

THIS IS A PUBLIC ANNOUNCEMENT FOR INFORMATION PURPOSES ONLY. THIS IS NOT A PROSPECTUS ANNOUNCEMENT AND DOES NOT CONSTITUTE AN INVITATION OR OFFER TO ACQUIRE, PURCHASE OR SUBSCRIBE TO SECURITIES. NOT FOR RELEASE, PUBLICATION OR DISTRIBUTION DIRECTLY OR INDIRECTLY OUTSIDE INDIA. Initial Public Offer of equity shares on the main board of BSE Limited ("BSE") and National Stock Exchange of India Limited ("NSE"), and together with BSE, the "Stock Exchanges") in compliance with Chapter IIA of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended ("SEBI ICDR Regulations").

DHOOT TRANSMISSION LIMITED

(TO BE LISTED ON THE MAIN BOARD OF BSE AND NSE)

(Please scan this QR code to view the Red Herring Prospectus and the Abridged Prospectus)

Our Company was originally incorporated as "Dhoot Transmission Private Limited" as a private limited company under the Companies Act, 1956, pursuant to a certificate of incorporation dated April 28, 1998, issued by the Assistant Registrar of Companies, Maharashtra at Mumbai. Further, the registered office of our Company was changed from Dhoot Motors Adalat Road, Aurangabad 431 001, Maharashtra, India, to our current Registered Office pursuant to a fresh certificate of incorporation dated March 18, 2008 issued by the Registrar of Companies, Maharashtra at Pune ("RoC"). Subsequently, upon conversion of our Company into a public limited company, the name of our Company was changed to "Dhoot Transmission Limited" pursuant to a resolution passed by our Board on November 24, 2025 and by our Shareholders on November 25, 2025, and a fresh certificate of incorporation dated December 4, 2025 was issued by the RoC. For further details, see "History and Certain Corporate Matters-Changes in the Registered Office" on page 311 of the red herring prospectus dated August 3, 2026 ("RHP" or "Red Herring Prospectus").

THE PROMOTERS OF OUR COMPANY: BC ASIA INVESTMENTS XV LIMITED AND RAHUL RADHAVALLABH DHOOT

INITIAL PUBLIC OFFERING OF UP TO [•] EQUITY SHARES OF FACE VALUE OF ₹2 EACH ("EQUITY SHARES") OF DHOOT TRANSMISSION LIMITED ("OUR COMPANY" OR "THE COMPANY") FOR CASH AT A PRICE OF ₹[•] PER EQUITY SHARE (INCLUDING A PREMIUM OF ₹[•] PER EQUITY SHARE) ("OFFER PRICE") AGGREGATING UP TO ₹[•] MILLION (THE "OFFER") COMPRISING OF A FRESH ISSUE OF UP TO [•] EQUITY SHARES OF FACE VALUE OF ₹2 EACH AGGREGATING UP TO ₹14,000.00 MILLION (THE "FRESH ISSUE") AND AN OFFER FOR SALE OF UP TO 19,137,602 EQUITY SHARES OF FACE VALUE OF ₹2 EACH AGGREGATING UP TO ₹[•] MILLION (THE "OFFER FOR SALE"), CONSISTING OF UP TO 16,018,769 EQUITY SHARES OF FACE VALUE OF ₹2 EACH AGGREGATING UP TO ₹[•] MILLION BY BC ASIA INVESTMENTS XV LIMITED ("PROMOTER SELLING SHAREHOLDER") AND UP TO 3,118,833 EQUITY SHARES OF FACE VALUE OF ₹2 EACH AGGREGATING UP TO ₹[•] MILLION BY MANGALAM CAPITAL PRIVATE LIMITED (FORMERLY KNOWN AS MANGALAM COILS PRIVATE LIMITED) ("PROMOTER GROUP SELLING SHAREHOLDER", TOGETHER WITH THE PROMOTER SELLING SHAREHOLDER, THE "SELLING SHAREHOLDERS" AND SUCH EQUITY SHARES, THE "OFFERED SHARES"). THE OFFER INCLUDES A RESERVATION OF UP TO [•] EQUITY SHARES OF FACE VALUE OF ₹2 EACH (CONSTITUTING UP TO 5% OF THE POST-OFFER PAID-UP EQUITY SHARE CAPITAL OF OUR COMPANY) AGGREGATING UP TO ₹60 MILLION FOR SUBSCRIPTION BY ELIGIBLE EMPLOYEES (THE "EMPLOYEE RESERVATION PORTION"). THE OFFER LESS THE EMPLOYEE RESERVATION PORTION IS HEREINAFTER REFERRED TO AS THE "NET OFFER". THE OFFER AND THE NET OFFER WILL CONSTITUTE [•]% AND [•]% OF THE POST-OFFER PAID-UP EQUITY SHARE CAPITAL OF OUR COMPANY, RESPECTIVELY.

DETAILS OF THE OFFER FOR SALE

NAME OF THE SELLING SHAREHOLDERS	TYPE OF SELLING SHAREHOLDER	NUMBER OF EQUITY SHARES OFFERED / AMOUNT (₹IN MILLION)	WEIGHTED AVERAGE COST OF ACQUISITION PER EQUITY SHARE OF FACE VALUE OF ₹2 EACH (IN ₹)*
BC Asia Investments XV Limited	Promoter Selling Shareholder	Up to 16,018,769 Equity Shares of face value of ₹ 2 each aggregating up to ₹[•] million	480.34
Mangalam Capital Private Limited (formerly known as Mangalam Coils Private Limited)	Promoter Group Selling Shareholder	Up to 3,118,833 Equity Shares of face value of ₹ 2 each aggregating up to ₹[•] million	4.81

*As certified by Kirtane & Pandit LLP, Chartered Accountants, pursuant to their certificate dated August 3, 2026.

PRICE BAND: ₹829 TO ₹871 PER EQUITY SHARE OF FACE VALUE OF ₹ 2 EACH.

THE FLOOR PRICE AND THE CAP PRICE ARE 414.50 TIMES AND 435.50 TIMES THE FACE VALUE OF THE EQUITY SHARES, RESPECTIVELY.

BIDS CAN BE MADE FOR A MINIMUM OF 17 EQUITY SHARES OF FACE VALUE OF ₹ 2 EACH AND IN MULTIPLES OF 17 EQUITY SHARES OF FACE VALUE OF ₹2 EACH THEREAFTER.

THE PRICE TO EARNINGS RATIO ("P/E") BASED ON DILUTED EPS FOR FISCAL 2026 FOR OUR COMPANY AT THE LOWER END OF THE PRICE BAND (I.E. FLOOR PRICE) IS 33.98 TIMES

AND AT THE UPPER END OF THE PRICE BAND (I.E. CAP PRICE) IS 35.70 TIMES AS COMPARED TO THE AVERAGE INDUSTRY PEER GROUP P/E RATIO OF 55.31 TIMES.

A DISCOUNT OF ₹80 PER EQUITY SHARE IS BEING OFFERED TO ELIGIBLE EMPLOYEES BIDDING IN THE EMPLOYEE RESERVATION PORTION.

WEIGHTED AVERAGE RETURN ON NET WORTH FOR LAST THREE FISCAL YEARS IS 27.06%.

The details of the Offer for Sale and the post Offer market capitalization of our Company, each at the Floor Price and the Cap Price, are given below:

Particulars	At Floor Price of ₹829		At Cap Price of ₹871	
	Up to No. of Equity Shares of face value of ₹ 2 each	Up to Amount (₹ in million)	Up to No. of Equity Shares of face value of ₹2 each	Up to Amount (₹ in million)
Fresh Issue*	16,895,546	14,000.00	16,080,445	14,000.00
Offer For Sale	19,137,602	15,865.07	19,137,602	16,668.85
Total Offer Size	36,033,148	29,865.07	35,218,047	30,668.85
Post Offer Market Capitalisation of Company (₹ in million)	170,246.06		178,161.36	

*The Issue includes the Employee Reservation Portion and a discount of ₹ 80 per Equity Share is being offered to Eligible Employees in the Employee Reservation Portion.

BID/OFFER PERIOD

BID/OFFER CLOSES TODAY⁽¹⁾

⁽¹⁾The UPI mandate end time and date shall be at 5.00 p.m. on the Bid/Offer Closing Date

We are one of India's leading electrical and electronics ("E&E") companies focusing on design, engineer, manufacture and supply critical wiring harnesses that integrate electronic sensors and controllers, switches, terminals, connectors, junction boxes, high-voltage interconnection systems and data cables, delivering application-specific architectures across platforms. We serve both automotive and non-automotive applications, supporting stringent performance, safety and reliability requirements for OEMs.

THE OFFER IS BEING MADE THROUGH THE BOOK BUILDING PROCESS IN ACCORDANCE WITH REGULATION 6(1) OF THE SEBI ICDR REGULATIONS.

THE EQUITY SHARES OF OUR COMPANY WILL GET LISTED ON THE MAIN BOARD OF THE STOCK EXCHANGES. NSE SHALL BE THE DESIGNATED STOCK EXCHANGE.

QIB PORTION: NOT MORE THAN 50% OF THE NET OFFER | NON-INSTITUTIONAL PORTION: NOT LESS THAN 15% OF THE NET OFFER | RETAIL PORTION: NOT LESS THAN 35% OF THE NET OFFER

EMPLOYEE RESERVATION PORTION: UP TO [•] EQUITY SHARES AGGREGATING UP TO ₹60 MILLION.

IN MAKING AN INVESTMENT DECISION, POTENTIAL INVESTORS MUST ONLY RELY ON THE INFORMATION INCLUDED IN THE RED HERRING PROSPECTUS AND THE TERMS OF THE OFFER, INCLUDING THE RISKS INVOLVED AND NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION ABOUT THE OFFER AVAILABLE IN ANY MANNER. IN RELATION TO PRICE BAND, POTENTIAL INVESTORS SHOULD ONLY REFER TO THIS PRICE BAND ADVERTISEMENT FOR THE OFFER AND SHOULD NOT RELY ON ANY MEDIA ARTICLES / REPORTS IN RELATION TO THE VALUATION OF OUR COMPANY AS THESE ARE NOT ENDORSED, PUBLISHED OR CONFIRMED EITHER BY THE COMPANY OR THE THE BOOK RUNNING LEAD MANAGERS TO THE OFFER. ("BRLMs").

IN ACCORDANCE WITH THE RECOMMENDATION OF THE COMMITTEE OF INDEPENDENT DIRECTORS OF OUR COMPANY, PURSUANT TO THEIR RESOLUTION DATED AUGUST 3, 2026, THE ABOVE PROVIDED PRICE BAND IS JUSTIFIED BASED ON QUANTITATIVE FACTORS/ KEY PERFORMANCE INDICATORS ("KPI") DISCLOSED IN THE 'BASIS FOR OFFER PRICE' SECTION ON PAGE 163 OF THE RHP VIS-A-VIS THE WEIGHTED AVERAGE COST OF ACQUISITION ("WACA") OF PRIMARY AND SECONDARY TRANSACTION(S), AS APPLICABLE, DISCLOSED IN 'BASIS FOR OFFER PRICE' SECTION ON PAGE 163 OF THE RHP.

