HIGH COURT ORDERS PROBE IN DELHI BUILDING COLLAPSE

Rescue ops end after 27 hours, 7 dead; owners held, 5 MCD officials suspended

PRAJYOT DEOGHARE &
SHIVANGI SHUKLA
New Delhi, September 7

A more than 27-hour rescue effort at the site of a collapsed five-storey building in Delhi's Satya Niketan area ended on Monday evening with seven people confirmed dead and five injured, as police arrested the building's owners and the Delhi High Court ordered a high-level inquiry into how the tragedy occurred.

The structure, which housed a paying guest (PG) accommodation for students near Delhi University's South Campus, came down around 1:30 pm on Sunday. Twelve people were pulled from the rubble by rescue teams. Seven of them, including five students and a 75-year-old labourer, did not survive. The Delhi Fire Service confirmed that all rescue units were withdrawn from the site around 5:10 pm on Monday once the operation concluded.

Police arrested three members of the family that owned and ran the building: 81-year-old Hariram Gupta, a retired sergeant with the Indian Air Force, his wife 75-year-old Urmila

CM ORDERS SEALING OF ILLEGAL FIVE-STOREY BUILDINGS

NDRF personnel conduct search and rescue operation at the PG building collapse site at Satya Niketan, in New Delhi

Gupta, in whose name the property was registered, and their 52-year-old son Mahesh Gupta, who runs a hardware and paint shop. According to police, Hariram and Mahesh managed

the day-to-day running of the PG while Urmila held ownership of the property. Investigators also found that Hariram had electricity connections registered for two floors of the build-

ing in his own name. All three have been booked on charges including culpable homicide and negligence in maintaining the structure. Police said they are also searching for the PG

operators and the labour contractor linked to the site to determine what role they may have played.

The Delhi High Court described the collapse as "most unfortunate" and

The Defence Acquisition Council (DAC), chaired by Defence Minister Rajnath Singh, on Monday cleared military procurement proposals worth about Rs 1.10 lakh crore for the Indian Army, Navy and Air Force, covering equipment ranging from chemical and nuclear contamination detection vehicles and advanced light helicopters to naval radars, marine gas turbines and electronic warfare systems. The approvals are aimed at meeting operational requirements while expanding the role of Indian manufacturers, with around 98 per cent of the procurements expected to be sourced from domestic industry.

The Defence Ministry said the council granted Acceptance of Necessity (AoN), which is the in-principle administrative approval for defence acquisitions, to the proposals at an estimated cost of Rs 1,10,000 crore.

For the Army, the approved procurements include Chemical Biological

KEY POINTS

25-day LPG refill interval now uniform nationwide

Supplies have improved and refill backlogs have fallen considerably

MPOST BUREAU

New Delhi, September 7

The government has reduced the LPG refill booking gap for rural consumers from 45 days to 25 days, bringing it in line with the rule for urban households, Union Minister Suresh Gopi said on Monday. The Petroleum Ministry, in a September 7 letter to Indian Oil Corporation Ltd (IOCL), Bharat Petroleum Corporation Ltd (BPCL) and Hindustan Petroleum Corporation Ltd (HPCL), directed the oil marketing companies (OMCs) to implement the

revised interval with immediate effect. Gopi, Minister of State for Petroleum and Natural Gas and Tourism, said the earlier 25-day urban and 45-day rural limits had been introduced in March as a temporary demand-management measure amid LPG supply pressures linked to the Middle East conflict. The ministry said supplies have since improved and refill backlogs have fallen considerably. "Now, all domestic LPG consumers, regardless of urban or rural, can book refills at an interval of 25 days," Gopi said in a Facebook post.

Nepal: Death toll surges to 1,356

Rescue efforts continue; nearly 5,000 still missing

MPOST BUREAU

Kathmandu, September 7

The death toll from the flash floods that devastated parts of Nepal rose to 1,356 on Monday, 13 days after an ice-rock avalanche near the Nepal-Tibet border triggered the disaster. Rescue teams were still searching for 4,994 people, including at least 589 foreign nationals, while 13,396 people have been rescued, according to the National Disaster Risk Reduction and Management Authority (NDRRMA).

12 pilgrims killed in road accident in UP

BISWAJEET BANERJEE
Baghpat, September 7

Twelve pilgrims, including three children and three women, were killed and more than 19 others injured when a speeding truck rammed into a pickup van carrying 32 pilgrims on the Eastern Peripheral Expressway in Baghpat in the wee hours of Monday.

The victims, six men, three women and three children, were returning to Badaun from Bagad Dham, also known as Gogamedi, in Rajasthan, when the accident occurred around 1 am between Basi and Bada Gaon in the Khekra police station

THE SOUND OF THE CRASH BROUGHT LOCAL RESIDENTS RUSHING TO THE SITE

area, about 15 km from the district headquarters.

According to eyewitnesses, the speeding tanker struck the pickup from behind. The impact sent the vehicle crashing into the divider before it overturned in the middle of the expressway. The collision was so severe that bodies were thrown and scattered up to nearly 30 metres from the spot.

LUCKNOW TOPS RANKINGS

Delhi beats B'luru, Srinagar in clean air

MPOST BUREAU

New Delhi, September 7

Delhi, a city that continues to struggle with some of India's worst air pollution during winter, has climbed to the 21st position in the Centre's Swachh Vayu Sarvekshan 2026, ranking ahead of cities such as Bengaluru, Srinagar, Mumbai, Chennai and Kolkata. The latest survey, released by the Union Environment Ministry on Monday, recognises cities for their pollution control measures and implementation under the National Clean Air Programme (NCAP), rather than ranking them by current air quality levels. Uttar Pradesh's Lucknow secured the top position among cities with popula-

- » Indore finished second with 197 points
- » Jabalpur secured third place with 195 points
- » Bhopal and Agra shared fourth with 192 points
- » Delhi shared 21st position with Visakhapatnam
- » Srinagar ranked 26th with 162.6 points
- » Bengaluru stood 32nd with 152.6 points
- » Patna ranked 16th with 178 points
- » Mumbai finished 28th with 160.8 points
- » Chennai ranked 35th with 147.7 points
- » Kolkata stood 38th with 142.2 points

tions above 10 lakh.

The fifth edition of the Swachh Vayu Sarvekshan assessed 130 NCAP cities across three population categories. The evaluation was carried out through self-assessments by cities, scrutiny by state-level monitoring committees, review by the Central Pollution Control Board, and field verification by inde-

pendent teams.

Lucknow topped the million-plus city category with 198 points, narrowly ahead of Indore, which scored second after leading the rankings last year. Jabalpur finished third with 195 points, while Bhopal and Agra shared fourth place with 192 points each.

Delhi scored 172 points and shared the 21st rank

with Visakhapatnam. Patna performed better than the national capital, finishing 16th with 178 points, while Hyderabad ranked 19th. Delhi also placed above Srinagar, which ranked 26th with 162.6 points, Mumbai at 28th with 160.8 points, Bengaluru at 32nd with 152.6 points, Chennai at 35th with 147.7 points, and Kolkata at 38th

L-G DIRECTS INSPECTION OF PG HUBS, STRUCTURAL AUDITS WITHIN WEEK

After Satya Niketan collapse, Delhi turns to PG safety

AIMAN FATIMA
New Delhi, September 7

The Satya Niketan building collapse has widened into a city-wide scrutiny of Delhi's unsafe paying guest (PG) accommodations, with the government now turning its focus from rescue operations to structural safety, illegal construction and the acute shortage of student housing as well. Five senior MCD officials were suspended on Monday, while Lieutenant Governor Sardar Taranjit Singh Sandhu directed structural audits of buildings in PG hubs within a week.

Chief Minister Rekha Gupta, who visited the site again on Monday, ordered a magisterial inquiry and said no negligence compromising public safety would be tolerated. "Any situation related to buildings or construction work that could compromise people's safety would not be overlooked," she said, adding that action would be taken against any other officials found responsible.

Gupta said preliminary information indicated that pillars of the old building had weakened and collapsed after water accumulated in the basement. She said "around 80 per cent of the debris had been cleared, with only basement rubble remaining, and that water accumulation combined with repair work on the old structure had led to the collapse. Twelve people had been recovered, she said, with seven dead and six stable."

At a meeting chaired by the L-G, Gupta and Urban Development Minister Ashish Sood, it was

decided that buildings in PG hubs would undergo structural audits, particularly premises that prima facie violate height and floor restrictions. Sandhu, however, cautioned against indiscriminate sealing, saying it could leave students homeless.

Sood will lead a committee to review institutional PG guidelines, explore alternative accommodation through universities, MCD and DDA, and assess the feasibility of using vacant or underutilised DDA and MCD buildings and DDA housing stock for students.

A committee of the DM, DCP and MCD Deputy Commissioner will proactively reach out to PG students, hear their grievances and

prepare a comprehensive database. The committee will also work on a mid- and long-term plan to bridge Delhi's shortage of student accommodation.

Gupta said a new policy would mandate periodic structural audits and safety certification for PGs, nursing homes, schools and other buildings used for public activities. No public activity would be permitted without safety certification.

The CM also asked MPs, MLAs and councillors to identify and report ongoing illegal construction, promising demolition and monitoring by the CMO and concerned departments.

Iron jacks have been installed to support buildings near the collapse site.

Plan afoot to audit 50+ year-old DDA buildings

NARESH BISWANI
New Delhi, September 7

Union Housing and Urban Affairs Minister Manohar Lal Khattar on Monday expressed his anguish over the tragic incident in Delhi's Satya Niketan and said that the government is thinking of a plan for conducting a safety audit of all buildings under the Delhi Development Authority (DDA) that are more than 50 years old.

Calling the incident 'heart-wrenching', Khattar said that measures must be taken to make sure that such incidents do not take place in the future and added that the Municipal Corporation of Delhi (MCD) must also take suitable action at its level.

"The incident that took place in Satya Niketan yesterday has caused immense sorrow. To make sure that such incidents don't take place in future, the MCD should also work at its level," Khattar said.

The Ministry of Housing and Urban Affairs, he said, is contemplating a framework wherein all the DDA buildings that are more than 50 years old will have to go through a detailed safety audit.

Khattar added that there should also be a mechanism put in place for conducting periodical safety audit of the buildings – at intervals of 10 years, five years and three years, depending on their age.

A life cut short, plans left behind..

PRESS TRUST OF INDIA
New Delhi, September 7

A mother waiting for him to walk through the door, a friend holding on to a plan to attend a concert with him... But Arpit has gone, killed in a building collapse in south Delhi, leaving behind plans that never will be and fragments of a life cut cruelly short.

The building, which housed a boys' paying guest accommodation in Satya Niketan area near Delhi University's South Campus, collapsed around 1.30 pm on Sunday while repair work was underway. Twelve people were rescued from the debris, of whom seven died.

Arpit (19), a second-year student of DU's Atma Ram Sanatan Dharm College, had returned to Delhi from his home in Madhya Pradesh on Sunday morning after spending Raksha-bandhan with his family. His last conversation with his mother, who was later admitted to AIIMS after losing consciousness, was around 12.30 pm.

Every call that followed went unanswered.

For Arpit's mother, the tragedy is still impossible to comprehend.

The moment she saw her 19-year-old son's body, she collapsed and lost consciousness. She had to be admitted to AIIMS. Even

after she woke up, she remained overwhelmed by shock, unable to believe that her son was gone.

Crying inconsolably, she kept repeating that she would not eat until Arpit came home and fed her with his own hands – holding on to the smallest, most ordinary ritual of their lives as if it could somehow make his absence untrue.

Days earlier, she had tried to keep him from returning to Delhi after Rakshabandhan, gripped by a fear that something might happen to him.

"At the railway station, his sister sneezed, which I considered an ominous sign, and I told him not to

travel. But he insisted that his ticket was confirmed and that his classes were also about to start," she said.

He left despite her pleas. The decision has now left her grappling with guilt. "Why did I let him come to Delhi? I had a feeling that something bad would happen," she said, breaking down.

For his friend Sanskar (20), who had been studying in the same class as Arpit for the past one-and-a-half years, the news was difficult to comprehend. Arpit had told him after boarding the train on Saturday evening that he was on his way back to Delhi.

NDRF personnel watch as an excavator clears debris during search and rescue operations, on Monday

Box-like rooms, steep rents: How students survive in cramped PG maze

OUR CORRESPONDENT
New Delhi, September 7

For students arriving in the national capital from across the country, Satya Niketan's proximity to Delhi University's South Campus makes it an easy place to look for a home, even when the room, food and facilities fall short.

The five-storey building that collapsed in south Delhi's Satya Niketan on Sunday, killing seven people, housed a boys' PG. Its collapse has left students living in the neighbourhood in a state of uncertainty about the buildings around them, but also about why so many of

them end up living in PGs in the first place.

For most freshers, Satya Niketan is one of the first places they hear about when they start looking for accommodation near South Campus. The lanes are full of PGs, messes, shops and cafes, and the metro station and colleges are within easy reach. With hostel accommodation unavailable at several colleges and limited even where it exists, students often have little room to be selective.

Roshan Pal, 18, a first-year student of Deen Dayal Upadhyaya College from Lucknow, had gone out with friends for ice cream

Neighbours look on during a rescue operation

around 1.10 pm on Sunday when they saw people running through the lane.

"We thought there was some fight or mob because the elections are coming

up. We saw people running frantically and, within seconds, we saw a huge cloud of smoke spreading heavily. Then we realised a building had collapsed. I

called the police myself," Roshan said.

He said that until around 1.30 pm, personnel from the South Campus police post were the only police personnel he saw at the spot. Students and locals had also rushed towards the building.

The accommodation available to students comes at sharply different prices.

A bed in a triple- or four-sharing room without a balcony and with little or no ventilation costs around Rs 10,000-Rs 12,000, students said. A double-sharing room with better ventilation or a balcony costs around Rs 15,000 or more, while a single room

can cost Rs 25,000.

"I am from Lucknow, and I pay around Rs 15,000 for a shared room. But even a room without proper ventilation or a balcony can cost Rs 10,000 to Rs 12,000. If you want a single room, it can go up to Rs 25,000. You keep paying more for a little more space or a balcony," Roshan said.

He said the buildings can look very different when students first come to see them.

"Every academic session, PG buildings are repainted. When parents come to see the place, the building looks new and well maintained. If there

is a balcony or some ventilation, you naturally get attracted to that room. You think, 'This is a good place.' But after you start living there, you find that the fridge does not cool properly, the induction does not work, and the washing machine may not work," Roshan said. For students sharing rooms, even small problems become difficult to escape.

