Substation at Hasthinapuram sought

T.S. ATUL SWAMINATHAN

On February 8, office bearers of the Federation of Civic and Welfare Associations of Zones 2 and 3 (Pallavaram and Sembakkam) in Tambaram City Municipal Corporation held a protest meeting at the Hasthinapuram bus terminus to prod the official machinery to address issues stubbornly ignored. C. Murugaiyan, the federation's secretary, and S. Chandrasekaran, secretary of the Chitlapakkam Anna

Nagar (West) Residents Welfare Association, chaired and took part.

The issues raised at the meeting include establishing an electric substation in Hasthinapuram and providing basic amenities at the Hasthinapuram bus terminus, including proper seating, toilet facilities, a feeding room, and a rest room for MTC staff.

Other demands by residents

Residents also discussed other issues involving various govern-

ment agencies, particularly the railways. These are as follows.

- Remove encroachments on Radha Nagar Main Road, Station Road, and Rajendra Prasad Road
- Construct new stormwater drains and extend existing ones, wherever necessary.
- Provide staircase facilities connecting Radha Nagar subway and Chromepet railway station
- Provide an approach road along Radha Nagar Main Road to the footbridge at the station, along with an escalator facility
- Construct a heavy vehicle subway at Level Crossing 26
- Address stray dog and cattle issues

On account of a protracted road-widening exercise by the State highways, Tambaram Velachery Main Road might be in a state of flux; but should that prevent temporary bus shelters complete with seats from being raised, wherever necessary?

PRINCE FREDERICK

On the State Highways-managed Tambaram Velachery Main Road, around the Mahalakshmi Nagar bus stand (for West Tambaram-bound buses) in Selaiyur, Madurai Military Hotel, R.K. Sri Muniyandi Vilas and Tasty Hotel bestow a rare brand of hospitality upon those entering their geographical coordinates. They are like the hundred-handed Hecatoncheires from Greek mythology, extending their many helpful hands not only to their paying customers, but to bus commuters outside, standing shelterless and seatless.

For a long time, these commuters had been going seatless, standing under the corrugated steel roof of a narrow shelter, the older commuters hunkering down when their knees creak in protest at the workload. After the State highways managed to widen this section of the road, these commuters would be waiting under this shelter, calling to mind the clichéd image of shipwrecked travellers standing in a precarious mound of earth in the midst of a vast sea, its cascading waves threatening to overrun their only refuge. And this refuge for commuters was removed. Inadequate though it was, its loss has meant something to these commuters, as they are now not just seatless, but roofless too.

This shelter was torn down, and its poles shifted to the edge of the road, suggesting the construction of a shelter located in an appropriate and safe space. For well over a month now, the promise has re-

Seatless then, now roofless too

mained a promise. These poles stand shelterless along with the commuters. And where the shelter stood, a barricade now stands as the only bulwark against vehicles being driven in the wrong direction.

The State highways should have rustled up a temporary shelter with seating, and not allowed these commuters to run into the arms of the shops around the bus stand, seeking to rest their tired limbs. These commuters can be seen helping themselves to makeshift seats, in other words, the steel stairs, the raised platform and so on offered by these shops. This is no sit-in protest and these commuters are gently souls resigned to their lot, but this can be construed as a sit-in, underlining official indifference.

The section of the State Highways active in these parts should learn the language of Chennai Metro Rail Limited, which fashions makeshift shelters complete with seating when it has removed a bus stop from its original moorings and

relocated it.

There are inherent challenges in widening this arterial road in one smooth move from one end to another. It is inevitable that the road would resemble a poorly pressed tube of toothpaste, narrow parts alternating with the wide, the widening exercise met with resistance through legal recourse on some sections. The widening exercise around the Camp Road junction has hit a roadblock, and so the current bus stops would be relocated whenever the widening finally happens. But should that stop the managers of the road from offering commuters respectful temporary seating. The Camp Road Junction bus stand for Medavakkam-bound buses resemble the rail close to the stage of a rock concert, large numbers of commuters standing during rush hour, some throwing themselves upon the hospitality of the shops around.