RISK TO INVESTORS

For details refer to section titled "Risk Factors" beginning on page 24 of the RHP

1. **Dependence on single product line:** Our revenue from operations is significantly concentrated in a single product line, namely wiring harnesses. The following table sets forth our revenue from the sale of products for the Fiscals stated, including as a percentage of our revenue from operations:

Revenue	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Revenue from operations (₹ millions)	% of revenue from operations	Revenue from operations (₹ millions)	% of revenue from operations	Revenue from operations (₹ millions)	% of revenue from operations
Wiring harnesses	34,877.22	77.08%	26,870.11	78.00%	22,920.43	81.93%

2. **Dependence on 2 wheeler and 3 wheeler automotive sector:** We derived a significant portion of our revenue from operations from the two-wheeler ("2W") and three-wheeler ("3W") automotive sector in India. The table below sets forth our revenue from sales to 2W and 3W automotive sector in India, for the Fiscals indicated, which are also expressed as a percentage of our revenue from operations:

Revenue	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Revenue from operations (₹ millions)	% of revenue from operations	Revenue from operations (₹ millions)	% of revenue from operations	Revenue from operations (₹ millions)	% of revenue from operations
2W sector in India	29,626.97	65.47%	23,049.09	66.91%	18,052.79	64.53%
3W sector in India	5,817.77	12.86%	4,305.00	12.50%	3,275.70	11.71%

3. **Revenue Dependence on Top 5 and Top 10 customers:** We derive a significant portion of our revenue from top five and top ten customers based on contribution to revenue from operations in Fiscal 2026. The table below sets forth the revenue derived from our top five and top ten customers for the Fiscals indicated below:

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	% of Revenue from operations	Amount (₹ million)	% of Revenue from operations	Amount (₹ million)	% of Revenue from operations
Revenue from top five customers	32,379.28	71.56%	24,521.29	71.18%	18,512.03	66.17%
Revenue from top ten customers	36,622.42	80.93%	28,181.69	81.81%	21,794.64	77.90%

4. **Dependence on top 5 and top 10 suppliers for raw material supplies:** The table below set forth our costs to purchase raw materials (including commodities and components) attributable to top 5 and top 10 suppliers for the Fiscals stated:

Particulars	Fiscal 2026		Fiscal 2025		Fiscal 2024	
	Amount (₹ million)	% of raw material purchases (net)	Amount (₹ million)	% of raw material purchases (net)	Amount (₹ million)	% of raw material purchases (net)
Purchases of raw material attributable to our top five suppliers	10,682.65	33.32%	8,059.91	34.66%	6,353.33	33.87%
Purchases of raw material attributable to our top ten suppliers	13,999.21	43.66%	10,453.08	44.95%	8,276.35	44.13%

5. We derived 50.52%, 28.26%, 14.12% and 5.26% of our installed wiring harness production capacity from our manufacturing facilities located in Maharashtra, Tamil Nadu, Haryana and Madhya Pradesh as of March 31, 2026, respectively. 100% of our other products including sensors, controllers, automotive switches, power chords capacity are located in Maharashtra.

6. **Weighted Average Return on Net Worth for Fiscal 2026, 2025 and 2024 is 27.06%**

7. **Average cost of acquisition of the Promoters (including the Promoter Selling Shareholder) and the Promoter Group Selling Shareholder :** The average cost of acquisition per Equity Share of our Promoters (including the Promoter Selling Shareholder) and the Promoter Group Selling Shareholder as on the date of the Red Herring Prospectus is:

TURNAROUND ARCHITECT
Godrej Consumer bets on Malbari as new MD & CEO

Mumbai: Godrej Consumer Products Ltd (GCPL) is handing over its next phase of growth to Aasif Malbari, a finance veteran-turned-business operator whose career spans the turnaround of GCPL's Africa operations, Tata Motors' electric vehicle expansion, and more than 25 years across FMCG and automobiles sectors. Malbari will take over as MD and CEO on Wednesday for a five-year term. **p12**

SEBI PROPOSES

Wider FPI access to commodity derivatives

Mumbai: The Securities and Exchange Board of India (SEBI) on Tuesday proposed widening the participation of foreign portfolio investors in exchange-traded commodity derivatives. This includes permitting them to trade physically settled non-agricultural commodity contracts. FPIs are currently allowed to participate only in cash-settled non-agricultural commodity derivatives and indices comprising such commodities. **p10**

After 30 months, large-cap MFs see net outflow in July

SHIFTING CHOICE. Small- and mid-cap funds continue to attract strong inflows

Suresh P Iyengar
Mumbai

Large-cap mutual funds recorded their first monthly net outflow in more than two-and-a-half years in July as investors booked profits after a sharp rebound in frontline stocks, according to Association of Mutual Funds in India (AMFI) data. The category witnessed a net outflow of ₹1,322 crore during the month compared with an inflow of ₹2,067 crore in June. This came despite the Nifty 50 gaining 2 per cent in July, supported by a strong rally in IT stocks, which delivered their biggest monthly gain in six years even as the broader market remained range-bound. In contrast, investors continued to favour broader-market funds. Small-cap funds attracted net inflows of ₹7,767 crore, up from ₹5,602 crore in June, while mid-cap funds received ₹6,192 crore in July compared with ₹6,090 crore the previous month. Overall, inflows into equity mutual funds fell 15 per cent to ₹24,697 crore in

Source: AMFI

July from ₹28,973 crore in June. Investments in hybrid funds moderated to ₹11,491 crore from ₹12,893 crore. Venkat Chalasani, Chief Executive of AMFI, attributed the outflows from large-cap schemes to a combination of profit-booking and portfolio reallocation towards mid- and small-cap funds. **ROBUST SIP FLOWS** Systematic investment plan (SIP) contributions remained strong, rising to ₹31,961 crore in July from ₹31,781 crore in June. The number of contributing SIP accounts increased to 9.9 crore compared with 9.78 crore a month earlier. Assets under the newly

launched specialised investment funds (SIFs) rose 30 per cent month-on-month to ₹23,177 crore, supported by fresh investments of ₹4,922 crore. Saugata Chatterjee, President and Deputy CEO of Nippon India Mutual Fund, said sustained inflows into mid- and small-cap funds reflect investor confidence in India's long-term growth prospects. At the same time, continued participation in established equity categories points to a preference for proven investment strategies, despite a slower pace of new fund launches. Navneet Munot, MD and CEO of HDFC AMC, said investors had responded to market volatility with pa-

tience and a long-term approach. He noted that disciplined monthly investments by crores of Indian households had helped create a deep and stable pool of domestic capital. Akhil Chaturvedi, Executive Director and Chief Business Officer at Motilal Oswal AMC, said there is a cautious stance on equity oriented MFs, given the lower returns over the past two years, and flows to an extent moved to SIFs and arbitrage products, which are seen as low risk and offering absolute returns. Overall, mutual fund inflows surged to ₹2.36 lakh crore in July, aided by debt fund investments of ₹1.87 lakh crore. The industry's assets under management rose to ₹85.76 lakh crore from ₹82.22 lakh crore in June. **GOLD ETFs** Gold ETFs attracted ₹1,559 crore in July. Despite the monthly moderation, net inflows during January-July jumped to ₹38,878 crore, more than four times the ₹9,277 crore recorded in the same period last year, reflecting continued demand for safe-haven assets.

PSU bond issuances decline 37% in FY26 as more funding options emerge

Sourashis Banerjee
Chennai

Bond issuances by public sector undertakings (PSUs) fell sharply in FY26 even as their capital expenditure increased. A *businessline* analysis of Reserve Bank of India data shows that taxable bond issuances by PSUs declined 37.3 per cent to ₹2.89 lakh crore in FY26 from a record ₹4.61 lakh crore in FY25. The fall came after a 38.3 per cent rise in FY25. Barring a few years, bond markets have not been the preferred choice for PSUs in this decade. Cumulative annual growth rate (CAGR) in taxable bond issuances was about 1.7 per cent between FY17 and FY26. At the same time, capital expenditure by Central public sector enterprises (CPSEs) increased 7.1 per cent to ₹8.64 lakh crore in FY26 from ₹8.07 lakh crore in FY25. **BOND DEPENDENCE** The FY26 numbers suggest that higher investment did not automatically translate into higher bond issuances. One reason is that PSUs have multiple funding channels. According to Nishchay Nath, Founder and CEO of BondScanner, "The key shift

PSU debt financing
Bond issuances dip

Source: RBI

is that PSUs now have multiple funding avenues, including bank credit and internal accruals, allowing them to time bond issuances more selectively based on borrowing costs and market conditions." Also, with the interest rates moving down, bank loans seem to have become more viable. Venkatesan Srinivasan, Founder and Managing Partner of Rockfort Pincap LLP, explained, "Primarily bank term loans became more competitive and most of the banks were offering EBLR loans linked with 3-month T-bills. Moreover, most of the banks don't keep penalty clauses for PSUs in case of pre-payment so that they can

switch anytime to bond, if yields go down." **GOING FORWARD** In FY27, Srinivasan explained, "Many large PSUs have taken board approvals to tap large funds from the bond market, but the yields offered to them were high due to West Asian crisis. A few large PSUs have withdrawn their issuances, too, due to a volatile market." Vishal Goenka, Co-Founder of Indiabonds, pointed out that "the good thing is that as significant AAA PSU issues reduce their capital market borrowing, other lower rated issuers are coming more into focus, and it's deepening the corporate bond market."

NASA invites ISRO to join 'Moon Base' programme

Our Bureau
New Delhi

The National Aeronautics and Space Administration (NASA) has invited the Indian Space Research Organisation (ISRO) to join its 'Moon Base' programme, marking an expansion of India-US co-operation in space science and exploration, according to a joint statement issued by the US Mission, India, and the Ministry of External Affairs. The invitation was extended during the 9th meeting of the India-US Civil Space Joint Working Group at the ISRO headquarters in Bengaluru on August 5-6. "NASA invited ISRO to join

its Moon Base programme, building on the two countries' partnership under the Artemis Accords," the statement on Tuesday noted. **LUNAR PRESENCE** Moon Base is a US-led effort to develop a sustained lunar presence as part of its broader Artemis exploration programme. "The Moon Base is humanity's first lunar outpost, a place where astronauts will live, work and explore near the Moon's South Pole. Through a series of crewed and uncrewed missions, NASA and its partners will build the infrastructure needed to support an enduring human presence on the Moon, unlock new scientific discoveries, and prepare for

future deep space exploration," according to NASA.

EXPANDED TIES

For ISRO, participation in the programme will expand the scope of its engagement with NASA into longer-term lunar exploration and associated technologies. "ISRO and NASA have a strong collaborative partner-

ship, and the invitation to join Moon Base is going to make the association stronger," officials told *businessline*. The two sides also agreed to advance discussions on cooperation in open scientific data sharing under the Artemis Accords — a non-binding international agreement launched by NASA and the US State Department in 2020, putting in place a set of common principles for the sustainable exploration of the Moon and outer space. "Both sides discussed expanding cooperation following the successful launch of the joint NASA-ISRO Synthetic Aperture Radar mission last year, as well as pursuing future science and

human space flight technology collaborations," the statement highlighted. ISRO Chairman and Department of Space Secretary V Narayanan and US Ambassador to India Sergio Gora addressed the opening session, and emphasised the importance of strengthening bilateral space co-operation. The Indian side was represented by M Sankaran, Director of ISRO's UR Rao Satellite Centre, while the US side was represented by Wesley Brooks, Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs, and Kathleen Karika, NASA Associate Administrator for International and Inter-agency Relations.

₹882-cr TB diagnostic kits tender under the lens

Ankita Upadhyay
New Delhi

An ₹882-crore government procurement of TB diagnostic kits has come under scrutiny over the tender specifying a particular brand

despite an ICMR assessment finding that multiple suppliers met the technical standards and that one alternative was substantially cheaper. Experts questioned why the Central Medical Services Society's June 23 tender for a two-year rate contract to

"procure 1.5 crore TrueNat MTB Chips with 20 per cent Rif Chips manufactured by Molbio Diagnostics", identifies TrueNat by name instead of inviting bids for generic TB molecular diagnostic kits meeting set specifications.

Details **p12**

Nine Bills cleared in 52 minutes, with each getting less than six minutes in the Lok Sabha

One legislation pertaining to registration of births and deaths was passed in just one minute

Poornima Joshi
New Delhi

The Lok Sabha passed nine Bills over the past fortnight taking in all 52 minutes, averaging less than six minutes per piece of legislation. One Bill pertaining to the registration of births and deaths was passed in just one minute. A *businessline* analysis of the Lok Sabha proceedings shows that three Bills were passed in two minutes or less, five in six minutes or less, and seven in nine minutes or less.

