CASAGRANDBANG ON ORR
building aspirations

*Based on CBRE report 2024
Casagrand Premier Builder Limited is proposing, subject to receipt of requisite approvals, market conditions and other considerations, to make an initial public offer of its equity shares and has filed a draft red herring prospectus ("DRHP") with the Securities and Exchange Board of India ("SEBI"). The DRHP is available on the website of our Company, at www.casagrand.co.in, the SEBI at www.sebi.gov.in as well as on the websites of the book running lead managers Motilal Oswal Investment Advisors Limited and DAM Capital Advisors Limited at www.motilaloswalgroup.com and www.damcapital.in respectively, and the websites of the stock exchange(s) at www.nseindia.com and www.bseindia.com, respectively. Any potential investor should note that investment in equity shares involves a high degree of risk and for details relating to such risk, see "Risk Factors" of the RHP, when available. Potential investors should not rely on the DRHP filed with SEBI for making any investment decision.
The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended ("U.S. Securities Act") or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold outside the United States in "offshore transactions" as defined in and in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.

Minister who forgot to bring her election certificate to the Assembly

S. Keerthana. B. JOTHI RAMALINGAM

The Hindu Bureau
CHENNAI

From a Minister who forgot to bring her election certificate to an AIADMK MLA breaking down, the oath-taking ceremony of the members of the 17th Legislative Assembly of Tamil Nadu in Chennai on Monday was peppered with interesting incidents.

Minister S. Keerthana did not carry with her the certificate of election when her name was called out. She was the 10th legislator to be called for taking oath, after the Chief Minister and eight other Ministers.

Ms. Keerthana handed over the certificate to the Assembly officials later in the day, and took oath. However, she was not the only one who forgot to bring the certificate to the Assembly.

Though the Assembly Secretariat had requested the newly-elected members to bring the certificate of election without fail, many failed to do so. Later in the day, they managed to produce the certificates and took the oath.

Who greets whom?

Likewise, there was a guessing game on ‘Who greets whom?’ Former Chief Minister Edappadi K. Palaniswami (AIADMK) and DMK Legislature Party leader Udhayanidhi Stalin greeted each other. When Chief Minister C. Joseph Vijay entered the House, besides members of the TVK, many in the DMK and the AIADMK, including Mr. Udhayanidhi and Mr. Palaniswami were seen greeting him. Mr. Vijay exchanged the greetings with folded hands.

In another spectacle witnessed in the Assembly, some MLAs greeted Mr. Palaniswami before taking oath. As they walked towards the podium, a few TVK Ministers greeted Leader of the Opposition Udhayanidhi Stalin and those seated on the first row of the Opposition benches. Notably, the Speaker is yet to finalise the seating arrangement of the House.

AIADMK MLA breaks down

AIADMK MLA K. Mohan from Panruti broke down while taking oath. He looked at the portrait of former Chief Minister Jayalalithaa in the House with folded hands and kept calling her by her moniker *Amma*, before returning to his seat.

In the name of God or conscience?

Several MLAs inadvertently repeated the same procedural error while taking oath. With both formats of affirmation – swearing in the name of God as well as affirming by conscience – printed on the oath sheet, many members read out the entire text verbatim instead of choosing one. The Assembly Secretary had to repeatedly prompt them to select either of the two formats before completing the oath.

Vijay, Udhayanidhi, Palaniswami, OPS take oath as MLAs

J.C.D. Prabhakar nominated to the Speaker post, the election to which will be held today. AIADMK's C.Ve. Shanmugam took the oath of office later

Solemn pledge: Chief Minister C. Joseph Vijay takes oath as a legislator in the Tamil Nadu Assembly on Monday. SPECIAL ARRANGEMENT

The Hindu Bureau
CHENNAI

Chief Minister C. Joseph Vijay, his nine Cabinet colleagues, Leader of the Opposition Udhayanidhi Stalin, former Chief Ministers Edappadi K. Palaniswami (AIADMK) and O. Panneerselvam (now DMK), and 219 others took oath as members of the 17th Tamil Nadu Legislative Assembly on Monday, in the presence of Pro-tem Speaker M.V. Karuppaiah.

AIADMK MLA C.Ve. Shanmugam, who could not take oath till the House

adjourned for the day, took oath later in the day in the Pro-tem Speaker's chamber.

Speaker nominated

Later in the day, Thousand Lights MLA J.C.D. Prabhakar was nominated by the Tamilaga Vettri Kazhagam (TVK) for the post of the Speaker of the 17th Tamil Nadu Legislative Assembly.

The TVK president and Chief Minister handed over the papers nominating Mr. Prabhakar for the post to Assembly Secretary K. Srinivasan.

Mr. Vijay also handed over papers nominating

Thuraiyur MLA M. Ravisankar for the post of Deputy Speaker.

The election to the posts of Speaker and Deputy Speaker of the House is scheduled for 9.30 a.m. on Tuesday.

The strength of the House is 233, following the resignation of Mr. Vijay from his second seat, Tiruchi East.

Pro-tem Speaker

Mr. Karuppaiah, the legislator from the Sholavandan (SC) constituency, was administered the oath of office for the post of Pro-tem Speaker on Sunday.

CM Vijay calls on Stalin, leaders of other parties

The Hindu Bureau
CHENNAI

A day after he was sworn in, Tamil Nadu Chief Minister C. Joseph Vijay sprang a surprise on Monday by calling on DMK president and former Chief Minister M.K. Stalin, MDMK leader Vaiko, NTK founder Seeman, and PMK leader Anbumani Ramadoss.

Meanwhile, leaders from other States in India and Sri Lanka extended their greetings to Mr. Vijay, who was sworn in as the Chief Minister on Sunday.

Taking to social media, Mr. Stalin said Mr. Vijay met him with “political decency” and received his wishes and suggestions. Leader of the Opposition Udhayanidhi Stalin was present during the meeting. Mr. Vijay and Mr. Stalin exchanged shawls, and Mr. Udhayanidhi presented a book to Mr. Vijay.

Mr. Vaiko and his son, MP Durai Vaiko, received Mr. Vijay at their residence. Mr. Vaiko told *The Hindu*: “He is the first Chief Minister to visit my residence. Even Mr. Stalin visited only when he was the Leader of the Opposition.” In a video clip, Mr. Durai Vaiko was seen introducing a few to Mr. Vijay as “those who voted for the whistle!”

Mr. Vijay also visited Mr. Anbumani, in the presence of Dharmapuri MLA Sowmya Anbumani, and Mr. Seeman, who presented him with a basket of fruits and a book.

Courtesy call: Chief Minister C. Joseph Vijay with former Chief Minister M.K. Stalin at the latter's residence in Chennai on Monday.

Besides Prime Minister Narendra Modi, Union Minister Rajnath Singh, Union Ministers of State L. Murugan and Ramdas Athawale, leaders of allies, including Congress president Mallikarjun Kharge and CPI(M) general secretary M.A. Baby, extended their greetings, an official release said.

Karnataka Chief Minister Siddaramaiah, Telangana Chief Minister Revanth Reddy, Himachal Pradesh Chief Minister Sukhvinder Singh Sukhu, Andhra Pradesh Deputy Chief Minister Pawan Kalyan, as well as Sri Lankan president Anura Kumara Dissanayake, and Sri Lankan Leader of the Opposition Sajith Premadasa greeted the new Chief Minister.

Former Bihar Chief Minister Nitish Kumar, former Kerala Chief Minister Pinarayi Vijayan, former

Odisha Chief Minister Naveen Patnaik, former Rajasthan Chief Minister Ashok Gehlot, and former Union Minister Rajesh Pilot extended their greetings to Mr. Vijay.

Former Kerala Minister Ramesh Chennithala; MPs Kamal Haasan, Vijay Vasanth, Karti P. Chidambaram, Mahua Moitra (Trinamool Congress), and Abhishek Singhvi (Congress); former BJP State president K. Annamalai; DMDK general secretary Premallatha Vijayakant; Shiv Sena (UBT) leader Priyanka Chaturvedi; AMMK general secretary T.T.V. Dhinakaran; AIPTMMK general secretary V.K. Sasikala, Congress leader Girish Chodankar; and BJP State president Nainar Nagenathan also greeted Mr. Vijay.

The Chief Minister thanked them all.

How a bid to make Thirumavalavan CM failed

B. Kolappan
CHENNAI

A last-minute attempt to make Viduthalai Chiruthaigal Katchi (VCK) leader Thol. Thirumavalvan the first Chief Minister hailing from the Scheduled Caste in Tamil Nadu, with support from the DMK and the AIADMK, is learnt to have failed last weekend.

On Monday, VCK sources told *The Hindu* that Mr. Thirumavalavan was asked to withhold the letter of support to C. Joseph Vijay's Tamilaga Vettri Kazhagam (TVK). This prompted him to delay the announcement until May 9 evening.

“Initially, the AIADMK was unable to secure its MLAs' consent for the idea. By the time it seemingly convinced them, around 4 p.m., he (Thirumavalavan)

had made up his mind against the proposal. We would have faced criticism that, despite the TVK having won in 108 constituencies, the VCK, with just two MLAs, had hijacked the people's mandate,” a senior VCK leader said.

Backroom negotiations

Explaining the backroom negotiations, he said the idea of making Mr. Thirumavalavan the Chief Minister was mooted after a bid for an AIADMK government with the DMK's support ran into hurdles.

The CPI, the CPI(M) and the VCK were informed about the AIADMK-DMK proposal.

“However, the Left leaders were unwilling to support an AIADMK government, as they were aware of the BJP's role in the ar-

VCK sources say party leader Thol. Thirumavalavan was asked to withhold the letter of support to C. Joseph Vijay's TVK, prompting him to delay the announcement till May 9 evening.

rangement. This prompted the Left parties and the VCK to support the TVK to prevent Governor's rule,” the leader said.

While the Left parties

handed over their letters of support to the TVK on May 8, some in the DMK and the AIADMK approached the VCK with the fresh proposal.

Cyber Crime Wing's notice for blocking social media posts draws flak

R. Sivaraman
CHENNAI

The Cyber Crime Wing of the Tamil Nadu police issued a takedown notice to X Corp on May 8, directing the suspension/blocking of 18 URLs/posts, including those shared by YouTuber Maridhas, within three hours, by invoking the intermediary liability provisions under the IT Act and the Information Technology Rules, 2021.

Incidentally, most of the flagged URLs/posts allegedly contained content critical of the Tamilaga Vettri Kazhagam (TVK) and Chief Minister C. Joseph Vijay. The move drew criticism from netizens, who alleged that the police action was against freedom of speech.

The notice cited violations under Section 189 (Unlawful Assembly) of BNS. According to the communication, a request had been received from

the Superintendent of Police, Social Media Cell, regarding certain posts containing provocative and politically sensitive remarks capable of inciting public unrest and disturbing public tranquillity. The notice stated that the posts encouraged unlawful assemblies that could adversely affect the maintenance of law and order, and potentially lead to loss of life and damage to public property.

Invoking Rule 3(1)(d) of the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021, the notice alleged that the reported URLs were being used to commit unlawful acts relating to decency, morality, and defamation.

The authorised officer, in the notice issued on May 8, directed X to immediately remove or disable access to the identified posts and objectionable URLs, and to take proac-

The move drew criticism from netizens, who alleged that the police action was against freedom of speech. REPRESENTATIONAL IMAGE

tive measures to prevent further dissemination of such content on the platform. The officer warned that failure to act immediately could make the intermediary liable for prosecution.

‘Dangerous precedent’

Commenting on the notice issued by the Cyber Crime Wing, Narayanan Thirupathy, chief spokesperson of the Bharatiya Janata Party in Tamil Nadu, termed it a blatant attack on free

speech and political dissent. He said criticism of a political party or its leader, even if sharp, was not “provocative” enough to warrant police intervention and a three-hour takedown ultimatum. “Labelling legitimate questions about governance, funding, and policies as threats to public order sets a dangerous precedent. Dissent is the lifeblood of democracy. Using cybercrime laws to silence voices critical of the TVK

or any ruling dispensation undermines the very Constitution we claim to uphold,” he said.

“This unfortunate harassment has been perpetrated on the day the TVK assumed power. I hope the Chief Minister, who claims he faced several hurdles during his political journey, understands this excess, and advises the cybercrime police to withdraw its demand,” Mr. Thirupathy added.

Social media activist Dinesh alleged that the TVK had filed a complaint against him without valid reasons. “For what – speaking against Vijay *anna* or the TVK? Where are my fundamental rights? I am a citizen of this country, and have the right to speak against the Prime Minister and the Chief Minister, as long as it is done respectfully,” he said.

K. Rajasekar, digital editor of Spark Pluz, said that while social media posts

containing defamatory content or incitement to violence had been removed in the past, the current situation raised serious concerns. “Over the past few days, since the new government assumed office, posts and news reports critical of the government are allegedly being mass-reported in groups, and subsequently taken down. In addition, legal action is reportedly being initiated against individuals posting such content. I consider this condemnable and something that must be avoided in a democratic society that values freedom of expression and dissent,” he said.

Advocate S. Karthikeyan said that X Corp usually does not comply with such takedown requests, as it considers political dissent a part of free speech. “The police are aware of this. They often file petitions seeking takedown orders before magis-

trate courts by making only X Corp a respondent, while intentionally excluding the content creator. The courts then pass orders without hearing the affected individuals. Such one-sided orders raise concerns. Courts should insist that content creators or sharers be made parties to the petition so that their version can also be heard. This would be in line with Article 19(1)(a) of the Constitution,” he said.

