six years, the State has more than doubled its procurement of locally grown vegetables, according to the government.

Goan farmers, who produce cashew, coconut and vegetables, face challenges such as high labour costs, small landholdings and the role of intermediaries that impacts their share of consumer prices.

"Right now, our core focus is anchored in agriculture, horticulture and floriculture. We are rolling out seasonal Goan vegetables, indigenous fruits, coconuts, cashews and festive staples like marigold flowers, along with processed farm goods. Once the supply chain and branding are firmly anchored, we will look at expanding the model to other indigenous sectors," he said.

## QUICKLY.

**Netflix to cut 1,000 jobs in biggest layoff**

Netflix is cutting about 6 per cent of its workforce, or roughly 1,000 jobs, the *Wall Street Journal* reported on Wednesday, citing an email sent to employees. This marks its biggest round of layoffs since 2022, as the streaming giant faces intense competition for users' time in a consolidated media market. Co-Chief Executives Greg Peters and Ted Sarandos said in an email to employees on Wednesday morning, that the bulk of the cuts would be in the streaming giant's product, tech, legal and human-resources teams, the report said. REUTERS

**Aramco HQ hit as Houthis widen attacks**

Iran-backed Houthis launched missile and drone attacks across Saudi Arabia, targeting several cities, and oil giant Saudi Aramco's headquarters was hit. The attack at Aramco's office complex in Dhahran resulted in damage to about three floors in a tower block, sources said. The affected tower houses some of Aramco's main functions and its operations management office. Employees have been asked to work from home following the incident, they added. Oil production operations haven't been affected by the attack, sources said. Aramco and the Saudi Energy Ministry didn't immediately respond to requests for comment. Saudi authorities said earlier a fire had erupted at the site and there were no casualties. Houthi attacks continued into Wednesday, in fighting that has killed at least 18 people and injured hundreds more over the past week. BLOOMBERG

# Rubio to visit India from Oct 18; energy, investment in focus as BTA talks drag on

**DIFFICULT JUNCTURE.** An immediate breakthrough in the trade deal with the US is unlikely, say sources

**Amiti Sen**
New Delhi

US Secretary of State Marco Rubio will visit India later this week to explore ways to strengthen energy cooperation, promote investment and deepen economic ties, with discussions on the long-pending bilateral trade agreement (BTA) also expected during his meetings with senior government officials.

However, the "window" for a breakthrough in the trade negotiations before the US mid-term elections in November may have closed, sources said, indicating that a resolution of contentious issues, especially tariffs, could take longer.

Rubio will travel to Samarkand (Uzbekistan), Mumbai and Jamnagar from October 17-22, said a media statement from the US State Department. "He will meet with senior government officials to strengthen the US-India strategic partnership, exchange views on regional and global dynamics, and discuss prospects for enhanced energy cooperation.

Rubio will also meet with business leaders to promote opportunities for commercial investment and economic cooperation," the statement noted.

**INDIA VISIT.** Marco Rubio is set to visit Jamnagar in Gujarat, which houses Reliance's massive refining complex REUTERS

**INVESTMENT TIES**

The Secretary is scheduled to reach India on October 18, starting his visit from Mumbai, and then go to Jamnagar, before flying back on October 22, officials said. The choice of Jamnagar, Gujarat, which houses Reliance Industries' massive refining complex, comes amid efforts to deepen energy and investment ties between the two countries. US President Donald Trump recently welcomed Reliance's plans to invest in a new refinery in Texas. The visit comes at a difficult juncture for bilateral economic ties, with negotiations on the BTA yet to yield a final agreement despite the two countries announcing an interim framework in February.

"The trade negotiations have been complicated by changes in the US tariff regime and Washington's push for greater access to the Indian market, especially in agriculture. New Delhi has been reassessing its commitments in the light of the evolving US tariff architecture, while seeking to protect sensitive domestic sectors," a source tracking the matter said. Recent US restrictions on the processing of applications under the Permanent Labour Certification programme, affecting IT companies including Wipro, TCS, Infosys and HCL, have also cast a shadow over bilateral ties. This will be his second official visit to India this year, following his participation in the Quad Foreign Ministers' meeting in May.

