‘Most buses skip Mahalingapuram stop’

G.G. JAYARAMAN

MTC buses connecting T Nagar - Ambattur, Besant Nagar - ICF Villikkam, and Thiruvanniyur - ICF Villikkam ply through Mahalingapuram Main Road in Nungambakkam. But these buses do not halt at the Mahalingapuram bus stop; only buses toward Vadapalani do.

The stop for buses toward Ambattur and ICF Villikkam are located near Brown Stone apartment and the one meant for buses toward T Nagar, Besant Nagar and Thiruvanniyur is located near Lakshmanan Street junction.

As buses skip this stop, commuters from Mahalingapuram go to

the nearby stops located on Nelson Manickam Road, North Usman Road, or Arcot Road to board buses. This is quite inconvenient.

It may be noted the Mahalingapuram bus stop on both sides of the road is well-equipped with stainless steel shelters. Further, GPS-linked LED display boards providing real time information on bus arrival time have been installed. But all these facilities are not being put to use for the commuters. Instead, these shelters serve as a source of revenue through advertisements displayed in the shelters.

We request Metropolitan Transport Corporation to do the needful.

G.G. Jayaraman is a resident of Mahalingapuram

‘Fear over stray dogs at Muthu Kumrappa Street’

C. PARTHIBAN

Stray dogs at Muthu Kumrappa Street in Saligramam have become quite aggressive lately. There have been instances of dogs chasing and attacking passers-by, especially children.

The Supreme Court's direction that prohibited feeding of stray dogs in public spaces including roads and streets, is being violated. People feeding stray dogs is a common sight at Muthu Kumrappa Street.

Complaints to the Greater Chennai Corporation were to no avail.

C. Parthiban is a resident of Saligramam

At Muthu Kumrappa Street in Saligramam.

Visitors raise safety concerns

Stray dogs are found in good numbers at Chennai's Egmore Railway Station. From time to time, visitors to the station express safety concerns arising from this situation. A similar situation prevails at the nearby Metro station and Central station.

‘An unauthorised dumping spot near school’

M.C.VIJAY SHANKAR

An open ground at PG Avenue First Street in Kattupakkam has become a dumping spot. Both the public and local Panchayat body are dumping waste here. Further, it is being set on fire, making it a health hazard. It may be noted the spot is in front of a school and just 100 metres from Kattupakkam metro railway station which is under construction.

M.C.Vijay Shankar is a resident of Kattupakkam

'Pedestrians dice with danger'

On a section of North Usman Road in T. Nagar, pedestrians take advantage of gaps in the median to cross the road, putting themselves in harm's way

S.N. RAJARAM

Jaywalking seems to be more of a norm than an exception on a section of North Usman Road in T. Nagar. On this major thoroughfare, road design conditions from the intersection of Kanniah Street to the intersection of Bharathi Nagar Third Street encourage jaywalking. There are many gaps in the median, and pedestrians are tempted to use any of these, and not go to the trouble of walking over to the designated crossing point and crossing the road.

The flyover connecting North Usman Road and Mahalingapuram Main Road has one of its ramps near the intersection of Kanniah Street. This spot witnesses constant flow of vehicular traffic from the flyover (two-way traffic) and its service lanes, and is also rife with wrong way driving by motorists. Despite that, pedestrians take the risk of crossing North Usman Road near the flyover's ramp.

Intersections where pedestrians should not cross the road but do, include: Habibullah Road (near Post Office); Bharathi Nagar First Street (near Bharathi Nagar bus stop,

the one meant for T Nagar terminus-bound buses); Bharathi Nagar Second Street (near Sowbhaghya showroom); and Bharathi Nagar Third Street (near Repco Bank). In the case of Bharathi Nagar Second Street, the median is low and pedestrians stand on it. Given the high likelihood of a fall, that is not advisable for any pedestrian, let alone seniors. But one can seniors doing "the balancing act" on this low median.

And the fact that metal rods protrude in many of these median gaps ramps up the

North Usman Road in T. Nagar.
PHOTOS: RAGU R

danger quotient. The gaps in the median should be closed and more zebra-crossings introduced on this road.

Besides, speed breakers have to be considered at certain points of this road. The junction of Bharathi Nagar Third Street, Ramkrishnapuram Street and North Usman Road is known for unbridled traffic movement. A booth of R4 Soundarapandianar Police Station is located at this junction. But seeing traffic police personnel regulate the junction is a rare sight. It is easier to see a couple of traffic police personnel regulating the nearby junction of Bazulah Road and North Usman Road.