However, senior officials of the Cyber Crime Wing maintained that issuing takedown notices was a routine procedure. “Whenever provocative content appears on social media, notices are issued after following due guidelines, seeking removal or disabling of such content. This time, too, following a request from the Superintendent of Police, Social Media Cell, we sent the notice to X,” an official said.

VCK chief's dilemma over Cabinet berth stirs debate

Udhav Naig
CHENNAI

VCK founder and Chidambaram MP Thol. Thirumavalavan is facing a dilemma over whether or not to join Chief Minister C. Joseph Vijay's Cabinet, after having extended outside support to the single-largest party, the TVK.

Party sources said that while Mr. Thirumavalavan does not want to formally join the State government, the party's office-bearers are urging him to have a rethink.

Acknowledging that the Congress's decision to leave the DMK alliance and join the Vijay Cabinet had effectively ended the INDIA bloc, sources said the VCK leadership believed that the significant decline it faced in the election could be traced to its support for the DMK over contentious caste issues in the past five years. This created the perception that the party had not protected the interests of the SCs/STs.

The sources claimed that the TVK was urging Mr. Thirumavalavan to join the Cabinet and offer his experience and wisdom to the largely inexperienced, first-time legislators.

Yet, Mr. Thirumavalavan reportedly doesn't fancy taking up the offer. But many within the party feel the “golden opportunity” shouldn't be missed.

VCK general secretary D. Ravikumar, in a post on X on May 10, said there was a larger question of whether the “broader political resistance against the BJP” could be diminishing due to the TVK government functioning with a slim majority and the DMK-Congress break-up. This raised questions over the necessity of maintaining their anti-BJP stance, he said.

INBRIEF

Southern Railway installs new solar power plants

The Chennai Division of Southern Railway commissioned new solar power plants with a capacity of 140 KWP at St. Thomas Mount Railway Station, Zonal Electric Traction Training Centre (ZETTC), Avadi, ZETTC Men's Hostel, and Guindy Railway Station in the financial year 2025-26, according to a press release. It will generate a total of 2,04,400 units of green energy annually and aid in saving ₹19.21 lakh per annum. The Chennai Division's total installed solar capacity now stands at 2,494.5 KWP after these installations, the release said.

Conference discusses advances in head and neck cancer care

The Hindu Bureau
CHENNAI

Specialists in oncology, surgery, and radiation therapy from India and abroad participated in GlenOncon 2026 conference on head and neck cancers

organised by Gleneagles Hospitals in Chennai on Monday. The conference focused on recent developments in diagnosis, treatment, and rehabilitation in head and neck oncology. Sessions covered thyroid and naso-

pharyngeal cancers, skull base surgeries, microvascular flap reconstruction, robotic-assisted procedures, precision medicine, immunotherapy and newer radiation techniques. The event was conducted in collaboration with

several medical bodies, including the Tamilnadu and Andhra Surgical Oncology Association, Tamil Nadu and Pondicherry Association of Otorhinolaryngologists, Association of Radiation Oncologists of India, Foundation for Head and

Neck Oncology and Association of Oral and Maxillofacial Surgeons of India. The programme featured panel discussions, scientific presentations, surgical video demonstrations and research paper presentations by postgrad-

uate students and consultants. The hospital said the conclave was intended to provide a platform for clinicians, surgeons, and researchers to exchange expertise. Balaji Ramani, director of oncology, Gleneagles Hospitals, spoke.

With poll code lifted, GCC to hold meeting to review civic works

R. Aishwaryaa
CHENNAI

The Greater Chennai Corporation (GCC) is set to resume full-scale operations, and plans to hold its first formal review meeting in 70 days, this week. Many civic activities remained stagnant since mid-March as Model Code of Conduct (MCC) was in place and the deployment of personnel for election duties.

"Projects for which we have issued tenders, but are yet to commence, including road relaying and pavement-laying works, will be reviewed, and work will begin as soon as possible," a senior GCC official told *The Hindu*. While approximately 70% of scheduled road projects were completed before the election hiatus, the remaining 30% – along with various pending foot-path works – will now be prioritised for completion before the onset of monsoon.

The Corporation also plans to crack down on civic violations that proliferated during the election period. Fines will soon be imposed on defaulters, specifically targeting those violating Construction and Demolition (C&D) waste regulations, illegal banners and flags, and those caught open dumping.

Officials noted a recent surge in illegal political banners and AI-generated imagery featuring State emblems, particularly in areas such as Teynampet and Anna Nagar.

"We will follow the usual procedure of remov-

The GCC plans to crack down on civic violations that proliferated during election period. B. VELANKANNI RAJ

ing banners within a day or two of the event," the official added, noting that stricter enforcement was previously paused to avoid local-level friction during polling.

Payment settlements
Contractors awaiting payments for completed works can expect settlements as the government stabilises, the official added. While the GCC faces a temporary financial "pinch" due to an exceptional volume of capital projects taken up in the last financial year, officials expect the revenue position to stabilize within the next six months, he stated.

On May 11, 41 new tenders were published on the Tamil Nadu Tenders Portal. This follows a pattern of high-volume procurement. In February alone, the GCC published over 1,200 tenders, including 121 floated during the State Budget presentation on February 17 – a significant increase from the 39 opened during the 2024 budget. However, the speed of these processes has drawn scrutiny regarding transparency.

Cong. leader to stay as Sringeri MLA as SC pauses recount tally

The Hindu Bureau
NEW DELHI

The Supreme Court on Monday gave interim relief to Congress leader T.D. Rajegowda by allowing him to continue as MLA of the Sringeri Assembly Constituency in Karnataka for time being.

Mr. Rajegowda had appealed the Supreme Court after a recount of postal ballots, following a High Court order, showed the numbers lean in favour of his rival, D.N. Jeevaraj, the Bharatiya Janata Party candidate.

A Bench headed by Justice Sanjay Kumar ordered *status quo ante* while issuing notice to Mr. Jeevaraj and other respondents. The court listed the case for further hearing on May 21.

In his petition, Mr. Rajegowda, represented by senior advocates Kapil Sibal, Devadatt Kamat, and advocate Tushar Giri, argued that he was the “duly elected” Member of Karnataka Legislative Assembly from the 123-Sringeri Constituency.

The petition said he had been declared as the returned candidate by a margin of 201 votes, with 279 postal ballots rejected, in the 2023 Assembly election. Mr. Jeevaraj had challenged the results in an election petition filed in the Karnataka High Court.

Mr. Rajegowda argued that the High Court had only allowed the election petition, directing the “re-verification of the 279 rejected postal ballots

T. D. Rajegowda

and recounting of all postal ballots”. The Congress leader said this had brought his victory in the polls under a cloud despite there being “categorical findings rendered in his favour on every allegation of corrupt practice levelled against him”.

The petition criticised the Returning Officer for pursuing a “completely illegal, arbitrary and unconstitutional exercise by conducting a *de-novo* or fresh reconsideration and reverification of even the valid postal ballots received in favour of Mr. Rajegowda.”

This was when the re-verification was only ordered to be limited to the rejected 279 postal ballots.

“There was neither any objection nor any pleading or discussion whatsoever in the entire order (High Court) regarding the validity of the 562 valid postal ballots cast in favour of the appellant (Rajegowda),” the petition submitted.

The court said that *prima facie* these actions exceeded the scope of what was ordered by the High Court.

AICC summons Kerala leaders to Delhi to finalise CM choice

Former KPCC chiefs to attend crucial meeting with the high command today; decision on new CM within 48 hours, says Muraleedharan; meet likely to involve in-person talks with Kharge and Rahul

The Hindu Bureau
THIRUVANANTHAPURAM

The All India Congress Committee (AICC) has summoned top leaders from Kerala to New Delhi, ostensibly to finalise the party's choice for Chief Minister of the State.

Those attending the crucial meeting with the party's high command on Tuesday include former Kerala Pradesh Congress Committee (KPCC) presidents K. Sudhakaran, V.M. Sudheeran, K. Muraleedharan, and M.M. Hassan.

Mr. Muraleedharan told presspersons that he had made his choice for the top post clear to AICC observers, who sought the opi-

The meet comes as the question of who among the 'probable three' will make the cut as Kerala CM continue to roil the party. FILE PHOTO

nion of the party's MLA designates last week. “I will merely reiterate my stated position. The Congress high command's decision will come within 48 hours. It will bring the curtains down on the endless lea-

dership speculation” he said. Mr. Sudheeran said the closed-door meeting might involve in-person discussions with the high command comprising Leader of the Opposition in the Lok Sabha, Rahul

Gandhi and party's national president Mallikarjun Kharge, among others.

A KPCC insider said the high command had initiated broad-based discussions with senior leaders and, supposedly, UDF leaders before finalising its choice for the Chief Minister's post.

Meanwhile, the question of who among the “probable three” will make the cut as Congress's Chief Minister seemed to roil the party's State unit. Supposedly pro-Congress social media handles stoked speculation that the high command may consider a “new name” to strike a via media between opposing factions advocating for their respective leaders.

T.N. issues G.O. for ‘Singappen’ task force

R. Sivaraman
CHENNAI

The State government has issued an order for the formation of the ‘Singappen’ Special Task Force to improve women's safety.

Immediately after being sworn in on Sunday, Chief Minister C. Joseph Vijay said: “To enhance the safety of women, a Special Task Force will be created with prevention and protection strategies as its primary and sole objective. The force will undertake visible policing mea-

sures to instil confidence among women and provide assistance to women in distress. This Special Task Force will be established across the State with adequate personnel and modern facilities.”

Following the Chief Minister's announcement, Director-General of Police and Head of the Police Force Sandeep Rai Rathore, in a letter, sought the issuance of orders regarding the formation of the task force.

The G.O. said the functions of the task force in-

cluded identifying locations prone to crime, increasing surveillance and police visibility in public places, conducting patrols to prevent crimes, and creating a safe environment for women in public spaces.

The force will maintain a visible presence in crowded and sensitive areas, including bus stands, railway stations, educational institutions, and IT corridors, to prevent unlawful activities.

Its other functions include taking prompt and

appropriate action on complaints, rescuing victims, ensuring their safety and well-being, providing timely assistance in facilitating other support services, and coordinating with departments such as Social Welfare and Education, as well as non-governmental organisations, to create awareness and involve various sections of society in efforts to improve women's safety.

The government examined the DGP's proposal and ordered the creation of the task force.

Air Quality Code: ■ Poor ■ Moderate ■ Good (Readings indicate average AQI)

SO₂: Sulphur Dioxide. Short-term exposure can harm the respiratory system, making breathing difficult. It can affect visibility by reacting with other air particles to form haze and stain culturally important objects such as statues and monuments.

NO₂: Nitrogen Dioxide. Aggravates respiratory illness, causes haze to form by reacting with other air particles, causes acid rain, pollutes coastal waters.

CO: Carbon monoxide. High concentration in air reduces oxygen supply to critical organs like the heart and brain. At very high levels, it can cause dizziness, confusion, unconsciousness and even death.

PM_{2.5} & PM₁₀: Particulate matter pollution can cause irritation of the eyes, nose and throat, coughing, chest tightness and shortness of breath, reduced lung function, irregular heartbeat, asthma attacks, heart attacks and premature death in people with heart or lung disease

CM YK

A new start against noise pollution

For a few weeks now, the most insistent sound in Tamil Nadu has been the pea whistle, and that looks set to continue. Inside the Chepauk stadium, Chennai Super Kings supporters live up to the team's call to action – “*whistle podu*” (blow the whistle) – through all its Indian Premier League matches.

Outside the stadium, since the Assembly election results on May 4, supporters of the Tamilaga Vettri Kazhagam (TVK) have flooded the streets across the State to celebrate Joseph Vijay's victory by blowing the party's election symbol, which is also a pea whistle.

Anyone who watched the 2010 football World Cup will understand how irritating this noise can be. The vuvuzelas were so relentless that international viewers complained that the football commentary had become inaudible, prompting several broadcasters to add audio filters. When hundreds or thousands of people blow pea whistles, they render a comparably terrible annoyance. A single whistle blast creates 104-116 decibels of pressure at the source, according to research from Western Michigan University. The threshold beyond which sustained exposure to air pressure can damage hearing is 85 decibels.

Some of the cricket team's matches have been rousing and the TVK's victory is unprecedented. But the fact remains that noise pollution has become the most tolerated form of pollution in India.

While even air pollution has finally forayed into the policy vocabulary as a deleterious problem, data from the National Ambient Noise Monitoring Network (NANMN) show that more than 80% of recording stations breached the prescribed noise limits during both day and night in 2019 itself – while awareness of its ills remains low. In Chennai, all 10 stations exceeded the residential nighttime

Vasudevan Mukunth

threshold of 45 decibels. A 2022 UN Environment Programme report cited a maximum reading from Moradabad in Uttar Pradesh to be the world's second-highest on its list (a ranking contested by government officials).

The actual problem is likely to be much worse as the NANMN has only 70 stations across seven metros, and the network has not been meaningfully expanded in 14 years. District towns in the Hindi belt and the Northeast generate ambient sounds whose profiles no official authority is measuring. Further, in towns with less healthy civic infrastructure and less responsive policing, loudspeaker permissions are unchecked and construction activity often runs through the night. Among the poor, the children often sleep with noise while their parents often spend several hours in conditions that, in any country with a functioning occupational health enforcement, would attract criminal liability.

