HMIL to raise car prices by up to ₹12,800 from June 1

Hyundai Motor India (HMIL) will hike vehicle prices by up to ₹12,800 from June 1, the auto-maker said on Wednesday, citing rising input costs, higher commodity prices and increased operational expenses. REUTERS

Ramco Industries Q4 PAT up nearly 3-fold at ₹87 cr

Chennai: Ramco Industries, the holding company of the Ramco Group, posted consolidated net profit of ₹87 crore for Q4FY26 compared to ₹35 crore in the year-ago quarter. Revenue went up 19 per cent to ₹502 crore (₹422 crore). For FY26, consolidated net profit went up 43 per cent to ₹136 crore (₹94 crore). Revenue stood at ₹1,443 crore (₹1,402 crore). OUR BUREAU

Elgi Equipments Q4 PAT rises 25% to ₹128 crore

Our Bureau
Chennai

Elgi Equipments, a manufacturer of air compressors, reported a 25 per cent increase in consolidated Profit after Tax (PAT) at ₹128 crore for Q4 of FY26 compared to ₹102 crore in the same quarter last year. Consolidated revenue from operations was ₹1,112 crore (₹1,009 crore), representing a growth of 10 per cent. For the full fiscal year, consolidated PAT was ₹430 crore, up from ₹350 crore in FY25. The company recorded revenue of ₹4,068 crore (₹3,568 crore), up 14 per cent. The board of Elgi Equipments recommended a dividend of ₹2.70 per equity share.

Q1FY27 OUTLOOK
Notwithstanding the geopolitical tensions, the company maintains a positive outlook for Q1FY27 and re-

HDFC Bank may face scrutiny for alleged violation of RBI rules

MARKET REACTION. Bank’s shares declined 2.63 per cent on the BSE on Wednesday

Our Bureau
Mumbai

HDFC Bank shares declined 2.63 per cent on the BSE on Wednesday on fears the bank may face regulatory scrutiny and possible enforcement action after allegedly disguising extra interest payments as marketing expenditure on deposits placed by a Maharashtra government-owned entity. Among the 12 constituents of the BSE Private Bank Index, which declined only 0.38 per cent, the shares of India’s largest private sector bank fell the most. The *Indian Express* reported that on March 12, 2026, the Audit Committee of HDFC Bank’s Board had ordered a formal internal vigilance investigation into payments totalling ₹45 crore as “differential interest” (interest over and above the specified rate) made to the Maharashtra State Road Development Corporation

STRONG REBUTTAL. The bank said it has robust internal oversight, audit and control processes and systems REUTERS

(MSRDC) on its deposits during FY24 and FY25. The report alleged that instead of being credited directly to MSRDC’s account as interest earned, the aforementioned amount was routed through the bank’s marketing department, disguised as contributions to a road safety awareness campaign through four local vendors. This report comes in the backdrop of Atanu Chakraborty stirring a hornet’s nest by abruptly resigning from his position as Part-time Chairman and Inde-

pendent Director of the bank on March 17, 2026. In his resignation letter, he cited “certain happenings and practices within the bank, that I have observed over last two years, are not in congruence with my personal values and ethics.” Keki Mistry, who was appointed as Interim Part-Time Chairman of HDFC Bank, told analysts and media that at the age of 71, he would not take on the responsibility as Chairman for three months if the systems, processes and governance practices in the bank did not

align with his principles and his level of integrity.

REFUTES CHARGES

Reacting to the news report, the bank, in a statement, emphasised that it has robust internal oversight, audit and control processes and systems. “All issues are dealt with in accordance with bank’s established norms, and full process is always followed before final determination post any internal review. We strongly reject any assumptions of wrongdoing or culpability based on selective material,” per the statement. Juxtaposing the RBI’s March 19 statement on HDFC Bank that it is a domestic systemically important bank (D-SIB) with sound financials, professionally-run board and competent management team and the latest development, banking analysts say the regulator may now move against the bank, including pulling up the management.

RBI’s forex intervention in spot and forward market hits decadal high in FY26

Sourashis Banerjee
Chennai

The Reserve Bank of India (RBI) recorded its largest net sale of foreign currency in at least 15 years, and its outstanding position in the forward market hit a decadal high in FY26. These measures were a response to the rupee’s weakness, driven by US tariff-related uncertainty and capital outflows. The rupee lost approximately 9.5 per cent against the dollar in FY26.

DATA FOCUS.

SPOT MARKET

The RBI’s net purchase or sale of dollars in the spot market has historically fluctuated with global financial conditions and domestic capital flows. The central bank sold \$20.14 billion in FY11-12, during the taper tantrum when the Indian economy was considered one of the ‘fragile five’. FY19 saw net sales of \$15.38 billion amid emerging market stress and rising US interest rates. In FY23, the RBI sold \$25.52 billion amid the Russia-Ukraine conflict, elevated crude oil prices and a strengthening US dollar, which weakened emerging market currencies, including the rupee. FY26, however, eclipsed all previous years, with cumulative net dollar sales reaching \$53.13 billion. The figure was substantially higher than the \$34.51 billion net sale recorded in FY2024-25.

Madan Sabnavis, Chief Economist, Bank of Baroda, said, “The record sale of \$ in the spot market by the RBI, was to stabilise the ₹, which had depreciated almost 10 per cent against the \$ in FY26, following the tariffs imposed on India by the Trump administration.”

HEAVY DOLLAR SELLING

Monthly data reveal the RBI’s interventions intensified from August. After modest sales in April and June, the central bank sold \$7.70 billion in August, \$7.91 billion in September and a massive \$11.88 billion in October 2025, the highest monthly sale of the fiscal year. The October spike coincided with heightened concerns about the impact of US tariff measures on global

Buttressing the rupee

Selling of dollars highest in 15 years in FY26

Spot selling of \$ particularly high in October to stymie US tariff impact

Outstanding net forward sales in March 2026, breaks previous records

Source: RBI

trade and emerging-market currencies. Temporary relief emerged in January and February 2026, when the RBI turned a net buyer of \$2.53 billion and \$7.41 billion, respectively, before resuming sales of \$9.76 billion in March, following the conflict in West Asia and the subsequent oil shock.

FORWARD \$ POSITION

The RBI’s outstanding net forward position also moved deep into negative territory. Outstanding net forward sales stood at a record negative \$103.06 billion in March 2026, surpassing the previous record negative \$84.35 billion in March 2025. Anindya Banerjee, Head of Research - FICC of Kotak Se-

curities, explained, “The selling of \$ in the forward market by the RBI does not impact the liquidity of the ₹ or the assets as long as it’s not delivered. Therefore, whether the RBI sells \$ in the spot or forward markets depends on their objectives at that moment. If ₹ liquidity is high, along with FPI selling, then selling \$ in the spot market can take care of both issues at once, much like what was done in FY23.” Sabnavis, meanwhile, stressed that there is a signalling component to selling in the forward market as well. “It signals to the foreign investors that the RBI is not ready to give up on the ₹. This can arrest some speculative pressures on the ₹.”

Maruti Suzuki services record 2.84 crore vehicles across 5,926 centres in FY26

Our Bureau
New Delhi

Maruti Suzuki India (MSIL) on Wednesday said its network has set a new benchmark of attending to over 2.84 crore vehicles in a single financial year (FY26), the highest-ever service load managed in its history. The company had serviced 2.73 crore vehicles in FY25 and prior to that, around 2.51 crore vehicles in FY24. The milestone has been enabled by its expansive service network of 5,926 touch-

Hisashi Takeuchi, MD and CEO, MSIL

points across India, supported by trained manpower, robust processes, and technology-enabled service oper-

ations, the company said, adding that by FY31, it aims to establish around 8,000 service touchpoints. “Achieving our highest-ever annual service load is a significant milestone and reflects the trust customers place in Maruti Suzuki’s after-sales capabilities,” Hisashi Takeuchi, MD and CEO, MSIL, said. “We remain committed to expanding our service footprint and introducing innovative service formats to address diverse customer needs more efficiently,” he added.

Woodfield to export first India-made LNG marine loading arm

Avinash Nair
Ahmedabad

Woodfield Systems, a 103-year-old British engineering company known for manufacturing LNG marine loading arms, is set to ship its first India-made LNG marine loading arm from its facility near Mumbai, marking a significant shift in production of the critical liquefied natural gas (LNG) equipment from the UK to India. The company, on Tuesday, said it has successfully manufactured India’s first LNG marine loading arm at its Asangaon facility, using the

British firm’s design expertise and intellectual property along with Indian manufacturing infrastructure.

The equipment, which was earlier manufactured only in the UK, will now be produced in India following the company’s acquisition by an Indian promoter group in 2024.

The first India-manufactured LNG marine loading arm is being shipped to a leading oil and gas company in West Asia, while a second unit is scheduled for testing by June 10. Woodfield Systems said it expects the India-made LNG marine loading arm business to generate

revenues of \$20-30 million (₹193-290 crore) by FY27.

COST ADVANTAGE

Woodfield said manufacturing in India offers a 30-40 per cent cost advantage compared to the UK, depending on equipment size, making

the shift commercially significant for global competitiveness. LNG marine loading arms are considered highly specialised critical equipment used for transferring LNG between shore terminals and LNG carriers. The systems have traditionally

been dominated by European manufacturers because of the engineering precision and safety standards involved. Each LNG marine loading arm is estimated to cost \$1.2-1.5 million (₹11.6-14.5 crore). “Because of the costs involved in manufacturing in the UK, the kind of market share that we wanted was not doable. That is why the company decided that even the critical technologies and equipment must be moved to India to start manufacturing,” Kartik Gala, CEO and one of the promoters of Woodfield Systems, told *businessline*.

Carraro India bets on premium tractors, construction exports

Amit Vijay Mohile
Mumbai

Pune-based Carraro India is preparing for its next phase of growth by expanding axle capacity, scaling manufacturing infrastructure and deepening its presence in premium four-wheel-drive (4WD) tractors, construction equipment exports and electric driveline systems, as the company increasingly transitions from a traditional tractor-component supplier into a higher-value off-highway engineering platform. The company’s investor presentation indicates that Carraro plans to fund much of its next growth cycle through internal accruals, improving return ratios and operating leverage rather than aggressive balance-sheet expansion.

Operating cash flow nearly doubled to ₹155.8 crore in FY26 from ₹76.3 crore in FY25, while debt-equity improved to 0.27x from 0.62x in FY22.

“FY26 was a strong and encouraging year for Carraro India, with the company delivering healthy growth across both domestic and export markets,” said Managing Director Balaji Gopalan.

PREMIUMISATION

Carraro India’s profit after tax surged 48 per cent to ₹130.6 crore in FY26, while EBITDA rose 33 per cent to ₹247.5 crore, with margins improving to 10.8 per cent from 10.2 per cent a year ago. The March quarter remained particularly strong, with revenue climbing 37 per cent to ₹614.2 crore and PAT jumping 76 per cent to ₹41.7 crore.

Balaji Gopalan, MD, Carraro India

According to the presentation, India’s 4WD tractor market is projected to grow at a 23 per cent CAGR through 2029, sharply outpacing the expected 2.8 per cent CAGR growth in the traditional 2WD segment.

“Demand towards larger axles and transmissions with higher power and higher technological specifications will result in higher volume growth,” the company said.

EXPORT PUSH

Construction vehicle revenue rose 31 per cent to ₹983.7 crore in FY26, significantly faster than agricultural equipment revenue growth of 19 per cent. Construction vehicles now account for 43.6 per cent of Carraro India’s revenue mix, nearly matching the 45.2 per cent contribution from agricultural tractors.

Exports rose 37 per cent to ₹812.5 crore during FY26, compared with 19 per cent growth in domestic revenues. “Exports remained a key growth driver, supported by sustained momentum in construction equipment,” Gopalan said.

FY27 EXPANSION

Carraro is now scaling manufacturing capacity ahead of the anticipated demand growth, including increasing axle capacity, alongside new

assembly lines, warehouse additions and heat-treatment facilities planned across its Pune operations for FY27 and beyond.

Its driveline plant operated at nearly 80 per cent utilisation during FY26, while gear manufacturing utilisation stood at nearly 76 per cent, indicating relatively high loading levels ahead of the next capex cycle. Carraro is also positioning itself in electric off-highway mobility technologies. The company signed a ₹17.5 crore engineering services agreement with Montra Electric for industrialisation and supply of e-transmissions for electric agricultural tractors and has already received prototype orders for field validation.

The company is increasing localisation and supplier diversification to improve supply chain resilience.

Johnson Lifts acquires 39 acres near Chennai for ₹125 cr for future expansion

T E Raja Simhan
Chennai

Johnson Lifts, the Chennai-based elevator manufacturer, has acquired 39 acres at Sengadu, near Chennai, for ₹125 crore as part of its long-term expansion strategy to boost production capacity for high-speed elevators and advanced vertical transportation systems.

The new facility, which will involve an overall investment of around ₹200 crore in the first phase, is expected to begin construction in 2028, according to Yohan John, Director. The investment includes land acquisition, facilitated by JLL, and equipment for the project’s first phase.

Speaking to *businessline*, John said the company is currently focused on ex-

The new facility will involve investment of around ₹200 crore in the first phase

panding its existing facility, with that expansion slated for completion by September 2027.

The upcoming Sengadu unit will primarily manufacture high-speed elevators, while a portion of the company’s escalator production will also be shifted there to improve operational efficiency and increase capacity.

DEMAND CONCERNS

The company is targeting revenue of ₹4,000 crore in the current fiscal, up from ₹3,500 crore last year. However, it remains cautious

about demand conditions amid global geopolitical tensions and rising raw material prices.

“Demand is good, but we are wary of a drop in demand over the course of the year because of the war and material prices all going up,” John said.

The company’s business mix currently comprises 92 per cent new installations and 8 per cent replacement demand.

US team to visit India to finalise interim trade pact

New Delhi: A US team is visiting India from June 1-4 to discuss finalisation of the details for the interim trade pact and take forward negotiations under the broader bilateral trade agreement (BTA), said the Commerce Ministry on Wednesday. The US team will be led by its chief negotiator Brendan Lynch. The two sides are “proposed to finalise the details of the interim agreement and take forward the negotiations under the broader BTA on multiple areas such as market access, non-tariff measures, customs and trade facilitation, investment promotion and economic security alignment”, it said. On February 7, India and the US issued a joint statement finalising the contours or the framework of the first phase of the BTA or an interim trade agreement. Now, both sides will have to finalise the legal text for that deal. **PTI**

‘India better positioned to offer RE for data centres’

Rishi Ranjan Kala
New Delhi

India, with the world’s third-largest renewable energy (RE) installed capacity and expanding transmission infrastructure, is most suited to offer green energy to operate data centres in South and South-East Asia (S&SEA). Moody’s Ratings, in a report on South and South-East Asia (S&SEA), which is among the fastest-growing data centre markets globally, expects regional capacity to double by 2030, but the pace and distribution of growth will increasingly depend on power availability, grid stability and execution capability.

