KANOHAR

KANOHAR ELECTRICALS LIMITED

(TO BE LISTED ON THE MAIN BOARD OF BSE AND NSE)

Our Company was originally incorporated as "Kanohar Electricals Private Limited" under the provisions of the Companies Act, 1956 pursuant to a certificate of incorporation dated November 13, 1972, issued by the Registrar of Companies. The name of our Company was subsequently changed to "Kanohar Electricals Limited" upon conversion of our Company from a private limited to a public limited company pursuant to a Shareholders' resolution dated November 30, 1994, and a fresh certificate of incorporation dated December 22, 1994, issued by the RoC. The equity shares of our Company were, in the past, listed on Bombay Stock Exchange (now known as BSE Limited), The Delhi Stock Exchange Association Limited (now known as DSE Estates Limited) and The Uttar Pradesh Stock Exchange Association Limited (now known as U.P. Stock and Capital Limited) on November 13, 1995, November 1, 1995 and October 31, 1995, respectively. However, thereafter, the equity shares of our Company were voluntarily delisted from Bombay Stock Exchange (now known as BSE Limited), The Delhi Stock Exchange Association Limited (now known as DSE Estates Limited) and The Uttar Pradesh Stock Exchange Association Limited (now known as U.P. Stock and Capital Limited) with effect from July 12, 2010, August 30, 2010 and October 20, 2010, respectively due to low liquidity and trading volumes. For further information of changes in the registered office of our Company, see ***"History and Certain Corporate Matters – Change in our registered office"*** beginning on page 284 of the Red Herring Prospectus dated September 2, 2026 **("RHP" or "Red Herring Prospectus")**.

Registered and Corporate Office: Rithani, Delhi Road, Meerut 250 103, Uttar Pradesh, India; **Telephone:** + 91 70559 01010/ +91 121-3500801-05; **Contact Person:** Neha, Company Secretary and Compliance Officer; **E-mail:** compliance@kanohar.com; **Website:** www.kanohar.com; **Corporate Identity Number:** U31909UP1972PLC003635

OUR PROMOTERS: DINESH SINGHAL, ADESH SINGHAL, VIVEK SINGHAL, ABHISHEK SINGHAL, VIRAT SINGHAL, ADITYA SINGHAL AND K SONS FAMILY TRUST

INITIAL PUBLIC OFFERING OF UP TO [●] EQUITY SHARES OF FACE VALUE OF ₹2 EACH ("EQUITY SHARES") OF KANOHAR ELECTRICALS LIMITED ("COMPANY" OR "ISSUER") FOR CASH AT A PRICE OF ₹[●] PER EQUITY SHARE (INCLUDING A SHARE PREMIUM OF ₹[●] PER EQUITY SHARE) ("OFFER PRICE") AGGREGATING UP TO ₹[●] MILLION (THE "OFFER") COMPRISING OF A FRESH ISSUE OF UP TO [●] EQUITY SHARES OF FACE VALUE OF ₹2 EACH AGGREGATING UP TO ₹3,000 MILLION ("FRESH ISSUE") AND AN OFFER FOR SALE OF UP TO 11,957,915 EQUITY SHARES OF FACE VALUE OF ₹2 EACH ("OFFERED SHARES") AGGREGATING UP TO ₹[●] MILLION BY K SONS FAMILY TRUST ("PROMOTER SELLING SHAREHOLDER" AND SUCH EQUITY SHARES OFFERED BY THE PROMOTER SELLING SHAREHOLDER, THE "OFFERED SHARES"). THE OFFER SHALL CONSTITUTE [●]% OF THE POST-OFFER PAID UP EQUITY SHARE CAPITAL OF OUR COMPANY.

DETAILS OF THE SELLING SHAREHOLDER, OFFER FOR SALE AND THE WEIGHTED AVERAGE COST OF ACQUISITION			
NAME OF THE SELLING SHAREHOLDER	**TYPE**	**MAXIMUM NUMBER OF EQUITY SHARES OFFERED /AMOUNT (IN ₹)**	**WEIGHTED AVERAGE COST OF ACQUISITION PER EQUITY SHARE* (IN ₹)**
K Sons Family Trust	Promoter Selling Shareholder	Up to 11,957,915 Equity Shares of face value of ₹2 each aggregating up to ₹[●] million	Nil

** As certified by Pawan Shubham & Co., Chartered Accountants, with firm registration number 011573C, pursuant to their certificate dated September 2, 2026.*

PRICE BAND: ₹601 TO ₹632 PER EQUITY SHARE OF FACE VALUE OF ₹2 EACH.
THE FLOOR PRICE IS 300.50 TIMES THE FACE VALUE OF THE EQUITY SHARES AND THE CAP PRICE IS 316.00 TIMES THE FACE VALUE OF THE EQUITY SHARES.
BIDS CAN BE MADE FOR A MINIMUM OF 23 EQUITY SHARES OF FACE VALUE OF ₹2 EACH AND IN MULTIPLES OF 23 EQUITY SHARES OF FACE VALUE OF ₹2 EACH THEREAFTER.
THE PRICE TO EARNINGS RATIO ("P/E") BASED ON BASIC AND DILUTED EARNINGS PER SHARE ("EPS") FOR FISCAL 2026 FOR OUR COMPANY AT THE LOWER END OF THE PRICE BAND (I.E. FLOOR PRICE) IS 34.48 TIMES AND AT THE UPPER END OF THE PRICE BAND (I.E. CAP PRICE) IS 36.26 TIMES.
WEIGHTED AVERAGE RETURN ON NET WORTH FOR LAST THREE FINANCIAL YEARS IS 27.99%.

The details of the Fresh Issue, Offer for Sale, Total Offer Size and the post Offer market capitalization of the Company, each at the Floor Price and the Cap Price, are given below:

Fiscal ended	**OFFER SIZE AND MARKET CAPITALIZATION**			
	At Floor Price of ₹601 per equity share		**At Cap Price of ₹632 per equity share**

RISK TO INVESTORS

For details, refer to section titled *"Risk Factors"* on page 18 of the RHP

1. **Segment concentration risk:**

Amongst our business segments comprising Transformer Manufacturing Business and EPC Business, we derive a significant portion of our revenue from the Transformer Manufacturing Business. We manufacture five different types of transformers with customized technical specifications to address the energy needs of industries as a part of our Transformer Manufacturing Business.

Set out below is our revenue from operations during the Fiscals 2026, 2025 and 2024, from our various business segments:

(in ₹ million, except percentages)

S. No.	Business segment	Fiscal 2026		Fiscal 2025		Fiscal 2024	
		Revenue from operations	% of revenue from operations	Revenue from operations	% of revenue from operations	Revenue from operations	% of revenue from operations
1.	Transformer Manufacturing Business	5,455.05	83.43	3,837.94	85.17	1,431.97	51.75
2.	EPC Business	1,075.00	16.44	660.47	14.66	1,329.72	48.06
	- EPC solutions for substations	441.17	6.75	296.09	6.57	1,152.45	41.65
	-EPC solutions for transmission lines	633.83	9.69	364.38	8.09	177.27	6.41
3.	Other operating revenue*	8.34	0.13	7.71	0.17	5.21	0.19
Revenue from operations		**6,538.39**	**100.00**	**4,506.12**	**100.00**	**2,766.90**	**100.00**

** Other operating revenue includes scrap sales.*

Failure to successfully manufacture and market our products due to regulatory or technological changes including creation of alternate technologies, or otherwise could adversely affect our business and financial performance and results of operation.

2. **Dependence on high growth end-user sectors:**

We are dependent on our customers from the power transmission, railways and renewable energy sectors ("**High Growth Sectors**") for a significant portion of our operating revenue from our Transformer Manufacturing Business. Set out below are details of our operating revenue generated from the High Growth Sectors for the Fiscals 2026, 2025 and 2024:

End-user industry/ Sector	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (in ₹ million)	% of revenue from operations	Amount (in ₹ million)	% of revenue from operations	Amount (in ₹ million)	% of revenue from operations
Power transmission	4,610.90	70.52	2,528.54	56.11	1,764.51	63.77
Railways	1,720.45	26.31	1,404.22	31.16	380.97	13.77
Renewable energy	Nil	N.A.	Nil	N.A.	325.44	11.76
Total	**6,331.35**	**96.83**	**3932.76**	**87.27**	**2,470.92**	**89.30**

Adverse changes in consumer demand or confidence, trade policies, tariffs or sanctions on input materials, governmental policies or environmental regulations, or commodity prices affecting the power transmission, railways or renewable energy sectors could adversely impact our business and results of operations.

3. **Risk in relation to under-utilization of our manufacturing capacities:**

The table below sets forth the annual installed capacity, actual production and capacity utilization of transformers across our Manufacturing Facilities during Fiscals 2026, 2025 and 2024:

Manufacturing Unit/ Products	As of/For the financial year ended March 31, 2026			As of/For the financial year ended March 31, 2025			As of/For the financial year ended March 31, 2024		
	Annual Installed capacity (MVA)	Actual production (MVA)	Capacity utilisation (%)	Annual Installed capacity (MVA)	Actual production (MVA)	Capacity utilisation (%)	Annual Installed capacity (MVA)	Actual production (MVA)	Capacity utilisation (%)
Rithani Unit									
Transformer	1,200.00	3.00	0.25	1,200.00	3.00	0.25	1,200.00	80.00	6.66
Gangol Unit									
Transformer	18,000.00	8,827.00	49.04	18,000.00	5,712.00	31.70	13,800.00	2,390.00	17.31
TOTAL	**19,200.00**	**8,830.00**	**45.99**	**19,200.00**	**5,715.00**	**29.70**	**15,000.00**	**2,470.00**	**16.46**

A decline in demand for our offerings, disruption in operations, including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials may result in underutilization of our current manufacturing capacity and adversely affect our business and financial performance.

4. **Dependence on top 10 customers:**

We have derived a significant portion of our revenues from, and are therefore dependent on, certain key customers for a substantial portion of our business. Our top 10 customers accounted for 93.16%, 93.88%, and 95.43% of our revenue from operations in Fiscals 2026, 2025 and 2024, respectively. Any loss or reduction in orders, inability to secure new tenders, changes in customer requirements or delivery schedules of raw materials, customer disputes or financial constraints, or increased customer concentration could adversely affect our Transformer Manufacturing Business and EPC Business, cash flows, financial condition and results of operations.

5. **Ability to raise additional working capital:**

Our business requires significant working capital to fund inventory, trade receivables and maintain margins fixed deposits for the bank guarantees, which may increase with the expected growth in our Order Book. Any inability to obtain adequate financing on acceptable terms or in a timely manner could adversely affect our liquidity, business, cash flows, financial condition and results of operations.

6. **Dependence on transmission utilities, including state transmission companies:**

We are dependent on the transmission utilities, including state transmission companies, as our primary customer for supply of our transformers to them. Revenue from supply of transformers to state transmission companies was ₹2,514.00 million (38.45% of revenue) in Fiscal 2026, compared to ₹2,315.10 million (51.38% of revenue) in Fiscal 2025 and ₹2,100.96 million (75.93% of revenue) in Fiscal 2024. The decline in their percentage contribution to our revenue from operations was due to significantly higher growth in revenue and orders from other customer segments. As of Fiscal 2026, state transmission companies accounted for ₹7,818.90 million, or 43.00% of our Transformer Manufacturing Business Order Book, compared to 73.85% and 69.84% in Fiscals 2025 and 2024, respectively. Any material failure or inability, financial or otherwise, on their part to fulfil their obligations under the terms and conditions of the contracts/tenders would have a material adverse effect on the business and operations of our Company.

7. **Dependence on government-controlled entities for projects awarded through tenders:**

We secure a significant portion of our business through competitive bidding processes and prescribed technical and financial qualification criteria. Our bid-to-win ratio was 20.00% in Fiscal 2026, compared to 21.05% and 21.21% in Fiscals 2025 and 2024, respectively. Revenue from tenders awarded by government entities accounted for 85.37% of our revenue from operations in Fiscal 2026, compared to 64.09% and 90.10% in Fiscals 2025 and 2024, respectively. Our inability to meet bid or pre-qualification requirements, reduced tender opportunities, cancellation or delayed of awarded tenders or adverse changes in government policies, priorities or budgetary allocations towards the power sector could adversely affect our Order Book, business, financial condition and results of operations.

8. **Risk of disqualification, suspension, or blacklisting by government authorities:**

Government entities contributed 85.37% of our revenue from operations in Fiscal 2026, making us significantly dependent on government projects. Non-compliance with tender, contractual requirements, allegation of non-performance, deficiency of services or misconduct could result in disqualification, suspension or blacklisting, restricting our ability to participate in government tenders. In February 2026, BSPTCL debarred our Company (in JV with Aquarian Enterprises) for three years, which was conditionally withdrawn in May 2026 subject to completion of the balance punch point work by June 30, 2026, failing which the debarment may be reinstated without prejudice and prior notice. The balance punch point work was completed by June 30, 2026. Any reinstatement of such debarment or similar action in the future could adversely affect our business, reputation, financial condition and results of operations.

9. **Concentration of all our Manufacturing Facilities in Meerut, Uttar Pradesh:**

Our Manufacturing Facilities are located in Meerut, Uttar Pradesh, India, where we manufacture five different types of transformers, for our Transformer Manufacturing Business.

Set forth below is a table depicting the revenue generated from the operations under the Transformer Manufacturing Business and the percentage of the total revenue from operations of the Manufacturing Facilities for Fiscals 2026, 2025 and 2024:

(In ₹ million, except percentages)

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Revenue from operations	% of revenue from operations	Revenue from operations	% of revenue from operations	Revenue from operations	% of revenue from operations
Rithani Manufacturing Facility	8.02	0.12	15.26	0.34	99.57	3.60
Gangol Manufacturing Facility	5,447.03	83.31	3,822.68	84.83	1,332.40	48.15
Total	**5,455.05**	**83.43**	**3,837.94**	**85.17**	**1,431.97**	**51.75**

Our manufacturing operations at our Manufacturing Facilities may be disrupted by factors beyond our control, including natural disasters, fire, power outages, equipment breakdowns, labour disruptions, shortages of utilities/personnel and regulatory changes. Any prolonged disruption, damage or shutdown of our Manufacturing Facilities could adversely affect our business, financial condition and results of operations.

10. **Untraceable 34 public Shareholders of our Company:**

As on the date of the Red Herring Prospectus, our Company has 34 public Shareholders who hold collectively 208,000 Equity Shares and are currently not traceable and/or unresponsive. These shares includes 156,000 Equity Shares allotted pursuant to a bonus issue undertaken on September 19, 2025, which have been credited to a demat suspense account in accordance with applicable requirements. The Equity Shares credited to the demat suspense account shall be subject to lock-in for a period of six months from the date of Allotment, as required under the SEBI ICDR Regulations. Any such Shareholders becoming responsive may require the Company to undertake necessary corporate actions in accordance with applicable laws, which could result in additional administrative and compliance requirements.

11. **Geographical Concentration risk:**

We derive a significant portion of our revenue from operations from the states of Rajasthan, Punjab, Gujarat, Bihar, Madhya Pradesh, Uttar Pradesh, Karnataka, Maharashtra, Jharkhand and Assam. Set out below is the revenue from operations derived from such states in India and overseas in Fiscals 2026, 2025 and 2024:

State	Fiscal 2026#		Fiscal 2025		Fiscal 2024	
	Revenue from Operations	% of revenue from operations	Revenue from Operations	% of revenue from operations	Revenue from Operations	% of revenue from operations
Rajasthan	1,310.96	20.05	1,376.19	30.54	832.16	30.08
Punjab	1,085.97	16.61	314.41	6.98	707.53	25.57
Gujarat	995.52	15.23	669.69	14.86	-	0.00
Bihar	609.73	9.33	60.00	1.33	71.71	2.59
Madhya Pradesh	593.09	9.07	254.35	5.65	268.29	9.70
Uttar Pradesh	491.87	7.52	42.37	0.94	199.91	7.23
Karnataka	369.85	5.66	209.24	4.64	0.43	0.02
Maharashtra	371.77	5.69	457.55	10.15	99.70	3.60
Jharkhand	332.06	5.08	509.41	11.30	280.54	10.14
Assam	144.64	2.21	496.77	11.02	225.70	8.16
Others*	229.96	3.50	116.14	2.59	80.93	2.91
Total revenue from operations	6,535.42	99.95	4,506.12	100.00	2,766.90	100.00

** Other states include Himachal Pradesh, Haryana, Odisha, Delhi, West Bengal, Sikkim and Uttarakhand.*

 # Excludes revenue from operations derived from overseas sales in Taiwan in Fiscal 2026.

Any decrease in revenues from such states in which we operate, including due to economic slowdown, increased competition or supply, or reduction in demand, in markets in which we operate, may have an adverse effect on our business, cash flows, results of operation and financial condition.

12. **Dependence on top 10 Suppliers:**

We depend on third-party suppliers for key raw materials, including insulated copper conductor, cold-rolled grain-oriented steel and transformer oil. Our top 10 suppliers accounted for 71.49% of our cost of goods sold in Fiscal 2026, compared to 70.65% and 63.03% in Fiscals 2025 and 2024, respectively. We generally procure raw materials through purchase orders without long-term supply agreements and have a limited number of suppliers for certain key raw materials. Any disruption in supply, inability of suppliers to meet our requirements or diversion of supplies to competitors could adversely affect our business, financial condition and results of operations.

No cheque will be accepted.

UPI UNIFIED PAYMENTS INTERFACE

UPI-Now available in ASBA for Retail Individual Investors and Non Institutional Investor applying in public issues where the application amount is up to ₹ 500,000, applying through Registered Brokers, Syndicate, CDPs & RTAs. UPI Bidders also have the option to submit the application directly to the ASBA Bank (SCSBs) or to use the facility of linked online trading, demat and bank account. Investors are required to ensure that the bank account used for bidding is linked to their PAN. Bidders must ensure that their PAN is linked with Aadhaar and are in compliance with CBDT notification dated February 13, 2020 issued by the Central Board of Direct Taxes and the subsequent press releases, including press release dated June 25, 2021 read with press release dated September 17, 2021, and CBDT circular no. 7 of 2022 dated March 30, 2022, read with press release dated March 28, 2023, and any subsequent press release in this regard.

*ASBA has to be availed by all the investors except Anchor Investors. UPI may be availed by (i) Retail Individual Investors in the Retail Portion; (ii) Non-Institutional Investors with an application size of up to ₹0.50 million in the Non-Institutional Portion. For details on the ASBA and UPI process, please refer to the details given in the Bid Cum Application Form and Abridged Prospectus and also please refer to the section **"Offer Procedure"** on page 450 of the RHP. The process is also available on the website of Association of Investment Bankers of India ("**AIBI**") and Stock Exchanges and in the General Information Document. The Bid Cum Application Form and the Abridged Prospectus can be downloaded from the websites of the Stock Exchanges and can be obtained from the list of banks that is displayed on the website of SEBI at www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=35 and https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes &intmId=43, respectively as updated from time to time. For the list of UPI apps and banks live on IPO, please refer to the link: www.sebi.gov.in. UPI Bidders Bidding using the UPI Mechanism may apply through the SCSBs and mobile applications whose names appear on the website of SEBI, as updated from time to time. Axis Bank Limited and ICICI Bank Limited have been appointed as the Sponsor Banks for the Offer, in accordance with the requirements of SEBI circular dated November 1, 2018 as amended. For Offer related queries, please contact the BRLMs on their respective email IDs as mentioned below. For UPI related queries, investors can contact NPCI at the toll free number: 18001201740 and mail Id: ipo.upi@npci.org.in.*

THE EQUITY SHARES OF OUR COMPANY WILL GET LISTED ON THE MAIN BOARD PLATFORMS OF BSE AND NSE.

In case of any revision in the Price Band, the Bid/ Offer Period will be extended by at least three additional Working Days after such revision in the Price Band, subject to the Bid/ Offer Period not exceeding 10 Working Days. In cases of force majeure, banking strike or similar unforeseen circumstances, our Company may, in consultation with the BRLMs, for reasons to be recorded in writing, extend the Bid /Offer Period for a minimum of one Working Day, subject to the Bid/ Offer Period not exceeding 10 Working Days. Any revision in the Price Band and the revised Bid/ Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges, by issuing a press release, and also by indicating the change on the respective websites of the BRLMs and at the terminals of the Syndicate Member and by intimation to Designated Intermediaries and the Sponsor Banks, as applicable.

The Offer is being made in terms of Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended (the "**SCRR**"), read with Regulation 31 of the SEBI ICDR Regulations. The Offer is being made through the Book Building Process in accordance with Regulation 6(1) of the SEBI ICDR Regulations wherein not more than 50% of the Offer shall be available for allocation on a proportionate basis to Qualified Institutional Buyers ("**QIBs**") (the "**QIB Portion**"), provided that our Company in consultation with the BRLMs may allocate up to 60% of the QIB Portion to Anchor Investors and such allocation will be on a discretionary basis by our Company, in consultation with the BRLMs, in accordance with the SEBI ICDR Regulations (the "Anchor Investor Portion"), of which 40% shall be reserved in the following manner (i) 33.33% of the Anchor Investor Portion shall be reserved for domestic Mutual Funds; and (ii) 6.67% of the Anchor Investor Portion shall be reserved for Life Insurance Companies and Pension Funds, subject to valid Bids being received from domestic Mutual Funds, Life Insurance Companies and Pension Funds, as applicable, at or above the Anchor Investor Allocation Price. Any under-subscription in the Life Insurance Companies and Pension Funds category specified in (ii) above may be allocated to domestic Mutual Funds, in accordance with the SEBI ICDR Regulations. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the QIB Portion (other than the Anchor Investor Portion) (the "**Net QIB Portion**"). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only, subject to valid Bids being received at or above the Offer Price, and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIBs, including Mutual Funds, subject to valid Bids being received at or above the Offer Price. Further, not less than 15% of the Offer shall be available for allocation to Non-Institutional Investors ("**Non-Institutional Portion**") of which one-third of the Non-Institutional Portion shall be available for allocation to Bidders with an application size of more than ₹0.20 million and up to ₹1.00 million and two-thirds of the Non-Institutional Portion shall be available for allocation to Bidders with an application size of more than ₹1.00 million and undersubscription in either of these two sub-categories of the Non-Institutional Portion may be allocated to Bidders in the other sub-category of the Non-Institutional Portion in accordance with the SEBI ICDR Regulations, subject to valid Bids being received at or above the Offer Price. Further, not less than 35% of the Offer shall be available for allocation to Retail Individual Investors ("**Retail Portion**"), in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. All Bidders (except Anchor Investors) shall mandatorily participate in this Offer only through the Application Supported by Blocked Amount ("ASBA") process and shall provide details of their respective bank account (including UPI ID (defined hereinafter) in case of UPI Bidders (defined hereinafter) in which the Bid Amount will be blocked by the Self Certified Syndicate Banks ("**SCSBs**") or pursuant to the UPI Mechanism, as the case may be. Anchor Investors are not permitted to participate in the Anchor Investor Portion through the ASBA process. For details, see ***"Offer Procedure"*** on page450 of the RHP.