Effects of excess noise
The World Health Organization has attributed 16% of disabling hearing loss in adults to occupational noise. India is estimated to have 6.3 crore people with some degree of impaired hearing. According to studies of noise-induced hearing loss in occupational settings, the prevalence of impaired hearing ranges from 13% in a Puducherry survey of 500 construction workers to a pooled estimate of 49% in a meta-analysis of industrial cohorts.

The European Environment Agency ranks noise as the second-largest environmental cause of disability-adjusted life years lost in Europe, behind only air pollution.

A WHO synthesis attributed around 16 lakh healthy life years lost annually in Western Europe to traffic noise alone. This is because loud sounds disrupt sleep, elevate cortisol levels in the blood, render endothelial dysfunction, and impair the cognition of children

near airports and arterial roads. India also has more densely packed cities, building acoustics that are less sensitive to the need to mitigate noise, and of course looser enforcement.

Rules against noise
If tolerance is not a feature of India's political discourse, it remains a fixture of how Indians react to pollution.

One reason is the Noise Pollution (Regulation and Control) Rules 2000, which set zone-wise limits and silence zones but which are rarely enforced. The Central Pollution Control Board only recently proposed financial penalties for violations – that too because much of the worst noise is generated by occasions that politicians would prefer not to police.

The Rules already accommodate religious and cultural observances. State governments can permit nighttime loudspeaker use between 10 pm and midnight on festive occasions for up to 15 days a year. However, public events routinely exceed decibel limits within the permitted hours, with sound systems often plunked in residential lanes and sometimes even outside hospitals.

No major political party has been willing to ask its supporters to organise a festival or procession but observe the limits. Parties fear that any restraint will be read as an attack on the faithful. It need not be and the political imagination should be capable of saying so.

Mr. Vijay has presented TVK as a fresh start for Tamil Nadu, unencumbered by the compromises of the Dravidian parties. At least for now, he possesses the political capital to set norms that his predecessors could not. One hopes the whistle that brought him to power could be the start of a new relationship with public sound that respects the right of people to work, relax, and sleep in peace.

The road to deliver women's safety

The Telangana government must ensure safety in both offline and online spaces

STATE OF PLAY

Serish Naniseti

The case under the Protection of Children from Sexual Offences (POCSO) Act against Sai Bhagirath, the son of Union Minister of State for Home Affairs Bandi Sanjay, is now a test case for how Telangana deals with crimes against women and children. The case comes in the backdrop of the State government's active initiatives to make online and offline spaces safer for women.

Earlier, when a government official was targeted by a 'blind item' in a news channel, the government constituted a Special Investigation Team (SIT) to probe it; a journalist of the TV channel was detained as a consequence of the move. Similarly, when an actress and her family were subjected to vicious online trolling and abuse, the police booked cases against 73 persons, and some of them have been arrested. Recently, a senior IPS officer went undercover and stood near a busy city junction at night, and at least 40 men tried to approach her. Further, data from the National Crime Records Bureau shows that there has been a 3.4% rise in registered cases of crime against women from 22,066 in 2022 to 24,495 in 2024 in Telangana.

In light of such incidents, the 'Stand with Her' initiative launched by the Chief Minister in March has mainstreamed conversation about casual sexism ranging from staring and stalking to sexist comments in the workplace. It has also opened up a role for men as allies in the effort to make society safer for women.

These steps show the seriousness with which the State

is dealing with social and online harassment of women. In an age of AI bot-led attacks on women and systemic baiting and trolling by groups justifying rapists and molesters, the action of the Telangana government is timely. However, in spite of such measures, the Chief Minister had to step in and ask why no action has been initiated in the case of the Union Minister's son even though the complaint was lodged on May 8.

This is the rub – the challenge to deal with both the powerful and the powerless in the same way under the law. A day after reports of the POCSO case surfaced, women's groups and political parties have hit the streets in Hyderabad demanding action. Between the narrative of action and the action itself is the long shadow cast by political compulsions and power-play. It remains to be seen whether the State can walk the talk when it comes to women's safety.

Online attacks

It also remains to be seen if the State can strike a balance between safeguarding free expression and curbing online targeting and harassment. Name-calling and personal attacks are not new to Indian politics or public life. What has changed is the scale, speed and anonymity with which online abuse unfolds. Women in positions of visibility are being increasingly sub-

jected to orchestrated campaigns laced with sexualised slurs, threats and disinformation. The impact of social media trolling is not just confined to reputational harm; such attacks affect mental health, professional standing and personal safety, and are often intended to silence women from public engagement altogether. These attacks are often amplified by bots and anonymous accounts, making it harder for the cyber police to trace. The Telangana police, which is considered the first mover in technical fields, has accepted it as much. It has taken recourse to reaching out to tech platforms directly to identify the people behind certain handles; it has even invoked the dreaded Unlawful Activities Prevention Act (UAPA) to get details of a social media handle that had allegedly been sharing misinformation.

Approving arrests and instituting an SIT carries social and administrative signalling. By stepping in when a serving civil servant was targeted, the government is asserting that institutional authority will not be undermined through digital smear campaigns. At the same time, the action following the abuse of an actress suggests an attempt to broaden that protection beyond the bureaucracy. Yet questions remain about whether similar urgency will be extended to less prominent women who face daily harassment.

Justice and a functioning law and order system is what people expect now. The Chief Minister's word on the POCSO case comes at the right moment. Can the Telangana government deliver justice and safety to all women, irrespective of the background of the complainants?

Goal attainment and youth aspirations are not aligned

Keeping track of youth aspirations against the system's ability to match them is critical if the country is serious about creating a productive labour force

DATA POINT

Garima Agarwal

India's ability to ride the cresting wave of the demographic dividend, before it recedes, depends critically on the education and employment choices of its 367 million young people. While surveys track such outcomes, little is known about how close outcomes are to initial goals. The State of Working India Report 2026, published by Azim Premji University, offers insights into youth aspirations and attainments.

The study utilises the Population Council's dataset – UDAYA: Understanding the Lives of Adolescents and Young Adults – which surveyed adolescents in Uttar Pradesh and Bihar, the two Indian States with the largest youth populations. The sample of interest covers girls and boys aged 15-19 when first contacted in 2015-16 and tracks them three years later in 2018-19 when they are 18-22 years old. Of the full sample of 13,141 youngsters surveyed, aspirations were recorded only for 6,300 who were enrolled in education at the time of the survey. At ages 15-19 when the 6,300 youngsters were first contacted, about 72% aimed for at least graduate education. Three years later, this share grew to 84%. Moreover, aspiration levels were similar across gender, religion, and caste. Uniformly high educational aspirations across social groups indicate a convergence of aspiration windows, possibly due to economic progress and rapid expansion in access to the Internet and social media.

Educational attainments, in contrast, showed that not all dreams came true. In the duration between the two interviews, years of schooling completed grew by only 1.2 years on average instead of the expected three years. In making progress towards their educational goals, over half the sample fell short, on average by 1.7 years

(Table 2).

About 11% of the sample had already exited education by this time. Between the two interviews, another 40% exited formal education. While some may naturally exit on completing desired education, the average number of years of education attained at exit is only 8 years.

It is striking that while aspirations across wealth quintiles are not very different, attainments diverge sharply. Those in the poorest wealth quintile are more likely to fall short of their goals compared to those in the richest quintile. While the share of boys falling below their educational goals hovers between 50% and 60% across wealth quintiles, there is a noticeable variation for girls – from 66% in the poorest to 38% in the richest quintile (Chart 1).

Over half the sample discontinues education before completing Class 12; this group is disproportionately composed of married girls. Married girls face greater barriers than their unmarried counterparts, even within the richest group. In fact, girls who remained unmarried by the time of the second interview (18-22 age group) were as ambitious as boys at setting goals and were more effective at meeting them (Table 2).

In general, girls and boys have different reasons to discontinue education. Boys leave to join the labour market while girls exit at the time of marriage. Failure or disinterest and costs of education are some gender-neutral contributing factors.

Quality of education

A more troubling picture emerges when learning levels are examined. UDAYA employs tools designed by the Annual Status of Education Report (ASER) for students aged 5-16 to measure proficiency in reading and math. UDAYA respondents were well beyond this age and would be expected to achieve the highest levels of proficiency in both dimensions.

However, at age 15-19 when respondents were likely engaged in schooling, 70% of unmarried girls and boys could read a Class 2-level story against only 45% of married girls. The modest gender gap favouring unmarried girls in goal attainment disappears when it comes to learning levels. The share of those who could perform three-digit by one-digit division correctly was just over half for boys, 35% for unmarried girls and only 15% for married girls (Table 3).

The uncomfortable question this raises is: are some groups aspiring for education beyond their reach? This two-State study shows that while aspirations are high, attainments have not kept pace across all groups. It is worth confirming whether this is a country-wide pattern, and focusing policy attention on removing structural barriers to access.

Education programs often default to exposing students to high-achieving role models ostensibly to inspire. While well-intentioned, simply raising aspirations with no realistic pathway to achieving them is short-sighted. These programs need to be supplemented with support for identifying interests, goal-setting, and skill-building. Stronger linkages between educational institutions and employers can provide prospective graduates with a more accurate picture of the labour market and facilitate a smoother transition into the workforce.

While it is tempting to only look at the motivational aspects of goals, consistent failure to achieve targets can cause frustration, which in turn may lead to lower effort and worse life outcomes. Keeping track of youth aspirations against the system's ability to match them is critical if we are serious about creating a motivated and productive labour force for the future.

Garima Agarwal is an Assistant Professor of Economics at Azim Premji University, Bengaluru. The views expressed are personal.

Who falls short

The data for the charts were sourced from UDAYA - Understanding the Lives of Adolescents and Young Adults

TABLE 1: Educational aspirations during both rounds of interview (in %)

Educational aspiration	First interview	Second interview
Below Grade 12	4.93	0.4
Completed Class 12 but below graduate	17.74	10.2
Graduate	53.3	60.35
Post-graduate and above	18.15	23.18
Don't know	5.87	5.87

TABLE 2: The gap between initial aspirations and subsequent attainment (in %)

Attainment-goal gap	Unmarried boys	Unmarried girls	Married girls	Total
Met goal	31.8	45.9	26.3	37.6
Exceeded goal	4.8	5.4	3.1	4.8
Below goal	54	44.2	67.5	51.8
No stated goal	9.4	4.5	3.1	5.9

CHART 1: The share of respondents who fell short of educational goals by wealth quintile and gender. Q1 = Top quintile; Q5 = Bottom quintile

TABLE 3: Learning levels in reading and math (in %)

Learning level	Unmarried boys	Unmarried girls	Married girls	Total
Reads a story	73.97	71.84	44.65	59.74
Solves division problems	51.95	34.53	15.44	29.27

Note: Table 1 and 2 use respondents aged 15-19 years at the initial interview with recorded aspirations; marital status is as recorded at the time of the second interview (N = 6300). Table 3 reports the share of all respondents at the highest proficiency levels using UDAYA data for adolescents aged 15-19 years at the initial interview; marital status is as recorded at the second interview (N = 13141). Reading levels include recognition of letters, ability to read words, ability to read a short paragraph (Class 1 level text), and ability to read a longer 'story' (Class 2 level text). Math levels are recognition of single-digit numbers, double-digit numbers, and ability to perform a two-digit subtraction problem with borrowing and a three-digit by one-digit division problem. Children above Class 3 (older than 8 years) should be able to perform division based on NCERT textbook curriculum

FROM THE ARCHIVES

The  **Hindu.**

FIFTY YEARS AGO MAY 12, 1976

Baskets were in use 10,000 years ago

Bhim Betka (Ujjain), May 11: The mesolithic man who lived in this prehistoric site (near Bhopal) some 10,000 years ago, knew the use of baskets.

Baskets were used to carry fruits, hunted animals and tiny pigs. They were also used to carry children from one place to another.

Paintings showing the use of baskets and other artifacts and tools were found in recent excavations by archaeologists of the Vikram University.

Dr. V.S. Wakankar, who is in charge of the excavations, said money collection was popular during the mesolithic period. People moving from one site to another carrying their bags over the backs and heads had also been seen in the paintings. He said the mesolithic people after coming in contact with the agricultural chalcolithic communities (3,000 to 5,000 years ago) on the plains of Malwa appeared to have lost their art of active and dynamic paintings and their style showed a static emergence influenced by the chalcolithic pottery drawings.

Cave art of the upper palaeolithic age has also been found in about 300 caves and shelters explored in the rocky terrain.

At least 1,300 such shelters have so far been explored in this region.

A HUNDRED YEARS AGO MAY 12, 1926

Anglo-Indians and the elections

Calcutta, May 11: A mass meeting of the Anglo-Indians and Domiciled Europeans was held this evening at the Y.M.C.A (Wellington Branch) under the presidency of Col. Gidney.

The speakers dwelt on the necessity of Anglo-Indians asserting their right to vote and urged upon the members of the Community to see that their names were entered on the electoral roll for returning members of their community to the Provincial Council and the Assembly. Col. Gidney said that the time had come when women would have to throw aside their exclusiveness and come and compete with them in the open battle of election. He hoped that in the coming elections they would have one woman member returned to the Council. He then spoke at length on the status of the Anglo-Indian community.

From Page One

India has sufficient stocks of fuel: govt.

Citizens have been encouraged to use public transport, opt for carpooling, reduce unnecessary foreign travel, promote domestic tourism and avoid non-essential gold purchases for a year to help conserve foreign exchange reserves.

The Prime Minister also appealed to farmers to reduce chemical fertilizer use by 50%, adopt natural farming practices and expand the use of solar-powered irrigation pumps to cut diesel consumption in agriculture.

