A major *role* off stage

A theatrical production at Narada Gana Sabha on February 20 featuring close to 300 differently abled participants is looking for volunteers. Read on and find out if you will fit the bill

BY A SPECIAL CORRESPONDENT

Ramana Sunritya Aalaya (RASA), an RA Puram-based organisation that takes the benefits of arts to special children, is calling for volunteers to run various errands for it as it gears up for its annual day celebration on February 20.

Close to 300 children, young adults and adults from seven schools with differing abilities are participating in this theatrical production titled “Veeram – Stories of Courage”, written and directed by its founder and director Ambika Kameshwar. Those who sign up as volunteers would be required to take the participants on to the stage, carry out backstage coordination, assist with costumes and offer prop assistance, help with stage movement and also attend to details pertaining to

Scenes from the rehearsals.

Participating centres

- Andhra Mahila Sabha
- Durgabai Deshmukh Association
- Mathru Mandir (DSFI) Pathway Special School
- RASA Ramana Sunritya Aalaya
- The Grove School Saraswati Kendra
- Dr. MGR School and Home for the Hearing and Speech Impaired
- MGR Janaki College - Section for the Hearing and Speech Impaired
- and Vijay Vidya Nursery and Primary School

stage production.

Those with patience, openness, love for the arts and a caring heart for special children, and presence of mind can sign up as volunteer, says RASA. By virtues of the roles assigned to them, they have the power to create a joyful experience for students and parents.

College students, parents, alumni, educators, theatre practitioners and professionals can sign up either for a few hours of volunteering or for all three days. Rehearsals are happening on February 18 and 19 and the final day is February 20. Once volunteers register, they will be invited for an orientation and on-ground guidance.

Vaishnavi Poorna, deputy director of the organisations, says RASA Day is a culmination of the year-long learning of our students.

Before Ambika Kameshwar started her own institute, she used to function as a facilitator to other special schools in the city and offer the students movement therapy. “This continues even today and the services are offered free, so these special schools have been associated with us for many years,” she says.

The two-hour production will feature seven stories from Indian spiritual mythology and will be staged at Narada Gana Sabha in Alwarpet.

Considerable characterisation goes into the role played by every participant.

“If a child is diffident about something then we give him a role where he will understand what it is to be in the shoes of the character, so they learn to apply it to real life,” she says.

For details, call 9840139607. Volunteer registration form is available at <https://forms.gle/VcGz8YNTkdPebUM6>

Residents given ‘star billing’ at community event

Rani Meyammai Towers in MRC Nagar stages a two-night Oscar-themed cultural event

Snapshots of the event.

RMT Extravaganza 2026, a resident-led cultural programme, was held over two evenings (February 7 and 8) at Rani Meyammai Towers in MRC Nagar, drawing significant participation from the community. Organised around an “Oscar Night” theme, the event featured a coordi-

nated ramp walk, music and dance performances and theatrical presentations, says a press release.

Children, women and men from the residential complex participated in curated segments: Indo-Western fashion presentations, folk and contemporary dance routines, musical medleys and short skits

among others. The men’s ramp walk was exclusively sponsored by Indian Terrain, while the fashion segments were conceptualised and coordinated by Iris Events, the release adds.

Residents said the two-day programme was marked by volunteer

involvement across age groups.

Writer and Padma Shri awardee Sivasankari; entrepreneur and founder of Aircel and mentor at AI-WO.com C. Sivasankaran; and Mrs. Earth International 2017 Anu Alex attended as guests. Organisers said their presence encouraged partici-

pants and added visibility to the programme.

The event was supported by sponsors including Prestige Group, HDFC Bank, Karur Vysya Bank, Chennai Diamonds and other community partners, the press release adds.

Pavers 'retrofitted'

The plants on Anna Salai outside Government Estate Metro Station are meant to be strapping big trees. Even after a recent redemptive exercise, they continue on a restrictive space, one certainly not meant for trees

PRINCE FREDERICK

On Anna Salai, outside the premises of the Government Estate Metro Station, plants best described as "tweens" if viewed from a human perspective, are already exposed to the vagaries of indifferent civic planning. The idea that they are an after-thought had been telegraphed to them right from their cradle.

Too old to be doted upon as saplings and too young to be dubbed trees and allowed to fend for themselves, each of them was gasping for air, the road pressing on every lobe in its "lungs". The road having closed in on them, there was no way their roots would receive any extraneous gift of water. They had to sniff their way to any moisture under the hard slab of bitumen slammed down on them.

Smothered by bitumen, these plants were on a trajectory likely to end in root asphyxiation.