Bidders/Applicants should ensure that DP ID, PAN and the Client ID and UPI ID (for UPI Bidders bidding through UPI Mechanism) are correctly filled in the Bid cum Application Form. The DP ID, PAN and Client ID provided in the Bid cum Application Form should match with the DP ID, PAN, Client ID and UPI ID available (for UPI Bidders bidding through the UPI Mechanism) in the Depository database, otherwise, the Bid cum Application Form is liable to be rejected. Bidders/ Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPI ID (for UPI Bidders bidding through the UPI mechanism) as provided in the Bid cum Application Form, the Bidder/Applicant may be deemed to have authorized the Depositories to provide to the Registrar to the Offer, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These Demographic Details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders/Applicants' sole risk.

Investors must ensure that their PAN is linked with Aadhaar and are in compliance with the notification issued by Central Board of Direct Taxes notification dated February 13, 2020 and read with press releases dated June 25, 2021, September 17, 2021 and March 28, 2023 and any subsequent press releases in this regard.

Contents of the Memorandum of Association of our Company as regards its objects: For information on the main objects of our Company, please see ***"History and Certain Corporate Matters"*** on page 284 of the RHP. The Memorandum of Association of our Company is a material document for inspection in relation to the Offer. For further details, see ***"Material Contracts and Documents for Inspection"*** on page 492 of the RHP.

Liability of the members of our Company: Limited by shares.

Amount of share capital of our Company and capital structure: As on the date of the RHP, the authorised share capital of our Company is ₹170,000,000 divided into 85,000,000 Equity Shares of face value of ₹2 each . The issued, subscribed and paid-up Equity share capital of our Company is ₹148,880,000 divided into 74,440,000 Equity Shares of face value of ₹2 each . For more details of the capital structure of the Company, see ***"Capital Structure"*** beginning on page 87 of the RHP.

Names of the initial signatories to the Memorandum of Association of the Company and the Number of Equity Shares Subscribed by them: The initial signatories to the Memorandum of Association of the Company are as follows: Dinesh Singhal, Adesh Singhal, Vivek Singhal, Abhishek Singhal, Virat Singhal, Aditya Singhal and K Sons Family Trust. For more details of the share capital history of our Company please see ***"Capital Structure"*** beginning on page 87 of the RHP.

Listing: The Equity Shares, to be offered through the Red Herring Prospectus, are proposed to be listed on the Stock Exchanges. Our Company has received 'in-principle' approvals from BSE and NSE for the listing of the Equity Shares pursuant to letters each dated June 4, 2026. For the purposes of the Offer, the Designated Stock Exchange shall be NSE. A copy of the Red Herring Prospectus has been filed and a copy of the Prospectus shall be filed with the RoC in accordance with Sections 26(4) and 32 of the Companies Act, 2013. For details of the material contracts and documents available for inspection from the date of the Red Herring Prospectus until the Bid/ Offer Closing Date, see ***"Material Contracts and Documents for Inspection"*** beginning on page 492 of the RHP.

Disclaimer Clause of Securities and Exchange Board of India ("SEBI"): SEBI only gives its observations on the offer documents and this does not constitute approval of either the Offer or the specified securities stated in the Offer Documents. The investors are advised to refer to page 428 of the RHP for the full text of the disclaimer clause of SEBI.

Disclaimer Clause of BSE: It is to be distinctly understood that the permission given by BSE should not in any way be deemed or construed that the Red Herring Prospectus has been cleared or approved by BSE nor does it certify the correctness or completeness of any of the contents of the Red Herring Prospectus. The investors are advised to refer to the page 430 of the Red Herring Prospectus for the full text of the disclaimer clause of BSE.

Disclaimer Clause of NSE (the Designated Stock Exchange): It is to be distinctly understood that the permission given by NSE should not in any way be deemed or construed that the Offer Document has been cleared or approved by NSE nor does it certify the correctness or completeness of any of the contents of the Offer Document. The investors are advised to refer to page 431 of the RHP for the full text of the disclaimer clause of NSE.

General Risks: Investments in equity and equity-related securities involve a degree of risk and Bidders should not invest any funds in the Offer unless they can afford to take the risk of losing their entire investment. Bidders are advised to read the risk factors carefully before taking an investment decision in the Offer. For taking an investment decision, Bidders must rely on their own examination of our Company and the Offer, including the risks involved. The Equity Shares in the Offer have not been recommended or approved by the SEBI, nor does SEBI guarantee the accuracy or adequacy of the contents of the Red Herring Prospectus. Specific attention of the investors is invited to ***"Risk Factors"*** beginning on page 18 of the RHP.

Progress on border issues key to India-China ties

New Delhi: India may link any further easing of investment rules for Chinese investors to satisfactory progress on at least some concerns related to the long-pending border disputes, which are under active discussion between the two sides, sources said. Chinese President Xi Jinping's proposed bilateral meeting with Prime Minister Narendra Modi this weekend on the sidelines of the BRICS Summit in New Delhi could prove crucial in determining the pace of economic engagement. **p3**

JLR to axe 4,000 jobs in 2 years to ringfence TaMo earnings

AUSTERITY DRIVE. £1.7 b savings plan will lower break-even point, cushioning margins

Amit Vijay Mohile
Mumbai

Growth falters

Fiscal year	Revenue (£ b)	EBIT margin (%)	Net profit / loss (£ b)	Employee strength
FY26	22.91	0.70	-0.244	40,666
FY25	29.00	8.50	1.800	41,517
FY24	29.00	8.50	2.600	40,000+ (Incl. Agency)

Tata Motors-owned Jaguar Land Rover (JLR) will cut around 4,000 jobs globally, targeting £1.7 billion in savings over the next two years as it responds to a sharp deterioration in earnings and cash flows amid weaker demand, tariff pressures and intensifying competition in key markets.

The restructuring will lower JLR's break-even point to about 3,00,000 vehicles from around 3,50,000, reducing by nearly 14 per cent the annual sales volume needed to cover its cost base. The cuts will largely target salaried and management roles through voluntary programmes, while direct manufacturing jobs will be protected.

For Tata Motors, the move is significant as JLR remains the group's largest contributor to profit and cash generation. Lowering the break-even threshold should make the business more resilient as volumes, margins and free cash flow remain under pressure. "We are reducing organisational complexity and targeting £1.7 billion of savings to lower our break-even point towards 3,00,000 vehicles and become fitter to compete in a rapidly evolving market," said JLR Chief Executive PB Balaji.

EARNINGS CUSHION

"The reduction in the break-even point is more significant from an investor perspective than the headline job cuts. It gives JLR a larger cushion to protect margins and cash flows if volumes remain under pressure," said Kranthi Bathini, Director of Equity Strategy at WealthMills Securities.

The cost-cutting programme comes as JLR grapples with a difficult operating environment after a strong FY25, when it generated about £29 billion in revenue, delivered an underlying EBIT margin of around 8 per cent and reported profit after tax of £1.8 billion.

MANY ISSUES

Since then, the luxury carmaker has faced several setbacks. A cyberattack disrupted production and order-processing systems, while a 10 per cent US import tariff increased pressure on profitability in North America. Weaker demand in China, coupled with competition from domestic luxury EV makers, pushed up discounting and marketing costs.

The strain was evident in the Q1 FY27, with revenue falling 9 per cent year-on-year to £6 billion. EBIT margin more than halved to around 4 per cent in Q1 FY27 from 8.9 per cent in Q1 FY26, while free cash flow swung to an outflow of £758 million. JLR is pairing the savings programme with investments in future products, including the Range Rover EV and the relaunch of the Jaguar brand. While the restructuring should strengthen margins and cash flows, analysts caution its success will ultimately depend on the traction of new models and a recovery in demand across key markets.

CEO Balaji acknowledged the challenges facing the industry, citing rapid technological change, intense competition and geopolitical uncertainty, and said the company would support affected employees with "care, fairness and respect".

DAC clears slew of tri-Services purchases worth ₹1.1 lakh crore

Dalip Singh
New Delhi

Several tri-Services proposals, including chemical, biological, radiological and nuclear (CBRN) recce vehicles, advanced light helicopters (ALHs), Arudhra radars and the design, development and subsequent procurement of marine gas turbines (MGTs), were cleared by the Defence Acquisition Council (DAC) on Monday.

The proposals are expected to cost ₹1.1 lakh crore.

Sources said the Council also cleared the routine overhaul and repair of 40 Su-30MKI fighter aircraft.

MINE-LAYING ASSETS

For the Army, the DAC, which met under the chairmanship of Defence Minister Rajnath Singh, gave in-principle administrative approval for the procurement of CBRN recce vehicles, high mobility vehicles (HMVs), self-propelled mechanical mine layers (MMLs), ALHs, trawl tanks and Sarvatra bridge systems, the Ministry of Defence said in a statement.

The CBRN recce vehicles, developed primarily by the DRDO's Vehicle Research and Development Establishment (VRDE) in partnership with production agencies such as BEL, MDSL and AVNL, will detect, identify, monitor and mark areas contaminated with CBRN agents, the Ministry said.

The Defence Acquisition Council also cleared the routine overhaul and repair of 40 Su-30MKI fighter aircraft

The ALHs will undertake complex missions across varied terrains and operational situations for the Army and the Air Force.

HMVs will enhance the Army's operational capabilities, logistics support and mobility in challenging terrains.

The MMLs will provide fast and responsive mine-laying capability in difficult terrain, while trawl tanks and Sarvatra bridge systems will provide composite crossing capabilities to fighting formations during operations across varied terrains, the Ministry said.

NAVY, IAF APPROVALS

For the Navy, the DAC approved the procurement of Arudhra radars to replace the existing air route surveillance radars at various naval air stations.

The Council also cleared the design, development and subsequent procurement of MGTs, a warship propulsion system, aimed at reducing dependence on foreign vendors.

For the Air Force, the Council approved several proposals to enhance the war-fighting capabilities of fighters, transport aircraft and helicopters. It also cleared the procurement of ground-based multi-purpose jammers (GBMPJs) for effective jamming of adversary radars.

The Air Force's project to install the Defence Forces Secure Access Card (DEFSAC) system was also approved.

The system will replace paper-based identity cards, passes and permits with interoperable, radio-frequency identification-based smart cards.

FTSE Russell recognition of BSE could open global index route for NSE shares

Akshata Gorde
Mumbai

FTSE Russell's decision to recognise the BSE as an eligible exchange for its global equity indices could have limited incremental impact on most large Indian companies, but may prove particularly relevant for the National Stock Exchange (NSE) as it prepares for its own listing.

Last month, the global index provider said securities listed on the BSE Main Board would become eligible for assessment for its global equity indices from the March 2027 review.

Newly listed securities that do not immediately qualify will also be eligible for fast-track screening for inclusion in widely tracked international benchmarks. Securities listed on the NSE, however, are already eligible for FTSE Russell's indices.

"All large-cap stocks listed on the NSE are also listed on the BSE, so FTSE's inclusion of BSE-listed stocks makes no difference to any stock as of now," said Arun Kejriwal, Founder of Kejriwal Securities.

"The material difference would be for NSE's shares, which are expected to list soon on the BSE and could become eligible for inclusion in global indices," he said.

NSE LISTING IN FOCUS

The NSE, the world's largest derivatives exchange by the number of contracts traded, is expected to list its shares on the BSE towards the end of the month, after receiving the market regulator's final approval last Friday. The public offer is expected to value the country's largest exchange at around ₹30,000 crore, with strong investor interest already evident in the unlisted market ahead of the issue.

If the listing happens, as planned, the NSE shares would have around six months of trading history on the BSE by the time of FTSE Russell's March 2027 review. This would allow the shares to meet the minimum listing-period requirement for consideration for the BSE's flagship indices.

NO AUTOMATIC ENTRY

However, index inclusion is not automatic. Securities would still have to meet the respective index provider's requirements on factors such as size, liquidity and investability. BSE indices, for instance, assess stocks on factors, including float-adjusted market capitalisation, traded value and trading frequency over the relevant observation period.

Given the expected interest in NSE shares, the stock is likely to build the liquidity needed for such assessments once trading begins. FTSE Russell's move could nevertheless remove one potential exchange-level hurdle for the NSE as it prepares to enter the listed market. International institutional investors often access large markets through benchmark and passive funds, making inclusion in widely tracked global indices an important potential source of incremental demand for a large stock such as the NSE's.

As India's space ambitions grow, ISRO 'increasingly turning to industry to scale up'

Aishwarya Kumar
Bengaluru

India's space ambitions are beginning to outgrow the capacity of its national space agency, putting private industry at the centre of the next phase of growth.

The country is targeting 50 launches a year and is expected to need 200-300 satellites over the next six-seven years, prompting ISRO to increasingly rely on industry, start-ups and academia to expand capacity.

ISRO Chairman V Narayanan said the shift was already underway, pointing to the scale of industry's contribution to India's launch programme.

450 FIRMS INVOLVED

"Whenever a PSLV or a GSLV lifts off, don't think that everything is done by ISRO," Narayanan said at the ninth edition of the Bengaluru Space Expo.

ISRO Chairman V Narayanan

Nearly 80 per cent of the budget is invested by Indian industry, with around 450 companies working with ISRO, he said.

The expansion is also visible in the start-up ecosystem. From just one space start-up in 2014, India now has more than 440, while over $160 million in private equity capital had entered the sector this year, Narayanan said.

Yet, India accounts for only around 2 per cent of the global space market, a small share for a country with a space programme running for more than six decades.

SIX MISSIONS PLANNED

ISRO is also preparing for a busy year, with six more missions planned, including the country's first uncrewed mission as part of its human spaceflight programme.

The government is now seeking to turn the ecosystem into a much larger industrial base.

Pawan Goenka, Chairman, IN-SPACe, said India's ambition of building a $44 billion space economy by 2033 and raising its global share to 7-8 per cent cannot be achieved by ISRO and start-ups alone.

DEEP TECH FOCUS

Within ISRO, the agency is continuing to develop technologies that could eventually feed the wider ecosystem. M Ganesh Pillai, Scientific Secretary, ISRO, said it was pursuing around 2,000 R&D projects.

For industry, the growing private role need not mean competition with ISRO.

Ashish Taneja, Founder and CEO, GrowX Ventures, said ISRO should focus on deep science, exploration, strategic missions and hard technology development, while private companies take proven technologies to scale, lower costs and build commercial markets.

That distinction is also important as rising private participation raises concerns among ISRO employees.

Narayanan sought to reassure the roughly 20,000 employees, saying, "ISRO is not privatised", and that employee concerns would be addressed.

Maruti Suzuki hikes prices by ₹20,000 on few models

New Delhi: Maruti Suzuki India (MSIL) on Monday said it has decided to increase the prices on selected models by up to ₹20,000, effective this month. For the past few months, the company said it has been making continuous efforts to mitigate the cost impact to the extent possible but inflationary pressures has forced it to pass on a portion to customers. This is the second price hike announcement by the company in the recent past, one being in August itself. Effective August, the company announced the price increase of its models across its portfolio by up to ₹30,000. OUR BUREAU

Vishnu Chemicals inks JV pact with DCX Chrome

Hyderabad: Vishnu Chemicals, a specialty chemical maker, has executed a definitive Joint Venture Agreement with DCX Chrome SAS, France, a global player in manufacturing of high-purity aluminothermic chromium metal and specialised chromium powders. The JV will establish a greenfield manufacturing facility in Visakhapatnam and both companies will hold an equal 50 per cent stake in it. The plant is engineered to operate with an installed capacity of 6,000 tonnes per annum. OUR BUREAU

Incoming CEO Gebremariam vows to 'make Air India great again'

FRESH START. Chairman N Chandrasekaran calls for greater cost consciousness, prioritises safety record

Our Bureau
New Delhi

Air India's safety record should not just match that of the world's best airlines but be better than the best, Tata Sons and Air India Chairman N Chandrasekaran said on Monday.

Addressing employees at a townhall, alongside outgoing CEO and Managing Director Campbell Wilson and incoming CEO and MD Tewolde Gebremariam, Chandrasekaran said safety, customer trust, operational execution and cost discipline would be priorities for the airline as it enters the next phase of transformation.

REBUILDING THE AIRLINE. (From left) Outgoing Air India CEO Campbell Wilson, Tata Sons and Air India Chairman N Chandrasekaran and CEO-designate Tewolde Gebremariam

'WORLD-CLASS'

"Air India must be known for caring about safety above everything else... Safety is not about what we say. It is about what we do every day," said Chandrasekaran. According to him, achieving this would require world-class processes, rigorous compliance and personal accountability across the organisation. The airline has faced heightened scrutiny over safety in recent months, including the August 4 Phuket-Delhi incident in which 20 passengers and four cabin crew members were injured, apart from the fatal AI171 crash in June last year.

Chandrasekaran also called for greater cost consciousness across the airline as it seeks to strengthen its financial sustainability and operational performance.

"Every individual in Air India can contribute to improving cost efficiency," he said, while emphasising the need to build a stronger culture of cost consciousness across the organisation.

The comment assumes significance as Air India has sought fresh capital from its shareholders worth around ₹10,000 crore even as the airline reported a loss of more than ₹22,000 crore in FY26.

THE NEXT PHASE

Chandrasekaran said rebuilding trust among customers must be a key priority for the airline. Further, he called for greater consistency in customer experience and increased agility in responding to a rapidly changing operating environment.

He also acknowledged that the past 18 months had been particularly challenging for Air India, with geopolitical disruptions, airspace closures, fuel volatility and the AI171 accident impacting the airline's operations and performance. Against this backdrop, he said the airline's focus in the next phase has to extend beyond operational improvements.

On his part, Gebremariam, who will assume the top job after receiving all necessary approvals, recalled Air India's strong position in the industry which he wants to restore now. "I understand that Air India is not just another airline. It is one of the world's most iconic aviation brands," he said. "If we do the right things at the right time, the sky is the limit."

Earlier in the 90s, he was posted in Mumbai during his stint with Ethiopian Airlines. "Now I will have the opportunity to again make it a strong brand," he said. "I am coming from the US, so allow me to borrow a phrase, MAGA. We will make Air India great again."

Gebremariam identified safety as his foremost priority and called on employees to actively contribute towards building a stronger safety culture. He also stressed the importance of operational excellence, saying customer experience would ultimately depend on reliable and consistent delivery. "Together, we can build a safer, stronger and truly world-class Air India."

Auto retail sales rise 17.5% in August: FADA

'Biggest-ever' August

All-India vehicle retail sales (in units)

Category	Aug-25	Aug-26	y-o-y growth (in %)
Passenger Vehicles	3,46,468	4,02,398	16.14
Two-wheelers	14,32,537	17,14,610	19.69
Three-wheelers	1,12,553	1,22,281	8.64
Commercial Vehicles	79,306	90,769	14.45
Tractors	87,244	87,977	0.84
Total	**20,62,038**	**24,23,201**	**17.51**

Source: FADA

S Ronendra Singh
New Delhi

Alternative fuels such as CNG, electric and hybrids collectively overtook petrol variants in passenger vehicles (PVs) for the first time, in the monthly sales during last month, the Federation of Automobile Dealers Associations (FADA) said on Monday. It was also the biggest-ever August in Indian auto retail with the industry registering sales of 24,23,201 units, the industry body added.

Total automobile (across all categories) retail sales grew by 17.51 per cent year-on-year compared with 20,62,038 units sold in August 2025, it said.

FESTIVAL DEMAND

Going forward, the sales expectations rest on the proper festival season, now beginning with Ganesh Chaturthi, the Onam sales spillover and the onset of Navratri, with dealers reporting booking pipelines already, Sai Giridhar, President, FADA, said on Monday.

"For the September-November period, 81.62 per cent of dealers expect growth, 17.09 per cent a flat market and just 1.28 per cent de-growth — a strong reading, though moderated from the 87.85 per cent recorded a month ago," said Giridhar.

Two-wheelers should draw support from festival demand and the alternative-fuel shift, though rural cashflows remain hostage to late-season rainfall, he said, adding that PVs enter September with fresh launches and healthy pipelines but must convert them against elevated inventory and a demanding base.

On monthly retail sales, FADA report indicated PV sales grew 16.1 per cent y-o-y to 4,02,398 units during the month. Two-wheeler (2W) sales also grew by around 20 per cent y-o-y to 17,14,610 units. Similarly, three-wheeler (3W) sales grew by around 9 per cent to 1,22,281 units and CVs recorded a 14.4 per cent y-o-y growth to 90,769 units, the FADA report indicated.

MONSOON EFFECT

The industry body added that even as a widening monsoon deficit — around 13 per cent, with 14 States short of rain — held tractors flat and pulled them 25.03 per cent lower month-on-month, every other rural segment outgrew its urban counterpart. Rural PV sales rose 24.99 per cent against urban's 10.93 per cent, and rural 3Ws grew 23.95 per cent even as urban 3Ws fell.

"Rural demand has begun to decouple from the monsoon — the farm-income-linked segment softened, yet the non-farm rural economy of livelihood mobility, goods movement and construction kept accelerating. For an industry long accustomed to reading rural India through the rainfall map, that is the quiet structural marker of FY27," Giridhar added.

Novartis India to buy two Pfizer brands for ₹1,250 cr

Our Bureau
Mumbai

Novartis India has inked an agreement to acquire the trademarks 'Minipress' and 'Minipres' in India and certain related intellectual property rights from Pfizer Inc and Pfizer Products Inc, for ₹1,250 crore.

Minipress XL (containing prazosin) is primarily used to treat hypertension (high blood pressure), besides managing urinary symptoms of benign prostatic hyperplasia (BPH).

STRATEGIC MOVE

The development comes after private-equity firm ChrysCapital's acquisition of the entire 70.68 per cent stake in Novartis India Ltd (NIL), previously held by the Swiss parent company Novartis AG. The India business has a new management and will soon have a new name. Industry insiders see the acquisition as an effort to bulk up the business.

THE MARKET

Minipress XL is used to treat high BP. The category, in the last four years, is said to have grown 9 per cent

Novartis India operates across segments including pain management, calcium supplementation, gynaecology, neurosciences, and transplant immunology with brands including Voveran, Calcium Sandoz and Tegrital, to name a few.

In another statement, Pfizer in India said it would discontinue marketing, distribution and sale of Minipress XL from September 7 – following American drugmaker Pfizer Inc's decision to discontinue the manufacture of Minipress XL. In connection with the decision, it said, it would receive "a lump sum payment of $13.9 million (roughly ₹131.38 crore) from Pfizer Inc USA".

According to industry tracker IQVIA, for the 12 months up to July 2026, Minipress XL recorded revenue of ₹228.6 crore, growing at 6.3 per cent for four years while the category has been growing at 9 per cent in the same period, Novartis said.

NIL had been put on the block after the parent company , in 2024, said that its India-listed entity was under review. In an announcement in February this year, the transaction amount was pegged at ₹1,446 crore.

Leo Puri to take over as Chairman of Asian Paints

Our Bureau
Mumbai

Asian Paints has appointed Leo Puri as an Additional and Independent Director for five years, till September 6, 2031. He will takeover as Chairman from January 2027 after incumbent Chairman R Seshasayee's term ends as an Independent Director.

Puri previously served as the Chairman, South & Southeast Asia for JP Morgan Chase; Managing Director and Chief Executive Officer of UTI Asset Management Company; Managing Director and General Partner at Warburg Pincus and Senior Partner at McKinsey & Company. An industry leader and financial sector veteran with four decades of experience, he presently serves as the Advisory India Chair, Apax, a global private-equity firm.