S.N. Rajaram is a resident of Saligramam

Literary fest held at PSBB's T. Nagar campus

The event, which was conducted in English, Tamil, Hindi and Sanskrit, witnessed the participation of 13 schools

Padma Seshadri Bala Bhavan Group of schools hosted Lingua Safari, an inter-school literary fest on February 7 at its T. Nagar campus.

It was a literary treat for middle school students, where the fest was conducted in English, Tamil, Hindi and Sanskrit. Around 13 schools participated, with students exhibiting their language proficiency as well as creative abilities through these events.

The English segment, Litarena, hosted competitions on solving puzzles, story and poetry writing, scene recreation primarily focusing on expression and performance.

▼ A snapshot of PSBB's annual literary festival held on February 7, 2026.
PHOTO: SPECIAL ARRANGEMENT

Meanwhile, the Tamil segment - *Tamizhcholai*, included tongue twisters, matching verses from the works of Bharatiyar and Avvaiyar (Aathichoodi), and providing ending to a story. The Hindi segment, *Sahithyak Goonj*, had slogan writing, drama, story writing and unscrambling letters to form words.

The lingua fest also saw students participating in the Sanskrit segment which included lingua games that showcased activity-based learning.

The valedictory programme was presided over by Tahsin Chacko, educational consultant and teacher educator (former General Manager - Scholastic India), who also distributed prizes to the winners of the competitions. The festival concluded with DAV Girls Senior Secondary School, Gopalapuram being declared the overall champions.

Pavers 'retrofitted'

The plants on Anna Salai outside Government Estate Metro Station are meant to be strapping big trees. Even after a recent redemptive exercise, they continue on a restrictive space, one certainly not meant for trees

PRINCE FREDERICK

On Anna Salai, outside the premises of the Government Estate Metro Station, plants best described as "tweens" if viewed from a human perspective, are already exposed to the vagaries of indifferent civic planning. The idea that they are an afterthought had been telegraphed to them right from their cradle.

Too old to be doted upon as saplings and too young to be dubbed trees and allowed to fend for themselves, each of them was gasping for air, the road pressing on every lobe in its "lungs". The road having closed in on them, there was no way their roots would receive any extraneous gift of water. They had to sniff their way to any moisture under the hard slab of bitumen slammed down on them.

Smothered by bitumen, these

plants were on a trajectory likely to end in root asphyxiation.

Their growth could be stunted at best. In the worse of cases, after a tree had grown robust, it could have had a fall (a literal one) on account of its Achilles' feet. The restrictive pressure on its roots weakening it, it could become easy picking for some cyclone sometime.

Around two weeks ago, an exercise was initiated to give these trees something they should have been given at the very start of their life journeys: tree pit pavers.

Tree pit pavers have been retrofitted. That would be just a mild amelioration of a rather unhealthy environment these green beings find themselves in. They are still provided with only a nar-

row strip of earth untouched by civic infrastructure. And if one took a closer look, even this patch is not as pristine as it would seem when viewed with a superficial eye. From an image or two of the work before the tree pit pavers were slipped in show a cable running

alongside a tree. Besides, silt catch pits are located close to some of them.

That raises the question: was this patch the right space to grow trees? Given the general tenor of civic planning, the duple meter of rethinking and rejigging, some more rethinking and rejigging,

▼ Tree pit pavers "retrofitted" in the space around young trees on the section of Anna Salai along the Government Estate Metro Station premises.

PHOTOS: PRINCE FREDERICK

this patch could be dug up, further unsettling the trees (that is once they have become trees). If the trees on TTK Road (particularly the rain trees, planted at a time when awareness about the necessity of promoting native species had not even put out shoots) have huge girths, they arrived before the pavements did. Urban greening now gets the species right (the ones on this section of Anna Salai are all native species) but the spaces consistently wrong. The question worth mulling over: should tree planting be allowed on sections where trees cannot be offered enough earth that is free of "development-based encumbrances".

Returning to Anna Salai, the plants might have been gifted a piece of loose soil on which pavers have been placed, but they are still pressing against the pavement. There is still suffocation, restriction of movement and lack of freedom. Managers of urban roads (in the case of Anna Salai, it would be the state highways) should pause and ponder deeply before allowing or initiating any tree planting exercise on these roads, making sure it would do justice to the trees as they grow up.

The evolution of the bins.