Their growth could be stunted at best. In the worse of cases, after a tree had grown robust, it could have had a fall (a literal one) on account of its Achilles' feet. The restrictive pressure on its roots weakening it, it could become easy picking for some cyclone sometime.

Around two weeks ago, an exercise was initiated to give these trees something they should have been given at the very start of their life journeys: tree pit pavers.

Tree pit pavers have been retrofitted. That would be just a mild amelioration of a rather unhealthy environment these green beings find

Tree pit pavers "retrofitted" in the space around young trees on the section of Anna Salai along the Government Estate Metro Station premises.
PHOTOS: PRINCE FREDERICK

themselves in. They are still provided with only a narrow strip of earth untouched by civic infrastructure. And if one took a closer look, even this patch is not as pristine as it would seem when viewed with a superficial eye. From an image or two of the work before the tree pit pavers were slipped in show a cable running alongside a tree. Besides, silt catch pits are located close to some of them.

That raises the question: was this patch the right space to grow trees? Given the general tenor of civic planning, the duple meter of rethinking and rejigging and some more rethinking and rejigging, this patch could be dug up, further unsettling the trees (that is once they have become trees).

If the trees on TTK Road (particularly the rain trees, planted at a time when awareness about the necessity of promoting native species had not even put out shoots) have huge girths, they arrived before the pavements did. Urban greening now gets the species right (the ones on this section of Anna Salai are all native species) but the spaces consistently wrong. The question worth mulling over: should tree planting be allowed on sections where trees cannot be offered enough earth that is free of "development-based encumbrances".

Returning to Anna Salai, the plants might have been gifted a piece of loose soil on which pavers have been placed, but they are still pressing against the pavement. There is still suffocation, restriction of movement and lack of freedom. Managers of urban roads (in the case of Anna Salai, it would be the state highways) should pause and ponder deeply before allowing or initiating any tree planting exercise on these roads, making sure it would do justice to the trees as they grow up.

A safety move

To boost existing road safety measures, AU Small Finance Bank has installed a traffic police booth at two critical junctions, one at the MRC Nagar Main Junction; and the other are at Karpagam Avenue Road and Santhome Church Signal (opposite the Airtel main office). In addition, 30 barricades in areas that routinely witness heavy vehicu-

lar and pedestrian movement. They include North Mada Street, Kutchery Road, RK Mutt Road and RK Salai, says the release.

This initiative aims to strengthen on-ground traffic management, support the Chennai Traffic Police in maintaining law and order, and enhance road safety awareness among citizens, the release adds.

‘Plea to ply buses through George Town’

View of the temporary bus operations point at Island Grounds.

T.S. ATUL SWAMINATHAN

The Chennai chapter of the Tamil Nadu Merchants Association Council has requested the Metropolitan Transport Corporation to operate its fleet of buses along NSC Bose Road.

Ever since work on revamping the spacious Broadway bus terminus began, buses have been operating from the temporarily created terminuses at Island Grounds and Royapuram.

Buses heading to Island Grounds and Royapuram should

come through Chennai Central Railway Station, Mint Street, Memorial Hall Road, Evening Bazaar Road, Rattan Bazaar Road, and NSC Bose Road, says P. Dhanraj, vice-chairman, Tamil Nadu Vanigar Sanga Peravai.

The same should be followed in the return direction, he says.

If implemented, commuters on routes such as 21, 26, 54, and 60 (towards Royapuram), to name a few, will benefit significantly.

The buses operate along EVR Periyar Salai, North Fort Road, and Rajaji Salai. The buses stop at Nurses Quarters and Parry's Corner bus stop.

Currently, commuters have to take share autos from Chennai Central to reach NSC Bose Road or board 32B, 38C, 1, and 101 from the Central station bus stop or walk from Parry's Corner signal.

Towards Island Grounds Commuters on routes 4, 44, 44C, and 56D, plying through Rajaji Road and North Fort Road, have to walk from Parry's Corner signal. The buses can enter Esplanade Road and use Muthusamy Bridge to reach the Grounds.

People in George Town travelling to the regions along EVR Periyar Salai and Vepery have to board share autos or buses 32B, 38C, and

1 on NSC Bose Road to Rajiv Gandhi Government General Hospital halter, P. Arun Kumar, a commuter, complained.

The region is a shopping hub for a wide range of goods at low prices, and every day, people from across the city come to the area by buses.

However, for a section of bus commuter population, the decision to operate buses to the terminuses without touching Broadway terminus has been a major setback. Secondly, the buses do not stop at the High Court bus stops on North Fort Road.