"The rooms are so small. Three people can be living in a room, and sometimes six people are staying in spaces where there should not be that many people. You are studying, sleeping and keeping all your things in the same

small space," said Abhinav Raman Sinha, 18, a first-year student of Atma Ram Sanatan Dharma College from Uttarakhand.

Ventilation is one of the things students said they end up paying more for.

"If you do not keep an alarm, sometimes you would not even know whether it is day or night. There is barely any ventilation in some rooms. The rooms with balconies cost more, so even air and light become something you have to consider when you are deciding what you can afford," another student said.

The same goes for basic services.

'VANDALISE' CIVIC CENTRE ABVP wants MCD commissioner out

OUR CORRESPONDENT
New Delhi, September 7

The Akhil Bharatiya Vidyarthi Parishad (ABVP) demanded the resignation of the MCD commissioner over the Satya Niketan building collapse, as its members allegedly vandalised parts of the civic centre during a protest, officials said.

According to the police, around 150 to 200 ABVP members gathered at the MCD headquarters on Sunday to protest against the functioning of the civic body following the building collapse, which resulted in seven deaths and several injuries.

Officials said the protesters entered the civic centre through gate No 5 and staged a demonstration outside the main building, raising slogans and demanding accountability from the

MCD. During the protest, some demonstrators allegedly vandalised parts of the MCD office and attempted to force their way into the main civic centre building. This led to a confrontation between the protesters and police personnel, according to a senior police officer.

Police detained around 15 students and took them to the Kamla Market police station, where action under the Delhi Police Act was initiated, the officer said.

The remaining protesters were subsequently dispersed, and the situation was brought under control, police said.

The ABVP, supported by the RSS and BJP, is one of the largest student organisations and political groups in the country. It currently holds three key positions in the Delhi University Students' Union (DUSU), including the presidency.

Ageing buildings, is Delhi prepared for disaster?

AIMAN FATIMA
New Delhi, September 7

The Satya Niketan building collapse has left students and residents worried not only about Delhi's ageing and vulnerable structures but also about the city's preparedness to respond when disaster strikes. Residents have complained of delays in the arrival and mobilisation of police and rescue teams, inadequate heavy machinery and lengthy operations even at relatively small sites, raising concerns over emergency management and coordination.

For residents, the concern is not limited to the condition of one old building. They say the incident has exposed a larger gap in Delhi's disaster preparedness, particularly in densely populated student areas where old residential structures have gradually been converted into PGs and hostels. Satya Niketan's narrow and congested lanes also posed a major chal-

lenge for the movement of cranes and other heavy equipment.

In the immediate aftermath, it was students and local residents who joined the rescue effort, with many rushing to the site before heavy machinery could be brought in. They formed a human chain to pass smaller pieces of rubble from one person to another and removed bricks, concrete pieces, broken pipes and other debris with their bare hands. Residents also moved parked vehicles to make way for rescue teams and machinery.

"We removed the rubble with our own hands. The local police also arrived soon after being informed, but the cranes took some time to reach the spot," a resident, Preeti Sinha said, pointing to the difficulties created by the narrow lanes.

Another resident said people did not wait for formal instructions before helping. "Students from

around the area immediately came out. Nobody was standing there waiting to be told what to do. People just started helping," he said.

The human chain continued even after cranes and professional rescue teams arrived, with residents helping clear smaller debris that could not easily be shifted mechanically. In some instances, locals reportedly arranged oxygen

cylinders and attempted to get oxygen through gaps in the rubble for those trapped underneath.

The narrow lanes also meant that getting cranes close to the collapsed structure was difficult. More than five cranes were eventually pressed into service, while NDRF and Delhi Fire Service teams worked through the night. The rescue became particularly complicated

because removing debris too quickly risked weakening the adjoining building.

Students said the collapse had created an atmosphere of fear in the locality. Delhi University student Pranit Singh said, "People witnessed the collapse with their own eyes, so they are deeply traumatised and terrified, and they do not want to stay here for the next few days." She said many students were leaving for relatives' homes while colleges had opened their doors to provide shelter.

NSUI president Vinod Jakhar alleged a major failure in the rescue operation and questioned the preparedness of authorities to deal with such incidents. He alleged that the system had failed due to a lack of disaster planning, management, equipment and a proper rescue team.

Residents also pointed to what they described as a recurring pattern of reactive governance, inspections, enforcement and

announcements gaining momentum only after a tragedy. "The government wakes up when something happens. The real work should be done before an accident, not after people are trapped under debris," another local resident said.

The incident has now prompted the Delhi government to announce wider preventive measures. Chief Minister Rekha Gupta has said periodic structural audits and safety certification will be made mandatory for buildings used for public activities, including PGs, schools and nursing homes. Buildings violating safety norms can face sealing. Five senior MCD officials have been suspended, while L-G Sardar Taranjit Singh Sandhu has ordered structural audits in PG hubs within a week. The administration has also directed action against ongoing illegal construction and installed iron jacks to support vulnerable buildings near the site.

India, B'desh agree to work with 'forward-looking approach'

PRESS TRUST OF INDIA
Dhaka, September 7

India and Bangladesh on Monday discussed a wide range of topics in bilateral ties and agreed to “work together with a forward-looking approach, based on mutual trust and mutual benefit.”

Indian High Commissioner to Bangladesh Dinesh Trivedi met the Prime Minister’s adviser Md Ismail Jabiullah here and discussed people-to-people ties between the two countries.

“People-to-people relations form the foundation of bilateral relations, and emphasis was placed on this matter in the discussions,” the Indian High Commission posted on X.

The Indian mission said that the two diplomats discussed a wide range of issues concerning India-Bangladesh relations. “Optimism was expressed that the two sovereign countries will continue to work together with a forward-looking approach, based on mutual trust and mutual benefit,” it said.

Trivedi also met Bangladesh’s Minister of Environment, Forest and Climate Change, Abdul Awal Minto, and State Minister Shaikh Faridul Islam.

OUR CORRESPONDENT
Patna, September 7

Around 29.13 lakh people have been affected by floods in Bihar as overflowing rivers inundated large swathes in 13 districts, officials said on Monday.

Chief Minister Samrat Choudhary, who inspected community kitchens in relief camps for flood victims in Vaishali and Saran, directed officials to ensure prompt relief and rescue operations.

Officials said 190 community kitchens are being run in various flood-hit districts, while 1,429 boats have been pressed into service for relief and rescue operations.

The CM and his deputy Vijay Kumar Choudhary inspected some community kitchens, and directed the local authorities to continuously monitor river embankments and keep a close watch on vulnerable areas. Samrat Choudhary, later in a social media post, said, “I stand with the people through every challenge and at every step. I visited flood-affected areas of Vaishali and Saran and inspected relief camps in Hajipur and Sonpur, where

People waded through a flooded road following a rise in the water level of the Gandak river, in Hajipur, Bihar PTI

KEY POINTS

- » Financial assistance was provided to the disaster victims, while affected farmers will receive due compensation for crop losses, CM said
- » Fed by heavy rainfall, rivers have swollen and inundated villages in 13 districts, affecting 29.13 lakh people, officials said

I interacted with residents, reviewed arrangements, served food and shared a meal with them.”

Financial assistance was provided to the disas-

ter victims, while affected farmers will receive due compensation for crop losses, he said, adding that every effort will be made to ensure public safety and effective relief operations.

Authorities have already sounded an alert in downstream areas of the Ganga after the river touched its highest flood mark at Gandhi Ghat and Hathidah in Patna.

Fed by heavy rainfall,

rivers have swollen and inundated villages in 13 districts, affecting 29.13 lakh people, officials said.

The state received 75.9 mm of rain in September to date, which is 45 per cent above the normal.

Engineers have been asked to keep resources and machinery ready, while people in flood-prone areas have been advised to avoid going near rivers, they said.

EAM Jaishankar chairs meeting of Consultative Committee

On India’s relations with West Asia

OUR CORRESPONDENT
New Delhi, September 7

External Affairs minister S Jaishankar on Monday chaired a meeting of the Consultative Committee on India’s relations with West Asia and told MPs that the country is advancing its trade and connectivity amidst the ongoing conflict in the region.

“Highlighted India’s close ties with the Gulf and WANA region, including our longstanding partnerships and cooperation in trade, investments, energy, maritime and people to people domains.

“Also underscored our efforts towards welfare of 10 million Indians, as well as ensuring energy and fertiliser security, and advancing our trade and connectivity amidst the ongoing conflict in the region,” Jaishankar said in a post on X, while sharing pictures of the Consultative Committee meet-

ing with the MPs.

Sources said several MPs raised the issue of the West Asia war and India’s energy requirements, with the minister saying New Delhi is diversifying its energy supply chain even while the crisis is on.

Jaishankar told the meeting that India is the only country that has good ties with both the United States and Iran, the sources said, adding that he talked about securing the safety of 10 million (one crore) Indians in the Gulf region.

From page 1

Rescue ops

Municipal Corporation of Delhi (MCD) into the circumstances that led to the building’s failure.

Chief Minister Rekha Gupta visited the site for a second time on Monday and warned that officials found responsible would face strict action. Within hours, the MCD suspended five of its officials from the South Zone, including deputy commissioner Rakesh Kumar, superintending engineer Ranvir Singh, executive engineer Lalit Kumar Goel, assistant engineer Sunil Chauhan and junior engineer Ashish Kumar. Gupta also directed officials to seal every five-storey structure in the city as a precaution.

Delhi Lieutenant Governor Taranjit Singh Sandhu chaired a separate meeting with Gupta and senior officers, calling for strict enforcement against unsafe buildings and better use of the emergency mechanism under the Delhi Disaster Management Authority. He said he had asked Urban Development Minister Ashish Sood to head a committee that will look into alternative housing for students, including the possible use of vacant DDA housing stock. Sandhu also ordered inspection drives across PG hubs in the city, particularly buildings suspected of violating height and floor limits. Separately, the MCD ordered the owner of a building next to the collapsed one to demolish it within three days after inspectors found it to be in a dangerous condition.

The five students who died were identified as Abhishek, 20, of Sonebhadra in Uttar Pradesh; Yuvraj Soni, 20, of Durg in Chhattisgarh; Pawan, 17, of Auraiya in Uttar Pradesh; Arpit Jahaj, 19, of Dewas in Madhya Pradesh; and Akshat Singh Yadav, 18, of Katni in Madhya Pradesh. Surinder Singh, 75, a labourer, also died, along with one person who remains unidentified. Two of the deceased students reportedly donated their corneas. The five injured, three of whom remain in critical condition at AIIMS, were identified as Asgar Ali, 30, Neeraj Bawa, 19, Aditya Kumar, 19, Nitish Chib, 19, and Md Ayan, 18.

At the AIIMS trauma centre, grieving families searched for information about their loved ones. One mother said she had

checked five or six PGs in the area before choosing this one for her son because it had an air conditioner and washing machine, so he could focus on his studies. She later identified his body through a mole on his neck and a birthmark on his leg.

The collapse has renewed scrutiny of student housing conditions in areas like Satya Niketan, where many say they pay between Rs 15,000 and Rs 30,000 a month, sometimes more, for cramped rooms shared between two people, often without clean drinking water or basic upkeep. A Public Interest Litigation has since been filed in the Delhi High Court by law student Aniket Kumar Gupta, seeking Rs 1 crore compensation for victims’ families, medical aid for the injured, safe relocation of students from unsafe accommodations, and a structural audit of hostels and PGs across areas including Mukherjee Nagar, Karol Bagh, Old Rajendra Nagar and Laxmi Nagar. The plea, mentioned before a bench led by Chief Justice D K Upadhyaya, also calls for an independent commission to investigate the collapse and recommend action against those found responsible.

Meanwhile, the tragedy has also triggered political sparring, with the BJP and AAP trading accusations over misplaced priorities even as the city continues to reckon with the human cost of the collapse.

DAC clears

their exposure to such threats.

The HMVs will support troop movement and logistics in difficult terrain, while the self-propelled mechanical mine layers will improve the Army’s ability to lay mines quickly, including in challenging operational environments.

The ALHs will support complex missions across different terrains and operational situations, including troop movement, logistics and surveillance. The trawl tanks and Sarvatra bridge system will help fighting formations create composite crossings during operations in varied terrain, improving their ability to move across obstacles.

For the Navy, the DAC approved the acquisition of Arudhra radars as well as the design and development, followed by procurement, of Marine Gas Turbines (MGTS).

The Arudhra systems will replace existing Air Route Surveillance Radars at various Naval

Air Stations, strengthening air surveillance and air traffic control capabilities. The MGT project is focused on developing an indigenous warship propulsion capability. Marine gas turbines are an important component of modern warships, and domestic development is expected to reduce the Navy’s dependence on foreign suppliers.

The Air Force also received approvals for projects intended to improve the war-fighting capability of fighter aircraft, transport planes and helicopters. Among the systems cleared is the Ground-Based Multi-Purpose Jammer (GBMPJ), which will provide jamming capability against adversary radars and strengthen electronic warfare operations.

The council also approved the Defence Forces Secure Access Card (DEFSAC) system. Based on Radio Frequency Identification (RFID) technology, the smart card system will replace paper-based identity cards, passes and permits currently used by defence personnel.

The Ministry said approximately 98 per cent of the total procurements covered by the latest round of AoNs will be made from Indian industry. The decision comes as the government continues to push for greater domestic design, development and manufacturing in defence.

However, the AoNs do not represent final contracts. They begin the procurement process, which is followed by steps such as the issuance of Requests for Proposals, technical and commercial evaluation, negotiations and eventual contract signing.

The latest approvals therefore cover both immediate military requirements and projects aimed at building domestic capabilities in areas such as surveillance, mobility, electronic warfare, propulsion and secure access systems.

Nepal

the Himalayan border region, destroying homes, vehicles, roads and bridges and damaging hydropower projects across northern and central Nepal. At least 43 people were also killed on the Chinese side, while more than 500 remained missing in Tibet, Chinese media reported.

NDRRMA said 363 bodies were recovered in Chitwan, 223 in Nawalparasi East, 221 in Nawalparasi West, 197 in Nuwakot, 169 in Rasuwa, 75 in Gorkha, 70 in Dhading and 38 in Tanahu.

Only 98 bodies had been identified and handed over to families.

Police said many recovered remains were severely decomposed, damaged or incomplete, complicating identification. DNA samples are being collected from relatives of missing people, while more than 1,000 unidentified bodies have been buried after samples were taken for future identification. Hospitals have struggled to manage the remains as families continue visiting with photographs of missing relatives.