Besides serving as the Chairman of Fortis Healthcare and lead independent director at Dr Reddy's Laboratories, Puri also chairs the Governing Council of the Institute of Sustainability, Employment and Growth. He has also previously served as the Chairman of AMFI.

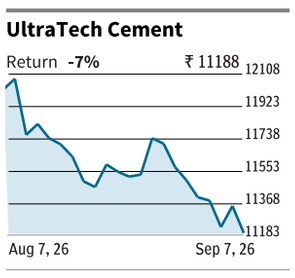
Ultravolt could generate ₹7,000 cr revenue in 3 years

Suresh P Iyengar
Mumbai

UltraTech's newly launched wires and cables business, Ultravolt, is expected to register revenue of ₹6,000-7,000 crore in next two to three years, though margins may remain subdued due to promotional activities.

With a planned capex of ₹1,800 crore, Ultravolt targets to become the second-largest player in the wires segment by capacity. The company currently has an installed capacity of 1 million km and aims to scale this to 3.5-4 million km at Bharuch in Gujarat. Of the planned capex, the company has already invested ₹880 crore.

"We do not expect a meaningful contribution until FY28E and estimate the business to contribute 5 per cent of UltraTech's revenue from FY29," said Sudeep Anand, President & Lead Analyst, Oil & Gas, Cement, Railways & Infrastructure, Systematix Institutional Research.



EDGE OVER PEERS

Ultravolt will also leverage UltraTech's distribution and sales network, including around 5,000 dealers and one lakh channel partners, along with 1,600 technical sales professionals across the construction sector.

Dilip Gaur, Director, Ultravolt, said UltraTech Cement could potentially identify market opportunities months ahead of competitors as construction is estimated to account for nearly 80 per cent of wire and cable consumption. "Cement is bought first and wire is bought six months later. If anyone gets to know when and where cement is bought, we will know six months ahead of the competition," he said at a recent event.

While the immediate impact may be limited, Choice Institutional Equities' Ashutosh Murarka believes the presence of another large conglomerate could raise the entry barrier for smaller players and drive consolidation across the industry.

The impact will be redistribution of market share and some pressure on profits, rather than any meaningful change in the industry's underlying growth trajectory, he said.

Vehicle transport through trains won't hurt truck freight significantly: SIAM President

S Ronendra Singh
New Delhi

Demand for truck freight will remain unaffected despite the growing reliance on railway sidings for vehicle transport, Shenu Agarwal, President, Society of Indian Automobile Manufacturers (SIAM), told *businessline*.

"There has been a lot of chatter about how railways will affect truck trade. But I don't find much weight in this discussion... the world over, we have seen that truck freight cannot be replaced. It's not just a matter of sheer economics; railways can do it more efficiently, but it cannot provide you a comprehensive solution," he said.

The customer may be looking at efficiency, but first they're looking at the entire comprehensive solution and railways will never be able to do that, he added.

GROUND REALITY

- Maruti Suzuki has increased the share of rail in its outbound vehicle dispatches from 5 per cent in FY15 to 26.5 per cent in FY26
- The company aims to increase that share to 35 per cent by FY31
- Hyundai Motor India chief says railways accounts for more than a quarter of its shipments

"Railways may present a part of the solution, but that still means that while that part will be taken away, additional parts will get created. So, I don't think it will have an impact on the volume of the trucks that are on the road. It may have certain other impacts, but nothing significant," Agarwal added.

Analysts tracking the industry also said railways may save time on transport of the vehicle containers across the country, much ahead of the trucks on roads, but for the last-mile connectivity, these trucks would only help the railways.

THE OTHER TREND

According to the latest data compiled by the Federation of Automobile Dealers Associations (FADA), retail sales of heavy commercial vehicles increased 14 per cent year-on-year to 26,640 units in August. Meanwhile, companies like Maruti Suzuki India (MSIL) and Hyundai Motor India (HMIL) have also been recording an increase in their transport of vehicles through railways.

MSIL, for instance, has increased the share of rail in its outbound vehicle dispatches from 5 per cent in FY15 to 26.5 per cent in FY26 and dispatched over 32 lakh vehicles cumulatively till date. The company aims to increase that share to 35 per cent by FY31, reinforcing its commitment to green logistics, it said.

HMIL also said it has increased transport of vehicles through railways over the past few years. "Earlier, it was for exports (till ports), but not domestic and we are making more and more stockyards near railway stations. We have four to five stockyards, and we are going to increase them... Six-seven years ago, railways was 17-18 per cent of our shipments, now it is more than 25 per cent and this is despite no railway line in the plant," Tarun Garg, MD and CEO, HMIL told *businessline*.

Ola Electric's ₹1,500 cr fundraise may help recovery, but concerns linger

Amit Vijay Mohile
Mumbai

The Ola Electric Mobility board has approved a fundraise of up to ₹1,500 crore ($158 million), its second capital-raising exercise in three months and a reminder of the scale of the turnaround facing the company.

The proposed fundraise is modest compared with the ₹4,859 crore in free cash Ola has burned over the past two financial years. The announcement also comes as Hyun Shik Park resigned from his role as Chief Operating Officer, effective September 5.

Viewed beyond the filing, the raise is about funding what could be called Ola 2.0: a rebuild centred on dealerships, affordable products, localisation and battery-cell manufacturing. The bigger question is whether that strategy can eventually deliver an Ola 3.0 capable of regaining market share and generating sustainable growth.

'MORE HEADROOM'

The proposed ₹1,500 crore follows the ₹780 crore Ola raised through a qualified institutional placement (QIP) three months ago. In May, the company also approved investments of up to ₹2,000 crore in subsidiaries, including ₹1,500 crore for EV manufacturing and ₹500 crore for battery-cell production.

"The fundraise gives Ola the financial headroom to execute its plans, but capital alone will not bring back market share," said Kranthi Bathini, Director - Equity Strategy at WealthMills Securities. "Investors will want to see an improvement in volumes, margins and cash burn."

The company has stated that its initial model laid the foundation for the next phase of growth. "Ola Electric built its early growth through company-owned stores, using them to establish the brand, create EV awareness, and build India's largest electric two-wheeler customer base of over 10 lakh riders," Chief Business Officer Manoj Murali said. "That foundation is now set."

BLEEDING CASH. While Ola narrowed its losses to ₹1,833 crore in FY26 from ₹2,253 crore in the previous year, its annual revenue halved to ₹2,253 crore REUTERS

Ola Electric is now shifting to a dealer-led network, supported by products such as the S1Z, priced from ₹79,999.

But rivals have expanded faster. Bajaj, TVS, Ather and Hero MotoCorp have all broadened their line-ups with products aimed at mainstream and budget-conscious buyers. Ola, by contrast, remains heavily dependent on variations of its S1 scooter platform. The company still lacks the range of form factors offered by competitors.

DOWN THE LADDER

Based on provisional Vahan data for August, Ola accounted for about 7 per cent of electric two-wheeler registrations, compared with roughly 27-28 per cent for TVS. Once the market leader, Ola now ranks fifth.

Ola narrowed its losses to ₹1,833 crore in FY26 from ₹2,253 crore in the previous year, while its annual revenue halved to ₹2,253 crore. Free-cash outflow, too, narrowed to ₹1,492 crore from ₹3,367 crore, and the battery-cell business remained a drag, generating only ₹20 crore in revenue while losing ₹319 crore.

Fresh capital can fund Ola's recovery efforts. Whether it translates into a better business will determine if the company is building a comeback or merely extending its runway.

ITAT upholds 'clean slate' principle under IBC

Our Bureau
Mumbai

The Mumbai bench of the Income Tax Appellate Tribunal (ITAT) has dismissed tax disputes against IndusInd General Insurance Company Ltd (formerly Reliance General Insurance Company Ltd).

The decision, given on August 3, upholds the supremacy of the "clean slate" principle under the Insolvency and Bankruptcy Code (IBC), whereby an approved corporate resolution plan permanently extinguishes pre-insolvency tax liabilities of both the bankrupt parent and its integrated subsidiaries. The legal battle arose from cross-appeals by Revenue (Deputy Commissioner of Income Tax) and the assessee (IndusInd General Insurance Company Ltd) spanning Assessment Years 2011-12 to 2018-19 and 2020-21. The root of the dispute dates back to AY 2014-15, when the Assessing Officer disallowed expenditure claimed to have been incurred by the insurer towards payments made to motor vehicle dealers.

The Corporate Insolvency Resolution Process initiated against the holding company culminated in the approval of a Resolution Plan submitted by IndusInd International Holdings Ltd by the NCLT Mumbai Bench in February 2024. The advocates of the assessee argued that under Clause 9.1.8 of the Resolution Plan, all pending tax proceedings and liabilities concerning RCL's subsidiaries relating to the pre-approval period were extinguished and dismissed.

QUICKLY.

FM discusses ties with IMF Deputy MD Clarke

New Delhi: Finance Minister Nirmala Sitharaman on Monday met IMF Deputy Managing Director Nigel Clarke and discussed bilateral engagement as well as the outlook for the Indian and global economies. During the meeting, Sitharaman and Clarke discussed India-IMF relations and appreciated India's role in supporting the South Asia Regional Training and Technical Assistance Center (SARTTAC). Both sides emphasised the importance of continued India-IMF engagement in strengthening macroeconomic cooperation, supporting sound policies and contributing to greater regional and global economic resilience. They also discussed India's evolving growth trajectory and the implications of ongoing shifts in the global economic environment, including India's trade agenda and developments in the global trading system. PTI

India may link further FDI easing for China to progress on LAC disputes

KEY BARGAIN. Ahead of Xi-Modi meet, sources hint that investment access for Chinese cos may hinge on border progress

Amiti Sen
New Delhi

India may link any further easing of investment rules for Chinese investors to a satisfactory resolution of at least some concerns related to the long-pending border disputes that are under active discussion by the two sides, sources said.

Chinese President Xi Jinping's proposed bilateral meeting with Prime Minister Narendra Modi this weekend, on the sidelines of the BRICS Summit in New Delhi, could prove crucial in determining the pace of economic engagement between the two countries, particularly on trade and investment, depending on the stance he adopts on the border issues, a source close to the development told *businessline*.

"The Ministries of Home Affairs and Defence would want at least part of the border dispute to move towards satisfactory resolution before economic concessions, especially those on investments, are made.

"This is being clearly conveyed to the Chinese side," a source said.

ALL SET. The 18th BRICS Summit is scheduled to be held in New Delhi on September 12 and 13 REUTERS

8-POINT CONSENSUS

The 25th round of special representatives talks between National Security Adviser Ajit Doval and Chinese Foreign Minister Wang Yi in Beijing on August 25, 2026, produced an eight-point consensus to stabilise the LAC, covering military communication, revival of border trade and the Kailash-Mansarovar pilgrimage and trans-border river data-sharing. Both sides also agreed to pursue an "early and substantial harvest", shifting from India's earlier insistence on a single final package to a sector-wise approach on boundary delimitation and border management.

Yet China continues to reject India's territorial claims and refers to Arunachal Pradesh as "Zangnan" and claims part of the State as its own.

"India wants to ensure that the early and substantial harvest deal on the border covers its main concerns around territorial integrity," the source said.

TEAM TO VISIT BEIJING

A high-level Indian delegation had been expected to visit Beijing ahead of Xi's visit to take forward discussions on trade and investment issues but talks may have been pushed back as both sides wait for clarity from the leadership talks, an industry source noted.

Beijing is keen for India to further ease restrictions on Chinese investments as companies across sectors, such as electronics, EVs, solar, batteries, and industrial equipment, are keen to increase their footprint in the country.

Following the 2020 India-China border clashes, new rules required government approval for investments from countries sharing a land border with India, making Chinese investments subject to stringent scrutiny and effectively choking off new Chinese FDI.

In March 2026, India eased the rules a bit, allowing non-controlling investments of up to 10 per cent from land-bordering countries through the automatic route, subject to sectoral caps.

It also introduced a 60-day approval timeline for investments in specified sectors, including electronics, capital goods and solar cells, while retaining security scrutiny.

"Beijing wants a broader reopening to Chinese investments which could happen if there is some concrete movement on the border issue," the source said.

WOMEN POWER

FISCAL FORCE. Finance Minister Nirmala Sitharaman on Monday chaired a meeting in New Delhi with senior officials of the Department of Economic Affairs to review key outcomes of the BRICS Finance Track and prepare for the final BRICS Finance Ministers and Central Bank Governors meeting in Mumbai during September 9-10, ahead of the Leaders' Summit ANI

VRRR auctions: Banks prefer deploying funds overnight to 30 days

Our Bureau
Mumbai

The two variable rate reverse repo (VRRR) auctions conducted by the Reserve Bank of India on Monday to absorb rising surplus liquidity from the banking system attracted more deployment interest from banks in one-day tenor than 30-day tenor.

This is a clear indication that banks want to keep the powder dry in the run-up to the quarter end. Should loan demand arise, they can quickly channelise funds deployed at the overnight VRRR auction.

The liquidity surplus is on account of fresh 3-5-year foreign currency non-resident (bank)/FCNR (B) deposits mobilised by banks under the RBI's concessional swap facility, which was open for 85-days from June 8 to August 31, 2026.

LIQUIDITY SURPLUS

Since August-end, excess liquidity in the banking system has swelled by ₹4,50,658.16 crore to ₹11,16,006.50 crore as on September 6. At the first VRRR auction of 30-day tenor to absorb ₹7 lakh crore from banks on Monday, the RBI received and accepted funds deployment offers aggregating ₹2,59,276 crore at a weighted average rate (WAR) of 5.24 per cent.

At the second VRRR auction of one-day tenor to drain out ₹5 lakh crore from banks, the RBI received and accepted funds deployment offers aggregating ₹3,53,390 crore at a WAR of 5.24 per cent.

K Arvind, Head-Treasury, Tamilnad Mercantile Bank, observed that banks don't want to lock up funds in longer tenor VRRR auctions and miss out on loan deployment opportunities, should they arise in the interim, which fetch higher interest rates. So, they are more inclined to deploy funds in short-tenor VRRR auctions.

Bankers expect system liquidity surplus to swell to about ₹12 lakh crore by September 11, the last day for banks to swap the proceeds of the fresh FCNR (B) they raised between June 8 and August 31 with RBI.

Coal India's daily production rises 35%, power sector supplies up as rains recede

Our Bureau
Kolkata

With rainfall receding across its mining regions, behemoth Coal India's daily coal production witnessed a sharp 35 per cent increase, translating into higher dispatches, with the power sector witnessing a clear pick-up in coal supplies.

Coal India's average daily coal production rose to around 1.83 million tonnes (mt) on September 6 from around 1.36 million tonnes during the first three rain-affected days this month.

The improvement came as mining conditions steadily recovered and affected transportation routes and working areas were restored. The rise in production was led by CIL's subsidiaries. During the same period, average daily production increased around 61 per cent from 0.18 mt to 0.29 mt at Northern Coalfields Ltd (NCL), up by 33 per cent from 0.15 mt to 0.2 mt at South Eastern Coalfields Ltd (SECL), according to a Coal Ministry release on Monday.

"The improvement in production is translating into higher dispatches, with the power sector witnessing a clear pick-up in coal supplies. The average daily dispatch to the power sector increased by 24 per cent from around 1.37 mt during the first three days of September to 1.7 mt as on September 6, the release said, adding during the same period, power-sector dispatch increased by 56 per cent from 0.18 mt to 0.28 mt at NCL, up 23 per cent from 0.30 mt to 0.37 mt at SECL.

Coal India's average daily coal production rose to around 1.83 mt on September 6 from around 1.36 million tonnes

The improvement in production is being backed by a substantial increase in overburden removal (OBR), an important indicator of coal exposure and future production readiness. Average daily OBR doubled from 2.5 million cubic metres during the first three days of September to 5.1 MCM on September 6. OBR rose fourfold at NCL, over three times at SECL during the same period.

"Resources have been reappropriated and remobilised to full deployment strength to accelerate overburden removal and expose additional coal. The lower-horizon coal seams are steadily being brought back into operation through continuous dewatering. Mines that had been operating under geotechnical constraints during the monsoon are now opening up as the mine landscape widens with the return of dry spells," it said.

The Ministry said one significant improvement is the availability of dry working benches and dry raw coal. With reduced moisture and stickiness, the coal acquires better free-flowing characteristics, facilitating smoother handling and conveyance.

ADDITIONAL STEPS

CIL is taking additional measures to strengthen supplies to power plants, particularly critical plants drawing coal through Washery and RCR mode. Coal is being offered beyond the Monthly scheduled Quantity (MSQ) to interested Central and State Gencos and IPPs for road-mode lifting. Lifting of coal against delivery orders issued to critical power plants in road mode is also being prioritised.

The improvement in coal movement is visible across several mining areas. Haul roads and coal transportation routes affected by heavy rainfall are being strengthened on a continuous basis across all mines of CIL. The impact of these measures became evident with the reduction in rainfall from September 3 onwards, the Coal Ministry said.

The Ministry also said that coal loading to the power sector has shown a consistent upward trend over the past four days, rising from 370 rakes on September 3 to 444 rakes on September 6, a net addition of 74 rakes per day, including a single-day improvement of 31 rakes on September 6 alone.

Former RBI Governor calls for incentives to create more SFBs

Our Bureau
Chennai

India needs to do more to strengthen the small finance bank segment, which currently has only around 11 such banks nationally, C Rangarajan, former Governor, Reserve Bank of India, said here on Monday.

"I would appeal to the RBI to look at how to incentivise the setting up of small finance banks," he said, arguing that the existing framework does not provide enough motivation.

Rangarajan was speaking at the formal inauguration of the Equitas' Small Finance Bank's new corporate office Equitas Towers in Chennai.

He held Equitas up as a potential model for other small finance banks, noting that it has exceeded several regulatory requirements.

"I am sure that Equitas Bank will also make an application at the appropriate time. And if a universal bank license is given to them, it is not a bad idea," he added.

He observed that almost all small finance banks ultimately want to become universal banks, and that their performance as SFBs should be an important consideration when they apply for a universal banking licence.

BANKING BOOST. (from left) Anil Kumar Sharma, Chairman, Equitas SFB; Vasudevan PN, Managing Director, Equitas SFB; N Rangachary, former Chairman, Equitas SFB; and C Rangarajan, former RBI Governor, at the inauguration of Equitas Towers in Chennai BIJOY GHOSH

He was also critical of the merger of Regional Rural Banks, saying that RRBs had now been reduced to essentially one per State, diluting their local and regional character.

GROWTH OF EQUITAS

Equitas Bank originally started as a microfinance company. Then, in 2016, it became a small finance bank, and has now completed 10 years as an SFB. It got listed as a public entity in 2020.

Speaking at the inauguration event, Vasudevan PN, Founder & MD of Equitas SFB, said they had come a long way from not being able to find any office space on rent in the initial days to now moving into the multi-storied Equitas Towers.

He specially thanked the Murugappa Group-owned Cholamandalam Finance and its senior executives, where he had started his career and then subsequently left to start Equitas.

ADVANCES UP

Equitas SFB had gross advances of ₹47,641 crore as of June 2026, a growth of 27 per cent y-o-y. Overall deposits grew 10 per cent y-o-y to end at ₹48,976 crore. In the first quarter ended June 2026, the company reported a quarterly PAT of ₹184 crore, compared to a loss of ₹224 crore in Q1FY26.

Bank of Maharashtra, Canara Bank eye dollar debt issuance this month

Reuters
Mumbai

Canara Bank and Bank of Maharashtra are set to raise $500 million each through the sale of US dollar-denominated bonds over the next few days, two merchant bankers said on Monday.

Both the lenders will look to raise funds through a sale of three-year or five-year papers, or a combination of both, under the central bank's concessional swap window, the bankers added.

The bankers requested anonymity as the matter is still private, while neither of the lenders responded to a Reuters request for comment.

Though this would be Bank of Maharashtra's debut issue, this would Canara Bank's second issuance this year, and both the debt sales are expected to be completed in September, bankers said.

VAMA INDUSTRIES LIMITED

Regd. Office: 7-1-24/2/D,1st Floor,Greendale,Ameerpet,Hyderabad-500016,Telangana,India. Email: cs@vamaind.com, CIN: L72200TG1985PLC041126

NOTICE OF THE 41st ANNUAL GENERAL MEETING AND E-VOTING

NOTICE is hereby given that the 41st Annual General Meeting (AGM) of **Vama Industries Limited ("the Company")** is scheduled to be held on Wednesday, September 30, 2026, at 04:00 P.M. through Video Conferencing (VC)/Other Audio Visual Means (OAVM) to transact such items of business as set out in the Notice calling the 41st AGM of the Company.

The Notice of the AGM along with the Annual Report for the financial year 2025-26 was sent to the members of the Company through electronic mode, whose email addresses are registered with the Company/Depository Participants. The meeting shall be conducted without physical presence in accordance with the applicable provisions of the Companies Act, 2013, SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations") and in accordance with General Circular Nos. 14/2020 dated April 8, 2020, 17/2020 dated April 13, 2020, 20/2020 dated May 5, 2020, 10/2022 dated December 28, 2022, 09/2023 dated September 25, 2023, 09/2024 dated September 19, 2024 and 03/2025 dated September 22, 2025 issued by the Ministry of Corporate Affairs read with relevant circulars issued by the Securities and Exchange Board of India ("SEBI"), from time to time in this regard. The AGM Notice and the Annual Report have also been uploaded on our company website, i.e., **www.vamaind.com** on the website of stock exchanges **www.bseindia.com** and on the website of CDSL **www.cdslindia.com.**

Pursuant to the provisions of Section 108 of the Companies Act, 2013, read with Rule 20 of the Companies (Management and Administration) Rules, 2014, as amended and Regulation 44 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations"), and MCA Circulars and SEBI Circulars, the Company is providing e-voting facility to all its members holding shares either in physical or in dematerialized form to cast their vote electronically. The Board has appointed Mr. Vikas Sirohiya, Practising Company Secretary for conduct the e-voting process in accordance with law in a fair and transparent manner. For this purpose, the Company has entered into an agreement with Central Depository Services (India) Limited (CDSL) for facilitating voting through electronic means, as the authorized e-voting agency.