Blue, green and more

The walkway at Marina Beach radiates in blue; and green as well, with trees adding to the pretty picture, thanks to the Blue Flag Beach project. Picture by Mylapore resident R. Kasim Razvi.

Remove encroachments from Canal Bank Road

BASKAR SESHADRI

Canal Bank or Subbarayan Street is the connecting road from Venkatesa Agraharam towards Luz. MTC buses take Venkatesa Agraharam to reach Dr. Ranga Road and from there, reach East Abiramapuram. The problem is MTC buses find it difficult to turn left near Nandalala since the left side of the road is encroached upon by autorickshaws and cars. A temporary mechanic is working during the day, making it difficult for the vehicles to turn left comfortably.

Among the most affected are those who drive from Canal Bank Road (Marvaadi Thottam). I wish the vehicles are cleared near Nandalala and on Dr. Ranga Road for the convenience of motorists. CMRL could depute a marshal to supervise this area.

Baskar Seshadri is a resident of Mylapore

The evolution of the bins.

LIFFY THOMAS

If waste segregation is still not part of the daily routine in your home, then get ready to fall in line. New rules are coming into effect on April 1, 2026. Under the revised Solid Waste Management (SWM) Rules 2026, notified recently by the Union Ministry of Environment, Forest and Climate Change, four-stream segregation of solid waste at source has been made mandatory. This means your household waste is required to be segregated into wet waste, dry waste, sanitary waste and special care waste; the later includes paint cans, bulbs, mercury thermometers and medicines.

The revised rules, which supersedes Solid Waste Management Rules, 2016, integrate the principles of circular economy and extended producer responsibility, with a specific focus on waste segregation and management.

Those working in this space say some major concerns in Chennai include gaps in availability collection vehicles and processing facilities. There is also a need to enforce rules strictly for all stakeholders.

All bulk waste generators are expected to process wet waste *in situ* or obtain an Extended Bulk Waste Generator Responsibility (EBWGR) certificate stating that on-site processing is not feasible.

Material recovery facilities (MRFs) are again in the spotlight. Under the revised rules, local bodies are responsible for the collection, segregation and transportation of solid waste in coordination with MRFs which may also act as deposition points for e-waste, special care waste, sanitary waste and other waste streams for further processing. MRFs have been formally recognised as facilities for sorting of solid waste, says the note.

Local bodies have been encouraged to generate carbon credits.

Local bodies

The new rules emphasises creation of a Centralised Online Portal to track all stages of solid waste management, including waste generation, transportation, processing and disposal, as well as biomineral and bioremediation of legacy waste dump sites. Registration and authorisation of waste processing facilities with local bodies and State Pollution Control Boards or Pollution Control Committees shall be carried out online through the portal developed by the CPCB.

The rules mandate audits of all waste processing facilities.

Take four

Here is what a cross-section of people from the city have to say about the revised Solid Waste Management (SWM) Rules 2026; the highlight is a four-bin system

VOICES

'Bulk generators must set an example'

Maintaining one more bin is going to be cumbersome for some residents, but it is just about getting used to the practice. We will be meeting to discuss how to bring about awareness about the new rules and how this new system can improve recycling efficiency and reducing landfill waste.

Currently, we follow the two bins, one bag method to collect waste. They were bought in bulk and given to residents for better compliance and uniformity. As in the past, we will have to educate all stakeholders about the rules. It is about consistent conversations and enforcement. Bulk waste generators like us have more reasons to follow rules and keep the city clean.

Our onsite composting has been had a hiatus and I hope the new rules will nudge us into finding new solutions to the challenges we faced in the past.

Sumitha Iyer, waste segregation team, The Central Park South and committee lead, FOMRRA Swacch Bharat

Bulk generators

Bulk waste generator includes entities with a floor area of **20,000 square metres** or more, or water consumption of **40,000 litres** per day or more, or solid waste generation of **100 kg** per day or more.

'We need to conduct awareness sessions'

The new SWM Rules 2026 lays emphasis on the responsibilities of all stakeholders in keeping a city clean by giving only segregated waste. It is possible to follow the four-bin system and we will start conducting awareness sessions. The battery-operated vehicles can accommodate eight bins, so it is just about having some systems in place. Managing sanitary waste is a challenge and if residents are responsible in the way they dispose of sanitary waste, then we will ensure it is taken to the incinerator.