President Ramchandra Paudel visited Nuwakot and Rasuwa on Monday and reviewed rescue, relief and rehabilitation efforts. He called for international action on climate justice and urged Nepal’s political parties and citizens to work together.

September 7 was observed as a national day of mourning, with flags flown at half-mast. “India stands with Nepal in this difficult time,” the Indian Embassy said.

About 3,500 displaced people were staying in government holding centres, while others had taken shelter in schools, temples, offices and tents. Security personnel are conducting round-the-clock searches, including for 121 people believed trapped in hydropower tunnels. Teams from India and China are assisting, along with Australian tunnel expert Arnold Dix.

12 pilgrims

The sound of the crash brought local residents rushing to the site. Amid screams and chaos, they pulled injured passengers from the expressway and moved them to the roadside before police arrived. All the injured were subsequently taken to the district hospital for treatment.

An injured passenger, Kunwar Pal, said the group belonged to Allapur Chamari village in Badaun and had been returning after visiting Bagad Dham.

“We were sleeping in the vehicle when there was suddenly a loud impact and the vehicle overturned,” he said, adding that the driver later told them that a vehicle approaching from behind had hit the pickup.

The accident has raised questions over the circumstances in which such a large number of passengers were travelling in the pickup and the speed of the vehicles involved. Police are investigating the exact cause of the crash.

Chief Minister Yogi Aditya-

nath expressed grief over the loss of lives and directed the administration to provide Rs 2 lakh each to the families of those killed and Rs 50,000 each to the injured as financial assistance.

Baghpat District Magistrate Asmita Lal and Superintendent of Police Suraj Rai reached the district hospital after receiving information about the accident. They met the injured and directed health officials to ensure proper treatment.

Officials said the families of the deceased and injured have been informed by telephone.

Bagad Dham, or Gogamedi, in Rajasthan’s Hanumangarh district, is an important pilgrimage centre in north India and is associated with Jaharveer Baba Goga Ji Maharaj, also known as Goga Nath. Thousands of devotees visit the shrine, particularly during August and September.

Delhi beats

with 142.2 points.

The survey measures cities on actions taken to improve air quality, including road dust control, solid waste management, management of construction and demolition waste, reduction of vehicular and industrial emissions, and public awareness campaigns. This means a city can rank higher if it has shown stronger implementation of pollution control measures, even if its air remains heavily polluted.

Delhi’s rise is notable because its air quality remains poor. The capital’s Air Quality Index frequently crosses 400 during winter, entering the “severe” category, and at times exceeds 450. In January 2026, authorities activated Stage IV of the Graded Response Action Plan after pollution levels reached the highest category.

The ministry said 2025 was Delhi’s best year for particulate pollution since 2018, excluding the Covid-affected year of 2020. Even then, the city’s annual average PM10 concentration stood at 198 micrograms per cubic metre and PM2.5 at 97 micrograms per cubic metre, both well above India’s annual standards of 60 and 40 micrograms per cubic metre, respectively.

Delhi had ranked 32nd in the 2025 edition of the survey with a score of 157.3, making this year’s performance a significant improvement in terms of implementation.

In the category of cities with populations between 3 lakh and 10 lakh, Rourkela in Odisha secured the top position. Firoz-

abad in Uttar Pradesh and Guntur in Andhra Pradesh shared second place, while Amravati in Maharashtra finished third. At the lower end of this category were Gaya, Gulbarga, and Jalandhar.

Among cities with populations below 3 lakh, Odisha dominated the rankings. Kalinga Nagar topped the list, followed by Angul and Talcher. The lowest-ranked cities in this category were Kohima, Dera Bassi, and Bynrihat.

Speaking at the awards ceremony, former Calcutta High Court Chief Justice Prakash Shrivastava said, “The awardees have shown that clean air is not an aspiration but a practical goal that can be achieved with proper planning and ground-level implementation.” He added that development and environmental conservation can progress together while improving citizens’ quality of life.

The ministry also released a Compendium of Best Management Practices under NCAP, documenting successful measures adopted by cities and state pollution control boards in controlling road dust, industrial emissions, vehicular pollution, and waste management.

According to the ministry, 108 of the 130 NCAP cities recorded lower PM10 levels in 2025-26 compared with the 2017-18 baseline. Of these, 72 cities reduced PM10 concentrations by more than 20 per cent, 26 cities achieved reductions above 40 per cent, and 14 cities met the National Ambient Air Quality Standards.

National Film

Formerly known as Kevadia, Ekta Nagar is home to the 597-foot Statue of Unity, the world’s tallest statue of Sardar Vallabhbhai Patel. Prime Minister Narendra Modi inaugurated the monument in 2018.

The first National Awards ceremony was held at Delhi’s Vigyan Bhawan in 1954, and the venue hosted most subsequent ceremonies. The 72nd edition, announced in July, marks a break from that tradition.

“Article 370” has won Best Feature Film, while Yami Gautam was named Best Actress. Mammooty and Kartik Aaryan will share Best Actor for “Bramayugam” and “Chandu Champion”.

Randeep Hooda won Best Debut Director for “Swatantrya Veer Savarkar”. “Kalki 2898 AD” won Best Popular Film, while

“Captain Miller” was named best feature film promoting National, Social and Environmental Values.

Aravalli panel

A bench headed by Chief Justice of India Surya Kant and comprising Justices Joydip Bagchi and V Mohana asked the panel to submit issue-specific interim reports to help the court address urgent questions. The CJJ warned that the committee could be reconstituted if it failed to meet the deadline. “Let the panel work day and night to submit a report on the Aravalli issue,” he said, adding that if it could not do so in two months, “we will reconstitute the whole panel.”

The court also directed the committee to hear all stakeholders, including tribal communities in Rajasthan and Gujarat.

The HPC, constituted on May 25, had sought time until February 28, 2027, saying it needed to combine spatial, ecological, geological, hydrological, socio-economic and stakeholder evidence for a “comprehensive and defensible” assessment. Its earlier deadline was August 31.

The committee is reviewing the Centre’s report after the court’s November 20, 2025 ruling adopted a 100-metre elevation test for Aravalli Hills and a 500-metre proximity criterion for the Range. The ruling was stayed on December 29 amid concerns that over 90% of the region could lose protection.

JLR

The company said the savings will help lower its breakeven point towards 300,000 units. The proposed cuts are not expected to affect direct manufacturing jobs and will be carried out through voluntary measures wherever possible.

JLR CEO P B Balaji said the programme would mainly affect salaried and management staff in the UK, with limited impact possible in other locations. The company did not specify the likely impact on its India operations.

“Over the next 12 months, we will launch five new products,” Balaji said, adding that JLR would focus on North America and other markets to target double-digit revenue growth.

The company plans to invest £15-18 billion over five years in electrification, digital technologies, advanced manufacturing and customer experience.

BRICS
INDIA 2026
BUILDING FOR RESILIENCE, INNOVATION,
COOPERATION AND SUSTAINABILITY

International Heads of
State, Dignitaries and
Global Delegates

 11 - 13 Sept., 2026

 Bharat Mandapam, New Delhi

 **Diversion Points: 22**

 **Controlled Roads: 35+**

 **Elaborate vehicular regulations in force**

To ensure seamless movement for VIP convoys and minimize public inconvenience, dedicated traffic regulations and diversions will be in effect, primarily across the New Delhi District and surrounding corridors

01 **ROADS TO AVOID
CONTROLLED AREA**

Motorists should not plan routes through the following roads for the duration of the Summit. A detailed map is issued alongside the official notice.

Mathura Road	Brig. Hoshiyar Singh Marg
(Subramaniam Bharti Marg	Shanti Path
T-Pt - Lodhi Rd Flyover)	Sher Shah Suri Marg
Tees January Marg	Dr. Zakir Hussain Marg
Janpath	Tilak Marg
Satya Marg	San Martin Marg
Prithvi Raj Road	Rajesh Pilot Marg
Firoze Shah Road	Akbar Road
Ashoka Road	Sardar Patel Marg
Tughlak Road	APJ Abdul Kalam Road
Neela Gumbad	Kautilya Marg
Panchsheel Marg	Bhagwan Das Road
Subramaniam Bharti Marg	Kemal Atatürk Marg
Mother Teresa Crescent	Kartavya Path
Teen Murti Marg	Purana Quila Road
Africa Avenue (Bhikaji Cama	Safdarjung Road
Place - Yashwant Place)	Nyaya Marg
'C' Hexagon	

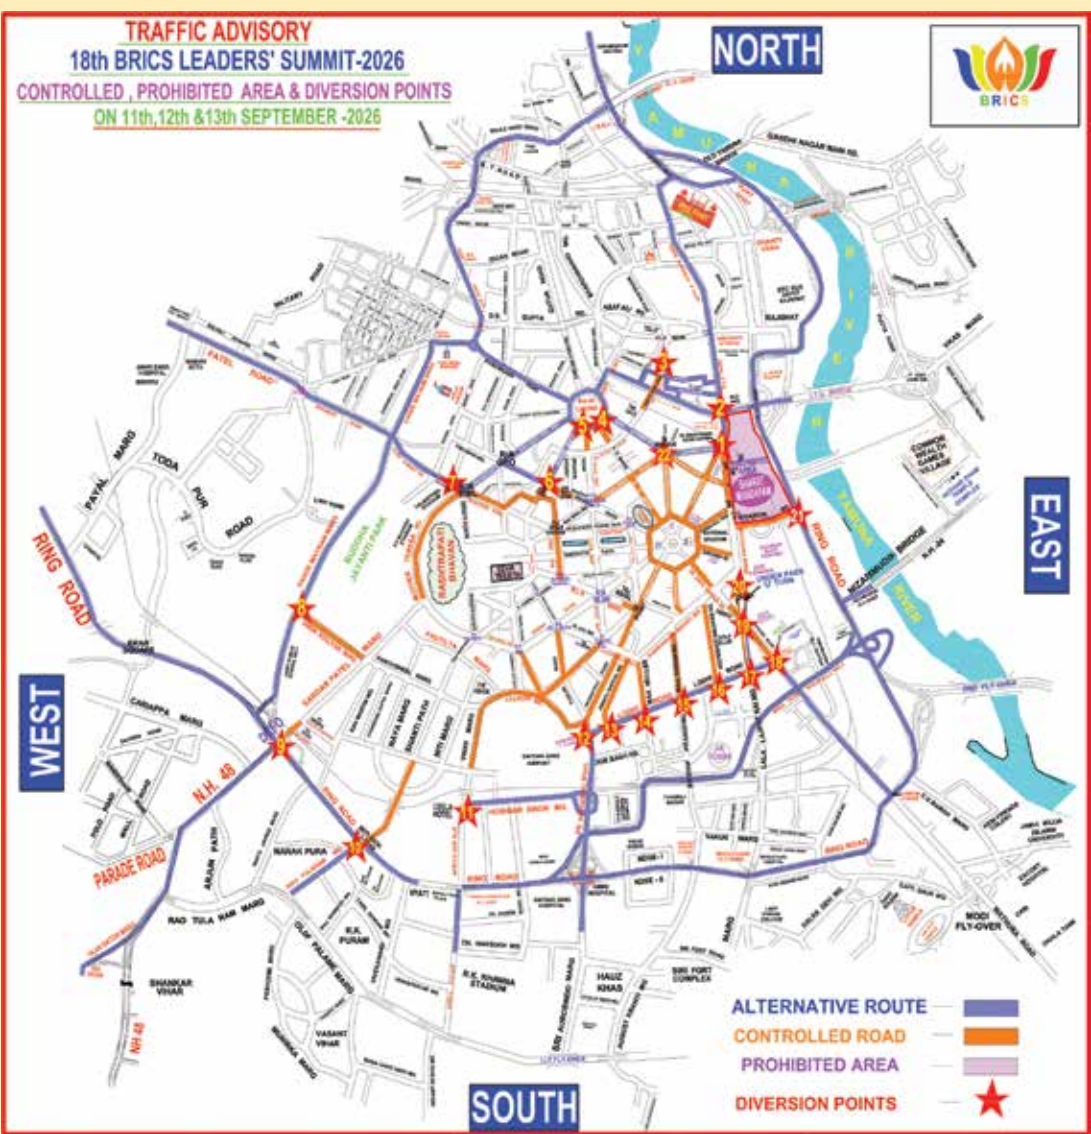

02 **SUGGESTED ROUTES
RAILWAY STATIONS**

■ NEW DELHI RAILWAY STATION
Route A: ISBT Kashmiri Gate → Boulevard Road → Rani Jhansi Marg → DBG Road → Panchkuan Road → Outer Circle, Connaught Place
Route B: Ashram Chowk → Ring Road → Raj Ghat → JLN Marg
Route C: Vande Matram Marg → Dr. Ambedkar Marg → Panchkuan Road → Outer Circle, Connaught Place

■ OLD DELHI RAILWAY STATION
Route A: ISBT Kashmiri Gate → Ring Road → Hanuman Mandir → S.P. Mukherjee Marg
Route B: Ashram Chowk → Ring Road → Raj Ghat → Ring Road → Hanuman Mandir → S.P. Mukherjee Marg
Route C: Vande Matram Marg → Dr. Ambedkar Marg

→ Rani Jhansi Marg → Rani Jhansi Flyover → Boulevard Road → Lothiyan Marg
■ HAZRAT NIZAMUDDIN RAILWAY STATION
Route A: AIIMS → Ring Road → Ashram Chowk → Mathura Road
Route B: ISBT Kashmiri Gate → Ring Road → Raj Ghat → Ring Road → Ashram Chowk → Mathura Road

03 **SUGGESTED ROUTES
AIRPORT**

METRO STRONGLY RECOMMENDED: Motorists are advised to travel to Airport Terminals via Metro services in view of traffic regulations.