LIFFY THOMAS

If waste segregation is still not part of the daily routine in your home, then get ready to fall in line. New rules are coming into effect on April 1, 2026. Under the revised Solid Waste Management (SWM) Rules 2026, notified recently by the Union Ministry of Environment, Forest and Climate Change, four-stream segregation of solid waste at source has been made mandatory. This means your household waste is required to be segregated into wet waste, dry waste, sanitary waste and special care waste; the later includes paint cans, bulbs, mercury thermometers and medicines.

The revised rules, which supersedes Solid Waste Management Rules, 2016, integrate the principles of circular economy and extended producer responsibility, with a specific focus on waste segregation and management.

Those working in this space say some major concerns in Chennai include gaps in availability collection vehicles and processing facilities. There is also a need to enforce rules strictly for all stakeholders.

All bulk waste generators are expected to process wet waste *in situ* or obtain an Extended Bulk Waste Generator Responsibility (EBWGR) certificate stating that on-site processing is not feasible.

Material recovery facilities (MRFs) are again in the spotlight. Under the revised rules, local bodies are responsible for the collection, segregation and transportation of solid waste in coordination with MRFs which may also act as deposition points for e-waste, special care waste, sanitary waste and other waste streams for further processing. MRFs have been formally recognised as facilities for sorting of solid waste, says the note.

Local bodies have been encouraged to generate carbon credits.

Local bodies

The new rules emphasises creation of a Centralised On-line Portal to track all stages of solid waste management, including waste generation,

transportation, processing and disposal, as well as biomineral and bioremediation of legacy waste dump sites. Registration and authorisation of waste processing facilities with local bodies and State Pollution Control Boards or Pollution Control Committees shall be carried out online through the portal developed by the CPCB.

The rules mandate audits of all waste processing facilities.

Take four

Here is what a cross-section of people from the city have to say about the revised Solid Waste Management (SWM) Rules 2026; the highlight is a four-bin system

'Bulk generators must set an example'

Maintaining one more bin is going to be cumbersome for some residents, but it is just about getting used to the practice. We will be meeting to discuss how to bring about awareness about the new rules and how this new system can improve recycling efficiency and reducing landfill waste.

Currently, we follow the two bins, one bag method to collect waste. They were bought in bulk and given to residents for better compliance and uniformity. As in the past, we will have to educate all stakeholders about the rules. It is about consistent conversations and enforcement. Bulk waste generators like us have more reasons to follow rules and keep the city clean.

Our onsite composting has been had a hiatus and I hope the new rules will nudge us into finding new solutions to the challenges we faced in the past.

Sumitha Iyer, waste segregation team, The Central Park South and committee lead, FOMRRA Swacch Bharat

Bulk generators

Bulk waste generator includes entities with a floor area of **20,000 square metres** or more, or water consumption of **40,000 litres** per day or more, or solid waste generation of **100 kg** per day or more.

'We need to conduct awareness sessions'

The new SWM Rules 2026 lays emphasis on the responsibilities of all stakeholders in keeping a city clean by giving only segregated waste. It is possible to follow the four-bin system and we will start conducting awareness sessions. The battery-operated vehicles can accommodate eight bins, so it is just about having some systems in place. Managing sanitary waste is a challenge and if residents are responsible in the way they dispose of sanitary waste, then we will ensure it is taken to the incinerator.

Official, SWM, GCC

'Have stringent rules in place'

While I welcome four-way segregation of waste, I wonder how many of the current waste collection vehicles seen on Chennai roads have space to accommodate multiple bins. Local bodies must set aside dedicated days when different kinds of waste are collected and this must be communicated to residents so that segregation becomes a habit. When we worked in various neighbourhoods in the past, we had pressed separate vehicles into service for dry and wet waste. Stringent rules should be enforced to make contractors/waste management companies fall in line. I wished the revised rules had insisted that big housing projects create infrastructure for composting of waste before handing over the project to residents.

Mangalam Balasubramaniam, expert on solid waste management and founding president of Eco Chakra Abhiyan

'We will tweak our waste management rules'

Aashiana Apartment in Alwarpet is among the first gated communities in Chennai to start composting thanks to the small infrastructure created by the builder and the many programmes that we residents ran to get people to give only segregated waste. Even today our biodegradable waste is composted *in situ*. But we will have to tweak our waste management process as per the new SWM rules. Sanitary waste is currently included in dry waste. The new rules coming into force are only going to make it easier for us to enforce our segregation rules. Sadly non-compliance wittingly or otherwise happens at times and we have to keep reinforcing the rules.