Official, SWM, GCC

'Have stringent rules in place'

While I welcome four-way segregation of waste, I wonder how many of the current waste collection vehicles seen on Chennai roads have space to accommodate multiple bins. Local bodies must set aside dedicated days when different kinds of waste are collected and this must be communicated to residents so that segregation becomes a habit. When we worked in various neighbourhoods in the past, we had pressed separate vehicles into service for dry and wet waste. Stringent rules should be enforced to make contractors/waste management companies fall in line. I wished the revised rules had insisted that big housing projects create infrastructure for composting of waste before handing over the project to residents.

Mangalam Balasubramaniam, expert on solid waste management and founding president of Eco Chakra Abhiyan

'We will tweak our waste management rules'

Aashiana Apartment in Alwarpet is among the first gated communities in Chennai to start composting thanks to the small infrastructure created by the builder and the many programmes that we residents ran to get people to give only segregated waste. Even today our biodegradable waste is composted *in situ*. But we will have to tweak our waste management process as per the new SWM rules. Sanitary waste is currently included in dry waste. The new rules coming into force are only going to make it easier for us to enforce our segregation rules. Sadly non-compliance wittingly or otherwise happens at times and we have to keep reinforcing the rules.

Anita Hegde, Green Club volunteer, Aashiana Apartment

Alwarpet resident shines at debut event

Sixteen-year-old Saanvi Gupta achieved a podium finish at the Junior National Dressage Championships held recently

Sixteen-year-old Saanvi Gupta, a talented rider from the Chennai Equestration Centre, delivered an exceptional debut performance at the Junior National Dressage Championships, competing for the first time in the Young Rider category.

Entering the Young Rider division as a first-year competitor, Saanvi faced riders with four or more years of experience at this advanced level. Undeterred by the

gap in age and exposure, she rose confidently to the challenge and emerged to secure a top national

ranking, marking a significant milestone in her young career, said a press release.

The Alwarpet resident played a crucial role in helping her team secure the National Gold Medal, while also finishing third in the South Zone and fifth overall nationally in individual standings, added the press release.

Central to Saanvi's progress has been the guidance and mentorship of her dressage trainer, Isabelle Hasleder.

Saanvi is not only skilled in the sport but is good with academics and leadership responsibilities. At Alphabet International School, she serves as the school captain.

Three women achievers awarded

Three young women achievers received validation of their journey and momentum for their journey ahead as they were presented with the M.O.P. Yuva Sammaan Awards in its eighth edition at a glittering ceremony on February 12 at M.O.P. Vaishnav College for Women.

International swimmer Bhavya Sachdeva, Asian medalist and national champion; entrepreneur Ranjani K Vivek, founder of Playtoddz Montessori, an innovative company that manufactures educational accessories and toys out of sustainable material for the Montessori school system; and Bharatanatyam artiste Lekha

Prasad, classical dancer and teacher at Shri Silambam Academy of Fine Arts, each received a citation and ₹1 lakh, said a press release.

Chess Grandmaster R. Vaishali was honoured with a special award.

While Vaishali's award was received by her mother, Sachdeva's award was collected by her uncle, as the sportswomen were away at training camps.

The awards were given away by chief guest, actor and producer Simran.

The awardees were chosen through a rigorous selection process. Applications were solicited through

press advertisements, from young women aged between 20 and 35 years, who are doing outstanding work in their respective fields, added the release. The final awardees were selected from among 65 applicants after extensive deliberations by a distinguished jury, comprising J. Meganatha Reddy, IAS, Member Secretary, Sports Development Authority of Tamil Nadu; Lakshmi Menon, CEO, *The New Indian Express*; Suchithra Balasubramaniam, classical musician and Shyam Sekhar, founder and CIO, financial consultancy iThought.

M.O.P. Vaishnav College instituted the M.O.P. Yuva Sammaan Award in its silver jubilee year in 2017-18. Every year hence, the college has chosen three women awardees to confer with the award, in keeping with its goal of supporting and empowering young women to fulfil their potential.

Play area and cafe in Teynampet

Metropolis Play Area and Café in Teynampet is a new space for families to unwind. The space is thoughtfully divided into two distinct play zones to cater to different age groups, says a press release. For children aged eight and below, the soft play zone offers a safe, colourful environment with age-appropriate activities that promote physical development and creative play, it adds.

For those above aged

nine and adults, the arcade zone offers engaging games that brings friends and families together.

Metropolis can be chosen for conducting birthday parties and playdates, the release says.

With ample space and a café serving refreshments, it offers a seamless blend of celebration and comfort, it adds.

The Metropolis is located on K.B. Dasan Road. Phone: 90030 32180.