- FROM GURUGRAM**
 - T3 / T4 / T2:** NH-48 → Rao Gajraj Singh Marg → Old Delhi Gurugram Road → UER II → Service Road → T3 Terminal Road
 - T1:** NH-48 → under Mahipalpur Flyover → T-3 Road
 - T1:** NH-48 → Mahipalpur Flyover → NH-48 → Ulaanbaatar Marg → T-1 Road
- FROM DWARKA**
 - T3/T4/T2/T1:** Sector-22, Dwarka Road → UER II (New Tunnel to T3)
- FROM NEW DELHI & SOUTH DELHI**
 - T3:** Ring Road → AIIMS Chowk → Moti Bagh Chowk → RTR Marg → Under Shankar Vihar Flyover → Sanjay T-Point → Service Road → NH-48 → Under Mahipalpur Flyover Rangpuri → T-3 Road.
 - T3 / T4 / T2 / T1:** AIIMS Chowk → Ring Road → Moti Bagh Chowk → RTR Marg → Shankar Vihar Flyover → Ulaanbaatar Marg
- FROM WEST DELHI**
 - T3/T4/T2/T1:** Punjabi Bagh Chowk → Ring Road → Raja Garden Chowk → Najafgarh Road → Pankha Road → Dabri → Dwarka Road → Road No. 224, Dabri-Gurugram Road → Sector-22, Dwarka Road → UER-II → Service Road NH-48 → T3 Terminal Road.
- FROM NORTH & EAST DELHI**
 - T3/T4/T2/T1:** ISBT Kashmiri Gate → Rani Jhansi Flyover → Rohtak Road → Punjabi Bagh Chowk → Raja Garden Chowk → Najafgarh Road → Pankha Road → Dabri → Dwarka Road → Road No. 224, Dabri-Gurugram Road → Sector-22, Dwarka Road → UER-II → Service Road NH-48 → T3 Terminal Road

04 **TRANSPORT
SERVICES**

- BUS:** Necessary diversions may be given during VVIP movements.
- METRO:** Available for commuters at all stations without disruption.
- TSRs / TAXIS:** No roadside parking except designated areas; diversions possible during VVIP movement.

06 **IMPORTANT
INSTRUCTIONS &
PUBLIC ADVISORY**

Priority Corridors & Exemptions

- Emergency & Medical Vehicles:** Priority, obstruction-free passage maintained 24/7 across Delhi.
- Essential Services & Utilities:** Uninterrupted access granted for essential supplies and utility operations in all zones.

Travel Planning & Public Mobility

- Transit Hubs:** Allow extra travel time when heading to Airports, Railway Stations and ISBTs.
- Public Transport & Routes:** Opt for public transport and follow designated alternative routes and diversion points.
- Commercial Traffic:** Non-destined commercial vehicles are prohibited from entering Delhi.

Traffic Rules & Parking

- Designated Parking:** Park only in authorized areas; roadside parking within 200 meters of Controlled Roads is strictly prohibited.
- Road Discipline:** Follow the instructions of deployed traffic personnel and obey all traffic rules patiently.

Public Safety & Updates

- Security Vigilance:** Report any unidentified objects or suspicious activity to the nearest police officer immediately.
- Real-Time Information:** Stay updated via official Delhi Police social media channels and traffic portals.

Public cooperation is solicited to ensure smooth transit and safety for all.

**PROCLAMATION REQUIRING
THE APPEARANCE OF A PERSON ACCUSED**

(See Section 82 Cr. PC/
(84 Bhartiya Nagarik Suraksha Sanhita)

Whereas complaint has been made before me that accused person namely **Sahil @ Raja S/o Mukesh R/o H.No. D-10, Laxman Puri, Vipin Garden, Uttam Nagar Delhi-110059** has committed (or is suspected to have committed) the offence in case **FIR No. 687/2022 U/s 356/379/411/34 IPC at PS: Dwarka North, Delhi** and it has been returned to a warrant of arrest thereupon issued that the said accused **Sahil @ Raja** can not be found and whereas it has been shown to my satisfaction that the said accused **Sahil @ Raja** has absconded (or is concealing himself to avoid the service of the said warrant). Proclamation is hereby made that the said accused **Sahil @ Raja** of **FIR No. 687/2022 U/s 356/379/411/34 IPC of PS: Dwarka North, Delhi** is required to appear before this court to answer the said complaint on or before **14.10.2026**.

EDITORIAL

Before the Buildings Fall

The collapse of a paying guest accommodation in Delhi's Satya Niketan, which claimed seven lives, is a reminder that Indian cities often discover unsafe buildings only after lives are lost. The tragedy cannot be allowed to follow the familiar sequence of outrage, inspection, suspension and eventual forgetfulness. The Delhi government's proposal to require structural audits and safety certification for public-use buildings, including hostels and schools, is timely, but certification must become a preventive mechanism rather than another document buried in a municipal file. Across Indian cities, residential buildings have been converted into hostels, PG accommodations, coaching centres and commercial establishments, often with extra floors, partitions, water tanks and other loads added over time. A structure originally designed for one family may eventually accommodate dozens of people. Such changes alter its safety profile, yet scrutiny frequently remains inadequate until disaster exposes the consequences.

The larger failure is not simply the absence of regulation but the weakness of enforcement. Municipal bodies already possess powers to identify dangerous structures, inspect unauthorised construction and order remedial action. Yet the system remains overwhelmingly reactive. After a collapse, officials visit the site, notices are issued, buildings are sealed and inquiries are announced. These measures may establish responsibility, but do little to prevent the next disaster. India needs mandatory periodic structural audits for buildings with high public occupancy, with inspection frequency determined by age, condition, use and alterations. Any major modification should automatically require fresh certification. Audit reports should also be digitally recorded and linked to individual properties so that expired certificates and unresolved safety deficiencies can be flagged. Occupants should have access to this information. Students choosing a PG, parents selecting a hostel or families entering a hospital deserve to know whether the building has been independently certified as structurally safe.

Such a framework will fail, however, if accountability stops with property owners. When illegal alterations remain visible for years or unsafe buildings continue operating despite complaints, municipal oversight must also be questioned. Officials responsible for particular areas should be answerable for persistent regulatory failures, while independent verification should ensure that structural certificates are not reduced to paperwork purchased from compliant engineers. Technology can create inspection trails, record notices and make it harder for violations to disappear into bureaucratic files. Delhi's proposed policy should establish audit intervals, liability for certifying engineers and penalties for owners and officials who ignore identified risks. Other cities should follow. Rapid urbanisation has transformed neighbourhoods faster than municipal supervision has evolved, creating conditions in which neglected structures become disasters. Buildings rarely become dangerous overnight; risks accumulate through ageing, illegal alterations, excessive loads, poor maintenance and failed enforcement. The purpose of regulation is to detect those risks while there is still time to act. The seven deaths in Satya Niketan demand more than another inquiry. A city should never need rubble, funerals and grieving families to discover that a building was unsafe.

LETTER

letter2editor.mp@gmail.com.

Restructuring Responsibly

JLR's decision to cut around 4,000 roles highlights the pressures confronting global automakers amid electrification and intense competition. While cost reduction may be necessary, companies must protect workers through transparent consultations and voluntary measures. Sustained investment in technology should create opportunities alongside greater efficiency.

Remembering a Legal Colossus

Lessons from Ram Jethmalani extended far beyond briefs and courtroom battles

ENDURING LEGACY

CHIRAG MADAN

THE WRITER IS A PRACTISING ADVOCATE IN SUPREME COURT AND HIGH COURT

My journey alongside the titan began in 2015, when I had the privilege of joining him as a Chamber Junior. The day I stepped into the chambers of Ram Jethmalani remains etched in my memory with razor-sharp clarity. Walking into that hallowed space felt less like starting a new job and more like stepping onto an intimidating, historic battlefield. My hands were cold, my chest tight with sheer, overwhelming nervousness; after all, I was about to stand face to face with a living institution whose very name commanded awe across courts, parliaments, and headlines. Every instinct warned me that the margin for error in his presence was non-existent.

Yet, that paralysing apprehension dissolved the moment I met the man behind the myth. While his reputation as the undisputed giant of the Bar preceded him,

Ram Jethmalani was also a meticulous teacher and generous mentor

his chamber was defined not by intimidation but by an extraordinary, disarming generosity of spirit. In our profession, legends are often spoken of in the past tense, but for anyone who ever stepped into law, Ram Jethmalani was, and remains, the god of the craft. When Ram Sir was alive, securing an opportunity to work under his guidance was the ultimate dream for an aspiring lawyer. To walk into his chambers was to walk into the nerve centre of Indian jurisprudence. Yet, while the country remembers him for his fierce wit, towering intellect, and razor-sharp courtroom battles, those of us

BEHIND THE LEGENDARY LAWYER STOOD A MENTOR OF EXTRAORDINARY WARMTH AND DISCIPLINE

fortunate enough to assist him remember a man who was an even greater human being than he was a lawyer.

The public saw the theatrical brilliance of his cross-examinations and arguments, but the real alchemy happened behind closed doors. The most enriching chapter of my legal life was watching him and assisting him as he prepared for the briefs. Despite decades of unmatched mastery and a global reputation, he never took a single fact for granted. He would go through the brief word by word. Not even the smallest, most obscure document escaped his diligent scrutiny. While many senior advocates rely heavily on their briefing counsel or juniors, Ram Sir never outsourced his com-

mand of the record. He insisted on reading everything himself, no matter the volume, no matter the hour.

Watching him work was both an awe-inspiring masterclass and a profoundly humbling experience. He would sit for hours on end, engrossed in the papers without taking a break, possessing a level of focus and concentration so absolute that it often made me feel ashamed that I didn't possess even an ounce of it. Yet, he never made his juniors feel small. Instead, his work ethic became our syllabus. Under his wing, I learned the sacred craft of how to truly read a brief, how to structure and write articles, and what real professional discipline demanded.

Beyond the black robes and the legal mechanics, Ram Sir taught us how to live. His zest for life was infectious. He taught his juniors that no matter how gruelling the trial, how complex the brief, or how difficult the circumstances, one must learn to enjoy life fully. No matter the pressure bearing down on a case, he always carried a warm smile on his face.

Early on September 8, 2019, I received a call, and it was hard to believe he was gone, but impossible to imagine him at rest. If there is a court in the heavens, there is no doubt what he is doing: briefs thoroughly read, witnesses in the box, smile intact, giving God Himself a relentless, brilliant fight.

Rest in peace and with God, Ram Sir. Your loss was not only a loss to our nation but a deeply personal one for me. The profession honours your genius, but I will forever carry your warmth, your discipline, and your fearlessness with me.

India's Energy Shield Holds Firm

Energy resilience helped India sustain growth despite severe global supply disruptions

RESILIENT INDIA

TUHIN A SINHA & DIBYENDU DEEPAK

T SINHA IS A NATIONAL SPOKESPERSON OF THE BJP. AND D DEEPAK IS A SEASONED ENERGY PROFESSIONAL

Energy security did not create growth, but it protected it

India's spectacular 7.8 per cent real GDP growth in Q1 FY27 deserves to be viewed against the extraordinary circumstances in which it was achieved. The quarter was marked by a severe West Asian conflict, disruption around the Strait of Hormuz, volatile crude prices and fears of an energy supply shock cascading across economies. Yet factories ran, trucks moved, airlines flew, restaurants and hotels remained open and households continued to receive fuel. Energy security was not the sole reason for India's growth, but it was a critical shock absorber that prevented an external geopolitical crisis from becoming an internal economic crisis.

Concerted acquisition diversification as a strategy

India imports nearly 90 per cent of its crude requirement, with roughly 45 per cent of imports transiting Hormuz before the crisis. Yet within days of the disruption, India substantially altered its sourcing map. By March 2026, around 70 per cent of crude imports were arriving

through routes outside Hormuz, against about 55 per cent earlier. India was sourcing crude from 40 countries, compared with 27 in 2006-07. Russian purchases rose sharply as Middle Eastern supplies declined, while additional cargoes were secured from the UAE, Venezuela and other producers. By May, crude imports had rebounded to 5.27 million barrels per day, while some Indian refineries were operating above 100 per cent of nominal capacity.

This was not crisis management improvised in March, but the payoff from a decade-long strategy of widening sourcing across Russia, Africa, Latin America, the United States and other producers, alongside developing refining capabilities for diverse crude grades. For an import-dependent economy, energy security does not necessarily mean eliminating imports; it means ensuring that no geography, supplier or shipping route can hold the economy hostage.

The LPG test

The second test was closer to home. India imports about 60

NO GEOGRAPHY, SUPPLIER OR SHIPPING ROUTE SHOULD HOLD THE ECONOMY HOSTAGE

per cent of its LPG consumption, with approximately 90 per cent of those imports normally arriving through Hormuz. On March 8, the government directed refineries and petrochemical complexes to maximise LPG production by diverting propane, butane, propylene and butenes into the LPG pool. Domestic production subsequently increased by 25-28 per cent, while cargoes were secured from the United States, Norway, Canada, Algeria and Russia.

Protecting supplies mattered beyond household kitchens. Commercial LPG supports restaurants, hotels, dhabas, canteens and food processors, meaning

shortages could quickly have translated into higher food costs, closures and employment disruption. Commercial supplies were therefore prioritised even as the transition towards piped natural gas (PNG) was accelerated.

Turning crisis into reform

Under the Natural Gas Control Order issued in March, domestic PNG and CNG for transport received 100 per cent supply protection, while alternative LNG procurement was activated. City-gas companies were asked to prioritise PNG connections for hotels, restaurants and canteens. By May 21, about 7.64 lakh PNG connections had been gasified since March, with infrastructure created for another 2.81 lakh. India did not merely seek to survive the shock; it used the crisis to accelerate a more resilient energy architecture.

Strategic storage is the next layer. India is moving towards an integrated "Strategic Fuel System", with a proposed \$42-billion decade-long programme to add 28 million tonnes of crude, 9 MT of LNG and 4 MT of LPG storage. Expanding reserves at

home and through international partnerships would provide another buffer against geopolitical disruptions.

The next frontier: Atmanirbharta

Resilience, however, cannot be the final objective. India must reduce its underlying import vulnerability, making Prime Minister Narendra Modi's emphasis on energy Atmanirbharta strategically important. ONGC and Oil India are undertaking ultra-deepwater exploration in the Andaman basin, with drilling targeting depths of up to 5,000 metres. A recent well yielded traces of light crude and condensate and evidence of an active petroleum system, although commercial accumulations have not yet been established. The Andaman story must therefore be approached with optimism, but without prematurely declaring an oil bonanza.

The 7.8 per cent GDP figure consequently represents more than headline growth. Consumption remained robust, manufacturing expanded, services stayed buoyant and investment strengthened while the global energy system was under extraordinary stress. Energy security did not create all these growth drivers. But it protected them.

Diversified imports, high refinery utilisation, stronger domestic LPG production, strategic reserves, greater gas penetration and deeper exploration are components of the same architecture. The Hormuz crisis demonstrated that India could absorb an extraordinary external shock without surrendering its growth momentum. The challenge now is to move from resilience towards greater self-reliance. If diversified sourcing can be combined with domestic exploration, deeper reserves and new discoveries, energy security can become not merely a shield against crises but an enabler of India's economic rise.