THE LONGEST BILL

The Prevention of Insults to National Honour (Amendment) Bill took the longest — 14 minutes. It gives *Vande Mataram* statutory protection akin to the national anthem. The calculation excludes the Public Examinations (Preven-

tion of Unfair Means) Amendment Bill, 2026, which was debated in the House. The Registration of Births and Deaths (Amendment) Bill was passed in barely a minute, between 12.07 pm and 12.08 pm on July 31. The MSME Development (Amendment) Bill took two minutes on August 7, while the Taxation and Other Laws (Amendment) Bill was cleared in two minutes on August 6. The taxation legislation, which replaces a June Ordinance and amends provisions relating to income-tax, finance and electronic payments, was particularly significant. It provides for the removal of certain references in tax law and clarifies that banks and payment system providers cannot impose charges on specified electronic payments. The legislation also leaves

FAST FORWARD. MPs in the Lok Sabha during the Monsoon Session in New Delhi on Tuesday **p11**

open the possibility of MDR being levied on electronic payment modes outside a government-notified negative list. Yet, the Bill took two minutes to pass. The Bankers' Book Evidence Bill took four minutes, while the Tribunals Reforms Bill was passed in five minutes on August 11. The latter proposes a National Tribunals Commission to oversee appointments and administration of

tribunals, amid a long-running executive-judiciary tussle over tribunal independence. The proposed institutional model has also been suggested by the government as a possible template for judicial appointments. The Supreme Court (Number of Judges) Amendment Bill, which alters the statutory strength of the apex court amid substantial pendency, took six

minutes. The Kerala (Alteration of Name) Bill and the National Co-operative Development Corporation (Amendment) Bill took nine minutes each. **NO DISCUSSION** As the passage of the Bill entailed no discussion, MPs have taken to voicing their views outside Parliament. Congress MP Shashi Tharoor pointed out that while the national anthem takes about 52 seconds, the full *Vande Mataram* takes over three minutes. He said in States like Tamil Nadu, where the State Song too would be sung at public functions, it would add another two minutes. He asked whether audiences could reasonably be expected to stand for several minutes before and after every function. "Can respect and patience be legislated?" he asked.

The undisputed leader in adiabatic cooling

With over 80% market share and backed by the 78-year legacy of Paharpur, Infinium^{NEO} has grown to become the trusted leader in adiabatic cooling solutions in India.

Delivering up to 95% water savings* and 50% energy savings**, it drives superior operational efficiency while advancing your plant's sustainability goals.

Reliable, cost-effective, and environmentally responsible – Infinium is the clear choice for forward-looking plants.

* Vis-a-vis conventional open-circuit cooling towers.
** Adiabatic coolers make water-cooled HVAC viable in low water areas – 50% lower energy consumption than air-cooled systems.

Complex tax structure

Proposed dividend benefit not enough for REITs/InvITs

One of the less contentious provisions of the Taxation and Other laws (Amendment) Bill 2026, just passed by Parliament, is the proposal to change the taxation of dividends distributed by Real Estate Investment Trusts (REITs) and Infrastructure Investment Trusts (InvITs). The Bill seeks to make REITs and InvITs more investor-friendly by making them more tax-efficient. However, it takes a rather circuitous route to get there.

REITs and InvITs are listed trusts which own a portfolio of operating real estate or infrastructure assets. They pool cash flows from these assets, to distribute them as income to their unitholders. As REITs and InvITs own most of their operating assets through Special Purpose Vehicles (SPVs), the tax incidence on SPVs has a significant bearing on their attractiveness to investors. Currently, dividends paid out by REITs and InvITs are taxed differentially at the investors’ end, depending on whether the SPVs have opted for the old or new tax regime. Dividends sourced from SPVs that are under the new tax regime are taxable at the slab rate for the investor, but dividends from SPVs under the old regime are tax-exempt. This tax treatment has made it difficult for investors to choose the right REIT or InvIT product, because this requires knowledge of how the underlying SPVs are taxed. More importantly, these rules force many REITs and InvITs to avoid moving their SPVs to the new tax regime. The new Bill seeks to untangle these complications by making dividend payouts from REITs and InvITs tax-free in all cases, irrespective of the tax status of their SPVs. REIT and InvIT SPVs migrating to new regime will need to pay a higher surcharge of 25 per cent on their corporate tax, instead of the current 10 per cent.

Despite this sting in the tail though, most REITs and InvITs will likely make the transition to the new regime. For one, with one part of their distributions exempt from tax, they can now become a slightly more tax-efficient income vehicle for high net worth investors than fixed deposits, bonds or debt mutual funds. While the entire interest on bonds and deposits gets taxed at the investor’s slab rate, REITs and InvITs will now be able to shield the dividend part of their distributions from tax. Two, SPVs shifting to the new tax regime can boost their own cash flows available for distribution.

However, even after this concession, the taxation of REITs and InvITs remains extremely complex. Income from a REIT or InvIT is taxed at multiple rates, depending on the original source of that income. The dividend and interest income is taxed at the investor’s slab rate but distributions from repayment of debt are subject to capital gains tax. This tax treatment requires the investor to be aware of the REIT or InvIT’s income sources and keep track of its distribution history, to pay his taxes correctly. Moving REITs and InvITs to a simpler tax regime like other financial instruments is a necessary step to popularising them.

RAVIKANTH

Harness the power of finfluencers

They are increasingly becoming the go-to source for stock related advice, especially for the Gen Z and Millennial investors

POINT BLANK.

LOKESHWARRI SK

In a recent coffee table chat with a bunch of college students of finance and taxation, a few interesting observations came to the fore. Awareness among Gen Z (between 14 and 29 years) about stock markets is quite high and they are quite gung-ho about the benefits of stock market investing. Two, they believe in DIY investing, where they learn and then invest. Three, the source of information that they rely on is predominantly social media finfluencers.

Ten years ago, the Gen Z, as an investor cohort, could be brushed aside as inconsequential because they were not as active in stock markets. But the increase in smartphone usage and digitisation of stock investing seems to have made the number of investors in this age group quite high. SEBI’s investor survey showed that awareness about security markets is the highest among Gen Z at 66 per cent and equity market penetration the second highest in this group, after millennials.

The source of information revealed in the chat with students was corroborated by SEBI’s survey too. The top source to gather information on securities products, by all age groups, is friends, family and colleagues with 59 per cent. But the second highest resource, trusted by all, is financial influencers on social media, with 56 per cent of investors relying on them.

The trouble is that not all the finfluencers are regulated and some were found engaging in wrongful market practices. But that is no reason to look at them with suspicion. SEBI must harness their growing influence with a separate light-touch regulatory framework, which can help them as well as the stock market ecosystem.

THE REGULATORY VACUUM

SEBI regulates some people who give advice on securities through its investment advisors regulations and research analysts regulations. These advisors give investment advice for certain monetary compensation and must register with SEBI and be regulated by it.

Some finfluencers are registered with SEBI as investment advisors or research analysts and give advice to public at large as well, for free. But a vast majority of finfluencers, 94 per cent to be precise, are not registered under any regulator.

Changing preference

Source: SEBI investor survey

That is because they fall in a regulatory no-man’s land. SEBI does not regulate those giving advice to public, without any monetary compensation. Similarly, those giving financial education through social media or print are also not regulated.

The CFA society had recently published a report “Clicks and Credibility 2.0” which reveals that only 6 per cent of finfluencers surveyed are SEBI-registered, but 33 per cent provide explicit stock recommendations.

Besides this, around one-third of finfluencers seem to be having conflicts of interest. This could be in the form of prior holding of stocks recommended, colluding with promoters or brokers to recommend stocks with the intent to take prices higher so that the parties involved can sell at higher prices (pump and dump). Some finfluencers also do marketing on behalf of companies to sell their products, taking a fee for the service. But according to the CFA survey, 37 per cent fail to adequately disclose conflicts.

SEBI ACTIONS

SEBI has been following this space quite closely and around 4 per cent of

SEBI must tap their growing influence with a separate regulatory framework which can help them as well as the stock market ecosystem

finfluencers have faced penalties from SEBI.

To prevent them from giving stock tips under the garb of educational content, SEBI has asked them to use stock prices with a three-month lag while providing educational content. Many stockbrokers were associating with unregistered influencers to grow their business. That has been stopped now.

SEBI has also launched project Sudarshan, an advanced multimodal AI tool to generate alerts which can be communicated to the regulator for further action.

REGULATIONS BASED ON TRUST

While the stock market regulator is focusing on the wrongdoings by the finfluencer cohort, it must be acknowledged that they are emerging as the biggest and most trusted source of information, especially for the younger investors.

The SEBI investor survey states that, “Ninety-three percent of surveyed investors consider them moderately to highly credible. The impact is tangible as 62 per cent of investors make some of their investment decisions based on finfluencer recommendations.”

The Gen Z and millennials do not go to established investment advisors or wealth managers, the way the older generations do. They want more light-hearted, simplified and shorter formats as investment advice. The YouTube (91 per cent), Instagram (64 per cent) and Facebook (61 per cent) have therefore become the most popular social media platforms where investors seek information.

Demographic shift will fuel consumer and energy demand

The trend towards smaller families in India will increase the demand for consumer goods, real estate and ready-to-eat foods

Pankaj Sharma

In the 2000s, India’s Total Fertility Rate (TFR) hovered around 3.3 children per woman. Today, the demographic transition has accelerated faster than many demographers predicted. According to the Sample Registration System (SRS) Statistical Report 2024 released recently, India’s TFR has dropped to 1.9, falling below the global replacement level of 2.1 required to maintain long-term population stability.

While the urban TFR has plummeted to 1.5, rural India has reached 2.1, reflecting a widespread socio-cultural adoption of smaller family norms across all economic strata.

The most immediate structural result of this decline is the shrinking of household size, transitioning from traditional joint families to nuclear households averaging four or fewer members. While conventional wisdom suggests fewer people per household should reduce consumption, economic geography and behavioural science tell a very different story: smaller families consume more per capita, particularly across goods, services, and energy.

When a population reorganises into smaller units, the efficiency of scale is lost. Consider housing and durables, two households of two people require two refrigerators, two washing machines,

two air conditioners, and double the kitchen appliances compared to a single household of four.

This phenomenon, often termed household fragmentation, creates a distinct multiplier effect on demand. Demand for individual housing units expands faster than total population growth, driving the energy-intensive production of cement, steel, and glass. Per-capita ownership of appliances surges, inflating base-load electricity demand for urban power grids. Smaller family units rely less on shared transit and favour personal multi-wheelers and compact vehicles, lifting transport fuel usage.

The shift in dietary and cooking habits provides a striking example of how smaller households alter energy intensity. In larger families, home cooking yields massive economies of scale, a single burner prepares a meal for six or seven people with minimal per-capita fuel consumption. In contrast, smaller nuclear households increasingly shift toward convenience foods, meal deliveries, and dining out. This shift is greater in families which have dual income and often are pressed for time.

This habit switch carries a significantly heavier energy footprint. Commercial food ecosystems rely on cold chains, multi-stage processing, intensive refrigeration, high-temperature industrial heating,

DEMOGRAPHICS. Spending impact

single-use packaging, and last-mile delivery transport. Furthermore, commercial food supply chains incur higher rates of systemic food wastage. As a result, the hidden embedded energy, combining fuel and petrochemical feedstocks of a restaurant meal or frozen dish, is multiple times higher than that of a traditional home-cooked meal.