NOTES:

a) All the items of the business are transacted through voting by electronic means only.

b) Members holding shares either in physical form or in dematerialized form, as on the cut-off date i.e., Wednesday 23rd September, 2026, shall only be entitled to cast their vote electronically on the items of business as set out in the Notice, either by remote e-voting or voting during the AGM. The voting rights of the members for e-voting / voting during AGM shall be in proportion to their shareholding in the paid-up equity share capital of the Company as on the said cut-off date.

c) The dispatch / e-mail transmission of Annual Reports has been completed on Monday, 7th September, 2026. Additionally, in accordance with Regulation 36(1)(b) of the Listing Regulations, the Company has initiated sending a letter to members whose e-mail address is not registered with Company/ Depository Participant providing the exact web-link of Company's website from where the Annual Report for financial year 2025-26 can be accessed.

d) The remote e-voting period commences on Sunday, 27th September,2026 (9:00 A.M.) and ends on Tuesday, 29th September, 2026 (5:00 P.M.) (both days inclusive). The remote e-voting module shall be disabled by CDSL thereafter and remote e-voting shall not be allowed beyond the said date and time. Once the vote on a resolution is cast by the shareholder, it cannot be changed subsequently.

e) Any person who becomes a member of the Company after sending the Notice of the AGM by the Company and whose name appears in the Register of Members or Register of beneficial holders as on the cut-off date, i.e., Wednesday, 23rd September, 2026, may view the Notice of AGM on the website of the Company, i.e., www.vamaind.com website of stock exchange- www.bseindia.com or on the website of CDSL - www.cdslindia.com. Such person may obtain the login id and password by sending a request at helpdesk.evoting@cdslindia.com. However, if the person has already registered with CDSL for e-voting, then he/she can cast the vote by using existing User Id and password and by following the procedure as mentioned in the Notice.

f) Those members who will be present in the AGM through VC/OAVM facility and have not cast their vote on the resolutions through remote e-voting and are otherwise not barred from doing so, shall be eligible to vote through the e-voting system during the AGM through VC/OAVM on CDSL e-voting system.

g) Those Members who cast their vote by remote e-voting prior to the AGM may also attend the AGM through VC/OAVM but shall not be entitled to cast their vote again.

h) For detailed instructions pertaining to e-voting, members may please refer to the section 'Instructions for E-VOTING' appended to the Notice of the AGM. Members having any queries or issues regarding e-voting may refer the Frequently Asked Questions (FAQs) and e-voting manual available at www.evotingindia.com, under help section or write an email to helpdesk.evoting@cdslindia.com. All grievances connected with the facility for voting by electronic means may be addressed to Mr. Rakesh Dalvi, AVP, Central Depository Services (India) Limited (CDSL), A Wing, 25th Floor, Marathon Futurex, Mafatlal Mill Compounds, N M Joshi Marg, Lower Parel (East), Mumbai - 400013 or send an email to helpdesk.evoting@cdslindia.com or call 1800 21 09911.

i) Members may contact Mr. Pankaj Dadhich, Company Secretary and Compliance Officer of the Company for any concern connected with e-voting by writing an e-mail to cs@vamaind.com.

NOTICE OF 29TH ANNUAL GENERAL MEETING TO BE HELD THROUGH VIDEO CONFERENCING/OAVM. E-VOTING

Notice is hereby given that the 29th Annual General Meeting (AGM) of KLM AXIVA FINVEST LIMITED will be held on Wednesday, September 30, 2026 at 02.00 P.M. (IST), through video conference/other audio-visual means in compliance with all applicable laws and General circulars Issued by the Ministry of Corporate Affairs ('MCA'), Government of India and Securities and Exchange Board of India ('SEBI') to transact the businesses that is mentioned in the Notice of the Meeting.

Electronic copies of the Notice of AGM and Annual Report for the financial year ended on 31st March, 2026 have been sent to all the members whose email IDs are registered with the Company/ Depository participant(s). The same is also available on website of the Company. Members are requested to note that the physical copies of the aforesaid documents will not be made available to them by the Company. The dispatch of Notice and Annual Report of 29th AGM has been completed on September 04, 2026.

In compliance with Regulation 44 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and Section 108 of the Companies Act, 2013, read with Rule 20 of the Companies (Management and Administration) Rules, 2014, the Company is providing its members, facilities for remote e-voting to cast votes on all resolutions set out in the Notice of the AGM. Members holding shares either in physical form or dematerialised form, as on the cut-off date of Friday, September 18, 2026 may cast their vote electronically on the businesses set forth in the Notice of 29th AGM through the electronic voting system, from a place other than the place of venue of the AGM (remote e-voting) and detailed procedure is provided in the Notice of AGM.

Members holding shares in dematerialized mode are requested to register their email addresses and mobile numbers with their relevant depositories through their depositary participants. Members holding shares in physical mode are requested to furnish their email addresses and mobile numbers with the Company's Registrar and Share Transfer Agent M/s. KFin Technologies Limited (herein referred as 'RTA').
All the members are informed that:

I. The businesses as set forth in the Notice of 29th AGM may be transacted through e-voting
II. The remote e-voting shall commence on Sunday, September 27, 2026 at 09:00 A.M. (IST)
III. The remote e-voting shall end on Tuesday, September 29, 2026 at 05:00 P.M. (IST)
IV. The cut-off date for determining the eligibility for e-voting is Friday, September 18, 2026. Any person, who acquires shares of the company and becomes member of the company after the dispatch of Notice and holding shares as of the cut-off date may obtain login ID and password by sending an email to compliance.corp@kfintech.com. However, if a person is already registered with for remote e-voting, then existing user ID and password can be used for casting vote.
V. Members holding shares in physical form who have not registered their mail addresses with the Company/Depositories may obtain the log in and password for E-voting providing the below necessary details:
   i) For Physical Shareholders-Please provide necessary details like Folio No., Name of the shareholder, scanned copy of the share certificate (front and back), PAN (self-attested scanned copy of PAN card), AADHAR (self-attested scanned copy of AADHAR card) by email to Company at secretarial@klmaxiva.com or to Registrar & Share Transfer Agent at compliance.corp@kfintech.com.
   ii) For Demat Shareholders-Please provide Demat account details (CDSL-16-digit beneficiary ID or NSDL-16-digit DPID +CLID), Name,Client master or copy of consolidated Account statement, PAN (Self attested scanned copy of PAN card), AADHAR (self-attested scanned copy of AADHAR card) by email to Company at secretarial@klmaxiva.com or with your respective Depository Participant (DP).
   In case of any queries, you may refer the Frequently Asked Questions (FAQs) for Shareholders and e-voting user manual for Shareholders available at the download section of www.evoting.nsdl.com or call on: 022-4886 7000 or send a request to evoting@nsdl.com.
VI. Members eligible to vote may note that:
   a) The remote e-voting module shall be disabled after 5.00 p.m. on Tuesday, September 29, 2026 at 05:00 P.M. (IST) and once the vote on a resolution is cast by the member, the member shall not be allowed to change it subsequently;
   b) The members who have cast their votes by remote e-voting prior to the AGM may also attend the AGM but shall not be entitled to cast their voted again; and
   c) A person whose name is recorded in the register of members or in the register of beneficial owners maintained by the depositories as on the cut-off date only shall be entitled to avail the facility of remote e-voting.
   d) If a member cast votes by both modes, then voting done through e-voting shall prevail and e-voting during the AGM shall be treated as invalid.
VII. CS. Nikhil George Pinto, Practicing Company Secretary, Partner, CaesarPintoJohn & Associates LLP, Company Secretaries, Kochi has been appointed as Scrutinizer for conducting the e-voting process in a fair and transparent manner.
VIII. The results of e-voting will be announced by the Company on its website https://klmaxiva.com/ .and also to stock exchanges at www.bseindia.in.

Fluid situation

FCNR-induced liquidity surplus needs deft management

The measures taken by the Reserve Bank of India to support the rupee in June this year have been a resounding success. But the copious inflows flooding the banking system will bring its own set of challenges for the central bank. While there are multiple options to manage these flows, the RBI must arrive at the right mix.

Around $127 billion has been received since June 8, through the forex swap facilities offered by the RBI to banks for garnering FCNR (B) deposits. Another $8 billion has come in through swaps offered on external commercial borrowings and overseas foreign currency borrowings. These inflows have certainly helped in bolstering forex reserves and providing some stability to the rupee. But the sudden spurt in FCNR (B) deposits in the last fortnight of August, after RBI announced early closure of the concessional swap scheme, has pushed banking system liquidity above ₹10 lakh crore. Since the RBI had earlier exempted the deposits under this facility from CRR (cash reserve ratio) and SLR (statutory liquidity ratios) requirements, the funds received are directly entering the banking system.

This is impacting interest rates, with the overnight weighted average call rate moving below the repo rate and the rates on certificates of deposits moving more than 100 basis points lower over the past month. Lower interest rates are far from desirable at this juncture when the RBI is projecting the CPI for the third quarter of FY27 at 5.9 per cent. Inflation is also likely to be stoked by higher credit growth — already at 19.3 per cent — as banks seek to deploy the surplus funds at their disposal. RBI's forex market interventions, and advance tax and GST payments can reduce the surplus a little, but not enough to remove the liquidity overhang. Variable reverse repo rate auctions will have to be the first line of defense to manage short-term liquidity and align the overnight rate with the repo rate. These auctions can be combined with a hike in CRR to remove a large chunk of durable liquidity from the system.

While this would mean the central bank reversing last year's 100 basis points cut in CRR, this appears to be the least disruptive option. The CRR increase must, however, be linked to the increase in net demand and time deposits recorded from June 8 this year. Since just a few banks have garnered most of the FCNR (B) deposits, this will ensure that smaller banks, which did not reap the benefit of RBI's dispensation, are not hurt. Open market operations can also be done to sell government securities at the shorter end of the curve, so that the 10-year G-sec rates are not unduly disturbed. The market stabilisation scheme, under which the liquidity absorbed by using government securities is kept in a separate account and not transferred directly, is a more complicated option. RBI can also consider setting aside part of the surplus in a reserve which can be used during repayment of these NRI deposits. This can avert disruptive effects when these deposits mature.

Can data centres justify resources they consume?

COST EQUATION. States while luring investments must undertake a cost-benefit exercise given the huge water, power requirements of these centres

GETTY IMAGES

AJAI CHOWDHRY

Global tech companies are set to invest nearly $60 billion in AI-driven data centres over the next few years, with States competing aggressively through subsidised land, power, water, fiscal incentives and faster approvals. Uttar Pradesh's new Data Centre Policy targets over ₹2 lakh crore in investments, while Andhra Pradesh and Telangana are emerging as strong challengers to established hubs.

By 2030, Maharashtra is expected to remain the largest market with 4,376 MW of capacity, followed by Andhra Pradesh (2,753 MW) and Telangana (1,926 MW). The Centre has proposed a tax holiday till 2047 for eligible foreign cloud companies using Indian data centres to serve overseas customers.

This enthusiasm is understandable. AI will need computing infrastructure. But before we celebrate every new data centre announcement, we must undertake a cost-benefit and risk analysis: what do we eventually gain?

Today, almost every critical component inside an AI data centre — GPUs, servers, networking equipment, storage systems and cooling infrastructure — is imported. The intellectual property belongs to global companies. India provides the land, electricity, data, water and incentives, while much of the value creation happens elsewhere.

JOB CREATION

Unlike factories or IT campuses, data centres are not large job creators. Construction generates employment for civil works, electrical installation and engineering, but once operational these facilities are highly automated. They require relatively small teams to manage servers, cooling systems, security and maintenance. We therefore create some construction activity, a few permanent jobs and while the high-value addition remains overseas.

Is this the right model fit for a country with India's unique demographic and economic needs?

India is attractive because it offers abundant land, competitive construction costs, renewable energy potential and a rapidly growing AI market. But if our critical digital infrastructure increasingly runs on AWS, Google Cloud or Azure, our hospitals, banks, government platforms and AI applications also become dependent on foreign technology platforms and their commercial decisions. There is another issue that deserves greater attention. AI data centres are resource intensive. A gigawatt-scale facility can consume as much electricity as a mid-sized Indian city, besides requiring substantial water for cooling.

Today, almost every critical component inside an AI data centre — GPUs, servers, networking equipment, storage systems and cooling infrastructure — is imported

When States commit renewable power and scarce water resources to these projects, we must ask whether the broader economic returns justify the public investment. The Ministry of Power estimates that AI data centres could add 26.3 GW of electricity load by 2031-32, equivalent to nearly 7 per cent of India's entire projected peak demand. A country still working to guarantee reliable power to every home and factory is simultaneously being set to power the world's AI ambitions. We need to look at the big picture holistically. What we need is a due consideration on the physical constraints of compute coupled with the implications.

SOCIAL IMPACT

Every major AI data centre should be assessed not only for its financial investment but also for its environmental and social impact. Electricity demand, water availability, cooling technologies, land use, biodiversity and waste generation should all be evaluated before incentives are granted. Equally important is understanding who bears the costs and who receives the benefits. A project may consume only a small share of a State's water resources, yet place enormous pressure on a local watershed shared by farmers, households and industry.

More importantly, India must ensure that these investments create domestic capabilities.

Data centres should not become another industry where India supplies the land and electricity while the value chain remains offshore. Companies benefiting from subsidised land, power and tax incentives should also be required to create local value. States should negotiate that 30-40 per cent of equipment be sourced from Indian manufacturers, similar to local content requirements in defence and telecom which would help build domestic capabilities in servers, power systems, networking equipment, cooling technologies and electronics.

Alternatively an offset model could be an option. We must define the environmental and social guardrails — and the trade-offs we are prepared to accept.

Finally, we should recognise that computing itself is evolving rapidly. Today's hyperscale AI data centres may not remain the dominant architecture forever. Quantum computing, edge AI and quantum-classical hybrid systems could dramatically reduce future computing, power and cooling requirements. India should therefore invest not only in data centres, but also in the hardware, software, semiconductors and products that will power the next generation of computing.

All about ISRO's latest EOS-05 Satellite

The EOS-05 will capture detailed visual data of the earth's surface on a real-time basis

bl.explainer

Rohan Das

On September 4, 2026, ISRO's Geosynchronous Satellite Launch Vehicle (GSLV) lifted off from the Satish Dhawan Space Centre in Sriharikota for the nineteenth time. The mission, called GSLV F-17- EOS-5, was special as the launch vehicle carried with it India's first imaging satellite in the GEO orbit — EOS-05. But what is special about this satellite and how will it benefit the country?

What is the EOS-05 satellite?

EOS (Earth Observation Satellite)-05 is a dedicated imaging satellite made in-house by ISRO. Unlike other communication, navigation or multi-purpose satellites, the EOS-05 is intended to capture detailed visual data of the earth's surface and contains specialised high-performance cameras and sensors. The data transmitted from such satellites can have applications like monitoring crops, forecasting weather, safely assessing the impact of natural disasters like floods or wildfires and keeping a watch on borders and other critical security areas.

Does India have other imaging satellites?

Yes. India has launched multiple dedicated families of imaging satellites like the IRS (Indian Remote Sensing) series, RISAT (Radar Imaging Satellite) for weather monitoring, and the CARSAT series for cartographic mapping of geography and terrain.

What then makes the EOS-05 special?

While the earlier families of ISRO's imaging satellites operated in low altitude orbits like the Sun Synchronous Polar Orbit (SSPO), EOS-05 will be India's first imaging satellite in the Geosynchronous Earth Orbit (GEO).

A satellite that operates in the GEO reaches a 'sweet spot' where it revolves around its orbit at roughly the same speed as the earth rotates. For an observer from the earth's surface, the satellite will appear to stay stationary.

This means that, unlike other imaging satellites stationed at lower orbits that capture multiple snapshots of a place as it moves along its orbit, the EOS-05 will provide a continuous, near real-time view of the region.

When can such continuous real time views be beneficial?

The most important application of EOS-05 comes within strategic and national security use cases. Since they can constantly monitor a particular location, they can be used to observe sensitive areas like borders or conflict zones.

For instance, the EOS-05 can track and identify changes, including the movement or concentration of vehicles

LIFT-OFF. GSLV-F17/EOS-05 mission's launch on Friday (file pic) ANI

or the construction of bunkers or roads. They can continuously survey key military infrastructure or strategically important facilities like ports or nuclear sites in real time, rather than a lower earth orbit having to pass over these areas repeatedly. For this reason, the EOS-05 has been dubbed the 'eye-in-the-sky' — a testament to its uninterrupted monitoring capacity.

Can EOS-05 be helpful in other non-security use cases?

ISRO Chairman V Narayanan had said in a presser post the GSLV F17 mission that beyond just security and strategic imaging, the EOS-05 satellite is also capable of assisting with weather forecasting, cyclone and storm tracking, disaster management, agriculture, and environmental monitoring.

Which other countries or space agencies operate such satellites in GEO?

Multiple other countries operate GEO imaging satellites. Gaofen-4, launched on December 28, 2015, was China's first earth observation satellite injected into the geosynchronous orbit. The US operates multiple satellites in the GEO under its National Oceanic and Atmospheric Administration (NOAA), with the final satellite in the series, GOES-19, launched in 2024.

While these satellites have the same continual imaging capabilities of EOS-05, they operate with environmental monitoring or disaster response as the key objective, while ISRO has explicitly mentioned that EOS-05 prioritises strategic imaging.

Private organisations like Intelsat, Viasat, SES and Astranis Space Technologies, among others, also operate GEO satellites, but these are communication focused and not for imaging.

Where is EOS-05 now and when will it be operational?

After the GSLV injected it into the Geosynchronous Transfer Orbit (GTO) last week, the satellite has completed multiple orbital manoeuvres using its in-built propulsion systems to reach higher altitudes.

It is expected to reach the GEO and become operational 4-5 days after the launch.

Funds deployment

This refers to 'FCNR (B) deluge softens CD rates; large banks stay away' (September 7). Due to the substantial inflow of foreign exchange, banks are flooded with liquidity, and it has urged banks to curtail their inclination towards costly Certificates of Deposit. This will reduce the pressure on their net interest margins. However, it is an opportunity for small banks to mobilise CDs at prevailing lower rates to meet their liquidity requirements. The surplus liquidity in the banking system needs to be channelised to manufacturing, power generation, agriculture, infrastructure, exports, MSMES, and microfinance segments of the economy to augment the generation of jobs and also to maintain the dynamism in the economy. Given the surplus liquidity available with banks, the RBI must look to implement guidelines for enhancing the supply of credit rather than executing other ways to suck the liquidity.

Food safety norms

With reference to the article 'Why does India's food safety system need a Clint Eastwood' (September 7), India's food safety journey evolved from a narrow focus on adulteration in a more science-based framework led by FSSAI. However gaps in research communication, legacy regulations remain.
By 2020 India's food safety standard had largely matched those of advanced nations. FSSAI defined maximum residue limits, additive levels and drug residue norms. Scientific messages should be simplified for public and misleading labels those of MSG must be revised. India's progress in food safety is commendable but incomplete. Scientific evidence, not fear or outdated norms must guide regulations.

Palayamkottai (TN)

Bonds impact

The sharp, historical reduction in the 10-year Treasury (Govt) Bond spreads between US and India does impact India's macroeconomic sensitivity as hedging costs and global risk appetite for Indian securities undergo consequential changes. Implications would embrace areas such as Forex Reserve Buffers, FPI outflows, constrained elbow room for RBI in terms of effecting rate cuts, assessments by overseas analysts with reference to desirability of increased FDI for foreign investors.
These in a nutshell represent short- to medium-term implications.

Angara Venkata Girija Kumar
Chennai

Candidates' credibility

With reference to the article 'Party appeal vs candidate risk' (September 7), it rightly points out that a popular party or leader cannot compensate for every weak candidate. Voters often support a party for its broader policies, but the quality and conduct of individual candidates still matter. Political parties should therefore give greater importance to local credibility, public service and clean records while selecting candidates. They should also explain the reasons for choosing candidates who face serious allegations.
Voters, for their part, must examine the person contesting from their constituency rather than relying entirely on party loyalty. Better candidate selection and more informed voting would strengthen representative democracy. The responsibility rests with both parties and the electorate.

Data centre expansion

With strong clean energy infra, TN is the place to be

Ravichandran Purushothaman

A few months ago, I stood on a windswept plot near Tirunelveli, watching turbine blades turn against a clear southern sky, and found myself doing an odd calculation in my head: this one stretch of Tamil Nadu's wind corridor could power a mid-sized AI campus round the clock, and nobody outside the State's industrial circles seemed to have noticed. That gap — between what the south has quietly built and what the rest of India assumes lives only in Mumbai and Bengaluru — is, I'd argue, the most underpriced opportunity in Indian infrastructure today.

India generates nearly a fifth of the world's digital data but holds barely 3 per cent of global data centre capacity. Capacity is doubling every three years, crossing 1.8 GW now and headed for 6.5 GW by 2030. Every CEO I know in this space is chasing the same three cities. I think that's a mistake.

LEADER. Tamil Nadu has been India's wind capital for decades

CHENNAI AND BEYOND

Chennai already commands 21 per cent of India's data centre capacity, riding subsea cable landings like the India-Asia-Xpress, which brings in over 200 Tbps. That's the headline everyone quotes. What gets missed is what sits behind Chennai — a 600-kilometre industrial spine running through Coimbatore, Madurai, Tiruchirapalli and Tirunelveli, with power, land and skilled labour already in place, waiting for someone to connect the dots.

I've sat across the table from State industrial officials in SIPCOT parks who can turn around power connections and land approvals in weeks, not the quarters it takes elsewhere.

Here's the part that should matter most to any CFO signing off on a campus: AI-density racks running 30-50 kW need serious, reliable, round-the-clock renewable power, not diesel gensets propping up a green PPA on paper. Tamil Nadu has been India's wind capital for over three decades — Tirunelveli, Tuticorin, and Kanyakumari sit in one of the country's strongest wind belts, paired with abundant solar in the interior districts. Layer in battery storage, and the southern corridor can credibly hit the 80 per cent-plus renewable run rate that separates a defensible green data centre from a greenwashed one. Compare that to retrofitting renewable infrastructure around an already-saturated Mumbai grid. One is building sustainability in from day one; the other is bolting it on. I know which balance sheet I'd rather defend to an ESG committee five years from now.

If I were allocating capital today, I wouldn't chase another hyperscale campus in Mumbai's crowded corridor. I'd back a distributed southern network: a Tier-4 anchor facility near Chennai for hyperscaler workloads, 10-20 MW edge nodes in Coimbatore and Madurai serving 5G and local enterprise demand, and — this is the part most operators skip — co-located wind and solar assets in Tirunelveli and Tuticorin feeding it all directly, with L&T-grade EPC execution and a genuine circular-construction discipline: green steel, low-carbon concrete, water-positive design from the first drawing.

Players like AdaniConneX, Yotta and STT GDC already understand the north-south imbalance. The ones who move first into Tamil Nadu's southern districts, rather than fighting for the last available acre in Mumbai, will own the cost curve for the next decade.

By 2030, this sector will have absorbed $80-100 billion in capital and created over 100,000 direct engineering jobs, with another 300,000 indirect roles across construction and manufacturing. Someone will anchor the 10-12 GW of new renewable capacity that all this compute demands. I'd rather that anchor sit in Tirunelveli's wind belt than in a congested coastal grid running on borrowed margin.

Data centres are no longer a niche real estate play — they're becoming India's next core utility. The operators who win won't just be the fastest to build. They'll be the ones who read the map correctly, and Tamil Nadu's southern districts are, I think, the most under-read line on it.

SHASHI SHEKHAR KASHYAP

BRICS and its economic contradictions

ASYMMETRIES. The bloc lacks the mechanisms to tackle the currency, trade and inflation spillovers members impose on one another

The 2026 BRICS summit is all set to take place in New Delhi from September 11 to 13. BRICS has expanded its membership and now represents a larger share of the global economy in PPP (purchasing power parity) terms than the G7. Member-countries describe the bloc as a forum for multipolarity and shared prosperity. However, despite the carefully managed proclamations, something odd is going on. Intentionally or otherwise, BRICS countries are causing inflation, losses of export revenues, and growth stagnation to their partners. It would unfair though, to not mention what the BRICS has built. For instance, its $100-billion Contingent Reserve Arrangement (CRA), established in 2014, provides balance-of-payments support during financial stress. But the CRA does not monitor or coordinate the currency, commodity and inflation spillovers members impose on one another. BRICS therefore has crisis-response tools but no comparable surveillance mechanism.