9TH BENGALURU SPACE EXPO

US & India moving from space cooperation to co-creation: Gor

MPOST BUREAU
Bengaluru, September 7

US Ambassador to India Sergio Gor on Monday said that the United States and India were moving beyond cooperation in the space sector towards “co-creation”, with the two countries jointly designing instruments, funding start-ups and co-authoring the future of human discovery. He was speaking at the inaugural ceremony of the ninth edition of the Bengaluru Space Expo (BSX), being organised by the Confederation of Indian Industry (CII) in partnership with ISRO, IN-SPACE and NewSpace India Limited (NSIL), from September 7 to 9 at the Bangalore International Exhibition Centre (BIEC).

Referring to the ninth US-India Civil Space Joint Working Group recently held in Bengaluru, the US Ambassador said that those discussions affirmed that our partnership is no longer just about cooperation; it is about co-creation. “We are no longer just sharing data; we are co-designing instruments, co-funding startups, and co-authoring the future of human discovery,” he said. Reflecting on the US-India partnership in space, he said that the United States brings world-class private capital and mature commercial ecosystems, while India brings world-

US Ambassador Sergio Gor addresses the inaugural session of 9th Bengaluru Space Expo, in Bengaluru

HIGHLIGHTS

- » ‘We are no longer just sharing data; we are co-designing instruments, co-funding startups, and co-authoring the future of human discovery,’ he said
- » He noted that President Trump and PM Modi had recognised this synergy when they established the TRUST initiative

class engineering, extraordinary scientific talent and a fearless startup sector. “The resulting partnership creates a new dream team that can and will do wonders,” he said. He noted that US President Donald Trump and Prime Minister Narendra Modi had recognised this synergy when they established the TRUST initiative – Transforming the Relationship Utilizing Strategic Technology. The US envoy also said they were expanding the US Commercial Service in Bengaluru to build a direct commercial corridor between American indus-

try and Indian innovators. “Pick any sector, and the United States and India are working on it, and working at levels that were previously unthinkable. Whether that’s our bilateral trade, which today exceeds USD 240 billion, whether that’s pharma, technology, military cooperation, or anything else, we are working hand in hand,” he said. Referring to NISAR, the joint NASA-ISRO Earth observation satellite, Gor said the mission did not build a monument to scientific theory; they built a lifesaver.

“When a devastating earthquake struck Venezuela just two months ago, NISAR’s radar data penetrated dense cloud cover and dust to guide emergency responders directly to ground zero. That is an example of what great things can happen when we work together. That is joint technology saving human lives in real time,” he said. He also recalled that last year, Group Captain Shubhanshu Shukla flew to the International Space Station in a landmark moment for India, made possible through American partnership. “Following the Axiom-4 mission and five joint science investigations, we are now looking at docking standards, interoperability, and astronaut training. TRUST creates capability. Capability creates ambition,” Gor said.

He said India was a proud signatory of the Artemis Accords and that NASA had officially invited ISRO to join the Moon base programme. “Make no mistake: we’re going back to the Moon, and we want India by our side on the lunar surface,” Gor said. He said India’s space sector reforms had ignited a commercial awakening, with startups emerging in areas, including Earth observation, space situational awareness and launch technologies.

Western region plays ‘key role’ in India’s growth: Shah at 28th Zonal Council Meet

HM calls for stronger coastal security, faster criminal law implementation

OUR CORRESPONDENT
Panaji, September 7

HM Amit Shah receives a memento from Goa CM Pramod Sawant during the Zonal Council Meet

Union Home Minister and Cooperation Minister Amit Shah on Monday chaired the 28th meeting of the Western Zonal Council in Panaji, Goa, with the participation of Goa Chief Minister Pramod Sawant, Gujarat Chief Minister Bhupendra Patel, Maharashtra Chief Minister Devendra Fadnavis and Administrator of Dadra and Nagar Haveli and Daman and Diu Praful K Patel. Addressing the meeting, Shah said the Western Region has a critical role in India’s economic growth and is the country’s largest economic, industrial and financial centre, which recorded a

growth rate of 7.8 per cent in the first quarter of 2026-27 despite volatility in the global economy. Describing the region as the “WEST Engine of Growth” in India”, Shah said W stands for wealth and finance, E for exports and ports, S for start-ups and semiconductors, and T for tourism and blue economy. He highlighted Goa as a tourism destination,

Maharashtra as a start-up hub and Gujarat as a centre for ports and semiconductor manufacturing. Shah said Zonal Councils had emerged as vibrant platforms for cooperative federalism by facilitating coordination and monitoring of welfare schemes. He said 71 meetings of Zonal Councils and their Standing Committees were held during the last decade,

compared with 25 between 2004 and 2014. The Home Minister called for strengthening coastal security and stepping up efforts against narcotics, cybercrime and other emerging threats. He also stressed the need to accelerate implementation of the new criminal laws and integrate cooperative banks with systems such as the Indian Cyber Crime Coordination Centre (I4C) and MuleHunter AI. The meeting deliberated on several issues, including Fast Track Special Courts, ERSS-II2, food safety, Ayushman Bharat, railway projects, environment clearances, electricity supply, urban planning, computerisation of PACS and Poshan Abhiyaan.

Hry to expand Lado Lakshmi Yojana

MPOST BUREAU
Chandigarh, September 7

Haryana Chief Minister Nayab Singh Saini on Monday announced the expansion of the Deendayal Lado Lakshmi Yojana by raising the annual family income eligibility limit from Rs 1 lakh to Rs 1.80 lakh, bringing more women under the monthly financial assistance scheme. Eligible women receive Rs 2,100 per month under the scheme, aimed at promoting financial security, self-reliance and greater participation in household financial deci-

sions. Saini said the registration portal for the expanded eligibility would be opened shortly and urged eligible women to register. The Chief Minister also clarified that women registering for or receiving benefits under the scheme would continue to receive benefits under other government schemes, including pensions. He said claims by opposition leaders that registration would lead to discontinuation of other benefits were baseless. Saini said the BJP had promised the monthly assistance of Rs 2,100 to

women from poor families among its 217 election ‘Sankalps’ ahead of the 2024 Assembly polls. The government allocated Rs 5,000 crore for the scheme in its first budget and has so far transferred over Rs 2,000 crore to nearly 10 lakh women. The government has earmarked Rs 6,500 crore for the scheme in its second budget. Saini said the expanded eligibility would cover more women and strengthen the economic foundation of families by ensuring direct financial assistance to economically weaker women.

HP to implement dress code for teachers in govt CBSE schools

OUR CORRESPONDENT
Shimla, September 7

Himachal Pradesh Chief Minister Sukhvinder Singh Sukhu on Monday directed the Education Department to finalise the dress code for teachers and uniforms for students in over 150 government schools being converted to the CBSE curriculum, aimed at improving educational quality and competitiveness. Chairing a meeting of the Education Department, Sukhu said the teacher dress code in these schools would be implemented from October 1. He also directed officials to finalise a distinct colour scheme for school buildings and work on the logo for the state-run CBSE schools.

To strengthen discipline and punctuality, the Chief Minister ordered that attendance in these schools be marked three times a day. Sukhu said the government was making concerted efforts to provide quality education to students, particularly in rural areas, through CBSE-affiliated government schools. He said students would get CBSE education at affordable rates compared with private schools. The CM said teachers had already been appointed in the schools and directed that vacancies arising in future be filled on priority to ensure that students’ studies were not affected by staff shortages. The CBSE conversion is aimed at helping students prepare for national-level entrance examinations such as JEE and NEET.

Punjab woos UAE investors at Dubai meet

MPOST BUREAU
Chandigarh, September 7

Punjab Industries and Commerce Minister Aman Arora on Monday met UAE International Investment Council (UAEIIC) Secretary General Abdulla Ahmed Al Suwaidi in Dubai to explore opportunities for attracting investments into Punjab. On the sidelines of the Annual Investment Meeting (AIM), Arora highlighted Punjab’s economic potential and invited UAE investors to explore high-growth sectors through government, semi-government and private partnerships. He assured investors of administrative support, handholding and logistical facilitation for setting up or expanding operations in the state. Arora highlighted investor-friendly reforms and the ‘Invest Punjab’ single-window platform for speedy statutory approvals.

Briefs

Double setback for Bhardwaj

NEW DELHI: Patiala House Court on Monday remanded Swarntra Bhardwaj to 14-day judicial custody in an alleged assault case involving the father of a minor CJF worker. Also, the Delhi High Court dismissed his habeas corpus petition challenging his arrest. Bhardwaj was arrested from Bulandshahr on Friday.

DFC boosts freight efficiency

MALIGAON: India’s 2,843-km Dedicated Freight Corridor network is strengthening freight efficiency and logistics connectivity, handling over 14% of Railways’ freight traffic. The network recorded around 5.21 lakh freight train trips till August 31, supporting faster movement, lower logistics costs and improved connectivity for industries and Northeast.

Haryana BJYM gets new chief

CHANDIGARH: Akshit Dahiya on Monday took charge as the new Haryana BJP Yuva Morcha state president at a ceremony held at the party office in Panchkula. Chief Minister Nayab Singh Saini congratulated Dahiya and expressed confidence that his leadership would strengthen the organisation’s outreach among youth.

Farmers call off stir after Punjab govt’s assurance

MPOST BUREAU
Chandigarh, September 7

Farmers protesting at the Chandigarh-Mohali border called off their stir on Monday evening after the Punjab government gave a written assurance accepting their key demands. The formal assurance was handed over to farmer representatives by Agriculture minister Gurmeet Singh Khudian. Under the agreement, the Punjab Government will convene a special session of the Vidhan Sabha within a month to pass resolutions on several issues and forward them to the Centre. These include seeking reconsideration of water-sharing agreements, repeal of Sections 78, 79 and 80 of the Punjab Reorganisation Act to restore the state’s riparian rights, annulment of the Dam Safety Act and withdrawal of the Seed Bill, 2025. Khudian said the Bhagwant Mann Government was committed to farm-

ers’ welfare and believed in resolving issues through dialogue. “The Bhagwant Mann Government is fully committed to the welfare of our annadatas. We believe in resolving issues through dialogue and have accepted their genuine demands with full transparency in writing,” he said. To address farmers’ debt burden, the minister announced that an One-Time Settlement (OTS) policy would be formulated for outstanding loans, particularly those taken from cooperative banks and societies. A committee involving representatives of all political parties will be constituted to frame the policy. Khudian said Punjab would continue to offer the highest sugarcane price in the country and directed that the file for fixing the price be initiated immediately. He also said pending dues owed to farmers by private sugar mills would be cleared in a time-bound manner.

Why journalist’s X data needed in road-rage case, SC asks Gzb Police

MPOST BUREAU
New Delhi, September 7

The Supreme Court asked the Ghaziabad Police on Monday to state the kind of information it is seeking from microblogging platform X in relation to a road-rage case against a journalist who had flagged alleged irregularities in the handling of donations at Ayodhya’s Ram temple. A three-judge bench headed by Chief Justice of India (CJI) Surya Kant said once furnished, such information would be put in the public domain till further orders. While dealing with Abhishek Upadhyay’s petition challenging the Ghaziabad Police’s FIR against him in the road-rage case, the bench emphasised that a balance has to be struck between an accused’s right to privacy and the rights of the victim and the investigating agency to thoroughly probe a matter. “In a road-rage case, why will you require the

‘IN A ROAD-RAGE CASE, WHY WILL YOU REQUIRE THE DIGITAL FOOTPRINT,’ IT ASKED

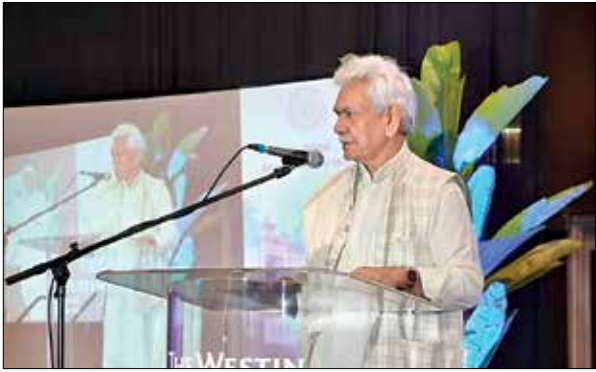

digital footprint of the accused?” the bench, also comprising Justices Joydymalya Bagchi and V Mohana, asked the police counsel. (“The Ghaziabad Police) may file an affidavit clarifying what kind of information is required to be furnished by X for the purpose of investigation,” the bench ordered, as it noted that Upadhyay would cooperate with the probe. The senior counsel representing Upadhyay said there is a need to frame guidelines governing access to an accused’s social-media information, as in the present case, police are now seeking social-media information, details of IMEI number etc. As the court asked police to state the reason

behind seeking the information, the agency’s counsel urged the bench to examine the “sweeping” allegations made by Upadhyay against an engineer associated with the construction of the Ram temple. “He is talking about regulation of police. What about regulation of this kind of journalism?” the lawyer questioned. He added that there is an eye-witness statement in the road-rage case, which is at the stage of investigation, and if ultimately nothing is found against the journalist, it would be closed. On August 25, the apex court gave protection to Upadhyay from coercive action in the case and directed that a copy of the FIR lodged at Indrapuram be provided to him. Upadhyay has contended that the FIR copy has not been supplied to him and that police are forcing nearby shopkeepers to delete the CCTV visuals of the relevant time.

Responsible AI must be guided by humanity and ethics: Sinha

J&K Lieutenant Governor Manoj Sinha addresses the IIT-BHU Global Alumni Meet in Chicago, Illinois

MPOST BUREAU
Srinagar, September 7

J&K Lieutenant Governor Manoj Sinha addresses the IIT-BHU Global Alumni Meet in Chicago, Illinois, on Monday

Jammu and Kashmir Lieutenant Governor Manoj Sinha on Monday called for responsible use of artificial intelligence, saying the technology must remain anchored in ethics, core values and strict human oversight. Addressing the IIT (BHU) Global Alumni Meet in Chicago, Illinois, Sinha said AI would drive economic growth by combining human potential with machine intelligence. He stressed that technology must be guided by humanity to ensure it serves the

collective well-being of people. Paying tributes to Mahamana Pandit Madan Mohan Malaviya, Sinha

highlighted his contributions to engineering education and the industrialisation of India. He said Malaviya’s ideals contin-

KEY POINTS

- » Sinha also spoke about India’s growing global role, describing the country as stronger at home, confident abroad and prepared to contribute to shaping humanity’s future
- » Highlighting Jammu and Kashmir’s transformation, Sinha attributed the changes to the abrogation of Article 370
- » He said the region had witnessed significant development over the past six years

ued to inspire generations to advance technology, strengthen the economy and serve society. Sinha also spoke about India’s growing global role, describing the country as stronger at home, confident abroad and prepared

to contribute to shaping humanity’s future. “India is rapidly advancing toward technological leadership while building on unprecedented social welfare initiatives, paving the way for a great resurgence,” he said.