The Defence Minister stressed that India's priority was to ensure uninterrupted energy flows, maintain economic stability and secure maritime trade routes. He also called for faster expansion of renewable energy, diversification of fuel supplies and stronger investment in energy-efficient technologies.

‘PM’s austerity push admission of failure’

“When the conflict in West Asia erupted on February 28, the Congress highlighted every critical aspect of the crisis – the devastation of the economy, the depreciation of the rupee, soaring prices and shortages of petrol, diesel and LPG, scarcity of fertilizers, the looming threat to food security, the rising cost of medicines, the crisis facing MSMEs, and much more!” Mr. Kharge said on X.

Samajwadi Party (SP) chief Akhilesh Yadav also called the Prime Minister’s appeals an admission of failure. “As soon as elections are over, the government suddenly remembers the ‘crisis’. In reality, there is only one crisis for the country and its name is BJP,” he said in a post on X.

CPI general secretary D. Raja said, “Who is buying gold? People don’t have money to eat, and he [Mr. Modi] is talking of gold. And what is work from home? Can a person cleaning the road or a construction worker work from home?”

Aam Admi Party (AAP) leader Sanjay Singh asked why the government claimed that there was no problem with regard to the stock of essential supplies before the Assembly elections. “Why did you not remember the crisis during the elections?” Mr. Singh asked.

SC to hear pleas on SIR impact on Bengal polls

“I have prepared a chart. I just want to give you an impression of what I am saying. In one seat, the margin was 862 and 5,432 votes were under adjudication in appeals before the tribunals. Your Lordships had said that we could approach this court if such a situation happens,” Mr. Bandhopadhyay said.

As on May 11, voters had filed over 34 lakh appeals in 19 Appellate Tribunals against their exclusion from the electoral roll on the ground of “logical discrepancies” in their personal details.

The tribunals could adjudicate only a few thousand appeals in time for the Assembly election. Though the apex court had ordered the constitution of these tribunals on March 11, they had started functioning only by April 13. The top court had even directed that those voters cleared by the tribunals as of April 21 and April 27 – two days before the first and second phases of polling – should be allowed to vote. However, a substantial number of appeals had remained unresolved.

“About results having been materially affected due to the deletions which are under adjudication, we require you to file an application for the issue to be taken up by us,” Justice Bagchi told Mr. Bandhopadhyay.

Tussle in AIADMK over supporting party chief

The churning in the AIADMK was also evident in the Assembly, going by the reception provided by the party legislators to Mr. Palaniswami and Mr. Velumani. Unlike on previous occasions when Mr. Palaniswami was accompanied by a large contingent of his colleagues while entering the Assembly premises, only a handful of MLAs escorted him this time. Mr. Velumani seen invariably with the former in the past, came later to the Assembly premises along with former Health Minister C. Vijayabaskar. Likewise, when the turn came for the former Chief Minister and Mr. Velumani to be sworn in as MLAs, the reception given to them by their colleagues, in the form of thumping of desks, was similar. The message was clear: the challenge to Mr. Palaniswami's leadership was quite open.

In the past four days, the residence of Mr. Shanmugam had become the centre of activity in the AIADMK, with a large number of MLAs and other office-bearers attending discussions on their future course of action. Mr. Shanmugam, who did not attend the oath-taking event in the morning, went to the Assembly around 3.15 p.m. and was sworn in as an MLA. The rebel MLAs also had a meeting at a guesthouse near Mr. Shanmugam's house. About two years ago, when the party had suffered a drubbing in the Lok Sabha election, a delegation of six leaders, including Mr. Shanmugam, Mr. Velumani and Mr. Viswanathan, had sought to impress upon Mr. Palaniswami that there should be reconciliation with former party leaders such as V.K. Sasikala.

Three arrested from U.P., Bihar in Suvendu associate murder case

A UPI payment at a toll booth made by the suspects became an important lead for the police; the accused were produced at the Barasat district court in West Bengal; the court sent all three to 13-day police custody for further interrogation

Shrabana Chatterjee
KOLKATA

Three suspects in the murder of West Bengal Chief Minister Suvendu Adhikari’s personal assistant, Chandranath Rath, have been arrested by the State police from Uttar Pradesh and Bihar. A team of the Special Investigation Team (SIT) had already headed to the two States for further investigation. The arrested have been sent to a 13-day police custody.

“The three accused were brought to West Bengal and produced before the Barasat court in North 24 Paraganas district on Monday. They were remanded to 13-day police custody,” a senior officer said. The Barasat court asked the police to produce them again on May 24, he said.

The three suspected killers were arrested by the Madhyamgram Police on Sunday, after officers acted based on specific leads. The police were able to track a UPI payment made by the suspects at a toll

The accused arrested in connection with the murder of Chandranath Rath, personal assistant of CM Suvendu Adhikari, being taken from the court, at Barasat in North 24 Parganas on Monday. ANI

booth near Kolkata.

“Three suspects have so far been arrested in relation to the gruesome murder of Chandranath Rath on 6.5.26 at Madhyamgram,” an official statement from the West Bengal Police said on Monday.

Based on inputs, Mayank Raj Mishra and Vicky Maurya were detained from Buxar in Bihar and the third suspect, Raj Singh, was detained from Ballia in Uttar Pradesh. All three faced interrogation and were subsequently arrested.

Cases have been registered under Section 103(1) (murder), Section 111(2)(a) (organised crime), Section 126(2) (wrongful restraint), Section 3(5) (criminal act done by a group), and Section 61(1) (criminal conspiracy) of the Bharatiya Nyaya Sanhita and Sections 25/27 of the Arms Act for wrongful possession of arms. The three accused suspects were produced at the Barasat district court on Monday. The court has sent all three to 13-day police custody for further interrogation.

‘More people involved’

The police believe that there are more people involved and that this killing was the work of trained assassins who had planned beforehand.

The gruesome crime occurred on May 6, two days after Mr. Adhikari and the Bharatiya Janata Party came to power in West

NCW flags ‘toxic work culture’, ‘zero POSH compliance’ at TCS office

The Hindu Bureau
MUMBAI

The National Commission for Women (NCW) on Monday slammed Tata Consultancy Services (TCS) for its alleged failure to comply with the Prevention of Sexual Harassment (POSH) Act, observing that there was pervasive harassment, religious denigration, systemic bullying and exertion of fear and pressure imposed by a toxic leadership at its Nashik office.

Many victims who wanted to complain could not do so due to “complete absence of any formal complaint mechanism”, the NCW’s fact-finding committee said, adding Gen Z employees were more susceptible to anti-religious discourse.

Nine FIRs have so far been registered in cases of alleged rape, sexual harassment and forcible conversions at TCS Nashik, with the police arresting nine accused.

Nida Khan appears before the Nashik Road court in Nashik on Monday. The court has remanded her in 14-day judicial custody. ANI

The NCW, which had taken *suo motu* cognisance of the matter, submitted a 50-page report to Maharashtra Chief Minister Devendra Fadnis on Friday, containing 25 recommendations.

Key observations

The NCW observed that there was a deeply disturbing and toxic workplace environment marked by pervasive sexual harassment and abuse of authority at the workplace. “The

employees.” The committee observed that the victims were scared as there was “significant social pressure, fear of exposing their families to social stigma, and above all, a complete absence of any formal complaint mechanism and trustworthy environment.”

The NCW said in its report that Danish Sheikh, Tausif Akhtar, and Raza Memon were allegedly protected by Ashwini Chainani, the HR head and operations manager of the company.

The commission’s key recommendations include action for failure to comply with POSH, effective HR and grievance redressal systems, job protection for complainants, regular monitoring of workplace safety and witness protection.

Meanwhile, Nida Khan, one of the accused, was sent to 14-day judicial custody until May 24. She was arrested on May 7.

NEET-UG 2026 under scanner as Rajasthan SOG probes ‘paper leak’

The Hindu Bureau
NEW DELHI

Following allegations that the question paper for the NEET-UG 2026 held on May 3 was leaked, the National Testing Agency (NTA) said it was aware of reports regarding the action initiated by the Rajasthan Special Operations Group (SOG) in connection with alleged irregularities.

The alleged irregularities involve “a guess paper” circulated before the entrance test that reportedly had questions which closely matched the actual paper.

Vishal Bansal, Additional Director General, Rajasthan Police SOG, said the agency was verifying whether the circulation of the material was linked to

organised crime.

According to the Rajasthan Police, the alleged guess paper had been circulating among aspirants for nearly a month before the test, distributed through word of mouth and photocopies. “We also found traces of the guess paper travelling digitally through WhatsApp chats of aspirants,” Mr. Bansal said.

He said the 150-page PDF document had 410 questions which matched those that appeared in the final test paper. No arrests had been made so far, he added.

NTA’s response

“The NTA is conscious of the anxiety reports of this nature can cause, and we ask candidates to allow [investigating] agencies space to complete their work. Any necessary steps will be taken in consultation with the Ministry of Education,” the NTA said in an official statement.

NTA officials said that on the late evening of May 7, four days after the examination, the agency received inputs regarding alleged malpractice. “These inputs were escalated by the NTA to Central agencies on the morning of May 8 for independent verification and necessary action,” an official said.

“The NTA confirms that it is working closely with them in a fully supportive role, providing all examination-related data and technical assistance required,” it said.

The statement further

Bengal for the first time with a thumping majority.

Rath was shot three times at point-blank range around 10 p.m. on May 6, and was declared dead after reaching a nearby hospital. The police seized one car and one motorbike with fake number plates which were used during the crime. A two-wheeler has also been seized by the police.

Mr. Adhikari has said that Rath, his close aide, was murdered in cold blood because he was associated with him. “If he was not my aide or I did not defeat [outgoing Chief Minister Mamata Banerjee] in Bhabanipur, maybe they would not have targeted Rath,” Mr. Adhikari claimed.

However, he did not directly blame the Trinamool Congress or any other leaders of the party, and said that the investigation was going in the right direction.

Rath’s grieving mother told reporters that this was a revenge killing because her son worked for the BJP.

ED arrests former Bengal Minister over jobs scam

Shiv Sahay Singh
KOLKATA

Former West Bengal Minister and Trinamool Congress leader Sujit Bose was on Monday arrested by the Enforcement Directorate in the municipal recruitment scam case.

Mr. Bose, who served as Minister of Fire and Emergency Services in the previous government led by Mamata Banerjee, was questioned for several hours by the Central investigation agency before being taken into custody.

“Sujit Bose had illegally recommended 150 candidates for different posts under the South Dum Dum Municipality in lieu of pecuniary benefits. The ED has traced direct proceeds of crime in the form of flats acquired by him in lieu of providing municipality jobs to various persons. Further, the ED has also traced huge deposits of cash in the bank accounts under his control,” a statement by the agency said.

Mr. Bose would be produced on May 12 before a special court. He lost to the BJP’s Sharadwat Mukherjee in the Bidhannagar Assembly segment by a margin of 37,330 votes.

Govt. to see if schools teaching religion are charitable bodies: SC

The Hindu Bureau
NEW DELHI

The Supreme Court on Monday left it to the government to consider whether schools which impart religious instruction should be brought within the ambit of constitutional provisions dealing with charitable or religious establishments, rather than being recognised as ‘secular or professional’ educational institutions.

A Bench headed by Justice Dipankar Datta said the issue was within the domain of the Ministry of Education, and the court need not intervene for now.

The court said the issue was within the domain of the Ministry of Education.

The petition filed by petitioner-advocate Ashwini Kumar Upadhyay sought a direction to declare that “any institution which imparts religious instructions to promote any religion is covered under Article 26(a) and not under Articles 19(1)(g) or Article 30(1) of the Constitution”.

Article 26(a) is one of the ‘freedom-of-religion’ rights. It says that a religious denomination or ‘any section thereof’ would have the right to establish and maintain institutions for religious and charitable purposes. This, if done, would mean that schools imparting religious instruction would be subject to the restrictions of public order, health and morality.

School curriculum

The petition has argued that schools which impart religious instructions must not come under the right to profession or occupation enshrined in Article 19(1)(g), nor should they be brought within the ambit of the right given to minority communities to establish and administer “educational institutions”.

The petition has clearly sought a dichotomy based on whether or not religious instruction was part of a school’s curriculum. It is not clear where schools imparting both secular and religious education, latter

being left to the choice of the students, would fit.

Article 30(1) allows minority religious communities to establish educational institutions which impart secular and religious education. The Article reads as, “All minorities, whether based on religion or language, shall have the right to establish and administer educational institutions of their choice”.

The petition said the court must declare that ‘educational institutions of their choice’ in Article 30(1) should be interpreted as ‘secular/professional educational institutions of their choice’ and not ‘religious educational institutions of their choice’.

Monitoring mechanism

Mr. Upadhyay said the Centre must have a mechanism to “register, recognise, supervise and monitor institutions imparting education to children up to 14 years”. “This is an issue of national security as young kids form the future of the nation, and can be brainwashed/manipulated in unregistered institutions,” the petition said.

It also raised doubts if the quality of education could be ensured by unregistered and unrecognised institutions.

“The safety and security of children is paramount. It is the State’s onus to prevent trafficking of children by unregistered and unrecognised institutions at the threshold,” the petition said.

West Bengal's
CEO made
State's Chief
Secretary

The Hindu Bureau
KOLKATA

Manoj Kumar Agarwal, who conducted the West Bengal Assembly election as the State's Chief Electoral Officer (CEO), was on Monday appointed Chief Secretary of the State.