INDIA GROWTH STORY
S&SEA accounts for over 3.5 GW of operational data centre capacity, which will double by 2030. Growth is shifting to India and Indonesia to serve rapidly expanding domestic demand, it added. India is among the fastest-

‘Coal gasification push a structural shift for CIL’

ALL FIRED UP. With adequate coal available, the company is geared up to meet summer demand: Chairman and Managing Director B Sairam

bl.interview

Mithun Dasgupta
Kolkata

Coal behemoth Coal India Ltd (CIL), in pursuit of coal gasification, is making a structural shift from being primarily a producer and supplier to a coal-to-chemicals and cleaner fuel integrated energy producer, says its Chairman and Managing Director B Sairam.

He said the company expects e-auction premiums to be between 40 and 45 per cent if the demand persists. The high prices of imported coal may contribute to increased premium this fiscal, he added.

Edited excerpts:

You emphasised that increased coal production and improved quality supplies are the company’s core functional areas in meeting the energy demand of the country. What is Coal India’s production and supply

We are strengthening our coal evacuation infra through first mile connectivity projects and a rail corridor

B SAIRAM
Chairman and Managing Director, Coal India Ltd

target for this fiscal?
Yes, these twin commitments remain firm in our corporate ethos. After evaluating the anticipated demand from both the power and non-power sectors, the production target is pegged at 815 million tonnes (mt), while the supply target is set at 850mt. Supply or offtake lists high among our key priorities followed by the production.

Coal supplies are placed at the top because we began FY27 with around 130 mt of coal stock at our pitheads, which was 17 per cent of our entire output of 768 mt in FY26.

Liquidation of this inventory is our major operational

focus. Our effort is to progressively moderate the inventory levels towards more optimal levels of around 10 per cent of the total production, or around 70 mt.

Therefore, the emphasis is now on more efficient synchronisation between production and evacuation. We are consciously making efforts to place fresh coal into the market and move towards a more demand-aligned produce-and-sell approach, rather than prolonged stocking before sale.

With this change in approach, would the company need to realign its mining activity?

This approach does not entail any change in our mining operations. We will, to the extend possible, sell fresh coal in the market, so our approach of production will be in consonance with the off-take.

As per demand we will produce so that some threshold levels of stock will always be there. Because we have to be ready to make good of the pertinent demand. Sometimes logistic and mining disruptions occur in the supply chain. What we are doing is we are liquidating our stock in FY27 so that we will maintain stock to a certain threshold level to keep some buffer.

What role will CIL play to boost gasification to channel domestic coal into cleaner industrial uses?

For the company, the gasification push represents a structural shift from being primarily a coal producer and supplier to emerging as a coal-to-chemicals and cleaner fuel integrated energy producer.

The aim is to cut import dependence on industrial

feedstock and natural gas. In this, our company is synergising its coal gasification efforts with three major CPSUs — BHEL, GAIL and BPCL.

The centrepiece of this push is a coal gasification-based ammonium nitrate project of 6.6 lakh tonnes per annum capacity at Lakhanpur under our Odisha-based subsidiary, Mahanadi Coalfields. This project, at around ₹25,000 crore, is being developed through Bharat Coal Gasification and Chemicals Ltd, which is a joint venture between Coal India and BHEL. This is CIL’s first commercial scale downstream coal gasification venture.

Alongside, CIL is pursuing two coal-to-synthetic natural gas (SNG) projects, each with 633 million normal cubic metres per annum capacity, aimed at supplying cleaner fuel to fertilizer units and industrial consumers.

One is being planned in Bardhaman, West Bengal, through JV with GAIL under Coal Gas India Ltd, at an estimated investment of ₹13,000 crore. The second SNG facility is being planned

at Chandrapur in Maharashtra with BPCL at a capital outlay of around ₹12,200 crore. When commissioned, the three mega facilities could anchor India’s coal-to-chemicals ecosystem and reshape the country’s vast coal reserves while supporting energy security and industrial growth.

The E-auction price of coal increased 51 per cent over the notified prices in April. However, the quantity allocated through the e-auction decreased 11.64 per cent on a month-on-month basis. What is the outlook going forward?

Last financial year was an aberration for coal demand. Moderated summer temperatures and heavy rainfall were the principal causes for lukewarm demand. This led to our e-auction premiums settling down at 38 per cent.

With the onset of summer demand, the power sector is consuming increased volumes of coal. So, going forward in the current financial year, we expect the e-auction premiums (add-ons

over notified price) to be between 40 and 45 per cent if the demand continues at the similar trend.

Imported coal prices, which are currently high, hold a sway over our e-auction premiums. This may contribute to increased premiums this year if the imported prices continue to hold at higher levels. E-auction volumes and premiums are driven by the market demand dynamics, and we shall offer adequate quantities through the auction window.

What are the company’s plans to meet the peak summer season demand?

With adequate coal available, the company is geared up to meet the summer demand. Coal stock at domestic coal-based power plants is around 48 mt. Coal inventories at our pitheads are at around 113 mt.

Further, 50 mt of in-situ coal within mines is ready for extraction and supply if the demand necessitates. We are also strengthening our coal evacuation infra through first mile connectivity projects and a rail corridor.

Govt to begin formal marketing for \$1b LIC stake sale next month

Bloomberg

The government is likely to begin formal marketing next month for a planned share

sale in the Life Insurance Corporation of India, which could raise as much as \$1 billion, according to people familiar with the matter.

The government plans to

sell a stake of about 2 per cent in the insurer in late June or early July to institutional investors. The Department of Investment and Public Asset Management is

working with Goldman Sachs Group, Motilal Oswal Investment Advisors, BNP Paribas and IIFL Capital Services to manage the transaction, the people said.

Notes:

- The above Standalone and Consolidated financial results of the Company were reviewed by the Audit Committee and approved by the Board of Directors at their respective meetings held on May 27, 2026.
- These Standalone financial results of the Company have been prepared in accordance with the recognition and measurement principles of applicable Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) as specified in section 133 of the companies Act, 2013.
- The Board of Directors have recommended a final dividend of ₹ 6/- (600 %) per Equity Share of ₹ 1/- each, out of the profits of the Company, for the year ended March 31, 2026, subject to approval of Shareholders in the Annual General Meeting of the Company.
- In terms of SEBI Circular CIR/CFD/CMD/56/2016 dated May 27, 2016 the Company hereby declares that the auditors have issued audit reports both for standalone and consolidated financial results with unmodified opinion for the quarter and year ended March 31, 2026.
- The above is an extract of the detailed format of Financial Results filed with the Stock Exchange under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The full format of the Financial Results are available on the Stock exchange website, www.bseindia.com, www.nseindia.com and on the Company's website www.isgec.com. The same can be accessed by scanning the QR code provided below.
- The results for the quarter ended March 31, 2026 and March 31, 2025, are the balancing figures between audited figures in respect of the full financial year ended March 31, 2026 and March 31, 2025 respectively and published and unaudited year to date figures upto the third quarter of the respective financial year then ended. The figures upto the end of third quarter of the current as well as previous financial year had only been reviewed and not subject to audit.
- The Government of India has consolidated 29 existing labour legislations into a unified framework comprising four labour codes. The Codes have been made effective from November 21, 2025. The New Labour Codes have resulted in estimated one time increase in provision for employee benefits of the Group of ₹ 1,649 lakhs on the basis of actuarial valuation and consistent with the guidelines provided by the Institute of Chartered Accountants of India and the same has been recognized as an exceptional item, in the current reporting period. The Group continues to monitor the finalisation of Central/State rules and clarification from the Government on other aspects of the labour codes, and would provide appropriate accounting effect as and when such clarification are issued/rules are notified.
- Isgec Investments Pte. Limited, Singapore (IIPL), a wholly owned subsidiary of the Company, had entered into a Sale and Purchase Agreement (SPA) with a Buyer in the month of December 2024 to sell its entire shareholding in its wholly owned subsidiary 'Bioeq Energy Holdings One, Cayman Islands'. As the buyer failed to make requisite payment, the above SPA expired on September 15, 2025. At present, in view of prevailing international geo-political scenario, IIPL does not foresee an active buyer for the above transaction in immediate future. Accordingly in compliance with Ind AS 105:-
 - The operations of Bioeq Energy Holdings One have been reclassified from discontinued operations to continuing operations.
 - The depreciation and amortisation expenses not charged in prior periods, has been charged now in respective periods.
 - The assets and liabilities previously classified as Held For Sale have been reclassified to respective line items.
- The figures for the corresponding previous periods have been regrouped, wherever necessary, to make them comparable.

NOTES:

- The above is an extract of the detailed format of Quarterly Financial Results filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015. The full format of the Quarterly Financial results are available on the Websites of the Stock Exchanges and on the Company's Website (www.rubfila.com).
- The above Audited standalone / consolidated financial results have been prepared in accordance with Indian Accounting Standards ('Ind AS') prescribed under section 133 of the Companies Act, 2013 read with relevant rules thereunder and in terms of the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (as amended) and SEBI Circular dated 5 July, 2016.
- The Consolidated financial results of the year ended 31.03.2026 includes the financial results of its wholly owned subsidiary M/s Premier Tissues India Limited.
- The company's reportable business segments are "Latex Rubber Thread" and "Corrugated Carton Box" and its subsidiary has one reportable business segment viz "Paper Tissue". The Company publishes the standalone financial results along with the consolidated financial results.
- The number of Investor Complaints pending at the beginning of the quarter was nil, one complaint was received and resolved during the quarter and no complaints were pending at the end of the quarter.
- The above audited standalone and consolidated financial results for the year ended 31st Mar 2026 were reviewed and recommended by the audit committee and approved by the Board of Directors at their respective meetings held on 26th May 2026 and the auditors have issued a modified opinion on the same.
- The Board of Directors have recommended a final dividend of Rs.2 per share (40%) for the year ended 31.03.2026 subject to the approval of the members in the ensuing Annual General Meeting.
- The figures for the quarters ended 31st March 2026 and 31st March 2025 are the balancing figures between audited figures in respect of the full financial year up to 31st March 2026 and 31st March 2025 respectively and the unaudited published year to date figures up to 31st December 2025 and 31st December 2024 respectively, being the date of the end of the third quarter of the respective financial years, which were subjected to limited review.
- On November 21, 2025, the Government of India notified the four Labour Codes - the Code on Wages, 2019, the Industrial Relations Code, 2020, the Code on Social Security, 2020 and the Occupational Safety, Health and Working Conditions Code, 2020 - replacing 29 existing labour laws, collectively referred to as the 'New Labour Codes'. The Group has assessed the incremental financial impact if any, due to these changes, taking into consideration the best information available read with the FAQs released by the Ministry of Labour & Employment and the Institute of Chartered Accountants of India. Considering the materiality and non-recurring nature of this impact, the Group has no incremental charges in the standalone and consolidated financial results for the quarter and year ended March 31, 2026, respectively. The Group continues to monitor developments on the rules to be notified by regulatory authorities, including clarifications/ additional guidance from authorities and will continue to assess the accounting implications basis such developments/ guidance if any.

TECH DIGEST.

Nothing launches
Essential Voice feature

Nothing has introduced Essential Voice, a software feature that expands its Essential AI tools by enabling users to convert speech into structured text. The feature allows users to dictate content by long pressing the Essential Key or using the keyboard. It works within apps and text fields, removing the need to switch between tools.

Essential Voice is designed as an alternative to traditional typing and dictation. While users typically type around 36 words per minute on a phone, speech averages about 150 words per minute. Unlike standard dictation, which produces verbatim transcripts, Essential Voice processes speech to generate clean, readable text by removing filler words and improving structure.

The key features include Auto-correction that cleans up spoken input by removing filler words and improving clarity, Personal Mappings which lets users create custom voice shortcuts for frequently used phrases, links and templates, Translation Agent that converts spoken input into written text in another language, and language support for over 100 languages with autodetection and regional variants.

ASUS unveils VM441 AiO
with Snapdragon X processor

ASUS has announced the VM441 AiO, an all-in-one desktop powered by the Qualcomm Snapdragon X processor. The 24-inch system is designed for home users and hybrid work setups, with a slim form factor that integrates the display and computing hardware into a single unit.

The system features a 24-inch all-in-one display and is powered by the Snapdragon X processor with dedicated AI capabilities. ASUS positions the device for home computing and hybrid work environments, combining performance with a space-saving setup.

The VM441 AiO is built as a Copilot+ PC and includes on-device AI processing with up to 45 TOPS NPU performance, supporting AI-driven tasks across productivity, communication and media use. The ASUS VM441 AiO will be available through ASUS Exclusive Stores, the ASUS e-shop and major online and retail platforms including Flipkart, Amazon, Croma and authorised retail partners. It is available in 512 GB and 1 TB PCIe 4.0 SSD configurations, with pricing starting from ₹1,01,990.

OPPO launches
Enco Air5 Pro earbuds

OPPO India has launched the Enco Air5 Pro, a new pair of true wireless earbuds with active noise cancellation and extended battery life, targeting every day and on-the-go use. They advanced voice noise cancellation with up to 55 dB active noise reduction across a 5,000 Hz frequency range. It uses a

dual-feed ANC system with three microphones per earbud to reduce ambient noise, particularly human voices in crowded environments. The earbuds also include real-time adaptive ANC that adjusts noise cancellation levels based on surroundings and fit. For calls, the earbuds use a triple-microphone setup with AI noise reduction, designed to isolate voice input and minimise background interference, including wind noise. Battery life is rated at up to 54 hours with the charging case. A 10-minute quick charge provides up to 13 hours of playback. Each earbud weighs 4.4 g and comes with IP55 dust and water resistance. The buds will be available in India starting May 28, 2026, at ₹4,999 through OPPO's official website and retail channels.

Fitbit Air gives Whoop some
serious competition

The Fitbit Air, a new \$100 (₹9,569) screenless wearable from Alphabet Inc's Google, represents a major evolution in what

consumers can expect from fitness trackers as tech companies race into an era of personalised health and artificial intelligence-powered wellness insights.

It's an answer to the rise of Whoop Inc, a maker of fitness trackers that has found an eager fanbase in recent years among athletes and health-minded consumers. The Fitbit Air flips the script on Whoop's business model. The search giant is charging consumers for the hardware up front and hoping they'll see added value in an optional \$10-a-month Google Health Premium subscription that adds extra features not available in the free version. Whoop, meanwhile, doesn't charge for the hardware itself, but requires users to sign up for membership plans that start at \$200 a year, without which the device is useless. Google Health Premium puts a 24/7 AI Health Coach in your pocket and offers workout plans that are more personalised and tailored to your shifting daily schedule.

A dual-screen laptop that dares for more

ASUS ZENBOOK DUO. Blending exceptional design and display, it delivers solid performance for creative professionals

KEY FEATURE. Media consumption is a strong suit, with OLED panels delivering rich contrast and deep blacks that make movies especially enjoyable BUJOY GHOSH

Siddharth Mathew Cherian

Asus has quietly been sharpening its ZenBook line-up over the last few years, and this year one standout grabbed my attention: the ZenBook Duo in its 2026 avatar. A dual-screen laptop with a built-in kickstand promises a fresh take on productivity in its latest avatar. I spent time with it — here's how it holds up.

DESIGN

The ZenBook Duo showcases a thoughtfully engineered dual-screen design, complemented by a flexible hinge and a neatly integrated detachable keyboard, all packaged in a sleek form factor. It comes with a protective sleeve that adds convenience while ensuring the device remains free from scratches during transport.