GLOBAL TRENDS

As India moves through this demographic evolution, shrinking family sizes will serve as a structural engine for the consumer economy over the next several decades. This trend is not unique to India; it mirrors the economic trajectories of several nations during their high-growth phases. South Korea (1980s–2000s) experienced this when their TFR plummeted from 2.8 in 1980 to below 1.2, average household size shrank rapidly.

Concurrently, household electricity

consumption rose by over 7 per cent annually throughout the 1990s. The expansion of single and two-person households directly fuelled a boom in convenience retail, processed food manufacturing, and residential power consumption per capita. Japan (1970s-1990s) experienced such rise in smaller household units long before its total population peaked. This structural shift triggered an explosion in the 24/7 convenience store economy and ready-to-eat supply chains, driving up industrial food-processing and refrigeration energy requirements by over 40 per cent in two decades.

The shift toward smaller households in India too will elevate baseline demand across consumer durables, real estate, personal mobility, and prepared food services. Rapid urbanisation which is not only making cities larger but is also converting rural into urban, is fuelling the consumerism much faster than expected. Because every element of this ecosystem relies on energy, whether as liquid fuels, power grid capacity, or petrochemical feedstocks, India’s ongoing demographic transition will keep energy demand trajectory sharply elevated long before overall population growth plateaus.

UPI worries

This refers to the article 'UPI is not a 'cost' to be recovered' (August 11). The plan to impose a fee on person-to-merchant UPI payments above a certain threshold risks undermining the very scheme this government promoted after demonetisation to usher the nation into a less-cash, more formal economy. Its real impact would fall on person-to-merchant payments, which account for two-thirds of the total value. It is naive to think that entities paying the charge would not

find ways to recoup it. Any fallback towards cash transactions due to the extra cost would far exceed, directly and indirectly, the cost of sustaining the UPI. Official assurances notwithstanding, there are fears that once the legal architecture for the charge is established, its scope may be broadened in the future to comply with further US dictates.

Kamal Laddha
Bengaluru

The article 'UPI is not a 'cost' to be recovered', (August 11), raises a valid

point. The large scale adoption of UPI payment has eaten into the profitability of entrenched card networks like Visa and Mastercard. That this does not go well with those networks is plain truth. The pious proclamations and promises of the government (that MDR will be for select transactions and small business will not be charged) aside, in the course of time the cost will be transferred to the public. In that way it disincentivises digital adoption and obscures transaction trail for ordinary small businesses.

The argument that 'someone must pay' finds answer with the nation paying from the savings on printing/circulating currency. The expenditure supporting research, development, deployment of digital payments systems should be prioritised for legitimate CSR spends.

Kottayam

Start-up success

With reference to 'How a Mumbai start-up cracked missile cooling tech', Mumbai's Techno Defence has achieved what few nations can. It has

developed an indigenous miniature Joule Thomson cryocooler for missile IR seekers. It has broken the western monopoly and proved that Indian start-ups can deliver strategic and high precision defence components. India should prioritise niche subsystems for exports, and partner early with DRDO. If we can successfully replicate this model it can move from platform assembly to becoming a trusted global supplier of mission critical defence technologies.

Wooing foreign investors

Govt using tax sops as an economic policy tool

Mohan R Lavi

When Parliament was not in session this year, the Government promulgated the Income-tax (Amendment) Ordinance, 2026 on June 5. This was necessitated as foreign portfolio investors withdrew a net ₹2,63,784 crore from Indian markets in the first five months of calendar 2026 — more than in all of the preceding year. The rupee had slid past ₹93 to the dollar and Brent crude had crossed \$110. The Taxation and Other Laws (Amendment) Bill, 2026, introduces a number of provisions where the Government has used tax exemptions and relaxations to encourage foreign investment, manufacturing and financial activity in India. The Bill amends the Income-tax Act, 2025, the Finance Act, 2026 and the Payment and Settlement Systems Act, 2007.

INVESTMENT IN G-SECS One of the significant amendments relates to investment in government securities. With effect from April 2026, interest earned and capital gains arising from G-Secs will be exempt for eligible FIIs and the Bank for International Settlements, subject to prescribed reporting requirements. An equally important amendment concerns offshore investment funds having fund managers in India. The Bill proposes removing requirements relating to minimum number of investors, minimum fund corpus, concentration of investors, investments in associates and minimum remuneration of fund managers are proposed to be removed. The principal conditions that remain relate to the fund being a non-resident, being established in an eligible jurisdiction, restrictions on participation by Indian residents and the fund not carrying on a business in India. This amendment could encourage international fund houses to locate more of their operations in India without the fear of inadvertently creating an Indian tax presence.

The exemption available to foreign companies supplying capital goods, equipment and tooling to Indian contract manufacturers is extended up to 2040-41. A new exemption is also proposed for foreign companies storing electronic components in customs bonded warehouses in India and supplying them to

AIM. Attracting global capital

Indian contract manufacturers. The data-centre provisions have also been liberalised. An Indian company need not necessarily own the data centre and can lease and operate it. The requirement for individual government notification of foreign companies and Indian data centres is also being relaxed. Income earned by eligible foreign diamond-mining companies, brokers, aggregators and auction entities from sale of rough diamonds in notified Special Zones will be exempt from tax. The exemption is proposed to operate from October 1, 2026 to March 31, 2041. Dividend income distributed through a business trust to unit holders will continue to remain exempt even where the underlying Special Purpose Vehicle opts for the new corporate tax regime. At the same time, the surcharge applicable to such SPVs under the new regime is increased.

The Payment and Settlement Systems Act presently prohibits banks and payment-system providers from imposing charges on prescribed electronic payment modes. The Bill allows the Central Government to notify the electronic payment modes for which such charges cannot be imposed. This amendment by itself does not mean that UPI transactions will become chargeable. It merely gives the Government flexibility to determine which categories of electronic payments must continue to remain free.

The amendments may appear unrelated — G-Secs, offshore funds, electronics, data centres, diamonds, REITs and UPI. Looked at together, however, there is a common thread. The Government is increasingly using taxation not merely as a mechanism for collecting revenue but also as an instrument of economic policy. The success of these measures will ultimately depend on the simplicity of the rules, reporting requirements and implementation that follow.

A new Middle East is being built

The Mecca Accord brings together Saudi Arabia, Pakistan and Turkiye, raising questions for Delhi

THE WIDER ANGLE.

What will the power politics of the Gulf look like six months or a year from now? One near-certainty is the US will no longer be the Great Power manoeuvring regional players to extract maximum advantage for itself.

Another likely twist is Pakistan will have achieved a longstanding ambition: it will have nudged much closer to the oil- and cash-rich Middle East on the other side of the Strait of Hormuz.

Where does that leave India? India remains an Asian giant, second only to China, and the Gulf powers have enormous interests here. Saudi Arabia, in particular, has billions invested in India in areas like energy and infrastructure. India is also the second-largest buyer of Saudi crude after China, giving Riyadh a powerful reason to hold Delhi close. That could become even more important if China's transition to electric vehicles and renewable energy begins eating substantially into its imported oil demand.

Then there's the human bridge. Four million Indians live in Saudi Arabia, forming a crucial part of the kingdom's workforce and sending billions of dollars home in remittances.

Saudi Arabia, however, will not be the only power shaping the new Gulf order. Turkiye and Iran will be key players, while Egypt and Pakistan could acquire greater influence. The UAE, armed with immense financial firepower despite its small size, will be in the top tier too, though Abu Dhabi is likely to remain closer to India than many of the other players.

Before this new regional order can fully take shape, the US-Iran war will have to reach some conclusion. Donald Trump wants a way out, but Iranian leaders seem to have concluded there's little point negotiating with a Trump-led US as any agreement could be discarded on a whim. Tehran is also demanding the

INDIA'S CONCERN. What Saudi Arabia's involvement might mean during the next India-Pakistan crisis VIA REUTERS

unconditional release of US-held Iranian assets and compensation for war damage. Trump has countered by saying Iran should pay compensation “for all the people they have killed and gravely wounded with their roadside bombs and many conflicts”.

Then there's Israel. Benjamin Netanyahu has injected more uncertainty by breaking with Trump and rejecting demands Israel withdraw from Gaza and large parts of Lebanon. There are even reports Netanyahu could also order more major strikes against Iran without US backing.

Those doubts over whether a lasting peace can be achieved have rattled oil markets once again, a reminder every Gulf tremor can become an economic shock beyond the region. Against this volatile backdrop comes the new three-way Mecca Defence pact between Saudi Arabia, Pakistan and Turkiye. The alliance will have to reconcile some significant contradictions. But its premise is straightforward.

Pakistan's overriding preoccupation remains India. That's not true of Saudi Arabia or Turkiye

Saudi Arabia has the money. Pakistan has nuclear weapons along with one of the Muslim world's largest and most experienced armed forces. Turkiye has one of the region's most sophisticated defence industries.

That could eventually mean Riyadh bankrolling Pakistan in return for access to ground troops and combat aircraft. Turkiye, meanwhile, can provide sophisticated weaponry ranging from drones and missiles to naval vessels and electronic warfare systems.

FUNDAMENTAL PROBLEM

Indeed, Turkish military cooperation with Pakistan isn't new, as Ankara has been strengthening bilateral defence ties for years. Yet there's a fundamental problem with the Mecca Accord: its members do not share a single clear enemy.

Pakistan's overriding preoccupation remains India. That's not true of Saudi Arabia or Turkiye, both of which have important economic and strategic reasons to maintain relations with Delhi. Riyadh, in particular, has little interest in being dragged into a South Asian confrontation that threatens its investments, energy trade and millions of Indian expatriate workers.

Pakistan's role in the Iran conflict

raises another contradiction. Islamabad has positioned itself as an important intermediary between Washington and Tehran. How does that square with membership of a Saudi-led security arrangement when Saudi Arabia and Iran remain at loggerheads?

One answer may simply be that Pakistan's usefulness as an intermediary is diminishing as Washington and Tehran increasingly deal directly with one another.

For India, the more immediate concern is what Saudi involvement might mean during the next India-Pakistan crisis. Riyadh would almost certainly use its leverage in Islamabad to try to halt a conflict quickly, which might sound reassuring. But to some Indian military strategists it is a problem because outside powers could force an early ceasefire before India achieved its military aims.

Delhi faces a strategic balancing act. It has no interest in allowing Pakistan to become the Gulf's indispensable military power, but nor does it want to force Saudi Arabia into choosing between India and Pakistan. Fortunately, India's enormous economy, its energy purchases, its technological capabilities and its huge diaspora give it formidable cards of its own.

Screening India's healthcare diagnostics market

Molbio Diagnostics, whose IPO is live, offers insights into India's diagnostics market, in its prospectus. Diagnostics is currently the largest segment in India's healthcare market, after hospitals and pharmaceuticals. However its contribution to the overall healthcare market is lower relative to the US — indicating headroom for growth. Diagnostics in India is expected to see early teens growth over the next five years, driven by rising incidence of chronic illnesses and demand for preventive screening. Within diagnostics, in vitro diagnostics account for about 56 per cent of the market.

Diagnostics make 6 per cent of India's healthcare market

India diagnostics market composition

Source: Molbio Diagnostics Ltd's RHP

Diagnostics in India - not as deep as in the US

What make the in vitro diagnostics market

Clinical chemistry - analysis of blood serum, plasma or urine
Immunodiagnostics - to detect presence of antibodies or antigens
Haematology - analysis of blood components such as RBCs, WBCs
Molecular diagnostics - analysis of DNA/RNA to detect genetic disorders, cancers

Air travel rules made stricter

The Government has tightened the rules for air travellers, following the foiled plot to blow up aircraft in the UK. From now on, a domestic passenger would not be allowed to carry any liquid or gel on board the aircraft, the concept of only one handbag per passenger would be implemented strictly and airlines have to close their check-in counters 30 minutes before the take off.