Nearly two decades on, BRICS has no common mechanism for members to flag or discuss economic damage arising from another member's policies. So, it has ended up as an 'economic family' without the 'family spirit' needed for solidarity. The consequences of this institutional gap are already visible in how members' domestic economic decisions spill across BRICS borders.

One example is China's management of the yuan to support exports. The yuan has weakened repeatedly during periods of economic stress, including during the 2018-19 US-China trade war. Such depreciation affects Indian and Brazilian manufacturers competing in the same markets. By contrast, the European Union has institutional forums through which cross-border monetary effects can at least be acknowledged and debated; BRICS has no equivalent mechanism. While a currency devaluation transmits cost shocks through exchange rates, commodity overlap transmits them directly through the global price of identical goods. Among the members of BRICS+, several major exporters compete in overlapping markets. This creates structural conflicts of interest among members in their export strategies, as illustrated in the Table.

This contradiction became evident when Saudi Arabia and the UAE joined BRICS in 2024, making the group home to three major oil producers. The discounted oil offered by Russia since 2022 is illustrative of how one member can defend market share at the cost of another. This spillover can also work in the other direction via imports between members. India imports up to $132 billion of goods a year from China, which is a major channel for the Chinese cost pressures to enter the Indian economy.

Rising production costs in China, whether due to wages, energy or supply disruptions, can increase costs for Indian importers, which can trickle down to domestic prices. But BRICS has not measured nor addressed these externalities of inflation. These asymmetries are not unique to China, but occur wherever a member of the BRICs has a significant economic size imbalance and trade dependence. These coordination gaps are more significant when considering the efforts to increase trade and settlement in members' national currencies.

BRICS+ major commodity exports and competition matrix

Country	Primary exports	Members	Conflict risk
Russia	Oil, gas, wheat, metals	Saudi Arabia, UAE, Brazil	High
Saudi Arabia	Crude oil, petrochemicals	Russia, UAE, Iran	High
Brazil	Iron ore, soybeans, sugar	South Africa, Russia	Medium
South Africa	Platinum, gold, coal	Russia, Brazil	Medium
China	Manufactured goods, rare earths	India (manufacturing)	Medium
India	Pharmaceuticals, textiles, IT	China (manufacturing)	Emerging

THE DE-DOLLARISATION PARADOX

De-dollarisation is sometimes described as a route to financial freedom. However, it can also give rise to new financial fragilities, unless robust institutions are in place. Despite the distortions associated with dollar dominance, deep dollar markets have historically reduced some of the exchange-rate frictions involved in international trade. Greater use of national currencies, however, exposes trade to thinner bilateral currency markets. Currency pairs characterised by low trading volumes, limited liquidity, and wide bid-ask spreads, such as rupee/rouble, tend to experience greater exchange-rate volatility.

BRICS was not meant to be an economic union at all but to be a sovereign driven diplomatic bloc that aims to seek a more multipolar world

In the absence of deep and liquid foreign-exchange markets, economic shocks are more likely to generate sharp currency fluctuations, increasing uncertainty for traders and investors. As a result, inflationary and other macroeconomic shocks originating in one member economy can be transmitted more unevenly and with greater intensity to its trading partners. The argument, therefore, is not against local-currency trade; it is against pursuing de-dollarisation without the monetary coordination needed to manage its spillovers. The dollar meanwhile still accounts for roughly 47-49 per cent of SWIFT-processed payments, illustrating the scale that alternative settlement systems must still match.

Economic spillovers are not unique to BRICS; inflation, exchange rates, commodity prices and monetary policies inevitably cross borders. The real difference is that successful economic groupings eventually built institutions to manage them. The EU developed monetary coordination, while ASEAN+3 created mechanisms for macroeconomic surveillance and dialogue. BRICS was not meant to be an economic union at all but to be a sovereign driven diplomatic bloc that aims to seek a more multipolar world. That was a design which allowed for political cooperation without any deep economic coordination. This creates increasing economic interdependence, but no institutions to control costs.

But the solution to these problems does not merely involve the creation of a BRICS central bank, a common currency, or even any diminution of national sovereignty. What it does involve is a realisation that economic interdependence is both a source of opportunity and obligation. ASEAN+3's Economic Review and Policy Dialogue offers a workable model, a macroeconomic surveillance without requiring members to surrender monetary sovereignty. BRICS could attach a comparable function to its existing finance ministers' track. It could begin with a non-binding annual spillover report tracking how members' currency, commodity and trade decisions affect one another. Such consultation and spillover monitoring would help members anticipate and manage the costs they impose on one another. Closing this gap will not come from reducing reliance on Western institutions, but from finally building the coordination machinery.

HLL to sell 51 pc stake in BPO arm to Capgemini
Hindustan Lever Ltd (HLL) said it has entered into an agreement with the Europe-based Capgemini group to sell 51 per cent stake in Unilever India Shared Services Ltd ('Indigo'). Indigo is currently a fully-owned subsidiary of HLL providing BPO, financial shared services, and Sarbanes Oxley compliance services to the Unilever group throughout the world.

Reliance Comm, Nokia tie up for sub-₹2,000 CDMA handset
Finnish mobile handset manufacturer Nokia and Reliance Communications Ltd have joined hands to market the Nokia 1255 mobile handset in India at a price of ₹1,999. This is Nokia's maiden offer of a CDMA handset in the sub ₹2,000 range and is aimed at first time mobile users.

Auto majors line up big investment plans
The Indian auto sector saw a slew of big-ticket announcements on Thursday, including a fresh ₹3,000-crore investment from Maruti Udyog and a $200-million (₹900-crore) investment plan from Honda Siel. Both the auto majors are eyeing the small car market, with Maruti planning a new model and Honda Siel poised to make a debut in the segment.

Iran expects Strait of Hormuz deal with Oman soon

Eltaf Najafizada

Iran said a deal with Oman to manage shipping through the Strait of Hormuz is just days away, a move likely to increase tension over the waterway due to the likelihood that the US will oppose any accord.

The agreement, which the two countries have been negotiating for weeks, is in the final stages and will include details on a temporary safe route through the crucial transit point for energy supplies, Foreign Ministry Spokesman Esmail Baghaei told reporters in Tehran.

Describing it as an "understanding," he said it would be documented with the International Maritime Organization, a United Nations body responsible for shipping globally. "The talks have made very good progress," Baghaei said, adding that he hoped there would not be interference from third parties, which he didn't name.

Oil prices reversed gains on the news, on optimism an Iran-Oman accord will help get more tankers and other commercial vessels through the chokepoint safely. Brent crude traded roughly flat at $96.38 a barrel in mid-morning London, having traded earlier in the day at $97.93.

Iran and Oman have been in talks about a deal aimed at formalising control of the strait, which they both border, and are likely to look to charge service fees. The US, which is blockading Iranian ports to prevent oil exports from the Islamic Republic, wants the waterway to revert to its pre-war status of being free to use.

THE DEAL. Aimed at formalising control of the strait VIA REUTERS

Iran effectively closed the strait after the US and Israel began strikes at the end of February. All talks aimed at resolving the conflict have so far failed, producing an uneasy stalemate featuring occasional rounds of tit-for-tat strikes.

Iran said at the weekend it hit three US-linked ships taking an unauthorized route through the strait in retaliation for American attacks on Iranian tankers. The US military earlier said it struck three Iranian crude tankers, one of which was destroyed, in response to the Islamic Revolutionary Guard Corps targeting two US Navy warships with ballistic missiles.

The war, now into its seventh month, has pushed up oil, fuel and natural gas prices and threatened to stoke global inflation. BLOOMBERG

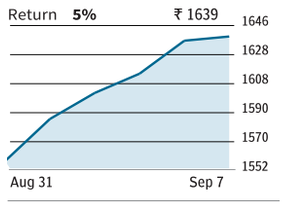
360 One Group CEO buys 1.3 lakh Novartis shares



New Delhi: Karan Bhagat, founder and CEO of 360 One Group, on Monday bought 1.3 lakh shares of Novartis India from his investment firm Kyrush Investments for nearly ₹22 crore through open market transactions. Bhagat is a partner in private investment firm Kyrush Investments. According to the bulk deal data on the BSE, Bhagat purchased 1.3 lakh shares, representing a 0.53 per cent stake in pharmaceutical company Novartis India. The shares were acquired at an average price of ₹1,670.52. Meanwhile, Kyrush Investments sold an equal number of shares at ₹1,670.50 apiece. PTI

G-Sec: SEBI waives group disclosures for FPIs

New Delhi: With an aim to provide greater ease of investment to foreign investors, SEBI on Monday said Foreign Portfolio Investors investing exclusively in Indian government securities no longer need to furnish investor group details. This aims to ease regulatory compliance for FPIs investing only in government securities. The move comes after the RBI on June 5 withdrew the requirement for FPIs investing in government securities through the general route to comply with the prescribed concentration limit. SEBI said the requirement for an FPI investing only in government securities to identify its investor group is no longer relevant and is, therefore, being removed. PTI

Low India VIX signals complacency, markets vulnerable to shocks

DEEP DIVE. Analysts raise flag on unusual combination of subdued volatility index, weakening equity market

Mahesh Ravidas Nayak
Mumbai

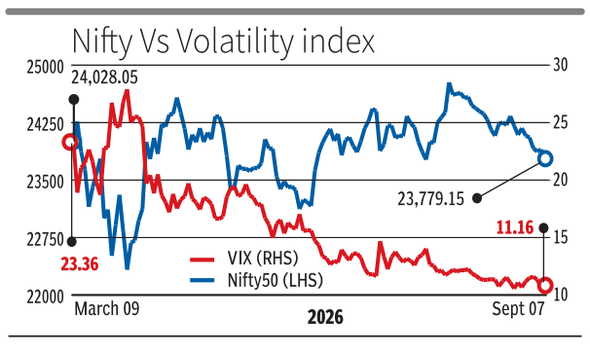
Even as the Nifty remains trapped in a narrow range and global macroeconomic risks continue to build, India VIX, often referred to as the market's fear gauge, is hovering near multi-month lows.

The unusual combination of a subdued volatility index and a weakening equity market is prompting analysts to caution against investor complacency. The India VIX, at around 11, measures the market's expectation of volatility over the next 30 days. Typically, the index moves inversely to the Nifty, rising during periods of uncertainty and declining when investors are comfortable with the prevailing environment. However, recent market behaviour suggests the relationship is not always straightforward.

KEY REASONS

Several factors are weighing on investor sentiment, including elevated crude oil prices, rising Japanese bond yields and concerns that persistent inflation could keep interest rates higher for longer. These developments have contributed to the weakness in equities despite subdued volatility.

"The current phase is a rare multi-decadal trend where both the market and India VIX are moving lower together. Investors are responding to known macro concerns such as high crude oil prices and interest-rate uncertainty rather than an unexpected risk event. VIX rises when outcomes are difficult to assess, but when the market has clarity on the risks, volatility can stay subdued even if equities remain sluggish," said Shrikant Chouhan, Head of Research, Kotak Neo (PCG). He noted that such a pattern is uncommon and resembles phases seen in the early 2000s when markets remained range-bound amid a prolonged but well-understood economic backdrop.



Anand James, Chief Market Strategist at Geojit Investments, believes the low level of VIX itself should be treated as a warning sign rather than a reassurance.

"Academically, a low VIX suggests markets are comfortable with existing conditions. But I am concerned because we are at one extreme. From these levels, volatility has greater room to move higher than lower," he said.

James added that markets may not have fully priced in potential shocks arising from geopolitical tensions, inflation surprises or monetary policy developments.

While a low VIX suggests traders are not anticipating any immediate turbulence, history shows that volatility often spikes abruptly after prolonged periods of calm.

"In the near term, a complacent VIX and lingering macro risks suggest that investors should remain cautious as a low VIX leaves markets vulnerable to sudden shifts in sentiment and momentum," said James.

Crude oil price surges, Fed rate fears drag Nifty lower

Anupama Ghosh
Mumbai

Equities extended their losing streak on Monday, weighed down by a sharp rise in crude oil price amid renewed concerns over the Strait of Hormuz and growing fears of a Federal Reserve rate hike following stronger-than-expected US jobs data. The risk-off mood kept Dalal Street under pressure through the session.

The Nifty 50 settled at 23,779.15, down 118.55 points, while the Sensex fell 382.62 points to 76,132.81. Bank Nifty ended at 57,088.30, down 281.35 points. The Nifty Midcap 100 declined 0.5 per cent, while the Smallcap 100 ended marginally higher by 0.02 per cent, indicating selective buying in the broader market.

"Domestic main benchmark indices and large-cap stocks remain influenced by developments in the Strait of Hormuz... The broader market rally is becoming stretched, leaving Dalal Street increasingly exposed to supply chain disruptions and the risk of weaker high-frequency macroeconomic indicators," said Vinod Nair, Head of Research, Geojit Investments.

Selling was broad-based, with IT and Media emerging as the worst-performing sectors, declining 2.3 per cent and 3 per cent, respectively. Stronger-than-expected US non-farm payrolls data for August, at 162,000 against expectations of around 56,000, raised expectations of a September Fed rate hike, with market-implied odds rising from around 50 per cent to nearly 60 per cent.

PSU Banks, Realty, Metals and Cement also declined over 1 per cent each. Pharma and Auto bucked the trend, with Nifty Pharma gaining 0.4 per cent as investors favoured defensive sectors.

Foreign ownership falls in private banks

Our Bureau
Mumbai

Foreign institutional investors (FIIs) reduced their holdings in several private sector banks in the June quarter, with their stakes in HDFC Bank, Kotak Mahindra Bank and Axis Bank declining sequentially, data for the quarter showed.

FII holding in HDFC Bank fell to 36.26 per cent in June 2026 from 38.16 per cent in March, while the holding in Kotak Mahindra Bank declined to 25.21 per cent from 26.40 per cent. In Axis Bank, FII holding fell to 39.91 per cent from 40.71 per cent, while ICICI Bank saw a smaller decline to 33.79 per cent from 34.49 per cent.

IndusInd Bank was among the private lenders that saw an increase in FII ownership, with the holding rising to 27.81 per cent in June from 27.25 per cent in March. Federal Bank's FII holding increased to 27.43 per cent from 25.79 per cent, while Karnataka Bank saw an increase to 13.1 per cent from 11.79 per cent.

SHARPER DECLINES

The data also showed sharper declines in smaller private-sector lenders. City Union Bank's FII holding fell to 18.65 per cent from 23.37 per cent, while Bandhan Bank's holding declined to 17.72 per cent from 19.82 per cent. AU Small Finance Bank saw FII holding fall to 35.98 per cent from 37.26 per cent.

"Foreign portfolio investors have been continuously selling from India over the past four-five quarters as part of their broader strategy. Banking and financial services is one sector where FIIs have larger stakes, so that has resulted in their shareholding in private sector banks coming down," said Kranthi Bathini, Director-Equity Strategy, WealthMills Securities.

The decline has come amid sustained selling by foreign portfolio investors in Indian equities. Banking and financial services companies, which have traditionally had relatively high foreign institutional ownership, have consequently seen a larger impact from the reduction in overseas exposure.

SME market sizzles with ₹1,220 cr IPOs in Aug

Our Bureau

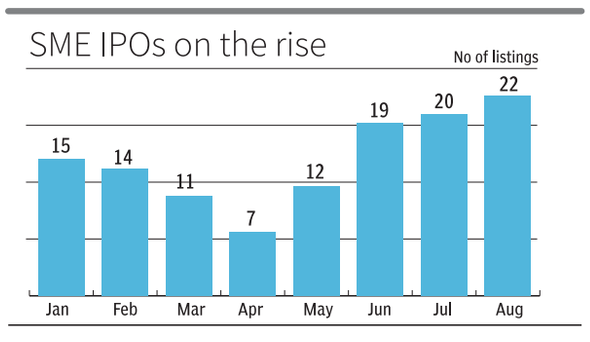
The SME primary market raised ₹1,220 crore through 22 listings in August, marking a 37.5 per cent m-o-m increase in funds raised and the highest fresh capital mobilisation through SME listing platforms in CY26 so far, according to a report by B2K Analytics.



LISTING PERFORMANCE

SME IPO listing performance also remained largely positive in August, with 14 out of 22 IPO listings at premiums, six at discounts, and 2 with no gain or loss. Around 64 per cent of SME IPOs debuted with listing gains, indicating continued investor appetite despite increased fundraising activity and a generally weak secondary market, the report said.

July and August recorded 14 gainers each, suggesting a meaningful improvement in SME IPO listings. However, B2K Analytics said the overall trend remained constructive but selective.

TOP GAINERS

The top five companies — Credent Connect N Care, Technocrats Plasma Systems, Poojaa Precision Engg, LAPL Automotive and Oneindig Technologies — with the strongest listing gains of 25 per cent to 90 per cent retained their gains post-listing.

Poojaa Precision Engg Ltd, one of the largest issues in August, delivered a 56.2 per cent gain on listing day.

Fresh issues accounted for ₹1,113 crore or roughly 91 per cent of total proceeds, indicating fundraising aimed at working capital, capacity additions and debt reduction rather than secondary liquidity.

According to Ritaban Basu, CEO of B2K Analytics, promoters and merchant bankers actively pushed issues through the pipeline to list under existing compliance parameters ahead of tighter entry conditions. He said the transition is resulting in a large number of deals being concentrated in August and is expected to continue in September.

Purple Style Labs makes mundane debut, ends 1% lower at ₹568.55

Our Bureau
Bengaluru

ON THE BACK FOOT. Krishnan Iyer (left), Head-Issuer Relationships, NSE, with Abhishek Agarwal, Founder, Purple Style Labs, at the listing ceremony

Purple Style Labs shares witnessed a weak start on Monday, listing at a discount of nearly 7 per cent at ₹535 against the IPO price of ₹575 on the NSE.

However, the stock managed to recover most of the losses but still ended 1 per cent lower at ₹568.55. On the BSE, it listed at ₹539 and closed at ₹568.05. During the session, it hit a high of ₹589.

According to Ravi Singh, Chief Research Officer, Master Capital Services Ltd, Purple Style Labs' weak listing could keep near-term sentiment under pressure, with fresh investor participation likely to wait for price stability. He said the company's outlook will depend on its ability to sustain growth, improve profitability and generate cash.

IPO SUBSCRIPTION

Earlier, the initial public offering of Purple Style Labs Ltd, the parent company of Pernia's Pop-Up Shop, received 1.29 times subscription, with non-institutional portion remaining undersubscribed at 84 per cent.

The retail investors' portion was subscribed 1.58 times and the QIB portion 1.43 times. The company raised ₹306 crore from anchor investors.

The public offer comprised entirely a fresh issue of ₹680 crore. The company plans to use ₹371.13 crore of the IPO proceeds for investment in its wholly owned subsidiary PSL Retail towards lease liabilities of experience centres and backend offices in India. It will use ₹138.90 crore for sales and marketing expenses, while the remaining proceeds will go towards general corporate purposes.

Promoted by Abhishek Agarwal, Purple Style Labs operates a multi-brand luxury fashion omni-channel platform. Among its celebrity investors include Shah Rukh Khan, Salman Khan and his family, Sachin Tendulkar, Madhuri Dixit and Mahesh Babu.

BROKER'S CALL.

Systematix

APOLLO MICRO (BUY)
Target: ₹570
CMP: ₹403.90
We initiate coverage on Apollo Micro Systems with a Buy rating and a TP of ₹570, based on 55x average FY28E and FY29E EPS. We see a potential structural opportunity for Apollo to evolve from a subsystem and electronics supplier into an integrated weapon systems manufacturer. GoI's keenness to provide complete transfer of technology (ToTs) from DRDO to private players could enable Apollo to secure large, platform-level opportunities, similar to Solar Industries' evolution into manufacturing complete Pinaka systems. Moreover, DAP 2026 promises increased indigenisation content requirement for domestic projects, assured long-term order visibility, increased budgetary allocation in research & development, and greater access to the private sector.
In addition, the company is a major production partner in missile systems (across land, air, and water) and a market leader in underwater homing systems for torpedoes and mines. It is also developing UAVs, anti-tank mines, and expanding its physical infrastructure to enable it to execute and test larger platforms. Apollo hopes to garner ₹12,000 crore worth of orders over the next 24 months from mines, torpedoes and missiles. The integration of IDL and PEL should provide AMS with complete platform capabilities in missiles, in line with GoI's objective of missile integration capability development by private companies. Its significant presence in key programmes like MIGM mines, Pinaka and QRSAM, EHWT & LWT torpedoes provide significant near-term order inflow visibility.

Choice Broking

ESDS SOFTWARE (BUY)
Target: ₹1,550
CMP: ₹1,074.65
We initiate coverage on ESDS Software Solution with a 'Buy' rating and a TP of ₹1,550, valuing the company at 18x FY28E EV/EBITDA, with a DCF used as a sanity check. In our view, ESDS offers one of the most compelling listed opportunities to gain exposure to India's structural cloud, data-centre and AI infrastructure build-out, supported by its full-stack capabilities across cloud, managed infrastructure and data-centre services. Growth is underpinned by capacity expansion, deeper customer monetisation and operating leverage, with the $1.25 billion AI contract adding a significant new leg to the earnings trajectory. We expect Revenue/EBITDA/PAT to grow at 120.9/72.6/81.3 per cent CAGR over FY26–29E, driven by core business momentum and the ramp-up of AI infrastructure revenues. Our 18x FY28E EV/EBITDA valuation implies about 31x FY28E forward P/E, which we believe appropriately reflects ESDS's strong growth profile. Successful execution and faster ramp-up of the AI contract could provide further upside to earnings and valuation. Additional AI/large-cohort wins could accelerate earnings, while broader IT-workload migration by large DC customers to ESDS could deepen wallet share and build recurring revenues.
Key risks: AI deal execution, customer concentration, capex intensity and competition risks could delay earnings ramp-up, pressure utilisation, margin and returns.

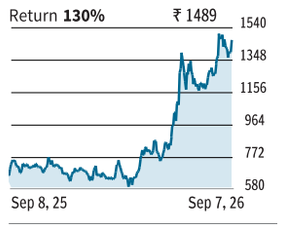
TODAY'S PICK.

Paras Defence & Space (₹1,489.40): BUY

Gurumurthy K
bl. research bureau



The short-term outlook is bullish for Paras Defence & Space Technologies. The stock surged over 5 per cent on Monday when the broader markets were down.

This rise has taken the share price well above the 21-Day Moving Average, currently at ₹1,423. The region between ₹1,425 and ₹1,400 is a good support zone, which could limit the downside. Paras Defence & Space Technologies could rise to ₹1,650 and even ₹1,720 in the coming weeks. Traders can buy Paras Defence & Space Technologies shares now at ₹1,489. Accumulate on dips at ₹1,440. Keep the stop-loss at ₹1,380 initially. Trail the stop-loss up to ₹1,510 as soon as the stock goes up to ₹1,535. Revise the stop-loss higher to ₹1,545 and ₹1,595 when the share price touches ₹1,585 and ₹1,615 respectively. Exit the long positions at ₹1,640.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading

Arnya joins hands with Casagrand for ₹750 crore realty fund

Our Bureau
Chennai

Arnya RealEstates Fund Advisors Pvt Ltd on Monday launched Arnya Real Estate Fund III – Preferred Capital, a Cat-II AIF, with a target corpus of ₹750 crore, in partnership with Casagrand Premier Builder.