Constructed from ASUS's Ceraluminium material, the chassis delivers a smooth matte finish alongside impressive durability. This combination not only enhances the laptop's premium feel but also provides a sturdy, comfortable grip — striking a balance between elegance and rugged reliability. Despite its robust build, the device remains user-friendly in hand.

Weighing 1.65 kg, the ZenBook Duo feels well-balanced, with its weight evenly distributed across the dual-screen body and detachable keyboard, contributing to a cohesive and stable overall experience. The unit reviewed in Mocha Grey colourway further elevates its appeal, with the Ceraluminium finish effectively minimising visible smudges and scratches, maintaining a clean and refined look over extended use.

DISPLAY

The ZenBook Duo's dual 14-inch 3K OLED displays are the highlight of

the experience. Each panel delivers a sharp 2880 × 1800 resolution in a 16:10 aspect ratio, making it equally suited for productivity and entertainment. With a 144 Hz refresh rate and an ultra-fast 0.2 ms response time, visuals remain fluid and responsive.

Brightness is equally impressive at 500 nits (typical) and up to 1000 nits in HDR, enhanced by VESA DisplayHDR True Black 1000 certification for deep contrast and vibrant highlights. Colour reproduction is exceptional, backed by 100 per cent DCI-P3 coverage and Pantone validation. Both displays are touch-enabled with stylus support, and the 93 per cent screen-to-body ratio ensures an immersive viewing experience within a compact footprint.

The secondary display, concealed beneath the detachable keyboard, is just as capable. It shines in utility-driven tasks — offering intuitive controls such as Asus Dial for volume adjustments or timeline scrubbing in apps such as DaVinci Resolve. The kickstand is sturdy and reliable, easily supporting the device's weight even during intensive typing sessions in laptop or stand modes.

Media consumption is a strong suit, with OLED panels delivering rich contrast and deep blacks that make movies especially enjoyable. The dual-screen setup also proven its worth in multitasking scenarios — whether it's tracking stocks on one screen while working on another, editing video with a dedicated reference monitor or drafting content alongside background media.

For creative professionals, flexibility is valuable. Video editors can split timelines and previews, while designers can use the lower screen as a drawing surface with the upper display serving as a live canvas. The included Asus Pen 2.0 stylus is both precise and responsive, performing

seamlessly across creative workflows. It works particularly well in applications like Photoshop and DaVinci Resolve, doubling as both a fine brush tool and an accurate editing instrument. Handwriting recognition is reliable and adds to its practicality. This pen is charged via a USB-C wireless dock, I wonder why they dropped the in-built USB-C port for charging.

While the device can double as a large-format e-book, its weight makes prolonged handheld use less comfortable. Its most effective form factor remains in traditional laptop mode or the cascading dual-screen setup, where its design with functional form truly shines.

SOUND

Audio on the ZenBook Duo can best be described as solid and well-rounded. It features dual downward-firing speakers complemented by a soundbar integrated into the hinge between the two displays. Vocals carried a clear sense of depth and reverb, while percussion came through with a satisfying presence — resulting in an overall rich and enjoyable listening experience.

KEYBOARD AND PORTS

The ZenBook Duo comes with a detachable Bluetooth keyboard featuring an inbuilt battery, connecting seamlessly via Bluetooth or pogo pins when docked over the second screen. It offers a backlit chiclet layout with 1.7 mm of key travel, delivering a comfortable and responsive typing experience. Key-strokes register accurately with no noticeable lag, while the backlight proves especially useful during late-night work sessions. Charging is flexible via USB-C or pogo pins, and a dedicated on/off switch adds convenience when carrying the keyboard separately.

In terms of connectivity, the

ZenBook Duo offers a well-balanced and practical port selection. On the left, it houses an HDMI 2.1 port, a Thunderbolt 4 port for charging and high-speed connectivity, and a 3.5mm audio jack — ideal for external displays and audio setups. The right side includes a USB 3.2 Gen 2 Type-A port for legacy peripherals, a second Thunderbolt 4 port and the power button. Altogether, the port layout strikes an effective balance between versatility and everyday usability.

PERFORMANCE

The ZenBook Duo is powered by the Intel Core Ultra 7 355 processor, featuring 8 cores and 8 threads, with a base clock of 2.3 GHz and boost speeds up to 4.7 GHz. It is paired with an integrated Intel NPU rated at up to 49 TOPS, alongside 32 GB of LPDDR5X RAM and a fast 1TB M.2 NVMe PCIe 4.0 SSD, delivering a capable setup for modern workflows.

In synthetic benchmarks such as Cinebench 2026, the laptop scores 457 in single-core and 2,346 in multi-core performance, placing it just behind processors such as the Core Ultra 7 255H and Ryzen 5800X. While it isn't positioned as a high-end performance chip, it holds up well in everyday productivity tasks and handles creative applications, such as Adobe Premiere Pro and DaVinci Resolve, with consistency for day-to-day use.

Gaming isn't its primary focus, but the system is capable of light gaming workloads. Thermal management is competent, with side vents effectively dissipating heat. The Ceraluminium chassis helps keep temperatures in check, though a slight warmth can be felt against surfaces under load. Overall, it offers a balanced price-to-performance ratio for a productivity-first device.

BATTERY

The ZenBook Duo is equipped with a 99 Wh, 4-cell Li-ion battery that delivers reliable all-day performance for typical usage. In real-world scenarios, it comfortably lasts around 9–11 hours when handling tasks like writing, browsing, streaming YouTube and managing social media. Under heavier workloads, such as gaming or video editing, battery life lasts roughly between 2.5 and 4 hours, which is expected given the dual-screen setup and performance demands.

The device ships with a 100 W USB-C fast charger, capable of fully charging the laptop in approximately 2 hours. ASUS also includes an instant charging feature, allowing for a quick top-up in under an hour when you're short on time.

VERDICT

In its 2026 avatar, the ZenBook Duo stands out as one of the most innovative dual-screen laptops in recent years. It excels in design, thoughtful screen integration and delivers impressive display quality backed by solid performance. Priced ₹3,06,990, its uniqueness is undeniable after being refined over the years. However, its appeal leans more toward niche users, particularly creative professionals, some of whom may still prefer dedicated tools like drawing tablets. Even so, as a laptop, it remains a highly capable, well-rounded machine that performs reliably across a wide range of tasks.

● SNAPSHOT

Price: ₹3,06,990
Pros: Great display, decent sound and good enough performance
Cons: Very premium, limited use cases

Apple Watch rolls out sleep apnea notifications

SWEET DREAMS. The move is aimed at enhancing health tracking and promoting proactive wellness for users

Ashwin Rajagopalan

Apple rolled out a couple of key health features for the Apple Watch and AirPods Pro. The Apple Watch will now deliver sleep apnea notifications while the AirPods Pro will provide a clinically validated Hearing Test feature to users in India. The Hearing Test is based on the standard clinical approach called pure-tone audiometry that users can take themselves with their AirPods Pro and a compatible iPhone or iPad. Apple's sleep apnea notifications arrive at a time when sleep tracking and the discussions around sleep have gained traction among technology companies, healthcare professionals and wellness-conscious users alike.

SLEEP IS SERIOUS BUSINESS

Consumer research across the world has revealed that health (and fitness tracking), convenience (quick notifications) and seamless connectivity remain the primary purchase drivers for smartwatches across the globe.

Sleep tracking has become an obsession among many users. It's not just smartwatches, consumers can now choose from fitness rings and screenless activity trackers too. According to a study by Healthcare Foresights, the Sleep Tech Devices Market size is valued around \$29.3 billion and tipped to cross the \$134 billion mark by 2035, growing at a CAGR of over 18 per cent.

SLEEP APNEA IN FOCUS

Sleep apnea is a prevalent disorder

WELLNESS SUPPORT. You can set up sleep apnea notifications in the Health app on your iPhone using an Apple Watch Series 9 or later, Apple Watch Ultra 2 or Apple Watch SE 3 running the latest version of watchOS

which is estimated to impact more than 1 billion people worldwide, and in most cases, goes undiagnosed. An AIIMS study in 2023 revealed that more than 104 million Indians could be suffering from obstructive sleep apnea. It can impact wellness, with an increased risk of hypertension and cardiac issues.

Obstructive sleep apnea (OSA) is the most common form; other types include central sleep apnea (CSA) and mixed (Complex) sleep apnea. OSA occurs when throat narrowing blocks the flow of air into the lungs.

Some of the common symptoms (that needed to be validated by a medical professional) include loud snoring, gasping for air when you sleep, morning headaches and wak-

ing up with a dry mouth. In many cases, insomnia and hypersomnia (daytime sleepiness) have also been linked to obstructive sleep apnea.

SLEEP TRACKING GAME

The Apple Watch debuted in 2015 and has evolved from a lifestyle device to a proactive wellness hub or an intelligent guardian as Apple puts it. The 2020s have seen the wearable industry firmly shift towards wellness with multiple devices — from activity trackers, smartwatches and fitness rings, in the mix.

Apple's sleep tracking game has evolved from Basic Sleep and Schedules to include a more comprehensive sleep tracking solution that includes vitals and respiratory

tracking. Rajiv Kumar, Clinician Researcher — Apple, told us that its new sleep apnea notification tracking is a result of a wider focus to provide meaningful and actionable sleep insights. Improved battery life and faster charging speeds on newer generation Apple Watches make it more convenient for users to wear their Apple Watch to bed.

HOW IT WORKS

Breathing Disturbances is an innovative new Apple Watch metric that uses the accelerometer to detect small movements at the wrist associated with interruptions to normal respiratory patterns during sleep. Every 30 days, Apple Watch will analyse breathing disturbance data and notify users if it shows consist-

ent signs of moderate to severe sleep apnea so that they can consult their doctor about next steps.

For more informed conversations with their healthcare providers, users can export a PDF that shows when sleep apnea may have occurred, three months of breathing disturbance data and additional information.

The notification algorithm was developed using advanced machine learning and an extensive data set of clinical-grade sleep apnea tests. The feature was then validated in a clinical study where every participant identified by the algorithm had at least mild sleep apnea.

Because overall quality of sleep is important, Breathing Disturbances can also be used to assess restfulness of sleep. They can be influenced by alcohol, medication, sleep position and more. Users can view their nightly Breathing Disturbances in the Health app, where they are classified as elevated or not elevated, and can be viewed over a one-month, six-month or one-year period.

HOW TO SET IT UP

You can set up sleep apnea notifications via the Health App on the iPhone. You will need an Apple Watch Series 9 or later, Apple Watch Ultra 2 or Apple Watch SE 3 with the latest version of watchOS.

Sleep must be set up with Track Sleep with Apple Watch turned on. You do have the option to turn off sleep apnea notifications. You must wear your Apple Watch to sleep for a minimum of 10 nights over a 30-day period. Your data will be analysed every 30 days.

QUICKLY.

LIC launches revamped Jeevan Sathi policy

New Delhi: New Jeevan Sathi single premium and New Jeevan Sathi Limited premium were launched by LIC CEO and MD R Doraiswamy. Both are joint life plans that cover a married individual, along with his/her spouse, in a single policy, the LIC said. The minimum basic sum assured is ₹3,00,000. While there is no upper limit, the maximum basic sum assured will be subject to acceptance decision as per the board-approved underwriting policy, it said.

KIOCL posts net profit of ₹53 crore in Q4FY26

Bengaluru: Public sector company KIOCL reported a net profit of ₹53 crore in Q4FY26, compared to a net loss of ₹36 crore in Q4 FY25. However, revenue from operations declined 11.6 per cent y-o-y to ₹218 crore. Revenue from its pellet plant fell sharply by 85 per cent y-o-y to ₹22 crore, from ₹150 crore in the corresponding quarter last year.

‘SBI sees strong opportunities to build stable and low-cost deposit base’

Our Bureau

The State Bank of India (SBI) sees significant opportunities in expanding digital onboarding, transaction banking and strengthening its wealth management franchise for building a granular, stable and low-cost deposit base.

“Strengthening our liability franchise and deepening customer engagement will remain an important strategic focus area. We see significant opportunities in expanding digital onboarding, transaction banking, SME ecosystems, and relationship-led banking solutions,” Chairman Challa Sreeniva-

UCB cooling-off rules may lead to boardroom manipulation

SWAP RISKS. Loopholes could enable directors to retain indirect control over boards: Experts

K Ram Kumar

The regulatory prescription of a minimum three-year cooling-off period after an urban cooperative bank's (UCB) director has completed a 10-year continuous term on its board may set in motion a game of musical chairs.

Co-operative banking experts opine that some directors, who can no longer continue on UCB boards due to the aforementioned criteria, may plant their own people on the board, get them to resign after three years (despite their term being for five years) and get back on the board.

The cooling-off period for the director should be for five years, and he/she should not be allowed to become a director on the board of another bank during this

PROXY PLAY. Bank-hopping and proxy appointments may dilute the intent behind RBI's governance tightening measures

period to prevent gaming of the system, experts said.

ELIGIBILITY NORMS

According to the Reserve Bank of India (Urban Co-operative Banks-Governance) Amendment Directions, 2026, a director on the Board of a UCB, after completing a continuous tenure of 10 years in office, will be eligible to be re-appointed, whether by election or co-option or in

any other manner, as a director on the board of the same UCB only after undergoing a minimum cooling-off period of three years.

During the cooling-off period, the said director will not be associated with the UCB in any capacity/manner other than as a member/customer.

This, however, will not preclude him/her from being appointed as a director on

the board of another bank, if otherwise eligible.

MANIPULATION FEARS

Co-operative banking expert D Krishna said the three-year cooling-off period will definitely not stop manipulation.

“Two banks in a town can have unwritten swap arrangements for persons completing the 10-year stipulation. Bank hopping should have been prohibited in the RBI directions.

“A cooling period of a full term of five years would have been a much neater arrangement, which would avoid the practice of filling mid-term vacancies either by election or by nomination and the attendant manipulations,” Krishna said.

As of March 2025, there were 1,457 UCBs, with deposits and advances aggregating ₹5,84,415 crore and ₹3,70,225 crore, respectively.

FinMin to meet chiefs of PSU banks tomorrow

Press Trust of India

The Finance Ministry has called a meeting of heads of public sector banks (PSBs) on Friday to review financial performance and progress of credit flow to the agriculture sector and MSMEs amid the West Asia crisis.

The meeting is scheduled to be chaired by Financial Services Secretary M Nagaraju, a day ahead of his superannuation.

The review meeting will also deliberate on the operations of regional rural banks and their financial performance, according to sources. Besides, sources said, there would be a discussion on AI and digital frauds and progress with regard to the Jan Samarth portal.

There would be a discussion about the recovery mechanism and progress under the DRT and Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act.

Why IRDAI's new norms will make the job tougher for top insurance honchos

G Naga Sridhar

The role of key management personnel (KMPs), including Managing Director & Chief Executive Officer, directors and other senior executives in the insurance industry, is set to become more challenging from this financial year onward, as they will need to meet stricter requirements linked to remuneration and incentives while ensuring transparent compliance with the new corporate governance norms.