Highlighting Jammu and Kashmir’s transformation, Sinha attributed the changes to the abrogation of Article 370 and said the region had witnessed significant development over the past six years. “This is not just progress but a renaissance. Jammu Kashmir has moved from shadows of fear to the light of opportunity, from isolation to integration, and from despair to destiny,” he said, adding that the transformation had opened new avenues for development, investment and opportunity. Recalling Swami Vivekananda’s historic address

in Chicago on September 11, 1893, Sinha praised the contribution of IIT (BHU) alumni and the Indian diaspora to global society. He urged the alumni to contribute to India’s economic and civilisational resurgence and outlined a four-point roadmap. It included investing in next-generation institutions through mentorship and capital, building strategic partnerships between American and Indian institutions, sharing an accurate narrative of India’s transformation and reconnecting with their roots by bringing home their experience and knowledge.

Houthis accuse Saudi Arabia of strike in Yemen

ASSOCIATED PRESS
Cairo, September 7

Houthi rebels in Yemen accused Saudi Arabia of striking a prison on Monday in the country's north as tensions escalate between the Iran-backed group and Saudi-backed Yemeni forces.

The strike on the Central Corrective Facility in the strategic city of Hazm in Jawf province killed a child and left 35 prisoners and a woman who was visiting her husband trapped under the rubble, the prison's warden told the Houthi al-Masirah news channel. Two people were also wounded.

Yemen plunged into civil war in 2014 when the Houthis descended from their northern stronghold and seized the capital, Sanaa, forcing the internationally recognised government to flee southward, then into exile in Saudi Arabia.

North Korea adds second destroyer

ASSOCIATED PRESS
Seoul, September 7

North Korean leader Kim Jong Un put his second naval destroyer into service and called for building a more reliable nuclear deterrent, state media reported Monday, as the United States, South Korea and Japan began a trilateral military exercise he views as a security threat.

The ship's commissioning comes as North Korea is dialling up pressure on the US after rebuffing President Donald Trump's decision to scale back a major military drill with South Korea in a conciliatory step toward Kim. Observers say North Korea wants to wrest bigger US concessions. The destroyer Kang Kon was commissioned into North Korea's navy in the eastern port city of Wonsan Sunday at a ceremony attended by Kim and his teenage daughter, whom South Korea's spy service calls his likely heir.

North Korean state media photos showed the girl in a white dress and blazer walking alongside her father on a red carpet, touring the warship and posing with sailors.

The ship and the Choe Hyon are both 5,000-ton destroyers.

GOVT TO FULLY FUND TESTING EQUIPMENT ACQUISITION

Goyal pitches for developing best medical devices for global customers

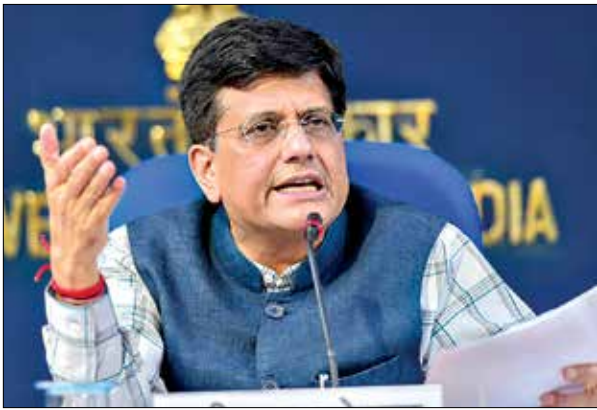

OUR CORRESPONDENT
New Delhi, September 7

Commerce and Industry Minister Piyush Goyal on Monday pitched for development of high-quality medical devices for global customers, and said the government is ready to provide 100 per cent fund for the acquisition of testing equipment.

Addressing two events of the pharma industry here, he said domestic firms should bring technology partnerships, encourage joint ventures, and invite global innovators and large pharma companies to India.

“We must develop a critical component ecosystem by strengthening our domestic capabilities with high quality. We must create shared testing infra facilities where these equipment can be tested, benchmarked to the best in the world, certify and demonstrated to global customers.

“From BIS (Bureau of Indian Standards), we are willing to support 100 per cent cost of the best testing

equipment for your equipment...100 per cent government of India will fund the acquisition of testing equipment...demand from us, there is no proposal from you. And we'll set up the most modern labs,” Goyal said.

He also called for improving design, copyrights, patent laws, and the IPR (intellectual property right) ecosystem so that internationally people look up to come to India and India can become a global hub of innovation because the country has a huge cost advantage.

“We must bring tech-

nology partnerships, we must have better buyer and seller relationship, we must encourage joint venture... We must co-design, and co-develop licence wherever required...look for joint R&D centres with other countries,” he added.

The minister further called upon insurers and health-tech companies to build products and platforms that make the patient journey more seamless, and ensure timely reimbursements.

He suggested the industry to train and certify caregivers and develop a skilled workforce capable of pro-

- » He said domestic firms should bring technology partnerships, encourage joint ventures, and invite global innovators and large pharma companies to India
- » The Commerce and Industry Minister also called for improving design, copyrights, patent laws, and the IPR (intellectual property right) ecosystem

(NABH)-enabled, verified and panelled hospitals are allowed to treat patients coming from abroad, he said, adding that quality healthcare cannot be different for Indians and foreigners.

To attract foreign patients, he suggested creating a pool of interpreters for patients arriving from different countries and speaking different languages, so that they have greater confidence and communication between patients and the medical system becomes easier.

The pharma sector has the potential to take India to the world, earn goodwill and serve people globally while creating a huge number of jobs and business opportunities in the manufacture of drugs, medical equipment and consumables, he added.

“While 3.5 million patients have benefited from India’s medical value tourism ecosystem in the last seven years, the country’s target should be 10 million patients a year,” Goyal said.

India’s economic growth likely to remain above 7% in FY27: Report

ANI NEWS
New Delhi, September 7

India’s economic growth is likely to remain above 7 per cent in FY27, with the investment and export cycles expected to increasingly offset a moderation in consumption and the fading impact of domestic policy support, according to a latest report by SBI Funds Management (SBIFM) Research.

The fund management firm expects nominal GDP growth to accelerate to above 12 per cent in the coming quarters, even as sticky inflation and elevated global commodity prices could keep interest rates higher for longer.

“In the absence of a fresh global shock, FY27 growth estimates will likely need to move above 7 per cent,” SBIFM Research said, adding that a stronger growth trajectory could provide room for real rates in India to adjust higher if inflation remains sticky. The optimism follows real GDP growth of 7.8 per cent year-on-year in Q1 FY27, with investment and exports emerging as the principal drivers rather than consumption.

The report said the composition of growth is par-

SBI FUNDS MANAGEMENT EXPECTS NOMINAL GDP GROWTH TO ACCELERATE TO ABOVE 12 PER CENT IN THE COMING QUARTERS

ticularly encouraging, with real gross fixed capital formation and exports growing around 12 per cent each, compared with 7.1 per cent growth in consumption. Corporate capital expenditure is also expected to strengthen, with capex by BSE 500 companies projected to rise 11 per cent in FY27, following Rs 10.4 trillion of capex in FY26. Power is expected to account for around 55 per cent of incremental corporate capex, followed by iron and steel and capital goods.

“As the domestic policy impulse fades and consumption becomes less broad-based, the investment cycle and global trade cycle will have to carry a

HIGHLIGHTS

- » The optimism follows real GDP growth of 7.8% year-on-year in Q1 FY27, with investment and exports emerging as the principal drivers rather than consumption
- » The report said the composition of growth is particularly encouraging, with real gross fixed capital formation and exports growing around 12 per cent each, compared with 7.1 per cent growth in consumption

greater share of the growth burden,” the report said. It therefore sees exports, manufacturing, capital goods and other business-oriented segments as relatively more attractive, while recommending greater selectivity in consumption-oriented sectors.

However, the growth outlook comes with inflation and monetary-policy risks. SBIFM noted that Brent crude could remain elevated over the next six months as China rebuilds reserves, European gas storage remains inadequate and US crude inventories decline. Against this backdrop, the report said global rates could remain higher for longer.

Briefs

Rupee falls 13 paise to 94.56 /dollar

MUMBAI: The rupee fell 13 paise to 94.56 against the US dollar on Monday as surging crude oil prices and global headwinds offset the support from strong FCNR dollar inflows.

At interbank forex market, rupee opened at 94.40 against the dollar & traded in range of 94.38-94.50, before settling for the day at 94.56, down 13 paise from its previous close.

SBM Bank India to sell 26% stake

NEW DELHI: SBM Bank (India), a wholly owned subsidiary of SBM Bank (Mauritius), is planning to sell 26 per cent stake to raise growth capital for expanding its Indian operations, ED & CFO Amit Jagdhari said.

The bank has appointed a consultant and is at the Expression of Interest stage. Its parent infused Rs 75 crore in June, with another Rs 75 crore expected later this month. The bank targets 32-35 per cent credit growth in FY27.

CBIC issues checklist for clearing cosmetics, medical devices imports

PRESS TRUST OF INDIA
New Delhi, September 7

The Central Board of Indirect Taxes and Customs (CBIC) has issued a standardised checklist which a Customs officer will have to follow before clearing import consignments of cosmetics, drugs and medical devices.

These products require certain mandatory compliance in terms of licenses, permissions, and registration certificates, as per the provisions of the Drugs and Cosmetics Act, 1940.

The checklist follows the Central Drugs Standard Control Organisation (CDSCO)’s measures to facilitate and enhance

ease of doing business in these products, the CBIC circular said.

These products have been grouped into seven categories – cosmetics; Drugs in the form of API, finished formulation, import for personal use/ import of small quantities of new drug by a medical institution, import for test/analysis.

The checklist for medical devices import has been grouped into in vitro diagnostics kits/devices, import of medical devices and import of raw material for manufacture of such devices.

“... The field formations may be sensitised to check the documents at the time

of out of charge,” the CBIC said, while adding that businesses will have to upload the required documents on e-SANCHIT to facilitate expedited clearance.

Nangia Global, Executive Director - Indirect Tax, Sivakumar Ramjee said the circular marks a monumental shift from discretionary manual vetting to an objective, checklist-driven compliance framework for medical device imports.

“By mandating a standardised, electronic verification protocol across all ports, this directive eliminates arbitrary bureaucratic hurdles and brings transparency to the clearance process,” he said.

Adani Power recognised for outstanding ESG performance by NSE sustainability

MPOST BUREAU
Ahmedabad, September 7

Adani Power Ltd, India’s largest private sector thermal power generator, said its Environmental, Social and Governance (ESG) score rose to 66 from 65 in FY26, according to an assessment by NSE Sustainability. The company continues to rank ahead of other major Indian thermal, mixed-fuel and integrated energy companies, while remaining in the “Aspiring” category.

NSE Sustainability, a subsidiary of NSE Indices and part of the National Stock Exchange of India Group, is a SEBI-registered ESG Rating Provider. Its annual assessment covers 500 listed companies, providing an independent evaluation of their ESG per-

formance and long-term value creation potential.

Adani Power has adopted low-emission technologies, including ultra-supercritical units, while focusing on energy efficiency, water conservation, waste management and emissions monitoring.

Its social initiatives cover education, healthcare and skill development through scholarships, health camps and livelihood programmes. On governance, the company said it exceeds regulatory requirements for

independent director representation on the Nomination and Remuneration, Audit and Risk Management committees. It has also introduced ESG standards for suppliers and contractors.

In other ratings, Adani Power scored 71/100 in S&P Global’s Corporate Sustainability Assessment and 4.3/5 in FTSE Russell’s ESG rating. CareEdge gave it 80/100 for FY26, placing it in the “Leadership” category and 35 per cent above the industry median.

NBFC gold loans rise 68.5% in July: RBI

Consumer durable loans also grew 51.5% in July 2026

AGENCIES
Mumbai, September 7

Loans against gold jewellery by non-banking financial companies (NBFCs) grew 68.5 per cent year-on-year in July 2026, extending a months-long trend of elevated growth, according to Reserve Bank data released on Monday.

Consumer durable loans also accelerated, growing 51.5 per cent in July compared with 46.8 per cent in June and 18.8 per cent a year earlier.

Gold loan growth stood

CLOSER LOOK

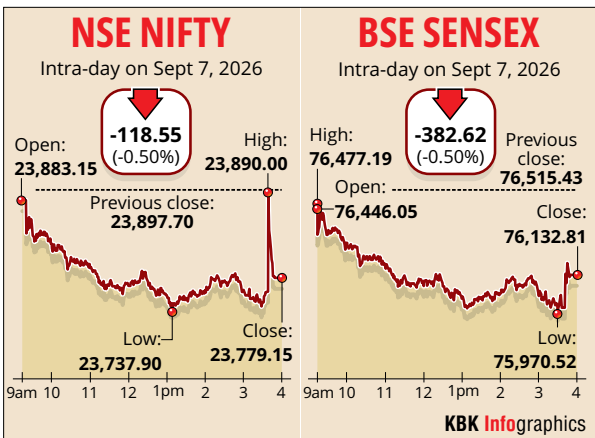

- » Gold loan growth stood at 69.3 per cent in June and 43.9 per cent in July 2025. However, concerns have emerged over increased borrowing for consumption rather than asset creation
- » Housing loans by NBFCs, including housing finance companies, grew 11.9 per cent in July, compared with 11.4 per cent in June and 4 per cent a year earlier

at 69.3 per cent in June and 43.9 per cent in July 2025.

Rising gold prices have made lenders more comfortable with the segment, given the high-value collateral and potential for

better returns. However, concerns have emerged over increased borrowing for consumption rather than asset creation.

Housing loans by NBFCs, including housing finance companies, grew

Among the 30 Sensex firms, Infosys fell the most by 3.81 per cent. Tech Mahindra fell by 1.96 per cent, Tata Steel by 1.85 per cent, Bajaj Finserv by 1.57

per cent, UltraTech Cement by 1.41 per cent and TCS by 1.28 per cent. L&T, Bharti Airtel, Maruti & Power Grid were among the winners. Brent crude gained

PVR Inox shares tank 8% intra-day, their sharpest decline in six months

AGENCIES
New Delhi, September 7

PVR Inox shares tanked 5.58 per cent to close at Rs 1,157.40 on the BSE on Monday, after plunging 8 per cent intra-day to Rs 1,128.50, their sharpest fall in six months. The stock had earlier fell 12 per cent intra-day on March 2, 2026.