Mr. Agarwal is a 1990-batch IAS officer of the West Bengal cadre. During his tenure as the State's CEO, the Special Intensive Revision (SIR) was held, which saw around 91 lakh voters removed from the electoral rolls in the State.

While he drew praise for holding polls without much violence, questions were raised about lakhs of voters being unable to exercise their right to vote.

The decision of the new BJP government to elevate the CEO to the top post raised eyebrows in political circles.

Trinamool MP Sagarika Ghose described the development "outrageous and brazen". "...The so-called 'neutral umpire' is rewarded with the post of top bureaucrat of the @BJP4India dispensation..." Does anyone still SERIOUSLY believe #bengalelections2026 were free and fair?" Ms. Ghose posted on social media.

Suvendu orders rollout of
Central schemes in Bengal

New BJP government's first Cabinet meet has also decided to transfer land to the BSF for fencing along the border with Bangladesh; portfolios allocated to Ministers who took oath with the CM

Shiv Sahay Singh
KOLKATA

Chairing his first Cabinet meeting on Monday after taking oath as West Bengal Chief Minister on Saturday, Suvendu Adhikari said his government had decided to transfer land to the Border Security Force for erecting a fence along the Bangladesh border. He also approved immediate implementation of Central schemes such as the Ayushman Bharat and the Census exercise in the State.

During the day, the Chief Minister also allocated portfolios to the five Ministers who took oath with him. Dilip Ghosh, former Bengal BJP president and Kharagpur Sadar MLA, was given charge of the Panchayat and Rural Development Department, besides Animal Resource Development and Agricultural Marketing. Asansol Dakshin MLA Agnimitra Paul will hold charge of Women and Child Development and Social Welfare and Municipal Affairs Departments. Ashok Kirtania, a promi-

Taking charge: West Bengal CM Suvendu Adhikari holds a review meeting with top State administrative officers on Monday. PTI

nent Matua face in the Cabinet and MLA for Bon-gaon Uttar, was given charge of Food and Supplies and Cooperation Departments, and Khudiram Tudu, the MLA for Rani-bandh who hails from a tribal community, was assigned the responsibility of Tribal Development, Backward Classes Welfare, and Minority Affairs and Madrasa Education Departments.

Nishit Pramanik, who was elected from Mathab-hanga in north Bengal, got the North Bengal Develop-ment and Youth Services and Sports portfolios. Speaking to pressper-

sons, the Chief Minister said that no social welfare scheme started by the pre-vious government would be stopped.

Later in the day, at a meeting with MLAs-elect of the party, Mr. Adhikari said that Annapura Yo-jana, under which women in the State will receive monthly financial assistance of ₹3,000, will be rolled out from June 1.

"We took six decisions at the Cabinet [meeting]. We are committed towards the well-being of 321 fami-lies of martyrs who laid down their lives as BJP sup-porters. We have started land transfer to the BSF for

securing borders. The Chief Secretary and the Se-cretary of the State's Land and Land Revenue Depart-ment have been asked to complete the process of land transfer within the next 45 days," he said.

"The process has start-ed to actively implement major Central schemes in the State, including the [Ayushman Bharat] Prad-han Mantri Jan Arogya Yo-jana," Mr. Adhikari noted.

Census launch

Mr. Adhikari alleged that the previous Mamata Ba-nerjee-led dispensation had ignored a circular, dat-ed June 16, 2025, that was sent from the Office of the Registrar-General of India under the Union Ministry of Home Affairs, intimating about the impending Cen-sus exercise in the State.

"The previous govern-ment kept sitting on the file; we are starting the Census in West Bengal," Mr. Adhikari said.

"The Trinamool Con-gress government kept the Census exercise on hold in Bengal so that women's re-servation could be stopped," he added.

Trinamool flags murders,
vandalism amid post-poll
violence in West Bengal

Shrabana Chatterjee
KOLKATA

The Trinamool Congress leadership has again raised allegations of post-poll violence in West Bengal, with deaths, arson, and vandal-ism continuing in parts of the State. Statues of tribal leaders Sidhu and Kanhu Murmu had been vandal-ised in north Bengal, Trina-mool general secretary Abhishek Banerjee alleged.

"This is not mere van-dalism. It is a direct attack on Adivasi pride, history and the identity of Bengal's tribal communities..." he wrote in a social media post, and shared a video of the allegedly vandalised statues.

On Sunday, the party al-so claimed that one of its workers, Sahadeb Bag (40) from Goghri in Hooghly, had been killed amid polit-ical violence.

Post-poll violence has been reported from multi-ple parts of the State, with both the Trinamool and BJP claiming their workers and members have been affected by the clashes.

The Trinamool alleged that in Purba Medinipur's Khejuri, at least 10 shops had been set ablaze by

A damaged market section after BJP supporters allegedly bulldozed a few meat shops amid victory celebrations in Kolkata on May 6. PTI

"BJP miscreants" on Sun-day night. "This is the true face of the politics preached by @AmitShah and @BJP4India - division, fear and targeted violence carried out with complete impunity. Where are the Central Forces now?" Mr. Banerjee posted on social media. This comes a day af-ter he made similar allega-tions on the "barbaric" torching of "at least 60 shops" on Saturday night in Khejuri.

The local BJP MLA, Sub-rata Paik from Khejuri, de-nied the allegations, and seeking a detailed probe, said that the fire may have been due to short circuit.

Among the most talked about incidents, Chandra-nath Rath, the personal as-sistant of Chief Minister Su-venu Adhikari, was shot dead at point blank range

on May 6.

In Dakshin Howrah, BJP workers returned a Trina-mool party office back to Trinamool members. "We do not believe in forcibly capturing someone's party office.. Neither have we done this before, nor will we do it now," a local BJP leader in Howrah told re-porters while "officially re-turning" the office to Tri-namool party workers.

This comes after several Trinamool offices had al-ready been taken over by the BJP, and many were vandalised after the May 4 election results.

Central forces were to be retained in West Bengal at least for 60 days after the polls. Though the elec-tion was largely peaceful, violence rose sharply im-mediately after the results were published.

Ahead of UAE visit,
PM to meet Iran FM
and BRICS Ministers

Suhasini Haidar
NEW DELHI

Iranian Foreign Minister Abbas Araghchi will travel to New Delhi this week to attend the BRICS Foreign Ministers meeting on May 14-15 and is expected to call on Prime Minister Narendra Modi before the latter's visit to the UAE, diplomatic sources confirmed to *The Hindu*. Mr. Araghchi, who will arrive on Wednesday, is expected to meet the Prime Minister in a joint call-on along with other BRICS Ministers from Bra-zil, Russia, South Africa, Egypt, Ethiopia, and Indo-nesia on Thursday.

Chinese Foreign Min-ister Wang Yi is likely to be in Beijing for the visit of U.S. President Donald Trump set for the same dates. Offi-cials did not confirm whether UAE Foreign Mi-nister Sheikh Abdullah Bin Zayed Al Nahyan will travel to Delhi for the BRICS meet or remain in Abu Dhabi to receive Mr. Modi. The flur-ry of diplomatic meetings at the highest levels indi-cates India is stepping up its outreach amid the West Asia war, which has had a deep economic impact on the nation and the region.

Mr. Modi's visit to the UAE will come at the start of his six-day five-nation tour to Europe from May 15 to 20. He is expected to visit the Netherlands, Swe-den, Italy, and Norway for bilateral visits.

In Oslo, he will attend the Nordic-India Summit including leaders of Den-mark, Finland, Iceland, Sweden, and Norway.

"This visit underlines the importance of cooper-ation with India, Norway and the Nordic countries in these times of global in-stability. We stand together in promoting international cooperation and a rules-based world order," Nor-way's Prime Minister Jonas Gahr Store said announc-ing Mr. Modi's visit, indi-cating that the ongoing conflicts in Ukraine, Iran, and Gaza are expected to

Iranian Foreign Minister Abbas Araghchi is scheduled to arrive in New Delhi on Wednesday. AP

be discussed during the summit.

The engagements in Delhi and Abu Dhabi will be particularly significant as they come amid a pause in the war in West Asia, and just as the government begins to implement aus-terity measures on oil and foreign exchange and travel, proposed by Mr. Modi at a public meeting in Hyd-erabad on Sunday.

Iran-UAE tensions

Mr. Modi's meeting with Mr. Araghchi, just ahead of his talks with UAE Presi-dent Mohammed bin Zayed, comes a week after tensions between Iran and the UAE escalated when Iran attacked the Fujairah oil facility with missiles.

India condemned the strikes, while Iran indicat-ed that it was targeting the UAE for its support to the U.S. after U.S.'s warships at-tacked Iranian naval boats in the Strait of Hormuz.

This is Mr. Araghchi's first visit to India in a year.

In March, a few days af-ter the U.S.-Israel strikes on Iran began, his deputy Saeed Khatibzadeh had vi-sited Delhi and met Exter-nal Affairs Minister S. Jaish-ankar. Mr. Araghchi and Mr. Jaishankar have spoken over the telephone five times since the conflict be-gan. Of particular concern for India is the continued blockade of the Strait of Hormuz, with 13 Indian ships and 340 seafarers stuck at the strait, and energy, fertilizer and other shipments also held up.

CPI(M) defends Vijayan, says leadership is collective

The Hindu Bureau
NEW DELHI

Pinarayi Vijayan alone need not take "moral res-ponsibility" for the Left Democratic Front (LDF)'s defeat in Kerala, CPI(M) general secretary M.A. Ba-by said on Monday, em-phasing that the party functions as a collective en-tity and that Mr. Vijayan led the campaign as its se-nior-most member.

Mr. Baby did not clarify who within the LDF will occupy the Leader of the Opposition position, amid widespread speculation over whether Mr. Vijayan will do so. The CPI has de-manded the post of Depu-ty Leader of the Opposition.

Mr. Baby's remarks come against the backdrop of comments by CPI State secretary Binoy Viswam at the conclusion of his party's two-day national coun-cil meeting in New Delhi, where he said the electoral defeat was a warning that communist organisations must give priority to the people. He called for an evaluation of whether the Left's cadres and those close to it had distanced themselves from the move-ment.

At a press conference at the party headquarters at the end of a two-day meet-ing of the CPI(M)'s Polit Bu-reau, Mr. Baby, responding to a question on whether Mr. Vijayan should resign from the Polit Bureau and

Power puzzle: Speculation is rife over whether Pinarayi Vijayan will lead the Opposition in Kerala. NIRMAL HARINDRAN

He further emphasised that Mr. Vijayan, the se-nior-most leader both by age and experience, led

New labour codes greatest
setback for workers' rights
since Independence: Cong.

The Hindu Bureau
NEW DELHI

The Congress on Monday criticised the Centre over the full operationalisation of the four labour codes, alleging that they marked the "greatest setback for workers' rights since Inde-pendence" and would weaken job security and unionisation.

In a statement, Cong-ress president Mallikarjun Kharge said that the Naren-dra Modi government had, "in its typical cowardly fashion", waited for the conclusion of the Assem-bly elections before notifi-ying the final rules for the la-bour codes through Gazette notifications is-sued on May 8 and 9.

'Hire-and-fire policies'

"For crores of India's work-ers, these codes promise a future of hire-and-fire poli-cies, contract employ-ment, and limited space for unionisation," Mr. Kharge said. He alleged that the government had drafted and implemented

Mallikarjun Kharge

the "anti-worker" labour codes without consultation and had not even con-vened the Indian Labour Conference since 2015.

"These codes, which be-nefit only the Prime Minis-ter's industrialist friends, are the greatest setback for workers' rights since Inde-pendence," he said.

Mr. Kharge said the Con-gress remained committed to its five-point 'Shramik Nyay' agenda, which in-cludes restoration and ex-pansion of MGNREGA to urban areas, a national mi-nimum wage of ₹400 per day, a Right to Health law providing universal health coverage of ₹25 lakh, and

comprehensive social se-curity measures for unor-ganised workers, including life and accident insurance.

He reiterated the party's commitment to stopping "contractualisation" in core government functions and reviewing what he termed the Modi govern-ment's dilution of labour laws.

The Centre completed the process of implement-ing the four labour codes after publishing the final rules in the Gazette recently.

The four codes – the Code on Wages, 2019; the Industrial Relations Code, 2020; the Code on Social Security, 2020; and the Oc-cupational Safety, Health and Working Conditions Code, 2020 – came into ef-fect on November 21, 2025.

The Central government has said that the codes seek to modernise and consolidate 29 labour laws into a simplified frame-work while ensuring mini-mum wages and universal social security for workers.

INBRIEF

No bailout for OMCs in sight as under-recoveries mount

As of date, the government has no proposal to accord a bailout package to oil-marketing companies (OMCs), Sujata Sharma, Joint Secretary at the Union Petroleum Ministry, reiterated at the daily inter-ministerial briefing about the situation in West Asia. “There is no proposal for any support [package] to OMCs right now,” she stated. Concerns on under-recoveries, that is, the difference between the cost of manufacturing a retail fuel (as petrol, diesel and LPG) and its sale price, have escalated since the supply pressures induced by the West Asia crisis. Union Petroleum Minister Hardeep Singh Puri posted on social media that OMCs were staring at under-recoveries of ₹2 lakh crore, with losses of up to ₹1 lakh crore in the ongoing quarter. “To protect consumers, they are selling final products at a lower cost, leading to massive mounting losses of up to ₹1,000 crore per day,” he stated.