The Insurance Regulatory and Development Authority of India (IRDAI) on Tuesday amended the existing norms under the IRDAI (Corporate Governance for Insurers) Regulations, 2024, linking the remuneration and incentives of KMPs to a slew of new factors.

“The focus on customer-centric metrics for fixing remunerations and incentives, including grievance redressal and claim settlements, is just one aspect of the new norms prescribed by the insurance regulator,” a MD and CEO of a major private general insurer said.

NEW FRAMEWORK

For FY27, the minimum parameters that shall mandatorily be taken into account for the assessment of performance of all KMPs for variable pay or incentives go beyond customer-centric measures.

For life insurers, the ratios include assets under management to total premium ratio, renewal premium to new business premium ratio, policy retention metrics, and expense of management to gross direct premium ratio.

For general and standalone health insurers, the parameters include line-wise net incurred loss ratio, renewal premium to new business premium ratio, expense

The IRDAI tightened governance norms, linking KMP pay and incentives to insurer performance metrics

of management to gross direct premium ratio, along with product performance and claim responsiveness indicators.

DISCLOSURE CHALLENGE Industry executives said the new framework could be challenging, especially where performance metrics depend on customer behaviour and documentation processes.

One CEO noted that claim responsiveness is influenced both by the insurer's processes and the ability of policyholders to submit complete information.

While some of these parameters were already monitored internally, the key change is mandatory disclosure of business-sensitive information.

Insurers will now be required to publish performance metrics and KMP remuneration parameters on their websites in an “easy to access” and “easy to understand” format, with data for the preceding three years.

Some insurers have raised concerns that disclosure of product performance and key metrics could provide insights to competitors, according to a senior actuary at a life insurance company.

Industry experts noted that boards will face a difficult task in balancing incentive structures for KMPs without creating internal friction among leadership teams.

Consumer body moves against e-comm firms for hazardous materials sale

Our Bureau

The Central Consumer Protection Authority (CCPA) said it has initiated regulatory action against unauthorised online listing, advertisement and sale of hazardous chemicals and explosive substances on digital platforms. It said it has issued eight notices to e-commerce entities in this regard.

The action was initiated following inputs regarding the online listing and sale of regulated substances on platforms, including IndiaMART, Justdial, Sigma-Aldrich India, Dial4Trade and Export-

ersIndia. The notices sought details on seller information and licensing compliance, buyer verification mechanisms, quantities sold, import details and applicable regulatory approvals.

Substances flagged include ammonium nitrate, gunpowder, picric acid and pentaerythritol tetranitrate (PETN), which are regulated, restricted or prohibited under laws governing public safety and hazardous substance handling. “Unauthorised online access to such hazardous substances may expose consumers to serious safety risks and unlawful supply channels,” the authority said in a statement.

Suresh Gopi chairs review of key BPCL projects and multi-product pipeline project in western Tamil Nadu

Rishi Ranjan Kala

Suresh Gopi, Minister of State for Petroleum & Natural Gas (MoPNG), reviewed the progress of Bharat Petroleum Corporation's (BPCL) multi-product pipeline project, which will ensure better fuel supply across western Tamil Nadu and neighbouring regions.

INFRA STATUS

The Minister on Tuesday chaired a high-level meeting in Coimbatore to review key energy infrastructure projects in Tamil Nadu being executed by BPCL.

The review meeting included the Irugur-Devan-

TAKING STOCK. Suresh Gopi, Minister of State for Petroleum & Natural Gas, chaired a high-level meeting in Coimbatore to review key energy infrastructure projects in Tamil Nadu

agonthi multi-product pipeline project, which is being implemented at a revised project cost of about ₹1,732 crore with 82.6 per cent physical progress.

City gas distribution (CGD) projects of BPCL for the Erode and Nilgiris districts, costing around ₹3,685 crore and recording a physical progress of around 44.6

per cent, were also reviewed by Gopi.

The Irugur-Devanagonthi project, with a design capacity of 3.5 million tonnes per annum (mtpa), is an important project aimed at linking Tamil Nadu and Karnataka by laying a cross-country multi-product pipeline of around 355 km and establishing associated terminal

facilities. This will improve the efficiency and reliability of fuel supply across western Tamil Nadu and neighbouring regions by ensuring faster, safer and environmentally friendly transportation of petroleum products.

The project will also strengthen regional energy infrastructure and improve logistics efficiency, while creating significant jobs and promoting long-term industrial and economic growth in the region.

Exponent Energy Co-founder Sanjay Jagannath steps down

Our Bureau

Bengaluru-based energy-tech start-up Exponent Energy's Co-founder Sanjay Byalal Jagannath has stepped away from his operational role, with the executive set to move into an advisory position while exploring opportunities outside the company.

According to market intelligence platform Tracxn, the founders collectively hold around 16 per cent stake in

Exponent Energy, of which Jagannath owns approximately 3.79 per cent.

Jagannath played a key role in developing the company's charging network, operations and support functions.

Commenting on the move, Jagannath said: “The initial journey at Exponent was all about building the foundations, technology, product, team and culture. It was a fantastic experience with our leadership team and the investors.”

US stocks turn dull amid peace deal uncertainty

US stocks were subdued on Wednesday in choppy trading, as investors remained cautious while awaiting progress in West Asia talks. Iran's state TV said Tehran had obtained a draft framework for an agreement with the US that would restore Strait of Hormuz shipping within a month in exchange for a US military pullback and lifting of a naval blockade. "We're a little bit concerned that the market's going to test once earnings season is over in totality. Then we have alack of news flow, so the market will turn its attention to the Fed, to the Middle East," said Nancy Tengler, CEO & CIO at Laffer Tengler Investments. At 09:57 am ET, the Dow Jones rose 174.37 points, to 50,642.33, the S&P 500 gained 2.37 points, to 7,521.49 and the Nasdaq lost 3.30 points, to 26,651.99. REUTERS

Himalaya Wealth launches ₹500-cr SME-focused AIF

New Delhi: Himalaya Wealth Managers on Wednesday announced the launch of a ₹500-crore SME-focused alternative investment fund aimed at backing high-growth small and medium enterprises across sectors, such as aerospace, defence, healthcare and renewable energy. The fund, Himalaya SME Scheme-I, is a SEBI-registered category I Alternative Investment Fund (AIF) with a target corpus of ₹250 crore and an additional ₹250 crore as a greenshoe option. The fund is led by industry veterans Asit C Mehta, Deena Mehta, Manohar Lal Vij and Jatin Tehri. **PH**

\$32 billion worth shares may witness staggered monetisation by PE funds

IN FOCUS. Fintech, financial services, technology and new-age platform firms remain key exit pockets

Akshata Gorde
Mumbai

Private equity (PE) and venture capital (VC) investors sitting on nearly \$32 billion worth of holdings in listed Indian companies are increasingly favouring staggered exits amid volatile markets and valuation caution, even as the block deal pipeline remains strong. The holdings are concentrated largely in consumer internet, fintech, financial services, technology and select new-age platform-led businesses as of May 2026, according to data from Kotak Institutional equities. Some of the largest PE/VC holdings include about 53 per cent in Billionbrains Garage

Ventures valued at about \$6.53 billion and around 50 per cent in Lenskart worth about \$4.66 billion.

MAJOR HOLDINGS PE/VC investors hold over 25 per cent in One 97 Communications valued at \$1.87 billion and 16.5 per cent in Swiggy worth about \$1.18 billion. Other companies with sizable PE ownership include Aadhar Housing Finance, IGI, PB Fintech and Urban Company. While exits through block deals are expected to continue over the next 12-18 months, experts said investors are becoming more tactical about timing, pricing and the pace of monetisation. "There is no clear stop in exits through block deals, but

High exposure

Substantial holdings in cos	M-cap	Holding (%)	Holding (\$ mn)
Groww	12,298	53.1	6,533
Lenskart	9,313	50.3	4,659
Hexaware Tech	3,284	74.0	2,440
Vishal Mega Mart	5,935	40.1	2,381
One 97 Communications	7,434	25.2	1,870

Source: Prime Infobase, Kotak Institutional Equities

there is a noticeable shift towards selectivity," said Abhishek Dadoo, Partner at Khaitan & Co. "The market still has capacity to absorb secondary supply, though investors are more discerning on price and likely future overhang." "Sponsors also appear more valuation-sensitive at present," he said, adding that funds inclined to exit are deferring transactions if the

pricing is not adequate or if the broader market sentiment is weak. A phased approach allows investors to test demand, reduce price disruption and monetise over multiple windows rather than force a single large transaction into the market. Bir Bahadur SSachar, Partner at JSA Advocates & Solicitors, said staggered sell-downs are being used to pre-

serve valuations and avoid excessive pressure on stocks where multiple investors are looking to monetise simultaneously. "Sponsors/investors are also mindful of the exchange rate fluctuation because, for foreign investors, a significant devaluation of Rupee also impacts their USD return on investments deployed." "IPOs may have slowed down currently, but block deals activity will continue to be robust at least for the next 12 months," said Bhavesh Shah, MD and head of investment banking at Equirus Capital. In block deals, the market price is already available, reducing valuation negotiations that are needed in IPOs for price discovery, he said.

Coal India OFS subscribed 8x, govt to retain excess demand

Our Bureau
New Delhi

Coal India's offer for sale (OFS) through stock exchanges on Wednesday oversubscribed more than 8 times. With this the government has decided to exercise green shoe option. The government is selling over 12.32 crore, or up to 2 per cent stake, in Coal India at a floor price of ₹412 a share. The issue includes a green shoe option of 1 per cent. "Offer for Sale in Coal India Ltd received enthusiastic response from investors and was over subscribed 8.14 times on the first day. Allocation will be on price priority basis. Government has decided to exercise the entire green shoe option," Arunish Chawla, Secretary in the Department of Investment and Public Asset Management (DIPAM), said in a social me-

STRONG DEMAND Non-retail or institutional investors subscribed to more than 45.15 crore shares or over 8 times the shares reserved for them at an indicative price of ₹436.69 per share, much higher than the set floor price. At this indicative price, bids of over 45.15 crore shares amount to around ₹19,000 crore. The floor price of ₹412 per share is at a 10 per cent discount over Tuesday's closing price of ₹458.25 on the BSE. On Wednesday, shares of Coal India closed at ₹462.90, up 1.01 per cent over the previous close on BSE. Coal India is the second OFS of a public sector company in the current fiscal year. Last week, the government sold 8.08 per cent stake in Central Bank of India via OFS and raised ₹2,266 crore.

HDFC Bank, ONGC drag Sensex, Nifty; metal stocks shine

Madhu Balaji
Bengaluru

SHARP SLIDE. ONGC fell 4.7 per cent to ₹274.05 on the NSE, reacting to its Q4FY26 earnings

The equity benchmarks dipped after a flat opening on Wednesday as losses in HDFC Bank and ONGC offset gains in metal and energy shares, while investors remained cautious over the fragile US-Iran truce and developments around the Strait of Hormuz. According to analysts, traders also squared off their positions ahead of holiday. Market remains closed on Thursday due to Bakri-id. The BSE Sensex declined 141.90 points to close at 75,867.80, while the NSE Nifty 50 slipped 6.55 points to settle at 23,907.15. Broader markets outper-

formed the benchmarks, with mid-cap and small-cap indices posting marginal gains. Vikram Kasat, Head of Advisory, PL Capital, said that mid-cap and small-cap stocks showed resistance amid selective buying. Among sectoral indices, media emerged as the top

gainer, followed by metal and auto stocks. In contrast, banking, financials, IT, and oil & gas slipped. **GAINERS & LOSERS** Within the Nifty 50 pack, Tata Motors Passenger Vehicles, Hindalco, Power Grid, Eternal and NTPC

were among the top gainers. ONGC and HDFC Bank were the biggest drags, while Wipro, Dr Reddy's Laboratories, ICICI Bank and Infosys also ended lower. HDFC Bank declined 2.6 per cent after reports said the lender paid ₹45 crore to a state road development corporation to draw large deposits. ONGC fell 4.7 per cent reacting to its Q4FY26 earnings. Coal India remained volatile after the government launched an OFS to sell up to a 2 per cent stake. Vinod Nair, Head of Research, Geojit Investments, said main indices remain range-bound, while mid-caps have entered a stronger phase, supported by recovering domestic inflows that are

offsetting foreign institutional investors' selling. He added that improving prospects for peace between the

US and Iran are driving expectations of an earnings and valuation reset, even though Q1-FY27 could re-

main soft. Market breadth remained positive as 1,772 stocks advanced on the NSE and 1,535 declined.

Adani group stocks sizzle; Adani Power overtakes Infy in m-cap

Press Trust of India
New Delhi

Adani Group stocks ended higher on Wednesday, with Adani Power overtaking IT major Infosys in m-cap, in an otherwise subdued market. The stock of Adani Total Gas surged 13.35 per cent, NDTV skyrocketed 10.39 per cent, Adani Energy Solutions jumped 5.28 per cent and Ambuja

Cements climbed 2.28 per cent on the BSE. Shares of Adani Green Energy advanced 2.23 per cent, Adani Power edged higher by 1.72 per cent, ACC climbed 1.09 per cent, Adani Ports rose 0.74 per cent and Adani Enterprises 0.11 per cent. The combined market valuation of the firms stood at ₹19.44 lakh crore. Adani Power went ahead Infosys to become the country's 11th most-valued

firm by market capitalisation. At close, Adani Power's market valuation stood at ₹4,79,706.78 crore, while that of Infosys was ₹4,70,111.69 crore. This year, shares of Adani Power have surged nearly 74 per cent, while those of Infosys dropped over 28 per cent. Adani Enterprises, Adani Ports, Adani Power, Adani Energy, Adani Green and Adani Total Gas hit their 52-week high on Wednesday.

BROKER'S CALL.

SBI Securities

STAR CEMENT (BUY)

Target: ₹277
CMP: ₹216.70
Star Cement reported healthy growth across parameters with volumes growing 9.7 per cent year on year to 1.6 million tonne (mt) and blended realisations improving 1.7 per cent to ₹7,253 per tonne. EBITDA margin expanded to 26.8 per cent, driven by cost efficiencies and operating leverage from higher volumes. The company's overall capex plans remains intact. Total capex for FY27E/28E is guided to be ₹600-700 crore and ₹1,500 crore, respectively. While FY27E capex will be largely funded through internal accruals and cash reserves, FY28E capex will be largely funded through a mix of internal accruals and debt. The management expects an impact of ₹250-300 per tonne on operating costs in H1FY27 due to the West Asia crisis affecting packing bags and fuel cost. Normalisation is expected from Q3FY27. The management targets 10-12 per cent volume growth for FY27 while EBITDA/tonne is expected to be in the range of ₹1,500-1,700 (vs ₹1,819 in FY26) over the next three years. Cement demand was sluggish in April due to elections in Assam and West Bengal, however, pick-up was witnessed in May. Star Cement's Q4FY26 numbers reflect healthy execution with volume-led growth and margin expansion. The stock trades at FY27E/28E EV/EBITDA of 9.3x/8.7x respectively. We value the stock at 11.7x of its rolling one-year forward EV/EBITDA and cut our target price to ₹277 (due to near-term margin pressure).