The decline followed reports that the multiplex operator had asked senior executive Pramod Arora to leave after an internal probe into alleged Rs 200 crore kickbacks from devel-

opers involved in cinema-property projects.

However, PVR Inox denied the allegations, saying its preliminary examination found no evidence of kickbacks and that Arora was not asked to leave. In a regulatory filing, the company said its promoters received anonymous communications in early April alleging impropriety by certain employees. The messages did not name Arora and lacked specific details such as instances, dates or developers allegedly involved. The company

referred the communications to external third-party experts for assessment.

Arora, who was CEO for Growth and Investment, resigned on May 4, 2026, citing personal reasons. His resignation was accepted subject to continuing obligations and the company reserving its rights and remedies.

PVR Inox said it remains committed to responsible business practices, integrity, transparency and accountability, and will make appropriate disclosures as required.

News at a glance

RBI mops up ₹6 lakh cr in 2 auctions with mixed response

NEW DELHI: The RBI on Monday absorbed over Rs 6 lakh crore of surplus liquidity through two variable rate reverse repo (VRRR) auctions, despite a tepid response from banks. The 30-day VRRR auction received bids worth Rs 2,59,276 crore against Rs 7 lakh crore offered, while the overnight auction drew Rs 3,53,390 crore against Rs 5 lakh crore.

Both were accepted at a 5.24 per cent weighted average rate. Banking-system liquidity surplus stood at around Rs 11.16 lakh crore on September 6. The RBI has stepped up absorption following large inflows through special FCNR(B) deposit scheme.

IndusInd Bank to start its broking arm soon, says MD

NEW DELHI: IndusInd Bank plans to operationalise its broking arm soon to expand its product offerings and boost fee-based income, MD and CEO Rajiv Anand said. The RBI last month approved the bank's proposal to set up a wholly-owned stock broking subsidiary and infuse equity capital into it. Anand said approvals are in place and the bank wants to launch the outfit at the earliest.

He said the bank's microfinance business has moved past its difficult phase, with growth expected from Q2 FY27. The segment is projected to grow 15-20 per cent in FY27.

RBL Bank to raise up to \$1 bn from overseas investors

NEW DELHI: Private lender RBL Bank's board on Monday approved raising up to \$1 billion from overseas investors through bond issuances under a proposed Euro Medium Term Note (EMTN) Programme.

The programme will allow issuance of foreign currency bonds, notes or other debt securities through one or more transactions, subject to market conditions and regulatory approvals.

The board also authorised its Borrowing Committee to take necessary actions related to the programme and issuances.

TBAL delivers 400 'made in India' Apache fuselages

NEW DELHI: Tata Boeing Aerospace Ltd (TBAL) has rolled out the 400th fuselage for the AH-64E Apache attack helicopter from its Hyderabad facility, the company said Monday. A JV between Boeing & Tata Advanced Systems Ltd, TBAL manufactures fuselages in India for Apaches supplied globally, including to the US Army & six delivered to the Indian Army in 2025.

The Indian Air Force operates 22 AH-64E Apaches. Established in 2016, TBAL employs over 750 engineers and technicians and uses robotics and automation for aerospace manufacturing, strengthening India's role in global defence supply chains.

Automobile retail sales rise 17.51% to record 24.23 lakh units in Aug: FADA

OUR CORRESPONDENT
New Delhi, September 7

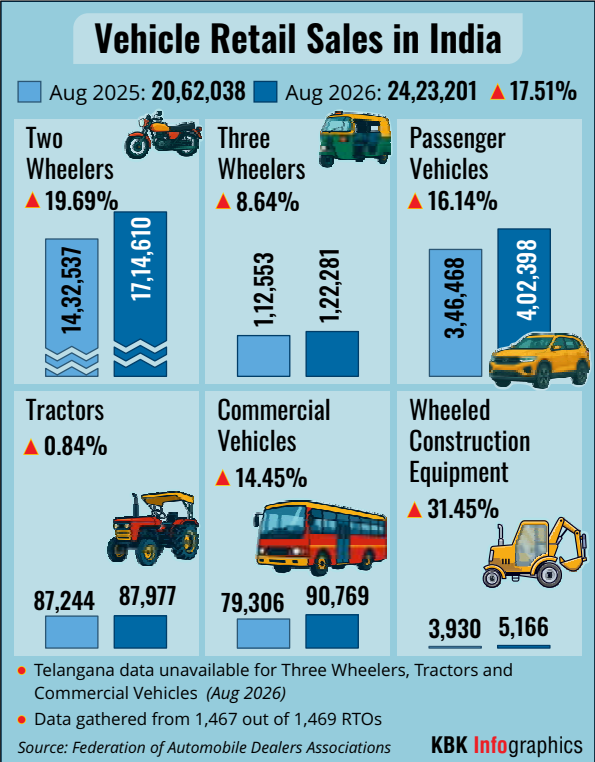

Automobile retail sales in India grew 17.51 per cent to a record 24,23,201 units in August, riding on continued momentum of GST 2.0 despite a seasonal monsoon lull and the delayed onset of the festive calendar, FADA said on Monday.

In August last year, total automobile retail sales in India stood at 20,62,038 units, the Federation of Automobile Dealers Associations (FADA) said in a statement.

For the first time in India's history, PV alternative-fuel share (CNG + Hybrid + EV) reached 41.95 per cent, overtaking petrol (40.85 per cent), it shared.

"August 2026 delivered the biggest-ever August in Indian auto retail, with the industry registering 24,23,201 units, up 17.51 per cent YoY, even as retails eased 6.48 per cent over a record July on the seasonal monsoon lull and a festival calendar that shifted Ganesh Chaturthi and the spillover of Onam-led buying into September," FADA President Sai Giridhar said.

According to him, the defining development of the month, however, was a structural one: for the first time in India's history, alternative fuels - CNG, hybrid

- KEY POINTS**
- » For the first time in India's history, PV alternative-fuel share (CNG + Hybrid + EV) reached 41.95 per cent, overtaking petrol (40.85 per cent)
 - » Rural passenger vehicle sales rose 24.99 per cent versus urban's 10.93 per cent; rural commercial vehicle sales rose 16.33 per cent; and rural three-wheeler sales rose 23.95 per cent, even as urban three-wheeler sales fell
 - » Looking ahead to September 2026, dealer sentiment stays constructive but has moderated from July's peak, with 67.09 per cent of dealers expecting growth, 27.35 per cent a flat market and 5.56 per cent de-growth

and electric combined - overtook petrol in the Passenger Vehicle market, at 41.95 per cent against petrol's 40.85 per cent. A little over a year ago petrol led this contest by nearly eleven percentage points; that lead has now been erased.

"... Much of the YoY strength rests on a soft August 2025 base, when buyers had deferred purchases awaiting the GST 2.0 rate cut, and dealers

report that the festive curtain-raiser came in below their own expectations -- the true test of the season lies in showroom conversion through September to November, not in year-on-year optics," the FADA President observed.

The auto industry has been experiencing robust growth ever since GST rates were reduced in September 2025.

Meanwhile, passenger vehicle (PV) retail sales

were at 4,02,398 units last month as compared to 3,46,468 units in August 2025, a growth of 16.14 per cent.

Two-wheeler sales were up 19.69 per cent to 17,14,610 units in August this year as compared to 14,32,537 units in the same month a year ago, according to FADA.

Three-wheeler sales stood at 1,22,281 units last month as compared to 1,12,553 units in August

2025, a growth of 8.64 per cent.

Commercial vehicles also witnessed a 14.45 per cent rise in retail sales at 90,769 units last month as compared to 79,306 units in 2025, it added.

He further stated that a widening monsoon deficit -- around 13 per cent, with 14 states short of rain -- held tractors flat and pulled them 25.03 per cent lower MoM (month-on-month); every other rural segment outgrew its urban counterpart.

Rural passenger vehicle sales rose 24.99 per cent versus urban's 10.93 per cent; rural commercial vehicle sales rose 16.33 per cent; and rural three-wheeler sales rose 23.95 per cent, even as urban three-wheeler sales fell.

"Rural demand, in other words, has begun to decouple from the monsoon - the farm-income-linked segment softened, yet the non-farm rural economy of livelihood mobility, goods movement and construction kept accelerating," Giridhar stated. Looking ahead to September 2026, dealer sentiment stays constructive but has moderated from July's peak, with 67.09 per cent of dealers expecting growth, 27.35 per cent a flat market and 5.56 per cent de-growth.

Sebi extends Angel Fund compliance deadline

PRESS TRUST OF INDIA
New Delhi, September 7

Markets regulator Sebi on Monday extended the deadline for existing Angel Funds to comply with the accredited investor mandate by nearly seven months to March 31, 2027.

The move comes after representations from the Alternative Investment Fund industry seeking additional time for Angel Funds to comply with the revised regulatory framework.

Earlier, Angel Funds registered with the Sebi on or

before September 10, 2025, were required to implement the accredited investor mandate by September 8, 2026.

In a circular, the regulator said these funds can now continue to offer investment opportunities to non-accredited investors until March 31, 2027, subject to a limit of 200 such investors. However, from April 1, 2027, these Angel Funds will not be allowed to accept contributions from non-accredited investors for investment in an investee company.

NSE revises pre-open session rules, market orders get priority

ANI NEWS
Mumbai, September 7

The National Stock Exchange (NSE) on Monday implemented a revised pre-open session framework, under which market orders will get priority over limit orders during the order matching process, with changes also made to the timelines for order entry and matching.

As per the new framework, the pre-open session will retain its existing 9:00 am to 9:15 am sched-

ule, but the exchange has revised the process for collecting and matching orders during the 15-minute window.

Additionally, the revised pre-open mechanism is being aligned more closely with the principles of the Closing Auction Session (CAS).

"Pre-Open session operates as a separate session of 15 minutes from 9:00 am to 9:15 am on all trading days, including special trading sessions," the stock exchange said add-

ing, "order collection window will close randomly between 9:08 am to 9:10 am."

Under the revised framework, traders can place both market and limit orders between 9:00 am and 9:05 am, while only limit orders will be accepted from 9:05 am to 9:10 am.

The order matching process will follow from 9:10 am to 9:12 am, during which the opening price will also be determined.

UK recognises India's carbon credit scheme, says official

Move would cut tax burden on exporters

PRESS TRUST OF INDIA
New Delhi, September 7

In a major breakthrough, the UK has recognised India's Carbon Credit Trading Scheme as a qualifying criterion for pricing relief under its carbon border adjustment mechanism (CBAM), a move that would reduce the tax burden on domestic exporters, an official said on Monday.

In a communication

addressed to the Bureau of Energy Efficiency, Ministry of Power, the UK's HM Treasury confirmed that the CCTS has been included in the UK's published indicative list of overseas carbon pricing schemes assessed as qualifying criteria under a provision of the Carbon Border Adjustment Mechanism (Calculation of CBAM Rate and Determination of Carbon Price Relief) Regulations 2026, the

official said.

The move is important as the commerce ministry was pursuing the matter with the UK for long.

The Carbon Credit Trading Scheme (CCTS) has been notified by India with the objective of reducing, removing, or avoiding greenhouse gas emissions from the Indian economy by pricing such emissions through the trading of Carbon Credit Certificates.

REC Ltd issues India's 1st tokenised corporate bond

MPOST BUREAU
New Delhi, September 7

REC Ltd has issued India's first pilot tokenised corporate bond under the SEBI Regulatory Sandbox Framework. The Rs 500 crore issue comprised a Rs 100 crore base issue and a Rs 400 crore green shoe option. Bidding was conducted on the NSE's EBP platform, with the issue receiving bids worth Rs 796 crore, nearly eight times the amount on offer.

REC accepted Rs 500 crore at a coupon rate of 7.30% for a tenure of 1 year and 9 months. The bonds

were settled, allotted and listed on the same day, with listings on NSE & BSE.

REC Director (Finance) Rajesh Kumar said the initiative marks a significant step in the evolution of India's debt markets. The tokenised issuance enables atomic Delivery-versus-Payment settlement & shared-ledger transparency.

Under the Demat 2.0 initiative, securities ownership is recorded on a permissioned distributed ledger, reducing settlement risks and operational friction while retaining regulatory safeguards and investor protections.

Firm can face criminal prosecution without individual accused: SC

- HIGHLIGHTS**
- » The verdict came on an appeal of Sanofi India Limited, a public limited company engaged in the primary business of manufacturing pharmaceutical products, against a Karnataka High Court order refusing to quash proceedings against it
 - » A bench of Justices J B Pardiwala and Manoj Misra dismissed the appeal filed by Sanofi India against the continuation of the criminal proceedings arising out of a CBI case concerning the alleged procurement of medicines for the BARC

ity and how acts and the mental state, or mens rea, of natural persons can be attributed to a corporation.

The bench was dealing with the question that whether the high court ought to have quashed the criminal proceedings instituted against the company on the ground that no natural person was identified and arraigned alongside it as an accused. The verdict held that while a corporation can possess mens rea only through attribution from natural persons, the non-identification of a particular individual at the stage of considering a petition for quashing proceedings is not, by itself, fatal to the prosecution.

"The position under Indian law is, thus, clear that a corporation can be prosecuted for an offence notwithstanding that it carries a mandatory sentence of imprisonment, or requires proof of mens rea. It appears that a corporation cannot be prosecuted only where the offence is

punishable with imprisonment alone, or where the offence, by its nature, requires personal malicious intent, such that it is incapable of commission by a corporation at all," the top court said. "What the chargesheet must disclose, on its face, is that the corporation itself has committed the offence," it said, holding that a company's role could be disclosed through allegations concerning its conduct, decisions and dealings, even without naming the particular individual who carried those out.

"While the academic debate goes on, it is beyond question that, both in India and elsewhere, corporations can and are being subjected to criminal liability.... This has been primarily driven by the pragmatic recognition that corporations, as institutions commanding vast financial and sociopolitical power, possess the ability to cause serious harm....," the court said.

1ST INTERNATIONAL FILM FESTIVAL OF JAMMU & KASHMIR

A four-day grand celebration of world cinema

The inaugural film festival features 135 films selected from international entries, including more than 60 foreign films

The ceremonial opening of the first International Film Festival of Jammu and Kashmir was held on September 7, 2026, at INOX Srinagar, launching a four-day celebration of cinema that brings filmmakers, actors, technicians, academics and film enthusiasts from India and abroad to the Union Territory.

