

Two-day BRICS Summit begins Sat; focus on food and energy resilience

OUR CORRESPONDENT
New Delhi, September 9

India will host a two-day BRICS summit from Saturday with discussions centred on strengthening the grouping's collective ability to withstand disruptions in food, energy, health, disaster management and critical supply chains, as member countries seek greater cooperation amid a fragmented global environment.

The summit comes at a time when the global economy is dealing with the fall-out of the Russia-Ukraine war, the continuing crisis in West Asia, including the blockade of the Strait of Hormuz, and the trade and tariff policies of the Donald Trump administration.

Chinese President Xi Jinping, Russian President Vladimir Putin, Iranian

People holding an umbrella walk past Bharat Mandapam Gate number 6 ahead of the BRICS Summit 2026, in New Delhi on Wednesday

President Masoud Pezeshkian, South African President Cyril Ramaphosa and Indonesian President Prabowo Subianto are among the leaders expected in New Delhi for

the meeting. However, with three days remaining before the summit, it was not clear whether BRICS members had reached agreement on a joint statement. Differences between Iran and the United Arab Emirates over the West Asia crisis remain a key issue, particularly because decisions within the grouping are based on consensus.

BRICS originally consisted of Brazil, Russia, India, China and South Africa. The grouping expanded in 2024 with the addition of Egypt, Ethiopia, Iran,

- » West Asia crisis adds further economic uncertainty
- » Strait of Hormuz blockade remains a major concern
- » Xi Jinping, Putin among expected top leaders

CM Gupta orders bulldozer action on illegal construction

Orders scrutiny of records on illegal constructions

AIMAN FATIMA
New Delhi, September 9

Days after the collapse of a five-storey paying guest accommodation in Satya Niketan claimed seven lives, Delhi Chief Minister Rekha Gupta on Wednesday directed the Municipal Corporation of Delhi (MCD) to intensify its crackdown on illegal construction across the city and launch demolition action wherever violations are found.

Gupta instructed the civic body to carry out extensive inspections of PG accommodations and take action against structures built in violation of sanctioned plans or building norms. She also directed senior MCD officials to remain present on the ground during demolition and enforcement drives, signalling a tighter

FIRs against 63 handles on Delhi airport flooding posts

NEW DELHI: Delhi airport operator Delhi International Airport Ltd (DIAL) on Wednesday said it has filed an FIR against 63 social media handles for sharing misleading and factually incorrect posts about flooding and waterlogging at the airport.

The action relates to incidents reported on September 4, when heavy rainfall led to temporary water accumulation at the arrival forecourt of Terminal 3. DIAL said the situation was cleared within 20 minutes and did not affect airport operations. The operator said some posts falsely portrayed the

Exempt Class 6 from 3L policy this year: SC

NEW DELHI: The Supreme Court on Wednesday asked the CBSE to consider exempting Class 6 students from its three-language policy for the ongoing academic year, and deferred further hearing on challenges to September 17. A bench led by CJI Surya Kant, with Justices Joy-malya Bagchi and V Mohana, told Solicitor General Tushar Mehta to explore an accommodation. The policy, effective for Class 9 from July 1, requires three languages, including two native Indian languages, in line with NEP 2020 and NCF-SE 2023.

'How did magistrate dare?' SC on notice to student at CJP protest

MPOST BUREAU
New Delhi, September 9

The Supreme Court on Wednesday questioned how the Greater Noida executive magistrate could issue a notice to a student allegedly linked to a Cockroach Janta Party (CJP)-led protest despite its clear direction that no penal action be taken against students involved in the demonstrations.

"How can the magistrate dare to issue a notice when we have already annulled and directed that no action will be taken," Chief Justice of India Surya Kant said before asking, "No penal action against any student. It was a clear-cut order."

A three-judge bench headed by CJI Kant, also comprising Justices Joy-malya Bagchi and V

Mohana, said it would seek an explanation from the magistrate.

Senior Advocate Biswajeet Bhattacharya raised the matter before the bench, saying an "experiment" was being conducted with students. He argued that the notice was contrary to the Supreme Court's September 1 order and that its subsequent withdrawal could not, by itself, remove the possibility of contempt.

The notice was issued on September 4 under Section 130 of the

Cabinet okays over Rs 20,000 cr railway projects across 9 states

SIMONTINI BHATTACHARJEE
New Delhi, September 9

The Cabinet Committee on Economic Affairs, chaired by Prime Minister Narendra Modi, on Wednesday approved eight railway projects costing more than Rs 20,000 crore, covering over 20 districts in nine states and adding around 1,200 km to the Indian Railways network. The projects include new lines and multi-tracking works aimed at easing congestion, increasing capacity and improving the movement of passengers and freight.

Among the approved works is a fourth line on the Kharagpur-Jharsuguda and Katni-Pendra Road sections, along with a third line between Bilaspur (Uslapur) and Pendra Road. Third and fourth lines will also be laid between Arakonam-Renigunta and White-

KEY POINTS

- » Projects will add around 1,200 km to railway network
- » Works span over 20 districts across nine states
- » Projects connect over 6,900 villages

field-Bangarapet, while the Secunderabad (Ghatkesar)-Kazipet section will undergo multi-tracking.

The remaining projects involve doubling of the existing single lines between Hosur-Omalur and Salem-Karur-Dindigul.

The projects will span West Bengal, Jharkhand, Odisha, Madhya Pradesh, Chhattisgarh, Tamil Nadu, Andhra Pradesh, Karnataka and Telangana. According to the government, the expanded network will improve rail access to more than 6,900

villages with a combined population of over one crore.

The works are planned under the PM Gati Shakti National Master Plan, with integrated planning intended to improve multi-modal connectivity and logistics. The government said the additional capacity would support the movement of people, goods and services while improving operational efficiency and service reliability.

The routes are also important for transporting coal, cement, iron and steel and other commodities. The capacity expansion is expected to generate an additional 74 million tonnes per annum (MTPA) of freight traffic.

The projects will improve connectivity to tourist and religious sites including Taramini Temple, Shri Khetra Jagannath Temple near Jharsuguda,

Iran claims capture of US submarine

Tehran, September 9

Iran's navy has claimed it seized a US unmanned submarine near the entrance of the Strait of Hormuz during what it described as a complex intelligence operation.

The IRGC-linked Sepah News identified the vehicle as a Dive-LD and released footage of the captured submersible. The IRGC separately claimed its air defence systems shot down an MQ-9 Reaper drone over the strait.

The US military said one of its underwater drones had "malfunctioned"

more than a day earlier while surveying regional waters, but did not confirm it was the vehicle seized by Iran. A Pentagon spokesperson said the defective drone was an older model that carried neither sensitive data nor classified sonar or radar equipment.

Dive-LD can operate for up to 10 days and dive to 6,000 metres. Units cost about \$2.5 million.

Meanwhile, CENTCOM said US forces destroyed five Iranian crude oil tankers after attacks on a US warship. The Treasury also sanctioned 27 Iranian airlines.

CONTRIBUTION BELOW MAJOR EMITTERS

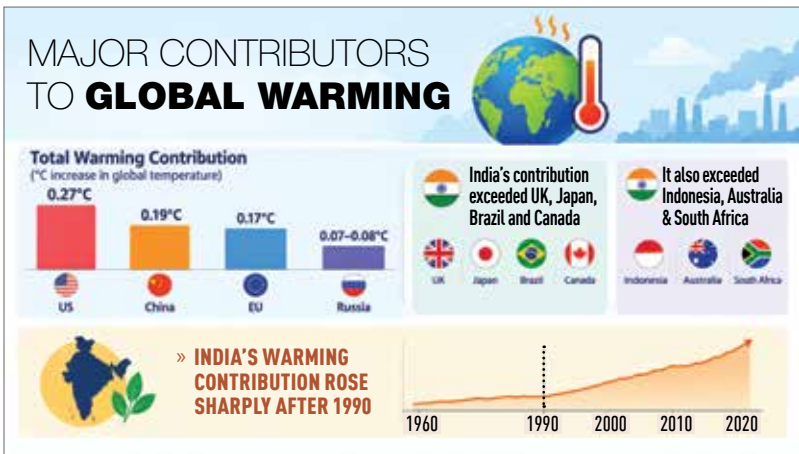

India's share in global warming might be 0.05 °C, claims study

MPOST BUREAU
New Delhi, September 9

India's contribution to global warming stood at about 0.047 to 0.05 degrees Celsius by 2024, placing it below the United States, China, the European Union and Russia, but above several other industrialised and emerging economies, according to a study published in the journal Environmental Research Communications.

The US was the largest contributor among the countries examined, accounting for about 0.27 degrees Celsius of warming, followed by China at 0.19 degrees Celsius. The European Union contributed 0.17 degrees Celsius, while Russia's contribution was estimated at 0.07 to 0.08 degrees Celsius.

India's contribution was higher

than that of the UK, Japan, Brazil, Canada, Indonesia, Australia and South Africa, the researchers said.

The study by VK Patel of Cranfield University in the UK and PA Taksal of

the Indian Institute of Technology, Kharagpur, calculated India's annual contribution to present-day warming from 1750 to 2024. The researchers also assessed

OWNER DETAINED

Oxygen cylinder blast kills one, injures four

OUR CORRESPONDENT

New Delhi, September 9

One person was killed and four others injured after an industrial oxygen cylinder exploded while it was being unloaded from a truck at a commercial godown in southeast Delhi's Okhla Phase-I on Wednesday, police said.

The deceased was identified as Mohit Singh (35), a helper working with a company which operates from Okhla Phase-I. He was a resident of Jaitpur in Delhi and had reportedly been working with the firm for around three years, police said.

The injured were identified as Umesh, Arvind, Manoj and Pankaj. They were immediately rushed to the AIIMS Trauma Centre for treatment.

According to officials, a PCR call regarding the blast was received at 10.45 am, following which police and fire department teams reached the spot and secured the area. Three water tenders and a multi-casualty first responder vehicle were also rushed to the site following information about the blast.

A preliminary police inquiry found that the labourers were working for a firm engaged in trading and local distribution of industrial oxygen cylinders, which were intended for medical purposes and gas-cutting work.

The firm's manager, in a statement, said the vehicle carrying the cylinders

Forensic officials at the site in southeast Delhi's Okhla Phase-I, on Wednesday

“THE BLAST WAS SO INTENSE THAT A RINGING SOUND CONTINUED IN OUR EARS FOR SOME TIME

arrived at the premises in the morning, as part of the firm's routine operations. The workers were unloading the cylinders and shifting them inside the godown when one of the cylinders fell onto the road.

“An immediate explosion followed. Preliminary inquiry suggests that only one cylinder exploded. The exact technical cause of the blast has not yet been established. The scene, the cylinder, the vehicle and other relevant material will be examined by technical and forensic agencies to determine the precise cause of the explosion,” a police officer said.

After the blast, Badarpur Sub Divisional Magistrate Yogesh Pal reached the spot and told the media that they received the call and multiple teams from the Delhi Fire Service, police and other teams reached the spot.

“One person died and four others injured. We have identified the person who died and the process of identifying those four injured are underway,” Pal said. The blast was powerful enough to shatter glass windows of nearby buildings, according to eyewitnesses.

Pawan, who works at a nearby factory, said the explosion was extremely loud and initially felt like a bomb blast.

“The blast was so intense that a ringing sound continued in our ears for some time,” he said.

Meanwhile, the owner of the commercial godown in Delhi's Okhla Phase-I was detained on Wednesday.

Manipuri musician's killing: Accused wanted to 'teach him a lesson' over objection to noise

OUR CORRESPONDENT

New Delhi, September 9

The accused in the killing of Manipuri musician Chongtham Vikram Singh in southeast Delhi allegedly wanted to “teach him a lesson” for objecting to noise outside his home by beating him, but did not expect the assault to turn fatal, police said on Wednesday.

During questioning, the accused allegedly told the police that they assaulted the 54-year-old musician with fists and blows after he objected to the commotion outside his residence

in Kilokari, according to the police.

Singh had on some occasions complained to the owner of a nearby dhaba about the noise caused by people gathering there, a senior police officer said. However, the police had not received any formal complaint from Singh regarding the noise.

The dhaba remained open until around midnight and attracted customers from neighbouring areas as well as students living in the vicinity, they said.

The police said they were examining all aspects of the

case, including whether there was any racial angle. So far, the investigation has not revealed any instance of racial slur being used against Singh during the altercation, a police source said.

The FIR registered at Sunlight Colony police station on the complaint of Singh's son mentions section 103(2) (Murder) of the Bharatiya Nyaya Sanhita, pertaining to group murder in circumstances covered by the provision.

The police are awaiting the post-mortem report to ascertain the exact nature of

injuries sustained by Singh. Prima facie, it appears that he sustained internal injuries which led to the death.

The incident took place around 11.30 pm on Sunday when Singh went downstairs after hearing a commotion outside his home. According to the complaint, when his son heard his father shouting, he opened the door and saw a group of men kicking and punching him.

Singh subsequently returned upstairs but complained of breathlessness and was taken to Holy Family Hospital by his 20-year-

old son Yaiphaba. He succumbed to his injuries around 6 am the following day, the police said.

The musician's family alleged that the accused had earlier threatened him over his objections to the noise created outside his home.

Seven men have been arrested and a juvenile apprehended in connection with the case. The accused have been identified as Bharat Kumar (19), Pramod (26), Ramzan Khan (22), Deepanshu (21), Mohan Vishwakarma (32), Vijay (36) and Mannu (26), the police said.

Minister Sood urges GGSIPU students to turn aspirations into action

OUR CORRESPONDENT

New Delhi, September 9

Delhi Higher Education Minister Ashish Sood on Wednesday urged students of Guru Gobind Singh Indraprastha University (GGSIPU) to move beyond conventional career aspirations and actively contribute to solving the city's civic challenges, while highlighting the government's plans for safer student accommodation and a stronger start-up ecosystem.

Addressing the inaugural session of the Students' Induction Programme 2026 at GGSIPU, Sood described the new batch as the country's aspirational youth and the “Amrit Pee-dhi” that would carry for-

ward the vision of a “Viksit Bharat”.

The minister stressed the need to expand quality higher education opportunities in Delhi, saying the government and educational institutions must work together to create more campuses, improve facilities and strengthen academic ecosystems.

Sood also said the Delhi government was working towards a stronger legislative mechanism for education and PG facilities to ensure students have a safer and more supportive living environment. The issue assumes significance amid the ongoing scrutiny of PG accommodation in the capital following the Satya Niketan building collapse.

Briefs

Woman gets 'I love you' text

NOIDA: A Noida woman has alleged that a Rapido delivery rider sent her unsolicited personal messages, including “I love you”, shortly after delivering her order. Digital communication expert Geetika Srivastava said she had booked two Rapido deliveries on Sunday morning. About two hours after the second order was delivered, she noticed a message from the rider on the Rapido portal. The rider first asked, “Hello, how are you?” and soon followed it with “I love you”.

Constable dies en route to posting

GHAZIABAD: A 24-year-old Uttar Pradesh Police constable, who had recently completed his training and was on his way to his first posting, died after the auto-rickshaw he was travelling in was hit by an unidentified vehicle in Loni on Wednesday early morning. The deceased, Suraj, was a 2025-batch constable and originally belonged to Agra. He had recently completed his police training and was posted at Loni police station as his first assignment. According to police, Suraj was travelling towards the police station for official work when the accident took place on the Banthla-Chirori road.

Parole jumper held

OUR CORRESPONDENT

New Delhi, September 9

A 42-year-old man, who had been absconding for nearly 11 years after jumping parole in a murder case, has been arrested by the Delhi Police in connection with a Rs 50 lakh armed robbery, an official said on Wednesday.

Sharafat Ali alias Mama had been evading the law since 2015 after failing to surrender following the expiry of parole granted to him by the

Delhi High Court. “Ali, a resident of Uttar Pradesh, was apprehended from the loop at DND Flyover near the end point of the Delhi-Mumbai Expressway towards Ashram Chowk on August 30,” a senior police officer said.

A country-made pistol and a live cartridge were recovered from his possession. He was wanted in connection with the robbery of Rs 50 lakh at gunpoint in the Khajuri Khas area on March 7 this year, he said.

Faridabad: Infant dies in bucket drowning

OUR CORRESPONDENT

New Delhi, September 9

In a tragic incident, a one-year-old boy died after drowning in a water-filled bucket while playing at his home in Jeevan Nagar Part-2, Faridabad, police said on Wednesday. The deceased child was identified as Aryan. Aryan's grandmother, Meena, said that at the time of the incident, the child and her mother were upstairs at home.

While her mother was in a room, Aryan was playing outside. His father was away at work. While playing, he wandered towards a bucket full of water kept near the bathroom and fell into it headfirst.

“After some time, I realised something was amiss when I could no longer hear any sound from the child,” Meena said, adding that when she went to check on Aryan, she found him in the bucket.

L-G SEEKS ACCOUNTABILITY, BETTER COORDINATION

Ahead of winter, L-G, CM direct officials to intensify pollution-control measures

OUR CORRESPONDENT

New Delhi, September 9

Delhi Lieutenant Governor Taranjit Singh Sandhu and Chief Minister Rekha Gupta have directed authorities to step up pollution-control measures ahead of winter, ordering weekly meetings of cross-functional teams and deployment of senior officers to oversee mitigation efforts at Delhi's 47 identified air pollution hotspots.

