

THIS IS A PUBLIC ANNOUNCEMENT FOR INFORMATION PURPOSES ONLY AND IS NOT A PROSPECTUS ANNOUNCEMENT AND DOES NOT CONSTITUTE AN INVITATION OR OFFER TO ACQUIRE, PURCHASE OR SUBSCRIBE TO SECURITIES.
NOT FOR RELEASE, PUBLICATION OR DISTRIBUTION DIRECTLY OR INDIRECTLY OUTSIDE INDIA.
INITIAL PUBLIC OFFERING OF EQUITY SHARES ON THE MAIN BOARD OF THE BSE LIMITED ("BSE") AND "NATIONAL STOCK EXCHANGE OF INDIA LIMITED ("NSE", AND TOGETHER WITH BSE, THE "STOCK EXCHANGES") IN COMPLIANCE WITH CHAPTER II OF THE SECURITIES AND EXCHANGE BOARD OF INDIA (ISSUE OF CAPITAL AND DISCLOSURE REQUIREMENTS) REGULATIONS, 2018, AS AMENDED ("SEBI ICDR REGULATIONS").

SYMBIOTEC PHARMALAB LIMITED

(TO BE LISTED ON THE MAIN BOARD OF BSE AND NSE)

(Please scan this QR Code to view the Red Herring Prospectus and Abridged Prospectus)

Our Company was incorporated as 'Symbiotec Pharmalab Private Limited' as a private limited company under the Companies Act, 1956, pursuant to a certificate of incorporation dated September 20, 2002, issued by the Registrar of Companies, Madhya Pradesh and Chhattisgarh. Subsequently, in the interest of business expansion and issuing fresh shares to the public to meet requirements of funds for a project being undertaken by the Company which would have resulted into increase in the members of the Company beyond fifty, our Company was converted from a private limited company to a public limited company, pursuant to the Board resolution dated September 22, 2005 and a resolution passed in the extraordinary general meeting of our Shareholders held on October 18, 2005 and the name of our Company was changed to Symbiotec Pharmalab Limited, and a certificate of change of name dated October 27, 2005 was issued to our Company by the Registrar of Companies, Madhya Pradesh & Chhattisgarh. Further, considering the absence of public involvement in the shareholding pattern and the management of the Company, our Company was converted to a private limited company pursuant to the Board resolution dated April 23, 2014 and a resolution passed in the extraordinary general meeting of our Shareholders on May 22, 2014 and the name of our Company was changed to Symbiotec Pharmalab Private Limited and a certificate of incorporation, consequent upon conversion to a private limited was issued by the RoC on July 25, 2014. Thereafter, as part of the Company's strategic vision for future growth and expansion, our Company was converted into a public company, pursuant to the Board resolution dated September 11, 2025 and a special resolution dated September 12, 2025 passed in the extraordinary general meeting of our Shareholders. Consequently the name of our Company was changed to Symbiotec Pharmalab Limited and a fresh certificate of incorporation dated September 26, 2025, consequent upon conversion to a public company, was issued by the Registrar of Companies, Central Processing Centre. For further details on the changes in the name and registered office of our Company, see "History and Certain Corporate Matters" on page 265 of the Red Herring Prospectus dated August 18, 2026 ("RHP") to be read with Addendum to the RHP dated August 19, 2026 ("Addendum").

BID/OFFER PROGRAMME

BID/OFFER CLOSES TODAY*

*The UPI mandate end time and date shall be at 5:00 p.m. on Bid / Offer Closing Date.

We are a research and development-driven, science-based pharmaceutical and biotechnology company with capabilities across three platforms - organic chemistry, biotechnology and complex injectables. Operate as a contract development and manufacturing organisation variably for specialty pharmaceutical and nutraceutical companies globally, offering products and services across the three platforms in which we also manufacture our own products.
The Offer is being made through the Book Building Process in accordance with Regulation 6(1) of the SEBI ICDR Regulations.
The Equity Shares of our Company will get listed on the main board of BSE and NSE. BSE shall be the Designated Stock Exchange.
QIB Portion: Not more than 50% of the Net Offer Non-Institutional Portion: Not less than 15% of the Net Offer Retail Portion: Not less than 35% of the Net Offer.
EMPLOYEE RESERVATION PORTION: UP TO [●] EQUITY SHARES AGGREGATING UP TO ₹30.00 MILLION

IN MAKING AN INVESTMENT DECISION, POTENTIAL INVESTORS MUST ONLY RELY ON THE INFORMATION INCLUDED IN THE RED HERRING PROSPECTUS AND THE TERMS OF THE OFFER, INCLUDING THE RISKS INVOLVED AND NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION ABOUT THE OFFER AVAILABLE IN ANY MANNER. IN RELATION TO PRICE BAND, POTENTIAL INVESTORS SHOULD ONLY REFER TO THIS PRE-OFFER AND PRICE BAND ADVERTISEMENT FOR THE OFFER AND SHOULD NOT RELY ON ANY MEDIA ARTICLES/REPORTS IN RELATION TO THE VALUATION OF OUR COMPANY AS THESE ARE NOT ENDORSED, PUBLISHED OR CONFIRMED EITHER BY THE COMPANY OR THE BOOK RUNNING LEAD MANAGERS TO THE OFFER ("BRLMS").

In accordance with the recommendation of committee of Independent Directors of our Company, pursuant to their resolution dated August 18, 2026, the above provided price band is justified based on quantitative factors/Key Performance Indicators ("KPI") disclosed in the "Basis for Offer Price" section on page 146 of the RHP vis-a-vis the weighted average cost of acquisition ("WACA") of primary and secondary transaction(s) as applicable, disclosed in the "Basis for Offer Price" on page 146 of the RHP.

RISK TO INVESTORS | For details, refer to section titled "Risk Factors" on page 28 of the RHP.

- 1) **Revenue dependence on sale of Active Pharmaceutical Ingredients ("APIs"):**
We derive almost all of our revenue from the sale of API products, including corticosteroid and steroidal-hormones. In addition to manufacturing API products that we sell, we offer our services as a contract development and manufacturing organisation ("CDMO") for specialty pharmaceutical and nutraceutical companies. Any reduction in demand for API products, and our top products in particular, or a temporary or permanent discontinuation in our manufacturing operations for such products, could have an adverse effect on our business, results of operations, financial condition and cash flows.

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)
Sale of APIs (A)	8,350.05	96.07%	7,447.54	99.10%	7,162.47	100.00%
Sale of complex injectables (B)	330.50	3.80%	-	-	-	-
CDMO services (C)	10.94	0.13%	68.00	0.90%	-	-
Total (A+B+C)	8,691.49	100.00%	7,515.54	100.00%	7,162.47	100.00%

2) **Audit and inspections risk:** We operate in a highly competitive industry where regulatory standards are not only extensive but also continuously evolving. We are required to comply with regulations and quality standards stipulated by regulatory authorities and certain of our customers. Our manufacturing facilities and products are subject to periodic inspections and audits by these regulatory authorities and customers. If we are not in compliance with the requirements prescribed by such authorities or terms stipulated in contracts with our customers, we may be subject to regulatory actions, including issuance of warning letters, imposition of sanctions, amendment or withdrawal of our existing approvals, product seizure, interruption of our operations, or claims resulting from non-compliance with contractual obligations.

3) **Dependence on export markets:** As of March 31, 2026, revenue from external customers outside India contributed 67.04%, 55.19% and 59.97% of our revenue from operations in Fiscals 2026, 2025 and 2024, respectively. Our inability to handle risks associated with our export sales could adversely affect our sales to customers in foreign countries, our results of operations, financial condition and cash flows.

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)
Revenue from external customers - India (A)	2,865.05	32.96%	3,367.75	44.81%	2,867.23	40.03%
Revenue from external customers outside India (B)	5,826.44	67.04%	4,147.79	55.19%	4,295.24	59.97%
- Europe	2,529.86	29.11%	2,271.07	30.22%	2,124.20	29.66%
- United States	1,140.00	13.12%	302.02	4.02%	642.60	8.97%
- China	82.90	0.95%	115.58	1.54%	22.19	0.31%
- Rest of the world*	2,073.68	23.86%	1,459.13	19.41%	1,506.25	21.03%
Revenue from operations (A+B)	8,691.49	100.00%	7,515.54	100.00%	7,162.47	100.00%

* Rest of the world includes Asia (other than India and China) and Africa.

4) **Tariff and anti-sourcing risk:** Revenue from the United States represented 13.12%, 4.02% and 8.97% of our revenue from operations for Fiscals 2026, 2025 and 2024. The imposition of tariffs or other anti-sourcing measures by the United States could increase our costs, affect the competitiveness of our products and adversely affect our business, results of operations, financial condition and cash flows.

5) **Customer concentration risk:** We derive a substantial portion of our revenue from certain key customers, with our top ten customers accounting for 57.59%, 55.90% and 61.65% of our revenue from sale of products in Fiscals 2026, 2025 and 2024, respectively. Any loss of, or reduction in orders from, these customers could adversely affect our business, results of operations, financial condition and cash flows.

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of revenue from sale of products (%)	Amount (₹ million)	Percentage of revenue from sale of products (%)	Amount (₹ million)	Percentage of revenue from sale of products (%)
Top five customers	3,475.98	43.01%	3,037.13	42.27%	3,154.83	48.51%
Top ten customers	4,654.71	57.59%	4,015.76	55.90%	4,009.50	61.65%

6) **Geographic concentration risk:** As of March 31, 2026, we operated the Rau Facility and the Pithampur Facility in the state of Madhya Pradesh in India. In addition, our Ujjain Facility and our Mhow Facility, which we have commissioned and where we have started R&D and pilot-scale operations as of March 31, 2026, are also located in Madhya Pradesh. Any adverse developments affecting Madhya Pradesh or its surrounding regions could adversely affect our business, results of operations, financial condition and cash flows. A slowdown, interruption or shutdown in our manufacturing operations could have an adverse effect on our business, results of operations, financial condition and cash flows.

7) **Supplier concentration risk:** We depend on certain suppliers for raw materials for our operations. Purchases from our top ten suppliers accounted for 25.50%, 18.41% and 50.33% of our total expenses in Fiscals 2026, 2025 and 2024, respectively. Any loss of such suppliers or non-performance of their obligations could adversely affect our business, results of operations, financial condition and cash flows.

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of total expenses (%)	Amount (₹ million)	Percentage of total expenses (%)	Amount (₹ million)	Percentage of total expenses (%)
Top five suppliers	1,501.96	21.16%	850.41	13.97%	2,293.90	38.81%
Top ten suppliers	1,810.15	25.50%	1,120.78	18.41%	2,974.31	50.33%

8) **Competition risk:** We operate in a highly competitive market. We face competition both within our API manufacturing business and in our role as a CDMO, which we have recently commenced. An inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.

9) **Dependence on imported raw materials:** We procure a portion of our raw material requirements from different countries, including China and the United States. Any adverse developments in these countries, or the laws governing our imports from these countries, could disrupt our raw material supply and adversely affect our results of operations, financial condition and cash flows.

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	Percentage of total expenses (%)	Amount (₹ million)	Percentage of total expenses (%)	Amount (₹ million)	Percentage of total expenses (%)
Raw materials sourced domestically	781.35	11.00%	915.79	15.04%	785.62	12.84%
Raw material imports	1,868.82	26.32%	1,197.36	19.67%	3,275.61	55.43%
- United States of America	59.77	0.84%	39.10	0.64%	20.02	0.34%
- China	1,695.24	23.88%	1,024.32	16.82%	3,119.82	52.79%
- Other countries*	113.81	1.60%	133.94	2.20%	135.76	2.30%

*Other countries include countries such as Singapore, Malaysia and Germany.
- 10) **Product development risk:** Our success depends on our ability to develop and commercialise new products in a timely manner. Our research and development ("R&D") efforts are central to our ability to build, scale, and sustain complex manufacturing technologies across platforms. If our research and development efforts do not succeed, or the products we commercialise do not perform as expected, the introduction of new products may be hindered, which could adversely affect our business, results of operations, financial condition and cash flows. In order to remain competitive, we must develop, test and manufacture new products, which must meet regulatory standards and receive requisite regulatory approvals.

Particulars		Fiscal 2026	Fiscal 2025	Fiscal 2024
Research and development expenses (₹ million) (A)		296.95	311.43	205.09
Total expenses (₹ million) (B)		7,099.02	6,088.49	5,909.85
Research and development expenses, as a percentage of total expenses (%) (A/B*100)		4.18%	5.12%	3.47%

11) **Risk related to transfer of shares:** The Investor Selling Shareholders, India Business Excellence Fund – III, together with its co-investors, namely, Mahendra Fulchand Sundeshia and Namarayan Nathmal Saraf jointly with Indra Saraf will transfer 203,866 Equity Shares of face value of ₹2 each for a consideration of ₹200.00 per Equity Share aggregating to ₹40.77 million and Rosewood Investments will transfer 1,508,478 Equity Shares of face value of ₹2 each for a consideration of ₹200.00 per Equity Share aggregating to ₹301.69 million, immediately prior to the filing of the Red Herring Prospectus, to our Promoter, Satwani Holdings LLP pursuant to the upside sharing arrangement as provided for in the Investment Agreement which will be undertaken at a price lower than the Offer Price and will result in an aggregate increase of 2.73% in the pre-offer shareholding (on a fully diluted basis) of Satwani Holdings LLP.