SEBI chief warns against ‘professional’ directors on boards

The Securities Exchange Board of India has warned corporates against appointing directors who have no stakes. The SEBI Chairman, Mr M. Damodaran, said on Friday that the regulator intended to publish the names of those directors who have joined the boards as “professional directors” without meeting the norms.

India to wheel in power from abroad

India is planning to jointly develop power projects totalling 29,662 MW in its neighbourhood, with the idea of wheeling back to the country the bulk of generated power from these projects. Over 15 projects, are at various stages of discussion for being set up in Nepal, Bhutan, Myanmar and Afghanistan.

NDR InvIT to turn public, files DRHP for ₹750-cr IPO

New Delhi: NDR InvIT Trust, sponsored by NDR Warehousing Private Ltd, has proposed to convert into a public InvIT through an initial public offering aimed at raising up to ₹750 crore. The proposed IPO comprises a fresh issue of units worth up to ₹450 crore and an OFS of up to ₹300 crore by Investcorp India Warehousing IFSC Trust, according to the draft offer document filed with SEBI. The fresh issue proceeds will be used to acquire 100 per cent of NDR Advanced Storage Private Limited for up to ₹297.6 crore and 100 per cent interest in NDR Storewell Warehousing LLP for up to ₹84.2 crore. The remaining proceeds will be used for general purposes. **■**

Mirae Asset launches loans for shares in CDSL

Mumbai: Mirae Asset Financial Services has launched loans against shares held in CDSL demat accounts. The loan will be processed online through the Mirae Asset Financial Services website or mobile app. Until now, customers with CDSL demat accounts looking for loan against shares had to go through a manual, paper-intensive process which takes 7-10 days. Customers can now apply online, select the shares they wish to pledge and authorise the request digitally, without visiting a branch or submitting physical paperwork. Once the pledge is approved by their depository participant, they can proceed with creating their loan account on the same day. **OUR BUREAU**

SEBI measures reduce F&O losses for retail investors in FY26: Govt

CLICK BAIT. Losses of individuals declined to ₹1,11,788 cr from ₹91,685 cr in equity derivatives: Rajya Sabha

Press Trust of India
New Delhi

Regulatory measures introduced by SEBI curtailed the aggregate net losses of retail investors in the equity derivatives segment to ₹91,685 crore in FY26, down from ₹1.12 lakh crore in the preceding fiscal year, Parliament was informed on Tuesday. Additionally, both retail investor volumes and overall trading turnover in equity derivatives (Futures and Options) fell in FY26 compared to the preceding year, Minister of State for Finance Pankaj Chaudhary said in a written reply to the Rajya Sabha. “Following the regulatory measures, SEBI has observed a y-o-y decline in the number

of unique individual investors from 98.10 lakh to 78.60 lakh and net losses of the individuals from ₹1,11,788 crore to ₹91,685 crore in the equity derivatives segment in 2025-26, compared to the previous year,” Chaudhary said. However, the average per person loss increased to ₹1,16,654 from ₹1,13,913 over the period.

F&O TURNOVER Also, equity derivatives turnover dropped to ₹202 lakh crore in FY26 from ₹213 lakh crore in FY25. The Minister also listed the measures taken by the Securities and Exchange Board of India since November 2024, which led to a decline in the number of retail investors, their losses and

LOSERS GAMBIT. The average loss per person jumped to ₹1,16,654 from ₹1,13,913 in FY26, the Rajya Sabha was told **■**

trading volumes in the equity derivatives segment. To strengthen the F&O segment, SEBI has undertaken a set of measures from November 2024, including rationalisation of weekly index derivatives products, increase in tail risk coverage on

and intra-day monitoring of position limits. In May 2025, SEBI took further measures aimed at streamlining the expiry days of various derivative contracts across multiple exchanges and implementing appropriate risk metrics for position limits for better monitoring and disclosure of risks in F&O. **IPOS OF LOSS MAKERS** In a separate reply, Chaudhary said that loss-making companies or firms with negative net profits are permitted to launch initial public offerings in the country. As per information furnished by the stock exchanges to SEBI, a total of 39 companies with negative net profits or accumulated losses listed over the last five years.

Lalithaa Jewellery’s ₹1,700 crore IPO opens on August 17; price band fixed at ₹190-201

Anupama Ghosh
Mumbai

M Kiran Kumar Jain, Chairman & MD, Lalithaa Jewellery Mart

Chennai-based Lalithaa Jewellery Mart Ltd has fixed the price band for its initial public offering at ₹190-201 a share with the issue set to open on August 17 and close on August 19. The IPO comprises a fresh issue aggregating to ₹1,200 crore and an offer for sale (OFS) of up to ₹500 crore by promoter M Kiran Kumar Jain, taking the total issue size to ₹1,700 crore. Investors can bid for a minimum lot of 74 shares. Chairman and Managing Director Kiran Kumar Jain

said Lalithaa Jewellery had built its brand on trust and regional relevance.

RETAIL REACH “...45 of our 61 stores are in tier-II and tier-III cities, contributing to 60.25 per cent of revenues,” he said.

The company operates 61 stores across Tamil Nadu, Andhra Pradesh, Telangana, Karnataka and Puducherry, spanning a total operational area of 650,881 sq ft across 51 cities as of March 31, 2026. Its flagship locations include a 1,00,000 sq ft store in Vijayawada, a 98,210 sq ft outlet in Somajiguda, Hyderabad, and a 65,000 sq ft store in Visakhapatnam. Revenues surged to ₹25,023.93 crore in FY26 from ₹16,788.05 crore in FY24, a compound annual growth rate of 22.09 per cent. Net profit jumped to ₹1,009.82 crore in FY26, nearly three times the

₹359.83 crore recorded in FY24. EBITDA margins expanded from 4.05 per cent in FY24 to 6.69 per cent in FY26, while return on capital employed stood at 42.60 per cent in FY26, the highest among listed peers benchmarked in the Crisil report. Anand Rathi Advisors Ltd and Equirus Capital Ltd are the book-running lead managers. MUFG Intime India Private Ltd is the registrar. The issue will be listed on both the BSE and the NSE. Up to 50 per cent of the net offer is reserved for QIBs, at least 15 per cent for non-institutional bidders and 35 per cent for retail investors.

BSE may draw \$700 m on Nifty entry

Akshata Gorde
Mumbai

The stock of the BSE is expected to attract around \$700 million in passive inflows following its entry into the Nifty 50, as funds tracking the benchmark need to rebalance their portfolios. The inflow is expected to be concentrated around the September 30 rebalance, with Nuvama Alternative & Quantitative Research estimating \$695 million of buying in BSE from Nifty 50-linked funds. It estimates this will involve about 18 million shares, equivalent to around six times the BSE’s average daily trading volume, with the stock expected to carry a

1.3 per cent weightage in the index. After accounting for the BSE’s exclusion from Nifty Midcap 150, Midcap 100 and Midcap 50 indices, it estimates the overall passive flow impact at a net \$622 million. **ETF’S TO BUY** Nikunj Saraf, CEO, Choice Wealth, said, “We estimate the BSE’s Nifty 50 entry will trigger roughly ₹6,500-7,000 crore, or \$740 million, of one-time passive buying based on an expected entry weight of around 1.3-1.4 per cent applied to the nearly 55 lakh crore that tracks the index.” He expects 85-90 per cent of buying from domestic ETFs and index funds, with global Nifty 50 trackers contributing a smaller share.

Arihant Bardia, CIO and Founder of Valtrust said, “An index is supposed to reflect where investors are putting their money. But increasingly, it is also influencing where that money goes.” The BSE will now be eligible for investment by a much larger pool of benchmark-linked institutional capital, which could translate into greater institutional ownership, trading liquidity, analyst coverage and visibility, he said. It could make the stock more relevant to global investors and active funds that use the Nifty 50 as a reference point. However, analysts said much of the expected benefit could already be reflected in the BSE’s share price, which has risen sharply.

Leap India IPO subscribed 8.38x, Technocraft issue 38.69 times

Our Bureau
Bengaluru

Two mainboard IPOs — Leap India IPO and Technocraft Ventures — that closed on Tuesday, saw strong response across investor categories.

LEAP INDIA The ₹2,480-crore Leap India IPO was subscribed 8.38 times. The QIB portion was subscribed 16.84 times, the NII portion 12.64 times and the retail portion 1.71 times. The employee portion saw a strong response of 10.99 times. Earlier, Leap India mobilised ₹743.62 crore from institutional investors, including Smallcap World Fund and the Monetary Authority of Singapore. The IPO comprised a fresh issue worth ₹480 crore and

India’s 300 most valuable family businesses are collectively worth \$1.46 trillion (₹138 lakh crore), a figure that would rank as the world’s 18th-largest economy by GDP, surpassing countries such as the Netherlands, Saudi Arabia, Switzerland and Poland, according to the third edition of the Barclays Private Clients Hurun India Most Valuable Family Businesses List released on Tuesday. The list expanded by 27.5 per cent since the 2024 edition, even as the Nifty 50 declined 1.1 per cent and the BSE Sensex fell 3.7 per cent over the same period. These businesses added an average of ₹4,076 crore in value every day over the past two years. “India’s family-owned enterprises continue to be a powerful force behind the country’s wealth creation, employment and long-term

economic growth,” said Adrish Ghosh, Head of Barclays Private Bank India. The Ambani family retained the top spot for the third consecutive year, with a valuation of ₹25.8 lakh crore. **FIRST GENERATION** The inaugural first-generation family business list is led by the Adani family, valued at ₹19.6 lakh crore. The Sunil Bharti Mittal family follows at ₹12.1 lakh crore and the Dilip Shanghvi family ranks third at ₹4.55 lakh crore. The pharma sector dominates first-generation businesses

with 22 companies, while industrial products leads the main list with 47 companies. “First-generation entrepreneurs are now firmly in the front rank. This wealth is spreading well beyond the traditional strongholds; cities such as Hyderabad, Chhatrapati Sambhajanagar and Thrissur are seeing founders outpace their long-established family houses,” said Anas Rahman Junaid, Founder and Chief Researcher, Hurun India. The Ahuja family of Shahi Exports recorded the highest three-year value growth at 352 per cent, while Garware Hi-Tech Films climbed 61 ranks, the largest jump on the list. The Shiv Nadar family registered the steepest decline, with the valuation falling 32 per cent amid weakness in the software sector. The Anil Agarwal family posted the biggest annual gain in the top 10, rising 75 per cent following Vedanta’s demerger into five separately listed entities.

BROKER’S CALL.

Motilal Oswal

POONAWALLA FIN (BUY) Target: ₹570 CMP: ₹486.35 Poonawalla Fincorp (PFL)’s transformation into a diversified retail lender has moved beyond the investment phase. The newer businesses have attained meaningful scale and are emerging as incremental growth drivers, supported by a wider distribution footprint, improving digital capabilities and disciplined execution. As the portfolio becomes more diversified across products, customer segments and collateral types, we expect growth to become more resilient and earnings quality to improve and operating leverage begins to offset the elevated investment spend of the past two years. The company’s profitability outlook continues to strengthen as higher-yielding businesses scale up, portfolio yields improve, and operating leverage begins to offset the elevated investment spend of the past two years. We believe PFL is transitioning from a transformation story to an earnings compounding story. The combination of multiple growth engines, improving operating efficiency, AI-led productivity gains, and strengthening asset quality should drive superior earnings growth over the next few years. We model about 43 per cent AUM CAGR and around 117 per cent PAT CAGR over FY26-28E, with RoA/RoE improving to around 2.4/17 per cent by FY28E. At 2.5x FY28E P/BV, valuations remain attractive relative to its medium-term earnings potential. We reiterate our Buy rating with a target price of ₹570, based on 3.0x Mar’28E BVPS.