The directions were issued at a high-level meeting chaired jointly by the lieutenant governor and the chief minister to review the preparedness of various agencies to tackle air pollution in the national capital.

Thirteen senior officers, including additional chief secretary, principal secretary and secretary have been made in charge of the 47 pollution hotspots spread across Delhi's 13 districts to ensure effective

implementation of mitigation measures, officials said.

The meeting was attended by ministers Ashish Sood, Manjinder Singh Sirsa and Pankaj Kumar Singh, along with the chief secretary and senior officials from the MCD, Delhi Jal Board, Traffic Police, NDMC, PWD, DDA, Environment Department and Transport Department.

The L-G and the chief minister reviewed measures being taken to address pollution caused by road

dust and construction and demolition waste, vehicular and industrial emissions, and open burning.

A comprehensive action plan for a 3x3-km area around each of the 47 identified pollution hotspots was also discussed.

Dust generated at Metro construction sites emerged as a major concern during the meeting, following which the Delhi Metro Rail Corporation was directed to immediately take remedial measures and minimise

dust emissions at its construction sites.

Road-owning agencies were asked to prioritise stretches where residents are facing dust-related problems and ensure daily monitoring of mechanised sweeping, water sprinkling, pothole repair and road restoration. The authorities were also informed that bitumen-based road redevelopment works had been delayed due to limited availability of bitumen amid the situation in West Asia. With supplies now improving, road repair works across the city have been expedited, the meeting was told.

On vehicular pollution, the traffic police were directed to conduct a fresh assessment of the city's 62 identified traffic choke points and inform the concerned agencies, including the PWD, MCD and DDA, to take corrective measures.

The meeting also discussed reducing traffic con-

gestion and vehicle idling through improved signal management, removal of encroachments and obstructions, junction improvements, parking management and faster response to traffic incidents. Officials noted that unauthorised parking by cars, autorickshaws and e-rickshaws on several road stretches was blocking a significant portion of the available right of way, leading to traffic snarls and higher vehicular emissions.

The authorities were directed to intensify anti-encroachment drives at such locations.

The LG and the chief minister also called for accelerating the transition to electric vehicles across categories, including two-wheelers, three-wheelers, light motor vehicles and medium motor vehicles, and directed departments to develop adequate EV charging infrastructure.

BRICS: MCD and PWD race to spruce up Delhi

ANAMTA FATIMA

New Delhi, September 9

With the BRICS Summit 2026 drawing closer, civic agencies are racing against time to give the Capital a cleaner and more presentable look, with the Municipal Corporation of Delhi (MCD) and the Public Works Department (PWD) conducting a joint inspection of key stretches on Wednesday.

MCD Commissioner Sanjeev Khirwar, along with PWD Principal Secretary Sandeep Kumar, reviewed preparations on the ground, covering areas around the summit venue at Bharat Mandapam and several important visitor routes across the city.

Officials were directed to intensify deep cleaning and ensure that sanitation measures were not limited to the main venue but extended to adjoining roads, markets, footpaths, green belts and other vulnerable spots.

The inspection team also visited Sarai Kale Khan, Lodhi Road and Nizamud-

din in the South-East Zone, where officials were asked to ensure adequate deployment of sanitation workers, machinery and supervisory staff during the final phase of preparations.

The review later covered Saket and Sheikh Sarai in the South Zone. The Commissioner directed departments to ensure visible improvements in sanitation, roads and footpaths, green spaces and public conveniences, besides strengthening enforcement, animal and vector control measures.

Lighting, beautification and branding were also reviewed as part of the city's preparations to receive delegates and visitors.

With multiple agencies working together, the focus is now on ensuring that the Capital not only looks ready for the high-profile summit but also remains clean, safe and welcoming for residents and visitors. The joint inspection comes as civic authorities enter the crucial final stretch of preparations for BRICS 2026.

ANAMTA FATIMA

New Delhi, September 9

Ahead of the BRICS Summit, New Delhi is getting a green-and-floral makeover, with roads, roundabouts and public spaces being dressed up to offer delegates a more vibrant welcome to the capital.

The New Delhi Municipal Council (NDMC) has rolled out an extensive beautification plan, with more than 15,000 ornamental potted plants, floral boards at 15 locations and artistically designed floral fountains at nine locations planned along prominent stretches and routes leading to Bharat Mandapam.

Major avenues have undergone multi-tiered plantation, with shrubs, trees and ornamental plants filling gaps and covering barren patches. Hedges, shrubs and topiaries are being trimmed and shaped regularly, while a special tree-pruning drive has been undertaken to remove overgrown branches, clear dark spots

and improve the visibility of road signs.

The makeover extends to markets, hotels, roundabouts, entry points and central verges, where flowering pots have been arranged in decorative patterns to add colour to the cityscape.

At the heart of the preparations is the BRICS Friendship Rose Garden in Chanakyapuri, a three-acre green space established in 2016 to commemorate India's hosting of the summit that year. The garden houses 107 varieties of roses and symbolises friendship and unity among BRICS nations.

With grass cutting, pruning, landscaping and floral arrangements underway, the garden is being readied alongside the Chanakyapuri Diplomatic Enclave and VIP routes.

For a city often defined by its traffic and concrete, NDMC's latest preparations aim to ensure that the capital's first impression is one of greenery, colour and hospitality.

Two lakh PGs, one-week deadline, civic machinery on test

AIMAN FATIMA
New Delhi, September 9

The Delhi government’s decision to complete structural audits of buildings in major paying guest (PG) hubs within a week has put the spotlight not only on the safety of student accommodation but also on the ability of the civic machinery to sustain inspections beyond the immediate aftermath of the Satya Niketan collapse.

The Municipal Corporation of Delhi (MCD) has begun a city-wide survey of PG accommodations following the collapse of the building. The initial exercise identified more than

1,100 PG units housing over 20,000 people, with 52 PGs found to be operating from dilapidated buildings, some news reports suggested. The government has also announced mandatory structural audits and safety certification for buildings being used for public activities, including PGs, schools and nursing homes.

The numbers, however, raise a larger concern. With estimates suggesting that Delhi could have around 2 lakh PG accommodations, the scale of the task is far greater than the emergency inspection drive currently underway. At the pace of

1,150 establishments a day, reaching two lakh would take nearly six months, and that too if teams maintained the same pace every day without having to conduct repeat or detailed structural checks.

A senior engineer said the government must distinguish between “enumeration and actual structural safety assessment”, as the latter requires qualified engineers, access to building records and, in some cases, technical testing.

“An inspection cannot become a tick-box exercise after a tragedy. A proper structural audit has to establish whether the

“**AT THE PACE OF 1, 150 ESTABLISHMENTS A DAY, REACHING TWO LAKH WOULD TAKE NEARLY SIX MONTHS, AND THAT TOO IF TEAMS MAINTAINED THE SAME PACE EVERY DAY WITHOUT HAVING TO CONDUCT REPEAT OR DETAILED STRUCTURAL CHECKS**”

building can safely carry its present load, whether unauthorised alterations have compromised the structure and whether the use of the building has changed its risk profile,” he said.

“If the system is genuinely proactive and the machinery is so active now,

beyond Satya Niketan. “In areas like Batla House and Tughlaqabad, many buildings are in such poor condition that we are constantly worried. These areas come under South Delhi, yet the situation is so bad that we fear if one building collapses, the impact could reach the adjoining structures too,” said a student living in the area.

Experts said the government must therefore ensure that the current drive does not become a momentary post-tragedy exercise.

“The real test will be what happens after one week. If inspections stop once the headlines disap-

pear, the exercise will have achieved very little. Safety certification has to become a continuing system, with periodic audits and clear accountability when violations are detected,” they asserted.

Following the Satya Niketan collapse, the Delhi government has stepped up inspections of PGs and hostels and directed authorities to conduct structural safety audits in major PG hubs. The MCD has launched a broader survey to identify PG establishments and buildings in poor condition.

The government is also working on a regula-

tory framework for PGs that is expected to bring licensing, registration and safety requirements under a formal system. Proposed measures include structural and fire-safety certification, police verification and municipal clearances, along with greater monitoring of PG establishments.

The administration has also indicated that vacant government properties could be explored for student accommodation, while civic authorities have been directed to identify unsafe structures and take necessary action.

Ex-IAS Subhash Das appointed new DERC head

OUR CORRESPONDENT
New Delhi, September 9

Former IAS officer Subhash Chandra Lal Das has been appointed as the chairman of Delhi’s power regulator DERC, a notification issued on Wednesday said.

Ajay Kumar Jain, a retired district judge, has been appointed as member (legal) and Praveen Gupta, member (thermal) of Central Electricity Authority, has been appointed as member (non-legal) of the DERC, separate notifications said.

The post of Delhi Electricity Regulatory Commission (DERC) chairman was lying vacant for more than a year. In a clean break from the past tradition, a retired IAS officer, instead of any retired high court judge, has been given charge of the DERC, officials said.

“In exercise of the powers conferred by Section 45D of the Government of National Capital Territory of Delhi (Amendment) Act, 2023 readwith Section 84(I) of the Electricity Act, 2003, the President is pleased to appoint Subhash Chandra Lal Das (Retd.) IAS (AGMUT:1992) as the Chairperson of Delhi Electricity Regulatory Commission,” said the notification issued by Delhi government’s Power department.

In May, a committee was formed by Lt Governor Taranjit Singh Sandhu for selection DERC chairperson and its two members.

Students, PGs get police outreach push

SHIVANGI SHUKLA
New Delhi, September 9

Delhi Police has directed all Station House Officers and Assistant Commissioners of Police to regularly interact with college students and those living in PGs, rented and other accommodations to address their security concerns.

The order was issued on September 9 following directions from Delhi Lieutenant Governor Sardar TS Sandhu to strengthen police outreach and confidence building among the student community. The concerned officers, particularly in areas with a significant concentration

CLOSER LOOK

» The Delhi Police has also been directed to submit an Action Taken Report on the exercise by September 20, 2026

» The exercise has been directed to be carried out in a purposeful and responsive manner, with emphasis on establishing direct communication between local police and the student community

of colleges, universities, student accommodations and PG facilities, have been asked to undertake structured and proactive interactions with

students within their respective jurisdictions. The Delhi Police has also been directed to submit an Action Taken Report (ATR) on the exercise by Septem-

ber 20, 2026. During these interactions, police officials will listen to and identify the security and safety concerns of students and assess local issues related to crime, harassment, women’s safety, accommodation related concerns and other matters affecting their sense of security. The officers have been directed to take prompt corrective and preventive measures on issues falling within the jurisdiction and mandate of the local police. Wherever intervention from other civic agencies is required, they will coordinate with the concerned departments or agencies.

The exercise has been

directed to be carried out in a purposeful and responsive manner, with emphasis on establishing direct communication between local police and the student community and creating greater confidence in the availability and accessibility of police assistance. The L-G has also directed Delhi Police to publicise the initiative through its official social media platforms and other suitable channels as a police outreach effort towards college students and youths residing in PGs and rented accommodations. The publicity, however, has been directed to strictly reflect substantive field engagement and meaningful follow up.

MCD demolished 34 structures, sealed 17

OUR CORRESPONDENT
New Delhi, September 9

Over the past two days, the Municipal Corporation of Delhi (MCD) has carried out 34 demolition actions and sealed 17 properties across its 12 zones, according to a statement on Wednesday.

The civic body also identified around 1,243 buildings operating as paying guest (PG) accommodations, housing 24,000 occupants, to create a database and assess their structural safety.

The ramped-up action comes in the wake of the collapse of a building being run as a boys’ paying guest in south Delhi’s Satya Niketan. Seven people died in that incident. The MCD said it is assessing PG buildings for vulnerabilities, with particular focus on those having more than five storeys with RCC-framed structures or more than four storeys with load-bearing brick-wall structures.

Based on field assess-

ments, the buildings are being classified as “visibly safe”, “visibly repairable – needs minor repairs”, “visibly repairable – needs major repairs” and “visibly vulnerable/dangerous”.

The civic body issued 22 show-cause notices and passed four demolition orders as part of Wednesday’s enforcement drive against violations of building bye-laws and the Master Plan of Delhi.

On Tuesday, the MCD demolished 17 properties and sealed five for various violations.

Among the properties targeted on Wednesday was a building near Jama Masjid, with the MCD demolishing two roof panels on the ground floor and a partition wall.

A demolition action was taken against an unauthorised construction at Sadak Prem Narain in Bazar Sitaram, and properties declared dangerous in Vikas Nagar and Sector 17, Dwarka.

A Municipal Corporation of Delhi official arrives to dismantle an unsafe adjacent structure, Wednesday

Collapse: PG operator arrested

OUR CORRESPONDENT
New Delhi, September 9

A PG operator has been arrested in connection with the collapse of a five-storey building in Delhi’s Satya Niketan that left seven people dead, as police are probing the role of the leaseholders of the building on lease and the construction and repair work carried out there, sources said on Wednesday.

Sudhanshu, one of the two business partners running the ‘Hostel Daze’ PG, was arrested during the investigation and is being questioned by police, sources said.

Police sources said the building owner Mahesh had leased the property to Sud-

hanshu and his business partner Shubham Tyagi in August 2025. The duo subsequently started operating the premises as a paying guest accommodation under the name ‘Hostel Daze’. Tyagi is currently absconding and efforts are underway to trace him, the sources said. A labour contractor, Sanoj, has already been apprehended in connection with the case. He is being brought from Kasganj in Uttar Pradesh to Delhi for questioning over the construction and repair work carried out at the building.

The development comes as investigators scrutinise the rent agreement under which the PG was being operated. According to a police source, the agree-

ment stated that the PG operators would not be responsible for any “casualties or risk” to tenants.

It also purportedly said the hostel would not be liable to pay compensation for personal injury, loss or damage to belongings caused by circumstances beyond its control, including sealing, fire, earthquake and heavy rain.

The agreement also contained clauses related to non-refund of hostel fees and security money and empowered the operators to evict tenants for indiscipline, misconduct, non-payment of dues or other violations. Parents and guardians were barred from entering tenants’ rooms, according to the document.

DELHI GETS SEPARATE PWD ENGINEERING CADRE PWD breaks from CPWD

AIMAN FATIMA
New Delhi, September 9

Delhi’s roads, bridges and public buildings could soon get a more locally accountable engineering system, with the Centre approving the separation of 3,214 sanctioned engineering posts in the Delhi PWD from the Central Public Works Department (CPWD) cadre. The move ends a nearly three-decade wait for an independent engineering cadre for the Capital.

The step, approved by the Centre on Wednesday, is aimed at speeding up construction and infrastructure works, improving monitoring and fixing greater accountability among engineering officials, Chief Minister Rekha Gupta said.

Welcoming the decision, Gupta described it as a “historic step” towards making Delhi a developed, safe and world-class capital. She said the creation of an independent cadre had been pending for nearly three decades and would allow the Delhi government to develop an engineering system suited to the capital’s specific requirements.

“Delhi needs a strong, capable and accountable engineering system of its

CM GUPTA DESCRIBED IT AS A ‘HISTORIC STEP’ TOWARDS MAKING DELHI A DEVELOPED, SAFE AND WORLD-CLASS CAPITAL

undertake several major infrastructure projects in the coming years, including a new Secretariat and mini-secretariats across all 11 districts, besides works related to roads, bridges, mandis, sports facilities and other public infrastructure.

The Chief Minister also linked the reform to greater transparency and accountability. She said an independent cadre would make it easier to fix responsibility when deficiencies or irregularities are detected in construction projects, rather than allowing transfers to disrupt the process of accountability. PWD Minister Parvesh Sahib Singh Verma also welcomed the Centre’s approval, saying “the move would strengthen Delhi’s capacity to execute infrastructure projects and ensure greater accountability in public works.”

The Delhi government had earlier approved the proposal in a Cabinet meeting chaired by Gupta before it was sent to the Centre. Welcoming the approval, a government statement said the reform would make Delhi’s engineering administration more self-reliant and strengthen its capacity to execute and maintain public infrastructure.

From Saket to Satya Niketan: 16 killed in 5 building collapses in Delhi this yr

PRESS TRUST OF INDIA
New Delhi, September 9

The five-storey building that collapsed in Satya Niketan is the fifth in the city this year, the seven people killed in the congested colony near Delhi’s University’s South Campus taking to 16 the number of those who lost their lives in the tragedies.

According to official figures and police statements, the 16 deaths have come from three incidents - six in Saket in May, three in Rohini in July and seven in the latest incident on September 6.

The underlying factors leading to the collapse of all the buildings are common, said officials. These include unregulated and unauthorised construction, additional floors, ageing structures and a lack of structural assessments. Add to the list inadequate precautions during repair work and monsoon-related water damage to foundations, walls and basements and the picture of negligence is complete.

On May 30, a multi-storey commercial building housing a coaching centre,

cafes and offices in south Delhi’s Saket area crumbled like a house of cards. Like in Satya Niketan, most of the six killed were students. Eight people were injured.