Anita Hegde, Green Club volunteer, Aashiana Apartment

A section of the rooftop solar installation at Bollineni Hillside off OMR.

Chennai RWA shines in TN's solar race

Bollineni Hillside has bagged an award for the biggest solar rooftop installation in Tamil Nadu in the category for resident welfare associations

PRINCE FREDERICK

Bollineni Hillside Phase I in Perumbakkam off Old Mahabalipuram Road sprawls across 45 acres and consists of 1295 dwelling units. For ease of administration, the community is cleaved in the middle, the north side servicing a half of those dwelling units and the south side the other half.

Both segments have a separate STP-WTP unit. These units are eminently useful, but are a criminal guzzler of energy, a fact that sticks out painfully when the EB bill arrives.

Sajeev Kumar, president of Bollineni Hillside Residential Township Owners Association (BHRTOA), estimates the community's monthly electricity bill at ₹10 lakh. "Electricity expense is one of the top three expenses," he points out.

The effort to whittle down that expense was launched recently, when the community had an operational solar power system in the end of January, 2026. The installation: a 97 kW solar system at one STP-WTP unit, and another 97 kW solar system at the other unit; a whopping 194 kW system in total. The decision to go solar first at these units was shaped by the consideration of significant savings on the EB bill as well as quicker recovery of the investment cost.

By virtue of going solar at this scale, BHRTOA has bagged an award from Tamil Nadu Solar Energy Developers Association (TNSEDA) for the biggest solar power installation in the RWA category across Tamil Nadu.

K. Thirugnanam, secretary, BHRTOA and an advocate, observes that the exercise synergies the various skillsets (BHRTOA president Sajeev is an IT professional) found within the community. To illustrate, he points out a retired senior official from the Tamil Nadu Electricity Board who is a resident of Bollineni Hillside was informally consulted to navigate regulatory nuances, particularly those pertaining to load thresholds and fixed charges that increase for installations exceeding 100 kW. Hence, the split into two units, each racking up 97 kW.

The question of subsidy processing

BHRTOA president Sajeev Kumar underlines the toughest part of the effort: settling on a vendor. Our vice-president Senthil Prabhu visited many RWAs that have gone solar, including those in Coimbatore.

BHRTOA treasurer Senthil Kumar S reveals that the vendor finally brought on board was found through the Federation of OMR Residents Association (FOMRRA). Senthil Kumar explains: "I had

posted a message in the FOMRRA group that we were looking for an empanelled solar rooftop installation vendor. And in the group I had also asked if anyone installed rooftop solar systems and got a subsidy for it. The overwhelming response was 'we installed, but we did not get the subsidy'. And one member in the group pointed us to this vendor who was known for diligent and effective subsidy processing."

BHRTOA secretary K. Thirug-

nanam says the selected solar energy company, Vesat Renewables Private Limited, based in Coimbatore has had a presence in the solar space for multiple decades, starting back then with solar water heaters and extending all the way to rooftop solar installations now. Contrary to the views held by many other vendors that had been approached earlier, this one was aware that RWAs were eligible for subsidy under PM's Surya Ghar Scheme. And BHRTOA was convinced of the company's end-to-end execution capability, particularly subsidy processing.

In sheer numbers

Estimating the cost of things under the sun is Senthil Kumar S's bailiwick as he is a chartered accountant. And he is particularly interested in working out the cost analysis of the solar endeavour at BHRTOA Phase I as he is its treasurer.

Here is what this exercise means to the community, in sheer numbers, as propounded by Senthil.

Installed capacity: 194 kW
Gross project cost: ₹1.1-1.2 crore

Subsidy received under centre's PM Surya Ghar scheme: **₹35 lakh**

Net investment: ₹85 lakh

Estimated annual savings: **₹25 lakh**

Expected payback: **3.5 to 4 years**

Assumed panel life: **25 years**

Estimated 25-year savings: **₹7**

plus crore

Senthil proceeds to do an ROI analysis:

*If ₹1 crore were placed in a fixed deposit (at approximately 7.5% annual return), the amount to flow in would be ₹7.5 lakh, which would be taxable.

*In contrast, the solar investment promises ₹25 lakh annual savings at a 25% return; and these are non-taxed operational savings.

From the awards ceremony.