12) **The Selling Shareholders will receive the entire proceeds from the Offer for Sale. We will not receive or benefit from any proceeds from the Offer for Sale portion.**

13) **The weighted average cost of acquisition per Equity Share acquired by our Promoters (which includes the Promoter Selling Shareholder) and Selling Shareholders, as on the date of the Red Herring Prospectus is as follows:**

S. No.	Name of Promoter	Number of Equity Shares of face value of ₹2 each held as on date	WACA per Equity Share (in ₹)
Promoters			
1.	Anil Satwani	2,810,896	276.00

Retail Individual Investors and Non-Institutional Investors also have the option to submit the application directly to the ASBA Bank (SCSBs) or to use the facility of online trading, demat and bank account. Investors are required to ensure that the bank account used for bidding is linked to their PAN. Bidders must ensure that their PAN is linked with Aadhaar and are in compliance with CBDT Notification dated February 13, 2020, issued by Central Board of Direct Taxes and the subsequent press releases, including press releases dated June 25, 2021 and September 17, 2021 and CBDT circular no.7 of 2022, dated March 30, 2022 read with press release dated March 28, 2023 and any subsequent press releases in this regard.

ASBA has to be availed by all the investors except Anchor Investors. UPFI may be availed by (i) Retail Individual Investors in the Retail Portion; (ii) Non-Institutional Investors with an application size of up to ₹0.50 million in the Non-Institutional Portion. For details on the ASBA and UPFI process, please refer to the details given in the Bid Cum Application Form and Abridged Prospectus and also please refer to the section "**Offer Procedure**" on page 451 of the RHP. The process is also available on the website of Association of Investment Bankers of India ("**AIBI**") and Stock Exchanges and in the General Information Document. The Bid Cum Application Form and the Abridged Prospectus can be downloaded from the websites of the Stock Exchanges and can be obtained from the list of banks that is displayed on the website of SEBI at www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=Py=yes&ntmId=35 and www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=Py=yes&ntmId=43, respectively as updated from time to time. For the list of UPFI apps and banks live on IPO, please refer to the link: www.sebi.gov.in. UPFI Bidders bidding through the UPFI Mechanism may apply through the SCBSs and mobile applications whose names appear on the website of SEBI, as updated from time to time. Axis Bank Limited and ICICI Bank Limited has been appointed as the Sponsor Bank for the Offer, in accordance with the requirements of SEBI ICDR Master Circular. For Offer related queries, please contact the BRLMs on their respective email IDs as mentioned below. For UPFI related queries, investors can contact NPCI at the toll-free number: 18001210740 and mail ID: ipo@npci.org.in.

THE EQUITY SHARES OF OUR COMPANY WILL GET LISTED ON MAIN BOARD PLATFORMS OF THE STOCK EXCHANGES

In the case of any revision in the Price Band, the Bid / Offer Period will be extended by at least three additional Working Days after such revision in the Price Band, subject to the Bid / Offer Period not exceeding 10 Working Days. In cases of force majeure, banking strike or similar unforeseen circumstances, our Company may, in consultation with the BRLMs, for reasons to be recorded in writing, extend the Bid / Offer Period for a minimum of one Working Day, subject to the Bid / Offer Period not exceeding 10 Working Days. Any revision in the Price Band and the revised Bid / Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges, by issuing a public notice and also by indicating the change on the respective websites of the BRLMs and at the terminals of the Syndicate Members and by intimation to Self-Certified Syndicate Bankers ("SCSBs"), Designated Intermediaries and the Sponsor Bank(s), as applicable.

This Offer is being made through the Book Building Process, in terms of Rule 192(b) of the Securities Contract (Regulation) Rules, 1957 ("SCRR") read with Regulation 31 of the SEBI ICDR Regulations and in compliance with Regulation 6(1) of the SEBI ICDR Regulations wherein not more than 50% of the Net Offer shall be available for allocation on a proportionate basis to Qualified Institutional Buyers ("QIBs", and such portion, the "**QIB Portion**"), provided that our Company, in consultation with the BRLMs, may allocate up to 60% of the QIB Portion to Anchor Investors on a discretionary basis ("**Anchor Investor Portion**"). 40% of the Anchor Investor Portion shall be reserved as under: (i) 33.33% for the domestic Mutual Funds; and (ii) 6.67% for Life Insurance Companies and Pension Funds, subject to valid Bids being received from the domestic Mutual Funds, Life Insurance Companies and Pension Funds at or above the price at which allocation will be made to Anchor Investors ("**Anchor Investor Allocation Price**") in accordance with the SEBI ICDR Regulations. Any under-subscription in the reserved category specified in clause (ii) above may be allocated to domestic Mutual Funds. In the event no valid Bids are received from the domestic Mutual Funds, Life Insurance Companies and Pension Funds at or above the Anchor Investor Allocation Price, the balance Equity Shares shall be added to the Net QIB Portion (the "**Net QIB Portion**"). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only, subject to valid Bids being received at or above the Offer Price, and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to QIB Bidders (other than Anchor Investors) including Mutual Funds subject to valid Bids being received at or above the Offer Price. However, if the aggregate demand from Mutual Funds is less than 5% of the Net QIB Portion the balance Equity Shares available for allocation in the Mutual Fund Portion will be added to the remaining Net QIB Portion for proportionate allocation to all QIBs. Further, not less than 15% of the Net Offer shall be available for allocation to Non-Institutional Bidders (out of which one-third of the portion available to Non-Institutional Bidders shall be reserved for Bidders with an application size of more than ₹20 million and up to ₹1.00 million and two-thirds shall be reserved for Bidders with an application size of more than ₹1.00 million, provided that the unsubscribed portion in either of the aforementioned sub-categories may be allocated to Bidders in the other sub-category) and not less than 35% of the Net Offer shall be available for allocation to Retail Individual Bidders in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. Further, Equity Shares will be allocated on a proportionate basis to Eligible Employees applying under the Employee Reservation Portion of the Offer. The Offer will be implemented through the Application Supported by Blocked Amount ("ASBA") process by providing details of their respective ASBA Account (as defined hereinafter) andUPI ID in case ofUPI Bidders (as defined hereinafter), as applicable, pursuant to which their corresponding Bid Amounts will be blocked by the SCBSs or by the Sponsor Banks under the UPI Mechanism as the case may be, to the extent of respective Bid Amounts. Anchor Investors are not permitted to participate in the Offer through the ASBA process. For further details, see "*Offer Procedure*" on page 451 of the RHP.

Form, the DP, ID PAN, UPIID and Client ID provided in the Bid cum Application Form should match with the DP ID, PAN, Client ID and UPIID available for UPI Bidders/Applicants bidding through the UPI Mechanism) in the Depository database, otherwise, the Bid cum Application Form is liable to be rejected. Bidders/Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPIID available for UPI Bidders bidding through the UPI Mechanism, as provided in the Bid cum Application Form, the Bidder/Applicant may be deemed to have authorized the Depository to provide to the Registrar to the Offer, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These details shall be

Demographic Details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders/Applicants' sole risk. Investors must ensure that their PAN is linked with Aadhaar and are in compliance with the notification issued by Central Board of Direct Taxes notification dated February 13, 2020 and read with press releases dated June 25, 2021, March 30, 2022 and March 28, 2023 and any subsequent press releases in this regard.

Contents of the Memorandum of Association of our Company as regards its objects: For information on the main objects of our Company, investors are requested to see ***‘History and Certain Corporate Matters’*** on page 265 of the RHP. The Memorandum of Association of our Company is a material document for inspection in relation to the Offer. For further details, see ***‘Material Contracts and Documents for Inspection’*** on page 538 of the RHP.

Liability of the members of our Company: Limited by shares.

Amount of Share Capital of our Company and Capital Structure: As on the date of the RHP, the authorized share capital of our Company is ₹300,000,000 comprising of 150,000,000 Equity Shares of face value ₹2 each. The issued, subscribed and paid-up share capital of our Company is ₹125,469,702 comprising 62,734,851 Equity Shares of face value of ₹2 each. For details of the capital structure of our Company, see “**Capital Structure**” on page 106 of the RHP.

Names of the Initial Signatories to the Memorandum of Association of our Company and the number of Equity Shares subscribed by them: The names of the initial signatories of the Memorandum of Association of our Company along with their allotment are: Anil Satwani, Manohar Satwani and Kashish Satwani were the initial subscribers to the MOA. For details of the share capital history and capital structure of our Company see **“Capital Structure”** on page 106 of the RHP.

Listing: The Equity Shares offered through the Red Herring Prospectus are proposed to be listed on the Stock Exchanges. Our Company has received ‘in-principle’ approvals from BSE and NSE for the listing of the Equity Shares pursuant to letters each dated February 4, 2026. For the purposes of the Offer, BSE Limited is the Designated Stock Exchange. A copy of the Red Herring Prospectus has been filed with the RoC and a copy of the Prospectus shall be filed with the RoC in accordance with Sections 26(4) and 32 of the Companies Act, 2013. For details of the material contracts and documents available for inspection from the date of the Red Herring Prospectus until the Bid / Offer Closing Date, see **“Material Contracts and Documents for Inspection”** on page 538 of the RHP.

Disclaimer Clause of the Securities and Exchange Board of India ("SEBI"): SEBI only gives its observations on the Draft Red Herring Prospectus and this does not constitute approval of either the Offer or the specified securities stated in the Offer Documents. The investors are advised to refer to page 424 of the RHP for the full text of the disclaimer clause of the SEBI.

Disclaimer clause of the NSE: It is to be distinctly understood that the permission given by NSE should not in any way be deemed or construed that the Draft Red Herring Prospectus has been cleared or approved by NSE nor does it certify the correctness or completeness of any of the contents of the Draft Red Herring Prospectus. The investors are advised to refer to page 427 of the RHP for the full text of disclaimer clause of NSE.

Disclaimer clause of the BSE (Designated Stock Exchange): It is to be distinctly understood that the permission given by BSE should not in any way be deemed or construed that the Draft Red Herring Prospectus has been cleared or approved by the BSE nor does it certify the correctness or completeness of any of the contents of the Draft Red Herring Prospectus. The investors are advised to refer to page 427 of the RHP for the full text of disclaimer clause of BSE.

General Risks: Investments in equity and equity-related securities involve a degree of risk and investors should not invest any funds in the Offer unless they can afford to take the risk of losing their entire investment. Investors are advised to read the risk factors carefully before taking an investment decision in the Offer. For taking an investment decision, investors must rely on their own examination of our Company and the Offer, including the risks involved. The Equity Shares have not been recommended or approved by SEBI, nor does SEBI guarantee the accuracy or adequacy of the contents of the Red Herring Prospectus. Specific attention of the investors is invited to “Risk Factors” on page 28 of the Red Herring Prospectus.

^{AA}In compliance with the proviso to regulation 21A(1) and explanation (iii) to regulation 21A(1) of the SEBI Merchant Bankers Regulations, and regulation 23(3) of the SEBI ICDR Regulations, Motilal Oswal Investment Advisors Limited will be involved only in marketing the Offer. Motilal Oswal Investment Advisors Limited has signed the due diligence certificate and has been disclosed as a BRLM for the Offer.

DESPITE DISRUPTIONS
Engineering goods exports rose 18% in July

New Delhi: India's engineering goods exports grew 18 per cent year-on-year to \$12.24 billion in July, extending a strong run in the first four months of the financial year, despite geopolitical tensions and disruptions around major trade routes in West Asia. While exports to the US and China recorded strong growth, shipments to the UAE and Saudi Arabia declined amid continuing uncertainties in the region. **p3**

GLOBAL CEO UPBEAT
'India top market in first half of 2026 for Nestle'

New Delhi: For Nestle, India emerged as the highest performing market in the first half of CY26, leading the pack in driving growth among emerging markets and has the potential to emerge among the top five markets in the coming years, the company's Global CEO Philipp Navratil said on Wednesday. **p2**

FM pitches for Canadian investment in new sectors

FRESH OPPORTUNITIES. On first leg of 9-day visit, Minister highlights India's advantages

Shishir Sinha
New Delhi

The government has stepped up its outreach to global investors with Finance Minister Nirmala Sitharaman beginning her nine-day tour of Canada and the US by strongly pitching India as the fastest-growing major economy offering a combination of scale, sustained growth, a young population, expanding consumption and rapidly deepening capital markets.

The tour has begun at a time when foreign portfolio investment (FPI) has been negative in the calendar year so far, while foreign direct investment (FDI) has recorded encouraging growth in the first quarter of the current fiscal.

Her itinerary is investment-heavy, including investor roundtables, meetings with CEOs and financial-sector executives in Toronto, Chicago and New York City, apart from the G20 Finance Ministers' meeting in Asheville.

WOING CAPITAL. Finance Minister Nirmala Sitharaman interacting with the Indian diaspora in Toronto. Mahaveer Singhvi, India's Consul General to Canada, looks on

In her first formal event after reaching Canada, Sitharaman asserted that India's transformation is structural, driven by rapid urbanisation, a growing middle class and world-class digital infrastructure, which are creating new opportunities across virtually every sector of the economy. "Our digital ecosystem has also dramatically reduced the cost of access and expanded the reach of financial and commercial services," she said.