# National Medical Commission clarifies rules for doctors to digitally authenticate patient records

**Our Bureau**
New Delhi

To remove confusion over whether doctors can remotely authenticate medical records using digital signatures, as healthcare increasingly shifts to digital platforms and telemedicine, the National Medical Commission (NMC) has clarified that registered medical practitioners can remotely review and authenticate electronic clinical documents, subject to existing legal and professional requirements.

In an advisory issued on October 13, the NMC said there was "no prohibition" under the existing legal framework against doctors remotely authenticating laboratory, pathology and radiology reports, diagnostic interpretations, discharge summaries, and other clinical documents.

The clarification follows a recommendation by the High Level Committee on non-financial regulatory reforms to facilitate digital and electronic signatures in medical practice under the Information Technology Act, 2000. The move is aimed at improving access to healthcare, making service delivery more efficient and reducing regulatory uncertainty.

**STIPULATIONS**

However, the commission stressed that remote authentication does not dilute doctors' professional, ethical or legal responsibilities. Doctors must personally review the relevant clinical information and exercise independent professional judgment before signing a document. Where the available information is insufficient, they must refrain from authenticating it until the necessary review or verification has been completed. The advisory states that "digital authentication is a mode of signing and not a substitute for clinical review, professional judgement or statutory responsibility."

Doctors, therefore, cannot authenticate medical records merely by applying their digital signatures without examining the relevant clinical information.

The NMC also specified that doctors can authenticate records remotely only within the scope of their professional engagement with the healthcare establishment concerned, and where they have lawful access to the relevant clinical records.

**MISUSE PREVENTION**

To prevent misuse, healthcare establishments must maintain appropriate security measures, audit trails, authentication logs and date and time stamps to protect the confidentiality and integrity of medical records.

The advisory also states that digital-signature credentials, authentication data and access tokens must remain under the control of the concerned doctor and cannot be shared, delegated or transferred to another person.

The clarification comes as hospitals and diagnostic facilities increasingly rely on electronic medical records, digital diagnostic systems and telemedicine platforms, making remote access to and authentication of clinical documents an important part of healthcare delivery.

# Navi Mumbai airport 'not ready', Emirates to stay in Mumbai for now

**Our Bureau**
New Delhi

Dubai-based airline major Emirates will continue operating from the Mumbai airport during the winter schedule, said Essa Sulaiman Ahmad, Senior V-P, West Asia and Indian Ocean, Commercial Operations, Emirates.

According to him, the Navi Mumbai airport is "not ready" for a shift yet.

**NEED FOR MORE**

Speaking at an event marking the airline's upcoming launch of A380 aircraft flights to Delhi, Ahmad said catering, cargo warehousing and other supporting facilities will need to be developed before airlines shift operations to Navi Mumbai.

These facilities are needed to build a complete airport ecosystem. Until then, shifting the operations would be difficult for airlines.

His comments came in response to questions on a proposed shift of international flights from Mumbai to Navi Mumbai, and theEmirates' strategy in such a scenario.

That said, the airline will keep an open mind, assess the facilities available at the new airport and then take a decision on any future move, he said. "When things like that happen, I think we also have to be a bit open-minded, see the airport, see what are the facilities that have been upgraded."

Ahmad said Emirates sees a potential new market around Navi Mumbai, given its proximity to Pune and the port. However, he linked the airline's interest in additional operations to the availability of more traffic entitlements. Presently, Emirates is the largest foreign passenger carrier from India. Ahmad said the airline is fully utilising its existing entitlements of 67,000 seats per week one-way, and sees strong demand for additional capacity.

Emirates' scheduled daily A380 service to Delhi will begin on October 25, making it the third Indian city to receive the aircraft on a scheduled daily service.