A magisterial inquiry ordered by the Delhi government later held the Municipal Corporation of Delhi (MCD) “primar-

ily responsible” for the collapse.

It found that illegal third and fourth floors had been added to the building and that the civic body failed to act on a complaint about the unauthorised construction received more than two months earlier. The inquiry also found that MCD offi-

cials created “fabricated” records after the collapse to suggest they had already taken action. The MCD suspended two engineers, while police arrested the building owner and two contractors.

On July 8, a four-storey building under construction collapsed in Rohini’s Sector 16 amid heavy rain, killing three people and burying others under the debris. The MCD said the structure had received sanctioned building plans under the SARAL Scheme, which allows automatic clearance and building permits through a self-verified undertaking submitted by property owners through certified architects or engineers. It said plumbing work involving the cutting of structural beams and columns may have contributed to the collapse. The other two incidents caused injuries and damage but resulted in no deaths. On June 2, a single-storey house operating as an illegal utensil-colouring factory collapsed in Mukundpur in north Delhi following an LPG cylinder blast. Eleven workers were trapped and injured, one of them critically.

Chadha filed Form 6 on August 26, approved after due procedure: Delhi poll body

OUR CORRESPONDENT
New Delhi, September 9

After AAP questioned the addition of Raghav Chadha’s name to Delhi voter list, the Delhi poll body on Wednesday said the BJP Rajya Sabha MP filed Form 6 for inclusion in the Rajinder Nagar electoral roll on August 26 and his application was approved on September 2 after due procedure.

“As per record available, Raghav Chadha, MP (Rajya Sabha) applied for inclusion of his name in Form 6 in AC-39 (Rajinder Nagar) on August 26,” the office of Delhi Chief Electoral Officer said. The application, bearing number U05039-DGN2608261200000, was approved by the Electoral Registration Officer after completion of the mandatory seven-day notice period, it said.

“The Form was approved by the Electoral Registration Officer of the AC-39 (Rajinder Nagar) after completion of mandatory notice period of 07 days,” the Delhi CEO office said.

NEXT HEARING ON SEPTEMBER 17

Consider exempting Class 6 this year from 3-language policy, SC asks CBSE

MPOST BUREAU
New Delhi, September 9

The Supreme Court on Wednesday asked the Central Board of Secondary Education (CBSE) to consider exempting Class 6 students from its three-language policy for this academic year.

A three-judge bench led by Chief Justice of India (CJI) Surya Kant, while deferring the hearing on a batch of pleas challenging the CBSE's three-language policy to September 17, asked the Board to look into the possibility of accommodating the students of Class 6 in the ongoing academic session.

"Consider Class 6 for this year... If they can be given some accommodation," the bench, also comprising Justices Joymalya Bagchi and V Mohana, told Solicitor General (SG) Tushar Mehta.

SG Mehta requested the court to defer the hearing on the pleas as Additional Solicitor General Aishwarya Bhati was not available.

He nonetheless assured that the officials concerned would consider the bench's suggestion.

"All of us would sit together and revert to your

HIGHLIGHTS

- » A three-judge bench led by Chief Justice of India Surya Kant, while deferring the hearing on a batch of pleas challenging the CBSE's three-language policy to September 17, asked the Board to look into the possibility of accommodating the students of Class 6 in the ongoing academic session
- » 'Consider Class 6 for this year... If they can be given some accommodation,' the bench, also comprising Justices Joymalya Bagchi and V Mohana, told SG Tushar Mehta
- » SG Mehta requested the court to defer the hearing on the pleas as Additional Solicitor General Aishwarya Bhati was not available
- » He nonetheless assured that the officials concerned would consider the bench's suggestion

lordship," the top law officer said.

The senior counsel

for one of the petitioners said the matter should not be delayed due to more

adjournments as students have to ultimately take an examination and it was causing anxiety among their parents.

The apex court was hearing a batch of pleas challenging the CBSE's policy mandating the study of three languages, including two native Indian languages, for Class 9 students from July 1.

On August 20, the Supreme Court had stressed the need to find a solution to issues arising out of the CBSE policy mandating the study of three languages by Class 9 students, observing that children should not come under any kind of pressure.

It had said there was nothing wrong in introducing the policy but the only concern raised by the petitioners was about the manner in which it was being introduced.

The bench had noted that one of the aspects that was required to be considered was how to build adequate human resource infrastructure with regard to the language options available.

"If you have chosen Class 6 as the starting point, you may consider giving a reprieve to Class 6

students of this year. You can introduce it from next year," it had said.

The senior counsel for one of the petitioners has contended that the CBSE has no jurisdiction or authority to frame the curriculum for classes 6 to 8 as this has to be done by the NCERT.

On May 27, the top court had agreed to examine a plea challenging the policy and issued notices to the Centre, the CBSE and the NCERT seeking their responses.

According to a circular issued by the CBSE, the study of three languages, including at least two native Indian languages, has been made compulsory for Class 9 students beginning July 1.

The move is part of the CBSE's alignment of its scheme of studies with the National Education Policy (NEP) 2020 and the National Curriculum Framework for School Education (NCF-SE), 2023.

According to the circular issued on May 15, students opting for a foreign language may do so only as the third language after studying two native Indian languages, or as an additional fourth language.

Marital rape pleas: SC set to begin final hearing after 3-week

MPOST BUREAU
New Delhi, September 9

The Supreme Court on Wednesday said it would list for final hearing after three weeks a batch of petitions pertaining to the contentious issue of marital rape.

The apex court is seized of petitions raising the vexed legal question of whether a husband should enjoy immunity from prosecution for the offence of rape if he forces his wife, who is not a minor, to have sex. Under the exception clause of Section 375 of the Indian Penal Code, now repealed and replaced by the Bharatiya Nyaya Sanhita, 2023, sexual intercourse or sexual acts by a man with his wife, the wife not being minor, is not rape.

Even under the new law, exception 2 to section 63 (rape) says that "sexual intercourse or sexual acts by a man with his own wife, the wife not being under eighteen years of age, is not rape".

The batch of pleas concerning the issue came up for hearing before a bench of Chief Justice Surya Kant and Justices Joymalya Bagchi and V Mohana.

Solicitor General Tushar Mehta, appearing for the

THE BATCH OF PLEAS CONCERNING THE ISSUE CAME UP FOR HEARING BEFORE A BENCH OF CHIEF JUSTICE SURYA KANT AND JUSTICES JOYMALYA BAGCHI & V MOHANA

Centre, told the bench that counter affidavit filed earlier by the Centre in the lead case may be treated as reply in other petitions as well.

"List the matter for final hearing after three weeks," the bench said, indicating that the matter would be heard on Wednesdays and Thursdays.

"We will notify the date," the CJI said.

During the hearing, the bench observed that it would examine the aspects, including whether a prosecution can be sustained if the marital rape exception survives, and whether the exception itself was constitutionally valid.

On September 7, senior advocate Indira Jaising had mentioned before the bench one of the petitions related to the prosecution of a husband for marital rape.

India sends fresh tranche of aid to flood-ravaged Nepal

MPOST BUREAU
New Delhi, September 9

India on Wednesday sent a fresh tranche of humanitarian aid comprising 35 tonnes of relief material and equipment onboard a C-17 transport aircraft to flood-ravaged Nepal, officials said.

The death toll from the devastating flash floods in Nepal climbed to 1,365 on Wednesday as more bodies were recovered from the affected areas, according to authorities.

The first tranche of relief material was sent by India hours after Prime Minister Narendra Modi spoke to his Nepalese counterpart Balendra Shah on August 26, the day flash floods struck the Himalayan nation. Since then, New Delhi has sent multiple consignments, including relief supplies and essential medicines, besides deploying an Indian tunnel rescue team, who are continuing to work alongside the Nepalese Army, and a forensic team to aid in the identification of mortal remains of the victims.

India on September 3 night had dispatched its sixth tranche of over 21 tonnes of essential relief supplies on board two military transport aircraft to flood-ravaged Nepal.

'All are treated equally': SC to complainant alleging delay in hearing defamation case against Rahul

MPOST BUREAU
New Delhi, September 9

All are treated equally, the Supreme Court on Wednesday said after the counsel appearing for the complainant in a defamation case filed against Congress leader Rahul Gandhi claimed that the matter was not listed for hearing in the apex court since long.

The top court is hearing Gandhi's petition challeng-

ing a May 29 last year order of the Allahabad High Court.

The high court had dismissed his plea challenging the trial court's summoning order in the case related to his alleged derogatory remarks against the Indian Army during his 2022 Bharat Jodo Yatra.

On August 4 last year, the apex court had stayed further proceedings in the complaint case pending before a Lucknow court till the next

date of hearing.

On December 4, the top court had admitted the appeal filed by Gandhi, and said it would hear the matter in detail. It had listed the matter for April 22.

On Wednesday, applications seeking early hearing in two separate pending petitions related to another defamation case were listed for hearing before a bench of Chief Justice Surya Kant and Justices Joymalya Bag-

THE TOP COURT IS HEARING GANDHI'S PETITION CHALLENGING A MAY 29 LAST YEAR ORDER OF THE ALLAHABAD HIGH COURT

chi and V Mohana.

Both these petitions were earlier tagged with Gandhi's plea. Senior advocate Gaurav Bhatia, appearing

for the complainant who has filed the complaint against Gandhi, said the matter be heard and it be de-tagged with the two separate pleas.

The bench asked Bhatia to file an appropriate application in this regard.

Bhatia urged the bench that a specific date be given for hearing Gandhi's plea.

"The last order says that list it on April 22. Just because a person is involved, the matter is not

being listed. I am only saying that the matter be heard and de-tagged," he said.

Bhatia said the matter was not listed despite the judicial order to list it and the situation does not augur well for the institution as well.

"He is not a VIP that the matter will not be listed. He is enjoying the stay," he said.

The bench observed, "You follow the procedure and file an application seek-

ing early hearing. All are treated equally. You file your separate application".

The top court had earlier issued notice to the Uttar Pradesh government and complainant Udai Shankar Srivastava seeking their responses on Gandhi's plea.

Before the trial court, the complainant had claimed that Gandhi made several alleged derogatory remarks against the Indian Army in context of the clashes with

Chinese soldiers during his December 2022 yatra.

The trial court summoned Gandhi as an accused for facing trial for the alleged offence of defamation.

Gandhi's counsel had denied the allegations and argued before the high court that the trial court had not examined the entire facts and material to examine whether a case for trial for the offence of defamation was made out.

Two-day BRICS Summit

the UAE and Saudi Arabia. Indonesia joined in 2025, taking the membership to 11 countries. Belarus, Bolivia, Kazakhstan, Cuba, Malaysia, Nigeria, Thailand, Uganda, Uzbekistan and Vietnam joined as partner countries last year.

The expanded grouping accounts for about 49.5 per cent of the world's population, around 40 per cent of global GDP and roughly 26 per cent of global trade, making it an important forum for emerging economies.

India's chairship for 2026 is built around four pillars: resilience, innovation, cooperation and sustainability. Officials said strengthening cooperation in health, agriculture, food security, energy, disaster risk reduction and supply chains has been a key focus under the resilience pillar.

Trade, investment, connectivity and high technology are also expected to feature prominently in the summit discussions. According to the Ministry of External Affairs, leaders will discuss ways to deepen intra-BRICS cooperation on shared priorities while exchanging views on global and regional developments.

India's chairship follows the theme, "Building for Resilience, Innovation, Cooperation and Sustainability", with a stated focus on a people-centric approach guided by the principle of "humanity first".

More than 350 meetings and high-level engagements have been organised in over 25 cities during India's chairship. These engagements have sought to

advance cooperation across BRICS' three broad pillars of political and security cooperation, economic and financial cooperation, and cultural and people-to-people exchanges.

India, a founding member of BRICS, has previously chaired the grouping in 2012, 2016 and 2021. It assumed its fourth chairship on January 1, 2026.

According to the MEA schedule, the summit will begin at 2.35 pm on Saturday with a closed-door meeting of BRICS members on "Inclusive Global Governance and Strengthening Multilateralism". Leaders will then visit the "Bharat Innovates Exhibition" at 4.25 pm.

At 5.05 pm, the leaders will gather at the lawns of Bharat Mandapam for a family photograph and a joint tree-planting ceremony. The day's programme will end with a gala dinner hosted by Prime Minister Narendra Modi at 7.30 pm.

The second day's proceedings will begin with the arrival of leaders from BRICS members, partner countries and outreach invitees from 9.55 am. An official group photograph is scheduled for 10.35 am, followed by the open session at 10.50 am.

The session, titled "Resilience, Innovation, Cooperation and Sustainability: Shaping the Future for Inclusive Global Growth", will focus on the broader priorities of India's BRICS chairship.

The summit is scheduled to conclude with the release of the New Delhi Declaration.

CM Gupta orders

records to determine when unauthorised construction was carried out and identify the authorities responsible for

the premises during the period when the violations occurred.

The directions come in the wake of the September 6 Satya Niketan tragedy, in which seven people were killed after a five-storey building being used as a boys' PG collapsed. According to the FIR, four floors of the structure were allegedly constructed illegally, raising questions over how the additional construction remained undetected despite the building being used as residential accommodation.

Following the incident, the Delhi government ordered structural audits and safety inspections of PG accommodations, particularly in major student and rental-housing clusters such as Mukherjee Nagar, Rajendra Nagar, Laxmi Nagar, Satya Niketan and Saket.

The inspections are expected to cover sanctioned building plans, structural stability, fire-safety clearances and compliance with applicable building regulations. Authorities have also been asked to identify unsafe or unauthorised additions that may pose risks to occupants.

The MCD has separately initiated action against another structure near the collapsed building. An adjoining dilapidated PG was declared unsafe and ordered to be demolished, with the demolition process beginning on Wednesday.

The government is also preparing a broader regulatory framework for the rapidly expanding PG sector through the proposed Paying Guest Accommodation Regulation and Safety Bill, 2026. The legislation is expected to introduce mandatory licensing for PG operators, periodic structural and fire-safety audits, zone-wise rent bands and a centralised portal containing details of registered

accommodations.

The regulatory push comes against the backdrop of Delhi's wider rental-housing shortage.

With thousands of students and young workers dependent on such accommodation, the latest crackdown puts the focus not only on illegal construction but also on whether Delhi's enforcement machinery can keep pace with the city's growing demand for affordable rental housing.

FIRs against 63 handles on

airport as severely flooded and suggested that flight operations had been disrupted. In one instance, "an old video of waterlogging at Dubai airport was claimed to be a video of Delhi airport," DIAL said in a statement.

The FIR has been registered with the Delhi Police. DIAL said the circulation of such content appeared to be a deliberate attempt to "create public mischief, damage the reputation of a public utility service, and generate unwarranted concerns among passengers."

DIAL operates the national capital's Indira Gandhi International Airport (IGIA), which handles more than 1,300 flight movements every day. The operator said the temporary water accumulation at T3 was linked to heavy rainfall but did not disrupt airport functioning.

CJP protest

Bharatiya Nagarik Suraksha Sanhita (BNSS) to Gautam Buddha University student Akshat Tripathi. It sought a personal bond of Rs 5 lakh for maintaining peace. Officials later said the notice had been revoked. Tripathi denied the allega-

tions, saying he had participated peacefully in the Jantar Mantar protest and was not attending university classes when it took place.

On September 1, the Supreme Court had quashed all FIRs registered against students who participated in CJP-led protests across the country between July 20 and 25. Invoking Article 142 of the Constitution, the bench had closed the criminal proceedings, citing the future prospects of the young protesters.

The court had also directed the Centre to provide compensation within three months to families of students who died by suicide over the NEET paper leak.

The July 20 CJP march in Delhi had witnessed clashes between protesters and security personnel, who used lathis and tear gas to disperse crowds attempting to move towards Parliament.

Cabinet okays over Rs 20,000 cr

Bandhavgarh Tiger Reserve, Virateshwar Temple, Amar-kantak Temple, Jwaleshwar Dham, Achanakmar Tiger Reserve, Khutaghat Dam, Malhar Archaeological Site and Ratanpur Mahamaya Temple.

The government said greater rail use would help reduce logistics costs, oil imports and carbon dioxide emissions. The estimated emissions reduction is equivalent to planting 4.48 crore trees.

India's share in global

contributions from major emitters and countries, includ-

ing Brazil, the UK, Australia, Canada and South Africa.

Much of India's contribution has occurred in recent decades, with the sharpest rise recorded after 1990, the researchers said. The increase has been driven mainly by carbon dioxide emissions linked to fossil fuel use in the energy sector.

Agriculture is the main source of India's non-carbon dioxide warming, with methane and nitrous oxide together accounting for about one-third to two-fifths of the country's total contribution. The researchers described India's emissions profile as more multi-gas in nature than that of many early industrialised emitters.

The study noted that estimating national contributions helps show how emissions accumulated over time have shaped global temperature change. It said understanding India's contribution across sectors and greenhouse gases could provide context for future mitigation policies, particularly as recent emissions growth has increased the importance of decarbonising the energy system.

BJP received Rs 1,473 crore

The BJP's expenditure statements for Kerala and West Bengal have not yet been made public, which means its final receipts and spending for all five states could be higher.