EMERGING TECH
Spotlighting sectors such as insurance and fintech, the Finance Minister spoke at

length about India's focus on emerging technologies.

"Emerging sectors such as semiconductors, magnets and rare earths offer significant potential for Canadian investors. India can also provide trusted and cost-effective supply-chain alternatives for global markets. I invite Canadian investors and rare earth operators to participate more actively in India's growth story," she said.

She emphasised that GIFT City had emerged as a global platform for international financial institutions, supported by a regulatory and tax framework designed spe-

cifically for cross-border financial activity.

"India has progressively opened sectors such as insurance, asset management and pensions to greater foreign participation, while our capital markets have become deeper, more liquid and more sophisticated," Sitharaman said.

GROWTH PROSPECTS
The Finance Minister's Canada itinerary includes an investment roundtable with representatives from the energy, AI and critical-minerals sectors.

She is also meeting Canadian business leaders and CEOs for discussions related to India's growth prospects and opportunities for greater Canadian investment in the country.

The US leg of her tour also has a strong investor pitch, with Sitharaman scheduled to hold investor roundtables in Chicago and New York City to highlight India's growth prospects and opportunities for foreign investment.

Bulk selling picks up in August as promoters cash in on market rally

Anupama Ghosh
Mumbai

Promoter selling gathered pace in August after a subdued July, with insiders accounting for nearly 21 per cent of total bulk deal sales worth ₹12,440 crore, out of the ₹59,433 crore recorded till August 25, according to Prime Database.

The momentum accelerated further on Wednesday, when five bulk and block deals worth over ₹6,300 crore were executed despite a lacklustre market.

The largest deals were executed in Billionbrains Garage Ventures (₹2,500 crore) and Welspun Corp (₹1,433 crore), both of which ended lower.

PhysicsWallah defied the trend, rising 3.9 per cent after a ₹550 crore block deal, while Rubicon Research gained 6.4 per cent after trades worth ₹140 crore. Viyash Scientific saw ₹225 crore worth of shares change hands and closed 5.4 per cent lower.

Prudential Corporation Holdings is likely to launch a block sale of about 2 per cent in ICICI Prudential AMC on Thursday, offering nearly 99 lakh shares at ₹2,998-3,158

Block deals

Source: Prime Database *till Aug 25

apiece. Large promoter sales in August included Pilani Investment & Industries Corp's ₹2,896 crore sale in UltraTech Cement, Ardour Investment Holding's combined ₹5,007 crore stake sale in Adani Power and Adani Green Energy, and General Atlantic Singapore Fund's ₹1,400 crore offload in KFin Technologies.

STRONG LIQUIDITY
Overall bulk and block deals worth ₹3.64 lakh crore have been executed through 9,675 transactions so far in 2026, reflecting strong market liquidity and institutional appetite for large secondary-market trades. While this is below the record ₹6.41 lakh crore raised in 2024, the tally already highlights a busy year for stake sales and capital reallocation by promoters, private equity in-

vestors and institutions.

"Strong institutional liquidity is absorbing the large supply of shares. After the sharp rally in many segments of the market, promoters and early investors are finding valuations attractive enough to monetise their holdings," said Pranav Haldea, Managing Director, Prime Database Group.

Kranthi Bathini, Director-Equity Strategy at WealthMills Securities, said, "Promoters typically use sharp vertical rallies to trim stakes, while buyers such as mutual funds and strategic investors step in after conducting extensive due diligence."

However, Uttam Kumar Srimal, Deputy Head of Fundamental Research at Axis Direct, said the selling should not be viewed as a sign of weakness.

Meta, content creator served legal notice for covert video shot on smart glasses

Poornima Joshi
New Delhi

Amid mounting privacy concerns over the use of Meta glasses that can capture photographs, videos and even livestream to Instagram and Facebook, a Delhi man has sent a legal notice to Meta Platforms and an Instagram user to take down a video, allegedly recorded without his knowledge using Ray-Ban Meta smart glasses, and pay ₹2.05 crore in damages.

SAFETY MEASURES

The notice, served by lawyer and internet freedom activist Apar Gupta on August 24, also asked Meta to preserve the video and its complete metadata. Meta has additionally been asked to disclose whether it has a mech-

anism for reporting abuse involving its smart glasses and whether such product-safety measures are available to people who are recorded without their consent.

According to the notice, the incident took place on July 24 at a coffee outlet in Khan Market, New Delhi, where the complainant was allegedly accosted and harassed by an Instagram user whom he had never met. The complainant claimed that the encounter was covertly recorded using Ray-Ban

Meta glasses, while unidentified associates of the Instagram user also recorded it from other vantage points.

The video was allegedly posted as an Instagram Reel on July 26 and viewed by lakhs. The complainant said he subsequently received messages from friends, colleagues and professional contacts about the video.

NO RESPONSE

The complainant reported the video and account to Instagram on July 27, including through Meta's grievance redress mechanism. According to the notice, Instagram rejected the reports, saying the material did not violate its Community Standards.

The complaint to Meta's India Grievance Officer received no acknowledgement nor a decision as of the date

of the notice. The legal notice said that Meta had violated the Information Technology Act by its actions.

The Delhi complaint arrives against the backdrop of a broader reckoning over the same device abroad. A joint investigation earlier this year by the Swedish newspapers *Svenska Dagbladet* and *Göteborgs-Posten* found that footage and audio recorded by Meta's Ray-Ban smart glasses were reviewed by human contractors in Kenya, including material containing sensitive personal content, such as bathroom visits, people undressing and bank cards visible in recordings.

Ireland's Data Protection Commission had questioned whether the original, tiny LED indicator was sufficient to alert people that they were being filmed.

NCLT clears Subhash Chandra's ₹6.5 crore repayment plan against claims of ₹22,006 cr

Vallari Sanzgiri
Akshata Gorde
Mumbai

The National Company Law Tribunal (NCLT) has allowed Zee Group founder and Chairman Subhash Chandra's plan to repay just ₹6.5 crore against admitted claims of ₹22,006.57 crore.

As the decision gives creditors a recovery of around 0.03 per cent of their admitted dues, legal experts highlighted how the case addresses a fundamental question about the balance between a debtor's ability to pay and the creditors' legitimate expectations of recovery under the Insolvency and Bankruptcy Code.

The order, passed by a third judicial member of the insolvency court, arose from the consideration of a repayment plan in a personal insolvency case filed by Indiabulls Housing Finance,

where Chandra was a personal guarantor for loans taken by Essel Group entities. While the creditors admitted claims of ₹22,006.57 crore against him, the repayment plan proposed only ₹6.5 crore, based on his disclosed personal assets and estate.

CREDITORS BACK PLAN

The NCLT did not cap Chandra's liability at ₹6.5 crore; instead, it approved the plan after creditors holding 80.814 per cent of the voting share backed it and the resolution professional (RP) concluded that the amount represented the recoverable value available from the personal guarantor's disclosed assets.

It also directed the consequential redistribution of the repayment amount among the remaining eligible creditors in accordance with the approved repayment plan. The matter will now be

Subhash Chandra

placed before the Original Division Bench to pass orders in terms of the majority opinion. Subhash Chandra declined to comment on the NCLT ruling, stating that the matter remained under judicial scrutiny.

With this, the NCLT has followed the commercial wisdom of the Committee of Creditors (CoC), according to Deep Roy, Managing Partner at Equilex.

"It refused to second-guess the decision of the

CoC members. The NCLT seems to have interpreted Section 114 of the code to suggest that the NCLT is bound to approve a plan if a majority of lenders have assented," said Roy.

The order considered various issues, including allegations of grave and material irregularities arising from the repayment plan's allegedly "capricious, partisan, and hasty conduct", including breach of the IBC rules.

NO IRREGULARITY

However, the NCLT stated that it was not bound to reject the plan merely because of certain procedural lapses and irregularities in the admission of claims related to Anil Kumar and Sunil Jain and the persons they represented. Further, it held that there was no other established material irregularity or violation of the provisions of the Code or applicable regulations.

FLOOD FURY

DEADLY DELUGE. At least 98 people have been confirmed dead, and scores remain missing following a flash flood in Bhotekoshi river that swept through settlements across Nepal's Rasuwa and neighbouring districts on Wednesday. According to *The Kathmandu Post*, as many as 384 people, including 291 foreigners and 32 security personnel, are missing **More reports on 9&12 pti**

With Parandur project dropped, Chennai airport's Terminal 5 plans gather pace

T E Raja Simhan
Chennai

Chennai airport could augment capacity to handle around 55 million passengers a year through a proposed Terminal 5 on an under-utilised triangular parcel between its two runways with minimal land acquisition and relocation of people, top airport officials told *businessline*.

While plans for T5 itself have been in the offing for a while, it has now gained momentum and urgency as the Parandur airport project has been officially dropped, they added.

However, given that the focus is on T3 expansion at the moment, this is likely to take considerable time.

No project cost has been finalised for the T5 plan, and officials said an estimate could be prepared only after the completion of technical

studies, detailed design and the required approvals. A key component of this plan is a proposed 5.32-km elevated corridor from Tambaram-Maduravoyal road to Terminal 5 along Adyar river.

CRITICAL LINK

The corridor is expected to provide a critical link to Terminal 5 while minimising disruption and the need for land acquisition in densely populated areas on the western side of the airport.

While originally the corridor would have required land acquisition, the State government subsequently suggested aligning it along the periphery of the Adyar river to reduce acquisition costs. The proposal was referred to the Indian Institute of Technology, Madras, for a technical assessment.

The IIT study indicated that the project could be implemented without affecting flood water management,

provided the river banks are strengthened and adequate measures are taken to maintain water flow.

The proposal requires in-principle approval from the Tamil Nadu Water Resources Department and other statutory clearances, including environmental, sources said. Encroachments along the river bank may have to be removed wherever necessary.

The corridor would also connect with NH 32, providing access to the airport from several major road corridors.

Authorities are also working to increase runway capacity. The airport's current

runway handling capacity is around 35 aircraft movements an hour and is expected to rise to 45-46 movements with the planned rapid-exit taxiways.

The proposed Terminal 5, on the western side of the airport, could add around 20 million passengers to the existing capacity. The airport is expected to handle around 35 million passengers after its ongoing expansion, taking the total capacity after T5 to around 55 million passengers.

However, aviation expert Mohan Ranganathan noted that the area between the two runways is low-lying and gets easily flooded. Others noted that an additional terminal alone will still not address the capacity issues as without a new runway and other critical infrastructure, the airport will still not be able to cater to wide-bodied aircraft, which is critical for cargo movement.

QUICKLY.
Octave sets up tech
and innovation centre

Hyderabad: Octave Intelligence, which provides software for mission-critical industrial facilities and infrastructure, has opened its Technology and Innovation Centre here. The centre, which currently employs 1,600 people, will have 400 more over the next 3-4 years. The two lakh sq ft centre will support Octave's global technology and innovation operations across software engineering, AI, data, cloud and product development. The company also set up its experience centre at the Hyderabad office. **OUR BUREAU**

Voice AI start-up Ringg
raises \$10 million

Bengaluru: Voice artificial intelligence start-up Ringg AI has raised \$10 million as an extension to its Series A funding round, led by Peak XV Partners, with participation from Arkam Ventures and Capital 2b. This funding adds to the \$5.5 million it raised earlier. Ringg AI is building AI agents that enable enterprises to automate customer conversations and the business workflows that follow. The new capital will be used to strengthen Ringg's AI platform, expand its voice, WhatsApp and browser agents and deepen investments in AI models. **OUR BUREAU**

Sweet Karam Coffee aiming to double FY27
revenue as non-South markets gain traction

Rohan Das
Chennai

Chennai-based snacking brand Sweet Karam Coffee is looking to more than double its revenue in the current fiscal year as it grows from a South India-focused D2C player to a pan-India omni-channel sweet and snacks brand.

Speaking to *businessline*, Nalini Parthiban, Co-founder and CEO, Sweet Karam Coffee, said the company hopes to become the voice of the South at a time when many of the big incumbent brands in India are focusing on products with a more mainstream pan-India palette.

SOLID GROWTH
Sweet Karam Coffee has seen an exponential growth post the Covid-19 pandemic which, as Parthiban puts it, brought about a quick commerce revolution that made it possible to take products to the national markets.

The brand closed FY26 with a 3X year-on-year growth in topline, the Co-founder said, without revealing the exact figures.

Founded in 2015, the brand's portfolio includes sweet and savoury offerings such as *Mysore pak*, *athir*

Iran, Oman agree to share
Strait of Hormuz revenue

BOTTLENECK. Tehran says US demands threaten to delay the waterway's reopening

Bloomberg

WAIT & WATCH. An agreement to ease traffic through the chokepoint would likely help pave the way for a resumption of talks on a more permanent end to the conflict **REUTERS**

Iran's military said it has reached a revenue-sharing agreement with Oman on the Strait of Hormuz, as the two sides push for a wider deal on the management of the crucial waterway.

"Agreements have been reached regarding each country's share of the Strait's waters as well as Iran and Oman's share of its revenues," said the Islamic Revolutionary Guard Corps' spokesman Hossein Mohebbi on Wednesday, according to the State-run *Sepah* News agency.

"The US is obstructing this process, causing progress to be delayed," he said, without elaborating.