Markets slip almost 2%, rupee slides 0.7% on West Asia issue

Investors got back to selling Indian stocks aggressively after a few weeks of calm as U.S. President Donald Trump rejected Iran’s response to the peace proposals and PM Narendra Modi “advised” citizens to cut buying forex depleting goods and services. Nifty 50 and Sensex fell 1.5% and 1.7% closing at 23,815.5 and 76,015.28-points respectively. The rupee slid 0.7% closing at ₹95.15 compared with ₹94.5 on Friday based on spot market data from Clearing Corporation of India. Brent crude futures rose 2.2%, crossing \$103/barrel. “Indian equities are expected to stay cautious near term amid escalating geopolitical tensions, with stock- and sector-specific action likely to continue alongside the final leg of the Q4FY26 earnings season,” said Siddhartha Khemka, head of research, wealth management, Motilal Oswal Financial Services Ltd.

Systematic Investment Plans dip 3% to ₹31,115 cr. in April on global cues

Ashokamithran T.
MUMBAI

Investors reduced their Systematic Investment Plan (SIP) contributions by 3% to ₹31,115 crore as geo-political tensions may have hit their confidence in April.

They had increased contributions by 7% to ₹32,807 crore in March 2026, which itself was a jump from a 3% slip in February 2026. The number of contributing SIP accounts fell 0.7% to 9.64 crore in the reporting month after stagnating at 9.7 crore in the

Dull month: The number of contributing SIP accounts fell 0.7% to 9.64 crore in the reporting month.

previous two months.

Daily, weekly, fortnightly and monthly SIPs that have not contributed for more than three months

and other duration that have not contributed for more than two consecutive months are not considered “contributing.” The num-

ber of discontinued and tenure completed SIPs reduced to 51.3 lakh, down from 53 lakh in the previous month.

Outstanding SIPs
The total outstanding SIPs also stagnated at around 10.4 crore for the fourth consecutive month. The number of new SIPs registered also reduced 4% to 50.8 lakh from 52 lakh in the previous month.

The total inflows into equity mutual funds reduced 5% to ₹38,440.2 crore in April 2026, due to weak global market cues.

HSBC slashes FY27 GDP estimate sharply to 6%, expects two RBI rate increases

Press Trust of India
MUMBAI

Twin shocks of energy crisis and deficient rainfall will lead to the real GDP growth falling to 6% in FY27 from 7.4% in FY26, a foreign brokerage said. The shocks will also stoke inflation, and may prod the Reserve Bank to hike key lending rates twice in FY27, HSBC said in a report. “Bringing together both the shocks and factoring in some fiscal slippage, we forecast GDP to grow 6% in FY27, lower than our previous year’s forecast of 7.4%,” the report said.

Hit to formal sector

It warned the emerging crises will be a major blow to the formal sector, including rural households and small firms. The RBI expects GDP growth to come in at 6.9% for 2026-27, as per an estimate last month. The conflict in West Asia led to a sharp surge in oil prices with crude continuing to trade above \$100/barrel. HSBC economists argued the twin crises and deficient rainfall due to El Nino warrants closer attention to FY27 outlook and added higher temperatures will also dent activity.

As PM Modi calls for pause, spend on travel abroad already seen sliding

Reserve Bank of India data show that the real growth areas in terms of foreign spending are purchases of immovable assets abroad and investments in foreign debt and equity; spending on gifts sent abroad contracted 12.7% and 19.1% in the first 11 months of 2025-26 and 2024-25 respectively

T.C.A. Sharad Raghavan
NEW DELHI

At a time when PM Narendra Modi has urged Indians not to travel abroad and give up on foreign weddings for at least a year, official data show foreign spending by Indian tourists actually slid in the last two years.

In fact, an analysis of data from the Reserve Bank of India (RBI) show the real growth in dollar outflow was coming from high-net-worth individuals (HNIs) investing in movable and immovable foreign assets, rather than from holiday-goers or those getting married in foreign locations.

Addressing a gathering

Beyond travel

Indians are increasingly spending on foreign investments while expenditure on foreign travel has been declining

In \$ billion

Source: RBI • Note: Data is for spending under the Liberalised Remittances Scheme for the first 11 months of each year

in Telangana on Sunday, Mr. Modi gave a seven-point list of suggestions to the Indian public to help the Indian economy and government during the on-

going West Asia crisis.

“The growing culture of weddings abroad, travelling abroad, and vacationing abroad is becoming prevalent among the mid-

dle class. We must decide that during this time of crisis, we should postpone travelling abroad for at least a year,” Mr. Modi said as one of his suggestions.

‘Boost inbound travel instead of just curbing overseas trips’

Jagriti Chandra
NEW DELHI

Instead of merely urging Indians to avoid traveling abroad, the government must also focus on attracting more foreign tourists to the country to boost foreign exchange earnings as inbound tourism is still below pre-pandemic levels, the tourism industry said in response to the Prime Minister’s appeal to post-

pone overseas travel for a year as part of austerity measures amid the West Asia conflict.

The PM, during an address in Hyderabad on Sunday, urged citizens to exercise restraint in fuel use by embracing work from home (WFH) and electric vehicles, pause gold purchase and defer foreign travel for a year as an act of patriotism.

“While saving foreign

exchange by reducing outbound travel is understandable, equal emphasis must be placed on earning foreign exchange by attracting more international tourists to India,” says the Federation of Associations in Indian Tourism and Hospitality. This needs “easing visa restrictions, improving connectivity and significantly strengthening India’s tourism promotion abroad.”

Jewellery sector bats for gold monetisation scheme

M. Soundariya Preetha
COIMBATORE

The solution to the pressure on foreign reserves does not lie in reducing demand for gold but in unlocking the existing gold through a transparent and regulated gold monetisation scheme (GMS), said the All India Gem and Jewellery Domestic Council (GJC) chairman Rajesh Rokde on Monday.

Reacting to PM Narendra Modi’s call to citizens on Sunday to use public transport more and curtail gold purchases and international flight trips for a year, Mr. Rokde said a revitalised, jeweller-integrated GMS can help mobilise idle household gold, cut dependence on imports and boost the formal economy.

According to Avinash Gupta, vice chairman of the council, instead of idle

gold remaining locked in households and lockers, GMS can channel it into the formal economy.

Managing director of C. Krishniah Chetty Group C. Vinod Hayagriv said India imported almost 800 tonne of gold annually, and industry estimates suggested almost 200 tonne locked away every year in the form of raw bullion purchased by individuals as passive investments.

PM’s call for WFH: ‘tech sector follows hybrid work’

The Hindu Bureau
BENGALURU

Nasscom, in response to PM Narendra Modi’s work-from-home (WFH) advisory, stated the technology industry in India operated on well-established hybrid work models, with organisations calibrating WFH and work-in-office arrangements based on role and customer needs.

Nasscom said in light of West Asia tensions, firms have adopted prudent energy management measures. across campuses.

‘In the next 100 years, Bajaj will focus on ecosystems’

Lalatendu Mishra
MUMBAI

The Bajaj Group, one of India’s largest conglomerates with market cap of \$148 billion, founded during the freedom struggle in 1926 celebrated its centenary.

Started in then Bombay by Jammalal Bajaj, a freedom fighter and philanthropist, the group now serves 1 in 3 Indian households across automobiles, financial services, consumer electricals and engineering. Bajaj motorcycles are sold in more than 100 counties and the group has

The group serves 1 in 3 Indian homes across auto, financial services, electricals and engineering

over 100 firms in its fold.

In his address, Rajiv Bajaj, MD, Bajaj Auto said Bajaj Auto besides being one of India’s largest two-wheeler firms, was among the top three globally.

“Today’s India does not only participate, but it also competes in the global economy,” he affirmed.

“The Pulsar brand today

stands with global players, not behind them.”

Sanjiv Bajaj, CMD, Bajaj Finserv said the next chapter of India’s rise will be written by technology and innovation, and most importantly by the youth.

“At Bajaj, we don’t see AI only as a technology trend. We see it as a powerful force that will further financial inclusion,” he said.

Nirav Bajaj, CEO, Bajaj Integrated Health System said if the first 100 years of Bajaj were about building institutions, the next 100 will be about building ecosystems.

INBRIEF

Bangladesh extends lead over Pakistan on a rain-hit day

Skipper Najmul Hossain Shanto and Mominul Haque hit half-centuries as Bangladesh reached 152 for three on a rain-hit day four of the first Test against Pakistan in Dhaka on Monday. Bangladesh's lead grew to 179.

The scores: Bangladesh 413 in 117.1 overs & 152/3 in 50.3 overs (Mominul 56, Shanto 58 batting) vs. Pakistan 386 in 100.3 overs.

ICC retains its umpires and match referees' panels

The International Cricket Council (ICC), after its annual review process, retained the elite panels of umpires and match referees for the 2026-27 season.

The panels: Match referees: Jeff Crowe (NZ), Ranjan Madugalle (SL), Andrew Pycroft (Zim), Richie Richardson (WI) and Javagal Srinath (Ind).
Umpires: Kumar Dharmasena (SL), Christopher Gaffaney (NZ), Adrian Holdstock (SA), Richard Illingworth (Eng), Richard Kettleborough (Eng), Nitin Menon (Ind), Allahuddien Paleker (SA), Ahsan Raza (Pak), Paul Reffel (Aus), Sharfuddoula Ibne Shahid (Ban), Rodney Tucker (Aus) and Alex Wharf (Eng).

Komal wins 48kg bronze in Asian weightlifting

Komal Kohar opened India's medal count, winning women's 48kg bronze at the Asian weightlifting championships in Gandhinagar on Monday. The 23-year-old finished with 177kg (78kg in snatch and 99kg in clean and jerk). Her effort in clean and jerk also earned her a bronze.

The result: Women's 48kg: 1. Huang Yi Chen (Tpe) 193kg (81 snatch & 112kg clean and jerk), 2. Fang Wan-Ling (Tpe) 192 (84 & 109). 3. Komal Kochar 177 (78 & 99).

Young Tigresses lose to China, World Cup dream ends

India's dreams of qualifying for the FIFA Under-17 World Cup ended with a 0-3 loss to China in the AFC u-17 Women's Asian Cup 2026 quarterfinals in Suzhou (China) on Monday. A win would have booked India a berth in the FIFA u-17 Women's World Cup in Morocco. Huang Qinyi (38), Liu Yuxi (45+4), and Li Qixian (90) scored for the hosts to enter the semifinals, where it will meet North Korea, which thrashed Thailand 6-0 in another last-eight clash.

Chotrani loses to champion Asal in World squash

India's Veer Chotrani went down to Egyptian World No. 1 and defending champion Mostafa Asal 5-11, 2-11, 4-11 in the second round of the World Squash Championships in Giza, Egypt.

Eight Indian girls in finals of Asian U-17 boxing c'ships

India's U-17 girls continued their strong run at the Asian Championships with eight boxers advancing to the finals in Tashkent on Monday. Rakhi (46kg), Khushi Chand (48kg), Navya (57kg), Diya (63kg), Himanshi (70kg), Jyoti (75kg), Vanshika (80kg) and Gurseerat Kaur (80+kg) moved to the finals. Mamta Murlidhar (52kg), Manjunath Lamani (54kg), Ishika (60kg), and Harnoor Kaur (66kg) lost their respective semifinals and will get bronze medals.

Suhail excels, Sekaran Realities clinches the title

Mohamed Suhail (61 and five for 41) helped Sekaran Realities to a 65-run win over Turbo XI in the final of the TBSCA-Shri Guru Raghavendraswamy league-cum-knock-out tournament in Chennai recently.

The scores: Final: Sekaran Realities 274/5 in 20 overs (Harshavardhan 68, Ajay Chetan 47, Sudarshan Ravi 42, Mohamed Suhail 61) bt Turbo XI 210 in 17.3 overs (S. Judian Benhur 55, Joseph Jebaraj 63, Mohamed Suhail 5/41).

Discipline keeps me going: Bhuvneshwar

The RCB medium-pacer, who has 21 wickets this season, says motivation is an overrated word; adds that his skills haven't changed since his debut

IPL-19

Anish Pathiivil
RAIPUR

It has been 16 years since Bhuvneshwar Kumar has been running in to deliver the ball with that aesthetically pleasing action in the IPL. Yes, the wrinkles are more marked now, and the body is demanding more delicate attention. But the effectiveness has barely diminished.

The 36-year-old gave another glimpse of his otherworldly accuracy and ability to extract the maximum out of a surface with a four-wicket haul in Royal Challengers Bengaluru's riveting win over Mumbai Indians here on Sunday.

While most athletes credit a dream or an incentive as their driving force, Bhuvneshwar is slightly different.

"Motivation is a very overrated word for me. What keeps me going is discipline. It maybe cliché, but it is wanting to go when you are tired; that consistency and hunger that translates to the field as well. I don't think my skills

Evergreen: Bhuvneshwar has maintained an economy rate of 7.46 this season. SHASHI SHEKHAR KASHYAP

have changed since I debuted. The mental aspect – accepting that the batters play differently from 10 years ago and are going to come hard at you – is helping me stay relevant," he elucidated during a conversation with select media on Monday.

The Uttar Pradesh quick has already picked up 21 wickets for the defending champion this edition, his highest season tally since 2017.

But what really stands out is the economy rate he is operating at. Despite records for the loftiest totals

and the highest chases tumbling, Bhuvneshwar has maintained an economy of just 7.46.

"When you take wickets regularly, you force the batter to take an extra couple of balls at the crease. I am not doing anything different.

"But the wickets column gives you confidence that you will execute better. I am still trying to keep things simple. The ball is coming out of the hand nicely. It's swinging. It's getting edges. Everything is falling into place," he added.