The fund will focus on Chennai, Bengaluru and Hyderabad, with investments ranging between ₹75 crore and ₹200 crore across 8-10 projects, designed to provide institutional and sophisticated investors with exposure to real estate developments through a preferred equity investment structure, according to a release from Arnya. The AIF distribute returns to investors before residual distributions accrue to the developer.

Steamhouse IPO opens on Wednesday at ₹77-81

Our Bureau
Mumbai

Steamhouse India (₹414 crore) and Manika Plastech (₹125 crore) will together will raise ₹539 crore through initial public offering (IPO) on the mainboard.

Steamhouse India plans to make a fresh issuance of ₹353 crore and an offer for sale (OFS) of ₹61 crore. The price band has been fixed at ₹77-81 a share. Bids can be made for a minimum of 185 shares. The issue opens for subscription on Wednesday.

The company intends to use net proceeds from the IPO for part-payment of outstanding borrowings, funding capital expenditure, including capacity expansion of the Ankleshwar facility and the Panoli facility, besides setting up a manufacturing facility for generation of steam at the Dahej GIDC and for general corporate purposes.

Equirus Capital was the sole Book Running Lead Manager to the offer.

MANIKA PLASTECH ISSUE ON FRIDAY

Manika Plastech plans to raise ₹125 crore through IPO. It has fixed the price band at ₹40-43 a share.

Bids can be made for a minimum of 348 shares. The issue opens for subscription on Friday.

The offer comprises a fresh share of ₹92 crore and an OFS of 76,74,418 shares.

The company plans to use the fund raise for capital expenditure towards purchase of plant and machinery, repayment of debt and general corporate purposes.

Pantomath Capital Advisors was the book running lead manager to the offer.

udaan acquires Swiggy's Lynk Logistics for ₹500 cr

Mumbai: udaan, India's leading business-to-business e-commerce platform, has acquired Lynk Logistics Ltd, Swiggy's wholly owned retail distribution arm, for ₹500 crore. The deal, announced on Monday, will be settled through preference equity shares issued to Swiggy in Trustroot Internet Private Ltd, udaan's parent entity, giving Swiggy approximately 2.8 per cent stake in udaan. OUR BUREAU

Swiggy unveils 24x7 food complaints helpline

New Delhi: Swiggy said on Monday that it is strengthening customer support, reinforcing its commitment to food safety. The company said it has rolled out a dedicated 24x7 helpline for customers to report food safety-related concerns. In addition, it also introduced a dedicated 'food safety' channel within its in-app's help section as the Food Safety and Standards Authority of India (FSSAI) has been intensifying its crackdown on various food business operators. Mumbai: Tech Mahindra has partnered with PeaceHealth, a faith-based not-for-profit health system in the United States (US), for its long-term digital transformation journey and improve its patient care. Tech Mahindra's US-based healthcare subsidiary, The HCI Group, will modernise and manage the key IT operations of PeaceHealth, including applications, infrastructure, data and security. OUR BUREAU

NBFC loans grew at a faster clip of 15 per cent y-o-y in July

RETAIL BOOST. Gold jewellery and consumer durables loans gather momentum

Our Bureau
Mumbai

Loans extended by non-banking finance companies (NBFCs) grew at a faster clip of 14.9 per cent year-on-year (y-o-y) in July 2026 against 10.6 per cent in July 2025.

Retail loans, such as loans against gold jewellery, consumer durables and housing segments, displayed accelerated credit growth, and loans to agriculture and allied activities recorded robust growth.

However, NBFC loans (credit) to the services and industry sectors slowed y-o-y in the reporting month.

The aforementioned growth numbers are based on the RBI's data on sectoral deployment of credit by the NBFCs. The data are collected from major NBFCs and housing finance companies (HFCs).

GROWTH ENGINE

- Retail loan growth accelerated to 21.4% y-o-y in July from 13.7% a year ago
- Loans against gold jewellery up 68.5% against 43.9%
- Consumer durable loans rose 51.5% against 18.8%
- Housing segment loans increased by 11.9% against 4%

RETAIL LOAN GROWTH

Retail loan growth accelerated to 21.4 per cent y-o-y in July 2026 compared to 13.7 per cent a year ago. Within retail loans, loans against gold jewellery (up 68.5 per cent y-o-y growth in July 2026 against 43.9 per cent y-o-y growth in July 2025), consumer durables (up 51.5 per cent against 18.8 per cent) and housing segments (up 11.9 per cent vs 4 per cent) displayed robust credit growth.

Vehicle loans maintained a steady growth (15.1 per cent vs 15.1 per cent), per an RBI statement.

Loans to agriculture and allied activities gathered momentum, rising 18 per cent y-o-y against 5.4 per cent in July 2025.

SERVICE SECTOR LOAN

Loans to the services sector moderated to 15.2 per cent versus 24.5 per cent in July 2025, with loans to trade and transport operators decelerating to 14.7 per cent (24.3 per cent in July 2025) and 10.7 per cent (11.2 per cent), respectively.

However, loans to the commercial real estate sector were up 22.3 per cent against 10 per cent.

Credit to industry grew 7.4 per cent (y-o-y) in July 2026 when compared to 9.3 per cent in July 2025. Moderation in growth was primarily driven by subdued growth in infrastructure, a major constituent of the segment.

Pixxel raises $100 m led by Temasek, Seraphim

Our Bureau
Bengaluru

Bengaluru-based space-tech company Pixxel has raised $100 million in a Series C funding round co-led by Temasek and Seraphim, making it the largest funding round raised by an Indian space technology company, the company said on Monday.

The round also saw participation from new investors 360 ONE Asset and IMM Investment, along with existing investors, including Radical Ventures and growX ventures. The latest fundraise takes Pixxel's total funding to $195 million.

Founded by Awais Ahmed, Pixxel started with hyperspectral imaging satellites and has since expanded into Earth intelligence software and satellite systems for commercial and sovereign missions. Its portfolio includes Aurora, an Earth intelligence software platform, and its Firefly hyperspectral satellite constellation.

Blackstone weighs stake buy in IIFL Finance

Bloomberg

Blackstone Inc is among global investment firms in the fray to buy a stake in mid-sized NBFC IIFL Finance Ltd, just as Fairfax Financial Holdings Ltd looks to exit from the company, according to people familiar with the matter.

REGULATORY NORMS

Fairfax, founded by Indian-born Canadian billionaire Prem Watsa, is weighing selling its entire holding in IIFL Finance to comply with regulatory guidelines as it inches towards acquiring IDBI Bank Ltd, said the people asking not to be named discussing private matters.

The plans for IIFL Finance are preliminary and could be subject to change, they added.

Blackstone is in talks with Fairfax and other shareholders to acquire the stake in IIFL Finance, the people said. The private equity firm's potential involvement comes at a time when India's financial services industry has become a target for acquisitions.

Last year, the US alternative investment manager invested more than $700 million for a 9.9 per cent stake in Federal Bank.

Fairfax and IIFL Finance did not immediately respond to separate requests for comment. Blackstone declined to respond.

Fairfax held a 15.2 per cent stake in IIFL Finance as of June 30, with the Indian firm having a market value of $2.9 billion.

The stock erased gains of as much as 2.4 per cent to trade 1.2 per cent lower in Mumbai late afternoon on Monday.

IDBI BANK OFFER

Fairfax's move underscores how it is gearing up to acquire a 60.7 per cent stake in IDBI Bank in a sweetened offer that Indian authorities are close to accepting, people have previously said.

17 accused in second chargesheet filed by CBI in Reliance Commercial Finance case

Our Bureau
New Delhi

The Central Bureau of Investigation (CBI) has named 17 accused, including three executives of industrialist Anil Ambani's Reliance ADA Group, in the first supplementary chargesheet filed on Monday in the ₹6,229.54 crore Reliance Commercial Finance Ltd (RCFL) case.

The chargesheet was filed before the special judge for CBI cases in Mumbai.

The three Reliance ADA Group executives accused are Amitabh Jhunjhunwala, Group Managing Director of the Reliance ADA Group; Amit Bapna, CFO, RCL; and Ramesh Shenoy, Company Secretary, Reliance Infrastructure Ltd.

The names of eight companies — Reliance Power Ltd., Big Flicks Pvt Ltd, Reliance Big Entertainment Pvt Ltd, Reliance Communications Ltd, Kunjbihari Developers Pvt Ltd, Reliance Venture Asset Management Pvt Ltd, Reliance Broadcast Network Ltd and Reliance Telecom Ltd — also figure in the chargesheet, as per a statement by the CBI.

Six bank officials associated with Bank of Baroda, Punjab National Bank and Indian Overseas Bank, have also been made accused on charges of colluding with Reliance ADA Group.

CHARGED OFFENCES

The CBI said all of them have been charged with offences of criminal conspiracy, criminal misappropriation, and cheating under the IPC, along with offences under the Prevention of Corruption Act, 1988.

Investigation so far has revealed that funds borrowed by Reliance Commercial Finance Ltd were allegedly diverted to the extent of ₹6,229.54 crore through intermediary and conduit entities to various Reliance ADA Group companies, in violation of the terms and conditions governing such borrowings, the agency stated.

This caused wrongful loss to the lending banks and financial institutions and corresponding wrongful gain to the accused persons and related entities.

The CBI had earlier registered a case based on complaints received from Bank of Maharashtra and other public sector banks of the consortium. The total loss caused to all banks, financial institutions and other lenders is approximately ₹9,280 crore, as per the CBI's estimate.

FIRST CHARGESHEET

The first chargesheet was filed in the case on July 7 this year against seven accused persons. With the filing of the supplementary chargesheet, a total of 24 accused persons, including individuals and companies, have been chargesheeted in the case so far, the CBI stated. Further investigation is on to look into the role of the other accused.

Bandhan Bank launches credit card in 4 variants

Anupama Ghosh
Mumbai

Bandhan Bank on Monday launched its credit card business in partnership with Mastercard by introducing four variants — Sparks, Ignite, Flare and Lumina — targeting customers across income and lifestyle segments.

The cards are tiered by the spending profile. Sparks targets everyday shoppers with rewards on grocery and apparel purchases.

Ignite adds travel benefits and international lounge access. Flare is positioned as a travel-first card with golf privileges and dining perks.

Lumina, the premium tier, offers benefits, including an Oberoi gift voucher, concierge services, airport meet-and-greet and enhanced rewards on international spending.

IISc's FSID targets 300 deep-tech start-ups by 2030, plans AI centre

Aishwarya Kumar
Bengaluru

The Foundation for Science Innovation and Development (FSID) at the Indian Institute of Science (IISc) is targeting 300 deep-tech start-ups by 2030, nearly doubling the 150 firms it currently supports, as it looks to turn more of the institute's research into commercially viable businesses.

Alongside building a larger start-up portfolio, FSID is also giving deep-tech companies enough time, capital and industry access to move from laboratory research to independent businesses.

"We have about 150 start-ups, and the target is 300 by 2030," said CEO Omprakash Subbarao, adding that FSID's focus would remain on value and impact.

That approach is reflected in the organisation's track record. Of the 150-odd start-ups it has supported, only five have exited incubation so far. Subbarao said FSID is not in a hurry to generate exits, arguing that returns should be a byproduct of building companies with long-term value. The five exits have generated returns in the "double-digit crore" range, he said.

The Indian Institute of Science

The organisation expects the pace to pick up as its start-ups mature. Companies that have raised subsequent rounds are increasingly approaching FSID to exit its investment, suggesting that some of its earlier bets are beginning to reach the next stage of their lifecycle.

BIGGEST CONSTRAINT

FSID is also looking to address one of deep tech's biggest constraints: the mismatch between long development cycles and investors' expectations for quick returns. It typically provides start-ups with a base fund of about ₹25 lakh, followed by support in accessing capital and industry connections.

They are also strengthening this capital pipeline as it scales its portfolio while continuing to focus on areas with strategic relevance, including space, healthcare and defence, as well as critical minerals and additive manufacturing. IISc's space ecosystem and longstanding links with the sector are expected to provide a particular advantage.

Subbarao said the organisation is particularly interested in the science of how AI is deployed and whether it actually delivers measurable outcomes.

In collaboration with the Gates Foundation, IISc is developing an AI Deployment Centre of Excellence, which will build evidence-based frameworks, platforms, policies and research to assess the effectiveness of AI applications.

IRDAI imposes ₹1 cr penalty on ICICI Lombard

Our Bureau
Hyderabad

The Insurance Regulatory and Development Authority of India (IRDAI) has imposed a penalty of ₹1 crore on ICICI Lombard General Insurance Company for violations of provisions of the IRDAI (Outsourcing of Activities by Indian Insurers) Regulations, 2017, and the Guidelines on Corporate Governance.

The penalty was imposed after an onsite inspection conducted in September 2019.

The insurer has been directed to place the order before its Board and submit an action taken report within the stipulated period.

"IRDAI remains committed to ensuring robust governance standards, policyholder protection, transparency and accountability across the insurance sector. The authority will continue to take appropriate supervisory and enforcement action wherever regulatory violations are observed," said the regulator.

NOTICE OF THE 19TH ANNUAL GENERAL MEETING AND E-VOTING INFORMATION

NOTICE is hereby given that the 19th Annual General Meeting ("AGM") of the Members of Hariom Pipe Industries Limited ("the Company") is scheduled to be held on Wednesday, September 30, 2026 at 12:30 pm(IST) through Video Conferencing ("VC")/Other Audio-Visual Means ("OAVM") without the physical presence of the Members at a common venue, in compliance with the applicable provisions of the Companies Act, 2013 ("the Act") and the Rules framed thereunder, read with General Circular No. 03/2025 dated September 22, 2025 issued by the Ministry of Corporate Affairs ("MCA Circular") and Circular No. SEBI/HO/CFD/CFD-PoD-2/P/CIR/2024/133 dated October 3, 2024, issued by the Securities and Exchange Board of India ("SEBI Circulars"), to transact the business set out in the Notice of the 19th AGM. Members attending the AGM through VC/OAVM shall be reckoned for the purpose of quorum under Section 103 of the Act.

The Notice of the 19th AGM along with the Annual Report 2025-26 has been sent electronically to all Members whose names appear in the Register of Members/ Register of Beneficial Owners as on Friday, August 28, 2026, and who have registered their email addresses with the Company/ Registrar and Share Transfer Agents / Depository Participants / Depositories. The said documents are also available on the Company's website https://www.hariompipes.com/, the websites of the Stock Exchanges i.e., National Stock Exchange of India Limited https://www.nseindia.com/ and BSE Limited https://www.bseindia.com/, and on the website of Central Depository Services (India) Limited https://www.evotingindia.com/. Members who wish to receive a physical copy of the Annual Report may request the same by sending an email to cs@hariompipes.com.

Manner of registering/updating KYC & e-mail address:

Members whose email addresses are not registered with the Company/RTA/Depository Participant(s), have been sent a letter at their registered address providing the web-link and exact path where complete details of the Annual Report are available and further requesting them to register/update their email addresses and mobile numbers with their respective Depository Participants.

Dividend:

The Board of Directors, at its meeting held on May 22, 2026, has recommended a final dividend for FY 2025-26. If approved by the Members at the ensuing AGM, the final dividend will be paid within 30 days of the AGM to members whose names appear in the register of members/beneficial owners as on the Record Date, i.e., Wednesday, September 23, 2026, after deduction of applicable tax. Members are requested to ensure that their bank account details are updated with their respective Depository Participants.

Instructions for remote e-Voting:

In compliance with Section 108 of the Act and Regulation 44 of the SEBI (LODR) Regulations, 2015 and the applicable SEBI Circulars, the Company is providing remote e-Voting facility to the members, to exercise their right to vote on resolutions proposed at the AGM through electronic means using the remote e-Voting facility provided by CDSL.

a) **Remote e-Voting period:** From **Sunday, September 27, 2026, 9:00 AM (IST) to Tuesday, September 29, 2026, till 5:00 PM (IST).** The remote e-Voting module shall be disabled by CDSL thereafter.

b) **Cut-off date:** Members holding shares, as on **cut-off date, i.e. Wednesday, September 23, 2026,** may cast their votes electronically through remote e-Voting before the AGM or e-Voting during the AGM.

c) Members who have already cast their votes by remote e-voting prior to the AGM may attend the AGM but shall not be entitled to vote again.

d) Members attending the AGM through VC/OAVM who have not cast their votes earlier shall be eligible to vote electronically during the AGM.

e) Any person who becomes a Member of the Company after dispatch of the Notice of AGM but holds shares as on **Wednesday, September 23, 2026** ("cut-off date") may obtain the login credentials by sending, an email to the RTA at bsshyd@bigshareonline.com with details of their Folio No. /DP ID and Client ID.

For detailed instructions on e-Voting and joining the AGM through VC/OAVM, members may please refer to the section titled 'Instructions for Shareholders for E-voting and joining Virtual Meeting' in the AGM Notice. In case of any queries, you may refer the Frequently Asked Questions ("FAQs") and e-Voting manual available at www.evotingindia.com, under help section or call on toll free no.: 1800 22 55 33 or send an email to Mr. Rakesh Dalvi, Senior Manager, CDSL at helpdesk.evoting@cdslindia.com, Telephone: +91 022 23058542/43.

Crude oil holds six-week highs on US-Iran attacks

London: Crude oil prices were near six-week highs on Monday, creeping closer to $100 a barrel, as tit-for-tat strikes between the US and Iran on vessels sailing in the Strait of Hormuz kept crude oil flows in West Asia low. Brent crude futures were up 89 cents, or 0.92 per cent, at $97.17 a barrel by 1333 GMT, having earlier hit their highest point since July 24 at $97.93. US West Texas Intermediate crude also hovered near a six-week high at $92.27 a barrel, up 79 cents. REUTERS

Gold eases as strong jobs data boost rate-hike bets

Gold eased on Monday after Friday's robust US jobs report bolstered expectations for a Federal Reserve interest rate hike this month, while investors awaited key inflation data for further clues on the monetary policy outlook. Spot gold was down 0.8 per cent at $4,394.12 per ounce by 12.26 GMT. US gold futures for December delivery fell 0.8 per cent to $4,439.40, with trading volumes low due to a US holiday. REUTERS

Copper nears record high as supply fears spur buying

London: Copper prices headed towards a record high on Monday, as the prospect of shortages outside the US spurred buying, while the softer dollar reinforced positive sentiment. Benchmark copper on the London Metal Exchange was up 0.1 per cent at $14,430 a tonne at 0931 GMT, the highest since the all-time peak of $14,527.50 hit in January. REUTERS

Kharif sowing 2% lower than a year ago

LOWER RAIN IMPACT. Paddy, oilseeds and nutri-cereals coverage down as cotton and pulses acreage gain

Our Bureau
New Delhi

The area under kharif crops in the ongoing season reached 1,086.31 lakh hectares (lh) as of September 4, compared with 1,104.01 lh in the year-ago period, the Agriculture Ministry said in its weekly update on Monday. The current year's progressive area is still 2 per cent less than the season's normal acreage of 1104.46 lh.

After the country received 86 per cent of its average rainfall during June-August, the monsoon rainfall from September 1 to 7 has been 82 per cent of its long-period average (LPA). Major rainfall-deficit States in September include Kerala, Karnataka, Tamil Nadu, Telangana, Andhra Pradesh, Gujarat and Maharashtra.

The government has fixed a production target of 176.16 million tonnes (mt) of foodgrains for kharif 2026. It includes 123.15 mt of rice, 8.41 mt of pulses, 31.04 mt of maize and 13.56 mt of nutri-cereals.

Progress card (lakh hectare)

	2025	2026	% change
Paddy	438.19	421.82	-3.7
Pulses	115.30	117.13	1.6
Shri Anna cum Coarse cereals	182.48	181.39	-0.6
Oilseeds	193.06	191.99	-0.6
Sugarcane	58.87	58.47	-0.7
Cotton	109.87	109.17	-0.6
All crops	**1,104.01**	**1,086.31**	**-1.6**

As of Sept 4; Source: Agriculture Ministry

BETTER SOWING PACE
The pace of sowing was slightly better last week, as farmers planted kharif crops on 15.21 lh during August 28-September 4 against 14 lh a year ago, data show.

The main cereal for the kharif season, paddy, is down 3.7 per cent to 421.82 lh compared to 438.19 lh a year ago. The major decreases in area have been reported in Karnataka (by 4.28 lh), Telangana (3.61 lh), Andhra Pradesh (1.91 lh), Jharkhand (1.38 lh), Madhya Pradesh (1.75 lh), Maharashtra (1.15 lh), Tamil Nadu (1.32 lh), and Uttar Pradesh (1.84 lh).

The area under all pulses was higher at 117.13 lh against 115.3 lh while that of oilseeds dipped to 191.99 lh from 193.06 lh. Oilseeds' acreage this season exceeded the year-ago level until August 7, with higher area under soybean, groundnut and sesame, but dipped subsequently. Soybean dropped to 121.82 lh from 122.98 lh, and groundnut to 49.61 lh from 50.44 lh.

Among pulses, arhar (tur or pigeon pea) sowing reached 45.66 lh against 44.93 lh the year before, and urad (black matpe) rose to 25.15 lh from 22.46 lh. But moong (green gram) was a tad lower at 33.19 lh from 34.23 lh. The coverage of nutri/coarse cereals has been reported lower at 181.39 lh compared to 182.48 lh last year. The area under jowar reached 13.58 lh, up from 12.61 lh a year ago, and bajra increased to 64.86 lh from 62.87 lh. However, ragi decreased to 7.6 lh from 8.77 lh, and maize declined to 91.09 lh from 94.08 lh.

COTTON UP A TAD
Cotton acreage is now a notch lower at 109.17 lh from 109.87 lh, while jute and mesta coverage is higher at 6.34 lh from 6.24 lh year-ago, data show.

After revising the sugarcane sowing area downward on August 7, following several weeks in which the sowing was reported as higher, the Ministry continues to confirm a lower area, now at 58.47 lh as of August 28, compared to 58.87 lh a year ago.

The major decreases in coverage have been reported in Bihar (0.30 lh), Uttarakhand (0.20 lh), Maharashtra (0.14 lh), Punjab and Madhya Pradesh. However, higher coverage is reported in Uttar Pradesh (0.36 lh) and Haryana (0.21 lh).

Tur prices likely to rule firm on tight supply, weak rain

Our Bureau
Bengaluru

The area under tur (pigeon pea) is up 1.6 per cent to 45.66 lakh hectares as of September 4, per the Agriculture Ministry data, but prices of the pulses variety have firmed up on tight supply and concerns of poor rain impacting output in Karnataka and Maharashtra.

As per the India Pulses and Grains Association (IPGA)'s latest market update, the trade expects tur prices to remain firm to higher, as rising dal prices are supporting mill margins and encouraging buying.

"Lower arrivals, higher Myanmar–Africa offers, slow imports, negative import parity and limited nearby supply are supporting the market, while sellers remain reluctant to sell existing stocks. African replacement costs are above spot values, and fresh shipments are unlikely to provide immediate supply. Festival demand will, therefore, depend largely on stocks held by traders, importers and mills," the IPGA said in its weekly newsletter.

MARKET RALLY. Tur dal prices in Gulbarga traded at ₹12,000-12,100 per quintal, up ₹600 over last month

PRICE SURGE
Prices of domestic tur in Gulbarga ruled at ₹8,500-9,400 per quintal on September 5, an increase of ₹1,100 over the previous month and ₹2,668 over the corresponding period last year.