The BJP also recorded a rise in funds held at its headquarters during the election period. Its closing balance increased from Rs 6,722.6 crore on March 15 to Rs 7,627.2 crore on May 6, a rise of Rs

904.6 crore.

The Congress moved in the opposite direction. Its central headquarters and five state units began the period with around Rs 169.06 crore, comprising Rs 22.9 crore in cash and Rs 146.1 crore in bank accounts. By May 6, the combined balance had fallen to about Rs 103.2 crore, a decline of Rs 65.86 crore.

The BJP's available statements show expenditure of around Rs 159.7 crore in Assam, Tamil Nadu and Puducherry. About Rs 130.4 crore went towards general party propaganda, while roughly Rs 29.3 crore was spent on candidates and related expenses.

Assam recorded the highest BJP expenditure at Rs 96.27 crore. Of this, Rs 76.73 crore was spent on general propaganda and Rs 19.54 crore on candidates. Advertising accounted for about Rs 37 crore, while travel by star campaigners cost around Rs 27.3 crore.

In Tamil Nadu, the BJP spent Rs 51.56 crore, including Rs 44.51 crore on general propaganda and Rs 7.05 crore on candidates. Media advertisements cost about Rs 23.96 crore, star campaigner travel Rs 10.04 crore and publicity material around Rs 5.85 crore. In Puducherry, expenditure stood at Rs 11.90 crore.

The Congress spent Rs 143 crore on general propaganda and Rs 105.55 crore on candidates across the five states. Its central headquarters accounted for Rs 40.52 crore of general propaganda spending, while state and local units spent Rs 102.49 crore. Kerala recorded the highest such expenditure at Rs 59.28 crore, followed by Assam at Rs 22.62 crore.

‘SHARED SEAS, SHARED SECURITY’

Rajnath pushes new maritime paradigm with Sri Lanka

SIMONTINI BHATTACHARJEE
New Delhi, September 9

In light of growing challenges in the Indian Ocean, India’s Defence minister Rajnath Singh on Wednesday, emphasised the need for India and Sri Lanka to forge greater maritime cooperation between the two nations by asserting that secure maritime lanes, right of navigation, adherence to international law, and free movement of trade via seas are essential for the safety and economic well-being of the region.

Addressing the audience at the Ministry of Defence in Sri Lanka that included Deputy Minister of Defence Aruna Jayasekara, commanders of the Sri Lankan Army, Navy, and Air Force and senior officials, Singh strongly argued for both the neighbouring states to go beyond traditional defence collaboration and evolve a new structure that could cater to the changing security environment in the Indian Ocean Region (IOR).

What was crucial about the Colombo message, apart from its focus on naval cooperation, was the overall strategic idea behind it, which is that India and Sri Lanka cannot divorce their economic futures from the security of the water bodies connecting them.

As more geopolitical tensions emerge in the ocean, with increasing

Defence minister Rajnath Singh being accorded a Guard of Honour during his visit to the Ministry of Defence of Sri Lanka

KEY POINTS

- » Singh strongly argued for both the neighbouring states to go beyond traditional defence collaboration
- » As neighbours sharing the same maritime space, neither India nor Sri Lanka can afford to ignore what is happening in the greater area around them

maritime activity, smuggling, piracy, illegal fishing, and other forms of non-traditional security challenges, the security of the sea lines of communications has taken on equal importance to economic considerations.

It is precisely this connection between national security and economic development that Singh emphasised, noting that neither of these can be

considered independently, since both are inherently tied to the country’s geographical location and the prevailing security situation.

As neighbours sharing the same maritime space, neither India nor Sri Lanka can afford to ignore what is happening in the greater area around them.

The geographical location of Sri Lanka makes it strategically important.

The fact that Sri Lanka is located very close to one of the most critical east-west maritime routes means that the island country is located at an important node in the shipping lines connecting the oil-rich Middle East and Africa with South and Southeast Asia and beyond. This means that for India, which depends very heavily on the sea route, stability in the area and the Indian Ocean region impacts India economically and strategically.

It was in this context that the Indian defence minister had urged the need to deepen the well-established defence and strategic partnership between the two countries by giving special focus on maritime cooperation.

CPI(M) slams ED move against ex-CM Pinarayi Vijayan

OUR CORRESPONDENT
New Delhi, September 9

The Communist Party of India (Marxist) has been vociferously opposed to the Enforcement Directorate’s move to register a case under the Prevention of Corruption Act against former Chief Minister of Kerala, Pinarayi Vijayan, his daughter Veena Vijayan, and CPI(M) leader Mohammed Riyas, terming it politically motivated.

The CPI(M) Polit Bureau, in its statement on Wednesday, said that the investigation into Veena Vijayan is being used as an excuse to go after Pinarayi Vijayan, who at the time was the Chief Minister.

The party had accused the Narendra Modi-led government of going after their political opponents through Central agencies.

It condemns the ‘indecent behaviour’ of the two members for removing their t-shirts ‘before women, which, besides being highly objectionable, amounts to outrage of the modesty of the women present at the place of the incident.’

Asserting that such behaviour is unbecoming of an MLC, the House said, ‘that no political disagreement, personal grievance or difference of opinion can justify conduct intended or having the effect of lowering the dignity and authority of the Presiding Officer or impairing the orderly functioning of the Legislative Assembly.’

MODI@25

BJP takes ‘Seva Sankalp’ to grassroots

SIMONTINI BHATTACHARJEE
New Delhi, September 9

To mark the 25 years as a constitutional head and the birthday of Prime Minister Narendra Modi, BJP national president Nitin Nabin on Wednesday launched a one-month ‘Seva Sankalp Abhiyan’.

This one-month programme will be a blend of welfare mobilisation, youth empowerment, grassroots-level mobilisation and public participation throughout the country.

The campaign would be held from September 17 till October 17. According to the party, it would use this opportunity not only to celebrate Modi’s journey as a leader but also to spread their governance agenda and the vision of ‘Viksit Bharat 2047’ among crores of people.

BJP chief Nitin Nabin speaks at BJP office

Nitin Nabin announced this campaign from the BJP office here in New Delhi. He informed that the BJP holds the one-month programme every year on the occasion of the Prime Minister’s birthday, which is held on September 17; however, this time it needs to be organised on account of 25 years as a constitutional head.

“Considering that being in office for five years in the government itself is considered an achievement nowadays, it becomes all the

more exceptional to have the blessings of the people come for 25 long years in such a huge democracy,” said the president of the BJP party.

Political communication of the saffron party will revolve around the transformation that the party credits to the leadership of Modi, where Nabin described the career path of the Prime Minister from being a typical party worker to becoming ‘Pradhan Sevak’ for India.

The party president

Ladakh witnesses tourism boom

OUR CORRESPONDENT
Leh, September 9

The Union Territory of Ladakh is witnessing an unprecedented tourism boom, with visitor arrivals during the first eight months of 2026 already surpassing the total tourist footfall recorded throughout 2025.

According to the latest tourism figures, Ladakh received 2.69 lakh tourists between January and August 2025, which rose to 4.05 lakh during January to August 2026, an increase of 50.37 per cent.

In just eight months of 2026, tourist arrivals in Ladakh surpassed the entire 2025 footfall of 3.35 lakh by 20.61 per cent, revealed the figures shared by Ladakh Lieutenant Governor Vinai Kumar Saxena on his official X handle. The tourist arrivals witnessed a substantial increase in August. The total footfall rose from 45,201 in August 2025 to 74,753 in August 2026, marking a significant 65.38 per cent jump.

The surge in tourism has also been strongly reflected in the growing number of international visitors to the

Union Territory. Ladakh welcomed 25,082 foreign tourists between January and August 2025, while the figure increased to 33,346 during the corresponding period in 2026, registering a year-on-year growth of 32.95 per cent.

“This year-on-year tourism growth is a testament to Prime Minister Narendra Modi’s vision for promoting domestic tourism and the Centre’s sustained push for infrastructure development, along with the tourism-friendly policy framework in Ladakh,” the L-G said.

Focus on sustainability, resource efficiency to benefit farmers: Mann

MPOST BUREAU
Chandigarh, September 9

Chief Minister Bhagwant Mann on Wednesday called for closer collaboration with the Confederation of Indian Industry (CII) to accelerate sustainable crop residue management, strengthen horticulture through knowledge and technology exchange, and build a skilled workforce to drive industrial growth in the state.

During a meeting with a CII delegation, the Chief Minister emphasised sustainability, resource efficiency, climate resilience and green technology for the benefit of farmers, while pitching focused efforts in the Malwa region, particularly Sangrur and Barnala, along with new skill and technology initiatives including the proposed Multi-Skill Training Institute in Ludhiana and Centre of Excellence for Technical Textiles with an ultra-modern laboratory in Jalandhar.

IT IS IMPERATIVE FOR THE PUNJAB GOVERNMENT AND CII TO JOIN HANDS ON THIS THRUST AREA TO CHECK ENVIRONMENTAL POLLUTION, SAID MANN

Sharing a few snippets from this meeting, CM Mann stated on X: “Today, I had an important meeting with the Chairman of CII Northern Region in Chandigarh. During the meeting, we held a detailed discussion on industrial development in Punjab, attracting new investments, and creating maximum employment opportunities for the youth. Our government is continuously working to make Punjab the country’s best industrial hub and create a conducive environment for businesses. We are fully committed to strengthening Punjab’s economy.”

Chairing a meeting with

a CII delegation, Mann said, “It is imperative for the Punjab government and CII to join hands on this thrust area to check environmental pollution. The focus should be on sustainability, resource efficiency, climate resilience and green technology, thereby benefiting farmers on one hand and making Punjab clean, green and pollution-free on the other.”

The CM called upon CII to scale up these efforts in the Malwa region, particularly Sangrur and Barnala, where the Parmal variety of paddy is cultivated, apart from other parts of Punjab. “Punjab is committed to adopting sustainable and technology-driven solutions for crop residue management. There is a need for the government, industry and other stakeholders to work together to ensure that farmers get practical, affordable and effective solutions while the state moves firmly towards a cleaner and greener future,” he said.

also underlined the delivery of welfare services, reduction in poverty, sanitation, housing, food security and social security as significant indicators of achievements of the Modi government.

He mentioned the achievements of the government that include 25 crore people being brought out of poverty, rations to around 80 crore people, social security to more than 100 crore people, construction of 12 crore toilets and 4 crore houses and distribution of 200 crore free vaccines against corona.

Nabin also wanted to drive a wedge between the India of 2014 and India of 2026, saying “India had gone from being one of the ‘Fragile Five’ countries to being amongst the fastest growing major economies.”

UP: Rahul flags poor condition of PMGSY roads in his constituency

BISWAJEET BANERJEE
Lucknow, September 9

Congress MP Rahul Gandhi on Wednesday questioned officials over the poor condition of roads in Rae Bareilly, showing pictures of damaged roads and potholes on his mobile phone during a district development meeting.

Gandhi raised the issue at the District Development Coordination and Monitoring Committee, known as DISHA, meeting in Rae Bareilly. He showed the photographs to Public Works Department officials and the district magistrate and asked why roads in the district were in such poor condition.

“When the government is providing funds, why is the work not being done? What are you people doing?” Gandhi asked officials, according to people present at the meeting.

The meeting was attended by Uttar Pradesh Cabinet minister Manoj Pandey, BJP MLA from Unchahar, MLC and Minister of State Dinesh Pratap Singh, the district magistrate, superintendent of police and senior officials of various departments.

The DISHA meeting, chaired by the local Lok Sabha MP, brings elected representatives and senior district officials together to review the implementation of government schemes and development projects. MPs and MLAs raise issues related to delays, quality of work and delivery of government schemes to beneficiaries.

Himachal: Lahaul-Spiti to have Hanle-like astronomy centre

Chief Minister Sukhu meets Union minister Jitendra Singh to discuss range of proposals

ASHWANI SHARMA
Shimla, September 9

Himachal Pradesh wants the Union Ministry of Science, Technology and Earth sciences to clear the proposal for establishing a centre for astronomy and astrophysics in the high altitude region of Lahaul-Spiti and Pangti, on the lines of Hanle in Ladakh.

Hanle is a remote village in Ladakh, 260 km(approx.) away from Leh, known for its clear skies and minimal light pollution.

It is also a home to the Indian Astronomical

Chief Minister Sukhu with MoS Jitendra Singh

Observatory, one of the highest observatories in the world. Clear night skies make Hanle a haven for stargazing and astrophotography enthusiasts and Changthang Wildlife Sanc-

tuary, shelters diverse flora and fauna, including the Tibetan Wild Ass (Kiang), marmots, and numerous rare bird species.

Chief Minister Sukhinder Singh Sukhu,

who met Union Minister of State (Independent Charge) Jitendra Singh discussed a range of proposals aimed at strengthening science and technology-based initiatives in Him-

CLOSER LOOK

- » Sukhu informed the MoS that favourable conditions for astronomical research and observations suits the setting-up of the centre
- » Sukhu also discussed measures to promote lavender cultivation in Himachal Pradesh

achal Pradesh. Sukhu informed the MoS that favourable conditions for astronomical research and observations suits the setting-up of the centre as it will also provide opportunities to local youth and students to develop scientific interest. This will be a good move to create new avenues for sustainable, knowledge-based tourism in the tribal areas of the State.

In the meeting, Sukhu discussed measures to promote lavender cultivation in Himachal Pradesh and requested support through the Council of Scientific

and Industrial Research (CSIR) for expanding demonstration sites for lavender cultivation across the state on lines of Kishtwar and Baderwah, in Jammu and Kashmir.

He also underlined the need for strengthening the local weather monitoring network and urged the union minister to expedite the initiative for installation of automatic rain gauges in every gram panchayat and automatic weather stations at the block level. The initiative would provide accurate and real-time weather data at the Panchayat and block

levels, strengthen scientific weather monitoring and enable farmers to access precise, location-specific information on weather forecasts.

Meanwhile, the Chief Minister also met Union Minister for Civil Aviation Kinjarapu Ram Mohan Naidu and took up the matter of expansion of Kangra Airport on priority, highlighting its importance for tourism development. He informed the union minister that the land acquisition process for the expansion of Kangra Airport has already been completed.

EDITORIAL

Towards
Balanced Trade

India's hosting of the BRICS Summit in New Delhi on September 12-13 comes at an important moment for a grouping whose economic weight has grown much faster than its internal cohesion. Expanded to 11 members and accompanied by 10 partner countries, BRICS now represents nearly half the world's population and around 40 per cent of global GDP in purchasing power parity terms. Under the theme "Building for Resilience, Innovation, Cooperation and Sustainability", India has rightly sought to make its chairship practical and development-oriented. More than 350 meetings and high-level engagements have preceded the summit, while trade ministers have worked towards a BRICS Economic Partnership Strategy for 2030, resilient global value chains and improved access to finance for smaller businesses. Yet the real test of economic cooperation is not the number of declarations produced but whether commerce becomes broader, more balanced and mutually beneficial. For India, the trade numbers reveal precisely why this must be central to the summit.

India's merchandise trade with its BRICS partners more than doubled from \$203.1 billion in FY21 to \$417.5 billion in FY26. But the headline conceals a striking asymmetry. Exports increased from \$64.3 billion to \$95.7 billion, while imports surged from \$138.8 billion to \$321.8 billion, pushing the deficit from \$74.5 billion to \$226.1 billion. BRICS countries now supply 41.5 per cent of India's merchandise imports but absorb only 21.7 per cent of its exports. The concentration is equally revealing. China supplied \$131.6 billion worth of goods in FY26 against Indian exports of \$19.5 billion, leaving a deficit exceeding \$112 billion. Russia's rise as an energy supplier produced another gap of more than \$50 billion, while the UAE, despite being India's largest BRICS export destination, also recorded a sizeable surplus in its trade with India. China, Russia and the UAE together dominate India's BRICS imports. Some of this imbalance is structural: India needs crude oil, machinery, electronics, industrial inputs and commodities. A deficit is therefore not inherently evidence of unhealthy trade. But persistent dependence on a narrow group of suppliers, without comparable export access, creates economic vulnerabilities that a grouping committed to resilience should address.

New Delhi should consequently use its BRICS chairship to push the conversation beyond increasing trade volumes to improving their quality. Indian pharmaceuticals, agricultural products, engineering goods, services and higher-value manufactured products continue to encounter market-access and non-tariff obstacles in important economies. Removing such barriers, improving customs procedures, facilitating payments, strengthening logistics and creating opportunities for MSMEs would make intra-BRICS commerce more credible. India should simultaneously diversify supply chains rather than mistake deeper BRICS integration for greater dependence on China. BRICS need not become either an anti-Western economic bloc or merely a platform for geopolitical signalling. Its strength lies in allowing countries with very different interests to cooperate where interests converge. India can give that principle economic substance. A grouping claiming a larger voice in global governance must demonstrate that cooperation produces measurable benefits among its own members. For India, success in New Delhi should therefore be judged not simply by another ambitious declaration, but by whether BRICS begins moving from bigger trade towards fairer, more resilient and genuinely reciprocal trade.