Systematix

KRSNAA DIAGNOSTICS (BUY)

Target: ₹833
CMP: ₹539.20
Krsnaa Diagnostics Q4FY26 revenue at ₹192.60 crore (up 3.5/6.3 per cent y-o-y/q-o-q) was below our as well as consensus estimates (7 per cent lower). EBITDA at ₹54.90 crore (up 3.6/18 per cent y-o-y/q-o-q) materially beat estimates led by lower than expected operational costs. We had expected an escalation in operational costs in Q4 owing to upfront costs related to implementation of Rajasthan project. PAT came at ₹41.70 crore (up 102 per cent y-o-y and 171 per cent q-o-q), aided by fair valuation gain of ₹22.20 crore related to Apulki Healthcare (part of other income) during the quarter. Excluding this one-off gain, adjusted PAT stood at ₹10.20 crore and declined y-o-y/q-o-q. B2C (retail) revenue stood at ₹15.80 crore was flat q-o-q. The B2C business is now supported by 3,500+ touchpoints including 500+ franchisees and collection centres. Retail contribution reached around 8 per cent of revenue during FY26 and management expects the share to move into double digits going ahead. Management lowered guidance on Rajasthan project in FY27 to ₹100-150 crore as a conservative approach considering the timing uncertainties in the ramp up phase. The company will capitalise ₹530 crore in FY27 in fixed assets (towards Rajasthan project and radiology expansion) while aiming to maintain EBITDA margins around current levels despite temporary Q1 pressure from Rajasthan manpower deployment. Based on our revised estimates, we retain Buy with a PT of ₹833 (23x FY28E EPS). We estimate FY26-28E Revenue/EBITDA/PAT CAGR of 19.9/18.7/2 per cent.

Hitachi Energy hits new high as Q4 profit surges

Our Bureau
Bengaluru

Shares of Hitachi Energy India surged to an all-time high on Wednesday after the company reported a sharp rise in Q4FY26 earnings and announced fresh capacity expansion plans, prompting brokerages to turn bullish on its long-term growth prospects. The stock hit a record high of ₹37,695 during the session before settling 4.32 per cent higher at ₹37,550 on the NSE, compared with the previous close of ₹35,995. The company posted a 79.7 per cent y-o-y rise in consolidated net profit to ₹330.5 crore for the March quarter, aided by strong execution and higher revenues. Profit stood at ₹183.9 crore in the corresponding quarter last year. Revenue from operations climbed 46.2 per cent y-o-y to ₹2,754.1 crore in Q4FY26 from ₹1,883.7 crore

a year earlier. In FY26, net profit more than doubled to ₹987.8 crore from ₹384 crore in FY25, while revenue rose to ₹8,147.7 crore from ₹6,384.9 crore. The board also approved a final dividend of ₹8 per share for FY26.

GROWTH VISIBILITY Global brokerage Jefferies maintained its 'Buy' rating on the stock and sharply raised its target price to ₹43,145 from ₹25,000. It said demand trends remain strong, while high-voltage direct current (HVDC) projects are expected to support growth and margins over the medium-term. It also expects earnings per share to grow at a 58 per cent CAGR over FY26-FY28. HDFC Securities said Hitachi Energy delivered a strong operational performance in Q4FY26, with revenue, EBITDA and adjusted profit after tax exceeding es-

timates. However, it noted that rising contribution from lower-margin HVDC projects could dilute margins despite supporting absolute EBITDA growth. The brokerage retained its 'Add' rating and raised the target price to ₹31,414, citing robust order pipeline, export opportunities, data centre demand and new product introductions such as battery energy storage systems.

'VALUATIONS STRETCHED' However, a few brokerages remained neutral, saying

valuations remain stretched for Hitach Energy stock. Nuvera Institutional Equities said the company's growth prospects remain strong, supported by execution momentum, a robust ₹2.95 lakh crore order backlog and fresh ₹20 billion capex plans for transformer capacity expansion. However, it maintained a 'Hold' rating, saying valuations remain stretched despite revising the target price higher to ₹34,200. Motilal Oswal also highlighted strong opportunities in transmission, renewables, exports and data centres, while noting that the company is undertaking an additional ₹2,000 crore capex over its existing expansion plans. The brokerage reiterated a 'Neutral' rating with a revised target price of ₹32,000. Meanwhile, Emkay Global Downgraded the stock to 'Reduce' from 'Add' (at a re-

vised target price of ₹28,700 from ₹20,825), saying elevated valuations limit further upside despite improving earnings visibility. Prabhudas Lilladher remains positive in long term given Hitachi Energy being a leading player in HVDC technology with a healthy order pipeline, robust order book of ₹29,560 crore (3.6x TTM revenue), increasing demand from high-growth industries such as data centres and BESS, strong global parentage and improving share of services and exports driving margin expansion. "The stock is currently trading at P/E of 109.1x/76.0x on the earnings of FY27/28E. We downgrade our rating from 'Hold' to 'Reduce', given the sharp rally in stock price valuing the stock at P/E of 65x Mar'28E (60x Mar'28E earlier) arriving at TP of ₹30,768 (₹26,108)," the domestic brokerage said.

Pushp Brand files IPO papers with SEBI

Press Trust of India
New Delhi

Indore-based spice maker Pushp Brand (India) has filed preliminary papers with capital markets regulator SEBI to raise funds through an initial public offering (IPO). The IPO is expected to be in the range of ₹800-1,000 crore, according to sources. The public issue is entirely an offer for sale (OFS) of up to 74.45 lakh shares by promoters and investor selling shareholders, according to the draft red herring prospectus filed on Tuesday.

STAKE SALE

Under the OFS, promoters — Mahendra Kumar Surana and Surendra Kumar Surana — will offload their stakes, while investors — A91 Emerging Fund I LLP and Sixth Sense India Opportunities III will also sell their shares in the company. A91 Emerging Fund I LLP is an affiliate of Mumbai-based equity fund A91 Partners, while Sixth

Sense India Opportunities III is an arm of venture capital fund Sixth Sense Ventures. As the issue is completely an OFS, the company will not receive any proceeds from the public offer and the entire amount will go to the selling shareholders. Established in 1974, Pushp Brand (India) Ltd is a branded packaged spices and food company. Its portfolio includes pure spices, blended spices, whole spices and value-added products such as *hing*, western seasonings, quick-fry mixes, soya products and tea. As part of its expansion plan, the company is setting up a green manufacturing facility and plans to commission an integrated storage facility by 2028, followed by a grinding and milling line for pure spices by 2029. The company's shares are proposed to be listed on the BSE and the NSE. ICICI Securities Ltd, IIFL Capital Services and Systematix Corporate Services are the book-running lead managers for the IPO.

SEBI seeks tighter oversight of use of equity funds raised

Reuters
Mumbai

Markets regulator Securities and Exchange Board of India (SEBI) plans to tighten oversight of how companies use equity capital raised from public markets, according to a copy of draft proposals reviewed by Reuters.

The proposals are aimed at bolstering investor confidence and accountability of issuers at a time when fundraising momentum has cooled due to a sell off in equity markets following the Iran war. A panel of SEBI will send the draft proposals to the regulator, which will seek market feedback before changing the rules. The proposed rules have not been previously reported. An email query sent to SEBI on Wednesday was not answered.

REGULATORY CONTROL The proposals would give

greater powers to monitoring agencies — typically credit rating firms — to hold firms accountable for how funds are used. Proposed changes include direct reporting by rating agencies to stock exchanges, the introduction of penalties when companies do not cooperate, and a lower threshold of funds raised to trigger mandatory monitoring. Currently, credit rating firms in India must monitor end-use of funds raised through public offers but often face a lack of information from companies and do

not have to make those reports public.

RATERS TO MONITOR

Under the proposed changes, credit rating firms would submit reports on fund use directly to exchanges and would be required to flag companies that are not cooperating. "Monitoring agency reports are intended to enhance transparency, accountability and safeguarding investor interests. Therefore, timely and adequate submission of report to exchanges is paramount to ensuring investor protection," according to the draft proposals. The regulator's panel is also proposing penalties of ₹50,000 per violation for issuers that obstruct monitoring. SEBI also wants to lower the threshold for mandatory monitoring from ₹100 crore to ₹50 crore, expanding scrutiny across IPOs, rights issues, preferential allotments and QIPs.

SC quashes NCLAT order on Amazon appeal

New Delhi: The Supreme Court on Wednesday set aside the NCLAT's June 2022 order which had rejected Amazon's appeal against an anti-trust suspension of its investment deal with Future Group. A bench of Justices Vikram Nath and Sandeep Mehta also set aside the Competition Commission of India's December 17, 2021 order which had levied a ₹202 crore penalty on Amazon and suspended its deal with Future. Tiea Connectors raises ₹77 cr in Series A funding

Bengaluru: Electronic system design and manufacturing (ESDM) Tiea Connectors has raised ₹77 crore in a Series A funding led by IvyCap Ventures. This comes just after the ₹22 crore pre series A funding that was led by Jamwal ventures. The Series A round also saw participation from Jamwant Ventures and 8X Ventures, along with select HNI angel investors. **OUR BUREAU**

GCC enablement market pegged at \$12-15 billion: UnearthIQ report

Our Bureau
Chennai

As global capability centre (GCC) ecosystems expand at a rapid pace, there has also been a rise in organisations helping them find their footing in the Indian market.

According to a report from GCC consultancy firm UnearthIQ, India's GCC enablement market which include advisors, IT services firms, real estate developers, staffing solution providers, executive search firms, innovation hubs, boutique consultancies, is pegged to be at \$12-15 billion.

This market is expected to expand to \$20-25 billion by 2030.

The report suggests that nearly 80 per cent of this

'Iran could open Strait of Hormuz within a month if pact is reached'

FRAMEWORK DEAL. Tehran wants the US to withdraw forces from the country's vicinity, says state TV

FLEET TRANSIT. US naval vessels, some with thousands of sailors and marines aboard, regularly transit the region, stopping in ports, including in Oman REUTERS

Iran would restore shipping through the Strait of Hormuz to pre-war levels within a month in a framework deal with the US to also include withdrawing US forces from Iran's vicinity, Iranian state television reported on Wednesday. The report said the US would end a naval blockade of Iranian shipping, citing a memorandum of understanding (MoU) being negotiated between the two sides to end the war, which has choked global energy supplies through the strategic waterway.

UNOFFICIAL DRAFT
Iranian State TV said it had obtained an unofficial draft of the MoU though it was not final and may not be agreed on. The US denied the report, saying it was “complete fabrication” in a White House statement on social

media. The issue of US troops in the region also needs further discussion, the TV report said, without being more specific.

NUCLEAR PROGRAMME

There was no mention of Iran's nuclear programme which the US wants disbanded. The State TV report was the latest signal of possible progress towards a deal, although publicly Tehran and Washington have outlined

positions starkly at odds and the potential terms outlined by the broadcaster did not appease all US demands. US Secretary of State Marco Rubio said on Tuesday it may take a few more days, after President Donald Trump had raised hopes over the weekend for an imminent end to the war.

STICKING POINTS

Key sticking points have included reopening and man-

agement of the waterway through which a fifth of the world's oil and liquefied natural gas flowed before the conflict and the dismantling of Iran's nuclear capacity.

Oil prices fell more than 5 percent on Wednesday after the Iranian TV report. It was not immediately clear what a US military pullback as described by Iranian State television would look like.

ENFORCING BLOCKADE

The US military has some 15,000 troops currently enforcing a blockade of Iran and has thousands of additional forces at bases throughout the region, including in Gulf states like Qatar, the UAE and Bahrain.

US naval vessels, some with thousands of sailors and Marines aboard, regularly transit the region, stopping in ports including in Oman.

Iranian sources said talks on the nuclear issue will come in a second round of

negotiations, something that may not be acceptable to some of Trump's closest supporters. Trump, who will meet with his top aides at the White House on Wednesday, has said dismantling Iran's nuclear programme to prevent Tehran from developing a nuclear weapon was the key aim of the war.

PEACEFUL PURPOSES

Iran says the programme is for peaceful purposes only. Earlier on Wednesday, a senior Iranian official told a reporter son the sidelines of the first International Security Forum in Moscow that reopening the strait remained a sticking point.

"As long as we have not agreed on all issues, we consider that nothing has been agreed," Iran's Deputy Secretary of the Supreme National Security Council, Ali Bagheri Kani, told reporters when asked about a deal on reopening the waterway.

TVS Srichakra announces ₹220 crore capex plan

Our Bureau
Chennai

TVS Srichakra Ltd, the Madurai-based tyre manufacturer, has announced a ₹220 crore capital expenditure plan for its manufacturing facilities at Vellaripatti to expand capacity across its two/three-wheeler and off-highway tyre segments.

CAPACITY EXPANSION

The company's two-wheeler tyre plant, which currently has a production capacity of around 210-235 lakh tyres per annum and is operating at 80-85 per cent utilisation, will undergo a capacity expansion of about 5 per cent.

The additional capacity is expected to be commissioned in the first half of FY29. TVS Srichakra plans to invest up to ₹110 crore in the expansion. The company said the move is aimed at meeting rising demand for its two- and three-wheeler tyres.

At its off-highway tyre plant, which has an existing capacity of around 75-85 tonnes per annum and util-

isation levels of 75-80 per cent, the company plans to increase capacity by about 25 per cent. The expansion is scheduled to be completed in the first half of FY28. An investment of up to ₹110 crore has been earmarked for the project.

The company said the investment is intended to cater to growing demand for off-highway tyres.

The capex will be funded through internal accruals and debts, the company said in stock exchange announcement.

NET PROFIT

Meanwhile, the company more than tripled its consolidated net profit to ₹36 crore for the fourth quarter ended March 31, 2026, compared with ₹10 crore in the corresponding quarter last year. Revenue for the quarter rose 20 per cent to ₹981 crore from ₹818 crore a year earlier.

For FY26, net profit more than tripled to ₹71 crore from ₹20 crore in the previous fiscal, while revenue increased 12 per cent to ₹3,643 crore from ₹3,254 crore.

Mphasis launches autonomous enterprise platform Tria

Our Bureau
Mumbai

Nitin Rakesh, CEO and
MD, Mphasis

Mphasis on Wednesday launched an enterprise agency platform Mphasis Tria that coordinates autonomous AI decision-making and measurable business outcomes across operations, technology and commercial functions.

RETURNS HOPE
The company invested 1.5 per cent of its FY26 revenue (\$27 million), betting on FY27 as the foundational layer and expecting returns

THREE LAYERS
The platform focuses on three layers — the foundational layer powering the structured knowledge graph and contextual intelligence engine, decision intelligence layer that is accelerated by Mphasis' acquisition of Continuum AI, and the agentic execution and orchestration layer that enables intelligent automation and coordinated enterprise actions at scale.

Mphasis is introducing a new category of enterprise transformation, one that moves beyond autonomous AI systems into governed Enterprise Agency, reflecting the belief that enterprises do not simply need more AI models or automation, but the ability to convert intelligence into coordinated, accountable actions,” said Nitin Rakesh, Chief Executive Officer and Managing Director, Mphasis.