During the event. PHOTO: SPECIAL ARRANGEMENT

Young talent in music, dance honoured

Six persons were honoured with Vallabh Yuva Kala Awards for their excellence in the fields of classical music and dance. The winners were honoured with a citation and a cash prize.

They are: Nivedha Harish, Grade-B Bharatanatyam artiste of Doordarshan Kendra and recipient of the 'Young artiste scholarship' from the Ministry of Culture; and Nanditha Kannan, an All India Radio B-Grade Carnatic Vocal artiste and recipient of 'IWA National Award' and 'Nada Pallava Award'.

M.K. Ananthabalasubramaniam, recognised as an 'Upcoming Artist' at the Vipanchee Art Festival; K. Gowtham Balaji, who has worked in music production and audio engineering for Tamil and Telugu cinema industries; N. Veda Janani, Kuchipudi dancer and recipient of 'Shrestha Kala Yashaswi Award'; and Yogitha R., Bharatanatyam dancer recognised with the 'Nrithya Vichithra

Shri Vallabh Cultural Academy hosted the second edition of Vallabh Yuva Kala Awards

Award' were presented a citation and a cash award of Rs. 50,000.

Shri Vallabh Cultural Academy is an initiative of Shri Vallabhacharya Vidya Sabha. The cultural organisation aims to promote Indian culture and tradition by creating opportunities for the intensive pursuit of Indian art forms.

V.V. Sabha was established in 1963 in Madras with the mission of imparting quality education. Under the auspices of the Sabha, two colleges - D.G. Vaishnav College in 1964, and M.O.P. Vaishnav College for Women in 1992 and two schools, Kola Perumal Chetty Vaishnav Senior Secondary School in 1972, and Kola Saraswati Vaishnav Senior Secondary School in 1975 were established. Besides, the Sabha also supports the M.O.P. Vaishnav High school and Vaishnav Sports Academy.

Doctors honoured for going beyond the call of duty

Voluntary organisation ALERT honours 17 Good Samaritans at its annual award ceremony

The ninth edition of "ALERT Being Awards" was held recently. According to a press release, the award aims to honour persons who have saved lives. It honoured 17 persons this year.

One among them is Major Dr. Rohit Bachwala, a doctor in The Indian Army for going beyond the call of duty. While waiting for his train at Virangana Laxmibai Jhansi railway station in Uttar Pradesh, he noticed a woman passenger in severe labour at the foot overbridge and he swung into action using a pocket knife and hair clips as his tools and helped the woman deliver the infant safely. This incident occurred in July 2025.

Next, a group of three doctors: Dr. Manoop Bhasi, Dr. Thomas Peter and Dr. Dhidiya K Thomas were honoured for saving a youngster who suffered heavy injuries in a

During the event. PHOTO: SPECIAL ARRANGEMENT

road accident by performing tracheostomy (an emergency surgical procedure) on the road. This incident occurred in December 2025.

Others include: Kailash Satyarthi, a child rights activist and Nobel laureate; Sunitha Krishnan, social activist who works against sexual violence against women and children; and K P Ramasamy, chairman - KPR Group for his contribution in the field of education.

Coimbatore Collector Pavankumar G. Giriappanavar; educationist B.K. Krishnaraj Vanavarayar; and L. Gopalakrishnan, managing

trustee of PSG Sons & Charities were the guests and presented the awards.

Under organisation category, Platelet Club, Jeeva Shanthy Trust, Rotary Club of Coimbatore Cotton City, and Amazon Seller Services, were honoured.

ALERT is a voluntary organisation which aims to train the common man on responding to the golden hour in medical emergency.

This year, the award ceremony was held in Coimbatore, adds the release.

Three women achievers awarded

Three young women achievers received validation of their journey and momentum for their journey ahead as they were presented with the M.O.P. Yuva Sammaan Awards in its eighth edition at a glittering ceremony on February 12 at M.O.P. Vaishnav College for Women.

International swimmer Bhavya Sachdeva, Asian medalist and national champion; entrepreneur Ranjani K Vivek, founder of Playtoddz Montessori, an innovative company that manufactures educational accessories and toys out of sustainable material for the Montessori school system; and Bharatanatyam artiste Lekha Prasad, classical dancer and teacher at Shri Silambam Academy of Fine Arts, each received a citation and ₹1 lakh, said a press release.

Chess Grandmaster R. Vaishali was honoured with a special award.

While Vaishali's award was received by her mother, Sachdeva's award was collected by her uncle, as the sportswomen were away at training camps.