Explosive on paper, erratic on the pitch: Moody's take on LSG batters

C. Shyam Sundar
CHENNAI

A team with an imposing batting line-up comprising Mitchell Marsh, Aiden Markram, Nicholas Pooran and Rishabh Pant can send shivers down the spine of any bowling unit. Yet, Lucknow Super Giants endured a forgettable IPL 2026 campaign, getting eliminated after a loss to Chennai Super Kings in its 11th game.

As has been the case throughout the tournament, LSG's batting fortunes nosedived after a blistering start provided by Josh Inglis, another power-hitter in the team's armoury in Sunday's game against CSK.

Tom Moody, LSG's director of cricket, admitted that inconsistent batting performances, particularly in the middle-order, hurt the team this season, say-

Impact Index

1 Urvil (42 runs) has the highest by a batter after the first 10 balls of an IPL innings

1 He is also the first to smash six sixes off the first eight balls in the league

2 While chasing 180 or more, Super Kings emerged victorious for only for the second time since 2018 (in 16 matches)

2 RCB registered its second win off the final delivery against MI, the previous one being the two-wicket win in Chennai in 2021 (chasing 160)

8 Urvil's tally of sixes while facing fewer than 25 deliveries is a new record

131 CSK's highest score at the 10-over mark in the IPL, surpassing the 128 against MI in 2015

282.6 Urvil has the second-highest strike rate in an innings for CSK (min. 20 balls) after Suresh Raina (25-ball 87 at a strike-rate of 348 vs. PBKS, 2014)

COMPILED BY ANIRUDH VELAMURI

ing the side repeatedly failed to build on strong starts and finish innings strongly.

"If we look at our season from a broad lens, I think

our batting has let us down, particularly our middle-order. It hasn't shown the consistency that's required to have success consistently... our bat-

Hillier optimistic despite the men's 4x100 relay team's recent poor run

ATHLETICS

K. Keerthivasan
CHENNAI

It's no secret that India's men's 4x100m relay team has long trailed the country's more accomplished 4x400m squad at the continental and global level.

Though the team has qualified for major events such as the Asian Games (it didn't compete in the 2018 and 2022 edition), Asian championships and World Relays qualification meets, it has consistently struggled with baton exchanges, lane infringement, consistency and depth.

The latest setbacks have only reinforced those concerns. At the Asian athletics championships in May 2025, the Indian quartet was disqualified because of

Hillier.

an exchange-zone violation. Ironically, just a month earlier, almost the same core group – Gurindervir Singh, Animesh Kurur, Manikanta Hoblidhar and Amlan Borgohain – had clocked a National record of 38.69 seconds at the Indian Open relay competition in Chandigarh.

The errors persisted at the World Relays in Gaborone, Botswana, earlier

this month. During the heats, Ragul Kumar, running the third leg, fell while attempting to pass the baton to Gurindervir, resulting in another disqualification. Harsh Santosh Raut and the more experienced Animesh had handled the opening two legs. Despite the disappointing run, national head coach James Hillier, who oversees the men's 4x100 programme, remains optimistic.

While taking responsibility for the poor results, he believes greater exposure, refinements and tweaks in training can help the team improve.

"It was a very high-pressure situation [at the World Relays]. The team hadn't even travelled overseas much, let alone compete at the World Relays. The standard was so high, so it was inevitable they would feel

Urvil — where intent meets opportunity

Tarun Shastry
CHENNAI

The first sign came a fortnight ago.

On the eve of an IPL fixture, Chennai Super Kings head coach Stephen Fleming casually mentioned at a press conference that Urvil Patel was "itching" to play. Around the same time, every clip on the franchise's social media pages seemed to carry the same soundtrack – the crunch of Urvil's bat echoing across the nets.

Opportunity, however, arrived through misfortune. When Ayush Mhatre was ruled out for the remainder of the season with injury, the door finally opened for Urvil.

His start did not scream inevitability. Against Gujarat Titans, he managed only four. Against Mumbai Indians, there were flashes of menace in a 12-ball 24 struck at 200.

Facing Delhi Capitals, he again showed attacking instinct, racing to 17 off nine deliveries at a strike rate nudging 190 before falling.

But Sunday's innings felt different. It carried weight.

For one, CSK's campaign had reached the stage where every match resembles a knockout fixture. More importantly, this has long been a side

In full flow: Urvil put the LSG attack to the sword. R. RAGU

burdened by its record in chases. Since 2018, Chennai has repeatedly struggled while pursuing targets in excess of 180, losing 14 such matches.

On Sunday afternoon, thanks largely to Urvil's uninhibited strokeplay, eight maximums and record-equalling 13-ball 50, the five-time champion finally crossed the line.

What stood out was not merely the power of the hitting, but the clarity behind it. Urvil does not swing blindly; there is method to his aggression. His bat flow is clean, his base remains stable, and once he identifies a scoring area, he commits fully. Bowlers are rarely allowed the chance to settle.

Domestic cricket had already offered enough evidence. Representing Gujarat in the 2024-25 Syed Mushtaq Ali Trophy, Urvil smashed a 28-ball hundred against Tripura – the fastest by an Indian in T20 cricket. He followed it up in the 2025-26 edition with another century, this one arriving in 31 deliveries against Services.

What makes Urvil compelling is his intent. And perhaps that is precisely what CSK has lacked this season.

For years, Chennai's batting identity was built on control and experience. Urvil represents the other end of the spectrum – instinctive, explosive and unapologetically aggressive.

Three Indians come a cropper on opening day

Pulling through: Palan beat back the challenge from Kesharwani. K. MURALI KUMAR

TENNIS

Ashwin Achal
BENGALURU

It was a bad day at the office for Indians as three players lost in the opening round of the Karnataka Open ATP Challenger at the S.M. Krishna Tennis Stadium here on Monday.

On centre court, wild card entrant Maan Kesharwani was on song when he landed his big serves, but with a poor 54% first serve percentage, he failed to cash in on his best weapon.

Palan gained massive bounce on his kick serves, forcing Kesharwani to

make awkward returns from well above the shoulder. This allowed the Czech Republic player to defeat the Indian without facing a single break point.

On the adjacent court one, the experienced Sidharth Rawat (World No. 527) showed grit and fight in his encounter against Maximus Jones (World No. 442), but went down 4-6, 6-7(3).

Dev Javia, another wild card, lost to Serbia's Ognjen Milic 1-6, 6-7(5).

The results (round-of-32): Dominik Palan (Cze) bt Maan Kesharwani (Ind) 7-6(10), 6-4; Maximus Jones (Tha) bt Sidharth Rawat (Ind) 6-4, 7-6(3); Ognjen Milic (Srb) bt Dev Javia (Ind) 6-1, 7-6(5); Yuta Kawahashi (Jpn) bt Alex Hernandez (Mex) 6-3, 6-6, 6-4.

East Bengal fails to break deadlock against Punjab

ISL

Amitabha Das Sharma
KOLKATA

East Bengal FC was held to a goalless draw by Punjab FC in an ISL-12 encounter here on Monday. Despite creating several opportunities, neither side managed to find the finishing touch in an entertaining contest.

East Bengal lacked the penetration to break through the Punjab defence. The best chance of the opening half came around the half-hour mark when Bipin Singh received

a precise pass from Miguel Ferreira. However, Punjab custodian Arshdeep Singh warded off the threat.

Punjab looked threatening and came close twice.

One of Spanish forward Dani Ramirez's attempts struck the upright while another missed the target.

The dressing room conundrum – a tight-rope walk

In team sports where, increasingly, there are as many members of the support staff as there are playing personnel, it is impossible to 'police' effectively; from Slapgate to vaping, the IPL has had its fair share of flashpoints, creating a bitter-sweet relationship

R. Kaushik

It's been a season to forget for Real Madrid, the Spanish giants who are doomed to finish a second consecutive year without a significant trophy. Sunday's 0-2 loss in the El Clasico to Barcelona at Camp Nou confirmed their great rivals as the La Liga champions while Real have been left to pick up the pieces.

Among the pieces that need picking up are a major bust-up involving Aurelien Tchouameni and Federico Valverde. It wasn't just another bust-up, but an alleged physical coming together that sent the latter to hospital for treatment to a head injury and forced him to miss Sunday's encounter. The pair was fired 500,000 euros each by the club. It has been reported that they first got into an altercation during training on Wednesday, then continued their skirmishes the following day during and after practice. It was during a dressing-room showdown that Valverde picked up the head injury which he sought to downplay, saying, "I accidentally hit a table during the argument, causing a small cut on my forehead that required a routine visit to the hospital. At no point did my teammate hit me, and I didn't hit him either."

The players involved have subsequently apologised, acknowledging their errors and seeking forgiveness. Understandably, their shenanigans haven't endeared them to their fans, already smarting from a sub-par season, or their manager, Alvaro Arbeloa.

Act of disloyalty

But while Arbeloa is unimpressed by their actions, he is even more incensed at how happenings within the confines of the dressing room made their way into public domain. "For things that happen in the dressing room to be leaked seems to me a betrayal and an act of disloyalty to this badge," he said. "I had a teammate who picked up a golf club and hit another with it.

What happens in the Real Madrid dressing room should stay in the Real Madrid dressing room and that is what hurts me the most."

One can relate to the angst of the Real manager. The dressing room in any sport is considered the players' sanctuary, a safe space where they can let off steam (sometimes quite literally, we shall come to that soon) and be themselves. Operating in high-pressure situations under extreme stress with the stakes incredibly and unforgivingly high, it is impossible for the protagonists not to feel the strain. They need an outlet, away from prying eyes, to release pent-up emotion, which is exactly why the dressing room is sacrosanct and out of bounds for those not directly involved with the team.

Sometimes, it becomes impossible to leave what happens in the changing room behind and continue with life as if all is hunky-dory, but that's another matter altogether. As for dressing room leaks, how does one stop that? Ultimately, it boils down to the integrity of each individual, their sense of right and wrong, and an empathy that has to be organic and inborn, not drilled through extraneous means.

Dressing-room secrets have a way of making their way into public space, no matter what. In team sports where, increasingly, there are as many members of the support staff as there are playing personnel, it is impossible to 'police' effectively. If someone wants to tell someone else not to go to the dressing room about the goings-on within closed doors, what can anyone do, really? Indian cricket itself is replete with tales of convenient and salacious 'leaks' and 'plants' that invariably tend to revolve

around groupism, internal politics, about differences between players or between coaches and players, the works...

The million-dollar question

How private should a dressing room be, one wonders. In the sense that when things happen inside a dressing room with glass walls and therefore in full public view, is it an encroachment on an individual/team's private space?

We are talking here about the Riyan Parag vaping incident within the confines of the Rajasthan Royals dressing room nearly a fortnight back, beamed to millions at home on live television after the camera inadvertently caught the Rajasthan skipper nonchalantly using the banned (by Indian authorities) device. Vaping, or the use of e-cigarettes, is illegal in India under The Prohibition of Electronic Cigarettes Act (PECA) 2019. The Act prohibits the production, sale, purchase, import, export and advertisement of e-cigarettes/vapes in India, and violations can lead to imprisonment and hefty fines.

Furthermore, electronic devices - which is essentially what a vape is - including but not restricted to those with recording and communication capabilities are largely prohibited in the dressing room, necessitating all team members to deposit their cell phones with team managers on arrival at the ground. Which begs the question - how did Parag someone else sneak a vape into the dressing room?

Then again, what's an IPL season without drama and controversy and debate and counterthrusts? The action on the field has been compelling as always, and sometimes unprecedentedly so - multiple 15-ball half-centuries by a 15-year-old (Vaibhav Sooryavanshi), an IPL record-equalling 13-ball half-ton by a relatively unknown domestic batter (Urvil Patel), a record score by an Indian batter (K.L. Rahul), the presence of a familiar name at the top of the wicket-taking leader-board (Bhuvneshwar Kumar).

As Season 19 hurtles towards the business end, the heat is only likely to increase. Already, two teams have been eliminated from the playoff race (Mumbai Indians and Lucknow Super Giants), while there is a logjam at the top and some early stragglers (former champions Chennai Super Kings and Kolkata Knight

Dressing-room secrets have a way of making their way into public space, no matter what

Riders) are making a spirited push to sneak into the top four. Every night holds the promise of a grand spectacle and most nights don't disappoint. The IPL, however dismissed in certain quarters, is an addictive commodity which sparks withdrawal symptoms every year immediately after its final act, which is scheduled this year for Sunday, May 31.

Controversy and IPL seem forever to have gone hand-in-glove, starting from Slapgate featuring Harbhajan Singh and S. Sreesanth in 2008 to the ongoing edition where Rajasthan Royals, more than anyone else, have been in the spotlight for various reasons. For the right reasons when it comes to Sooryavanshi and Yashasvi Jaiswal and Jofra Archer and Donovan Ferreira, but not necessarily for only the right reasons, as the Parag vape and the unauthorised use of a cell phone in the team dugout by long-standing manager Romi Bhinder will testify.

Bhinder is no IPL novice. As team manager, he should be more aware than most of the dos and don'ts; primary among the latter is the use of mobile instruments. A month or so back, Bhinder was slapped with a fine of ₹1 lakh for contravening protocols and using his cell phone in the dugout. No matter what the provocation was, there can be no excuse for this blatant violation which surely deserved more than just a token slap on the wrist which, apart from the paltry fine, entailed an official warning.