SWELLING DEAL SIZE
“We sold 68 per cent more deals in FY26 compared to

FY25. I think the average large deal size went from \$2 million to \$4 million in the same period. Now I have the agency to go back to the customer to say I will drive this economic outcome, but let me not just give you the platform that does brand planning, let me offer brand planning as a service to you," he said.

IMPACT ON JOBS

Rakesh estimated jobs of enterprise architects, data scientists, engineers to morph, stating that the deployment will depend on the size of the problem being solved.

Gold falls to 2-month low on war-driven inflation

Bengaluru: Gold prices fell to a two-month low on Wednesday, pressured by expectations of tighter monetary policy to fend off rising inflation, with no clear end in sight to the war in Iran. Spot gold was down 1.4 per cent at \$4,444.64 per ounce as of 10.30 am EDT (1430 GMT), after falling to its lowest level since March 27 earlier in the session. US gold futures for June delivery fell 1.2 per cent to \$4,445.20. REUTERS

Crude oil slides as traders weigh on Iran peace deal

Oil tumbled on optimism that the US and Iran will reach a peace deal, even as the two countries made conflicting statements on the progress of talks. Brent traded around \$96 a barrel. While Iranian state television said it obtained an unofficial draft of an interim pact to end the war, the White House called the reported memorandum of understanding “a complete fabrication”. BLOOMBERG

Foodgrain output up 5% in CY 2025-26, rice touches new high

SEEDS OF GROWTH. Rice output soars to 154 mt, that of wheat at a peak of 120.66 mt

Our Bureau
New Delhi

Foodgrain production in the 2025-26 crop year (CY) ending June is estimated to have increased by over 5 per cent, with rice production touching a new high. Rice production is expected to be over 154 million tonnes (mt), making India the top global producer.

The government released the production estimates — the third advance estimate of crops grown in all three seasons — kharif, rabi and summer (*zaid*) — for 2025-26 CY, in which wheat production was raised marginally, while cotton output was lowered.

Experts see the robust production helping the country navigate any drop in the current year amid projection of a below-normal monsoon, which missed the on-set forecast date of May 26, and the emergence of the drought-bearing El Nino.

Wheat production, which was pegged at 120.21 mt in the previous estimate, is now projected at 120.66 mt, notwithstanding localised dam-

Crop output			
	2024-25	2025-26*	% Change
Total Food Grains	357.73	376.56	5.3
Rice	150.18	154.02	2.6
Wheat	117.94	120.66	2.3
Pulses	25.68	27.41	6.7
Oilseeds	42.99	43.06	0.2
Maize	43.41	55.09	26.9
Nutri Cereals	18.59	17.58	-5.4
Cotton*	29.72	29.02	-2.4
Sugarcane	454.61	500.06	10.0

Source: Agriculture Ministry; *in Million bales of 170 kg each bale; *3rd Estimate

age caused due to unseasonal rain and hailstorms. According to the government's third advance estimates, the current projection of wheat production is higher by 2.3 per cent from 117.94 mt in 2024-25. It is a record high.

‘RECORD-BREAKING’ The Agriculture Ministry pegged cotton production in 2025-26 at 29.02 million bales (each bale weighs 170 kg), down by 2.4 per cent from 29.72 million bales in 2024-25.

In the previous estimate, the government projected cotton output at 29.09 million bales for 2025-26.

“The government is continuously working towards

the prosperity of farmers and the development of the agricultural sector. These efforts are now manifesting in the form of record-breaking production,” said Agriculture Minister Shivrāj Singh Chouhan.

The third advance estimates indicate that the production status of foodgrain, major cereals, oilseeds and commercial crops in the country remains robust, with record-level estimates projected for several crops.

NUTRI-CEREALS DOWN “Under the ‘Viksit Krishi Sankalp Abhiyan’ (Developed Agriculture Pledge Campaign) launched last year, the agricultural sector

across the country was further strengthened,” he said.

As per the latest release, rice production is pegged at 154.02 mt, up by 2.6 per cent from 150.18 mt in 2024-2. In the foodgrains category, though there is a drop in the production of nutri-cereals (Shree Anna), the output of pulses and maize is higher.

Pulses production is seen at 27.41 mt, up by 6.7 per cent from 25.68 mt. Tur (pigeon peas) production is estimated at 3.59 mt (against 3.62 mt), gram (chana) is pegged at 12.51 mt (11.11 mt) and lentil (masur) at 1.76 mt (1.65 mt).

Maize production for the first time crossed the 50 mt mark, and the government has pegged it at 55.09 mt, up 27 per cent from 43.41 mt.

But nutri-cereals (millets, jowar and ragi) production has dipped 5.4 per cent to 17.58 mt from 18.59 mt.

Oilseeds production has been pegged a tad higher at 43.06 mt from 42.99 mt as soyabean output dipped to 12.6 mt from 15.27 mt.

On the other hand, mustard production is seen to be at a record 13.77 mt from 12.67 mt.

China rejects Indian rice again over alleged GMO presence

Subramani Ra Mancombu
Chennai

China continues to reject Indian non-basmati rice consignments, alleging they contain genetically modified organisms (GMOs) despite the government communicating that no GM crop is grown in the country.

“Last week, China rejected 4-5 consignments, alleging they contained GMOs. There is more than what meets the eye with the rejection,” said a trade source tracking the matter.

Official sources alleged that China was trying to malign India's image in the global market, knowing well that India does not grow any GM crop, barring cotton. Beijing, however, grows GM rice.

In March, Chinese authorities turned away three shipments, alleging that they contained GMOs. On April 30, the Ministry of Environment and Forests stated that the Genetic Engineering Appraisal Committee (GEAC), the regulatory authority for GM crops, had not approved any GM rice in India.

On April 23, the Indian Council of Agricultural Research's Assistant Director-General SK Pradhan wrote to the Agricultural and Pro-

Sources said over 70 consignments have been rejected by Chinese authorities REUTERS

cessed Food Products Export Development Authority (Apeda) that India does not cultivate GM rice.

70 REJECTIONS SO FAR

Sources said about 70 consignments had been rejected by the Chinese authorities despite the Indian office of China Certification & Inspection Group (CCIC), a Chinese State-owned company, inspecting and certifying the shipments.

The rejection has put some exporters on the back foot, with at least 200 containers voluntarily held back from being shipped out.

In March, the Chinese authorities had suspended the import licences of three Indian firms on charges of shipping rice that contained the

presence of GMOs.

“India has firmly said no GM rice is grown in the country. Despite the Chinese knowing this, they are rejecting our consignments. It signals that they are indulging in trade war with India,” said a trade source.

‘DEEP NARRATIVE’

The official said China could be given the benefit of the doubt. “It could be that China jumped to a wrong conclusion. Or it may not be scientifically right. Either way, it is wrong,” he said.

A trader from North India said China was rejecting rice shipments as it was trying to undermine India's competitiveness in the global market. However, another trader said China would build inventories in case of prices being lower, and this strategy was more towards trying to gain leverage ahead of trade discussions.

TALKS WITH GACC

The source monitoring the developments said Indian officials had held talks with the General Administration of Customs of China (GACC) officials last week. “Chinese officials are not explaining the methodology for rejecting our consignments,” the source said.

Red Sea crisis, price competition hit oilmeal exports

Our Bureau
Mangaluru

Oilmeal exports declined to 37.68 lakh tonnes (lt) during 2025-26 from 43.42 lt in 2024-25, registering a drop of 13.22 per cent. In value terms, exports fell to ₹9,340 crore in 2025-26 from ₹12,171 crore in 2024-25.

BV Mehta, Executive Director of the Solvent Extractors' Association of India (SEA), said oilmeal exports continued to face significant market and logistical challenges, adversely affecting export realisations and profitability.

The key issue is the severe disruption in the Red Sea shipping route. The disruptions have sharply increased freight costs. Additionally, intense price competition from South American and

China remained the largest importer of Indian oilmeals, driven by tariffs on Canadian canola products

European suppliers also impacted oilmeal exports from India.

Stating that the geopolitical conflicts had forced shipping companies to bypass the Red Sea route, he said taking a detour around the Cape of Good Hope added 10-15 days to shipping journeys. This has created con-

tainer shortages and inflated freight costs.

Approximately 20 per cent of India's oilmeal (destined for West Asia) and 15 per cent (destined for Europe) are vulnerable to these logistical delays and costs.

UNCOMPETITIVE

He said Indian soybean meal exports remain uncompetitive globally due to price disparities with major producers such as Argentina and Brazil. Further, domestic livestock feed makers have increasingly shifted towards cheaper alternatives, such as DDGS (a byproduct of ethanol), at the expense of soy-meal and other oilmeals.

Mehta said the domestic high price of soybean and the drop in crushing activity had led to lower shipping volumes.

He said India's oilmeal ex-

ports to China reached 8.78 lakh tonnes during FY26. This was largely driven by price competitiveness for the rapeseed meal and China's restriction on Canadian canola. A major driver of India's exports was China's 100 per cent tariff on Canadian rapeseed/canola meal.

South Korea became the second-largest importer of Indian oilmeals during FY26. India exported 3.5 lt of oilmeal to South Korea.

Though Bangladesh is one of the key importers of Indian soybean and rapeseed meal, the export volume reduced nearly 50 per cent in 2025-26 due to political disturbances in the neighbouring country.

The other importers of Indian oilmeal include Kenya (1.87 lt), Germany (1.78 lt), Nepal (1.67 lt) and France (1.37lt).

Monsoon arrives over Lanka, clears last hurdle

Vinson Kurian
Thiruvananthapuram

The South-West monsoon has set in over Sri Lanka — the island nation's meteorological department announced on Wednesday — late by at least six days. Sri Lanka is the penultimate stop before the monsoon entourage reaches the Kerala coast.

Barring exceptions, it typically takes up to a week for the season to advance from Sri Lanka to Kerala. As of Wednesday, supportive but weak south-westerlies were gradually establishing themselves along the Kerala coast, though upper-level winds remained resistant to a favourable shift in direction.

LIKELY KERALA ONSET

The conditions are expected

Convection (in red) was absent along the Kerala coast even as pre-monsoon thunderstorms (blue and white) roamed Central India

to turn more conducive around June 2-3, when stronger monsoon-friendly south-westerly to westerly winds are forecast to strengthen toward the coast.

The monsoon could make its onset over Kerala at any time, depending on how quickly the upper-atmo-

spheric winds fall into alignment.

In the wake of the monsoon's arrival, Sri Lanka's met agency forecast showers or thundershowers over the Western, Sabaragamuwa and North-Western provinces, and across the districts of Galle, Matara, Kandy and Nuwara Eliya.

FAIRLY STRONG WINDS

It has also warned of fairly strong winds of 30-40 km/hr at times over the western slopes of the central hills, and across the northern, north-central, north-western and southern provinces, besides Trincomalee district. The onset phases in ideal conditions typically witness low-level winds at higher speeds across the region.

Back home, numerical model guidance from the India Meteorological Depart-

ment (IMD) suggests low-level winds may remain unfavourable for the onset of monsoon until at least June 3. The conditions appear to improve during June 4-5, when the south-westerlies strengthen decisively over the Kerala coast, though the alignment may weaken soon thereafter.

The European Centre for Medium-Range Weather Forecasts (ECMWF) broadly concurs with the June 4-5 timeline for Kerala.

For the IMD to formally declare the monsoon onset here, westerly winds must not only intensify at lower levels, but also persist and deepen vertically up to around 4.5 km in the atmosphere. Current projections by the ECMWF suggest this vital combination may not fully materialise until June 4-5.

Regaal Resources expands maize processing unit in Bihar at ₹389 crore

Our Bureau
Mangaluru

Regaal Resources Ltd, a maize processing company, has commissioned its expanded facility at Kishanganj in Bihar.

Built on an investment of approximately ₹389 crore, the expansion strengthens its production capabilities across value-added maize products and specialty derivatives.

The expansion includes scaling up the integrated maize wet milling facility's crushing capacity from 825 tonnes/day to 1,650 tonnes/day, along with the commis-

sioning of a new liquid glucose manufacturing facility with a production capacity of 180 tonnes/day and a Maltodextrin powder manufacturing facility with a production capacity of 50 tonnes/day.

CREATING JOBS

A statement said the project aims to strengthen production capabilities, improve supply chain efficiencies and cater to growing demand from industries, including food and beverages, pharmaceuticals, textiles, health-care, animal nutrition and industrial applications.

It said the project is expected to create around 475 direct jobs, increasing the com-

pany's total workforce to nearly 950 employees, as well as indirect jobs across logistics, warehousing, transportation, procurement, contractual labour and associated services.

The expansion is expected to support thousands of farmers by strengthening local sourcing networks and improving access to organised procurement channels.

The company also plans to strengthen its value-added product portfolio by adding products like dextrose anhydrous, dextrose monohydrate, hydrol and a range of modified starch products, with commissioning expected during FY27.

As global futures ease, cotton sold at discounted rates

Vishwanath Kulkarni
Bengaluru

As cotton futures on the ICE ease, domestic resellers and multinationals have started selling stocks at rates lower than those set by the Cotton Corporation of India (CCI). This is even as the demand remains weak.

ICE cotton futures had gained around 47 per cent since early February. From around 60.52 cents per pound on February 9, cotton futures touched a recent high of 88 cents on May 11, before retreating to 76-77 cents due to factors like improving weather prospects in the US and Brazil, decline in crude oil prices, stronger US dollar index and uncer-

tainty around global demand recovery.

Prices of Indian cotton in the physical market also corrected, but the decline remained limited due to lower arrivals, tightening spot availability and higher domestic basis levels, said Anand Popat of CotYarn Trade Link in his weekly

newsletter. The Indian basis, the difference between spot prices and futures, against ICE July strengthened to 8.55 cents per pound, he said.

TECHNICALLY WEAK

“The CCI still holds sizeable unsold stocks, which may continue to influence domestic market sentiment. Overall, the market remains technically weak in the short term,” Popat said.

The CCI, which began selling the 2025-26 crop procured at the minimum support price of around ₹57,200 per candy of 356 kg, reduced the prices initially to about ₹54,600 before increasing it to up to ₹68,600.

It stopped selling cotton from May 22.

The CCI, which procured

105 lakh bales of 170 kg each during the 2025-26 season, has sold around 72 lakh bales so far. Its stocks are estimated around 33 lakh bales, as per trade sources.

YARN MARKET DULL

“There's volatility in prices. Resellers and multinationals have started selling at prices lesser by ₹2,000 per candy than the CCI list price. There are no buyers in the market. Buyers are abstaining from the market for both cotton and yarn,” said Ramanuj Das Boob, a sourcing agent in Raichur.

The yarn market is also dull. Yarn prices, which moved up following the rise in crude oil prices, have come down by ₹30-35 per kg, Boob said.

Natural rubber production gains 3.4% in FY26

V Sajeew Kumar
Kochi

Natural rubber production registered a 3.4 per cent growth in FY26, with the volumes touching 9.05 lakh tonnes from 8.75 lakh tonnes in the previous year.

During the same period, consumption rose by 1.2 per cent to 14.27 lakh tonnes from 14.10 lakh tonnes.