New Alliance

The formation of the Secular Social Justice Victory alliance under Chief Minister C Joseph Vijay signals an attempt to give Tamil Nadu's post-poll coalition a durable ideological identity. With Congress, VCK, IUML and MDMK joining the front, the immediate test will be the October 6 bypolls. More importantly, the alliance must demonstrate that its commitment to secularism, social justice and constitutional values translates into effective governance rather than remaining an electoral slogan.

Nourishing Dreams, Building Futures

From feeding 1,500 children in Bengaluru to serving 2.35 million daily, Akshaya Patra shows how compassion, scale and collaboration can transform lives

NEXUS
OF GOOD

ANIL SWARUP

THE WRITER IS AN AUTHOR AND
A FORMER CIVIL SERVANT

Akshaya Patra is an epitome of the Nexus of Good. In fact, the Nexus of Good itself was inspired by my visit to a school in 2016, when I had just taken over as Secretary, School Education, Government of India. I personally tasted the delicious food served to students at a government primary school and learned about Akshaya Patra during my visit to the state headquarters. Akshaya Patra now completes 25 years of its existence.

In the early 1970s, Srila Prabhupada, the founder of ISKCON, observed children in Mayapur fighting with stray dogs for scraps of food. Deeply moved, he declared that no one within a 10-mile radius of the temple should go hungry. This vision of compassion laid the foundation for what would later become The Akshaya Patra Foundation (TAPF).

Fast forward to June 2000: a humble yet thoughtful initiative began in Bengaluru, serving hot mid-day meals to 1,500 children across five government schools. Over 25 years, that small step

has grown into one of the world's largest NGO-run school feeding programmes, serving 2.35 million children every day across India.

Every morning, as the sun rises over classrooms across India, a school meal programme gently comes to life as an initiative under the Government of India's PM POSHAN scheme. What began as a vision has grown into a nationwide movement, nourishing 2.35 million children every single day. Behind each meal is the promise of better concentration, improved attendance and the simple joy of a nourishing and nurturing warm plate of food.

Across 16 states and three Union Territories, the organisation's network of kitchens forms the backbone of this massive effort. In bustling cities, 76 centralised kitchens work with precision and scale, while in remote areas, two decentralised models help serve children. Together, Akshaya Patra serves more than 25,000 schools, weaving a vast and reliable safety net for young learners.

Yet, what makes this programme truly special is that every meal is prepared to suit the local palate of the regions it serves. The menus are crafted to feel familiar and comforting: khichdi in Uttar Pradesh, dalma in Odisha, bisi bele bath in Karnataka and laapsi in Rajasthan – all prepared while strictly following PM POSHAN nutrition guidelines. In every region, each meal carries the warmth of home, the richness of local cuisine and the nourishment every child deserves to thrive.

Impact studies have shown improved attendance, reduced dropout rates, better classroom concentration and enhanced learning outcomes. For millions of children, this is their only assured meal of the day.

This is more than the story of an organisation. It is the story of millions of lives touched, millions

Feeding a child today can strengthen an entire generation tomorrow

BEYOND MEALS,
SCHOLARSHIPS AND
CAREER SUPPORT HELP
CHILDREN PURSUE
THEIR BIGGER DREAMS

of dreams strengthened and millions of futures reshaped. It is a story written by the government, volunteers, partners, educators, donors, cooks and communities – each one a thread in a tapestry of hope. Above all, it is the story of the children who turned every meal into a step towards their dreams.

For 25 years, this mission has nourished not just bodies, but aspirations. When a child is fed, a future is strengthened. When a dream is supported, a nation is

uplifted. When people unite with purpose, extraordinary change becomes possible. The journey is far from over: when we feed a child, we don't just fill a plate. We fill a life with possibility.

The Akshaya Patra Foundation extends its impact beyond the PM POSHAN (Mid-Day Meal) programme through a range of secondary feeding initiatives aimed at strengthening child nutrition. These include the Morning Nutrition Programme, which provides breakfast to schoolchildren, and Anganwadi feeding initiatives that support toddlers as well as pregnant and lactating mothers.

Beyond Meals – Supporting Futures
The Akshaya Patra Foundation has expanded its 'Circle of Care' to support the holistic development of children through its Beyond Meals initiative. While the mid-day meal programme continues to address children's nutritional needs, the Founda-

tion recognises that true growth goes beyond nutrition alone. This happens through the Akshaya Patra Alumni Network (AAN), which serves as a platform to support alumni through upskilling, career guidance and networking. The Avasar Scholarship Programme enables excellence in education by providing financial support to meritorious students from government schools. Giving Every Dream A Chance works to uncover hidden talent, nurture young potential and provide meaningful opportunities for underserved children. Apart from these, under the School Rejuvenation Programme, an attempt is being made to strengthen educational impact by improving school infrastructure and learning quality.

Akshaya Patra has consistently demonstrated its commitment to humanity by responding to crises immediately and with compassion. Through initiatives such as the Homeless Mothers Feeding programme, the organisation provides nourishing meals every day to mothers residing in ashrams in Vrindavan, Uttar Pradesh.

Over the years, Akshaya Patra has been at the forefront of disaster relief, delivering meals during the Kerala and Assam floods and the Wayanad landslides, and offering large-scale food assistance during the Nepal earthquake in 2015 and the earthquakes in Turkey in 2023, as well as providing assistance in Ukraine in 2023. During COVID-19, the organisation distributed 244 million meals and ration kits across India.

Beyond emergencies, Akshaya Patra supports long-term needs through shelter feeding at old-age homes and manages large-scale meal services for massive gatherings, including providing hygienic food to lakhs of devotees at the Maha Kumbh Mela.

UNIVERSITY.

rapid growth and timely exits.

That model is well suited to some software-led, asset-light businesses. It is less comfortable with ventures that need years of research, regulatory approvals, physical infrastructure, manufacturing capacity, distribution networks or changes in consumer behaviour. Yet many of India's most important opportunities lie precisely in those areas: deep technology, climate resilience, healthcare, advanced manufacturing, agriculture, skill-ing and regional supply chains.

Indian family offices were traditionally associated with preserving wealth, succession and philanthropy. That description is now incomplete. Some are recycling entrepreneurial gains into a new generation of enterprise creation, bringing not only money but also the experience of building through policy shifts and market cycles.

Their questions can therefore be different. Instead of asking only how quickly a startup can scale, they can ask whether it can endure. Is the founder creating genuine value or merely chasing valuation? Can the company withstand a downturn? Does it have the governance, management depth and financial discipline to become a lasting enterprise?

Several Indian platforms illustrate aspects of this shift. Premji Invest's evergreen structure allows it to invest without the same pressure created by a fixed fund clock. Rainmatter describes itself as a patient, long-term investor and combines funding with mentorship, networks and opportunities for product validation. Catamaran, the family office of N.R. Narayana Murthy, explicitly emphasises long-term relationships, sustainable value creation and corporate gover-

India needs not just funded startups, but enduring companies

INDIA'S NEXT
STARTUP DECADE
SHOULD PRIORITISE
DURABILITY OVER
FUNDING ROUNDS

nance. These are different models, but they point towards a common idea: capital can carry operating knowledge and a philosophy of stewardship.

The opportunity is wider than family offices. Private credit and venture debt providers can finance companies for which equity is unnecessarily expensive or dilutive. Such platforms can match the instrument to the business instead of forcing every company into the same financing template. Kae Capital's focus on being an early institutional partner and Anicut Capital's mix of debt and equity are examples of this broader domestic capital stack.

Together, these investors can fill five gaps: longer time horizons, deeper domestic capital, operating experience and industry networks, stronger gover-

nance and a more flexible mix of equity, debt and hybrid finance.

The strongest case for patient domestic capital is not that it should replace global venture capital. It cannot, and should not. Global investors bring international networks, portfolio discipline and the confidence to pursue large markets. India's future funding system will be hybrid: global and domestic venture funds, angels, corporates, family offices, sovereign capital, banks, private credit providers, public markets, universities and government-backed programmes working in combination.

Nor should "patient" become a polite word for passive or undisciplined investing. A long horizon does not excuse weak unit economics, poor governance or endless support for a failing model. Family offices must professionalise their investment teams, separate family preference from investment judgement, conduct rigorous due diligence and manage conflicts of interest. Founders, in turn, need honest challenge rather than friendly capital.

This distinction matters because family wealth does not automatically become patient capital merely by entering a

startup. It becomes patient capital when its structure, incentives and behaviour allow a promising company enough time to learn without shielding it from accountability. Patience must be paired with milestones, governance and the willingness to change course.

The broader significance is economic. When wealth created by one generation of Indian enterprise is reinvested in the next, private capital can help build public capability: stronger supply chains, better technologies, skilled jobs and companies able to compete globally. It can also support founders and sectors that do not fit neatly into the venture-capital preference for rapid, predictable scaling.

India has spent a decade celebrating the number of startups it has funded and the valuations they have achieved. The next decade requires a different measure of success: how many of those ventures become durable companies. That shift will demand capital with memory, flexibility and conviction.

The question, then, is not simply how many startups family offices and domestic funds back. It is what kind of capitalism they help create. If they merely chase the next fashionable valuation, they will reproduce the excesses of the last cycle. If they combine patience with professionalism, governance and sector knowledge, they can help India's entrepreneurs build businesses that outlast funding booms.

India does not only need more funded startups. It needs better-built companies. Patient domestic capital can help make that possible. That is the test of whether India's startup economy has matured beyond the funding cycle.

Briefs

NFR revises train services

MALIGAON: North-east Frontier Railway (NFR) is continuing restoration work on the railway track between Jamira in Assam and Bairabi in Mizoram on the Katakhal-Bairabi section following soil erosion near the track. In view of the ongoing restoration work, NFR has announced additional changes in train services.

CIC fines 2 railway officials

NEW DELHI: The Central Information Commission (CIC) has fined two railway officials a total of Rs 20,000 for failing to handle an RTI application properly and not discharging their statutory responsibilities. It also ordered that a caution issued to the then first appellate authority over his handling of the RTI plea be noted in his service record, observing that existing records cannot be mechanically denied.

Pnb: 2-yr old mauled by stray dog

FEROZEPUR: A stray-dog attack on a two-year-old boy here has sparked widespread public outrage, with residents demanding immediate action against the growing menace of stray dogs in residential areas. A group of locals met Deputy Commissioner Deepshikha Sharma at her office on Wednesday and demanded the administration launch immediate and sustained efforts to control the stray-dog population, particularly in areas frequented by children and elderly residents.

Man killed by father in Odisha

BHADRAK: A 26-year-old man was allegedly killed by his father in Odisha's Bhadrak district on Wednesday, police said. The incident took place in Chunida in the Bhadrak Rural police station area, they said. The father-son duo frequently quarrelled over financial issues.

‘INCESSANT RAIN CAUSED RIVERS TO OVERFLOW’

Over 40 lakh affected in 14 districts as flood batters Bihar

OUR CORRESPONDENT

Patna, September 9

More than 40 lakh people have been affected by floods in 14 districts of Bihar, with several rivers flowing above the danger mark at multiple places, officials said on Wednesday. According to the Disaster Management Department (DMD), around 41.45 lakh people in 517 gram panchayats across 84 blocks have been affected by the floods, triggered by incessant rains over the last five days.

Among the affected districts were Patna, Bhojpur, Saran, Vaishali, Bhagalpur and Begusarai. “Incessant rain in various districts caused rivers and streams to overflow. Besides, heavy rainfall in catchment areas of Nepal has also led to rivers flowing above the danger level at several places,” an official said.

The Ganga at Sultan-ganj in Bhagalpur recorded 36.78 metres at 9 am, surpassing its previous highest flood level (HFL) of 36.75 metres recorded on August 17, 2021. The water level, however, remained stable, the DMD said in its latest bulletin.

Besides the Ganga, the other rivers flowing above the danger mark are the Gandak, Kosi, Burhi Gandak, Punpun, Bagmati and Ghaghra, officials said.

The state has received 83.6 mm of rainfall so far

An aerial view shows tractors partially submerged in floodwaters following a rise in the water level of the Punpun river, in Patna, Wednesday

HIGHLIGHTS

- » The affected districts are Patna, Bhojpur, Saran, Vaishali, Bhagalpur, Begusarai
- » Besides the Ganga, the other rivers flowing above the danger mark are the Gandak, Kosi, Burhi Gandak, Punpun, Bagmati and Ghaghra, officials said

in September, 24 per cent above normal, according to the weather office.

The DMD said 793 community kitchens were being operated in various districts, while 15 relief camps were accommodating 13,446 flood-affected people.

Arrangements for food, accommodation, medical care and other essential facilities have been made at the camps, it said.

A total of 1,872 boats

are currently being operated to facilitate evacuation and transportation, while around 29,400 dry ration packets and approximately 5,464 quintals of animal fodder have been distributed among flood-hit people.

Around 2,000 polythene sheets have also been distributed, according to the bulletin.

Agriculture Minister Vijay Kumar Sinha directed officials to undertake an

early, comprehensive and accurate assessment of crop losses in flood-affected areas and extend all possible assistance to farmers.

Sinha issued the directions during a high-level meeting to review the flood situation and its impact on crops across the state.

He stressed the need for a detailed and verifiable assessment of crop damage in the affected areas.

At 6 pm on Wednesday, the Gandak Barrage recorded a discharge of 81,800 cusecs, with the trend remaining stable. Its highest discharge so far this year was 2,24,000 cusecs on July 14.

The discharge at the Kosi Barrage stood at 1,63,525 cusecs, also with a stable trend. Its highest discharge this year was 2,55,425 cusecs on July 20.

Judiciary not averse to criticism but uninformed assertion: SC

CJI Surya Kant led bench observes in NCERT order

OUR CORRESPONDENT

New Delhi, September 9

The judiciary is not, and cannot be, averse to criticism, the Supreme Court has said while cautioning that such criticism be voiced through the appropriate forum and in a fair, rational mechanism.

The observations by a bench comprising Chief Justice Surya Kant and Justices Joymalya Bagchi and V Mohana came while closing suo motu proceedings pertaining to the contents of the Class 8 NCERT textbook which referred to corruption in the judiciary.

The top court said the distinction lies not between criticism and silence, but between responsible discourse and uninformed assertion.

“The Judiciary, as an institution, is not, and cannot be, averse to criticism. Fair, informed and con-

structive critique of judicial functioning is a legitimate and necessary feature of a vibrant constitutional democracy, contributing to institutional accountability and self-correction.

“What is required, however, is that such criticism be voiced through the appropriate forum and in a fair, rational mechanism, and not find its way, without verification, into a school curriculum meant for impressionable minds,” the bench said in its September 1 order, whose contents were later made available.

The apex court took note that the controversial chap-

ter has been replaced based on the revisions suggested by an expert panel constituted by the Centre.

The bench was hearing a suo motu case concerning NCERT’s Class 8 social science book, which contained “offending” content on corruption in the judiciary.

The top court had earlier modified its March 11 order that had directed the Centre, states and others to disassociate from three academicians following a row over the controversial chapter on corruption in the judiciary.

The apex court, which considered the explanation given by the three academicians, had left it open to the Centre, states, Union Territories, public universities and institutions that receive funds from the central or state govts to take an independent decision on the issue without being influenced by its observations made in the March 11 order.

FDA cracks down on ISKCON Juhu

OUR CORRESPONDENT

Mumbai, September 9

The Maharashtra Food and Drug Administration (FDA) has suspended the food licences of an IRCTC-linked supplier in Kurla and three food establishments at ISKCON, Juhu, for alleged violations of norms.

The FDA has launched a state-wide crackdown on food establishments violating the laws and rules regarding hygiene and food safety after IAS offi-

cer Tukaram Mundhe took over as its commissioner in May this year.

The inspector also found deficiencies in personal hygiene at R K Associates & Hoteliers.

Inspections were also carried out on September 3 at three food establishments at ISKCON (International Society for Krishna Consciousness), Hare Krishna Land, Juhu, an official release said.

At one of the establishments, the FDA found inad-

equately records of periodic testing of water used for food production, improper inspection of raw materials and improper temperature and humidity conditions for storing raw and prepared food, the release said.

It also found food and non-food items stored in a manner that posed a risk of cross-contamination, pest infestation, inadequate cleaning and lack of calibration of measuring and monitoring devices.

From startups to global markets: Chhattisgarh takes new flight

OUR CORRESPONDENT

Raipur, September 9

The Chhattisgarh government has taken two important decisions for the state’s youth and business community.

At the Cabinet meeting chaired by Chief Minister Vishnu Deo Sai, the government approved the Rs 500-crore ‘Chief Minister Startup and NIPUN Mission’ for the next five years, along with the ‘Chhattisgarh Export Promotion Policy 2026-30’.

The Startup Mission will directly benefit the state’s youth. Entrepreneurship Development Centres will be established in all 33 districts, along with 100 Emerging Technology Labs and 5 Industry Excellence Centres.

These facilities will help young people develop their business ideas, learn new technologies and turn their ideas into viable businesses within their own districts.

Through the NIPUN JOB Engine, youth will receive training based on industry requirements, creating better employment opportunities.

The mission aims to help young people move beyond being job seekers and become entrepreneurs who create jobs for others.