# Use-case-based regulation is the right approach for AI: IBM's Sriram Raghavan

bl.interview

**Vallari Sanzgiri**
Mumbai

At a time when countries and enterprises alike are talking about clear guardrails and governance in the AI ecosystem, Sriram Raghavan, General Manager, IBM Software, India, and Software Innovation Lab, says case-to-case regulatory framework for AI and AI agents is the most effective method. Rather than an over-arching AI specific law, he wants policymakers to treat AI, a technology, like a technology.

*Edited excerpts:*

**How have software solutions changed with the entry of AI?**

AI is bringing in a first-ever transformation where it changes traditional ways of software development. One way to think of agents is as a new class of applications driven by the inflection point of internet, mobile, AI. We are forced to deal with different considerations like the level of imprecision in interacting with the AI models building the agents. So testing, securing systems, guardrails, measurement, has to evolve. AI has allowed us better rate, pace and velocity. The economic impact is more than productivity because there are new features, capabilities, offered faster to customers with lots of positive ramifications.

> We are forced to deal with different considerations like the level of imprecision in interacting with the AI models building the agents
>
> **SRIRAM RAGHAVAN**
> General Manager, IBM Software, India, and Software Innovation Lab

**So, how do you see that impacting the future of a software engineer's job?**

We need a curriculum change, equip faculty and students with AI native tools. The first time they have an AI native tool can't be when they work in the industry. That is why we are taking our agent Bob to academic institutions.

**Should the community consider a common policy for AI governance?**

The reality is, this is too fundamental a technology to dictate that every nation and use-case will have the same approach. Acknowledge that there are going to be different rules in different parts of the world and industries. Healthcare data should not be treated the same way as retail data.

**How should countries frame their laws for AI?**

We have always believed that use case-based regulation is the right approach. How can healthcare laws be extended to the AI world? How should my banking laws change? RBI has already updated their model risk management laws. You are not going to regulate mathematics or matrix multiplication. You are regulating its use. So, use is where you apply regulation. When a new technology comes in, ask yourself how to extend the regulation for the implications of the technology. The only exception I would draw is when a technology is provided en masse to the public in the consumer world, are there certain horizontal considerations of safety?

**Has the question of token cost been resolved?**

People are coming to terms. It's gone beyond tokenomics into what we think of as AI cost optimisation.

The debate used to be really about the pricing model around tokens. We now understand frontier models cost so many dollars per million tokens. Now, the big discussion is around leveraging a combination of frontier and open weight models.

How do I make the right choices so that when I'm deploying an agent or an application, I'm not beholden to a specific model? It naturally then leads to sovereignty.

# Tata Play launches streaming app to cater to connected TVs

**Our Bureau**
New Delhi

Leading DTH player Tata Play has decided to launch television streaming app Tata Play Smart, in a bid to offer a broader entertainment proposition to consumers.

The company said that the Tata Play Smart app will offer over 500 live channels without the need for a set-top box or dish antenna.

This comes at a time when the connected TV households base has been rapidly growing in the country.

**VAST OPTIONS**

The Tata Play Smart app will offer over 500 live channels

**UNCHANGED NEEDS**

Harit Nagpal, MD & CEO, Tata Play, said, "The consumer's core need to watch sports, news and daily soaps live on the big screen as appointment viewing has remained unchanged even as smart TVs and home broadband have transformed the way content is accessed by connected homes. While DTH continues to deepen its reach across the masses, Tata Play Smart is designed to address the infotainment needs of wired urban homes. The idea is to offer convenience of a television streaming app designed to bring the familiarity of live television interface on connected TVs, without the need for a set-top box or dish antennae. Our endeavour is to continue to make content discovery easy."

The company said that the subscription strategy is built around the household's viewing preferences.

"Consumers can choose the languages they watch their content in, with one monthly plan for the home starting at ₹199 per month," a statement added.

The Tata Play Smart app is available on Samsung, Android TV, VIDAA, Google TV and FireTV, as well as Android and iOS mobile and tablet devices, it added.

MADRAS MMA MANAGEMENT ASSOCIATION ESTD. 1956 — 70 YEARS