The awards were given away by chief guest, actor and producer Simran. The awardees were chosen through a rigorous selection process. Applications were solicited through press advertisements, from young women aged between 20 and 35 years, who are doing outstanding work in their respective fields, added the release. The final awardees were selected from among 65 applicants after extensive deliberations by a distinguished jury, comprising J.Meganatha Reddy, IAS, Member Secretary, Sports Development Authority of Tamil Nadu; Lakshmi Menon, CEO, *The New Indian Express*; Su-chithra Balasubramaniam, classical musician and Shyam Sekhar, founder and CIO, financial consultancy iThought.

M.O.P. Vaishnav College instituted the M.O.P. Yuva Sammaan Award in its silver jubilee year in 2017-18. Every year, the college chooses three women awardees to confer with the award.

Alumni association organises road safety awareness drive on Arcot Road

Avichi Alumni Association of Avichi Higher Secondary School in Virugambakkam organised a road safety awareness drive on Arcot Road, near the junction of West K.K. Nagar. According to a press release, the students of the school took part in the awareness programme. They played music and displayed placards carrying slogans on road safety. Pillion riders wearing helmets were given chocolates as a mark of appreciation. Greater Chennai Traffic Police supported the event, adds the release

Training session on gold appraisal

Entrepreneurship Development & Innovation Institute is organising a workshop on gold appraisal from February 16 to 20 at its premises at No: 1, EDII Road, SIDCO Industrial Estate, Ekkaduthangal, Guindy. Time From 10 a.m. to 5 p.m.

According to a press release, the session covers the following: concepts in metallurgy with focus on gold and silver, difference between karat and carat, methods for calculating gold purity, and jewel loan assessment procedures.

Hands-on training in jewellery making is also part of the programme. Hallmarking procedures and standards will be covered.

The programme aims to prepare the participants to set up an enterprise in gem and jewellery sector. Further, they will find part-time job

opportunities in banks as gold assayer, adds the press release.

Those aged 18 years and above with a minimum qualification of class 10 can apply. Hostel facility is available at first-come, first-served basis. Prior registration is mandatory.

For details, call 9360221280 / 8668100181.

Culinary workshop

Tamil Nadu Agricultural University Information & Training Centre is conducting a workshop on ready-to-cook food items on February 19. According to a press release, the items include: rava idli mix, adai, vadai, and payasam. The session will also focus on making flavour powders meant for Indian non-vegetarian gravies.

Another session on making soaps will be conducted on February 20. There will be demonstrations on making soaps from herbs, flowers, and sandal oil.

Both the sessions will be held at the centre's premises at Agro Tech Green Park, Frist Floor, Thiru. Vi. Ka. Industrial Estate, Guindy.

For details, call : 044 - 29530048.

Yoga programme in K.K. Nagar from February 22

Satyananda Yoga Centre is conducting a four-week Yoga programme. The following are the dates and venues: From February 19 at Sri Vengili Amman Temple, Madambakkam Main Road, Madambakkam, from February 20 at Satyananda Yoga Centre, No. 175, Fifth Street, Murugu Nagar, Velachery; from February 21 at Shri Sudarshan Terrace Hall, B-2, Lakshmi Nagar Main Road, Nanganallur, and from February 22 at Sri Ayyappan & Sri Goshala Krishnan Temple, Sri Sastha Sangam, 89, Ponnambalam Salai, K.K.Nagar.

Time: From 5.30 a.m. to 7 a.m. According to a press release, no fee will be charged. The centre follows the curriculum of Bihar School of Yoga. Meditation, Pranayama, recitation of Mantras, and sessions on food habits and value education are part of the programme. For details, call 94450 51015.

A lecture on Parkinson's in Besant Nagar

Parivarthan for Parkinson's Foundation is hosting a special lecture on Understanding and Managing Parkinson's on February 22 at 11:00 am at The Learning Community at Quest in Besant Nagar. The session will be led by Dr. M. R. Murali, M.B.B.S, M.D., an allergist and immunologist at Massachusetts General Hospital and Harvard Medical School, Boston. Parkinson's is a progressive neurological disorder with no known cure. This session aims to equip attendees with essential knowledge about Parkinson's, address common misconceptions, and highlight practical approaches to managing it over time.

The event is open to people with Parkinson's, caregivers, healthcare professionals and anyone interested in learning more about the condition. To attend, register by calling or messaging +91 96000 52531.