The comments by the IRGC go further than a joint statement issued by the two countries' foreign ministries on Tuesday, which said they discussed an "interim framework" for resuming ship transits, but stopped short of announcing a final deal and didn't mention fees.

Neither country's foreign

ministry immediately responded to a request for comment.

Iranian officials have repeatedly warned that a deal with Oman on the Strait's navigation would not equate to an immediate re-opening of the waterway that served as a conduit for a fifth of the world's oil and liquefied natural gas before the war.

'US MUST COMPLY'

Tehran has said any normalisation of traffic would hinge on the US complying with the terms of a memorandum of understanding signed in

June, including lifting sanctions and a naval blockade on its ports, as well as unfreezing Iranian assets abroad — none of which the US has signalled it's ready to do.

The 60-day interim deal that lapsed earlier this month suffered repeated breaches from early on as the US and Iran clashed over control of Hormuz. An agreement to ease traffic through the chokepoint would likely help pave the way for a resumption of talks on a more permanent end to the conflict.

Iran started charging

The Strait of
Hormuz has
remained largely
closed since the US
and Israel launched
attacks on Iran on
February 28

some vessels transit fees in the early weeks of the conflict, according to people familiar with the matter, but later pivoted to framing charges as service fees.

Oman told the United Nations' shipping agency in July that it opposes the imposition of transit fees in the Strait, but has privately warned some European officials that vessels may have to pay for related services, *Bloomberg* reported in June.

The Strait of Hormuz has remained largely closed since the US and Israel launched the war against Iran on February 28, although some vessels are still making the crossing. Millions of barrels a day of crude are escaping the waterway, although attacks on vessels have continued.

India, China for advanced talks to settle
boundary issues, LAC management

National Security Adviser Ajit Doval with China's Foreign Affairs Minister Wang Yi

India and China have agreed to advance negotiations on a framework for the settlement of their boundary dispute and strengthen mechanisms for managing the Line of Actual Control (LAC), while also deepening cooperation in border trade and pilgrimage. This is a fresh effort to consolidate peace and stability along the border and improve bilateral ties.

The understanding was reached during the 25th round of talks between National Security Adviser Ajit Doval and Chinese Foreign Minister Wang Yi in Beijing on August 25, according to the Ministry of External Affairs.

In an eight-point outcome issued by the MEA on Wednesday, the two sides reaffirmed their commitment to guidance from the leaders of the two countries and to maintaining peace and tranquillity in border areas to create conditions for the "healthy and steady development" of bilateral relations.

The latest talks come ahead of the BRICS Summit in India, which Chinese President Xi Jinping is expected to attend, as the two countries seek to stabilise ties

after years of tensions along the LAC.

Significantly, the expert group on Boundary Delimitation and the Working Group on Border Management under the Working Mechanism for Consultation and Coordination (WMCC) will take forward discussions on an "early and substantial harvest" on boundary delimitation and border management, the MEA statement noted. Their first task will be to finalise their respective terms of reference.

OMNI CHANNEL TALKS

"The two sides agreed that any situation on the ground would be addressed promptly through existing diplomatic and military channels, including the WMCC, local commander-level meetings and other

agreed mechanisms, to resolve outstanding issues and avoid misunderstanding and miscalculation along the LAC. The two sides discussed ways to improve understanding of LAC in appropriate areas, for better border management," the statement highlighted.

The countries appreciated the reopening of the three designated border trading points that could help revive local economies and restore livelihoods. India appreciated the efforts made by the Chinese to increase the batches of Indian official pilgrimage Kailash-Manasarovar Yatra in the Tibet Autonomous Region of China.

The two sides also agreed to advance negotiations on a framework for resolving the boundary question in accordance with the 2005 Agreement on Political Parameters and Guiding Principles for the Settlement of the India-China Boundary Question and subsequent consensus reached during the Special Representatives' talks.

As part of efforts to strengthen border management, India and China agreed to add two meeting points for General-Level Mechanism/Senior Highest Military Commander meetings.

Going forward,
the predominant
growth lever for
the company will
be entering new
geographies

asam, *murukku* and mixture, alongside filter coffee blends.

Going forward, the predominant growth lever for the company will be entering new geographies.

"Almost 50 per cent of our sales now is from non-South markets. Quick commerce has helped democratise the distribution, which means sitting in Chennai, I could get access to two cohorts of consumers — South Indians as well as other pan-India customers. So, we were seeing more and more traction across the country," she said.

Generali Central Insurance Company is exploring a health insurance product that will link premiums to the location of a policyholder.

Further, it is also weighing if cover for cyber-related risks faced by bank depositors and identity theft can be launched.

In an interaction with *businessline*, MD & CEO KG Krishnamoorthy Rao observed that hospital costs could vary significantly between cities.

However, traditional health insurance products charge similar premiums, irrespective of where the customer lives or seeks treatment.

So, Generali Central Insurance, a joint venture between Italy-headquartered Generali Group (75.09 per cent stake) and Central Bank of India (24.91 per cent), is examining a health insurance product that would link premiums to the location where a policyholder receives treatment.

Rao said under the proposed product, customers in higher cost cities such as Mumbai could pay a higher premium, while those in relatively lower cost locations

such as Nagpur could pay less.

However, customers from lower cost locations could face a co-payment, or additional contribution if they choose to undergo treatment in a more expensive city.

Rao opined that this could help align premiums more closely with actual health-care costs.

CYBER COVER

The private sector general insurer is also examining products aimed at protecting

US globally halts all visa
appointments amid
Trump's crackdown

Press Trust of India
Washington

The Trump administration has paused all immigrant visa applications across the world as the State Department aims to tighten restrictions and limit access to applicants who may become dependent on US public benefits reserved for qualified Americans.

According to a *Financial Times* report, the US is training consular officers to evaluate such requests "comprehensively and consistently". The training of consular officers is focused on screening individuals who may become dependent on subsistence assistance or come under the definition of "public charge", the newspaper reported.

'RESCHEDULED' DATES
A public charge is a label used by US immigration officials for a person who is likely to become primarily dependent on the government for financial support.

Immigrant visa applicants with scheduled interviews at

US embassies and consulates have received e-mails stating their appointments were rescheduled, and that they would receive future notice of a new date and time, the report said. US officials claim this will ensure that applicants do not end up relying on US public benefits.

"A more prosperous America means ensuring that visa applicants are not likely to become a public charge, as defined under US law and regulation, and not likely to become dependent on US public benefits reserved for qualified Americans in need," a State Department spokesperson said.

This decision comes a day after the Trump administration proposed a new \$1,03,265 application fee for H-1B visa.

93rd ANNUAL GENERAL MEETING TO BE HELD THROUGH VIDEO CONFERRING (VC) FACILITY OR OTHER AUDIO VISUAL MEANS (OAVM)

1. The 93rd Annual General Meeting (AGM) of Isgsec Heavy Engineering Limited (the Company) will be held through Video Conferencing (VC) or Other Audio Visual Means (OAVM) on **Monday, September 28, 2026, at 11:00 a.m. (Indian Standard Time)**, in compliance with applicable circulars issued by the Ministry of Corporate Affairs ("MCA") and the Securities and Exchange Board of India (SEBI), to transact the businesses that will be set forth in the Notice of the AGM.
2. Notice of the AGM and Annual Report for the financial year 2025-26 will be sent, in electronic mode, to all the Shareholders whose email addresses are registered with the Company's Registrar and Share Transfer Agent (i.e., Alankit Assignments Limited (RTA)), or with their respective Depository Participants.
3. Physical communication containing the weblink and exact path of the Company's website, where the Annual Report can be accessed will be sent to those shareholders whose email address(es) is/are not registered.
4. Notice of the AGM and Annual Report for the financial year 2025-26 will also be made available on the Company's website (www.isgsec.com), Stock Exchange website (www.bseindia.com and www.nseindia.com) and on the NSDL's website (www.evoting.nsdl.com).
5. Members whose name appear in the register of members or in the register of beneficial owners maintained by the depositories as on the cut-off date, i.e., **Monday, September 21, 2026**, shall only be entitled to avail the remote e-voting facility or vote at the AGM, as the case may be.
6. Shareholders can join and participate in the AGM through VC/OAVM facility only. Members participating through VC/OAVM facility shall be counted for the purpose of reckoning the quorum under Section 103 of the Companies Act, 2013. The procedure for joining the AGM will be provided in the Notice of the AGM.
7. Shareholders will have an opportunity to cast their vote remotely and at the AGM on the business as will be set forth in the Notice of AGM through electronic voting system. The procedure for electronic voting by shareholders will be provided in the Notice of AGM.
8. Shareholders holding shares in dematerialized mode are requested to register/update their email addresses, mobile numbers and bank mandate with their relevant depositories through their Depository Participants.
9. Shareholders holding shares in physical form who have not registered their e-mail address with the Company or RTA, can register their e-mail address for receipt of Notice of the AGM and Annual Report by sending a request to rtat@alankit.com or at ramap@alankit.com along with the following documents:
a. signed request letter mentioning your name, folio number, email addresses, mobile number, complete address;
b. self-attested scanned copy of the PAN Card; and
c. self-attested scanned copy of any document (such as Aadhar Card, Driving Licence, Election Identity Card, Passport) in support of the address of the members as registered with the Company.
10. Shareholders holding shares in physical mode who have not updated their mandate for receiving the dividends directly in their bank account(s) through Electronic Clearing Service (ECS) or any other means ("Bank Mandate"), should register their Bank Mandate to receive dividends directly into their bank account, by sending a Cancelled Cheque with pre-printed account number bearing the name of the member or first holder, in addition to the documents mentioned in para 9 above by email at rtat@alankit.com or at ramap@alankit.com.
11. **Nomination:**
Shareholders holding shares in physical form are advised to update PAN, KYC details (i.e., Postal Address with PIN Code, email address, mobile number, bank account details) and nomination details.
12. **Record Date:**
The record date for determining entitlement of members to the dividend for the financial year ended March 31, 2026, if approved at the AGM, is **Monday, September 21, 2026**.

BSE, NSE impose ₹59 lakh fine on NTPC, SJVN, REC

New Delhi: Stock exchanges BSE and NSE together imposed penalties totalling ₹59.14 lakh on power sector PSUs like NTPC, REC and SJVN for breach of norms. NTPC said it has received notices from BSE and NSE with each imposing a penalty of ₹5,36,900 (inclusive of GST) on account of non-compliance with Regulation 17(1) of the listing regulations. In its reply, NTPC said it is a government company and as per the Articles of Association of the company, the power to appoint or remove directors vests with the President of India through the Ministry of Power. SJVN said both have separately imposed a fine of ₹13.44 lakh each non-compliance of certain SEBI listing regulations. Each of the two bourses has imposed a fine of ₹10.77 lakh each on REC. **PH**

Hind Copper OFS gets strong bids on both days

New Delhi: The government has realised nearly ₹3,000 crore from the share sale of Hindustan Copper with the closure of offer for sale (OFS) on Wednesday. The OFS for HCL closed successfully with an enthusiastic response from retail investors, Department of Investment and Public Asset Management Secretary Arunish Chawla said on X. “The issue was oversubscribed on both days, and the Government decided to exercise its entire green-shoe option,” he said. The OFS comprised 5.8 crore shares with base offer size 29,01,073 shares and over-subscription option of 29,01,073 shares. **PH**

Gaja listing could give AIF managers more firepower to invest: UK Sinha

bl.interview

Akshata Gorda
Mumbai

Gaja Alternative Asset Management, which operates under the Gaja Capital brand, made its market debut on Wednesday. UK Sinha, Non-executive Chairman of Gaja Alternative Asset Management and former SEBI Chairman, speaks about the evolution of the AIF industry, exits for private-market investors and the implications of Gaja's listing. *Edited excerpts:*

What does Gaja's listing change for an alternative asset manager?

An alternative asset management company like Gaja, has basically three streams of business. One is the management fees that they get. Second is the return that they get on their invested companies above a certain hurdle, called carry. And third is a sponsor commitment. SEBI regulations mandate asset managers to invest minimum 2.5 per cent of the size of your fund, in the asset in which you are investing. So, this listing gives enough firepower to Gaja and any company which gets listed in future that they can make a sponsor contribution, removing the growth constraint.

Of course, you have to have the capacity and manpower to be able to float two to six funds at a time, but the capital part is taken care of.

Do you expect other AIFs to list?