The Export Promotion Policy will directly benefit farmers, producers, industries and businesses across the state. The policy will focus on taking value-added agricultural and industrial products to international markets. Through e-commerce platforms, trade fairs and exhibitions, businesses will get greater opportunities to connect with international buyers.

NFR to extend special trains amid festive season

OUR CORRESPONDENT

Maligaon, September 9

To facilitate passengers and clear the extra rush of passengers during the upcoming festival season, Northeast Frontier Railway (NFR) has decided to extend the operation of two additional pairs of special trains.

These special services will provide additional connectivity and enhanced travel options, helping passengers plan their journeys more conveniently during the festival season.

These trains will operate with their existing schedule, timings, composition and stoppages.

‘Will challenge HC order quashing student activist’s NSA detention’

OUR CORRESPONDENT

New Delhi, September 9

Solicitor General Tushar Mehta on Wednesday told the Supreme Court that an appeal would be filed against an Allahabad High Court decision quashing the detention of a Delhi University student and activist Akriti Chaudhary under the National Security Act (NSA).

The top law officer made the statement before a three-judge bench of Chief Justice of India Surya Kant and Justices Joymalya Bagchi and V Mohana.

SG Mehta referred to an earlier mentioning by a senior counsel in relation to a notice issued to a Greater Noida student over participation in the Cockroach Janta Party (CJP)-led protest at Jantar Mantar, and clarified the notice was issued by an executive magistrate of Greater Noida and not the district

magistrate.

“I am not on the matter.. (but) the Noida DM is flooded with queries from media, etc. what order have you passed, etc,” SG Mehta said.

As the bench recalled that the Allahabad High Court has recently quashed an order of the Gautam Buddha Nagar administration on the detention of another student and awarded compensation to her, SG Mehta said, “That we are challenging.”

Earlier today, the CJI came down heavily on the Greater Noida executive magistrate for issuing notice to a student for taking part in the CJP-led Jantar Mantar protest, asking how the magistrate “dared” to issue a notice despite the court’s earlier order.

The apex court said it would seek explanation from the Greater Noida executive magistrate over the issue.

CM SAINI OVER INDIA-AUSTRALIA PARTNERSHIP

‘Focus to open new avenues of global skills, employment opportunities’

MPOST BUREAU

Chandigarh, September 9

A high-level meeting was held on Wednesday in Chandigarh under the chairmanship of Haryana Chief Minister Nayab Singh Saini with a delegation led by Australian High Commissioner to India, Philip Green.

The meeting discussed in detail ways to enhance cooperation between Haryana and Australia in various areas, including education, higher education, skill development, innovation, agriculture, green energy, sports, tourism, investment, and providing global opportunities to the youth.

Chief Minister Saini said that India and Australia share a strong and comprehensive strategic partnership.

Trade, education, technology, innovation, skill development and people-to-people contacts

CM Saini presents a memento to Australian High Commissioner Philip Green OAM during a meeting

between the two countries are continuously growing. In this context, there is significant scope for further strengthening state-level cooperation between Haryana and Australia.

He said that ensuring the benefits of the strengthening India-Australia relationship reach Haryana’s youth, students, farmers, entrepreneurs and industries is a priority of the state government.

Chief Principal Secre-

tary to the Chief Minister, Rajesh Khullar, Deputy Principal Secretary to the Chief Minister, Ajay Kumar, Advisor to the Chief Minister in the Department of Foreign Cooperation, Pawan Choudhary, Joint Director, Department of Foreign Cooperation, Hina Bindlish, representatives associated with the Australia-India Business Council, and other members of the delegation were present at the meeting.

SAGAR HOCH TRAGEDY

Must serve as stern lesson, no one dares repeat it, says MP CM

SATYAPRAKASH SHARMA

Bhopal, September 9

Madhya Pradesh Chief Minister Mohan Yadav on Wednesday said the Sagar hooch tragedy must serve as a “stern lesson” so that no one dares to repeat such an act, and asserted that those responsible would face the strictest action under the law.

The official death toll in the incident rose to 15, while 16 people were arrested in connection with the hooch tragedy so far.

Interacting with the media in Sagar after meeting victims undergoing

treatment at Bundelkhand Medical College, Yadav said he had reviewed the situation with the administration and given it a “free hand” to take stringent action against those responsible.

“As you are aware, during the Congress regime, there was no strict legislation. Our government under former CM Shivraj Singh Chouhan enacted laws for severe punishment in cases involving illicit liquor-related deaths, including provisions ranging from murder charges to life imprisonment and the death penalty”, Yadav told reporters.

CM Mohan Yadav meets a victim undergoing treatment

He said the laws incorporate provisions ranging from charges of murder to life imprisonment and even the death penalty for those involved in such incidents.

“We have given the administration a free hand to take the strictest possible action,” Yadav said, adding that authorities should take similar action wherever required.

He also directed officials to act against illegal encroachments allegedly linked to unlawful activities and ensure that such operations do not flourish.

The Chief Minister said

the government was ensuring prompt medical treatment for those injured and providing all necessary assistance to the affected.

The Chief Minister called for a renewed state-wide anti-addiction campaign, directing officials to dismantle the illegal trade in intoxicants and involve religious institutions, voluntary organisations and social groups in awareness and de-addiction programmes. “We need collective social commitment to tackle this,” Yadav said.

Yadav also appealed to political parties to maintain unity in responding

to such incidents. Addressing Congress leaders, he said political differences should not come in the way of demonstrating collective strength in the face of such tragedies.

“I urge leaders from the Congress party that we must stand united and demonstrate our collective strength in the face of such incidents,” he said.

Yadav said the government’s immediate focus was on providing the best possible care to those affected and ensuring strict action against those responsible so that such an incident was not repeated.

TAKEAWAYS

- » The official death toll in the incident rose to 15
- » 16 people arrested so far
- » CM Yadav visits victims, directs strict action against those responsible, calls anti-addiction campaign

Death toll in Yemen prison airstrike rises to 23: Houthi

CAIRO: Rescuers in Yemen pulled more bodies from the rubble Wednesday of a prison run by Iran-backed Houthi rebels that was hit in a deadly airstrike earlier this week, as an escalation between the rebels and a Saudi-led coalition threatened Yemen's fragile ceasefire.

The prison in Hazm, collapsed on Monday when coalition strikes hit the area, killing at least 23 people. The renewed fighting is also threatening global oil shipments as the Houthis target shipping and oil infrastructure.

Zelenskyy urges more global pressure on Russia

KYIV: President Volodymyr Zelenskyy chided the international community Wednesday for not taking a tougher stance against Russia over its escalating bombardment of civilian areas of Ukraine.

At the end of August, Russia launched a week of nighttime and daylight attacks on Kyiv in its heaviest sustained bombardment of the Ukrainian capital since its full-scale invasion began more than four years ago. The relentless missile and drone strikes have continued this month and aim to sap civilian morale, Ukrainian officials say.

UK defends decision to ban trade with Israeli settlements

LONDON: British Foreign Secretary Ed Miliband said Wednesday he was disappointed with Israel's response to the government's decision to ban trade with Israeli settlements in the occupied West Bank, and rejected criticism from the UK's chief rabbi.

Israel responded Tuesday by closing the British consulate in east Jerusalem and banning 11 lawmakers from the country. "I regret what the Israeli government has announced, but I'm proud of what we did yesterday and it was the right thing to do," Miliband told Sky News.

Warehouse blast in Syria kills at least 14

ASSOCIATED PRESS
Sarmada, September 9

An explosion at a weapons warehouse in northwestern Syria killed at least 14 people and injured 11 others, state media reported Wednesday.

The cause of the blast near the town of Sarmada was not immediately clear. Such incidents are a relatively common occurrence in the country, which has been battered by over a decade of war.

The warehouse was used to store weapons and munitions left over from the country's uprising and civil war from 2011 until 2024, the state-run SANA news agency said, citing the Defense Ministry, without providing further details.

Civil Defense and Syrian Red Crescent first-responders are continuing to search for survivors trapped under the rubble. A photographer for The Associated Press at the scene saw bodies being recovered.

Video footage widely circulated after the blast showed a large plume of black smoke, while the sounds of smaller explosions could be heard.

STRAIT OF HORMUZ UNDER BLOCKADE SINCE THE WAR BEGAN

Iran says it captured US submarine in Hormuz after attack on 5 oil tankers

AGENCIES

Tehran, September 9

The Iranian navy has claimed to have captured one of the US military's "most modern, smart" unmanned submarines at the entrance of the Strait of Hormuz.

In a statement published by Sepah News, the official news outlet of the Islamic Revolutionary Guard Corps (IRGC), the navy said it captured the unmanned underwater vehicle -- identified as a Dive-LD -- in a complex intelligence operation.

The submersible vehicle is equipped with the world's most modern subsurface vehicle technology, it said, and released a video of the captured vehicle. This comes after the US military said it destroyed five Iranian oil tankers on Tuesday in response to the latest attacks on its warships.

War of words between China, Philippines over disputed sea

Philippines defence secretary calls out Beijing after being interrupted by a note

ASSOCIATED PRESS

Bangkok, September 9

China on Wednesday accused the Philippines of "stirring up trouble" after harsh words from Philippines Defence Minister Gilberto Teodoro Jr. over Beijing's increasingly aggressive pursuit of maritime claims in the South China Sea.

Representational Image

itary said it destroyed five Iranian oil tankers on Tuesday in response to the latest attacks on its warships.

Meanwhile, Tehran hit back at American targets in Jordan. Following the American strikes, Iran

HIGHLIGHTS

- » 'The submersible vehicle is equipped with the world's most modern subsurface vehicle technology'
- » Tehran also hit back at American targets in Jordan
- » The latest strikes are part of a dual economic and military approach by President Donald Trump as he struggles to bring an end to the war

launched missiles toward US targets in Jordan, Iranian state-run media said. Jordan's military said its lastest defence systems intercepted 18 ballistic missiles launched toward its territory and two others fell in places where no one lives. It said it has no reports of casualties. Jordan is a staunch US ally that hosts American forces, making the kingdom's military bases

a target of repeated Iranian strikes. US Central Command said it had no information to offer.

The latest strikes are part of a dual economic and military approach by President Donald Trump as he struggles to bring an end to the war. The Trump administration on Tuesday also imposed sanctions on additional elements of Iran's aviation industry, targeting

more than two dozen commercial and private airlines as well as foreign cargo service providers, in its new push to isolate Tehran from its remaining trading partners.

Both the US and Iran are seeking to exert control over the Strait of Hormuz, where about one-fifth of the world's oil passed before the war began. Rising energy prices are posing political problems for Trump and his Republican Party ahead of the November midterm elections. A barrel of international standard Brent crude briefly climbed as high as \$99.46 on Tuesday.

Iran said it planned to announce a new "exclusion zone" near the Strait of Hormuz aimed at vessels intending to transit.

Death toll of Nepal floods climbs to 1,365

Nepal Parliament panel set up to assess economic impact

Nepal Police personnel conduct search and rescue operation following flash floods, in Nepal PTI

PRESS TRUST OF INDIA

Kathmandu, September 9

The death toll from the devastating flash floods in Nepal climbed to 1,365 on Wednesday as more bodies were recovered from the affected areas, authorities said.

Rescue teams continued to search for 5,326 people, including at least 589 foreign nationals, who remain missing, according to a Nepal Police news bulletin.

Rescue teams recovered 363 bodies from Chitwan district, 226 from Nawalparasi East, 222 from Nawalparasi West, and 197 from Nuwakot.

Meanwhile, a seven-member parliamentary sub-committee was set up to assess the impact of the devastating Rasuwa flash flood on Nepal's economy and examine issues related to climate finance, officials said.

The panel was formed at a meeting of the Finance Committee of the House of Representatives (HoR) held at Singhadurbar, according to officials in the Parliament Secretariat.

Lawmaker Sushila Khadka of the ruling Rastriya Swatantra Party (RSP) will coordinate the sub-committee.

L&T secures 'large' offshore order from ONGC

NEW DELHI: Larsen and Toubro (L&T) on Wednesday said it has secured a large order from state-owned ONGC in India.

According to the company's classification, a large order is valued between Rs 2,500 crore and Rs 5,000 crore.

"L&T Energy Hydrocarbon Offshore has secured a large offshore order from the Oil & Natural Gas Corporation (ONGC) for the Additional Development of Ratna-I (ADR I) and NLM-14 project off India's west coast," L&T said.

Greenply, GreenLine join hands for green logistics

NEW DELHI: Greenply Industries has partnered with GreenLine Mobility Solutions to deploy LNG-powered trucks for transporting its products from its Vadodara manufacturing facility.

The trucks were flagged off at the plant. GreenLine said its LNG vehicles can cut CO2 emissions by up to 40 per cent, sulphur oxides by 100 per cent and particulate matter by 91 per cent. The initiative will help Greenply assess alternative-fuel transportation while maintaining supply-chain efficiency and reliability.

Rupee plunges 34 paise to 95.08 against US dollar

MUMBAI: The rupee slumped 34 paise to close at 95.08 against the American currency on Wednesday as crude prices crossed the USD 100 per barrel mark, stoking concerns over inflation and high forex outflows.

Weak equity markets and FII outflows also pressurised the rupee, forex traders said.

At the interbank foreign exchange market, the rupee opened at 94.80, also its intra-day high, against the US dollar. The local unit fell to an intra-day low of 95.22 as crude oil prices surged.

Need diversification in services export: Comm Secy

MUMBAI: The Indian industry needs to diversify its services exports beyond the two dominant segments of IT/ITeS and professional services to achieve sustainable growth, Commerce Secretary Rajesh Agarwal said here on Wednesday.

At the Global Fintech Fest 2026, he also said the global financial services industry is growing and stands at around USD 670 billion, but India's share is just USD 8 billion, just over one per cent of the global trade. The country's services exports are registering healthy growth, he added.

AS RETAIL PUMP RATES REMAIN UNCHANGED

Oil cos losing Rs 5 on petrol, Rs 23/litre on diesel as oil prices cross \$100-mark

MPOST BUREAU

New Delhi, September 9

State-owned fuel retailers are losing Rs 5 per litre on petrol and Rs 23 a litre on diesel as fresh hostilities in West Asia pushed international oil prices above USD 100 per barrel, analysts said on Wednesday.

Brent crude, the international benchmark for oil prices, rose 2.5 per cent to over USD 100 a barrel, while US West Texas Intermediate crude gained almost 2 per cent to about USD 95. This after tensions rose in the Middle East amid the latest tit-for-tat exchange of fire between the US and Iran.

Brent last touched the USD 100-mark on July 23.

India, the world's third-largest oil importing and consuming country, is particularly exposed to swings in international crude prices. It imports over 88 per cent of its crude -- raw material for making fuels like petrol and diesel -- requirements.

A sustained increase in prices raises the country's dollar-denominated import bill and can put pressure on the trade balance and the rupee, analysts said.

Also, with retail pump rates remaining unchanged, it leads to fuel retailers incurring losses

CLOSER LOOK

» India, the world's 3rd-largest oil importing country, is particularly exposed to swings in international crude prices

» It imports over 88 per cent of its crude -- raw material for making fuels like petrol and diesel -- requirements

on sale of petrol, diesel and cooking gas LPG.

Prashant Vasisht, Senior Vice President and Co-Group Head, Corporate Ratings, ICRA Ltd, said with escalation in hostilities between Iran and the US, Brent prices have crossed the USD 100 per barrel-mark on Wednesday and the Indian crude basket is at about USD 109 per barrel.

"At the average price for the month of September till date, marketing margins on petrol are

negative Rs 5 per litre and diesel at negative Rs 23 a litre and under recoveries on domestic LPG are at Rs 200 per cylinder," he said.

"If the current geopolitical situation persists, crude oil prices could rise further given that several countries, including China, were tapping their strategic reserves for a significant proportion of their consumption and their return to the market could increase demand in a period of restricted supplies."

Higher crude prices can also feed into domestic inflation through fuel, transport and other energy-related costs. But the impact on consumers and the wider economy would depend in part on how much of the increase is passed through to domestic fuel prices and how long international prices remain elevated.

For now, retail petrol and diesel prices remain on freeze for over three months. Rates were last revised on May 25 when they were hiked Rs 2.61 a litre for petrol and Rs 2.71 per litre for diesel.

Those hikes were part of the revision in rates that happened in the second half of May in response to international prices rising due to the war in West Asia disrupting energy flows from the Gulf countries. In all, petrol price was raised Rs 7.35 a litre and diesel by Rs 7.53 in four instalments.

India's crude oil import bill surged over 56 per cent during April-July to USD 63.4 billion compared to USD 40.5 billion in the same period last year, according to the Oil Ministry's Petroleum Planning and Analysis Cell (PPAC).

The volumes bought remained almost the same -- 81.9 million tonnes in

the first five months of the current fiscal year and 81.5 million tonnes last year.

The basket of crude oil India imports averaged USD 108.91 per barrel on September 8, according to PPAC. The basket is made up of sweet or low-sulphur (Brent) and sour grades containing more than 0.5 per cent sulphur (Oman & Dubai average) in the ratio 77.81:22.19. The Indian basket of crude oil breached the USD 100 mark earlier this month, and the September average is USD 102.11 per barrel against USD 90.19 in August and USD 82.04 in July.