Mahalakshmi Nagar bus stop (towards West Tambaram), then and now; Camp Road junction bus stop packed with standing bus commuters. PHOTOS: PRINCE FREDERICK

‘Waiting for Water Resources Department to furnish details’

B. SARAVANAN

Water Resources Department (WRD), Lower Palar Basin Sub Division, Chengalpattu, should submit details about Thiruneermalai Eri to the National Highways Authority of India (NHAI).

The division has been sitting on this necessary exercise. In the last week of October, a flood mitigation meeting was held for the Thiruneermalai region.

Residents sought additional culverts below Chennai Bypass Road in Thiruneermalai to drain rainwater from Thiruneermalai Periya Eri

Restoration work is under way at Thiruneermalai Eri.
PHOTO: SPECIAL ARRANGEMENT

to Adyar river.

The Chengalpattu District Collectorate requested WRD and NHAI to conduct an inspection of the existing culvert.

WRD was asked to furnish details about the lake's upstream, downstream, run-of-course, and flat and pitted areas.

On November 19, both NHAI and WRD conducted inspection, but no update has been shared.

I sent an email to NHAI seeking an update and learnt that WRD has stated that Chennai Metropolitan Water Supply and Sewerage Board must make an inspection, as Veeranam drinking water pipes lie

underground.

Again on December 16, an inspection was carried out, but its details were not shared.

I had sent emails to Chengalpattu District Collectorate, WRD, and the Secretary of the Public Works Department in December and January, requesting that the details be shared with NHAI.

WRD Lower Palar Basin division in Kancheepuram has requested the Chengalpattu division. I hope the Chengalpattu division does the needful, thus paving the way for flood prevention in the region.

B. Saravanan is a resident of Thiruneermalai

Transplant trees from New Colony

M. S. VAIDYANATHAN

At the intersection of First Cross Street and First Main Road in Chromepet New Colony, there are a few overgrown trees, including one with roots protruding from the ground.

Besides the trash that accumulates around them, overhead electrical cables and parked vehicles obstruct the area, creating a persistent threat to people and property.

It would be appropriate for the Tambaram City Municipal Corporation to transplant the trees immediately.

Switch box at Abraham Lincoln Street should be replaced

S. CHANDRASEKARAN

An electrical switch box on Abraham Lincoln Street, Nazeeb Avenue, Chitlapakkam, under the maintenance of the Tambaram City Municipal Corporation, is fully corroded and se-

verely damaged.

The box poses a risk to residents.

I request the relevant authorities within the civic body to take the necessary action.

S. Chandrasekaran is a resident of Chitlapakkam

‘Ply direct trains to Bengaluru’

P. SRINIVASA RAGHAVAN

With the revamp of the Chennai Egmore and Tambaram railway stations, it is high time Southern Railway looked into operating one or two direct trains from the third terminal to Bengaluru.

During rush hour, it takes around two hours by road to reach Chennai Central railway station for people residing in Tambaram and nearby areas.

On several occasions, residents have raised the issue with the Railways, but there has been no response.

P. Srinivasa Raghavan is a resident of Rajakilpakkam

Terminus in Madipakkam is underutilised

SHRIKUMAR

There is a vast Metropolitan Transport Corporation (MTC) bus terminus in Madipakkam, but only M45B service, plying till Anna Square, operates from the facility. The rest of the space at the terminus is used as a private parking lot

and to conduct functions and meetings.

Senior citizens, working women, schoolgoing children, and the general public request that the MTC fully utilise this terminus and expand services, which would be helpful to commuters in these regions.