I want to congratulate SEBI and commend them for their decision to allow this listing of Gaja Alternative. This is a very far-sighted move, a very forward-looking move. It also shows SEBI's confidence that the regulations surrounding listed companies are tight and strong enough to give them confidence. The quarterly reporting, the rules regarding pre-

Smallcap index hits new high even as Nifty, Sensex slip on IT, FMCG drag

SECTORAL ROTATION. Interest shifts from technology and consumer stocks to metals and bank counters

Anupama Ghosh
Mumbai

While the Nifty 50 surrendered early gains to close in the red on Wednesday, the Nifty Smallcap index quietly climbed to a fresh all-time high, a sign that investor appetite for risk is alive, just selective. The session reflected a market in transition: Rotating out of technology and consumer stocks and into metals, banks, and the broader market, even as heavyweight indices struggled to hold ground. “The domestic market ended marginally lower, giving up early gains as sectoral divergence weighed on benchmarks through the ses-

sion,” said Vinod Nair of Geojit Investments, adding that gains in banking and metals were “largely offset by weakness in IT stocks after the US paused visa appointments amid an immigration crackdown”. **INDEX SLIDE** The Nifty 50 settled at 24,207.75, down 0.52 per cent, after touching an intra-day high of 24,378. The Sensex fell 0.24 per cent to close at 77,472. The Nifty Smallcap 100 surged 0.81 per cent to close at an all-time high, while the Nifty Midcap 100 slipped 0.10 per cent. The market breadth remained fairly healthy, with an advance-decline ratio of 1.23 across the Nifty 500 universe. Sectorally, Metals, PSU

Banks, Chemicals, and Private Banks were the standout gainers. IT, FMCG, Realty, and Consumer Durables bore the brunt of the selling. Among Nifty 50 stocks, Kotak Mahindra Bank, Axis Bank, and JSW Steel led gains, while Infosys, Bharti Airtel, and Power Grid

were the top drags. India VIX fell 4.78 per cent, pointing to easing near-term anxiety. “For India, every dollar crude falls is a direct improvement in the import bill, the rupee's stability, and the case for a rate cut,” noted Sarvam Goel of Pocketful. FIIs were net buyers,

Gaja Alternative gains 5.4% on day 1

Our Bureau
Bengaluru

Gopal Jain, MD & CEO, Gaja Alternative Asset Management, with Sriram Krishnan, CBO, NSE

Gaja Alternative Asset Management made a positive debut at ₹185 on the NSE, against the issue price of ₹160, on Wednesday, but failed to build on the gains and finally settled at ₹168.67, up 5.4 per cent over the issue price. During the day, it rose to a high of ₹191.65 and touched a low of ₹170.55. On the BSE, the stock settled at ₹168.70 after opening at ₹185.20. Ravi Singh, Master Capital Services' Chief Research Officer, said investors should focus on earnings quality, particularly recurring management fees, fundraising and consistent exits, while

noting that a heavy dependence on irregular carried interest could warrant a more cautious interpretation of the current valuation.

IPO DETAILS Earlier, the ₹550-crore Gaja Alternative Asset Manage-

ment IPO was subscribed 31.33 times. Ahead of IPO, the company had raised ₹165 crore from anchor investors. The public issue comprised a fresh issue of ₹450 crore and an offer-for-sale of shares worth ₹100 crore. Proceeds from the fresh issue will be used for repayment of debt, seeding new funds and general corporate purposes. Gaja Capital, founded in 2004, is a private equity and alternative asset management firm focused on providing growth capital to entrepreneurs. In January 2025, the company converted from a private limited entity into a public limited company and was renamed Gaja Alternative Asset Management Ltd.

Purple Style IPO opens on Aug 31

Our Bureau
Mumbai

Purple Style Labs Ltd, the parent company of Pernia's Pop-Up Shop, will open its IPO on August 31, with a price band of ₹546 to ₹575 per share. The offer, which closes on September 2, is entirely a fresh issue of ₹680 crore. Abhishek Agarwal, Whole-time Director and CEO, Purple Style Labs, said, “The decision to go public was driven by the company's growth trajectory... once we cross 500 crore revenue we were clear that there is lot of headroom in terms of the industry growth and the market share growth potentially.”

HYUNDAI MOTOR INDIA (BUY) Target: ₹2,600 CMP: ₹2,265 Hyundai Motor India (HML) is entering a comeback phase, with India increasingly becoming a strategic global hub for Hyundai (HMC). The past five years were challenging for HML amid a muted 5 per cent domestic volume CAGR and sustained domestic market share loss (FY26: 12.5 per cent; FY21: 17.4 per cent), owing to a relatively lean product cycle (three/five new models during FY21-26/FY15-20), limited capacity addition (4 per cent FY21-26 CAGR; >90 per cent utilisation), and higher profitability focus (15 per cent/24 per cent FY21-26 EBITDA/EPS CAGR). However, the next five years could mark a strong turnaround, led by the ₹45,000-crore investments reflecting India's growing strategic importance for HMC. This will translate into a stronger product cycle (26 product actions; seven new nameplates), calibrated capacity increase (FY31: 1.1 million units per annum; FY26: 9.09,000 units per annum), deeper localisation (targets 90 per cent; FY26/FY20: 80 per cent/70 per cent), and greater integration with HMC's global operations. We build in volume/revenue/EPS CAGR of 11 per cent/15 per cent/16 per cent over FY26-29E. We believe that HML's market share has bottomed out (expect recovery from September 2026 with the launch of Bayon-based mid-size SUV) and expect it to clock superior growth amid industry moderation (on GST-cut led high base). We retain Buy and raise TP by about 6 per cent to ₹2,600 (26x September 2028E core PER; rolled forward) from ₹2,450.

Systematix Institutional Research

TATA CONSULTANCY SERVICES (HOLD) Target: ₹2,350 CMP: ₹2,271 TCS will acquire Porsche's IT consulting arm, MHP, for ₹320 million, implying an attractive 0.43x CY25 sales multiple. This marks TCS' third acquisition in the past 12 months, underscoring a more active inorganic approach after a long period of limited M&A activity. TCS' stock has underperformed its large peers over one-month basis. MHP brings strong capabilities in automotive, manufacturing, AI, SAP and digital transformation, but its revenue declined 11 per cent year on year to ₹742 million in CY25 and its onsite-heavy model likely implies lower margins than TCS. While the deal contributes only about 2.7 per cent of TCS' estimated FY28E revenue, the attached ₹1.25-billion five-year Porsche contract provides revenue visibility and lowers execution risk. Overall, the acquisition is strategically important as it deepens TCS' presence in Germany and the European automotive ecosystem, though it may be mildly margin dilutive in the near term. Porsche's five-year contract is subject to regulatory and antitrust approvals and is expected to close within the next three-four months. We retain our 14x target P/E multiple, supported by improving client cohort metrics, a 5 per cent payout yield and an attractive 6.5 per cent FCF yield. Accordingly, we maintain our Hold rating with a revised target price of ₹2,350, roll over and value the stock at 14x September 2028E EPS.

TODAY'S PICK.

Bank of Maharashtra (₹85.60): BUY

Gurumurthy K
bl. research bureau

The short-term outlook is bullish for the Bank of Maharashtra. The stock surged over 4 per cent on Wednesday. This rise has taken the share price well above a key resistance level of ₹83.

It also marks the end of the consolidation that was in place for over two months. The level of ₹83 will now act as a good resistance-turned-support and limit the downside. Bank of Maharashtra share price could rise to ₹97 in the coming weeks. Traders can buy Bank of Maharashtra shares now at ₹86. Accumulate on dips at ₹84. Keep the stop-loss at ₹79. Trail

the stop-loss up to ₹88 as soon as the stock goes up to ₹91. Revise the stop-loss higher to ₹90 and 92 when the price touches ₹93 and ₹94 respectively. Exit the long positions at ₹96. Note: The recommendations are based on technical analysis. There is a risk of loss in trading

Avaada Electro files papers with SEBI for ₹7,600 cr IPO

Our Bureau
Mumbai

Avaada Electro Ltd, a vertically integrated solar photovoltaic manufacturer, has filed its Updated Draft Red Herring Prospectus (UDRHP) with SEBI for a ₹7,600 crore initial public offering.

IPO STRUCTURE

The IPO comprises a fresh issue of ₹1,600 crore and an OFS of ₹6,000 crore by promoter Avaada Ventures Private Ltd. Net proceeds from the fresh issue will primarily go towards repaying borrowings worth ₹1,200 crore, with the remainder earmarked for general corporate purposes. The Nagpur-headquartered company currently operates 8.5 GW of solar module manufacturing capacity and 3 GW of TOP-Con solar cell capacity.

It targets expanding module capacity to 13.6 GW and cell capacity to 12 GW by fiscal 2028, adding ingot and wafer production to complete vertical integration.

REVENUE SURGE

Financially, the company reported a sharp turnaround in scale. Revenue from operations jumped nearly sixfold from ₹911.62 crore in FY25 to ₹5,303.52 crore in FY26, while profit after tax grew from ₹173 crore to ₹888.74 crore. Group subsidiary Avaada Energy accounted for 89 per cent of FY26 revenues. The company holds a 3 GW allocation under the government's Production Linked Incentive scheme and is eligible for incentives of up to ₹961.62 crore. ICI Securities, Axis Capital, BofA Securities, HSBC, SBI Capital Markets and IIFL Capital Services are managing the issue.

Skyways Air, Symbiotec Pharmalab IPOs subscribed over 5 times

Our Bureau
Bengaluru

Two mainboard IPOs —Skyways Air Services and Symbiotec Pharmalab — were subscribed more than five times on the final day of issue closing on Wednesday. Skyways Air Services IPO has fetched an overall subscription of 5.08 times, with the QIB portion subscribed 0.49 times. The NII and retail portions were booked 6.90 times and 6.92 times. The public issue of Symbiotec Pharmalab was subscribed 5.31 times. QIBs subscribed 0.59 times, NIIs 12.18 times and retail in-

vestors 5.05 times. The employee portion was subscribed 5.86 times.

SKYWAYS

Skyways Air Services IPO comprised a fresh issue ₹398.80 crore and offer-for-sale of ₹184 crore. The price band was fixed at ₹131-138 a share and the company raised ₹174.5 crore from anchor investors ahead of IPO. Proceeds from the fresh issue will be used for repayment or prepayment of borrowings, funding incremental working capital requirements and general corporate purposes. Skyways Air Services operates in air and ocean freight

forwarding, trucking, warehousing, customs broking, and express cargo and parcel delivery.

SYMBIOTEC

Symbiotec Pharmalab IPO comprised a fresh issue (₹150 crore) and an OFS (₹1,607 crore). The IPO came out with a price band of ₹938-988. Proceeds from the fresh issue will be used for debt payment and general corporate purposes. The Indore-based Symbiotec is a R&D-driven pharmaceutical and biotechnology company with capabilities across organic chemistry, biotechnology and complex injectables.

Gold drops after in-line US inflation data

Gold prices extended losses after US inflation data came largely in line with expectations on Wednesday, increasing bets on a Federal Reserve interest rate hike next month. Spot gold fell one per cent to \$4,611.79 per ounce by 1310 GMT. US gold futures dropped 0.6 per cent to \$4,667.10. Silver fell 0.7 per cent to \$68.15. REUTERS

Crude oil falls as investors focus on Hormuz talks

Crude oil prices fell more than 1.5 per cent as investors focused on Strait of Hormuz talks between Iran and Oman. Brent crude futures were down \$1.65 to \$86.93 a barrel at 1314 GMT. West Texas Intermediate crude futures were down \$1.44 at \$80.92. Both benchmarks fell to their lowest levels since August 10 earlier in the session. REUTERS

Zinc near 4-year high on regional tightness

London: Zinc prices extended gains for a sixth straight session, revisiting their highest levels in more than four years on supply worries and speculative buying. Benchmark three month zinc on the LME rose 1.1 per cent to \$3,932 a tonne. Copper dipped 0.1 per cent to \$14,335. Aluminium and lead were flat at \$3,238 and \$1,905, respectively. REUTERS

Egg prices crash as *Shravan* curbs demand

REBOUND AHEAD. However, rates remain above year-ago levels and may rise after the austere period ends

Subramani Ra Mancombu
Chennai

Farm gate egg prices have dropped by over 20 per cent from last month's peak, while chicken prices have declined from the highs seen a month ago due to lower demand in the auspicious month of *Shravan*. But the trend will likely change once the austere period gets over.

"Due to *Shravan*, broiler chickens are selling at ₹90-95 a kg and eggs at ₹6-6.5 per piece, wholesale ex-farm rate depending upon location," said Ricky Thaper, Joint Secretary, Poultry Federation of India. Egg prices are still ruling above the level of last year's prices, said Suresh Chitturi, Chairman and Managing Director of Srinivasa Farms.

SUPPLY PRESSURES Prices remained elevated even during *Shravan*, when consumption traditionally tends to moderate.

This indicates that supply-side pressures are currently outweighing the seasonal demand correction, said Divya Kumar Gulati, Chairman, CLFMA of India. On Wednesday, the price of an egg at Namakkal, the

country's poultry hub, was ₹5.2 compared with ₹5.9 at the beginning of this month and ₹6.8 in mid-July. "Prices have dropped because export demand also declined," said Vangili Subramanian, President of the Tamil Nadu Poultry Farmers' Cooperative Society.

FARMERS STILL LOSING Thaper said the rates will increase once *Shravan* gets over. Other stakeholders concurred with the view.

Despite prices being elevated, farmers are losing about ₹0.5-0.6 on every egg. "Feed costs have gone up by 40-60 per cent, increasing the overall cost of production sharply," said Chitturi.

Though broiler prices were down until last week, they have increased this week due to Onam festivities, said a

Chennai-based industry source, who did not wish to be identified.

SOARING FEED COSTS

Gulati said the rise in egg prices in July should be viewed against the escalation in poultry feed costs and tightening supply conditions. "Feed accounts for around 65-70 per cent of poultry production costs, making movements in key ingredients, such as maize and soybean meal, a significant factor in egg prices. Soybean meal prices, for instance, rose by around 25 per cent in a single month earlier this year, adding considerable pressure on layer farmers," said Gulati, adding this cost pressure is now being reflected across the value chain. "Poultry farmers are actually underselling eggs. If you

compare the egg prices in 1980 and now, the actual price should have been ₹12 a piece. But still we are at the level of ₹6-7, far below the real cost," said Chitturi.