Equirus Securities

GREENLAM IND (LONG) Target: ₹296 CMP: ₹242.45 Greenlam Industries’ (GRLM) Q1-FY27 consolidated revenues grew 18 per cent y-o-y to ₹800 crore, 3 per cent above EE, with laminate revenues up 7 per cent y-o-y (-9 per cent q-o-q), led by higher realisations while Laminate volumes fell 6 per cent y-o-y. Plywood, Veneer & A.P. business posted healthy recovery, with revenues up 20 per cent y-o-y, while Chipboard facility continued to ramp-up. Management maintained blended revenue growth guidance of 18 per cent in FY27. Gross Margin came at 52.9 per cent (-17 bps y-o-y/+134 bps q-o-q, 39 bps above EE) led by price hikes across divisions. Net price hikes (Adj. for price reversals) to pass on elevated chemical costs were about 7-8 per cent. Adj. for forex, EBITDAM grew 206 bps y-o-y (-234 bps q-o-q) to 10.2 per cent due to operating leverage gains. The Chipboard facility turned EBITDA positive while the plywood and AP segment EBITDA losses narrowed y-o-y in Q1-FY27. Management expects the Plywood division to reach quarterly EBITDA breakeven by end of FY26. We cut FY27E EBITDA by 6 per cent to factor in the elevated impact of input costs in Q1 while further margin recovery in newer segment should offer support. Revise to Long (from Add) with a Dec’27 TP of ₹296 at a 30x (unchanged) one-year fwd. EPS of ₹9.9 as we believe that FY27 will be an inflection year for the company. With major capex behind, debt repayment is expected to accelerate from FY28 onwards.

TODAY’S PICK.

Carborundum Universal (₹1,174.55): BUY

Gurumurthy K
bl. research bureau

The short-term outlook is bullish for Carborundum Universal. The price action since July indicates a rounding pattern. The strong 4.8 per cent rise on Tuesday confirms that a bottom is formed. It also indicates that the fall that was in place since mid-June has ended and a fresh leg of upmove has begun. Support is around ₹1,130, which could limit the downside in case there is an intermediate dip. The share price has the potential to reach ₹1,330-₹1,350 in the coming weeks. Traders can buy Carborundum Universal shares now at ₹1,175. Accumulate on

dips at ₹1,145. Keep the stop-loss at ₹1,080. Trail the stop-loss higher to ₹1,205 as soon as the stock goes up to ₹1,245. Revise the stop-loss higher to ₹1,255 and ₹1,295 when the price touches ₹1,285 and ₹1,315 respectively. Exit the long positions at ₹1,330.

Note: The recommendations are based on technical analysis. There is a risk of loss in trading

‘RBI wants AI to be responsibly harnessed, not seen as a risk’

TECH BOOST. Effective adoption of AI can improve the productivity of banks, says Sanjay Malhotra

Our Bureau
Mumbai

The Reserve Bank sees artificial intelligence (AI) as a capability to be responsibly harnessed and not merely as a risk to be contained, and Indian banks cannot afford to sit on the sidelines on this front, according to RBI Governor Sanjay Malhotra.

By harnessing AI capability, the economics of credit delivery changes fundamentally, banks can serve customers better and enhance their operational efficiency, he said at the FICCI-IBA Annual Banking Summit.

The RBI Governor said that traditional underwriting relies on financial history — precisely the data that is thin or absent for a new-to-credit borrower, a gig worker, or a small enterprise without formal books.

ALTERNATIVE DATA

However, AI models, trained on alternative data — cash flows, GST filings, utility

BANKING ON TECH. RBI Governor Sanjay Malhotra flanked by Indian Banks' Association Chairman Challa Sreenivasulu Setty (right) and FICCI President Anant Goenka at the inaugural session of the FICCI-IBA FIBAC Conference 2026 in Mumbai

payments, digital footprints — could extend the frontier of “bankable” India considerably further than manual underwriting ever could, at a fraction of the marginal cost per loan.

At the same time, AI-enhanced credit risk models, liquidity forecasting, and scenario analysis allow banks — and, indeed, the RBI — to see emerging stress earlier than lagging financial statements permit.

Malhotra observed that AI allows banks to serve customers better, provided it is

used to augment rather than merely replace human judgment.

“A relationship manager assisted by an AI system that presents the right product, the right risk flag, can serve a higher number of customers more efficiently. AI-assisted grievance redressal, and personalised financial guidance can enhance service quality to customers,” he said.

The RBI Governor underscored that for a country of India’s size and diversity, AI has the potential to be a profoundly inclusive techno-

logy. Voice interfaces in Indian languages can simplify banking by removing the language barrier.

Moreover, predictive models could identify borrowers on the cusp of default early enough to counsel rather than merely recover. Used well, AI may be the most powerful accelerator to financial inclusion.

Malhotra said there is scope to reduce cost to income ratios or intermediation costs in India. Effective adoption of AI can significantly improve the productivity of Indian banks across operations, sales and customer service, and credit and collections, he added.

Further, document processing, reconciliation, and internal audit sampling are all ripe for AI-assisted automation, freeing skilled staff for judgment-intensive work.

It could automate transaction reporting, and regulatory return preparation, reducing both compliance cost and the operational risk of manual error.

With fraud today moving at the speed of an API call, it is only AI that can beat AI delivered fraud, emphasised the Governor.

“A rules-based fraud engine, however, well designed, is perpetually one step behind a fraudster who adapts more frequently. It is only machine-learning models which continuously learn from transaction patterns and can identify anomalies in real time rather than after the loss has crystallised,” he said.

TECH INVESTMENT

In this regard, Malhotra said Banks will need to invest in technology: IT infrastructure, talent, skilling and reskilling, forging sustainable partnerships and building governance structures.

“None of this happens overnight, and none of it happens by accident. It requires a deliberate, board-driven strategy, backed by sustained investment, and strong intent rather than a series of disconnected projects,” he said.

‘Indian economy, banks well positioned to tackle West Asia crisis’

Our Bureau
Mumbai

While India faces uncertainties arising from the West Asia crisis, trade policy, and cyber risks, the Indian economy and the banking sector is very well positioned to meet these challenges, said RBI Governor Sanjay Malhotra.

In reply to a question on the risks the Indian economy and the financial system

could face over the next few years, Malhotra said: “I think there are quite a few challenges. Public debt levels in advanced economies are high. There is growing interconnectedness of NBFCs and unregulated space outside, not so much in India.”

“Equity valuations are elevated and if there are corrections, all of these could have spill-over effects.”

Answering questions from Ficci members at the Ficci-IBA Annual Banking Confer-

ence, the RBI Governor said the country is facing uncertainties, not only geopolitical arising from the West Asia crisis, but also those related to global trade policy and tariffs. He also flagged cyber risks.

“But I must mention that the Indian economy and the Indian banking sector are very well positioned to meet these risks, meet these challenges... The banking sector is very robust, with CRAR (capital to risk-weighted as-

sets ratio) of, I think, 17-18 per cent. GNPA’s (gross non-performing assets) is less than 2 per cent and Net NPA is less than 0.5 per cent,” he said.

STRONG FUNDAMENTALS

Further, banks have strong liquidity coverage ratio (the ratio of stock of high-quality liquid assets to the total net cash outflow over the next 30 calendar days), good profitability, and price to book also is increasing.

Malhotra emphasised that the macroeconomic fundamentals of the Indian economy are very strong, with growth being resilient, inflation more or less under check, and healthy balance sheets of financial and non-financial firms. The external sector too is quite robust.

The RBI Governor said the government and all stakeholders not only met every shock, be it the Ukraine crisis or Covid, but have come out of it much stronger

Re stays vulnerable

Akhil Nallamuthu
bl. research bureau

The rupee remained largely stable over the past week, closing at 95.44 against the dollar on Tuesday compared with 95.38 a week ago.

The local currency has struggled to find a clear direction as supportive foreign inflows are being offset by renewed concerns over crude oil prices.

rising crude oil prices have limited the scope for appreciation. The US inflation print could provide the next major trigger for the currency.

WEEKLY RUPEE VIEW.

Foreign portfolio flows remained positive. According to NSDL data, net FPI inflows stood at about \$1.1 billion over the past week, taking cumulative inflows in August so far to around \$2 billion. The sustained inflows have provided support to the rupee and helped limit downside pressure.

RIISING OIL PRICES

However, crude oil prices have started moving higher again. Brent crude futures, currently trading around \$88/barrel, declined nearly 5 per cent last week but have rebounded by a little over 5 per cent so far this week. A sustained rise in crude prices could weigh on the rupee by increasing India’s import bill and demand for dollars.

Therefore, the support from improving foreign flows is currently being counterbalanced by concerns over the renewed strength in crude oil prices, keeping the rupee largely range-bound.

US INFLATION DATA

Attention now turns to the US inflation data due on Wednesday. The reading will be closely watched for its implications for the Federal Reserve’s monetary policy outlook and, consequently, the dollar.

A significant deviation from market expectations could lead to higher volatility in the dollar-rupee exchange rate.

Overall, positive capital flows continue to provide a cushion for the rupee, but

Agentic AI emerges as mid-to-high level priority for Indian banks

Vallari Sanzgiri
Mumbai

Senior executives from some of India's largest banks have identified agentic AI integration as a medium-to-high strategic priority for the coming year, highlighting its potential to transform decision-making, security and innovation across the banking sector.

Speaking at a session on the growing role of agentic AI in autonomous decision execution during a Banking and Financial Services conference in India, leaders

from Bank of India, Canara Bank, Bank of Baroda, HDFC Bank, and IndusInd Bank highlighted the importance of responsible AI adoption.

The discussion reflected a broader industry consensus that while agentic AI offers significant opportunities to improve operational efficiency and customer service, its adoption must be supported by strong governance, high-quality data, and effective risk management frameworks.

Collectively, the executives assigned agentic AI a rating ranging from medium to top priority within their or-

ganisations. They emphasised that successful AI deployment will depend on robust security frameworks, clear accountability and liability structures, continued innovation, and agile technology infrastructure.

Anjani Rathor, Group Head, Digital Banking & Customer Experience, HDFC Bank, highlighted the critical role of data quality in enabling effective AI adoption. According to him, banks must strengthen transaction monitoring systems to ensure that AI models are trained on accurate, relevant, and contextual data.

India analysing the impact of Mecca pact on national security

Amiti Sen
New Delhi

India is examining the implications of the defence pact between Pakistan, Saudi Arabia and Turkiye — pledging to defend each other against external attacks — from the perspective of its national security and regional peace and stability, the MEA said.

The pact signed between the three countries on August 7, officially called the ‘Mecca Joint Defence Agreement’, stipulated that an armed attack against any one of the signatories would be regarded as an attack on all, according to their joint statement.

“We continue to closely follow developments in the West Asia conflict. As far as this agreement is concerned, we are examining its implications both from the perspective of India’s national security,” MEA Spokesperson Randhir Jaiswal said.

NO CLARITY

The joint statement provided no clarity on how seriously the agreement binds the three countries to come to each other’s aid in the event of aggression against one of them.

“The agreement is there on paper. But we don’t know what will be the practical implementation. So, while India would be cautious of the development, it may not be alarmed,” a source told *businessline*.

On paper, Pakistan may be trying to give a message to India, while Saudi Arabia would do the same to Iran and Turkiye perhaps to the US, the source noted.

“One needs to see what is in the fine print and how serious are the countries about coming to each other’s defence when they get into a military conflict,” the source added.

Air India management summoned over Phuket-Delhi flight incident

Rohit Vaid
New Delhi

The Centre on Tuesday summoned Air India’s management to seek a detailed update on the August 4 Phuket-Delhi flight incident, sources told *businessline*.

According to sources, senior Ministry of Civil Aviation (MoCA) officials pulled up the airline’s management over the incident.

Later in the day, MoCA, in a statement, said the number of passengers injured in the incident had risen to 20, excluding four cabin crew members who were also injured in the disturbance.