You can be our volunteer writer

Dear readers, you can be our volunteer-writer by writing to us about issues and events in your neighbourhood. You should send the write-ups to downtownfeedback@thehindu.co.in. Letters must carry the contact number

Finally, Old Trunk Road gets **street lights**

Following representations from residents, the Cantonment Board and the Tambaram Corporation have coordinated to restore and install street lights along affected stretches of Old Trunk Road

T. ARVIND

Old Trunk Road, a key link connecting the Grand Southern Trunk (GST) Road, Shanthai Road and the Pallavaram railway station, had remained poorly lit for several months, triggering safety concerns. While the southern half of the road is maintained by the Tambaram Corporation, the remaining stretch up to Shanthai Road falls under the Cantonment Board.

The St. Thomas Mount-cum-Pallavaram Cantonment, one of the oldest in the country, established in 1774, administers areas including St. Thomas Mount, Meenambakkam and parts of Pallavaram.

Safety concerns earlier

More than half-a-kilometre of the stretch under Ward 5 had been without functional streetlights, making it unsafe after sunset, according to residents. Women commuters had reportedly avoided the route, opting for longer alternatives to reach the railway station

and Shanthai Road.

The portion below the Pallavaram flyover, which provides access to the railway station from Shanthai Road and a nearby church, was also poorly lit. Residents had pointed to broken liquor bottles, garbage accumulation and instances of harassment and theft as issues that needed attention.

Coordinated action

Following representations from residents, the Cantonment Board and the Tambaram Corporation coordinated to restore and install streetlights along the affected stretches, including the one below the flyover.

A Cantonment Board official said the lighting work had been completed and that steps were under way to further enhance safety. A proposal to install CCTV cameras at vantage points up to Shanthai Road has been finalised and is expected to be implemented by March. The Board will also step up coordination with

the police to ensure improved surveillance and periodic patrols, the official added.

With Pallavaram serving as a major transit hub offering access to buses, suburban trains and the Metro, residents have welcomed the move and expressed hope that sustained maintenance and enhanced security measures would ensure safer access to these facilities.

The stretch below the Pallavaram flyover near Old Trunk Road is illuminated following the installation of new streetlights; and (below) intersection of Old Trunk Road and the road leading to the Pallavaram railway station remains poorly lit at night. PHOTOS: SPECIAL ARRANGEMENT AND T. ARVIND

WHAT RESIDENTS WANT

Commence road work at Bhuvaneshwari Nagar Road

Bhuvaneshwari Nagar Road in Mudichur resembles a muddy puddle after the rains as the stretch has not been laid for years. Located near Mudichur Village Panchayat Office, the residential area also has a cremation ground.

V. Raghavan, a long-time resident of Mudichur, says the road turns slushy and slippery after the rains.

Residents and the public are forced to wade through the water-stagnated stretch.

"I have sent petitions to the Chengalpattu District Collectorate, Tamil Nadu State Government, the former Kancheepuram District Collectorate, and the Village Panchayat, to lay the 30-Foot Road (for less than 100 metres). Even the public who come for the cremation of their friends and relatives have raised the issue with the officials," says Raghavan.

Despite repeated petitions, the road laying work has not commenced at any stage, and the road remains in poor condition, causing inconvenience and safety risks for the public.

A wall and a gate must be constructed and put up at the ground's boundaries.

Bhuvaneshwari Nagar Road in Mudichur, on January 28 after a downpour. PHOTO: SPECIAL ARRANGEMENT

'Relocate the dumpyard'

The dumpyard near the lake.

Volunteers of Saving Nanmangalam Lake Team (SNLT) have requested the St. Thomas Mount Panchayat Union to relocate the dumpyard from the lake.

R. Sathya, a core volunteer at SNLT, says, "When we started this campaign in June 2024, it was an open dumpsite. Following our relentless efforts and our request during last year's walkathon to save the water bodies, the Nanmangalam Village Panchayat provided a shed."

The issue was raised during this year's walkathon as well.

The Block Development Officer of St. Thomas Mount Pan-

chayat Union visited the spot (no alternative site has been identified) and assured to close the shed and concrete the area's base to prevent wastewater seepage into the groundwater.

The team volunteers are wondering whether the efforts to provide a shed and a concrete floor are merely a way to create a permanent dumpsite, as people have now started dumping outside the shed, she adds.