With major feed components becoming costlier, the Maharashtra industry estimates the farm-level cost of producing an egg has increased to ₹5.2-5.5, from ₹4-4.5 earlier.

KEY CHALLENGE

Gulati said the industry is feeling the pressure on feed ingredient availability. "With feed demand continuing to grow, ensuring adequate domestic availability of maize and soybean meal at competitive prices will be critical to maintaining stability in egg prices," he said. Thaper said ensuring sustainable feed supplies in the coming years

would be a key challenge for the sector. "By ensuring cost-effective supply of animal feed ingredients, the government can directly address the challenge of feed inflation."

"We expect prices to moderate as supply conditions improve, but sustained stability will depend on addressing feed-cost pressures and strengthening the availability of key raw materials," Gulati said.

AUSTERE PERIOD

The Chennai-based source said poultry demand would be hit again during the austere month of *Purattasi* in the Tamil calendar. "People don't take any non-vegetarian food during the month," the source said.

However, Subramanian said the *Shravan* period is more testing since it is observed in more States, compared with *Purattasi*, observed in Tamil Nadu only.

The Indian poultry industry is valued at \$30 billion and employs over 6 million people, directly or indirectly. At 11 million tonnes, India is the fourth largest producer of poultry meat.

With inputs from Vishwanath Kulkarni in Bengaluru; KV Kurmanath in Hyderabad and Amit Vijay Mohile in Mumbai

Branded eggs price may touch ₹20-25 a piece on surge in feed costs

Amit Vijay Mohile
Mumbai

A sharp rise in soybean meal prices and the diversion of maize towards ethanol production, the two key ingredients that supply protein and energy in poultry feed, are driving up the cost of feeding India's layer hens.

The twin feed shock has prompted farmers to cull older birds earlier and reduce fresh chick placements, tightening egg supplies across the country.

The supply squeeze is now beginning to affect branded and speciality egg suppliers such as Eggzo and Country Chicken Co, with prices expected to climb to ₹20-25 per egg, leading egg distributors from Maharashtra told *businessline*.

TWIN SHOCK

Soybean meal, or soya DOC, a key protein source in poultry feed, has risen more than 40 per cent, from around ₹45 per kg to ₹65-66 per kg, amid tighter domestic soybean availability.

Maize, the key ingredient, is under pressure for a different reason. Poultry producers are increasingly competing with ethanol manufacturers for supplies as the ethanol-blending programme creates a major new source of demand.

"The problem is that both sides of the feed equation have become expensive at the same time. Soy provides the protein and maize the energy, leaving farmers with limited scope for substitution without affecting productivity," a Maharashtra-based egg distributor said.

The impact extends beyond rising feed costs. Farmers struggling with months of thin margins have culled older hens and reduced chick placements, constraining fu-

ture egg supplies. "An egg shortage cannot be corrected in the same way as broiler chicken supply. If farmers reduce chick placements today, the impact lingers for months because those birds need time to mature before they begin laying," another distributor said.

FEELING THE HEAT

For suppliers such as Eggzo and Country Chicken Co, higher prices do not necessarily translate into stronger margins.

Branded players incur additional costs related to grading, testing, packaging, logistics and retail or quick-commerce distribution.

While commercial farms can partially offset costs by replacing portions of expensive soymeal and maize with alternatives such as DDGS, broken rice, pearl millet and other oilseed meals, organic and speciality egg producers have limited flexibility because their feed must comply with product standards and certification requirements.

"When regular eggs move towards ₹9, a branded egg priced at ₹15-20 appears relatively affordable. However, if branded eggs themselves rise to ₹20-25 due to higher feed and procurement costs, the market begins to test if premium consumers are willing to pay," a leading distributor in Maharashtra said.

Some relief may emerge when the new kharif soybean and maize crops reach *mandis* around October-November. However, the growing demand for maize from ethanol producers could keep feed costs firm.

For branded egg suppliers, this creates an unusual challenge: the price gap with regular eggs is narrowing even as the cost of producing premium eggs continues to rise.

Rising demand for protein fuels soymeal offtake

Vishwanath Kulkarni
Bengaluru

Domestic consumption of soybean meal has picked up in both the livestock feed and food sectors, driven by growing demand for protein-rich products.

According to the Soybean Processors Association of India (SOPA), domestic feed-sector consumption rose about 2 per cent to 53 lakh

tonnes (lt) during October-July of the current oil year, from 52 lt a year ago.

Food sector offtake increased 8 per cent to 7.4 lt from 6.85 lt.

DN Pathak, Executive Director, SOPA, attributed the higher off-take to growth in the poultry sector and rising demand for protein foods.

"Growing health awareness and rising income levels are fuelling demand for protein," he said.

EXPORTS DECLINE

Soymeal exports, however, fell 43 per cent to 9.72 lt during October-July from 17.08 lt a year ago, as Indian prices remained higher than global prices.

Soymeal production declined about 7 per cent to 70.62 lt, mainly due to lower soybean arrivals following a decline in crop yields last year.

Soybean arrivals fell 13 per cent to 82.5 lt from 95 lt.

Imports, however, surged to 8.94 lt from just 0.02 lt a year ago.

SOPA estimates soybean stocks at the end of July at 22.75 lt.

CROP CONDITION GOOD

Soybean sowing for the ongoing kharif season is nearly complete.

According to the Agriculture Ministry's latest data, acreage stood at 121.35 lakh hectares (lh) as of August 21,

marginally below last year's 122.76 lh.

Uttar Pradesh, Karnataka, Gujarat, Telangana and Andhra Pradesh recorded higher acreage, while major producing States such as Madhya Pradesh, Maharashtra and Rajasthan saw declines.

Pathak said the current crop condition was good, though another spell of rain would be needed to support the crop.

Lower sugar quota for domestic sales has failed to tame offtake, says industry

Prabhudatta Mishra
New Delhi

Even as speculation is blamed for the recent surge in retail sugar price, which was ₹47 per kg in May, the release of monthly quota by the government played a direct role in tightening supply, industry sources said.

Between October 2025 and May 2026, domestic sales allocations were 7 per cent lower than actual mill dispatches in the same period. With monthly quotas consistently matching or kept below the year-ago levels despite rising consumer demand, restricted market availability steadily drove up prices.

The Food Ministry has approved 245.5 lakh tonnes (lt) for sale until August in the current sugar season, which began in October 2025.

If the September quota is

maintained at the year-ago level's 23.5 lt, the total allocation for domestic sales will be 269 lt, which will be 2.4 per cent lower than 275.5 lt in the 2024-25 season.

'INVENTORY REALITIES'

While experts frame these tighter releases as a cautious strategy to maintain stock balance, even as some mills routinely breach quotas to sell excess volumes, industry sources said that as the season closes, the market is confronting actual inventory realities rather than optimistic official estimates.

Sources said that between October 2025 and May 2026, against an allotted quota of 178.5 lt, mills despatched 191.5 lt of sugar to the domestic market for sales, which was 7 per cent more than the permitted quantity.

Considering this, domestic consumption in the 2025-26 season could be in

the range of 288-290 lt. "As the raw sugar, imported duty-free under the ALS scheme for re-export, has been permitted for sales in the domestic market, 3-5 lt sugar may be immediately available in the market. However, it depends on refiners since the release of huge stock at once may crash the market, and there may be a calibrated release," the source said.

SCO PENALTY

Besides, there is no guarantee that retail and wholesale prices will come down after the release even if refiners sell at ex-mill rates, which started falling after the duty-free import decision. For instance, all-India average wholesale prices (₹/quintal) were: 6,036 on August 26, 5,923.88 on August 25, 5,829.94 on August 24, 5,866.67 on August 23, 5,617.53 on August 22,

5,381.39 on August 21, 5,153.72 on August 20, and 5,004.59 on August 19, per data from the Consumer Affairs Ministry. The average wholesale price was ₹4,593.62/quintal on August 1.

Trade sources said the government was aware of higher sales than allotted quotas all through the season, and it is also reflected in its monthly release order, where it mentioned how some mills were penalised due to violation of Rules under the Sugar Control Order.

"When the sugar production in the current season fell during January, the government should have acted at that stage rather than waiting till almost end of the season. Since commodities rule on sentiments, till the time actual physical stock of imported sugar reaches the market, the bullishness may remain," said a senior trader.

Mill gate sugar prices drop below ₹5,000/qrtl

Subramani Ra Mancombu
Chennai

Mill gate sugar prices dropped below ₹5,000 a quintal on Wednesday, but rates at retail outlets continued to rule above ₹60 a kg on Wednesday. Wholesale sugar prices declined by at least ₹100 in key cities such as Delhi, Kolkata, Mumbai, Hyderabad and Chennai.

Mill gate prices have dropped by over by ₹1,700 a quintal since they peaked to record levels last week. Late on Wednesday, a Maharashtra mill offered S-30 grade sugar at ₹4,801 a quintal, while M-30 grade was at ₹4,901.

"Buyers are not willing to offer more than ₹4,500. They are calling the shots now," said an industry source, who did not wish to be identified.

Resale sugar, which traders or agents previously purchased from factories through tenders, was quoted at ₹5,100-5,250 (against

MIXED TREND. Wholesale prices ranged from ₹5,800 a quintal in Mumbai to ₹6,500 in Chennai. Retail prices ranged from ₹61/kg in Mumbai to ₹65 in Chennai

₹5,500-5,800 on Friday) for S-30 grade sugar. The M-30 grade was offered at ₹5,850 in resale.

SOLD AT ₹5,120

Sources said Shree Nilkantheswar SSK Ltd sold 110 tonnes of S-30 sugar at ₹5,120 a quintal on Wednesday, against an offer of 187 tonnes. Another 176.40 tonnes offered at ₹5,120 failed to attract buyers. "The real situation will unveil

when this sugar is bought," the source said.

Wholesale prices ranged from ₹5,800 a quintal in Mumbai to ₹6,500 in Chennai. Retail prices ranged from ₹61 a kg in Mumbai to ₹65 in Chennai. However, the all-India average rose to a fresh high of ₹65.05 a kg, up more than ₹1 from Tuesday, according to data from the Price Monitoring Division of the Department of Consumer Affairs.

Copper: Roll-over the longs

Akhil Nallamuthu
bl. research bureau

Copper futures saw a recovery over the past week. The August futures are trading at ₹1,396/kg, and the September contract is now at ₹1,405.

COMMODITY CALL.

The charts of both the contracts show that the uptrend is intact, and the likelihood of further rally is high. Note that the August contract is nearing its expiry date of August 31 (Monday). Therefore, we shall consider the September contract for analysis and trades.

The September futures rebounded from the support at ₹1,365 last week, where the 21-day moving average coincides. Now trading at ₹1,405, the contract has surpassed

the resistance at ₹1,400 on Wednesday.

We anticipate another leg of rally from the current level, potentially to ₹1,440. On the other hand, if there is a decline from the current level, the contract could find support at ₹1,380 and ₹1,365.

As long as the support at ₹1,365 stays true, the uptrend will remain intact. Notable support below ₹1,365 is at ₹1,350.

TRADE STRATEGY

Last week, we suggested buying August copper futures at ₹1,370 with a stop-loss at ₹1,325. Since this contract is nearing expiry, traders can roll-over the longs to September futures.

Exit longs on August futures now at ₹1,395 and buy the September contract now at ₹1,405. Target and stop-loss can be ₹1,440 and ₹1,380, respectively.

Sri Lanka's Dilmah bets big on India with premium tea-bar expansion

Amit Vijay Mohile
Mumbai

Sri Lanka's Dilmah Ceylon Tea Company plans to invest more than \$1 million initially and open nearly 10 premium tea bars in India by FY30, using India-sourced speciality teas and curated blends to create a luxury tea experience beyond its traditional five-star hotel base.

The rollout would significantly expand Dilmah's existing footprint of about 16 tea lounges globally across Europe, East Asia and the Pacific. The company is also expanding in Australia and West Asia, Chairman and CEO Dilhan C Fernando told *businessline*.

The first Indian flagship is planned for next year, with

Bengaluru, Mumbai and Delhi under consideration, followed by franchise-led expansion.

ALL FORMATS

Hospitality gives Dilmah a familiar starting point. Fernando said the company works internationally with groups, including JW Marriott and Four Seasons, giving it tested concepts to take to Indian hotels.

The economics explain the attraction. A Dilmah speciality tea sachet costs a Horeca customer about ₹35, while premium hotels can charge ₹500-600 for a prepared serving, Fernando said. The value comes from brewing, presentation, aroma, storytelling, food pairing and service.

"If I send a price list to any

Dilhan C Fernando, Chairman and CEO

of our target customers without the explanation, they'll tear it up," Fernando said. "We have to taste, we have to explain."

Dilmah now wants to take that experience directly to consumers. Its 1,200-2,000 sq ft flagship lounges in luxury high streets and malls will offer tea gastronomy, tea-infused food and mock-

tails. Smaller 300-600 sq ft kiosks and shop-in-shops are planned for malls, airports and premium office parks, alongside co-branded formats in luxury hotels.