Rajeev Sharan, Head of Research, Brickwork Ratings, said Brent crude has crossed USD 100 a barrel again, the highest since late July, driven mainly by US-Iran tensions and supply worries around the Strait of Hormuz rather than by stronger demand.

"With OPEC+ holding output steady and geopolitical risk still high, prices are likely to stay firm and volatile through the coming month, easing only if tensions cool," he said, adding that costlier crude will squeeze margins in oil-sensitive sectors such as aviation, paints, tyres, chemicals, logistics, and parts of FMCG.

'Govt plans ethanol blending beyond E20 amid FFV push'

PM's Advisor says focus is on going into flexi-fuel vehicles and allowing blending beyond E20 level

MPOST BUREAU

New Delhi, September 9

The government is working to permit ethanol blending beyond the existing E20 level, enabled through flexi-fuel vehicles, Advisor to the Prime Minister Tarun Kapoor said on Wednesday.

Addressing virtually the fourth edition of The India Sugar & Bio-Energy Conference 2026, Kapoor said the E20 programme has been "very successful" so far and several automobile companies have announced plans to roll out flexi-fuel vehicles soon.

"E20 has been very successful. Now our focus is on going into flexi-fuel vehicles and allowing blending at a percentage which will be higher than E20 and it will have to be through flexi-fuel vehicles," Kapoor said.

E20 is blended petrol containing 80 per cent petrol and 20 per cent ethanol.

He said biofuels and other alternative energy sources are very important for India, and government policies are now focused on promoting biofuels on a large scale. "The industry has also been very supportive and we've got huge capacities," he said.

The push for biofuels

has become more critical amid the West Asia crisis, which has disrupted supplies and pushed crude oil prices to nearly USD 100 a barrel, with fears of a further increase, Kapoor said.

"It is important that we try to have whatever is available in the country," he said. Ethanol production capacity in the country has surpassed blending requirements, he said, and the industry will need to explore additional uses for ethanol to fully utilise the surplus capacity.

While ethanol has been a great success story, criticism of E20 blending has largely stemmed from misinformation or "motivated reasons", Kapoor said.

"But then a lot of studies have been done, a lot of experiments have been done, and it has come out that E20 is quite good and works very well. Maybe a little bit of fuel efficiency declines somewhere, but it gets compensated with higher octane," he said, adding that the issues

being faced are generally due to other reasons, not the blending.

Several motor vehicle companies have announced that they are coming up with flexi-fuel vehicles very soon, "and so we should see good numbers in the market," he said, adding that supply of pure ethanol and related additives at petrol stations also needs to expand in tandem with availability of flexi-fuel vehicles.

"So with that then at least in this sector, in the transport sector we should see more traction," he said.

On the diesel segment, Kapoor said the government is looking at biofuel-based additives, noting that experiments with isobutanol could open up a "large" new avenue for bio-fuels if successful, given diesel's significant share of refinery output.

Products derived from ethanol or close to it -- made from sugarcane residues, byproducts, or surplus foodgrains -- are finding good market uptake, he said, helping the country fully utilise capacity that has come up.

"We are very keen that we are able to expand the market as much as possible so that this overcapacity issue is resolved at the earliest," he said.

N Franklin Jayakumar assumes charge as CMD of NCL

MPOST BUREAU

Kolkata, September 9

N Franklin Jayakumar has assumed charge as Chairman-cum-Managing Director (CMD) of Northern Coalfields Ltd (NCL), the Singrauli-based subsidiary of Coal India Ltd.

Jayakumar is a mining professional with over 34 years of experience in mechanised underground and opencast coal and lignite mining operations in India and abroad.

Before joining NCL, he was serving as Director (Technical), Operations, at South Eastern Coalfields Ltd (SECL).

A graduate in mining engineering from the College of Engineering, Guindy, Anna University, Chennai, Jayakumar holds a postgraduate diploma in environmental engineering and management from Central University, Hyderabad, and an MBA in HR Management from Alagappa University.

JPSSL launches cross-border payments for Indian exporters

MPOST BUREAU

New Delhi, September 9

Jio Payment Solutions Ltd (JPSSL), a wholly-owned subsidiary of Jio Financial Services, on Wednesday announced the launch of its cross-border payment platform to help Indian exporters accept international payments and boost their global competitiveness.

Through Jio Payment Solutions Ltd's (JPSSL) new

facility, domestic exporters can accept international payments via virtual accounts, international cards, and local payment rails.

The launch follows the receipt of authorisation from the Reserve Bank of India to operate as a Payment Aggregator for Cross-Border (PACB) transactions, covering exports and imports, JPSSL said in a statement.

As more Indian businesses, including online

sellers, digital businesses, freelancers, creators, and SaaS companies, scale globally, collecting international payments remains a fragmented and complex process, it said.

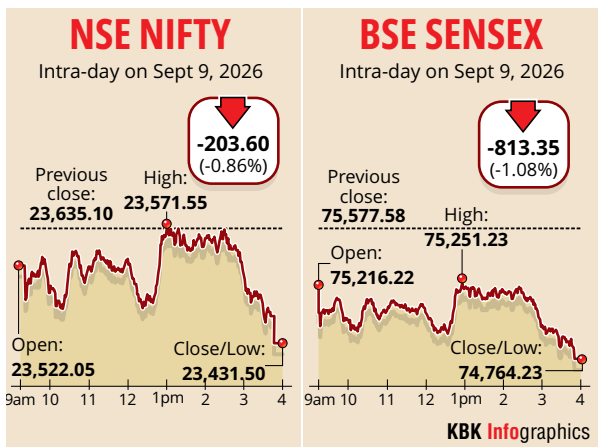

JPSSL addresses these challenges through a platform that simplifies global collections, supports compliance, and enables businesses to offer customers the convenience of their preferred local payment options across international markets.

MPOST BUREAU

Mumbai, September 9

Falling for the third straight day, benchmark stock index Sensex tumbled 813 points to a three-month low, and the Nifty settled below 23,450 following selling in IT, FMCG, financial services and oil & gas shares, as escalating tensions in West Asia drove crude oil to over USD 100 per barrel.

The 30-share BSE Sensex tanked 813.35 points, or 1.08 per cent, to settle at the day's low

of 74,764.23, also the lowest closing level in nearly three months.

The 50-share NSE Nifty declined 203.60 points, or 0.86 per cent, to end at

a nearly three-month low of 23,431.50. The index had closed near this level on June 11 previously.

Among the 30 Sensex firms, HCL Tech fell the most, down 4.55 per cent. Infosys dropped 4.43 per cent, Tech Mahindra by 3.87 per cent, and Tata Consultancy Services by 2.26 per cent. HDFC Bank and Hindustan Unilever were also among the major laggards. Adani Ports was the lead gainer, rising by 3.67 per cent. Tata Steel, Trent and NTPC were among the winners.

NTPC gets 'fresh chance' in JITF case

'Split verdict keeps challenge to bulk of 2019 arbitral award alive'

MPOST BUREAU

New Delhi, September 9

The Delhi High Court's September 2 split verdict in the Jindal IITF Limited (JITF)-NTPC dispute has left nearly Rs 1,800 crore in claims undecided, giving NTPC another opportunity to challenge the 2019 arbitral award.

While Justice C. Hari Shankar allowed JITF's appeal and restored the arbitral award, Justice Om Prakash Shukla disagreed on four key claims -- 1, 3, 3A and 5A -- worth

INSIGHT

» The HC's split verdict has left nearly Rs 1,800 cr in claims undecided

» The point of difference has been referred to the Chief Justice for consideration by a Third Judge or Larger Bench

around Rs 1,883 crore of the Rs 1,891-crore award.

Justice Shukla backed NTPC's position that the Single Judge was justifi-

fied in setting aside the award on grounds of patent illegality. He held that the Arbitral Tribunal could not go beyond the remedies and limits prescribed under the contract.

NTPC had argued that JITF's performance fell well below contractual requirements, citing unloading of about 8,300 MT per day against 12,000 MT and transportation delays of up to 163 days against the stipulated five.

The power major also

challenged Rs 424 crore awarded under Claim 1 and around Rs 1,108 crore in termination damages under Claim 5A. It argued that contractual provisions limited the remedies and compensation payable.

The split verdict means the award has not been finally restored. The point of difference has been referred to the Chief Justice for consideration by a Third Judge or Larger Bench, leaving NTPC's challenge to the bulk of the award alive.

1ST INTERNATIONAL FILM FESTIVAL OF JAMMU & KASHMIR - DAY 2

CM OMAR ABDULLAH INTERACTS WITH MIRZAPUR: THE MOVIE'S LEAD ACTORS

The screening provided the Chief Minister an opportunity to experience the festival's celebration of cinema alongside film enthusiasts and audiences

OUR CORRESPONDENT

On September 8, Chief Minister Omar Abdullah watched 'Mirzapur: The Movie' at INOX Multiplex, Shivpora, Srinagar, as one of the films being screened during the ongoing International Film Festival Jammu & Kashmir (IFFJK), being held under the theme 'Rang-e-Cinema'.

The screening provided the Chief Minister an opportunity to experience the festival's celebration of cinema alongside film enthusiasts and audiences. The IFFJK, which was inaugurated by Chief Minister Omar Abdullah at the Sher-i-Kashmir International Convention Centre (SKICC) on the evening of September 7, is bringing together filmmakers, artists and cinema enthusiasts from across India and abroad, with a diverse range of films being showcased during the festival.

On the occasion, the Chief Minister interacted with the lead actors of 'Mirzapur: The Movie', including Pankaj Tripathi, who reprises his popular character of Kaleen Bhaiya and Divyendu, known for his portrayal of Munna Bhaiya in the hit 'Mirzapur' series.

The Chief Minister felici-

Jammu and Kashmir.

The first International Film Festival of Jammu & Kashmir was inaugurated by Chief Minister Omar Abdullah at SKICC on the evening of September 7. The four-day festival brings together filmmakers, artists, delegates and cinema enthusiasts from across the world, with participation from over 30 countries and more than 130 films being showcased

during the festival.

The festival is being organised to celebrate the enduring relationship between J&K and cinema, while providing a platform for filmmakers and audiences to engage with diverse cinematic traditions from across the world. Former Chief Minister Farooq Abdullah, Divisional Commissioner Kashmir Anshul Garg, Deputy Commissioner Srinagar Akshay Labroo, Director Information Shreya Singhal and other concerned officials were also present on the occasion.

OMAR ABDULLAH FELICITATED THE ACTORS AND APPRECIATED THEIR CONTRIBUTION TO INDIAN CINEMA

tated the actors and appreciated their contribution to Indian cinema. He welcomed them to Jammu & Kashmir and expressed happiness over their participation in the maiden edition of IFFJK. He said that the presence of leading

artistes and filmmakers in J&K would further strengthen the region's association with cinema and contribute to building a vibrant film ecosystem in

Building Jammu & Kashmir into a sustainable cinematic ecosystem

Chief Secretary Atal Dulloo highlighted film policy, skilling, single-window clearances and local talent as key enablers

OUR CORRESPONDENT

The second day of the first International Film Festival of Jammu & Kashmir (IFFJK 2026) witnessed an engaging policy dialogue on the prospects of building a sustainable cinematic ecosystem in the Union Territory, with Chief Secretary Atal Dulloo emphasising the need to create an enabling environment for local talent, filmmaking, film education and investment.

Participating in a panel discussion on 'How the J&K Film Policy, Single-Window Clearances & Incentives Can Build a Sustainable Local Cinematic Ecosystem', moderated by noted film critic and journalist Mayank Shekhar, the Chief Secretary, along with Commissioner Secretary, Information Department, R Alice Vaz, dwelt upon the initiatives already undertaken by the Government and the measures being planned to give further impetus to filmmaking and film tourism in J&K.

While speaking, Dulloo said that the people of J&K have a natural affinity towards the creative world and recalled the region's close association with the film fraternity during the 1970s and 1980s, when its landscapes and locations were extensively connected with the film industry.

He expressed that IFFJK has been conceived as a platform to renew these connections and channel the creative energies of the region's youth towards filmmaking and its allied professions. "People making efforts to realise their dreams is essential," the Chief Secretary observed, recalling former President Dr APJ Abdul Kalam's famous words: "Dreams are those which don't let you sleep."

He said that the festival pro-

vides an ideal platform to deliberate upon the possibilities and potential that J&K offers to the film industry and, more importantly, to evolve a clear roadmap for carrying the momentum forward after the festival.

He pointed out that cinema is a collective endeavour and that the people seen on the screen or stage constitute only one part of a much larger industry comprising a wide range of professionals whose contribution is essential to bringing production to life.

Dulloo further underlined the importance of nurturing local human resources and said that the Government was exploring avenues for providing scholarships to students interested in different aspects of filmmaking at reputed national institutions, besides facilitating partnerships with such institutions for imparting specialised courses and training within J&K.

He also highlighted the role of the Skill Development Mission in creating appropriate

training opportunities in local institutions, including courses related to filmmaking and its allied fields.

On the ease of filming in J&K, the Chief Secretary emphasised the need to continuously remove procedural bottlenecks faced by filmmakers and production houses. He observed that the Single Window Clearance System needs further strengthening and simplification, while the proposed Ease of Doing Business Bill is expected to bring further deregulation and facilitate a smoother business environment for the industry.

Referring to the culture of encouraging people to write their own stories in Maharashtra, he said that similar efforts could help identify and nurture storytelling talent in J&K, with many of these narratives having the potential to evolve into vibrant film scripts. "We have numerous stories here. What is required is to hone and chisel this talent and present these

stories in the right form and style," he maintained.

Commissioner Secretary, Information, R Alice Vaz, while elaborating on the J&K Film Policy, outlined the incentives presently available for film shootings in the Union Territory and the additional benefits extended to regional filmmakers and productions having significant local participation. She explained that the policy has been designed not merely to attract external productions but also to encourage local filmmakers, artists and creative talent, thereby creating greater opportunities for people associated with the film industry within J&K.

She also highlighted the incentives available for films having more than 50 per cent of their shooting in J&K, along with provisions encouraging the engagement of local artists and other personnel.

Vaz said that these policy interventions are intended to create a virtuous cycle in which greater filmmaking activity generates employment and opportunities for local talent while simultaneously showcasing J&K's landscapes, heritage and cultural richness to wider audiences. She underlined the strong linkage between filmmaking and tourism, noting that increased cinematic visibility can contribute to the promotion of destinations and generate wider economic activity for local communities.

The panel discussion thus brought together the policy, regulatory, educational, creative and economic dimensions of J&K's emerging film ecosystem, with the participants stressing that the ultimate objective should be to move beyond facilitating individual film shoots towards creating a sustainable ecosystem capable of nurturing local talent and attracting national and international productions.

The second day's proceedings of IFFJK 2026 also featured a diverse range of creative, technical and policy-oriented sessions across SKICC Srinagar. A masterclass on directing romantic comedies was conducted by filmmaker Sriram Raghavan, while an In-Conversation Session with cinematographer Anil Mehta explored the role of framing, lighting and other visual elements in creating narrative subtext beyond written dialogue.

Furthermore, four panel discussions further expanded the

festival's engagement with contemporary cinema and its evolving ecosystem. In Hall 2, a panel moderated by Dhvani Desai explored the convergence of traditional regional art forms with animation, Artificial intelligence and CGI and the possibilities of creating new authorial voices through emerging technologies. The discussion featured Sanat P C, Ujjwal Nirgudkar, Hetal Soliya, Jitin Masand, Bharath Laxmipati, Jividha Sharma and Kanika Gautam.

In addition to that, Hall 3 hosted a festival selection roundtable moderated by Sourav Kanti Datta, with CS Venkateshwaran, Siladitya Sen, Nirmal Dhar and Reema Borah deliberating on the changing landscape of independent cinema, curation and access.

The day concluded with an acting-focused panel moderated by Mandar Bam, featuring Sulakhyana Barua, Rahul Bhatt and Ashoke Viswanathan, who discussed the creative demands, preparation and collaborative processes involved in developing memorable characters for the screen.

The varied sessions on the second day reinforced IFFJK 2026's larger vision of creating a platform where cinema, policy, technology, education, creative talent and tourism converge, while opening new avenues for J&K's participation in the national and global cinematic landscape.

HE SAID THE PEOPLE OF J&K HAVE A NATURAL AFFINITY TOWARDS THE CREATIVE WORLD

WILL FACE TIAFOE IN SEMIS

US Open: Shelton ends Alcaraz’s title reign

ASSOCIATED PRESS

New York, September 9

Ben Shelton had gone toe-to-toe with Carlos Alcaraz for five exhausting sets and finally at 3:33 a.m. Wednesday came the chance to end the U.S. Open champion’s title reign.

Shelton fired an ace at 146 mph, a ball that Alcaraz couldn’t have gotten back even with fresh legs. That gave Shelton a 6-7 (5), 6-1, 6-3, 1-6, 7-6 (10-7) victory in a marathon tussle that was the latest-finishing match in U.S. Open history. “I’m tired. It was a war,” Shelton said.