Cows and dogs come and rummage through the yard, and this poses a risk to pedestrians. As a result, schoolchildren are afraid to take this stretch.

Chennai RWA shines in TN's solar race

Bollineni Hillside has bagged an award for the biggest solar rooftop installation in Tamil Nadu in the category for resident welfare associations

The question of subsidy processing

BHRTOA president Sajeev Kumar underlines the toughest part of the effort: settling on a vendor. Our vice-president Senthil Prabhu visited many RWAs that have gone solar, including those in Coimbatore.

BHRTOA treasurer Senthil Kumar S reveals that the vendor finally brought on board was found through the Federation of OMR Residents Association (FOMRRA). Senthil Kumar explains: "I had

posted a message in the FOMRRA group that we were looking for an empanelled solar rooftop installation vendor. And in the group I had also asked if anyone installed rooftop solar systems and got a subsidy for it. The overwhelming response was 'we installed, but we did not get the subsidy'. And one member in the group pointed us to this vendor who was known for diligent and effective subsidy processing."

BHRTOA secretary K. Thirug-

nanam says the selected solar energy company, Vesat Renewables Private Limited, based in Coimbatore has had a presence in the solar space for multiple decades, starting back then with solar water heaters and extending all the way to rooftop solar installations now. Contrary to the views held by many other vendors that had been approached earlier, this one was aware that RWAs were eligible for subsidy under PM's Surya Ghar Scheme. And BHRTOA was convinced of the company's end-to-end execution capability, particularly subsidy processing.

PRINCE FREDERICK

Bollineni Hillside Phase I in Perumbakkam off Old Mahabalipuram Road sprawls across 45 acres and consists of 1295 dwelling units. For ease of administration, the community is cleaved in the middle, the north side servicing a half of those dwelling units and the south side the other half.

Both segments have a separate STP-WTP unit. These units are eminently useful, but are a criminal guzzler of energy, a fact that sticks out painfully when the EB bill arrives.

Sajeev Kumar, president of Bollineni Hillside Residential Township Owners Association (BHRTOA), estimates the community's monthly electricity bill at ₹10 lakh. "Electricity expense is one of the top three expenses," he points out.

The effort to whittle down that expense was launched recently, when the community had an operational solar power system in the end of January, 2026. The installation: a 97 kW solar system at one STP-WTP unit, and another 97 kW solar system at the other unit; a whopping 194 kW system in total. The decision to go solar first at these units was shaped by the consideration of significant savings on the EB bill as well as quicker recovery of the investment cost.

By virtue of going solar at this scale, BHRTOA has bagged an award from Tamil Nadu Solar Energy Developers Association (TNSEDA) for the biggest solar power installation in the RWA category across Tamil Nadu.

K. Thirugnanam, secretary, BHRTOA and an advocate, observes that the exercise synergies the various skillsets (BHRTOA president Sajeev is an IT professional) found within the community. To illustrate, he points out a retired senior official from the Tamil Nadu Electricity Board who is a resident of Bollineni Hillside was informally consulted to navigate regulatory nuances, particularly those pertaining to load thresholds and fixed charges that increase for installations exceeding 100 kW. Hence, the split into two units, each racking up 97 kW.

In sheer numbers

Estimating the cost of things under the sun is Senthil Kumar S's bailiwick as he is a chartered accountant. And he is particularly interested in working out the cost analysis of the solar endeavour at BHRTOA Phase I as he is its treasurer.

Here is what this exercise means to the community, in sheer numbers, as propounded by Senthil.

Installed capacity: 194 kW
Gross project cost: ₹1.1-1.2 crore

Subsidy received under centre's PM Surya Ghar scheme: ₹35 lakh

Net investment: ₹85 lakh

Estimated annual savings: ₹25 lakh

Expected payback: 3.5 to 4 years

Assumed panel life: 25 years

Estimated 25-year savings: ₹7 plus crore

Senthil proceeds to do an ROI analysis:

*If ₹1 crore were placed in a fixed deposit (at approximately 7.5% annual return), the amount to flow in would be ₹7.5 lakh, which would be taxable.