INDIA-SL RECIPE

India adds another layer. Dilmah spent about a year developing Thambapanni Naksha, an India-focused luxury collection, and is working with about 26 Indian producers, sourcing Assam and Darjeeling teas alongside herbs and spices.

One Assam blend combines the tea's body and intensity with Ceylon cinnamon and natural vanilla.

The teas are already being packed in Kolkata, with further investment planned in packaging and quality control.

Crystal Crop launches tech-led solution for 'Downy Mildew' in grapes

Our Bureau
Mangaluru

Crystal Crop Protection Ltd has announced the launch of 'Dominaris', a technology-led solution developed specifically for the management of downy mildew in grapes.

Downy mildew can pose a significant threat to grape cultivation, affecting foliage, shoots, inflorescence and developing bunches, with the potential to compromise crop health and harvest quality.

DUAL MODE ACTION

A media statement said that Dominaris brings together a dual mode of action with strong acropetal movement, excellent rain fastness and

longer-duration protection, offering growers a comprehensive approach to downy mildew management.

Its activity extends across key stages of disease development, acting on spores as well as germinated hyphae, thereby helping restrict disease establishment and further spread.

It said the technology is designed to provide protection to both existing and newly emerging foliage during critical crop growth stages. By helping maintain a healthy green canopy and supporting new growth, Dominaris is positioned to help growers protect the crop through important developmental stages and support uniform bunch development.

SC judge repeatedly urges CJI to shift out Rajasthan HC acting Chief Justice

ACCUSATION. ‘Maladministration and malpractice on the judicial and administrative sides of the High Court’

Krishnadas Rajagopal
New Delhi

Three letters from Supreme Court judge Sandeep Mehta to the Chief Justice of India (CJI) Surya Kant in August questioned why his “fervent appeals” to transfer the Rajasthan High Court acting Chief Justice Sanjeev Prakash Sharma had been “ignored” despite “clear evidence” of favouritism.

In his first letter on August 2, Justice Mehta wrote to the CJI about the “grim and disturbing scenario” in his parent High Court in Rajasthan.

Justice Mehta charged in this letter that the acting Chief Justice, who is due to retire on September 26, had exhibited a total lack of leadership qualities and exhibited conduct unbecoming of a leader of the institution on more than one occasion.

The Supreme Court judge

IN THE EYE OF STORM.
Acting Chief Justice of the Rajasthan HC Sanjeev Prakash Sharma RAJASTHAN.NALSAS.GOV.IN

reminded the CJI that he had been making repeated requests for appointment of a regular Chief Justice to the High Court since the beginning of 2026.

“However, to date, the request to have a Chief Justice from another State in my parent High Court has met with no positive response,” Justice Mehta wrote.

He claimed there was mal-

administration and malpractice on both the judicial and administrative sides of the High Court.

According to Justice Mehta, cases were suddenly being withdrawn and shifted to the Bench of the acting Chief Justice (ACJ) without any justifiable cause.

Justice Mehta said he was initially asked by the CJI to provide a list of these cases in writing but was immediately thereafter assured that there was no need to place anything in writing and suitable action would be taken.

The next letter, dated August 10, stated that the CJI had asked Justice Sharma to respond to the shifting of cases, but no specific information was available about the reply or the facts of these cases.

GUEST HOUSE PLAN

Justice Mehta alleged that the ACJ had called and humi-

liated judicial officers in Rajasthan to satisfy a “personal vendetta.” A full court meeting was held to designate a “large number of favoured advocates as seniors”, that too, on a working day. A “fanciful plan” was made for a multi-storied tower with almost 100 rooms to function as a guest house for the High Court. The apex court judge called it a “sheer waste of public money”.

JUDGES WORRIED

According to Justice Mehta, anguished judges of the High Court had said that they were “frequently threatened” with retributive action, including transfer, by the ACJ, who claimed “closeness” with the CJI.

Justice Mehta pointed out that the CJI’s Bench had recently observed the growing trend of judges passing orders for extraneous considerations in the autumn days

of their careers. He termed this as attempts to “hit sixes” before retirement.

“It is indeed ironical that on one hand, the CJI is flagging corrupt practices by judges in the eve of their careers, and here we have an ACJ indulging in these very activities with impunity,” one of the letters said.

He said it was “beyond comprehension” why “such a long rope” was given to a judge whose request for repatriation to the Rajasthan High Court was not accepted by the Supreme Court Collegium in March 2023 but was finally recommended for repatriation to the Rajasthan High Court in a Supreme Court Collegium meeting on May 26, 2025.

Justice Sharma was appointed acting Chief Justice of Rajasthan in September last year. He has been holding the post for over 10 months now.

Experts fear synthetic overflow as AI text found in over 1/3rd of web pages

KV Kurmanath
Hyderabad

The worst fears of computer science experts about the possible deterioration of original writing, content quality and diverse writing styles have come true, with researchers finding that the share of AI-written content has grown sharply since large language models (LLMs) arrived in 2022.

AI experts expressed concerns that this could affect future AI systems as their training data would contain far more synthetic material, potentially degrading the quality over time.

According to the Pew Research Centre’s analysis of

nearly half-a-million English language webpages, about 10 per cent of the sample (10,000 webpages collected in July 2026) reflected signs of AI fingerprints.

When researchers filtered the data to look strictly at content published after the release of ChatGPT, they found that over one-third of those recently published pages were likely written or

substantially edited by AI.

The report, however, maintained that AI detection models weren’t perfect. They sometimes misclassified human-written documents as showing signs of AI authorship and vice-versa.

Another study, *The Impact of AI-Generated Text on the Internet*, by researchers from Imperial College London, the Internet Archive and Stanford University, found that by mid-2025, roughly 35 per cent of newly published websites were classified as AI-generated or AI-assisted, up from zero before ChatGPT’s launch in late 2022.

PJ Narayanan, the former Director of the International Institute of Information Technology-Hyderabad

(IIIT-H), felt that the dominance of AI-generated content on the Internet is a major concern, and these percentages will steadily rise as AI tools improve and gain wider adoption.

QUALITY DEGRADATION

“While humans can only create content at a fixed, limited pace, individuals and companies utilising powerful AI systems can generate data at an exceptionally high rate, practically without limits,” he said. Citing the Pew study, he said, “One direct consequence will be on future AI systems, as their training data will contain far more AI-generated material, potentially degrading their quality over time. More subtly, people in-

teracting with online content may unconsciously alter their writing styles to mimic AI,” he said.

AI analyst Kashyap Kompella said, “The next constraint is not data quantity, but data provenance [the chronological record of information origins].”

He said this would raise the value of private and proprietary datasets.

“We are moving from a data-labelling economy to a data-creation economy. The first AI data industry paid people to annotate existing information. Going forward, we will pay experts to create new problems, examples, scenarios, workflows and evaluations specifically for AI systems,” said Kompella.

Apollo’s flagship oncology unit expands footprint into multi-speciality healthcare

Our Bureau
Chennai

Apollo Hospitals on Wednesday announced the transition of its flagship oncology unit at Teynampet in Chennai into a comprehensive multi-speciality hospital.

The facility, formerly known as Apollo Cancer Centre, has been officially renamed Apollo Speciality Hospitals.

Established in 1993, the hospital, while maintaining its established tertiary and quaternary cancer care services, will now provide full-fledged clinical and surgical interventions across cardiology, neurology and neurosciences, gastroenterology, pulmonology, spine and orthopaedics, urology, critical

NEW CHAPTER. (from left) Sunetta Reddy, MD, and Preetha Reddy, Executive Vice-Chairperson, Apollo Hospitals; KG Arunraj, TN Health Minister, and Harshad Reddy, Director, Group Oncology and International, Apollo Hospitals BUJOY GHOSH

care, and internal medicine, the healthcare major said.

The upgraded facility comprises 300 beds, including 51 critical care beds, supported by five modern operating theatres and a cath lab.

“Patients presenting with complex clinical conditions frequently require coordin-

ated, cross-speciality evaluation and care.

Tamil Nadu continues to strengthen its public and private healthcare ecosystem, and the government supports initiatives that enhance public access to high-end, and a specialised medical infrastructure,” said chief

While continuing cancer care services, it will provide full-fledged clinical and surgical interventions across diverse specialities

guest KG Arunraj, Minister for Health & Family Welfare, in his address.

UPGRADED INFRA

Key additions to the campus include a dedicated 24/7 stroke care unit, Tamil Nadu’s first zoom endoscopy system for high-definition diagnostic and therapeutic gastrointestinal procedures, an advanced bronchoscopy suite, and a specialised sleep lab, Apollo added.

Maruti Suzuki becomes first PV manufacturer to dispatch vehicles by rail to TN’s Pollachi Terminal

Our Bureau
Chennai

Maruti Suzuki India Ltd announced that its automobile rake reached the Pollachi railway terminal in Tamil Nadu earlier this week, making it the first passenger vehicle manufacturer to dispatch vehicles by rail to the terminal.

The rake, carrying 120 vehicles, including popular models such as Wagon R, Ertiga, Dzire and Celerio, was flagged off from Maruti Suzuki’s Manesar in-plant railway siding on August 18.

The carmaker worked closely with Indian Railways to operationalise the Pollachi railway terminal for rail-based vehicle dispatches, adding another destination in southern India alongside Coimbatore.

The terminal will enhance Maruti Suzuki’s ability to

WHEELS ABOARD. The rake, carrying 120 vehicles, including models like Wagon R, Ertiga, Dzire and Celerio, was flagged off from Maruti Suzuki’s Manesar in-plant railway siding on August 18

serve its customers in southern India, the release said.

The Pollachi railway terminal is expected to support nearly 70 automobile rakes annually, enabling the delivery of over 11,000 additional

vehicles each year through the railways to the region, said the release.

Govt directs CEA to end critical power imports by 2030

Press Trust of India
New Delhi

The government has directed the Central Electricity Authority (CEA) to prepare a roadmap for indigenisation of SCADA systems critical for power infrastructure to phase out imports by 2030.

The Centre’s move comes as reliance on foreign technologies for critical infrastructure may expose utilities to supply chain disruptions.

Supervisory Control and Data Acquisition (SCADA) is crucial for monitoring and controlling the power sys-

tem in generation, transmission and distribution functional areas.

The critical system has the ability to exercise control over a specific device and to confirm its performance in accordance with the directed action. During the Prime Minister’s sectoral review meeting held in December last year, indigenisation of SCADA systems, which are presently being imported, was identified as an important action point for enhancing self-reliance and cyber-resilience of the power system, the CEA said in a report dated August 25. The Min-

istry of Power on December 12, 2025, informed about the decision of the Secretary (Power) that the system is not to be imported beyond 2030 and efforts have to be initiated for its indigenisation, the report said. In this regard, the CEA said it was requested to suggest a trajectory of SCADA indigenisation after consultations with the concerned stakeholders.

Accordingly, a committee was constituted under the Chairmanship of Member (Planning), CEA, to formulate a plan for indigenisation of the control systems.

Delhi logs 138 fresh H1N1 cases; tally reaches 2,446

New Delhi: The national capital reported 138 H1N1 cases in the last 24 hours, taking the cumulative number of cases this year to 2,446, while the total number of Influenza-A cases stood at 3,177, said the Delhi government on Wednesday. Health Minister Pankaj Kumar Singh held a review meeting with medical directors and medical superintendents of Delhi hospitals to assess preparedness for H1N1, seasonal influenza and other illnesses. The Minister directed hospitals to strengthen emergency services and ensure adequate availability of isolation beds, doctors and medicines. Hospitals were asked to maintain five isolation beds, while larger hospitals were directed to keep 10 or more beds to manage influenza. **PTI**

US economy expansion sluggish at 1.5% in Q2

Washington: The US economy grew at a sluggish 1.5 per cent pace from April through June. But consumer spending stayed strong. The Commerce Department reported on Wednesday that growth in gross domestic product — the nation's output of a goods and services — decelerated from a 2.1 per cent pace from January through March. The second-quarter growth number was unchanged from the department's first estimate. Still, consumer spending, which accounts for about 70 per cent of US economic activity, increased at a healthy 3.4 per cent annual clip, up from 0.5 per cent in the January-March period. **PTI**

Modi offers help to Nepal; over 100 Indian tourists missing in floods

CHAOS REIGNS. 384 travellers, including 291 foreigners and 93 Nepalis, missing after flash floods in Rasuwa

Amiti Sen
New Delhi

Prime Minister Narendra Modi on Wednesday spoke to his Nepali counterpart Balendra Shah, conveying his condolences over the loss of lives in the devastating flash floods in Nepal's Rasuwa district, while offering all possible humanitarian assistance as rescue operations continued in the neighbouring country. More than 100 Indian tourists are among the hundreds of people reported missing in the floods, officials said.

DEATH TOLL
At least 31 persons are feared dead and nearly 400 are missing, with the full extent of the casualties and damage still being assessed by the Nepali government. "Spoke to Prime Minister Balendra Shah and conveyed condolences on the loss of lives due to the floods in Nepal. The people of India stand in solidarity with their sisters and brothers in Nepal

NATURE'S FURY. Several buildings were submerged or flattened after a sudden and massive flood surged through the Bhote Koshi river in Nepal's Rasuwa district on Wednesday **PTI**

at this difficult time. India is ready to provide all possible humanitarian assistance to Nepal. Our teams are co-ordinating closely on rescue and relief efforts," said Modi in a post on X.