Not long thereafter came the Parag vape. Like Bhinder, Parag too has been involved with the IPL for ages. The Guwahati-born all-rounder is only 24, but he is an IPL veteran, having been signed by Rajasthan ahead of the 2019 season. It wasn't until his sixth season with Rajasthan, in 2024, that he finally met the expectations of the leadership group, scoring a franchise-high 573 runs and 33 sixes.

Parag was rewarded not just with an India white-ball call-up but was also retained by Rajasthan for ₹14 crore and bestowed with the captaincy on a stand-in basis last year when Sanju Samson served initially as only an impact player before being ruled out with an abdominal strain.

With Samson being traded out to

Chennai Super Kings ahead of IPL 2026, Parag became the full-time skipper, a recognition of his long association with the franchise and a show of faith because clearly, they have identified him as one to lead the fortunes of the side for the foreseeable future.

His supreme indifference to rules therefore is a little disturbing, given how much has been invested in him. Some have insisted that Parag's mistake was being seen as doing what he did more than what he did himself. This isn't a diatribe on morality, so we shall not venture into that territory (in any case, how many of us can truly cast the first stone?). What is in black-and-white is gross disregard for rules and laws, which must come with attendant penalties and act as a deterrent to those that might be inclined to indulge in such acts in public eye.

The Board of Control for Cricket in India prides itself on being a guardian of sorts, but it must ask itself if it has set the right example by slapping just a 25% match-fee fine and one demerit point sanction on Parag for breaching Article 2.21 of the IPL's Code of Conduct, which relates to 'conduct that brings the game into disrepute'. According to the board, this was a Level 1 (lowest grade) offence. Hmmm, you say...

Within a few days, another India international, Yuzvendra Chahal, was accidentally filmed vaping inside an aircraft, no less, by Arshdeep Singh, his Punjab Kings teammate who is prolific on social media with his (often humorous) vlogs. In March, leg-spinner Chahal revealed that he had been off alcohol for six months to boost his fitness and performance, earning plaudits for his honesty, discipline and commitment. And now this. Which raises a more alarming query: How did he manage to get the device into an aircraft despite the multiple levels of security checks at airports?

The BCCI has been moved enough to dash off a comprehensive list of what is acceptable and what is not to the franchises within the last week, with a specific focus on the entry of unauthorised individuals into the hotel rooms of players and support staff. Clearly, it is seized of the need for the IPL to not just be a tournament adhering to the highest standards of behaviour but also to be seen as precisely that. There will be infractions because that is but natural. How one responds to that and what deterrents are invoked become more relevant in such cases.

And oh, we agree with Arbeloa that what happens in the dressing room must stay in the dressing room. Unless the whole world has witnessed it, of course.

THE GIST

Controversy and IPL seem forever to have gone hand-in-glove, starting from Slapgate featuring Harbhajan and Sreesanth in 2008

The BCCI has introduced a comprehensive list of what is acceptable and what is not to the franchises within the last week, with a specific focus on the entry of unauthorised individuals into the hotel rooms of players and support staff

What is in black-and-white is gross disregard for rules and laws, which must come with attendant penalties and act as a deterrent to those that might be inclined to indulge in such acts in the public eye

NEWS IN NUMBERS

Percentage surge in China's passenger car exports in April

85 per cent. China's exports of passenger cars surged in April, an industry group said on Monday, as its carmakers push to expand in overseas markets as domestic sales continue to fall. Exports of passenger cars from China last month jumped almost 85% from a year ago to around 7,96,000 vehicles, as per the China Association of Automobile Manufacturers. PTI

Solar power added by India in 2025 to its total installed capacity

44 gigawatts. India added a record 44 gigawatts of solar capacity in 2025, pushing the total installed capacity in the country to 150 gigawatts, the Union Ministry of New and Renewable Energy has highlighted in reply to a Thane-based NGO. Major programmes like PM Surya Ghar, and the Production Linked Incentive scheme have driven this growth, the Ministry said. PTI

Percentage decline in equity-based Mutual Funds inflow in April

5 per cent. Equity-oriented mutual fund schemes witnessed a net inflow of ₹38,440 crore in April, marking a 5% decline from the preceding month, according to data released by industry body Amfi on Monday. Moreover, monthly contributions through SIPs (systematic investment plans) declined to ₹31,115 crore last month from ₹32,087 crore recorded in March. PTI

Sudan civilians killed in drone hits between January and April

880 At least 880 civilians were killed in drone strikes in Sudan between January and April this year, the UN said on Monday, warning of a "new, even deadlier phase" in the ongoing conflict. Drone attacks by both the Army and paramilitary group Rapid Support Forces, which have been at war since 2023, have intensified in recent months. AFP

Number of countries interested in drone deals with Ukraine

20 Nearly 20 countries are interested in drone deals with Ukraine and four agreements have already been signed, Ukrainian President Volodymyr Zelenskyy said on Monday. Since the outbreak of the West Asia war in February, Mr. Zelenskyy has managed to leverage Ukraine's expertise in drone warfare into a series of successful diplomatic deals. REUTERS

A decentralised solution for waste crisis

The Solid Waste Management Rules, 2026, disregard federalism and embody a technocratic vision of environmental governance, insufficiently attentive to ground realities; as framed, they risk producing blurred accountability, unproductive compliance work, and paper reporting rather than cleaner cities and villages

EXPLAINER

K. Ashok Vardhan Shetty

India's waste crisis is no longer a localised urban nuisance but a national ecological emergency. Our cities are choking on waste; plastic-clogged drains worsen monsoon flooding; landfills have become mountains of methane, fire, and leachate; open burning of waste materials fouls the air; and rivers and coasts bear the burden of urban negligence. Rural India, too, is scarred by plastic, sanitary waste, pesticide containers, e-waste, and the debris of packaged consumption. A new waste-management framework was essential in this scenario.

The Solid Waste Management Rules, 2026, notified in supersession of the 2016 Rules and brought into effect from April 1, 2026, are animated by a legitimate and urgent environmental purpose. They seek to improve source segregation, regulate bulk waste generators, promote scientific processing, reduce dependence on landfills, remediate legacy dumpsites, promote a circular economy, and move towards digital monitoring. These are worthy aims. But sound environmental intent does not, by itself, ensure sound administrative design.

Treaty power and federal balance

The Environment (Protection) Act, 1986, under which these Rules are framed, was enacted principally under Article 253 of the Constitution, which empowers Parliament to implement international obligations – in this case, the 1972 Stockholm Declaration. This gives Parliament wide reach: even subjects touching State or local domains – land, water, public health, agriculture, sanitation or local government – may be legislated upon if linked to an international obligation. But a power meant to secure minimum national standards should not become a licence for the Centre to occupy the field, erode State competence, or centralise administration. A national floor must not become an operational blueprint for every State and local body.

Mature federations follow subsidiarity: governmental functions should be performed at the lowest level capable of discharging them effectively, and moved upward only when that level demonstrably lacks capacity. Local competence is presumed; higher-level intervention must be justified. Authority is most effective when closest to knowledge, consequences, and accountability.

India often reverses this logic. It presumes central competence, distrusts sub-national capacity, and reduces States and local bodies to implementing instruments. Nobel Laureate F.A. Hayek's "knowledge problem", explained in *The Use of Knowledge in Society* (1945), is apposite: effective decisions depend on dispersed and contextual knowledge of the "particular circumstances of time and place". Such knowledge cannot be transmitted upward without distortion or delay. No authority in New Delhi, however well-intentioned, can tailor waste policy with equal fidelity to every region's ecology, settlement pattern, or administrative and fiscal capacity.

The Centralisation Reflex

Although the draft Rules were published on December 14, 2024, inviting objections and suggestions from the public, the deeper flaw lies in a familiar pathology of Indian governance: the belief that

Choking dilemma: An aerial view shows a landfill next to a lake swathed in water hyacinth in Bengaluru on April 15. AFP

centralisation and over-regulation can cure administrative weakness, and that New Delhi must design and command while States merely execute. Its unstated premise is the incapacity argument – that States lack administrative or technical competence and therefore require Centre's supervision, if not substitution. To treat Indian States, several of which rival major nation-states in population, diversity, and complexity, as inherently incapable is incompatible with national self-respect and a calumny no patriot should tolerate.

As Nobel Laureate Kenneth Arrow pointed out in *The Economic Implications of Learning by Doing* (1962), capacity is not conferred from above; it is built through decision-making, experimentation, feedback, and correction. When States are reduced to mere implementing agencies for centrally-designed rules and schemes, their expertise atrophies, replaced by a culture of compliance and dependence on "instructions from New Delhi."

Local government is a State subject. Solid waste management lies at the intersection of environment, sanitation, public health, land use, and urban and rural local administration. It is among the most localised functions of governance, depending on household behaviour, street-level collection, informal waste workers, ward monitoring, land for composting, user charges, recycling markets, and citizen trust.

A system suited to a resource-rich metropolis like Mumbai cannot be mechanically applied to a Himalayan pilgrimage town with narrow roads and fragile slopes, an island settlement with scarce land, a coastal panchayat facing tidal flooding and marine litter, or a scattered tribal hamlet where low-density habitation makes collection and transport costly. Precisely for that reason, solid waste management requires a differentiated, federal design.

The extension of the Rules to rural local bodies is understandable; rural waste is now a real problem. But treating a gram panchayat as a miniature municipality is administrative fantasy. Most panchayats lack adequate staff let alone sanitation engineers, waste-collection vehicles, digital capacity for complex reporting, or the fiscal base to manage four-stream segregation. The

Rules also bring rural areas within a Material Recovery Facility (MRF)-linked architecture. But expecting rural local bodies to sustain such a framework betrays a disconnect with ground realities.

A realistic rural regime should have emphasised gram sabha-based awareness, household and community composting, periodic collection of plastics and sanitary waste, simple quarterly reporting, and cluster-level dry-waste aggregation and processing with nearby urban local bodies. Megacities (such as Delhi, Mumbai, Kolkata, Bengaluru, and Chennai with population exceeding one crore) and metropolitan cities (population exceeding ten lakhs) require the opposite approach: not simplified compliance, but stronger institutions. They need Metropolitan Waste Management Authorities with elected local representation, State participation, technical expertise, and citizen oversight.

The rollout, too, should have been phased. Full compliance could have begun with megacities and metropolitan cities, where waste volumes and administrative capacity are greatest. Other municipal corporations and large municipalities, including tourist and pilgrimage towns, could have followed; then medium and small towns; and finally rural areas through simplified models.

States as policy laboratories

In *New State Ice Co. v. Liebmann* (1932), Justice Louis Brandeis of the U.S. Supreme Court famously observed that a State may serve as a "laboratory" for novel social and economic experiments. That is the strength of federalism: experimentation is safer when localised, and learning is faster when multiple governments test different solutions. States can try policies at manageable scale, contain failures, and allow successful models to diffuse horizontally or be adopted nationally.

A better course therefore would have been to allow States to frame their own solid waste management rules for at least five years, subject to minimum national norms. One State might pioneer decentralised composting through women's self-help groups. Another might integrate informal waste workers into cooperatives. A third might build cluster-based facilities for small towns. A

fourth might create metropolitan waste authorities. A fifth might regulate tourist waste through user fees. After five years, the Centre could review outcomes, identify and disseminate best practices, and revise baseline standards, if necessary, based on evidence rather than assumption. The 2026 Rules do require States to prepare policies and strategies for urban and rural solid waste management, but this is more for form's sake because policy within a centrally-prescribed rulebook is not the same as State-led regulatory design.

Other concerns

The centralised online portal raises a further federal concern. The Rules require reporting to the Central Pollution Control Board (CPCB), data audits, report uploads, and centralised formats and modules. States and local bodies risk becoming data suppliers rather than co-owners of the governance system. Too often, officials spend more time feeding dashboards than improving service delivery. Compliance becomes reporting upward rather than governing outward. A better design would treat the portal as a shared federal data platform, allowing States and local bodies to add indicators, customise dashboards, access raw data, and publish ward-level, local-language information for citizens. Data should build capacity, not merely discipline sub-national governments.

The Rules also need stronger democratic content. Waste management succeeds only when citizens participate. Rural India has, at least in principle, the gram sabha; urban India has no satisfactory equivalent. Periodic waste reports should be submitted to municipal councils and ward committees, not merely uploaded for bureaucratic review in New Delhi.

The 2026 Rules substantially expand the obligations of municipalities and panchayats. Unless backed by predictable, adequate, and formula-based finance, they risk becoming yet another set of underfunded mandates – producing selective compliance, inflated reporting, or quiet evasion rather than genuine waste-management reform.

Under the present model, the likely trajectory is predictable. Sooner or later, a public interest litigation may allege non-implementation by States and local bodies, ignoring the reality that they cannot implement underfunded, top-down mandates in whose design they had little role. The Supreme Court may then treat the matter as legal non-compliance and begin continuing mandamus, drawing all levels of government into prolonged litigation, affidavits, and directions. What began as environmental reform may end as judicialised administration.

Concluding remarks

The Solid Waste Management Rules, 2026, disregard federalism, local democracy, and subsidiarity. They embody a technocratic vision of environmental governance, insufficiently attentive to ground realities, institutional weaknesses, and local capacity. As framed, they risk producing blurred accountability, unproductive compliance work, and paper reporting rather than cleaner cities and villages.

To succeed, the Rules must be recast around five principles: minimum national standards, State flexibility, empowered local bodies, predictable finance, and citizen accountability. Otherwise, mountains of waste will continue to rise as monuments to centralised ambition and local neglect.

THE GIST

Solid waste management lies at the intersection of environment, sanitation, public health, land use, and urban and rural local administration and is among the most localised functions of governance