*In contrast, the solar investment promises ₹25 lakh annual savings at a 25% return; and these are non-taxed operational savings.

From the awards ceremony.

The evolution of the bins.

LIFFY THOMAS

If waste segregation is still not part of the daily routine in your home, then get ready to fall in line. New rules are coming into effect on April 1, 2026. Under the revised Solid Waste Management (SWM) Rules 2026, notified recently by the Union Ministry of Environment, Forest and Climate Change, four-stream segregation of solid waste at source has been made mandatory. This means your household waste is required to be segregated into wet waste, dry waste, sanitary waste and special care waste; the later includes paint cans, bulbs, mercury thermometers and medicines.

The revised rules, which supersedes Solid Waste Management Rules, 2016, integrate the principles of circular economy and extended producer responsibility, with a specific focus on waste segregation and management.

Those working in this space say some major concerns in Chennai include gaps in availability collection vehicles and processing facilities. There is also a need to enforce rules strictly for all stakeholders.

All bulk waste generators are expected to process wet waste *in situ* or obtain an Extended Bulk Waste Generator Responsibility (EBWGR) certificate stating that on-site processing is not feasible.

Material recovery facilities (MRFs) are again in the spotlight. Under the revised rules, local bodies are responsible for the collection, segregation and transportation of solid waste in coordination with MRFs which may also act as deposition points for e-waste, special care waste, sanitary waste and other waste streams for further processing. MRFs have been formally recognised as facilities for sorting of solid waste, says the note.

Local bodies have been encouraged to generate carbon credits.

Local bodies

The new rules emphasises creation of a Centralised On-line Portal to track all stages of solid waste management, including waste generation, transportation, processing and disposal, as well as biomineral and bioremediation of legacy waste dump sites. Registration and authorisation of waste processing facilities with local bodies and State Pollution Control Boards or Pollution Control Committees shall be carried out online through the portal developed by the CPCB.

The rules mandate audits of all waste processing facilities.

Take four

Here is what a cross-section of people from the city have to say about the revised Solid Waste Management (SWM) Rules 2026; the highlight is a four-bin system

'Bulk generators must set an example'

Maintaining one more bin is going to be cumbersome for some residents, but it is just about getting used to the practice. We will be meeting to discuss how to bring about awareness about the new rules and how this new system can improve recycling efficiency and reducing landfill waste.

Currently, we follow the two bins, one bag method to collect waste. They were bought in bulk and given to residents for better compliance and uniformity. As in the past, we will have to educate all stakeholders about the rules. It is about consistent conversations and enforcement. Bulk waste generators like us have more reasons to follow rules and keep the city clean.

Our onsite composting has been had a hiatus and I hope the new rules will nudge us into finding new solutions to the challenges we faced in the past.

Sumitha Iyer, waste segregation team, The Central Park South and committee lead, FOMRRA Swacch Bharat

Bulk generators

Bulk waste generator includes entities with a floor area of **20,000 square metres** or more, or water consumption of **40,000 litres** per day or more, or solid waste generation of **100 kg** per day or more.

'We need to conduct awareness sessions'

The new SWM Rules 2026 lays emphasis on the responsibilities of all stakeholders in keeping a city clean by giving only segregated waste. It is possible to follow the four-bin system and we will start conducting awareness sessions. The battery-operated vehicles can accommodate eight bins, so it is just about having some systems in place. Managing sanitary waste is a challenge and if residents are responsible in the way they dispose of sanitary waste, then we will ensure it is taken to the incinerator.