Similarly, in Akola, prices ruled at ₹8,800-8,825 per quintal, up ₹500 over the previous month and ₹2,100 over the corresponding period last year. Imported African tur was traded at ₹6,500-8,500 in Mumbai on September 5.

Tur dal prices in Gulbarga traded at ₹12,000-12,100 per quintal, up ₹600 over last month and ₹2,400 over the same period last year, whereas in Akola, the dal prices ruled at ₹12,100-12,300 per quintal, up ₹700 over last month and ₹2,900 year-on-year, according to the IPGA data. Despite the increase in acreage, the condition of the crop remains worrisome in Maharashtra and Karnataka due to prolonged weak rainfall, with poor plant growth reported in several areas. Karnataka has declared drought in several parts. "Although there is no immediate shortage, market sentiment remains positive. The government holds around 10 lakh tonnes of tur, but concerns over lower upcoming production persist," the IPGA said.

AFRICAN SUPPLY
Fresh African tur supply is expected from late September. Overall, continued demand, mill buying and uneven rainfall are likely to keep the market well supported.

As per the Agriculture Ministry data, Gujarat, Uttar Pradesh, Jharkhand and Telangana have reported an increase in acreage.

Tur area is up 33 per cent in Uttar Pradesh at 4.95 lakh hectares (lh), while it is 53 per cent more in Jharkhand at 2.12 lh. In Gujarat, the area is up 11 per cent at 3.13 lh, while in Telangana the increase is 17 per cent at 2.23 lh. In Andhra Pradesh, it is 9 per cent more at 2.42 lh.

Sugar mills, traders locked in 'battle of wits' as prices head southwards

Subramani Ra Mancombu
Chennai

The all-India average prices increased to ₹61.09 per kg from ₹60.8 on Sunday, but were lower by over ₹2 a week ago

Sugar mills and traders were locked in a battle of wits as millers kept their open rates higher on Monday. Wholesale prices declined, while retail prices remained firm around ₹60 a kg.

"Festive-season speculation on sugar has backfired after traders aggressively stocked up, expecting higher prices that never materialised amid weak consumer demand. Factories now cannot sell the mandatory 40 per cent of stock due by September 7 without cutting prices they refuse to accept," said Dilip Patil, Managing Director of Samarth SSK Ltd and Co-Chairperson of the Sugar Bioenergy Forum (SBF) under the Indian Federation of Green Energy.

A sugar trader in Chennai said some millers used the opportunity to hike prices by 2 per cent. "Mills seem to be getting away with whatever they do, while traders have their backs to the wall," he said, not wishing to be identified.

LOGISTICS HURDLES
On Monday, sugar factories kept their open rates high, but logistic hurdles complicated the situation.

"With only two days remaining to lift the allocated sugar for the first fortnight, the scramble for vehicles has turned into a crisis of its own," said an industry source.

Though mills are unable to sell, they are refusing to lower prices. "However, they are keeping the rates open, which means they will lower prices when under pressure," said the source.

On Monday, mills quoted S-30 grade sugar around ₹4,500 a quintal. Wholesale prices dropped by ₹50-100 a quintal, with prices in Mumbai slipping to ₹4,850 a quintal.

RETAIL UP A TAD
Data from the price monitoring division of the Department of Consumer Affairs showed that the all-India average prices increased to ₹61.09 per kg from ₹60.8 on Sunday. However, prices are lower by over ₹2 from a week ago.

Sugar prices, which soared to over ₹70 a kg in retail outlets, began to ease after the Centre permitted duty-free imports of 1 million tonnes of raw sugar, besides taking various measures. These include changing the monthly sales quota to fortnightly, cutting the maximum stocks that traders and bulk buyers can hold, seeking buyers' details from mills and monitoring the commodity's movement closely. Logistics has become an issue as trucks have queued up in front of some factories, while at some places no vehicles are available. With stocks not being lifted, mills could face the prospect of penalties or incur the Food Ministry's wrath via regulatory action, the industry source said.

In the global market, raw sugar futures and cash prices declined. October raw sugar futures on InterContinental Exchange, New York, slid to 18.07 cents a pound. Spot price was 18.02 cents. London white sugar prices for October delivery were $523.90 a tonne.

Gujarat uses AI-based grain analyser to grade paddy at MSP procurement centres

Our Bureau
Ahemdabad

Gujarat has begun using artificial intelligence to test the quality of paddy procured from farmers under the Minimum Support Price (MSP) scheme, with an AI-based grain analyser deployed at 10 procurement centres across four districts.

The pilot, implemented during the Kharif Marketing Season 2025-26, analysed 6,191 paddy samples. Of these, 3,379 samples, or 54.6 per cent, were classified as Grade A, while 2,812 samples (45.4 per cent) were classified as Common.

A total of 341 samples were rejected, according to the Gujarat State Civil Supplies Corporation.

GRAIN WATCH. The pilot, implemented during the Kharif Marketing Season 2025-26, analysed 6,191 paddy samples

PRECISION CHECKS
The AI analysers were installed at procurement centres in Ahmedabad, Anand, Mahisagar and Panchmahal districts, the State government said in an official release on Monday.

The system checks samples for foreign matter, damaged or discoloured grains, immature or shrunken grains, admixture and moisture content.

The pilot covered 13,334 farmer registrations across the 10 centres. Dholka recorded the highest rejection rate at 24 per cent, while Viramgam recorded no rejections, according to government data.

FOCUS ON QUALITY
The State government said the AI-based system requires an uninterrupted power supply and only one person at each procurement centre. Under the existing third-party grading system, two people are required to collect samples and conduct quality checks using scientific equipment. The move comes as governments increasingly look to tech to bring transparency and consistency to agricultural procurement and foodgrain distribution.

The State Civil Supplies Corporation said it follows quality standards for commodities distributed through the public distribution system. Wheat and rice are procured according to Food Corporation of India standards, while MSP-procured grains follow specifications prescribed by the Centre. For tur dal, gram, edible oil, sugar and double-fortified salt, it said its quality standards are stricter than those of the Food Safety and Standards Authority of India.

The corporation said samples of tur dal and gram are subject to cross-verification through its Food Research Laboratory and Quality Control branch.

Farmers in Rajasthan's Jhalawar optimistic about higher soybean, groundnut yields

Our Bureau
Mangaluru

The model farms in the Jhalawar district of Rajasthan under the Vegetable Oil Mission of the Solvent Extractors' Association of India (SEA)-Solidaridad and AWL have shown higher oilseed productivity, according to the SEA.

A media statement by SEA said that participating farmers in the region expect soybean yields of around 2,000 kg per hectare or more and groundnut yields above 2,500 kg per hectare, with some farmers optimistic of achieving still higher levels if the favourable conditions continue.

YIELD SCOPE
Against India's average soybean productivity of roughly 1,000 kg per hectare, these field-level expectations underline the scope for substantially improving yields when favourable weather combines with effective agronomic practices, quality inputs, timely operations and regular technical guidance, it said.

The SEA said participating farmers expect groundnut yields above 2,500 kg per hectare

With timely rain and the dedicated efforts of the farming communities, the fields are looking very promising this season, the statement said.

WHAT MAKES IT DIFFERENT?
BV Mehta, Executive Director of SEA, said what makes the model farm approach different is that it goes beyond conventional crop demonstrations. It integrates better agronomic practices, soil health, resource efficiency and farmer-to-farmer learning directly at the field level.

The most encouraging takeaway from his field visit was not just the promising fields but the enthusiasm among farmers to learn, experiment, demonstrate and inspire others.

"This is exactly the transformation we want to see, model farms evolving into local learning hubs, where knowledge travels from one field to another and better practices become a community movement," he said.

The initiative builds on SEA's broader oilseed development journey, which began with a focused mustard mission and has progressively expanded to sunflower, sesame, groundnut and, this year, soybean.

During the current season, around 450 model farms and demonstrations on soybean and groundnut have been established under the initiative — about 200 in the Jhalawar region of Rajasthan and a further 250 across Mandsaur, Neemuch and other districts.

Building on these experiences, the SEA mission has proposed around 3,000 mustard model farms for the upcoming season.

This expanding field network is intended to demonstrate how better farm practices can translate into higher productivity, lower avoidable costs and stronger farmer incomes across India's major oilseed crops, the statement added.

National Spice Conference 2026 to focus on farmer empowerment, consumer safety

Our Bureau
Kochi

The World Spice Organisation (WSO), the not-for-profit technical partner of the All-India Spices Exporters Forum (AISEF), will host the fifth National Spice Conference (NSC) 2026 in Jaipur on September 19 and 20.

Themed "Empowering Farmers, Protecting Consumers," the two-day conference will bring together stakeholders from across the spice value chain.

FARMER FIRST
The conference will feature business sessions, an exhibition showcasing technologies and indigenous agri-products, and a Buyer–Seller Meet.

The discussions will focus on improving farmer incomes, strengthening food safety, promoting responsible sourcing and sustainability, and expanding market access for farmers and farmer producer organisations (FPOs).

The inaugural session will feature WSO Chairman Ramkumar Menon, Karnataka Agriculture Price Commission Chairman and former Chairman of the Committee on Doubling Farmers' Income Ashok Dalwai, Spices Board Secretary MS Manivannan, Rajasthan Principal Secretary (Agriculture and Horticulture Department) Manju Rajpal and NSC 2026 Business Committee Chairman Ganapathy K D.

APEDA Chairman Abhishek Dev will deliver the keynote address on the second day.

Menon said that the conference would bring together the entire spice value chain to address challenges affecting farmers and consumers.

The focus on farmer empowerment and consumer protection reflected the need to strengthen food safety, sustainability and market linkages while equipping farmers to meet evolving market requirements, he said.

SAFETY FOCUS
This year's conference will place greater emphasis on the link between farm-level practices, consumer safety and changing market requirements, particularly as India's spice sector faces evolving food safety standards, regulatory changes, sustainability expectations and rising demand for traceable and quality-assured products.

Buy natural gas at ₹283, stop loss initially at ₹268

Akhil Nallamuthu
bl. research bureau

Natural gas futures (₹283/mmBtu), which were in a downtrend since early June, are now showing signs of a bullish reversal. Nevertheless, the contract faces one last barrier to breach before confirming the change in trend.

The September futures formed a good base at ₹257 through August. While the contract has rebounded on the back of this, it now faces resistance at ₹286. The price action shows that natural gas futures oscillated between ₹257 and ₹275 for most of August. While it broke out of ₹275 towards the end of last month, the chart shows that the contract is now consolidating in a new price band of ₹275-286. Nevertheless, the contract has formed higher lows recently, and the price is now above both the 21- and 50-day moving averages. Therefore, the probability for natural gas futures to surpass ₹286 is high. Once the hurdle at ₹286 is breached, the contract could quickly rally to ₹300. The uptick might even extend to ₹320. Instead, if the support at ₹275 is invalidated, natural gas futures could extend the decline to ₹257. However, there is a bullish bias now; so traders can consider long positions.

COMMODITY CALL.

TRADE STRATEGY
Buy natural gas (September) futures now at ₹283 and place the initial stop-loss at ₹268. When the contract hits ₹300, revise the stop-loss to ₹290. Book profits at ₹320.

Soybean output seen lower at 9.6 mt on weak rain, reduced area: USDA

Vishwanath Kulkarni
Bengaluru

USDA Post has cut the forecast for Indian soybean output by 8 per cent to 9.6 million tonnes for the 2026-27 season from its earlier estimate of 10.4 million tonnes, citing erratic monsoon rainfall and reduced area impacting the output. This comes amid a section of farmers shifting to other crops such as cotton and corn.

The Post also revised India's soybean imports to five lakh tonnes, supported by favourable harvests among African suppliers.

FAS New Delhi now estimates the soybean cropped area at 10.5 million hectares, down 6 per cent from the earlier forecast of 11.2 million hectares. "Irregular rainfall during the planting window disrupted sowing operations and required replanting in parts of Maharashtra, a leading soybean-producing State. Compounding this, farmers increasingly diverted acreage to cotton, drawn by stronger market prices, and to corn, motivated by improved income prospects," it said in its latest report.

The USDA Post has revised India's soybean imports to five lakh tonnes

The initial reduction in kharif 2026 soybean plantings stemmed largely from a delayed, El Nino-influenced monsoon onset. Amid this uncertainty, some growers considered shifting to cotton, corn or higher-value vegetable crops, while others experienced setbacks in land preparation due to the unpredictable early-season weather. In contrast, Madhya Pradesh benefited from favourable rainfall throughout the season.

BETTER VARIETIES
The Post observed that the adoption of high-yielding, disease-resistant varieties is expected to partially offset the effects of reduced planted areas. However, field visits revealed that many farmers continued to rely on older cultivars such as JS 9560, which underperform relative to newer, improved varieties, it said.

QUICKLY.

PM to visit Gujarat, Maharashtra today

New Delhi: Prime Minister Narendra Modi will dedicate development projects worth ₹35,000 crore to the nation and inaugurate the Global Fintech Fest during his visit to Gujarat and Maharashtra on Tuesday. Modi will first visit Vadodara, where he will lay the foundation stone, inaugurate and dedicate various development projects to the nation. He said he will also attend the Global Fintech Fest 2026 in Mumbai. PTI

Agnikul adds pressure vessel facility in Chennai

Spacetech start-up Agnikul Cosmos has inaugurated two units at its Assembly & Testing Facility in Chennai. The units include the Stage Testing & Inspection Facility (STIF) and the Pressurant Tank Realisation, Over-wrapping and Outfitting Facility. It will enable the in-house manufacturing of pressure vessels — the rocket component that holds gases or liquids at a high pressure.
OUR BUREAU

Target 10 m foreign patients a year, ecosystem in place to meet this: Goyal

FOR TRANSPARENCY. Minister underlines need for high standards of quality, ethics to draw overseas patients

Our Bureau
New Delhi

Commerce and Industry Minister Piyush Goyal ANI

Commerce and Industry Minister Piyush Goyal on Monday called on the pharmaceutical and healthcare industry to build globally competitive medical devices and scale up medical value tourism, with a target of 10 million international patients a year.

Speaking at two pharma industry events, Sanjeevani 2026 and Bharat Health Global Expo 2026, Goyal said India should leverage its cost advantage and healthcare capabilities to emerge as a global hub for medical innovation and services.

He stressed the need for stronger hospital participation, skilled healthcare workers, seamless patient journeys and high standards of quality and ethics to attract more foreign patients.

"While 3.5 million patients have benefited from India's medical value tourism ecosystem in the last seven years, the country's target should be 10 million patients a year," he said, adding that India had the doctors, capabilities and ecosystem needed to achieve the target.

ETHICAL PRACTICES

As part of a five-point action plan to strengthen India's medical value tourism ecosystem, Goyal said India should prioritise training and certifying caregivers and develop a skilled workforce capable of delivering healthcare to international standards.

He urged insurers and health-tech companies to develop platforms that simplify treatment and ensure timely reimbursements. Hospitals, he said, should offer transparent treatment packages and follow ethical practices, warning that a single instance of malpractice could damage India's credibility.

Goyal proposed a network of facilitators and international hospital tie-ups, along with a pool of interpreters to assist foreign patients. Hospitals treating international patients should be NABH-accredited, verified and panelled, he said, stressing that quality healthcare cannot be different for Indians and foreigners.

MEDICAL DEVICES

The Minister asked domestic medical device manufacturers to focus on quality and build a robust component ecosystem, offering government funding to help create advanced testing infrastructure.

"We must develop a critical component ecosystem by strengthening our domestic capabilities with high quality. We must create shared testing infra facilities where these equipment can be tested, benchmarked to the best in the world, certify and demonstrated to global customers," he said.

From the Bureau of Indian Standards, the Minister offered that "...100 per cent Government of India will fund the acquisition of testing equipment... Demand from us... there is no proposal from you. And we'll set up the most modern labs," Goyal said.

"We must bring technology partnerships, we must have better buyer and seller relationship, we must encourage joint ventures... We must co-design, and co-develop licence wherever required... Look for joint R&D centres with other countries," he said.

India's FTAs and wider trade engagements are also generating demand for pharmaceuticals and healthcare professionals, Goyal said, with partner countries seeking medicines, doctors, technicians, nurses and caregivers in large numbers.

Value add: How a CLRI team is upcycling agro waste

T E Raja Simhan
Chennai

CM Rajesh (left), Scientist-D, SPDDC, CSIR-CLRI, and Sachin Sharma, technical assistant, AML, in Chennai BIJOY GHOSH

Rice straw, wheat residue often burnt in fields, banana and mango waste discarded after processing and coffee husk may seem unlikely ingredients for a handbag or wallet.

But scientists at the CSIR-Central Leather Research Institute (CSIR-CLRI), Chennai, are working to transform these agricultural residue into leather-like materials.

On August 27, the CSIR-CLRI signed a licensing agreement with Bengaluru-based start-up Husk & Hide to transfer its technology for producing leather-like material from coffee-processing waste.

The development adds coffee husk to a growing list of bio-resources being explored as alternatives to conventional leather and synthetic materials. India produces around 3.5 lakh tonnes of coffee annually, generating over one lakh tonnes of coffee husk.

WASTE TO PRODUCT

"There is a lot of waste generated from agricultural practices, and the idea is to use that as a raw material and convert it into a leather-like material," P Thanikaivelan, Director, CSIR-CLRI, told *businessline*.

The institute began developing the broader technology around 2020. By 2022-23, it had developed the process and started transferring the technology to companies for different raw materials, including rice and wheat straw. Some of the early technology takers were start-ups in Tamil Nadu and Puducherry.

CM Rajesh, Scientist-D at the Shoe & Product Design and Development Centre of CSIR-CLRI, who has been involved in the coffee husk project, said the concept is already finding commercial applications.

A Mumbai-based company has developed leather-like products, including wallets, using mango pulp, while another company is making carry bags from rice straw, he said.

The process involves converting agricultural residues into sheet-like materials, followed by drying, surface coating and embossing.

The embossing gives the material a grain pattern similar to conventional leather, allowing it to be used for products such as bags, wallets, belts and open footwear.

DIVERSE APPLICATIONS

Natural leather depends largely on hide and skin generated as a byproduct of the meat industry, while PU and PVC-based alternatives pose disposal and biodegradability challenges.

Agro-based materials offer a third possibility — using renewable biological resources to create higher-value products.

The materials are expected to be more expensive than synthetic leather but cheaper than genuine leather, said Thanikaivelan.

The initial focus is, therefore, likely to be on lifestyle and fashion products, while applications such as automotive interiors and high-end upholstery will require further development, he added.

'Those who assault doctors, hospital staff don't deserve to roam free'

Aaratrika Bhaumik
New Delhi

The Supreme Court on Monday said that those who assault doctors and hospital staff "do not deserve to roam on the streets even for a minute", prompting a Maharashtra corporator accused of attacking three municipal doctors in Thane to withdraw his plea after the Bench indicated that it could examine the cancellation of his bail.A Bench of Justices Vikram Nath and Sandeep Mehta was hearing a plea filed by Shiv Sena corporator Ramesh Sukrya Mhatre, challenging the Bombay High Court's July 18 order staying the bail granted to him by the trial court, as well as its August 7 order imposing stringent conditions on his release, including that he remain outside Maharashtra until the commencement of the trial.

REPEATED ACT

"This is their *modus operandi*. These people do not deserve to roam on the streets even for a minute," the Bench remarked, indicating that it intended to issue notice on the Maharashtra government's appeal challenging the grant of bail to the corporator. The court also referred to a recent incident in Palghar, where 17 Shiv Sena workers were booked for allegedly assaulting staff at a hospital on September 5 following a dispute over the treatment of a 19-year-old man injured during a *Dahi Handi* celebration.

"Yesterday, again the same group of people have assaulted doctors and hospital staff in Palghar," the Bench said, adding that there appeared to be a "propensity to do these things".

Senior advocate Mukul Rohatgi, appearing for Mhatre, clarified that those booked in the Palghar incident were not the same persons accused in the Thane case. He then sought permission to withdraw Mhatre's plea, saying that he wanted to "put a quietus to this here". "The writing on the wall is clear. Therefore, I would want to withdraw," Rohatgi said.

Justice Nath, however, said the court needed to send a larger message against attacks on medical professionals. "A message needs to go, not only to these people but to everyone, as a deterrent. Such people do not deserve to roam freely on the streets even for a minute," he said.

Accordingly, the Bench issued notice on the Maharashtra government's appeal challenging the bail granted to Mhatre and three other accused and directed that it be listed on September 28. It also allowed Mhatre to withdraw his petitions.

CASE DETAILS

Earlier, the Supreme Court indicated that it was inclined to cancel Mhatre's bail, observing that those who had "no respect for the medical fraternity" should not be enlarged on bail. It had, however, decided to await a formal plea from the Maharashtra government seeking cancellation of the bail. The case stems from an alleged assault on three doctors at the Kalyan Dombivli Municipal Corporation-run Shastri Nagar Hospital in Dombivli, Thane district, on July 6.

Mhatre and others had allegedly attacked the doctors after they advised that a pregnant woman be shifted to another hospital as all beds in the neonatal intensive care unit were already occupied. The Bombay High Court subsequently initiated *suo motu* proceedings and, on July 18, stayed the bail granted to Mhatre and the other accused by the trial court.

Bypolls to 5 Assembly, 1 LS seat on October 6, says poll panel

Press Trust of India
New Delhi

The Election Commission on Monday announced bypolls to five Assembly seats in three States, including Nandigram, vacated by West Bengal Chief Minister Suvendu Adhikari after he chose to retain Bhabanipur, from where he defeated former Chief Minister Mamata Banerjee.

Along with the five Assembly seats across West Bengal, Tamil Nadu and Puducherry, bypolls in Assam's Nagaon Lok Sabha constituency will also be held on October 6, while the counting of votes will take place on October 9. The Nagaon seat was vacated by Pradyut Bordoloi, who won from on a Congress ticket in 2024. He joined the BJP and won from Dispur in the recent Assembly polls.

The other West Bengal seat headed for a bypoll is Rejinagar, which was vacated by Aam Janata Unnayan Party chief Humayun Kabir.

TN CONSTITUENCIES

In Tamil Nadu, bypolls will be held in the Madurantakam (SC) and Dharapuram (SC) Assembly constituencies, which were won in the recent elections by AIADMK's Maragatham Kumaravel and P Sathyabama, respectively.

The two were among a group of rebel AIADMK legislators who backed Chief Minister Vijay's Tamilaga Vettri Kazhagam (TVK) government in a floor test.

Kumaravel and Sathyabama later resigned as MLAs and joined the ruling TVK, necessitating the bypolls. Puducherry's Thattanchavady seat was vacated by Chief Minister N Rangasamy, who won from both Thattanchavady and Mangalam in the Assembly elections. Rangasamy opted to retain Mangalam seat.

CM Vijay breaks his silence, takes on DMK in Assembly

Our Bureau
Chennai

After remaining largely silent through much of the month-long Assembly session, Chief Minister C Joseph Vijay on Monday delivered a fiery speech, attacking the Opposition party Dravida Munnetra Kazhagam (DMK) with allegations of corruption and emphasising the need to maintain decorum inside the House. This caught the Opposition off guard.

SHARP COUNTERATTACK

In a widely watched session, the Chief Minister launched a sharp counterattack on the Opposition, using his reply to the debate on the demands for grants for the Police and Fire Services and Rescue departments.