Favourable climatic conditions across major rubber-producing regions contributed to increased tapping days, sustained tapping activities and enhanced productivity. The growth in production was further supported by the sustained efforts of the Rubber Board through initiatives like promotion of rain guarding and self-tap-

ping, adoption of scientific agronomic practices, capacity-building and skill development programmes and implementation of plant protection and timely disease control measures.

The 29th meeting of the Rubber Board Statistics Consultative Panel reviewed the performance of the Indian and global NR sector and deliberated on key sectoral indicators, including type-wise production, consumption, imports, exports and related variables. India currently ranks sixth among the world's natural rubber-producing countries.

GROWTH DRIVERS

The assurance of guaranteed price under the Rubber Production Incentive Scheme (RPIS) implemented by the

Kerala government also encouraged growers to continue tapping activities.

The upward trend in domestic prices renewed rubber growers' interest in tapping activities and augmenting production efforts. Domestic prices, which increased sharply during 2024-25 over the previous year, exhibited relative stability during 2025-26.

Prices in the domestic market continued to strengthen during the early

months of 2026, with RSS-4 price reaching a peak of ₹262 per kg on May 14.

Total NR demand in the country recorded a growth of 1.2 per cent during FY26 over the previous year.

The auto tyre sector, which accounted for 64 per cent of the total natural rubber consumption, declined 4 per cent during the year. General rubber goods sector saw growth during the same period.

The panel also noted that NR import had declined by 16.7 per cent to 4.59 lakh tonnes from 5.51 lakh tonnes in 2024-25. The import of compounded rubber under HS Code 4005 registered a significant increase during 2025-26, rising to 3.49 lakh tonnes as against 2.45 lakh tonnes in the previous year.

QUICKLY.

Supreme Court upholds
EC's power to conduct SIR

New Delhi: The Supreme Court on Wednesday upheld the power of the Election Commission to conduct the Special Intensive Revision (SIR) of electoral rolls, saying the exercise “advances the constitutional imperative of free and fair elections. The process that may initially appear exclusionary can, through appropriate safeguards, be rendered constitutionally compliant. We are satisfied that impugned SIR exercise meets requirements of proportionality,” said a bench headed by Chief Justice Surya Kant. **PTI**

EBG group sets up Vajram
Electric for e-mobility

Hyderabad: EBG Group has set up Vajram Electric, a centralised manufacturing, assembly and distribution hub in Hyderabad, with the potential to generate over 450 direct and indirect jobs. It will serve EBG Group's diversified portfolio spanning electric mobility, rehabilitation technology, consumer electronics, construction, F&B infrastructure and hospitality. It has been launched with an initial investment of ₹25 crore, said a release. **OUR BUREAU**

Telangana to set up SPV
for fiber optic network

Hyderabad: The Telangana government will set up a Special Purpose Vehicle (SPV) to develop a State-wide fiber network to connect every gram panchayat with high-bandwidth internet under the amended BharatNet programme. In the first phase, the restoration of digital connectivity will be undertaken in 3,089 villages across the undivided Nizamabad, Ranga Reddy and Khammam districts. **OUR BUREAU**

MoD seeks proposals from 3 bidders to identify AMCA production partner

MAJOR DEAL. Five prototypes of the 5th generation fighter jet will be produced by the entity to be identified

Dalip Singh
New Delhi

Three days after *businessline* first reported it, the Ministry of Defence (MoD) on Wednesday issued a request for proposal (RfP) to three shortlisted bidders to roll out the process of manufacturing of five prototypes of fifth generation indigenous Advanced Medium Combat Aircraft (AMCA).

The RfPs have been sent out to Tata Advanced Systems Ltd (TASL), which is competing independently; a consortium led by Larsen & Toubro (L&T) including the State-owned Bharat Electronics Ltd (BEL) and Dynamic Technologies Ltd; and a consortium of Bharat Forge, PSU BEML, and Data Patterns.

Two of the bidders con-

INDIGENOUS POWER. A full-scale model of India's Advanced Medium Combat Aircraft **MURALI KUMAR K**

firmed to *businessline* that they have received the RfP but refused to share its content given the confidentiality involved in the first ever indigenous production outside the defence PSU, Hindustan Aeronautics Ltd, which has been the custodian of defence aerospace manufactur-

ing in the country. The bidders will have to respond to the RfP in three months after which the MoD will open the bid for technical and commercial negotiations ahead of identifying the production partner, said sources. The MoD in February had shortlisted the final

three entries, out of seven who submitted the technical bids.

The core integration of the AMCA prototype and its flight testing will take place at the upcoming facility spread across 650 acres of land at Puttaparthi, Andhra Pradesh. AMCA has been indigenously designed and developed by the Aeronautical Development Agency (ADA) — a lab of the Defence Research and Development Organisation (DRDO) — which will be the lead integrator of the project.

A GAME CHANGER

The DRDO aims to complete the development cycle of the AMCA by 2034 so that the induction can start from the following year.

The AMCA production will open a second line of manufacturing in India. But

for the engine, most of the other parts like frames, avionics and payloads — will be indigenous. The AMCA will be powered by the GE-414 engines which will be manufactured in India. Negotiations between HAL and GE are at an advanced stage for licenced production.

In case India is able to manufacture indigenous engines, later batches of the fifth generation aircraft can be retrofitted with such engines.

Defence Minister Rajnath Singh approved the AMCA Programme Execution Model on May 27, 2025.

The government is moving to fill a long standing demand of the Indian Air Force to fulfil its capacity deficiency. As against the required strength of 42 squadrons, IAF is down to 30.

CBSE denies charges as Rahul slams award of contract to Coempt

Our Bureau
New Delhi

The Central Board of Secondary Education (CBSE) on Wednesday said allegations regarding any irregularities in the award of contract for implementation of On-Screen Marking (OMS) to Coempt EduTech are “erroneous, misleading and not based on facts”.

In a post on X, the Board said, “CBSE has followed the General Financial Rules protocols scrupulously in the awarding of the contract to the agency. CBSE floated the RFP for Digital Evaluation of Answer books for Board Exams 2026 on Central Public Procurement portal on

28.08.2025 and awarded the contract to the qualified bidder.”

The board's post came after Congress leader Rahul Gandhi on Wednesday raised questions regarding the award of contract to the firm, which is the solutions provider for OMS. He also demanded an investigation into the process of award of the contract to Coempt EduTech.

This comes after students and parents raised allegations of answer sheet mix-up, missing scanned pages from answer sheets and discrepancies in scoring methodology in the OMS evaluation process.

In a post on X, Gandhi said, “There has been a

massive tampering in the CBSE exam results, leaving millions of children across the country and their parents in shock. And Mr. Modi? As always—no answers, no accountability, no shame.”

“The company COEMPT (Coempt EduTech), which

was handed this responsibility, had already pulled off the same stunt in Telangana in 2019 under the name Globarena. Name changed—but the intent the same, the nature the same. Everyone knew the history, yet the contract was still awarded. The future of 1.85 million children was handed over to such a company, and no one batted an eye. This isn't a mistake—it's a deliberate conspiracy,” he charged.

BACKGROUND CHECK

He raised various questions including why the CBSE contract was given to the firm and under whose directions.

“Which rules and procedures were bypassed to award this contract to the com-

pany? Coempt had already been embroiled in controversies under the name Globarena—why didn't CBSE know about it? Why weren't background checks done? What exactly is the connection between Coempt's management and the Modi government?,” he demanded.

“We demand that an independent judicial inquiry and SIT be immediately constituted to bring the real culprits of this entire scam to light. CBSE's Gen Z comrades—your hard work, your future, no one will be able to steal it. We will dig to the root of this conspiracy and uproot this corruption once and for all,” he added in his post on X.

PM directs depts to act to mitigate heatwave impact

Our Bureau
New Delhi

Prime Minister Narendra Modi on Wednesday asked Ministries and departments to mitigate the impact of the prevailing heatwave conditions across the country.

Union Minister Ashwini Vaishnaw, addressing the media after a Cabinet meeting, said the Prime Minister stressed that “all Ministries, especially Health and Water Resources, must take steps to protect people from the heatwave. The challenge should be addressed through a whole-of-nation approach, with the Centre, States and citizens working together,” he added.

The PM urged citizens, on X, to take precautions as and stay hydrated, carry water while stepping out and extend help to others by offering them water during the harsh weather conditions.

Vijay meets Modi, Sitharaman in Delhi, pushes for projects for State

Our Bureau
Chennai

Tamil Nadu Chief Minister C Joseph Vijay urged the Centre to establish the Advanced Medium Combat Aircraft (AMCA) design and development centre and the Centre for Airborne Systems facility in Tamil Nadu.

The AMCA is a planned Indian single-seat, twin-engine, all-weather, fifth-generation, stealth, multirole combat aircraft being developed for the Air Force and the Navy. CABS, a laboratory under the Defence Research and Development Organisation, develops cost-effective airborne surveillance systems for various defence services.

He made the request during his meeting with Prime Minister Narendra Modi on Wednesday during his first visit to the national capital after assuming office as

Every border district to have 360-degree security framework: Amit Shah

Our Bureau
New Delhi

Every border district will have a 360-degree security framework with active involvement of local citizens, the State government machinery, and all concerned security agencies to ensure comprehensive and robust border management, the Centre decided.

The decision was taken at a high-level security review meeting in Bikaner, Rajasthan, chaired by the Union Home Minister Amit Shah on Wednesday, to comprehensively assess security-related issues concerning the border districts along the India-Pakistan Border (IPB).

STRICT MEASURES

At the meeting Shah underlined the need to strictly enforce a zero-tolerance policy for illegal constructions and demolish such structures along borders, especially within 15 km, as per a statement issued by the Ministry of Home Affairs. The meeting was attended by the Chief Minister of Rajasthan, senior State government officials, along with the District Magistrates and Superintendents of Police of five border districts — Bikaner, Jaisalmer, Barmer, Sri Ganganagar and Phalodi.

PLANNED STRATEGY

The Minister emphasised a coordinated border management strategy involving the Border Security Force (BSF), the Central Board of Direct Taxes (CBDT), the Narcotics Control Bureau (NCB), and the State Government machinery to effectively address infiltration, narcotics smuggling, encroachment, terror financing, and other trans-border crimes, stated the Ministry.

Home Minister Amit Shah

He directed District Magistrates to assume enhanced responsibilities, including ensuring full legal and financial compliance by all banks, verification of major business establishments, scrutiny of their funding sources, tracking of mule accounts and shell companies, identification of fake Aadhaar cards, and prevention of smuggling.

'1930' CALL CENTRE

Shah instructed to effectively utilise the ‘1930’ call centre for prompt redressal of cybercrimes and full implementation of the three new criminal laws to strengthen law enforcement and judicial processes in the region.

Emphasis was also laid on the successful implementation of the Vibrant Village Programme-II for strengthening last mile governance, curbing economic crimes, fulfilling infrastructural gaps and supporting border population and 100 per cent saturation of all government schemes in border villages.

The government is firmly committed to ensuring the highest standards of security along the international borders while promoting close synergy between Central and State agencies for holistic development and safety of border areas, the Ministry said.

Breakfast meetings, Delhi huddle fuel chatter on change in Karnataka leadership

Our Bureau
Bengaluru

Amid intensifying speculation over a possible leadership change in Karnataka, Chief Minister Siddaramaiah met with the Congress high command in New Delhi on Tuesday, with the discussions reportedly centred around the upcoming Rajya Sabha and Legislative Council elections.

Congress leaders, however, publicly down played reports of a possible leadership transition in the State. Party general secretary KC Venugopal said after the meeting that deliberations with AICC president Mallikarjun Kharge and Leader of Opposition Rahul Gandhi were focused entirely on the Rajya Sabha and Council polls.

“Siddaramaiah, DK Shivakumar and I were part of the

discussion. The entire deliberation was focused on the upcoming Rajya Sabha and Karnataka Legislative Council elections. Whatever speculation is being made has no basis in reality. Candidates for both polls will be announced along with those for other States such as Chhattisgarh, Madhya Pradesh, and Rajasthan,” Venugopal said.

TALKS ON

Deputy Chief Minister Shivakumar, who has long been seen as a contender for the Chief Minister's post, also attended the Delhi meetings along with senior Congress leaders and party general secretary in-charge of Karnataka Randeep Singh Surjewala.

According to a report by *The Hindu*, Siddaramaiah had a one-on-one meeting with Rahul Gandhi, while later huddling with close

aides and his loyalists, including Housing Minister Zameer Ahmed Khan, Social Welfare Minister HC Mahadevappa and legal adviser AS Ponnanna at the Delhi residence of Minister KJ George.

On Wednesday, Siddaramaiah held another breakfast meeting with senior Ministers and party leaders at Karnataka Bhavan in Delhi ahead of a fresh round of discussions with the high command. Senior Ministers G Parameshwara, MB Patil, Satish Jarkiholi, George and Byrathi Suresh attended the meeting, along with MLC BK Hariprasad.

NO CHANGE YET

While party insiders indicated to *The Hindu* that there may be no immediate change in leadership, discussions around a possible Cabinet reshuffle and power-sharing arrangement have continued

to gain traction within Congress circles.

Siddaramaiah, meanwhile, said he would speak on the matter on Thursday. Sources close to the developments indicated that greater clarity may emerge after the breakfast meeting between the Chief Minister and Deputy Chief Minister at the former's Kaveri residence.

Meanwhile, Home Minister Parameshwara said the breakfast meetings were not unusual and stressed that the party would abide by the Congress high command's direction.

“This isn't the first time the CM has called ministers for a breakfast meeting. Our AICC General Secretary in charge of Karnataka, Randeep Surjewala, is coming tomorrow. Whatever he says, we will follow because he follows the High Command,” Parameshwara told reporters.

CPI(M) workers protest ED raid on Pinarayi's house

V Sajeew Kumar
Kochi

Violence erupted outside the residence of former Kerala Chief Minister Pinarayi Vijayan on Wednesday as Enforcement Directorate (ED) officials were leaving the premises after a search.

According to reports, CPI (M) workers who had gathered outside the residence blocked the vehicles carrying ED officials.

Protesters allegedly pelted stones at the convoy and damaged windows of the vehicles, while police and CISF personnel struggled to bring the situation under control.

The injured ED officials have lodged a complaint with the police.

The CPI(M) alleged on X that agencies such as the ED, CBI and the I-T Department

were being misused to intimidate political opponents. Vijayan criticised the Congress for “its silence on the issue.”

PAYMENT ISSUE

The searches relate to a case involving Cochin Minerals and Rutiles Ltd and followed a day after the High Court dismissed a petition by CMRL seeking to quash the ED investigation.

At the centre of the case is Exalogic, a now defunct firm owned by Vijayan's daughter T Veena. Investigators are examining allegations that Exalogic received substantial monthly payments from CMRL between 2017 and 2021 (about ₹1.72 crore) without providing services.

The matter is also under investigation by the Serious Fraud Investigation Office of the Union Ministry of Corporate Affairs.

Solar energy companies tap battery energy storage systems

Rohan Das
Chennai

As the need for reliable storage for record renewable capacity addition grows, more solar energy players are now building battery energy storage systems (BESS) manufacturing capabilities.