Official, SWM, GCC

'Have stringent rules in place'

While I welcome four-way segregation of waste, I wonder how many of the current waste collection vehicles seen on Chennai roads have space to accommodate multiple bins. Local bodies must set aside dedicated days when different kinds of waste are collected and this must be communicated to residents so that segregation becomes a habit. When we worked in various neighbourhoods in the past, we had pressed separate vehicles into service for dry and wet waste. Stringent rules should be enforced to make contractors/waste management companies fall in line. I wished the revised rules had insisted that big housing projects create infrastructure for composting of waste before handing over the project to residents.

Mangalam Balasubramaniam, expert on solid waste management and founding president of Eco Chakra Abhiyan

'We will tweak our waste management rules'

Aashiana Apartment in Alwarpet is among the first gated communities in Chennai to start composting thanks to the small infrastructure created by the builder and the many programmes that we residents ran to get people to give only segregated waste. Even today our biodegradable waste is composted *in situ*. But we will have to tweak our waste management process as per the new SWM rules. Sanitary waste is currently included in dry waste. The new rules coming into force are only going to make it easier for us to enforce our segregation rules. Sadly non-compliance wittingly or otherwise happens at times and we have to keep reinforcing the rules.

Anita Hegde, Green Club volunteer, Aashiana Apartment

Velachery firemen rescue elderly couple

S. KUMARARAJA

On the night of February 7, an elderly couple residing at an apartment in Puzhuthivakkam were gripped with anxiety until fire service personnel arrived on the scene. The husband had fallen beside the bed, and his bedridden wife, unable to help him, reached for her mobile phone and sought assistance from a neighbour. The neighbour then called the fire service, who swiftly arrived at the scene and opened the main door of the couple's home, which was locked from the inside. The firefighters from the Velachery station of Tamil Nadu Fire & Rescue Services lifted the elderly man, who had sustained minor inju-

ries, and administered first-aid. The prompt response of the fire service personnel earned the appreciation of residents from the neighbourhood.

S. Kumararaja is the president of Annai Indira Nagar Residents Welfare Association in Velachery

Campaign against sexual harassment

The Department of Journalism, Madras Christian College, organised a rally against sexual harassment recently at Elliot's Beach in Besant Nagar. "ARAN: Fortifying the Future" saw around 70 students take part in the campaign. The aim of the rally was to spread awareness about the existing laws and importance of reporting and speaking up against sexual harassment.

The rally was led by martial artist Karthick Elangovan. Outreach programmes were held at schools and workplaces as part of the campaign, says a press release. PHOTO: UMESH KUMAR . V

PNB opens branch in Keezhkattalai

Punjab National Bank has opened its new branch at Big Street in Keezhkattalai. It comes along with an ATM facility.

P. Mahendar, zonal manager, Chennai, inaugurated the branch in the presence of senior officials.

Lalmohan Satapathy, circle

head, Chennai, Rajesh Kumar, and N. Syed Anwar Theen, deputy circle head, and Aravind Ekambaram, branch head, bank staff, customers, and members of the public participated.

Senior officials noted that the branch is equipped with modern banking infrastructure and digital facilities to deliver efficient,

secure, and customer-centric services.

The inauguration reflects the bank's continued focus on expanding its presence in Chennai and supporting economic growth by offering comprehensive banking solutions to individuals, traders, MSMEs, and corporates, according to a release.

Vidhya Sagar celebrates 18th Annual Day

The Vidhya Sagar Global School in Chengalpattu celebrated its 18th annual day, 'Dream Aura', recently.

Chaganmal Dhoka, former chairman of Terapanth Jain Vidhyalaya, Chennai, was the chief guest. V. Gowrilakshmi, principal, Chinmaya Vidhyalaya, was the guest of honour.

The school brought out its annual newsletter "Pearls."

The cultural programmes were based on the themed 'Dream Aura,' featuring

dance, drama, and music. A dance and drama featured meeting the characters from the mystic books in the library.

A rocking 'Amalgam' band performance was given by students of grades 6 to 11.

The evening featured a vibrant array of dance and musical performances. Outstanding students in academics were honoured. Vikas Surana, correspondent, and Suresh Kankariya, treasurer, were present.