To be held till September 10 under the theme 'Rang-e-Cinema', the inaugural festival features 135 films selected from international entries, including more than 60 foreign films, seeking to revive J&K's long-standing relationship with the world of cinema.

While speaking to reporters on the sidelines of the event, Chief Secretary Atal Dulloo said the festival was designed not only as a celebration of films but as an opportunity to rebuild Jammu and Kashmir's links with the global film industry. "As you all know, the first-ever International Film Festival of Jammu and Kashmir is starting today. It'll be a four-day festival from September 7 to September 10," Dulloo said at INOX.

He said the response from filmmakers had been overwhelming. "When we were inviting entries for screening in this festival, we got an overwhelming response. There were responses from 80 countries. Entries were received. Then after screening and considering the availability of time, 135 entries were shortlisted," he said.

A NEW WORLD FOR CINEPHILES

CM Omar Abdullah inaugurated the 1st International Film Festival of Jammu & Kashmir (IFFJK) in Srinagar, opening a new chapter in J&K's rich and enduring relationship with cinema. With filmmakers from over 30 countries and more than 130 films being showcased, IFFJK brings the

world of cinema to Kashmir and places Jammu & Kashmir firmly on the global creative map. The Chief Minister said the festival is a declaration of J&K's intent to emerge as a vibrant home for filmmakers, storytellers and creative talent from across the world.

THE FESTIVAL ALSO HAS A LARGER AMBITION: TO BRING FILMMAKERS BACK TO THE VALLEY

Dulloo said the selected films include more than 60 international productions, giving audiences in Jammu and Kashmir an opportunity to experience stories and filmmaking traditions from around the world. "This is an opportunity to connect. In fact, I would say reconnect

Jammu and Kashmir with the world of cinema," he said. The festival also has a larger ambition: to bring filmmakers back to the Valley, not merely as visitors but as creators looking for locations, stories and partnerships.

Dulloo said the administration wants to invite the film industry from India and abroad to explore Jammu and Kashmir's culture, cuisine, heritage and landscapes, with the aim of making the region a prominent film shooting destination once again. The festival will also put the spotlight on local talent.

Dulloo added that Jammu and Kashmir's young people could find opportunities in several areas of the film industry, including photography, direction, technical work, acting, music and lyric writing. "So, this is a win-win situation for both cinema and

Jammu and Kashmir," he said.

The festival formally opened at SKICC, Srinagar, at 6:30 pm, with the festival's first screening at INOX. The opening film was 'Dead Dog', directed by Sarah Francis of Lebanon. The film is part of the 'International Competition' section and was scheduled for a 1 pm screening at INOX Srinagar. The programme expands across Srinagar, Jammu and Gulmarg, with screenings at SKICC, INOX Srinagar and WAVES Jammu.

The festival programme combines feature films, short films, documentaries, hybrid documentaries, special screenings and international competition entries. It also includes masterclasses, panel discussions and in-conversation sessions.

On day 2, the festival brings one of the busiest programmes, with screenings across SKICC, INOX Srinagar and WAVES Jammu. At SKICC Screen 1, the morning begins with short films including 'The Last Rites' (Malaysia), 'Sudden Rise' and 'And the God Who is Close' (Iran), 'Stone Beach' (Portugal), 'Tugas Sedih Yang Panjang' and 'The Stiff Fingers' (Indonesia) and 'Somos Agua (We Are Water)' (Mexico).

The documentary and hybrid documentary section includes 'Painted Memories', 'Ricard Dance' and 'The Scientist Who Runs at Night'. The 4

pm slot features 'Arifa' in the J&K Select section, alongside films such as 'Promesse sacrée', 'Room at the Farm (Khooh Waala Ghar)' and 'Ancessao'.

The third day's programme will focus on a stronger spotlight on J&K's own cinematic voices, with films like 'Tas-rufdaar (Djinns of Kashmir)', directed by Kapil Mattoo and 'Batt Koch', directed by Sid-darth Koul and Ankit Wali. The programme also features 'The Unknown Filmmaker', an India-South Korea-United States production and the international competition title 'The Slow Man and His Raft (Nadharer Bhela)' directed by Pradipta Bhattacharya. The venue will also host special screenings of 'Shape of Momo', 'Ikki's' and 'Main Vaapas Aunga'. September 9 is particularly important for the local film community because of the session 'Echoes of the Chinara: Empowering Next Generation of Storytellers'.

The final day will witness a mix of local, Indian and international cinema, with films to be screened including 'The Pissing Tale', 'Taaleem' and 'Naqsh-e-Daur (The Story of Ghulam Nabi Dhar)' and much more. A documentary titled 'The Music Shop: Symphony Of The City', will also be presented.

Films in the programme have come from countries including Lebanon, France, Tunisia, Qatar, Iran, Portugal, Indonesia, Mexico, Cuba, Belgium, Türkiye, Montenegro, Spain and many others.

Kali, Ahalya & the India we choose to see

OUR CORRESPONDENT
New Delhi, September 7

Can mythology still speak to a generation that questions everything?

That was one of the provocative questions emerging from the Delhi conversation around Sohini Roychowdhury Dasgupta's 'Love, Life & Drama' at Quill & Canvas Art Gallery & Book Store.

The evening, moderated with intelligence and warmth by Ishita Bains and thoughtfully put together by Shobha Sengupta, moved beyond the predictable language of mythology to examine the women within these stories.

Kali smashed boundaries. She challenged containment, conven-

tion and the idea that feminine power must always be beautiful, obedient or acceptable. Ahalya presented an altogether different image: a woman trapped in silence, judgment and a narrative largely written around her rather than by her.

For Gen Z, perhaps the task is not to either wor-

ship mythology or dismiss it. It is to interrogate it. To ask who had power, who had a voice, who was silenced and whose version of the story survived.

The discussion also confronted 'India exotica', the seductive international packaging of India as mysticism, colour, gods and spectacle. Against this sit 'India idiotica', a deliberately provocative phrase describing what happens when a complex civilisation is reduced to exotic clichés.

Delhi provided the perfect setting for such a conversation: a city where ancient histories constantly collide with contemporary questions. The takeaway was simple but powerful. Mythology doesn't need protection from questions.

IT WAS UTTERLY EXHAUSTING: SAIF

Khan has done raw action scenes as a visually impaired man in 'Haiwaan'

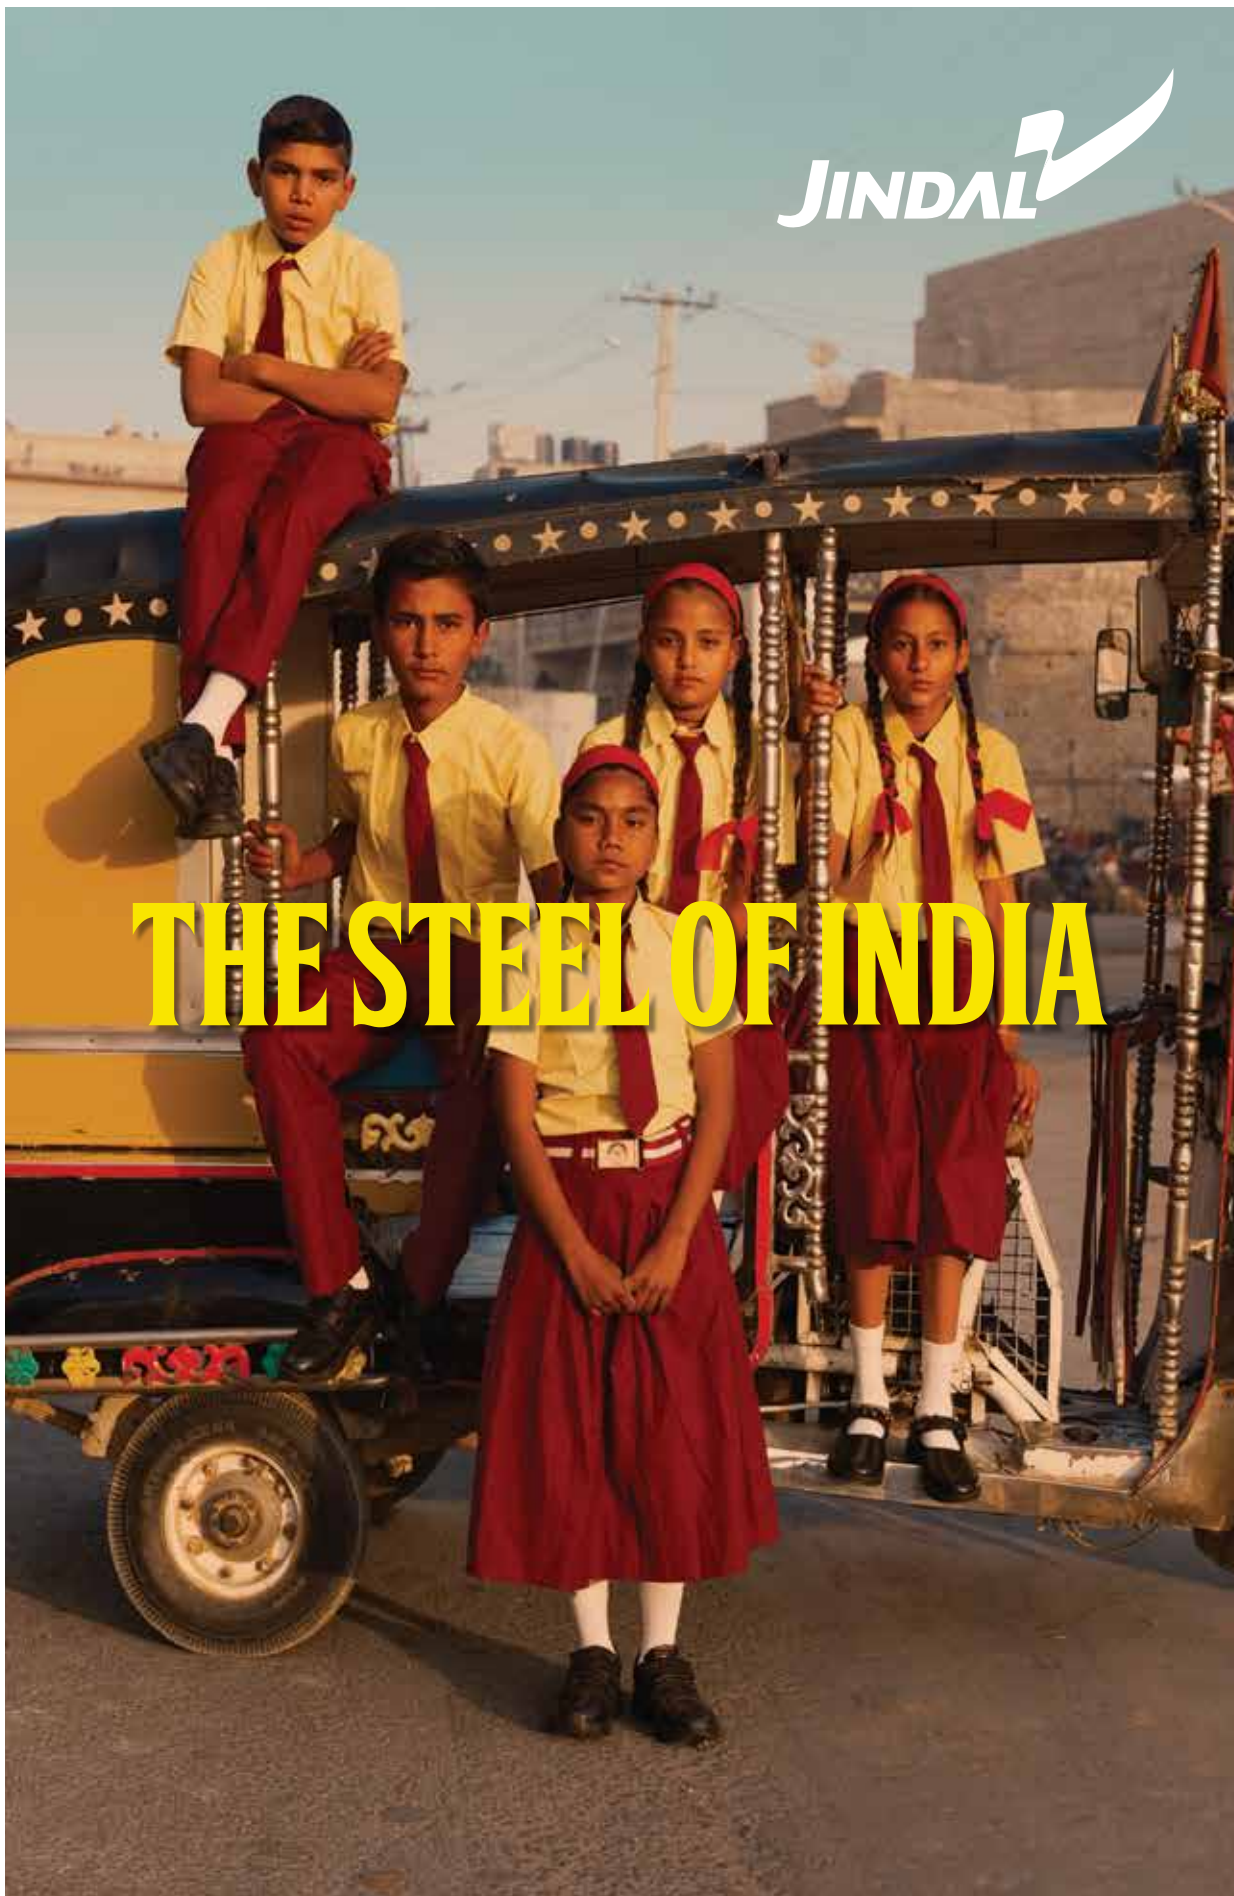

'Haiwaan', featuring Akshay Kumar and Saif Ali Khan, is slated to hit theatres on September 11. Notably, the film brings Saif together with director Priyadarshan for the first time, while also marking his reunion with Akshay Kumar after a gap of 18 years. Saif recently spoke about the challenge of performing action sequences while portraying a visually impaired character.

The actor shared that his character, who is skilled in martial arts, features in a high-intensity action sequence in the film. Speaking to 'Pinkvilla', Saif said, "It's a scene with a great build-up because the characters torture and bash up my character, kicking and slapping him. As an audience, you want him to retaliate, which he eventually does."

Lauding stunt master Silva, Saif added, "Silva really well choreographed that fight and there were no special effects added to it; there were no duplicates. There's very little fakery in these scenes. The room has broken glass everywhere. It was very raw and kind of violent and it was utterly exhausting because after that I had to lie down for two days."