In another development, sources indicated that the secondary psychoactive-substance test of the pilot-in-command had returned positive. However, the result has not been officially confirmed by the MoCA, the Directorate General of Civil Aviation or Air India.

SERIOUS VIEW

Tuesday’s meeting assumed significance as MoCA has taken a serious view of the incident involving Air India flight AI2379, which suffered a sudden altitude variation of approximately 300 feet during cruise before stabilising and landing safely in Delhi.

As per sources, tough

Campbell Wilson, Air India’s CEO, speaking to the media after meeting senior officials of MoCA ANI

questions were put to the Air India management during the meeting, with the Ministry seeking clarity on the sequence of events and the measures taken by the airline following the incident.

Speaking to reporters, Civil Aviation Minister Ram Mohan Naidu Kinjarapu said the Ministry wanted a direct update from Air India on how it was handling the incident.

He said aviation safety remained the top priority for the Ministry and that there should be no compromise by any stakeholder, including airlines and regulators.

At present, the Aircraft Accident Investigation Bureau has taken up the investigation into the incident. He added that the Ministry would also examine the regulatory framework relating to substance use by aviation personnel.

Notes:
1. The above Standalone and Consolidated financial results of the Company were reviewed by the Audit Committee and approved by the Board of Directors at their respective meetings held on August 11, 2026.
2. These Standalone financial results of the Company have been prepared in accordance with the recognition and measurement principles of applicable Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) as specified in section 133 of the companies Act, 2013.
3. In terms of SEBI Circular CIR/CFD/CMD/56/2016 dated May 27, 2016 the Company hereby declares that the auditors have issued limited review reports both for standalone and consolidated financial results with unmodified opinion for the quarter ended June 30, 2026.
4. The above is an extract of the detailed format of Financial Results filed with the Stock Exchange under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The full format of the Financial Results are available on the Stock exchange website, www.bseindia.com, www.nseindia.com and on the Company’s website www.isgec.com. The same can be accessed by scanning the QR code provided below.
5. The Government of India has consolidated 29 existing labour legislations into a unified framework comprising four labour codes. The Codes have been made effective from November 21, 2025. The New Labour Codes have resulted in estimated one time increase in provision for employee benefits of the Group of ₹ 1,649 lakhs during the financial year ended March 31, 2026 on the basis of actuarial valuation and consistent with the guidelines provided by the Institute of Chartered Accountants of India and the same has been recognized as an exceptional item.
6. During the quarter ended June 30, 2026, the Company diluted its equity stake in SFW Isgec Energy Private Limited (formerly known as Isgec SFW Boilers Private Limited) from 51% to 26% pursuant to sale of 25% shareholding in this Company. Consequent to the reduction in the shareholding, the Company has ceased to exercise control over SFW Isgec Energy Private Limited (formerly known as Isgec SFW Boilers Private Limited) with effect from June 25, 2026 in accordance with the requirements of “IND AS 110- Consolidated Financial Statements”. Accordingly SFW Isgec Energy Private Limited has ceased to be a subsidiary and has been accounted for as an associate under “IND AS 28- Investments in Associates and Joint Ventures”. The retained investment of 26% has been recognised at its fair value. This transaction has resulted into gain of ₹ 373 lakhs which is recognised in Profit & Loss for the quarter ended June 30, 2026.
7. The figures for the corresponding previous periods have been regrouped, wherever necessary, to make them comparable.

Bike taxis are not public transport vehicles: Karnataka government to Supreme Court

Krishnadas Rajagopal
New Delhi

The Karnataka government on Tuesday submitted in the Supreme Court that a State High Court decision to allow bike-taxis ignores the low safety standards of motorcycles, higher accident fatality rates, congestion and

their limited utility as public transport vehicles. The State’s case came up before a Bench headed by Justice Satish Chandra Sharma on Tuesday and was deferred to a later date for detailed consideration.

Karnataka, represented by advocate Sanchit Garga, said the restriction on the use of two-wheelers as taxis was

reasonable, proportionate and in public interest.

“Motorcycle riders continue to have viable alternative avenues of livelihood, including under the Kamataka Platform-Based Gig Workers (Social Security and Welfare) Act, 2025, which provides statutory protection and welfare measures for such workers,” Karnataka submitted.

26th Annual General Meeting and Record Date for payment of final dividend for the Financial Year 2025-26

NOTICE is hereby given that the 26th Annual General Meeting (‘AGM’) of the Members of Medi Assist Healthcare Services Limited (‘Company’) is scheduled to be held on **Thursday, September 24, 2026 at 10.30 a.m. (IST) through Video Conferencing (VC) facility / other audio-visual means (OAVM)**, in compliance with all the applicable provisions of the Companies Act, 2013 (‘Act’) and the rules made thereunder and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (‘SEBI Listing Regulations’), read with Ministry of Corporate Affairs (‘MCA’) General Circular Nos. 14/2020 dated April 8, 2020, 17/2020 dated April 13, 2020, and subsequent circulars issued in this regard, the latest being 03/2025 dated September 22, 2025, issued in this regard, to transact the business that will be set forth in the Notice of the meeting.

In compliance with the above circulars, electronic copies of the Notice of the AGM and Annual Report of the Company for the Financial Year (‘FY’) 2025-26 will be sent only by electronic mode to those Members whose email addresses are registered with the Depository Participant(s)/Company. The same will also be made available on the Company’s website at www.mediasist.in and websites of the Stock Exchanges i.e. BSE Limited at www.bseindia.com and National Stock Exchange of India Limited at www.nseindia.com and on the website of - MUFG Intime India Private Limited (‘Registrar and Share Transfer Agent/RTA’) at www.in.mpmc.mufg.com

Members holding shares in dematerialised mode are requested to register/ update their email addresses with the relevant Depository Participants (DP). Additionally, in accordance with Regulation 36(1)(b) of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, a letter shall be sent to those shareholders whose e-mail ID’s are not registered, containing the web-link and exact path of Company’s website from where Annual Report for FY 2025-26 can be accessed.

Members, who are holding shares in physical form and have not updated their e-mail IDs with the Company are requested to furnish details to the Company’s RTA at enotices@in.mpmc.mufg.com

In terms of Section 108 of the Act read with Rule 20 of the Companies (Management and Administration) Rules, 2014, as amended from time to time, the Secretarial Standard on General Meetings (‘SS-2’) issued by the Institute of Company Secretaries of India and Regulation 44 of the SEBI Listing Regulations, the Company will be providing to its Members the facility of remote e-Voting before as well as during the AGM in respect of the business to be transacted at the AGM. The manner of voting remotely for Members holding shares in dematerialised and physical mode will be provided in the AGM Notice.

Notice of the 26th AGM will be sent to the Members in accordance with the applicable laws on their registered email-ID in due course.

Final Dividend & Record Date

The Board of Directors of the Company at their meeting held on May 9, 2026 have recommended a final dividend of Rs. 2/- per equity share on face value of Rs. 5/- each for the FY ended March 31, 2026, subject to approval by members at ensuing Annual General Meeting. The Board has fixed **September 11, 2026** as the **Record Date** for determining the members entitled to receive the said dividend.

Tax on Dividend

Members may note that the Income Tax Act, 2025, mandates that dividends paid or distributed by a Company shall be taxable in the hands of shareholders. Therefore, Company shall be required to deduct TDS at the rates applicable to each category of shareholder as per the relevant provisions of the Act.

To enable determination of appropriate TDS rates, Members are requested to verify correctness of their records (including residential status, Aadhaar number, PAN and category) and update the same with their depositories (where shares are held in dematerialized mode) and with the Company’s RTA (where shares are held in physical mode).

Also, members are requested to submit the relevant documents/ declarations, in accordance with the provisions of the Income Tax Act.

NOTICE TO THE SHAREHOLDERS

SPECIAL WINDOW : RE-LODGE MENT FOR TRANSFER AND DEMATERIALISATION OF PHYSICAL SECURITIES

Securities and Exchange Board of India (“SEBI”) had dispensed with the transfer of physical shares from 1 April 2019. However, a special window was opened by SEBI from 7 July 2025 to 6 January 2026 for re-lodgement of physical share transfer requests originally submitted before 1 April 2019 but returned due to deficiencies in documentation.

In order to facilitate the Investors, the SEBI has, by its Circular No. HO/38/13/1(2)2026-MIRSD-POD/I/3750/2026 dated 30 January 2026, decided to open another special window for one year from 5 February 2026 to 4 February 2027. While lodging request under special window for transfer of physical shares, one of the mandatory requirements is submission of original share certificate, the details of which is as follows:

Execution date of transfer deed	Lodged for transfer before 1 April 2019	Original Security Certificate Available?	Eligible to lodge in the current window?
Before 1 April 2019	No (it is fresh lodgement)	Yes	✓
	Yes (It was rejected / returned earlier)	Yes	✓
	Yes	No	x
	No	No	x

Further, the following cases will not be considered under this window:
• Cases involving disputes between transferor and transferee.
• Securities which have been transferred to Investor Education and Protection Fund (“IEPF”).

NOTE : All shares re-lodged during this period will be processed through the transfer-cum-demat route i.e. they will only be issued in dematerialised (“demat”) form after transfer and it will be subject to a lock-in for one year.

Shareholders who have missed the earlier deadline for re-lodgement of transfer deeds are once again encouraged to take advantage of this opportunity by providing the necessary documents to the Company’s Registrar and Share Transfer Agent (“RTA”), MUFG Intime India Private Limited and in case of any clarification, shareholders concerned can get in touch with the Company/ RTA at any of the addresses given below:

Sakthi Finance Limited	MUFG Intime India Private Limited
No. 62, Dr. Nanjappa Road Coimbatore - 641 018 Tel : (0422) 4236200 E-mail : investors@sakthifinance.com Website : https://sakthifinance.com/	“Surya”, 35, Mayflower Avenue, Behind Senthil Nagar, Sowripalayam Road, Coimbatore - 641028 Tel : (0422) 2314792 / 4958995/ 2539835/36 Email : investor.helpdesk@in.mpmc.mufg.com Website: https://in.mpmc.mufg.com/

Update of KYC and conversion of physical shares into dematerialised form:
Shareholders holding shares in physical form are encouraged to update their KYC details and convert their physical shares into demat form. Holding shares in dematerialised form offers multiple benefits and eliminates the risks associated with the physical share certificates.

Amgen to set up R&D centre in Hyderabad

Hyderabad: Amgen plans to open a Science and Innovation Centre at Genome Valley in Hyderabad, as part of its global R&D network of seven laboratories. “The new centre in Genome Valley expands the way we integrate experimental science with data and technology across our global research capabilities and complements our strong US-based Research and Development footprint,” Jay Bradner, MD, Executive Vice President of R&D, AI and Data at Amgen, said. **OUR BUREAU**

TN House seeks scrapping of NEET; BJP walks out

Chennai: The Tamil Nadu Assembly adopted a resolution urging the Union government to scrap NEET and facilitate admission to UG medical courses based on Class 12 marks. The resolution, moved by Health Minister KG Arunraj, said that the State government had consistently emphasised that NEET is against social justice and equality and also against the rights of the States insofar as medical education is concerned. BJP MLA Bhojarajan opposed the resolution and staged a walkout. **PTI**

Government to promote access to GI products

New Delhi: The MSME Ministry and the Department for Promotion of Industry and Internal Trade have signed an agreement to boost commercialisation and market access of Indian GI products, the government said . The agreement is expected to enhance the livelihoods of indigenous artisans, weavers, and producers, while also strengthening the One District One Product ecosystem in the country. **PTI**

FCRA Bill: Centre considering JPC route amid opposition in Parliament

REJECTED. Opposition parties have allied against the Bill, demanding withdrawal in its present form

Our Bureau
New Delhi

With two days left for Parliament’s Monsoon Session to get over, the government is unlikely to initiate a discussion on the Foreign Contribution (Regulation) Amendment (FCRA) Bill, 2026, on Wednesday. It may refer the legislation to a Joint Parliamentary Committee as the opposition parties, especially Congress, DMK, TMC and Samajwadi Party, have hardened their stand and want the Bill to be withdrawn or scrapped in the present format.