“Carlos is one of the greatest champions of our sport. It was the most enjoyable match I’ve had in my career, for sure.”

Alcaraz had his 18-match winning streak in Grand Slam tournaments ended in a match that lasted 4 hours, 28 minutes, after he fought deep into the night and early into the next morning in a bid to get his hands on the trophy again.

“I mean it was close, it

Ben Shelton, of the United States, during a US Open tennis championships

was really close, so I was disappointed I didn’t get the win at the end,” the No. 2-seeded Alcaraz said.

“But I’m happy, I am proud of myself about how I fought. As I said, physically I was really tired but I found a way to push myself.”

Shelton next plays No. 11 seed Frances Tiafoe, who kept coming back until he had reached

HIGHLIGHTS

» The US is guaranteed to have a representative in Sunday’s final as it seeks its first men’s major title since Andy Roddick lifted the title here in 2003

» US Open craves its night matches and players love energy the fans provide

his third U.S. Open semifinal, beating Alex Michelsen 5-7, 3-6, 7-5, 6-3, 7-6 (10-6)

on Tuesday.

The U.S. is guaranteed to have a represen-

tative in Sunday’s final as it seeks its first men’s major title since Andy Roddick lifted the title here in 2003. Alcaraz had played in the previous latest finish at the U.S. Open when he outlasted Jannik Sinner in a match that finished at 2:50 a.m. in the 2022 quarterfinals en route to his first Grand Slam title at 19.

The U.S. Open craves its night matches and players love the energy the fans provide – even when a number of matches have already gone past 2 a.m. this year.

Thousands stayed to the end, with Arthur Ashe Stadium perhaps still one-third full for the finish.

Shelton benefited from a home-crowd boost even against the popular Alcaraz, with fans chanting his name along with “USA! USA!” “It’s incredible,” Shelton said. “I always say that this is the greatest sports city in the world. I say that this is the greatest stadium in the world. I’m just hoping that my best friend and my sister over there don’t have to be

at work at 6 a.m. in three hours.”

Three of the four singles quarterfinals went to match tiebreakers on a marathon day, which started with Aryna Sabalenka edging Wimbledon champion Linda Noskova to keep her hopes alive of a third straight U.S. Open title. Instead it was Shelton reaching his third major semifinal, having gotten to the final four in the 2023 U.S. Open and 2025 Australian Open.

He seized control by winning nine straight games from early in the second set until he had a 3-0 lead in the third. But Alcaraz, in his first tournament since April after returning from a right wrist injury, battled back even as he vomited before the start of the final set.

Alcaraz ran off four straight points in the tiebreaker to go ahead 5-3, but Shelton came back behind some of his powerful serves that can exceed 140 mph, along with some mistakes from Alcaraz.

Para Archery: India win 2 gold, 4 bronze

Sheetal Devi

PTI

PRESS TRUST OF INDIA

Ahmedabad, September 9

Reigning Paralympics champion Harvinder Singh and world No. 1 Sheetal Devi led the charge as India signed off their World Archery Para Series Stage III campaign on a high, winning two gold and four bronze medals, on the final day, here on Wednesday.

World No. 1 and reigning world champion Sheetal Devi held her nerve in a dramatic shoot-off to win the para compound women’s individual gold, while double Paralympics medallist Harvinder, paired with Bhawna, helped India to gold in the para recurve mixed team event.

In the recurve mixed team final, double Paralympics medalist Harvinder and Bhawna made short work of China’s Liang Qiurong and Xia Lei, winning 6-0 in straight sets.

India took the opening set 35-31 before winning the second 36-33 and completing the clean sweep with a 34-32 victory in the third.

Bhawna then added

another bronze in an all-Indian para recurve women’s bronze-medal play-off, defeating compatriot Rajshree Rathod 6-0.

Sheetal returned in the evening session and produced a composed performance against Kazakhstan’s Aizada Seidan in a thrilling compound women’s individual final.

Both the archers started with perfect 30s and remained locked at 59 after the second end, with both shooting 29. Aizada then edged ahead by a point in the third end after shooting 28 to Sheetal’s 27.

The fourth end ended 29-29, before Sheetal produced a 29 in the final end against Aizada’s 28 to level the scores at 144-all and force a shoot-off.

Sheetal kept her composure when it mattered most, hitting a perfect 10, while Aizada managed a nine to hand the Indian the gold.

Sheetal, thus, completed a medal double, having earlier teamed up with Toman Kumar to win bronze in the compound mixed team event.

Pandya named in India A squad for Australia

PRESS TRUST OF INDIA

New Delhi, September 9

Senior all-rounder Hardik Pandya has been picked for the three-match one day series against Australia A in October subject to full fitness, the BCCI announced on Wednesday.

The 32-year-old Pandya last played a competitive match during last edition’s disastrous IPL campaign for Mumbai Indians. Since then, he has been out of action with latest being quadriceps injury which prevented him from attaining full fitness.

The tour ill start with the first multi-day match in Puducherry from September 22, followed by the second game from September 29 at the same venue.

The multi-day matches will be followed by three one-dayers on October 6, 9 and 11 in Puducherry.

PRESS TRUST OF INDIA

Chennai, September 9

Ishan Kishan and South Zone skipper Tilak Varma underlined their red ball chops with 80 and 99 respectively, but former’s half-century has more contextual value as it placed East Zone firmly on course for a Duleep Trophy triumph on the fourth day of

the final here on Wednesday. Tilak’s 211-ball knock lifted South to 336 all out in their first innings but still remained 372 runs adrift of East’s first dig total of 708.

In their second innings, East moved to 212 for five at close, for an overall lead of 584 runs. Kumar Kushagra (34) and Kounain Quraishi (26) were batting at close and have raised 52 runs for

the unbroken sixth wicket.

But those team numbers now carry a mere academic significance as East already have their hands around this season’s Duleep Trophy, courtesy that irreversibly massive first-innings lead.

However, with a couple of important Test assignments coming up – away against New Zealand and

subsequently at home against Australia. Kishan was comfortable from ball one in the ensuing essay as well during his 98-ball knock.

The left-hander started his run-making with a six off off-spinner Tripurana Vijay over mid-wicket and never really took his feet off the pedal.

Kishan went after Vijay

again towards the backend of his innings, hammering him for 4, 6, 6, 4 in successive balls in the 26th over.

Moments before that DRS saved Kishan, who added 146 runs for the third wicket with Shikhar Mohan, from a leg-before decision after on-field umpire Rohan Pandit upheld leg-spinner Shreyas Gopal’s appeal.

EAST CENTRAL RAILWAY E-Open Tender Notice E-Tender Notice No.: TL-AC-CRW-HRT-2-RT, Date: 08.09.2026 For and on behalf of President of India, Dy. STUDY ABROAD – BEYOND METROS

INDIA'S METRO CITIES NO LONGER HAVE MONOPOLY ON GLOBAL DREAMS

From Indore, Kochi, Bhubaneswar and Jaipur to Siliguri and Coimbatore, Tier 2 and Tier 3 Indian cities are emerging as powerful new sources of India's overseas education boom

ANINDITA ACHARYA

Even a few years ago, Indian students aspiring to study abroad mostly came from well-off families or had someone in the family who had studied overseas. But that trend is changing. The ambition to study abroad is no longer geographically specific. The study-abroad dream is no longer driven only by India's metro cities. Studies show that more students pursuing international education today are coming from small towns, particularly Tier 2 and Tier 3 cities.

This shift had been building since around 2018, but the pandemic accelerated it. A recent study by Prodigy Finance noted that students from Tier 2 and Tier 3 cities make up nearly 79% of the students they serve. Another report for 2024-25 found that 57.2% of Indian students enrolled abroad came from Tier 2 and Tier 3 cities, compared with 47% the previous year. "Ten years ago, the family sitting across from a counsellor was usually in a metro, and usually had someone in the household who had already studied overseas. That profile has gone. A large share of the interest now comes from smaller cities, where the student is the first in the family to do this at all," said Sonal Kapoor, Global Chief Business Officer, Prodigy Finance.

POST-COVID RISE IN INTEREST

Interestingly, most experts pointed out that this shift has become much more visible over the last few years, particularly after the pandemic. Saurabh Arora, Founder & CEO, University Living, also believes that Artificial Intelligence (AI) deserves a real share of the credit. "Access to information

SMALL CITIES, BIG DREAMS

Of course, metro cities such as Delhi NCR, Mumbai, Bengaluru, Hyderabad and Chennai continue to be among the strongest markets for students aspiring to study overseas. However, as Jain informed, the market is no longer confined to these traditional hubs. "We are seeing increasing interest from cities such as Pune, Kolkata, Ahmedabad, Chandigarh, and a growing number of Tier 2 and Tier 3 locations. The student profile is becoming much more geographically diverse," he said. Chitta echoed similar sentiments and added that cities such as Ahmedabad, Surat, Chandigarh, Jaipur, Lucknow, Indore, Kochi, Coimbatore, Vijayawada and Visakhapatnam are seeing strong growth in the number of students interested in studying abroad. Iyer pointed out that alongside the traditional leaders, a second tier of cities has become genuinely significant contributors. These include Indore, Surat, Ahmedabad, Vadodara, Lucknow, Chandigarh, Jaipur, Ludhiana, Patna, Nagpur, Raipur, Coimbatore, Kochi, Visakhapatnam, Guntur, Mysuru and Bhubaneswar. "Eastern India as a region has also picked up pace, with cities like Kolkata and Siliguri contributing a growing share of enquiries. What's notable is not just that these cities are participating, but that the number of distinct towns generating at least a handful of applications each year has multiplied several times over in the last decade, spreading demand far more evenly across the country than before," she said.

has changed completely. Students in smaller cities today have the same access to university information, online counselling, student communities and digital application platforms as students in metros," he said.

According to Chaitanya Chitta, Senior Vice President and Regional Head at Cintana Education, the trend has been building for at least the last 5-7 years and has accelerated post-Covid. "Awareness has increased significantly in Tier 2 and Tier 3 cities through digital platforms, social media, school counsellors etc. More importantly, families in these cities are increasingly seeing international education as a pathway to better careers, global exposure and upward mobility. The aspiration gap between metros and smaller cities has reduced considerably. Thanks to better exposure, increase in economic capacity being the drivers and I expect this trend to continue."

DIGITAL DOMINANCE

There might be several reasons why and how the internet can harm us, but it is also important to focus on how it has improved access to information. Imagine living in a suburban town where you have limited options to meet an international education consultant, with

no guarantee that he or she will provide you with the best options. Digital access today, powered further by AI, can help students understand the intricate details of study destinations, including cost breakups and scholarships. "Digital access has played a significant role. A student in Indore, Jaipur, or Coimbatore can today explore universities, compare courses, understand visa requirements, and speak to counselors without needing the ecosystem of a metro. But access is only one part of the story. The larger change is aspirational. Students and families in smaller cities increasingly see global education as a pathway to

specialized skills, international exposure, and better career opportunities. For us, the most encouraging part is that geography is no longer defining ambition. The global education dream is becoming increasingly national, and students from smaller cities are very much driving that expansion," said Nikhil Jain, Chief Product & Marketing Officer at Crizac Limited.

BETTER ACCESS TO EDUCATION LOANS

Aspiring to study abroad and turning that ambition into reality is a costly dream, and it is clear that banks today are increasingly proactive in providing loans for foreign education. Whether the student is a farmer's son or comes from a business family, education loans now cover major expenses such as tuition fees, living costs, travel and insurance. Lakshmi Iyer Chief Client Officer & Chairperson, StudyIn India, mentioned bank education loan books have grown at a decade-high pace in the last financial year, crossing well over Rs 8 lakh crore, driven largely by overseas study demand and rising costs per student. "Beyond loans, families are actively hunting for university and country-specific scholarships, assistantships and tuition waivers, particularly in destinations like Germany where public universities charge little to no tuition. Many are also

turning to part-time work permissions in the destination country to offset living costs, and some are exploring destinations with lower overall cost structures – Germany, France, Ireland and parts of Central and Eastern Europe – specifically to make the numbers work. A newer trend is families topping up existing loans mid-course when currency depreciation or fee revisions widen the funding gap, something that has become more common over the last year," she said.

"I took a student loan myself, with my father as cosigner, and it changed the way decisions got made at home. A family that has pledged the house is a family that will not let a student switch course, or spend three months finding the right job instead of taking the first offer. None of that appears on a term sheet, which is why I tell families to compare the terms and not only the rate," said Kapoor. Arora mentioned research showing that among Indian students who dropped their plans to study abroad, 43% cited unaffordable tuition fees, 32% pointed to rising living costs and 28% cited visa difficulties. "The question today is no longer simply, 'Can we afford the university fee?' It is, 'Can we comfortably manage the complete journey and does the outcome justify the investment?'" he said.

DIGITAL ACCESS TODAY, POWERED FURTHER BY AI, CAN HELP STUDENTS UNDERSTAND THE INTRICATE DETAILS OF STUDY DESTINATIONS, INCLUDING COST BREAKUPS AND SCHOLARSHIPS

Australia cancels graduate diploma course for international students

Already enrolled students can continue their courses

OUR CORRESPONDENT

If you have already selected Australia as your next study destination, you might have to think again. Australia has halted new enrolments of international students in the Graduate Diploma of Management (Learning) course. Providers that deliver the course (BSB80120) will have their Commonwealth Register of Institutions and Courses for Overseas Students (CRICOS) registration for the GDML course automatically suspended or cancelled.

Students who have commenced the course and are studying with their current provider will be able to complete their studies. However, VET providers and education agents will no longer be able to recruit international students into, or offer, the GDML course to new international students.

The decision was announced recently by Assistant Minister for International Education, Julian Hill. This is the first time the government has used its new powers to cancel or suspend the registration of a specific course for international students. 452 VET providers are registered to deliver the course to international students, with 41,033 active Confirmations of Enrolment (CoEs) in the GDML, including 15,772 students recorded as currently studying the

THE COURSE (CODE BSB80120) WILL NO LONGER BE AVAILABLE TO NEW OVERSEAS STUDENTS FROM OCTOBER 5, 2026

course. The targeted action will strengthen the quality and integrity of Australia's international education sector and protect the interests of international students and follows the package of integrity reforms the Government passed in November 2025.

"The government will continue to act decisively to ensure Australia remains a trusted global education destination, to protect international students and to prevent misuse of the student visa system. The Coalition left behind a shocking mess in 2022, with unsustainably high growth in student numbers in the least reputable parts of the sector, and our high-quality student visa being degraded into a low-rent illegal work visa and misused by shonks. Australia continues to welcome genuine international students seeking a premium education and must maintain a ruthless focus on quality, integrity and a great student experience," said Hill.

STUDYING IN CANADA GETS COSTLIER

Planning to study in Canada? Well, be prepared to spend more. Following stricter visa entry rules, Canada has introduced several changes to its international student programme in 2026, which will increase the financial burden on international students. The changes will come into effect on September 1, 2026, according to Immigration, Refugees and Citizenship Canada (IRCC). According to IRCC, a single study permit applicant outside Quebec must now show access to at least C\$23,448 (Rs 16,11,276) to cover living expenses during the first year of study. Previously, applicants were required to demonstrate access to C\$22,895 (Rs 15,69,825). The latest revision raises the requirement by C\$553 (Rs 37,917). Students enrolling in programmes lasting more than one year must also explain how they intend to finance the remaining period of their studies.

The financial requirement increases further for students travelling with family members. International students should also note that demonstrating access to C\$23,448 alone is not enough to meet Canada's overall financial requirements. The amount covers living expenses only. Applicants must separately prove that they have sufficient funds to pay for tuition fees and transportation costs.

NEW FACILITY TO CREATE 5,000 JOBS IN UK

TCS launches AI-native creative engineering studio in the UK

OUR CORRESPONDENT

Tata Consultancy Services (TCS), a global leader in IT services, consulting, and business solutions, has launched the TCS Interactive Creative Engineering Studio in London. The new 4,500-square-foot AI-native studio will serve as the hub for creative, industry, and engineering teams to collaborate with clients and brands to unlock new revenue growth, market expansion, and operational efficiency.

With this new facility, TCS Interactive is strengthening its global network of studios, building on the launch of its New York studio in 2025. The studio launch comes at a time when demand for AI-enabled services is at an all-time high and AI

is reshaping how content is created. Through this new studio, TCS will help clients turn concepts into scalable business outcomes at speed with its multidisciplinary AI-led capabilities. The hub will act as an extension of TCS Interactive - TCS' digital design, marketing, and experience-led transformation arm. The London studio will serve as a

gateway for regional clients to access TCS' global network of studios, bringing together local market insight and global expertise.

Vinay Singhvi, Head - UK & Ireland, TCS, said, "The UK&I is a vital market for TCS, and this studio reflects our commitment to driving innovation for our clients and AI-led creative engineering. This expansion underscores our confidence in the UK's strong technology ecosystem and aligns with the government's vision for fostering innovation."

The London studio forms part of TCS' continued investment in the UK and Ireland, including its commitment to create 5,000 new jobs across the region over the next three years.

THE STUDIO LAUNCH COMES AT A TIME WHEN DEMAND FOR AI-ENABLED SERVICES IS AT AN ALL-TIME HIGH