For instance, Waaree Energies, the largest solar module maker, has set itself a target of 20 GWh in BESS capacity by FY28, which will include the manufacturing of cells, battery packs and large-scale BESS containers. Through its subsidiary Waaree Energy Storage Solutions, the company has proposed capital expenditure of ₹10,000 crore for BESS, with a ₹8,000-crore battery gigafactory in Andhra Pradesh.

Similarly, Kolkata-based

Vikram Solar has also announced a target of 15 GWh of BESS capacity by 2030. The company will initially focus on assembling battery packs and containerised storage systems using externally sourced cells with plans to have 7.5 GW in integrated battery cell manufacturing.

Premier Energies has announced plans for a 6 GWh BESS container facility. In its recent earnings call Vinay Rustagi, Chief Business Officer, Premier Energies, said the company has acquired land for the project and expects the capacity to be operational by March 2027.

In the southern market, Swelect Energy Systems has identified BESS as a critical growth engine going forward with the company launching products for both residential

and large-scale commercial/industrial (C&I) energy storage applications.

Other module makers like Adani Solar, Grew Solar and Goldi Solar have also expressed intent to enter the BESS manufacturing businesses.

Ankit Jain, Vice President and Co Group Head, ICRA says that renewable power tenders in India are increasingly requiring battery storage as a necessary component. He added that at a time when there are some signs of demand flattening for solar capacity addition, BESS can open up ‘another stream of revenue’ for solar manufacturers.

Despite this, competition from Chinese imports is said to be a significant challenge for Indian BESS manufacturing.

AIADMK factions working towards a rapprochement

Our Bureau
Chennai

The rebel camp within the All India Anna Dravida Munnetra Kazhagam (AIADMK), led by senior leaders SP Velumani and CV Shanmugam, is slowly returning to the party fold, with efforts underway to broker peace between the warring factions.

Just days after two groups of AIADMK MLAs separately submitted petitions to Speaker JCD Prabhakar seeking the disqualification of the rival camp, the factions have now decided to withdraw their complaints and work together.

Speaking to reporters at the Secretariat on Wednesday, Velumani confirmed the reconciliation move and said

both sides had agreed to function in unison. Though Shanmugham was absent at the meeting, Velumani said he, too, backed the rapprochement.

“The AIADMK stands united now with party's general secretary agreeing to consider our requests one by one in due course. There is no split in the AIADMK but minor differences, which have been sorted out,” he said.

SIGNIFICANT RELIEF

The patch-up comes as a significant relief for the AIADMK, which has been rattled by the resignation of four MLAs in recent days. The legislators later joined the ruling Tamilaga Munnetra Kazhagam, dealing a setback to the opposition party ahead of the next

round of political battles in Tamil Nadu.

Of the total 47 AIADMK MLAs, 25 rebel legislators led by Velumani and Shanmugam backed the TVK government's confidence motion while 22 MLAs aligned with party general secretary Palaniswami opposed the move.

TCS in SKF deal for AI-led manufacturing business

Mumbai: Tata Consultancy Services (TCS) has partnered with Swedish industrial manufacturer SKF to rollout a next-generation enterprise resource planning (ERP) platform. With this multi-year, multi-million dollar deal, TCS will help SKF create a globally-connected operating model, combining centralised, AI-enabled systems and harmonised processes with the flexibility to meet local market needs. It supports SKF to embed AI in every layer across IT, business and products thereby driving faster growth, enhancing customer experience, and advancing strategic priorities at both global and regional levels. “Our partnership with SKF is centred on modernising its global IT landscape and building a resilient, scalable digital foundation for the future,” Tata Consultancy Services MD and Chief Executive Officer K Krithivasan said. **OUR BUREAU**

Boeing to up production of 737 models

Boeing is increasing 737 production to 47 jets a month, up from 42, after consulting with the Federal Aviation Administration, Boeing CEO Kelly Ortberg said on Wednesday. “We’re off and rolling at the 47 rate, and we should be there in the next couple months,” Ortberg said. The company aims to move to 52 jets a month early next year, after Boeing opens a fourth 737 production line in Everett, Washington. “I think the whole world’s watching to make sure we make (rate) 47 and 52,” Ortberg said. **REUTERS**

High fuel prices push Air India to slash over 20% domestic flights

SCALING DOWN. Temporary rationalisation will continue between June and August, says Tata-backed carrier

Rohit Vaid
New Delhi

Tata Group-promoted Air India will temporarily rationalise operations by 20 per cent on select domestic routes between June and August 2026 amid high fuel costs, sources told *businessline*. At present, Air India operates 3,600 domestic flights per week. The reduction, sources said, is expected to impact more than 750 frequencies per week. “Over 40 per cent of operations costs come from fuel, which is the most expensive component. The exponential rise in prices has led to this decision,” sources told *businessline*.

LEAN SEASON Accordingly, the move extends adjustments already announced for certain international services. “The upcoming lean travel season, coupled with ex-

tremely high ATF (air turbine fuel) costs, has led to the decision to reduce frequencies on domestic routes,” sources said. The airline is set to scale down flight frequencies on a number of metro and tier 2 sectors, while continuing operations on all affected routes. The sectors likely to witness lower frequencies include Mumbai-Ahmedabad, Mumbai-Nagpur, Mumbai-Patna, Mumbai-Bhopal, Delhi-Hyderabad, Delhi-Bengaluru and Delhi-Kolkata.

FREQUENCY CUT Besides, sources indicated that the airline’s earlier curtailment of select international operations had moderated connecting domestic passenger traffic through key transit hubs such as Delhi and Mumbai. On its part, the airline said the move involves a reduction in frequencies on select domestic routes during the

SERVICES HIT. The reduction is expected to impact more than 750 frequencies per week

three-month period beginning June 1. “In continuation of our previously announced adjustments to select international services between June and August 2026, we have temporarily rationalised operations on certain domestic routes during the same period, with a reduction in frequencies on select routes,” an Air India spokesperson said.

FUEL PRICES The airline said it would continue to monitor demand and operating conditions

closely, with a view to restoring frequencies once conditions stabilise. Earlier this month, Air India suspended flights on six international routes. These include Delhi-Chicago, Delhi-Shanghai, Chennai-Singapore, Mumbai-Dhaka, Delhi-Malé and Mumbai-New York (JFK) services. Meanwhile, Delhi-Newark services will remain temporarily suspended during the period. Despite these reductions, the airline had said it will continue operating more than 1,200 international flights every month across five continents.

Delhi-San Francisco Air India flight returns mid-way

Our Bureau
New Delhi

An Air India flight operating from Delhi to San Francisco returned to the national capital on Wednesday after the crew detected a technical snag while approaching Chinese airspace, sources told *businessline*. The Boeing 777 aircraft, carrying 230 passengers, had already been airborne for nearly three hours when the issue was identified. Speaking to *businessline*,

airline sources said the crew decided to return to Delhi as a precautionary measure in line with the standard operating procedures (SOP).

RETURN JOURNEY The return journey to Delhi took another three-and-a-half hours approximately. Before landing, the aircraft remained airborne for close to an hour to carry out fuel jettison procedures in accordance with the SOP, taking the total airborne time to nearly eight hours. “The fuel jettison was car-

ried out because a long-haul aircraft like the 777 departs at a very high take-off weight with large fuel reserves for an ultra long-haul destina-

tion like San Francisco,” airline sources told *businessline*. On its part, the airline confirmed that the aircraft had returned to Delhi following a technical issue. “Flight AI173 from Delhi to San Francisco on May 27 has returned to Delhi due to a technical issue in accordance with the laid down procedures. The aircraft landed safely and will undergo technical inspection in line with Air India’s safety standards,” an Air India spokesperson said. According to the spokes-

man, alternative arrangements were being made to fly passengers to their destination at the earliest. **ALTERNATIVE PLANS** “Our ground teams are providing all necessary assistance to the passengers, including refreshments, hotel accommodation or rescheduling as opted for by them.” “The safety and well-being of passengers and crew remain Air India’s highest priority,” the spokesperson added.

Singapore court order procedural, not indicative of fraud: Byju’s founder

Our Bureau
Bengaluru

Byju Raveendran

Founder of embattled edtech major Byju’s on Tuesday said discussions on a settlement with GLAS Trust, the Qatar Investment Authority (QIA) and other stakeholders are progressing, with an agreement having been reached in principle. “A settlement has been agreed in principle, with only a few residual issues left to be finalised, in which I have no role,” said Byju Raveendran in response to reports that a Singapore court had sentenced him to six months in jail. Raveendran clarified that he had not been actively contesting several court proceedings in recent months because the parties were working towards a comprehensive settlement.

He further clarified that the Singapore matter was procedural in nature and did not involve findings on the merits of the case.

OPTIONS AVAILABLE “Today’s Singapore court matter is a procedural contempt of court order, arising only from disputes over document disclosure in ongoing proceedings, not a finding of fraud, dishonesty or any wrongdoing on the merits. I

have been directed to appear on June 15 and appeal options are available,” he said. “Against this backdrop, the decision by QIA to continue pressing this matter appears to be an unnecessary pressure tactic at a sensitive stage of the settlement process.” “I am disappointed that the recent Singapore court matter has been pursued and reported in a manner that creates a misleading impression about me, especially at a time when all key parties have almost concluded the settlement discussions,” he said. **‘NO WRONGDOING’** According to Raveendran, the parties involved in the settlement discussions have acknowledged that there was no wrongdoing on the part of the founders. He added, “I have always

maintained that I acted in good faith and in the best interests of Byju’s, its employees, students and stakeholders. I have also placed on record that neither I nor any of the founders personally received any portion of the disputed funds, and that the funds were used for legitimate business purposes.” **DISPUTED FUNDS** The statement comes amid ongoing legal disputes linked to Byju’s financial troubles and allegations surrounding the use of proceeds from its \$1.2 billion loan. Reports earlier indicated that a Singapore court had imposed a six-month jail sentence on Raveendran in connection with contempt proceedings, even as negotiations between the company, lenders and investors continue over a broader settlement framework.

Swiggy says board changes aimed at long-term value

Our Bureau
Bengaluru

Defending its proposed governance changes after shareholders rejected a special resolution to amend its Articles of Association, Swiggy said the move was to ensure founder and senior management representation on the board and support its long-term objective of qualifying as an Indian owned and controlled company (IOCC) under foreign exchange regulations. In a BSE filing on Wednesday, the company said the special resolution received 72.36 per cent shareholder approval, falling short of the 75 per cent threshold required for passage by 2.64 percentage points. Swiggy said it would continue engaging constructively with shareholders to address concerns and work towards a “positive outcome”.

No Ebola case in India; suspect in Bengaluru tests negative

Our Bureau
Mumbai

As countries, including India, step up surveillance for the Ebola virus at ports of entry, an individual with a travel history from Uganda tested negative for the virus, according to a Health Ministry source. “Exercising abundant caution, one individual with recent travel history from Uganda, who reported mild symptoms of body ache, was placed under isolation at the State-run Epidemic Diseases Hospital in Bengaluru for observation and further evaluation,” the source said, adding that the individual remained otherwise healthy, apart from mild body ache. “A sample was collected and sent to the National Institute of Virology for laboratory testing. The test result

has returned negative for Ebola virus disease,” the source confirmed, reiterating that “no case of Ebola virus disease has been confirmed in India”. **CLOSE MONITORING** The Health Ministry has been coordinating with the States to put in place surveillance and public health protocols, in line with the World Health Organization guidelines, the representative said.

India has an advisory urging travellers to avoid non-essential travel to Congo, Uganda and South Sudan, following the outbreak

The WHO has designated the Ebola outbreak in Congo and Uganda a public health emergency of international concern — the highest alert from the UN Health agency. Subsequently, authorities in Africa, too, have sounded an alert on its spread. India has an advisory urging travellers to avoid non-essential travel to Congo, Uganda and South Sudan, which are high risk regions, following the outbreak.

Soumya Swaminathan, Manindra Agrawal named Fellows of the Royal Society

PT Jyothi Datta
Mumbai

Soumya Swaminathan and Manindra Agrawal

More than 50 years after her father was named Fellow of the Royal Society, Soumya Swaminathan is one of the two from India, and among 90 international researchers, elected to the Fellowship of the Royal Society, the UK’s national academy of sciences. IIT-Kanpur Director Manindra Agrawal was the other elected person from India, an official announcement on Wednesday said. The former Chief Scientist to the World Health Organization and Chairperson the MS Swaminathan Research Foundation, she joins her father late MS Swaminathan — making them possibly the only father-daughter duo to get this

recognition. Agrawal is a renowned computer scientist, globally known for his contributions in Complexity Theory and Cryptography. Among other Indian researchers who have, in the past, been recognised by the Royal Society are Gagandeep Kang and RA Mashelkar, to name a few. Soumya Swaminathan hoped this recognition

would inspire young people to pursue a research-based career, “where you can combine your scientific curiosity with the benefit of having an impact on people’s lives.” **ELITE COMPANY** Coming up next is a signing ceremony (July 10) where the Fellows will have to sign a register — “apparently it is the same register that

Charles Darwin and Newton have signed,” she said. Further, they are allowed to look at one other page in the register, and Swaminathan said that for her would be where her father had signed in 1973. The fellows join the ranks of Stephen Hawking, Isaac Newton, Charles Darwin, Albert Einstein, Lise Meitner, Subrahmanyan Chandrasekhar and Dorothy Hodgkin, a note from the Royal Society said. This year’s cohort includes pioneers across a range of scientific fields, from a palaeontologist who has named more dinosaur species than any other living person; a biologist who has developed the field of ‘oncofertility’ that helps cancer patients who are receiving fertility threatening treatments to have a family.

Tata-backed MedTherapy brings contract model for cell and gene therapy to India

PT Jyothi Datta
Mumbai

In an effort to bring down the cost of cell and gene therapies, the Tata Sons-funded biotech firm MedTherapy is looking to bring in more development and manufacturing in the segment at an affordable cost to the patient, said a top executive of the firm. The US-based cell and gene therapy contract development and manufacturing organisation (CDMO) has a technical facility in Boston and a manufacturing facility in Delhi, said Bikash Verma, MedTherapy Chief Executive Officer. According to the company, he had earlier served as Medical Director and faculty at the Harvard University Medical School

ment with ImmunoAct to supply its CAR-T therapy for cancer to South Africa, Algeria and Morocco. The biotech company can develop products, manufacture it and partner with companies, Verma said, adding that it would look at cancer and non-oncology products. **POTENTIAL CURE** CAR-T cell therapy for cancer, approved in the US in 2017, is seen as a potential cure, he said. The segment has seen multiple Indian companies bringing out products at one-tenth of the global cost. Even that could be expensive, said Verma, adding that the aim was to bring qualitative products at reduced costs. Pointing out that the industry was suffering from

several manufacturing related constraints which are limiting immediate access and affordability, the company said it had two separate business units — a CDMO to manufacture CAR-T cell therapies and viral vectors for other gene therapy companies’ products, and co-development of its own new CAR-T therapy products. “Our own product co-development has led to promising armoured CAR-T therapies for tumours, including brain, breast, lung, skin and bone cancers entering global clinical trials,” the company said. It added, “The blood cancer CAR-T clinical trial in US, now entering clinical trial in India, has demonstrated one of the best response rates and safety profile among lymphoma patients.”