Battle for footpaths

A private school on Big Street in Triplicane has blocked the footpath with a rope to prevent two-wheelers from being parked there. While parking on footpaths is illegal and violates pedestrian rights, residents say the space cannot be used to park vehicles belonging to the school. PHOTO : RAGHUNATHAN SR

Chennai RWA shines in TN's solar race

Bollineni Hillside has bagged an award for the biggest solar rooftop installation in Tamil Nadu in the category for resident welfare associations

PRINCE FREDERICK

Bollineni Hillside Phase I in Perumbakkam off Old Mahabalipuram Road sprawls across 45 acres and consists of 1295 dwelling units. For ease of administration, the community is cleaved in the middle, the north side servicing a half of those dwelling units and the south side the other half.

Both segments have a separate STP-WTP unit. These units are eminently useful, but are a criminal guzzler of energy, a fact that sticks out painfully when the EB bill arrives. Sajeev Kumar, president of Bollineni Hillside Residential Township Owners Association (BHRTOA), esti-

mates the community's monthly electricity bill at ₹10 lakh. "Electricity expense is one of the top three expenses," he points out.

The effort to whittle down that expense was launched recently, when the community had an operational solar power system in the end of January, 2026. The installation: a 97 kW solar system at one STP-WTP unit, and another 97 kW solar system at the other unit; a whopping 194 kW system in total. The decision to go solar first at these units was shaped by the consideration of significant savings on the EB bill as well as quicker recovery of the investment cost.

By virtue of going solar at this scale, BHRTOA has bagged an award from Ta-

mil Nadu Solar Energy Developers Association (TNSEDA) for the biggest solar power installation in the RWA category across Tamil Nadu.

K. Thirugnanam, secretary, BHRTOA and an advocate, observes that the exercise synergies the various skillsets (BHRTOA president Sajeev is an IT professional) found within the community. To illustrate, he points out a retired senior official from the Tamil Nadu Electricity Board who is a resident of Bollineni Hillside was informally consulted to navigate regulatory nuances, particularly those pertaining to load thresholds and fixed charges that increase for installations exceeding 100 kW. Hence, the split into two units, each racking up 97 kW.

The question of subsidy processing

BHRTOA president Sajeev Kumar underlines the toughest part of the effort: settling on a vendor. Our vice-president Senthil Prabhu visited many RWAs that have gone solar, including those in Coimbatore. BHRTOA treasurer Senthil Kumar S reveals that the vendor finally brought on board was found through the Federation of OMR Residents Association (FOMRRA). Senthil Kumar explains: "I had posted a message in the FOMRRA group that we were looking for an empanelled solar rooftop installation vendor. The overwhelming response was 'we installed, but we did not get the subsidy'. And one member in the group pointed us to this vendor who was known for diligent and effective subsidy processing." BHRTOA secretary K. Thirugnanam says the selected solar energy company, Vesat Renewables Private Limited, based in Coimbatore has had a presence in the solar space for multiple decades.

In sheer numbers

Estimating the cost of things under the sun is Senthil Kumar S's bailiwick as he is a chartered accountant. And he is particularly interested in working out the cost analysis of the solar endeavour at BHRTOA Phase I as he is its treasurer.

Here is what this exercise means to the community, in sheer numbers, as propounded by Senthil.

Installed capacity: 194 kW

Gross project cost: ₹1.1-1.2 crore

Subsidy received under centre's PM Surya Ghar scheme: ₹35 lakh

Net investment: ₹85 lakh

Estimated annual savings: ₹25 lakh

Expected payback: 3.5 to 4 years

Assumed panel life: 25 years

Estimated 25-year savings: ₹7 plus crore

Senthil proceeds to do an ROI analysis:

*If ₹1 crore were placed in a fixed deposit (at approximately 7.5% annual return), the amount to flow in would be ₹7.5 lakh, which would be taxable.

*In contrast, the solar investment promises ₹25 lakh annual savings at a 25% return; and these are non-taxed operational savings.

A lecture on Parkinson's

Parivarthan for Parkinson's Foundation is hosting a special lecture on Understanding and Managing Parkinson's on February 22 at 11:00 am at The Learning Community at Quest in Besant Nagar.

The session will be led by Dr. M. R. Murali, M.B.B.S, M.D., an allergist and immunologist at Massachusetts General Hospital and Harvard Medical School, Boston. Parkinson's is a progressive neurological disorder with no known cure. This session aims to equip attendees with essential knowledge about Parkinson's, address common misconceptions, and highlight practical approaches to managing it over time.

The event is open to people with Parkinson's, caregivers, healthcare professionals and anyone interested in learning more about the condition. To attend, register by calling 96000 52531.