He harked back to the Sarkaria Commission report of the 1970s, which had referred to instances of corruption in the then DMK regime, and also cited the recently circulated Enforcement Directorate documents relating to alleged irregularities in the Municipal Administration and Water Supply Department and the the government-run liquor marketing agency Tasmac.

Quoting the Sarkaria Commission report, Vijay said that kickbacks had to be paid then to prominent DMK members for tenders related to the Veeranam drinking water project.

DMK IRE

He also referred to the ED report to state that contractors were asked to pay 7.5 per cent to 10 per cent of the contract value as 'party fund' under the previous DMK government.

His remarks drew immediate protests from DMK legislators, who rushed towards the Speaker's chair and raised slogans, disrupting the proceedings.

Vijay also used the occasion to stress the importance of maintaining decorum inside the Assembly, pointing out that the proceedings were being telecast live and that elected representatives had a responsibility to uphold the dignity of the House.

WOMEN'S SAFETY

On the issue of women's safety and protection, the Chief Minister made an emotional reference to the treatment of former Chief Minister J Jayalalithaa inside the Assembly, recalling the controversial events involving her during an earlier period of Tamil Nadu's political history.

TN commercial tax revenue up 4.4%, stamp duty 16% in FY26

Our Bureau
Chennai

Tamil Nadu's Commercial Taxes Department collected ₹1.43 lakh crore in gross revenue in FY26, up ₹6,047 crore or 4.4 per cent over FY25, Logesh Tamilselvan, Minister for Commercial Taxes and Registration, said in the Assembly on Monday, tabling the Commercial Taxes Policy Note 2026-27.

Of this, GST revenue (SGST + IGST) stood at ₹78,120 crore as compared to ₹75,518 crore in FY25, representing a 3.4 per cent growth y-o-y.

Further, in case of non-tax revenues, the department recorded a 10-year high of ₹25,546 crore in stamp duty during FY26 across 35.51 lakh registered documents, a 16.3 per cent surge from the previous period, as per the Stamps and Registrations policy note presented by the Minister. Surcharge collection on property transfers hit ₹4,380 crore in FY26 with ₹4,248 crore transferred directly to urban and rural local bodies. In the three-month period from April-June 2026, ₹1,135 crore was collected as the amount of surcharge on stamp duty.

PLUGGING LEAKAGES

As per Tamilselvan, data analytics has emerged as a major tax revenue augmentation tool. The Minister said the department partnered with IIT-Hyderabad for a Big Data Analytics Solution project for three years, beginning with effect from December 2023, to identify revenue leakages and improve tax collections. The scrutiny of taxpayers for assessment years 2018-19 to 2023-24 had already helped realise around ₹6,220 crore between December 2023 and March 2026 through these and other revenue augmentation measures, Tamilselvan said.

Non-tax revenues recorded a 10-year high of ₹25,546 crore in stamp duty revenue across 35.51 lakh documents

The department has also established 49 biometric verification centres, including eight provided by CBIC, with 55 booths across the State. These are being used to verify GST registrations and documents, particularly where Aadhaar authentication has not been completed.

Ease of doing business remains a major focus, with GST registration, return filing, payments and refunds fully digitalised, the minister said detailing the department's efforts. The taxpayer grievance mechanism resolved 3,306 queries during FY26, while the Quality Monitoring Wing oversaw 15,279 rectification orders during the year.

25-day LPG refill booking cycle back for rural users

Our Bureau
New Delhi

Rural LPG consumers, who had to wait up to 45 days between refill bookings since March, can now go back to a 25-day cycle like their urban counterparts, following a fresh order from the Ministry of Petroleum & Natural Gas.

The revised timeline, notified on September 7 to the oil marketing companies , formally unwinds a demand-management measure the Ministry imposed amid the West Asia conflict.

The Ministry's letter cited the improved LPG supply position and a marked reduction in refill backlogs compared to the situation when the restrictions were first introduced, as the basis for the rollback.

It directed the three state-run oil marketing companies to implement the uniform 25-day interval "with immediate effect" across both urban and rural areas, including many Pradhan Mantri Ujjwala Yojana beneficiaries. Through March and April, the Ministry denied social media reports of any change to the 25-day urban and 45-day rural formula, insisting the rules remained unaltered even as claims of 35-day and other revised intervals circulated.

Rejecting plea for more time, SC tells Aravalli panel to 'work day and night', submit report by November 30

Aaratrika Bhaumik
New Delhi

While rejecting a six-month extension sought by a Supreme Court-appointed high-powered committee (HPC) tasked with defining the Aravalli hills and range, Chief Justice of India (CJI) Surya Kant on Monday questioned whether it was "waiting for his retirement." The court directed the panel to submit its final report by November 30, 2026.

CJI Kant is due to demit office on February 9, 2027.

The Bench, also comprising Justices Joymalya Bagchi and V Mohana, made it clear that no further extension would be granted.

The five-member panel, headed by Indian Council of Forestry Research and Education (ICFRE) Director General Kanchan Devi, has been tasked with evolving a uniform definition of the ecologically fragile Aravalli hills and range, and recommending measures to regulate future mining.

'INTERIM REPORTS'

"The high-powered committee has sought an extension till February 28, 2027... We reject this plea. The HPC is directed to work day and night and submit its final report by November 30, 2026," the Bench recorded in its order.

The court asked the committee to submit interim reports on specific issues requiring immediate consideration, without waiting for the entire exercise to be completed.

It also directed the panel to hear all stakeholders, including tribal communities in Rajasthan and Gujarat, before finalising its recommendations.

The matter will be heard next on December 2, by which time the committee is expected to have submitted its final report.

The Aravalli range forms a natural barrier between the arid desert regions in the north-west and the fertile northern plains.

The Supreme Court has been regulating mining in the region since 2002. In 2018, a Forest Survey of India (FSI) report drew attention to the scale of illegal mining, recording the disappearance of 31 hillocks across nearly 3,000 sites in Rajasthan and Haryana.

In November 2025, the top court accepted a common definition of the Aravalli hills and range proposed by an eight-member committee headed by the Union Environment Secretary.

Under the definition, a landform in an Aravalli district rising 100 m or more above the local relief would qualify as an Aravalli hill, while two or more such hills located within 500 m of each other would constitute the Aravalli range.

The definition, however, triggered widespread concern that large parts of the Aravalli landscape could fall outside its ambit, potentially opening them up to mining and threatening the region's ecology.

On December 29, 2025, the Supreme Court took *suo motu* cognisance of these concerns and kept its November order in abeyance. It also barred the grant of new mining leases and the renewal of existing ones.

In May, the court constituted the HPC with a broader mandate to undertake a scientific assessment of the Aravalli landscape, recommend a uniform definition and examine the ecological consequences of mining and development in the region.

COMPLEX ISSUE

In its interim report submitted on August 31, 2026, the committee said its work so far indicated that the Aravallis could not be adequately defined on the basis of a single criterion relating to terrain or elevation.

It said it was undertaking assessments that covered spatial, ecological, geological, hydrological and socio-economic factors, along with inputs from stakeholders.

'Semaglutide cuts obesity rates in young children'

Copenhagen: Novo Nordisk said on Monday that in a late-stage trial, 40.4 per cent of children aged 6 to under 12 treated with semaglutide, the active ingredient in its blockbuster weight-loss drug Wegovy, were no longer classified as having obesity after 68 weeks. All patients enrolled in the trial received lifestyle modification throughout the trial, including a reduced-calorie diet and increased physical activity. "We are encouraged by the positive Step Young results and semaglutide's potential to help children living with obesity who need medical treatment, alongside lifestyle changes, to better manage their obesity," said Novo's Chief Scientific Officer Martin Holst Lange. PTI

HRV Pharma to invest in peptides, oncology APIs

New Delhi: HRV Pharma on Monday said it will invest ₹150 crore to expand capabilities across two high-value and supply-constrained pharmaceutical segments, synthetic peptides and high-potency oncology APIs. The investment strengthens HRV Pharma's presence in high-value pharmaceutical segments while retaining its asset-light operating model, the company said in a release. HRV Pharma will invest ₹40-50 crore to establish a dedicated cGMP peptide manufacturing capacity through a strategic capacity arrangement and establish a joint venture with a focus on high-potency oncology active pharmaceutical ingredient (APIs) and specialised molecules at an investment of approximately ₹100 crore. PTI

IPC readying monograph for semaglutide makers

OWN PRESCRIPTION. At present, Indian firms follow inhouse standards for production

Ankita Upadhyay
New Delhi

PRESCRIBING QUALITY. A monograph serves as a quality benchmark that a drug must meet to comply with the Indian Pharmacopoeia

In a significant shift for India's regulatory setup for semaglutides, the Indian Pharmacopoeia Commission (IPC) is set to come up with a monograph for semaglutide manufacturers in India.

A monograph, defined by the IPC, is an official quality standard for a specific drug, pharmaceutical substance or product.

It lays down requirements for its identity, purity, strength, assay and permissible levels of impurities, along with the tests and methods used to verify these parameters.

QUALITY BENCHMARK

In simple terms, a monograph serves as a quality benchmark that a drug must meet to comply with the Indian Pharmacopoeia; it is not a guideline for prescribing or clinical use.

Sources from the Union Ministry of Health and Family Welfare said that the monograph will give a complete specification of the GLP-1 drug.

At present, the Indian companies that make the drug follow their inhouse standards for their manufacture.

Following the Delhi High Court's March 9 order, which declined to block generic manufacturers from exploiting semaglutide after patent expiry, Indian drugmakers moved rapidly to prepare for the market opening.

Novo Nordisk's Indian patent on semaglutide expired on March 20, after which multiple companies, including Sun Pharma, Dr Reddy's Laboratories, Zydus Lifesciences, Alkem, Glenmark and others, launched or prepared branded generic versions.

REGULATORY NOD

Over 20 to 30 pharmaceutical companies have launched or received regulatory approvals to manufacture generic semaglutide brands in India following the patent expiration.

The monograph will cover both biological and chemical versions of semaglutide. This comes amid the rising threat of counterfeit semaglutide, driven by surging demand for weight-loss drugs.

The Central Drugs Standard Control Organisation (CDSCO) issued nationwide alerts and tightened surveillance on pharmaceutical supply chains after international intelligence flagged fake batches.

The Central Drugs Standard Control Organisation (CDSCO) issued a strict nationwide surveillance directive to state regulators after receiving an Interpol alert regarding counterfeit semaglutide batches originating from Europe.

Officials said the monograph will be launched by next addendum, which is an official supplement published by the Indian Pharmacopoeia Commission, to update, amend, or add new quality standards, monographs and general chapters to the existing main edition of the pharmacopoeia.

Mounjaro is India's top-selling drug as patients shift to GLP-1 injections

Ankita Upadhyay
New Delhi

India's anti-obesity drug market is changing rapidly as patients increasingly choose injectable GLP-1 medicines over oral drugs.

Eli Lilly's Mounjaro has emerged as India's best-selling pharmaceutical brand, according to Pharmatrac industry data for the 12 months ending August. When the GLP-1 market began expanding in India, oral semaglutide, sold as Rybelsus, was the preferred option.

Launched in 2022, it offered patients an alternative to injections. The trend has since reversed, with demand for oral semaglutide declining while injectable GLP-1 medicines continue to gain ground.

Saptarshi Bhattacharya, Senior Consultant-Endocrinology, Indraprastha Apollo Hospital, New Delhi, said the growing use of injectable GLP-1 medicines is linked to their established role in both diabetes and obesity treatment, while oral GLP-1 options currently have a more limited role, primarily in diabetes.

"Weekly dosing is also convenient, and many patients find them easier to tolerate than oral medicines, which can come with more restrictions around how they need to be taken," he said.

METABOLIC BENEFITS

Ashutosh Goyal, Principal Consultant-Endocrinology, Paras Health, Gurugram, said injectable GLP-1 treatments are becoming more widespread because of their ability to reduce excessive body weight, improve appetite control and benefit several metabolic parameters when used appropriately.

The injectable market received another boost with the launch of tirzepatide and the expansion of injectable semaglutide in 2025, including Wegovy, giving doctors and patients more treatment options.

Tirzepatide, the molecule in Mounjaro, now accounts for nearly three-fourths of the injectable GLP-1 market by value and has overtaken semaglutide.

Mounjaro recorded sales of ₹1,256 crore in the 12 months ended August 2026, up 502 per cent from the previous year. It ranked No 1 in both annual and monthly sales, ahead of GSK's Augmentin at ₹957 crore and USV's Glycomet GP at ₹950 crore.

RAPID RISE

Launched only in 2025, Mounjaro's rapid rise is notable. Its year-on-year unit growth stood at 89.4 per cent, although units sold in August fell 43.8 per cent from July, its sales value rose 34.1 per cent.

The divergence suggests a greater contribution from higher-priced units, though stocking and distribution changes may also have played a role.

'Apple's ramp-up in India hiring hints at greater role in global tech ecosystem'

Vallari Sanzgiri
Mumbai

Apple intends to hire its next batch of AI and engineering talent from India, along with other roles in operations and communications, hinting at a more central role of the country in the company's global technology ecosystem, as per GlobalData intelligence and productivity platform.

Apple announced hirings focused on artificial intelligence (AI), data platforms, software engineering, cloud infrastructure, automation, Apple Ads, Siri language capabilities and manufacturing intelligence in July and August 2026. These include roles such as Senior Software Engineer (Java, Spring Boot, and Microservices), Customer Systems; Software Engineer – Distributed Systems; Software Engineer (Data) – Ads; and Software Engineer (Data) – Ad Delivery indicate a focus on scalable backend systems, distributed architecture, ad delivery infrastructure and customer technology platforms.

FOCUS AREAS

"Apple's India hiring mix shows how the company is building a stronger base of AI, engineering, data and operational capabilities in the country. The roles suggest that India is becoming more central to Apple's global technology ecosystem, from software platforms and AI-led innovation to manufacturing intelligence and localised user experiences," said Sherla Sriprada, Business Fundamentals Analyst at GlobalData.

AI and data-platform hiring stands out as a key area of focus. Jobs such as Software Site Reliability Engineer – AI & Data Platforms focus on developing and operating large-scale data platforms that support analytics, reporting, and AI/ML applications.

A Senior Software Engineering Manager – Manufacturing Intelligence, Agentic Systems & Physical AI, covers intelligent manufacturing systems, AI-powered applications, agentic workflows, robotics, machine learning and factory-edge systems. The recent recruitment also points to a broader strengthening of software and platform engineering.

OTHER ROLES

"Apple's hiring in India reflects a clear, technology capabilities-focused expansion, with roles across AI and data platforms, software engineering, infrastructure automation, manufacturing intelligence and localised language capabilities. This suggests that India is playing a larger role in supporting Apple's global engineering ecosystem, while also helping the company strengthen market-specific capabilities," said Sriprada.

The company has also posted roles in cloud, data, and automation capabilities in India such as Data Engineer – Ads, Database Engineer – Ads, Snowflake Data Engineer – Ads and Infrastructure Automation Engineer. Beyond engineering, Apple also called for operational and market support functions in India such as Supply Demand Management Planner; PR Manager (iPhone), pointing to continued investments in India.

New music labels arrive to capitalise on India's independent audio boom, paid subscriber base

Meenakshi Verma Ambwani
New Delhi

With music artists building audiences beyond traditional film structures and regional repertoire gaining ground, leading production houses are strengthening their presence with new music labels.

The industry has also seen the entry of new players. Yash Raj Films recently announced the launch of Raah Records, a music company and incubator, to develop and support original artists while helping them build long-term creative careers beyond film music.

UK-based Virtuoso Music, which announced its launch in India in June, said it is introducing a creator-first business model while developing a multilingual slate across Hindi, Punjabi, Tamil and Telugu. Excel Entertainment, too, announced the launch of Excel Music.

"India has always been culturally significant, and we are now seeing it emerge as a defining force in music worldwide. Streaming, live music and catalogue monetisation are all growing at a remarkable pace, and with the breadth of regional language markets and the depth of artistry, there could not be a more exciting time for us to enter this market," Sahaj Miya, Head of New Business & Music, UK-based Virtuoso Music, told *businessline*.

"What is also changing is the shape of the market itself. Artists are building audiences beyond traditional film structures, regional and independent repertoire is gaining ground, and Indian music is travelling further than it ever has. We see India not only as a major market in its own right, but as central to where global music is heading," he noted.

PAID SUBSCRIPTIONS

Industry players pointed out that with non-film music gaining traction, music labels are sharply focusing on artist development and original IP catalogues by working with creators, who are building their own fandoms through social media.

This also comes at a time when labels are sharply focusing on monetisation through paid music streaming subscriptions, currently just a fraction of paid video subscriptions. India had 14 million paid subscriptions in 2025, up 37 per cent over 2024, and is expected to grow to 28-30 million by 2028, said IMI-EY.

Yash Raj Films (YRF) said Raah Records will bring together artist development, original music creation and long-term career building under one dedicated platform. The leading studio said rather than operating as a traditional release-driven label, Raah Records will act as long-term creative partner for artists.

In a statement, Askhaye Widhani, CEO, YRF, noted that "as India's independent music ecosystem enters a defining phase of growth", the company "believes great artists need more than distribution; they need belief, time and long-term creative partnership".

LIVE MUSIC SEGMENT

In August, Excel Entertainment announced the launch of Excel Music, backed by Universal Music Group as a strategic shareholder and marketing and distribution partner. For the movie production house, this is a natural extension.

Excel Music will be home to original film soundtracks and scores from Excel Entertainment's slate, alongside music from films by leading filmmakers and production houses across India.

This also comes as Indian consumers are shelling more for live music performances. India's live music revenues is set to expand from $97 million to $112 million, according to PwC.

W Health Ventures closes second fund at ₹700 crore

Our Bureau
Bengaluru

W Health Ventures, a healthcare-focused venture capital firm, has closed its second fund at ₹700 crore, surpassing its initial target of ₹630 crore, as it looks to build 8-10 healthcare companies from the pre-idea stage to category leaders over the next four years.

The Mumbai-based firm said Fund II will further its "company creation" model.

"India is at an inflection point in healthcare as the rising demand and constrained supply create a structural mismatch. That mismatch is where lasting businesses are built," said Pankaj Jethwani, Managing Partner, W Health Ventures.

Unlike a conventional venture fund, W Health Ventures said it develops businesses from the idea stage.

Technical issues divert two aircraft to Chennai

Our Bureau
Chennai

The Chennai international airport witnessed the diversion of two passenger aircraft on Monday following technical issues, with both flights landing safely and all airport operations remaining normal.

The first diversion involved Malaysia Airlines flight MH156, operating from Kuala Lumpur to Jeddah.

The Airbus A330-200, carrying 186 passengers, was diverted to Chennai after the crew reported a technical issue involving engine no 2.

FULL EMERGENCY

A full emergency was declared at 4.07 pm, following which emergency response arrangements were activated at the airport.

The aircraft landed safely at 4.44 pm. Further assessment of the aircraft and the reported technical issue is being carried out by the airline and its technical teams.

Later, in the evening, Air India Express flight IX682, operating from Tiruchirappalli to Singapore with 170 passengers, was diverted to Chennai due to a technical issue.

LOCAL STANDBY

A local standby was declared at 5.38 pm, with airport operational and emergency agencies placed on alert. The Boeing 737 was initially expected to arrive at 5.51 pm and was assigned Stand 43L.

The aircraft landed safely at 5.52 pm and vacated the runway under its own power. No untoward incident was reported.

The airlines' engineering and technical teams are assessing the reported issues at the time of filing this report. All flight operations at the airport are normal, according to an official release.

GalaxEye targets global earth-observation markets following US patent for OptoSAR

Jyoti Banthia
Bengaluru

Space-tech start up GalaxEye has secured a US patent for the core technology behind its OptoSAR imaging system, strengthening its intellectual property position as it looks to expand into global earth-observation markets and build a 30-satellite constellation over the next five years.

The company said it is the first Indian start-up to receive a US patent for satellite imaging technology.

The patent covers the architecture used to align and synchronise optical and microwave sensors for simultaneous, spatially and temporally matched data acquisition. The same foundational technology has already been patented in India.

"This is not just a patent for us. This is an invention — an invention that came out of India," said Suyash Singh, Co-founder and CEO, GalaxEye.

"We are building global-first technology truly in India — not importing it, not adapting it — but inventing it here, engineering it here and taking it to the world."

MANY APPLICATIONS

GalaxEye's OptoSAR technology combines optical imaging, which provides visual and spectral information, with Synthetic Aperture Radar (SAR), which can operate during the day and night and in adverse weather conditions. The company believes this combination can support applications ranging from defence and strategic intelligence to agriculture, insurance and disaster response.

"This patented technology enables us to serve the global markets and provide weather agnostic imaging capabilities across sectors like defence, agriculture, insurance, disaster response and more," said Singh.

The US patent comes as GalaxEye looks to move from demonstrating the technology to scaling its earth-observation capabilities. Its first satellite, Mission Drishti, was launched on May 3.

At 190 kg, the satellite was described by the company as India's largest privately built earth-observation satellite at the time of launch.

KEY OBJECTIVE

Singh said the company's objective is to build a constellation that provides a more persistent view of the earth, rather than simply reaching a particular satellite count.

"Our vision is to build a constellation that gives us a much more persistent view of the Earth," he said.

GalaxEye plans to deploy two satellites over the next 24 months, followed by full-scale deployment, with capital expenditure also being phased alongside technology and market maturity.

Singh said Mission Drishti had helped the company validate its systems in orbit and understand their performance under actual operating conditions.

Pristine Kashmir seeks to script a new story with 1st international film festival

Gulzar Bhat
Srinagar

FILMY DESTINATION. J&K Chief Secretary Atal Dulloo at the inauguration of the first International Film Festival Jammu and Kashmir (IFFJK) in Srinagar on Monday PTI

Filmmakers, cinema enthusiasts and locals gathered at Srinagar's Sher-i-Kashmir International Convention Centre (SKICC) on Monday as Kashmir opened its first international film festival, marking an attempt to revive the Valley's long association with the Indian film industry.

The four-day festival, being held from September 7 to 10 and organised by the Jammu and Kashmir Department of Information and Public Relations, brings films from India and abroad to local audiences.

About 1,100 films from 92 countries were submitted for the festival, with 135 films from more than 40 countries selected for screening after review by a preview committee.

Chief Minister Omar Abdullah felicitated prominent Bollywood filmmakers, including Ramesh Sippy and Vidhu Vinod Chopra.

GLOBAL CINEMA

Earlier, on the sidelines of an event in Srinagar, Abdullah said the festival would give local audiences, including film enthusiasts and mass communication students, an opportunity to experience cinema from different parts of the world.

He said the event would also give greater exposure to Jammu and Kashmir's film industry and encourage filmmakers to rediscover the region as a filming destination. Kashmir was a popular location for film productions long before countries such as Switzerland emerged as major international filming destinations, he said.

The festival comes as the administration seeks to rebuild Kashmir's association with the Indian film industry, which weakened after the outbreak of militancy in 1989.

The Valley was a popular location for Bollywood productions, with films such as *Jab Jab Phool Khile*, *Junglee* and *Kabhi Kabhie* shot against its scenery.

Chief Secretary Atal Dulloo inaugurated the festival at a theatre in Srinagar, where Lebanese film *Dead Dog* was screened.