Yoga programme in Madambakkam

Satyananda Yoga Centre is conducting a four-week yoga programme. The following are the dates and venues: From February 19 at Sri Vengili Amman Temple, Madambakkam Main Road, Madambakkam, from February 20 at Satyananda Yoga Centre, Velachery; from February 21 at Lakshmi Nagar Main Road, Nanganallur, and from February 22 at Sri Ayyappan & Sri Goshala Krishnan Temple, Ponnambalam Salai, K.K.Nagar. A decade of *smart moves*

Good response to 10th Dr. Gift Siromoney Memorial Inter-School Chess Tournament and Sports Quiz

Demonstrating strategy, analytical thinking and sporting spirit, the Department of Statistics at Madras Christian College (MCC) organised the 10th Dr. Gift Siromoney Memorial Inter-School Chess Tournament and Sports Quiz on its campus recently.

Marking a decade of nurturing young talent, the tournament was conducted with the support of Emmanuel Chess Centre and the 1984-87 Statistics Graduate Class. The event brought together enthusiastic participation from 13 schools, with a total of 70 students competing in both intellectual and sporting contests, said a press release.

The programme was inaugurated by the chief guests Ebenezer Joseph and N. Soorya Prakash, who encouraged students to approach the competitions with confidence, discipline and true sportsmanship. Ebenezer Joseph,

an alumnus of the department (1984-89 batch), is a Candidate Master and India's FIDE Trainer, currently serving as Supervisor (Audit) in the Indian Audit and Accounts Department. He also conducted the chess tournament. The Sports Quiz was conduct-

ed by N. Soorya Prakash, an alumnus of the department (1986-1991 batch) and Assistant General Manager, Sales & Distribution Department, *The Hindu*. He engaged the participants with questions based on major sporting events and achieve-

Ebenezer Joseph and N. Soorya Prakash were the special guests at the event.

ments of 2025.

Adding an academic dimension to the event, students of the department organised a Statistics Exhibition showcasing over 30 innovative statistical models. These exhibits illustrated practical applications of statistical concepts and drew keen interest from visiting school students and teachers alike, said the release.

The prestigious Dr. Gift Siromoney, Wesley Stephen, and Rev. Anand Jayakumar Rolling Trophies were awarded to the top three schools overall. The Dr. J. P. Vijaya Thilakan Rolling Trophy was presented to the best-performing Government school, recognising excellence and encouraging broader participation.

In the chess tournament, MCC Higher Secondary School, Chetpet, emerged as the overall winner, with MCC Campus School, East Tambaram, securing second place. In the Government school category, MPS Government School earned top honours. In the Sports Quiz competition, Gateway - The Complete School, Sholinganallur, claimed first place, followed by MCC Campus Matriculation Higher Secondary School, added the release.

Cut Copy Paste 2.0 a creativity fest for children

Twenty five schools from Chennai and surrounding areas participated 'Cut Copy Paste 2.0', an inter-school fest organised by the Department of Visual Communication at Agurchand Manmull Jain College in Meenambakkam.

Students showcased their talents in various competitions including E-Sports, Photography, Drawing and Painting, Short Film, RJ Hunt, Adaption, Group Dance, and Recreate & Makeover - Character. The event was coordinated by professors Hubert Jayagan and Viveak, along with the faculty members of the Departments of Visual Communication and Electronic Media, said a release.

Principal B. Mahavir, Dean M.M. Ramya, deputy Dean R. Surekha, Director N. Venkataraman, and HOD Visual Communication and Electronic Media were among those who took part.

In her inaugural address, M.M. Ramya emphasised the importance of creativity, innovation, and media awareness among school students. Creativity is the foundation of media education. Platforms like 'Cut Copy Paste 2.0' empower young minds to

think differently, express boldly, and innovate fearlessly, said a release.

The special guests who graced the occasion included actor Thangadurai, folk artiste M.V. Aadal Arasu, silambam master Karthick Raja; mime artiste Munis, folk artiste Lokesh Kumar.