The flood-hit route is a key gateway to Langtang National Park and the Gosainkunda pilgrimage site, a sacred high-altitude lake that attracts thousands of devotees, particularly during

the *Rakshabandhan* festival, which is on Friday. "India is preparing to send relief material to Nepal at the earliest, while the government is co-ordinating with Nepali authorities on rescue and relief

operations and extending assistance to Indians affected by the floods," an official told *businessline*.

The Indian Embassy in Kathmandu said it was in touch with Nepali authorities for the early rescue and relief of Indian nationals affected by the flash floods.

EMERGENCY CONTACTS
The embassy also issued two emergency numbers for assistance and information concerning Indian nationals affected by the floods: +977 985 131 6807 and +977 970 910 7500.

According to a preliminary situation report, which has been compiled by the Nepal Tourism Board, 384 travellers, including 291 foreign nationals and 93 Nepali nationals, have been reported missing following the floods in Rasuwa.

The missing include 105 Indian tourists and 37 non-resident Indians, while others are from countries that include the US, Malaysia, the United Kingdom, Australia, the Netherlands and South Africa.

IT revenue growth to be stable at 6% in FY27

Our Bureau
Bengaluru

India's IT sector is undergoing a structural shift from volume-based contracts to high-value digital services, driven by hyper-automation and AI, according to Brickwork Ratings.

The sector recorded \$418 billion in services exports in FY26, with revenue growth at 6.1 per cent in FY26 and projected at 6.0 per cent in FY27.

Early results for Q1FY27 from the sector's largest firms broadly validate this trajectory. India's IT services sector began FY27 on a soft note. Larger Tier-1 firms posted modest low single-digit growth in constant currency terms, though revenue in rupee terms appeared higher on account of currency depreciation.

UNDER PRESSURE
Meanwhile, margins came under pressure from annual wage hikes and continued investment in AI talent. Mid-sized firms fared somewhat better on growth, with steady deal wins and rising AI-led revenue helping keep the sector's medium-term outlook intact. Brickwork

Ratings maintains a stable credit outlook, supported by steady technology exports, AI adoption and policy support. However, AI-based developments may necessitate operational realignment and investment in specialised capabilities.

AI SKILL DEVELOPMENT
India's second position globally in AI skill development and India AI Mission's deployment of more than 38,000 GPUs are supporting the sector's transition, according to the ratings agency.

"More than 1,700 GCCs are leveraging domestic data centre capacity, expanding at over 20 per cent annually. The sector further benefits from a 15.5 per cent common safe harbour margin for consolidated IT categories introduced in the Budget 2026-27," said Rajeev Sharan, Head of Research, Brickwork Ratings.

Operating margins are estimated to have moderated to 20.1 per cent in FY25, as companies absorbed higher costs of specialised AI talent. As digital investments mature and automation improves efficiency, margins are projected to recover to 21.8 per cent in FY27.

Air India, IndiGo to add flights as Philippines tourism picks up

Aneesh Phadnis
Mumbai

Indian passengers will have more travel options to Manila as IndiGo and Philippines Airlines plan to launch new flights in the coming months. Air India, too, is enhancing capacity on the Delhi-Manila route by deploying a 256-seater twin-class Boeing 787 aircraft from October 25. The move

comes amid growth in trade and tourism between the two countries. Over 60,000 Indians visited the Philippines in the first six months of CY2026, taking advantage of the visa-free entry scheme.

Indian arrivals in the South-East Asian nation grew 43 per cent on a year-on-year basis.

Bilateral cooperation is also rising, with India and the Philippines elevating re-

lations to a strategic partnership in 2025. Apart from collaborating in the digital and defence sectors, the two sides are also looking to increase trade and investments.

NEW ARRIVALS
Philippines Airlines is planning to start flights to Delhi and Mumbai in its winter schedule. IndiGo has sought approval from the Civil Aeronautics Board of Philip-

Over 60,000 Indians visited Philippines in the first six months of CY2026, taking advantage of its visa-free entry

pires to launch flights. According to local media reports, IndiGo intends to operate flights to capital Ma-

nila and island of Cebu, which is popular for scuba diving.

"We are witnessing a marked increase in inquiries for travel to the Philippines. The country is benefiting from two important drivers — visa-free access for Indian travellers and improving air connectivity. It would be particularly beneficial to see connectivity expand from multiple Indian metros to both Manila and Cebu as this

will broaden access beyond the Delhi market," said Neeraj Singh Dev, Executive Vice-President (domestic and short haul holidays), Thomas Cook India and SOTC Travel.

Currently, Air India operates on the Delhi-Manila route daily with a 188-seater Airbus A321 aircraft. Air India started with five weekly flights last October and made it a daily service.

"Passenger volumes have

grown in both directions every quarter since launch, and load factors on the return Manila-Delhi sector in particular have twice touched low-80s. Manila's traffic clearly skews towards price-sensitive leisure and visiting friends and relatives segments. A bigger two-class aircraft lets the airline chase that volume more aggressively," said Ameiya Joshi, founder of aviation blog Network Thoughts.

Meta reaches \$17 billion settlement in US over social media harm to children

Reuters

Meta Platforms agreed to pay a maximum \$16.68 billion as part of a settlement to resolve claims brought by several US States that the company designed Facebook and Instagram to addict children, misled consumers about their safety and improperly collected personal data of children who used its platforms, court papers show.

FEDERAL TRIAL

The settlement was reached during a California federal trial over claims brought by 29 States, averting one of the highest-profile tests yet of allegations that social media companies harmed young users. Meta also agreed to make changes for teenage users of Facebook and Instagram nationwide, including daily usage limits and

nighttime blocks, court papers show. The Menlo Park, California-based company denied wrongdoing in agreeing to settle. Shares of Meta rose 4.4 per cent in pre-market trading. The claims were part of a broader wave of litigation brought by States, local governments, school districts and individuals alleging Meta and other social media companies fuelled a nationwide youth mental health crisis.

The federal trial covered claims from California, Colorado, Kentucky and New Jersey that Meta violated their State laws protecting consumers. It also covered claims from 29 States that Meta violated the federal Children's Online Privacy Protection Act by collecting personal data from users it knew were children without parental notification or consent, and using the data to train machine learning and

generative AI models. Meta has denied the allegations, saying it worked hard to protect children on its platforms. The company argued it could not have misled consumers about whether its services were addictive because social media addiction is not a recognised psychiatric condition.

In a filing before the trial, Meta said California, Colorado, Kentucky and New Jersey were seeking up to \$1.4 trillion in penalties. The States suggested before the

trial began that the figure would be closer to \$200 billion. The States were also seeking additional monetary damages, plus an order directing Meta to make major changes to its platforms and to bar children from creating accounts.

MENTAL HEALTH CRISIS

Meta, Snapchat and its parent Snap, YouTube and its parent Alphabet, and TikTok and its parent ByteDance still face thousands of lawsuits in federal and State courts over claims that they knowingly designed their platforms to have features that are addictive to children and teens, fuelling a mental health crisis.

The federal cases were consolidated before US district judge Yvonne Gonzalez Rogers in Oakland, and include lawsuits brought by individuals, school districts and State governments.

HAL, Safran sign joint development agreement for Aravalli helicopter engine

Our Bureau
New Delhi

Hindustan Aeronautics Ltd (HAL) and Safran Helicopter Engines have signed a contract for the joint design, development, manufacture, supply and lifecycle support of the new-generation 3,500-4,000 shaft horsepower helicopter engine Aravalli.

The design and development of the Aravalli engine is expected to be completed by 2032-33.

However, production will only start when HAL gets clearance from the Cabinet Committee on Security (CCS) and orders from the defence forces for the Indian multi-role helicopter (IMRH) and the deck-based multi-role helicopter (DBMRH).

The engine will be co-produced through the 50:50 joint venture, Safhal Heli-

copter Engines Pvt Ltd, and power HAL's upcoming 13-tonne IMRH and its naval variant, the DBMRH. Both variants of helicopters have beyond military application potential, including offshore transportation, utility missions and VVIP transport, opening avenues for future civil aerospace opportunities, said HAL in a statement on Wednesday.

JOINT DEVELOPMENT

The engine will be jointly developed by both partners on a 50:50 basis and manufac-

The engine will power HAL's upcoming 13-tonne IMRH and its naval variant, the DBMRH

tured by Safhal at Tumakuru in Karnataka.

The programme will provide HAL access to core engine technologies, including the high pressure compressor, power turbine, fuel and oil systems components, accessory gearbox and engine external systems capabilities that are critical for developing future generations of indigenous aero-engines, said the leading state-owned aerospace company.

The Aravalli programme marks an important transition from licensed produc-

tion for the joint development of a high-power helicopter engine, giving India an opportunity to build deeper capabilities in critical propulsion technologies.

The programme will enable HAL to gain expertise and intellectual property in the areas of engine design, while Indian engineers will work alongside Safran engineers throughout the development programme, according to the issued statement.

LONG-TERM VALUE

The programme is expected to generate benefits across the wider aerospace ecosystem. It will create opportunities for the Indian industry in advanced engine manufacturing areas such as raw materials, precision machining and castings, while also supporting the development of indigenous maintenance, repair and overhaul capabilities.

‘Children more vulnerable to adult content via smartphones’

KV Kurmanath
Hyderabad

Smartphones are turning into a dangerous blind spot as children's exposure to porn sites surges to 5.71 per cent on mobile devices, nearly three times more than the 1.91 per cent incidence on desktops.

COMPUTER GAMING

Meanwhile, computer gaming has faded from its former dominance, now holding just a modest 2.6 per cent share of desktop activity, according to Kaspersky's latest research.

Communication platforms and self-directed media tools accounted for most of children's time online on Android devices and Windows desktops in the first

quarter of the calendar year. "Yet, categories carrying a real-world risk, among them adult content, alcohol, tobacco, narcotics and gambling, continue to hold a measurable share of that activity, with mobile devices showing meaningfully higher exposure than desktop in several of them," the findings said.

DISTANT THIRD

On Windows devices, internet, communication and media was by far the most-visited category among Indian children (43.44 per cent), with software, audio and video close behind in the second place (34.99 per cent). "Together, the two categories made up more than three quarters of all activity, with news media a distant third at 8.43 per cent.

Computer games held a modest 2.60 per cent share, a reminder that gaming, while no longer the dominant force it once was, remains part of children's everyday routine on desktop," the study said.

CURIOSITY

"But children's exposure to risk categories on Android told a different story entirely: Adult content reached 5.71 per cent of activity, nearly three times its 1.91 per cent share on Windows. E-commerce (5.70 per cent) and news media (4.69 per cent) were also meaningfully higher on mobile than desktop, while alcohol, tobacco and narcotics held steady at 0.26 per cent, close to the Windows figure of 0.29 per cent," the study observed.

Wagr aims to be one-stop-shop for all pet owners

Suresh P Iyengar
Mumbai

Shashikant Kulkarni, a retired school teacher, was relieved when his son from the US ordered a fresh non-veg meal for his pet dog in India.

"Feeding my son's pet with non-veg food was a challenge since we do not cook non-veg food at home. It has become an issue particularly after my son left for the US recently, leaving his pet with us," said Kulkarni.

Thanks to Wagr, pet parents in the Mumbai Metropolitan Region can now access not just delicious food for their pets, but also trainers, doctors, walkers and ambulance services.

Late last year, Fredun Pharmaceuticals acquired a 78 per cent stake in Wagr, the pet-tech platform, to make it a one-stop-shop for all pet parents.

ACROSS REGIONS. Besides leading metros, Wagr sees big demand for pet meals coming from smaller cities as well **RK NITHIN**

Fredun N Medhora, Director, Wagr, said pet-parenting meals of 150-200 plates are made to order and delivered across the MMR region. A plate of fresh dog meal costs about ₹120-₹350.

"We are also going to add therapeutic diets in our next phase of planning," said Medhora, who is one of the promoters of Fredun Pharmaceuticals, which owns Wagr.

The idea is to develop Wagr as a market place for all pet-related products, including ambulance service and diagnostic centre for pets across Mumbai, he added.

In fact, Wagr's parent company, Fredun Pharmaceuticals, operates the dedicated Fredna Vet Diagnostics in Mumbai.

REGISTERED USERS

Wagr will be a neutral platform for selling pets and pet products, services, depositary to get groomers, trainers, dog walkers, doctors and round-the-clock help service for pet parents, especially a first-time pet parent, said Medhora.

"A cat parent will have various other specific needs from a dog parent. Some exotics, such as birds, rabbits and squirrels, will have different issues. We have a centralised solution and a one-stop idea where pet parents

connect and find solutions," he said.

Wagr just started the beta version in June, and has registered 1,50,000 pet parents on the website.

"Our main central warehouse is in Bhiwandi, but our partner warehouses and logistics are available from Chandigarh to Visakhapatnam to Bengaluru and across north India," he added.

DEMAND AREAS

Besides leading metros, Wagr sees big demand for wholesome meals coming from smaller cities such as Chandigarh, Satara, Sangli, Pune and Vijayawada.

In smaller cities, pet parents have bigger dogs that consume about twice or thrice the amount of food that a small dog eats. Moreover, all the top breeders are from smaller cities as they require space for breeding, said Medhora.