Government sources said sending the Bill to the Joint Parliamentary Committee (JPC) is one of the two options being considered. It is being weighed as the NDA does not want to pass the legislation without proper discussion, given the international interest in the proposed amendments sought to the FCRA Act.

Key among the changes, which are being opposed by religious bodies and the Op-

UNDER THE LENS. The FCRA Bill seeks strict government oversight on NGOs and foreign funding **SANSAD TV**

position, is that the Bill seeks to make amendments applicable retrospectively and that a government entity would take over the possession of an institution if its FCRA registration is over or it fails to get it renewed. However, the organisation will get ownership back on the renewal of the registration.

The other option is to make attempts in the next session of Parliament to initiate a debate on the Bill, said sources. Introduced in the Lok Sabha on March 25 seeking government oversight on

non-governmental organisations’ (NGOs) functioning and foreign funding, the Bill was to come up for discussion on Wednesday in Parliament, Mizoram Chief Minister Lalduhoma had told reporters after meeting Union Home Minister Amit Shah on August 7.

The CM, however, said Shah had assured that the Bill would not have retrospective effect.

Though it was not on the agenda, Opposition parties, including the Congress and the TMC, raised the issue

during the Rajya Sabha’s Business Advisory Committee (BAC) meeting, asking when the FCRA Bill would be taken up for discussion.

To that, the government replied that a decision would be made in due course. Others like the BJD have openly expressed their stand that the Bill could be sent to a JPC ment for further scrutiny.

During the meeting, the BAC allotted two hours for The Mines and Minerals (Development and Regulation) Amendment Bill, 2026; two hours for The Tribunals Reforms Bill, 2026; three hours for The National Co-operative Development Corporation (Amendment) Bill, 2026; and 1.5 hours for The Kerala (Alteration of Name) Bill, 2026.

The National Co-operative Development Corporation (Amendment) Bill, 2026, and The Kerala (Alteration of Name) Bill, 2026, were passed by the LS on Tuesday.

‘OPPOSITION STALLING’ Later, Deputy Chairman Harivansh announced the

decisions of the BAC in the House.

Union Parliamentary Affairs Minister Kiren Rijiju accused the Congress and other Opposition parties on Tuesday of stalling Parliament to avoid a debate on the student protests, asserting that the government is ready for a full discussion and a response from Home Minister Amit Shah.

“Yesterday, we made an offer that the government is ready for a complete and detailed discussion over everything which happened around the students’ protest. We had the reply ready and Home Minister Amit Shah was ready too. But they (the Opposition) are not letting a discussion happen,” Rijiju said.

The logjam in Parliament continued, with NDA MPs holding a protest outside Parliament to counter the Opposition on the students’ protest issue. Rijiju said the Opposition continued to prevent the House from functioning despite the government’s readiness to hold the discussion.

Withdraw FCRA Amendment Bill, TN Assembly urges Centre

Our Bureau
Chennai

The Tamil Nadu Assembly on Tuesday passed a resolution urging the Union government to withdraw the Foreign Contribution (Regulation) Amendment Bill, 2026, in its present form.

DEEP CONCERN Rajmohan, Minister for School Education, Tamil Development, Information

and Publicity, moved the Bill, stating that the House expressed its deep concern over the provisions in the Bill in its present form.

The concern was related to the transfer, management, disposal and sale of the assets of charitable organisations to the government on various grounds, such as expiry of FCRA registration, non-renewal, refusal of renewal, cancellation of registration or surrender of registration.

Rajmohan, TN Minister for School Education, Tamil Development, Information and Publicity

These provisions may adversely affect the autonomy of charitable organisations

Provisions may adversely affect the autonomy of charitable organisations educational and social welfare institutions.

and, in particular, the functioning of educational and social welfare institutions

run by minorities, it felt. Any amendment must ensure the principles of natural justice, proportionality, protection of property rights, legitimate expectation and federalism.

While ensuring transparency and accountability, it must also protect the rights of lawfully functioning charitable, educational, medical, religious, cultural and social welfare organisations, urged the State government in the resolution.

+ Construction equipment vehicle sales up 46% in July

Growth spurt

Tractor OEM	July 2025 sales (units)	Market share (%)	July 2026 sales (units)	Market share (%)
JCB India	1,839	49	2,561	47
Action Construction Equipment	415	11	652	12
Escorts Kubota (CE)	213	6	462	8
Ajax Engineering	199	5	363	7
Bull Machines	112	3	182	3

Source: FADA

T E Raja Simhan
Chennai

The construction equipment (wheeled) retail sales recorded a sharp recovery in July 2026, rising 46 per cent year-on-year to 5,501 units from 3,766 units in the same month last year. Industry trackers attribute the growth to the lower base last year, the implementation of the BS-V emission norms and a pick up in infrastructure activity.

The last time the sector reported growth was in June 2025.

STRONG GROWTH

The growth was broad-based among the leading manufacturers, with the top five OEMs registering double-digit growth, according to data from the Federation of Automobile Dealers Associations (FADA), the apex national body of the automobile retail industry. JCB India retained its dominant position and Action Construction Equipment the second place.

JCB India retained its dominant position and Action Construction Equipment the second place

growth in wheeled construction equipment retail sales in July should be viewed in the context of a favourable base, said Poonam Upadhyay, Director, Crisil Ratings.

An early and extended monsoon last year curtailed construction activity, while delayed and uneven rainfall this year enabled projects to continue across several regions.

ANNUAL GROWTH

As a result, the annual growth appears strong even though month-on-month gains were more measured, she said.

Escorts Kubota, in its July business update, said that the construction equipment industry maintained its growth momentum in July 2026, supported by a lower base in the corresponding period last year.

This followed the implementation of the BS-V emission norms, along with the sustained infrastructure activity and continued government capex, robust project pipeline and increasing export opportunities continuing to support the industry’s near-term outlook, the company said. However, the ongoing geopolitical developments remain an area of watch that could impact ground sentiment, commodity costs and overall business conditions, it added.

Andhra Pradesh to redevelop slums on the lines of Mumbai’s Dharavi model

G Naga Sridhar
Hyderabad

The Andhra Pradesh government has cleared a new redevelopment model for slums, modelled on Mumbai’s Dharavi redevelopment, with a pilot project in Visakhapatnam.

The government will leverage the value of development rights to create modern housing for existing residents while minimising the direct financial burden on the exchequer.

DEVELOPMENT RIGHTS The Greater Visakhapatnam Municipal Corporation

(GVMC) will redevelop the Velampeta slum under the Visakhapatnam Economic Region (VER) Programme on a design, build, finance and transfer (DBFT) basis, with a high-rise having 177 housing units on a 1,986.45 sq m site. A key feature of the model is that instead of relying entirely on conventional government funding, the successful private bidder will undertake redevelopment against transferable development rights (TDR).

The government has permitted a TDR ratio of up to 1:4 as the maximum bidding parameter, with the project to be awarded through a competitive tender process.

SC asks govt to consider plea for rapid response to online, deepfake crimes

Krishnadas Rajagopal
New Delhi

The Supreme Court on Tuesday asked the Centre to consider a petition seeking a time-bound emergency mechanism against online threats of rape, murder or physical violence, non-consensual intimate or AI-generated material and harmful deepfake impersonations.

A Bench, headed by Chief Justice of India Surya Kant, said the issues raised by petitioner-advocate NK Goswami raised serious concerns, including that digital harm travels at technological speed, causing instant and often irreparable damage to ordinary persons, while conventional legal remedies moved at a slow and institutional pace, and were frequently ineffective. The court asked the Ministries of Home, Law, Information and Technology, National Commissions for Women and Protection of Child Rights to examine the plea to frame a mechanism for emergency response to online threats,

doxxing, child exposure and deepfake impersonation.

JUSTICE DELAYED...

“What is the value of a legal remedy if it arrives only after the damage has become irreversible?” Goswami asked the court.

The court recorded the plea for the setting up of a “narrow, time-bound, URL-specific and judicially or legally supervised emergency mechanism against some of the gravest forms of online harm — specific threats of rape, murder or physical violence; dangerous doxxing; disclosure of children’s school, location and other private particulars; non-consensual intimate or AI-generated material; and harmful deepfake impersonation.”

The plea said that “an on-

line threat could be posted in seconds. A residential address can be circulated in minutes. A child’s school details can be copied across platforms. A fabricated video can be downloaded, mirrored, archived and re-distributed thousands of times before the victim even discovers it.”

“By the time an FIR is registered, a civil injunction is sought, a platform grievance is processed or a criminal prosecution begins, the original injury may already have multiplied beyond recall,” Goswami submitted.

Medical devices industry seeks regulatory authority, governance structure

PT Jyothi Datta
Mumbai

Close to a dozen medical device and civil society organisations, among others, have sought a National Medical Devices Regulatory Authority, with the autonomy of telecom body TRAI or the insurance sector’s IRDAI and the regulatory oversight of food authority FSSAI.

In their letter to Union Health Minister JP Nadda, they said medical devices continue to be seen as “an adjunct to pharmaceuticals,” despite scientific, engineering and regulatory distinctions between the two.

PRESENT APPROACH

Calling for a re-examination of the draft Drugs, Medical Devices & Cosmetics Bill, 2026, the letter said the present approach undermined India’s ambition to become a global medical device manufacturing hub, reduce import dependency and achieve exports exceeding ₹1 lakh crore in the next 5-7 years.

The 11 associations that jointly submitted the letter represent manufacturers, traders, healthcare providers, hospitals, clinicians and patient advisory groups. The “drug-centric framework” of the draft is one of the key concerns they raised, with the Bill retaining pharma-style terminology such as “adulterated” and “spurious,” applying criminalisation to engineering deviations.

TECHNICAL LAPSES

Criminalisation of technical lapses, the letter pointed out, includes imprisonment of one to seven years for labelling errors, documentation lapses and licensing issues, contrary to global norms where administrative

enforcement is the standard, the letter said.

It also pointed to expanded police-style powers, arrest and cessation powers for inspectors, creating “a climate of regulatory fear that deters investment.”

“Despite repeated recommendations, the Bill fails to establish a dedicated National Medical Devices Regulatory Authority,” it said, despite the industry’s ask being echoed by government panels and agencies.

The reference was to the Parliamentary Standing Committee Reports 138 & 146 that recommended a separate law and department for medical devices; NITI Aayog’s Draft Medical Devices Bill (2019), which proposed a modern, engineering-aligned framework; and the World Health Organizations’s global principles, emphasising risk-management, lifecycle safety and shared responsibility.

The draft omits engineering concepts and standards, such as biocompatibility (ISO 10993), usability engineering (IEC 62366) and software lifecycle safety (IEC 62304).

PUNITIVE FRAMEWORK

“The Bill applies the same punitive framework across low-risk and high-risk devices, ignoring risk-proportionate regulation,” it added.

“India’s medical devices sector cannot be shackled by a pharma-centric law. Eleven national associations... urge the government to enact a standalone Medical Devices Act. Without this, India risks discouraging investment, innovation and patient safety — undermining Make in India and Atmanirbhar Bharat,” said Rajiv Nath, Forum Coordinator, Association of the Indian Medical Device industry.

TN seeks coal linkage extension for Ennore TPS

Rishi Ranjan Kala
New Delhi

The Coal Ministry’s Standing Linkage Committee (Long-Term) for the power sector met on Tuesday to review the Tamil Nadu Power Generation Corporation’s (TNPGL) request for one-year extension of coal linkage for the Ennore Thermal Power Station expansion project.

The TNPGL requested the extension under the revised SHAKTI policy as the present validity ended on August 7, the Coal Ministry said.

The power generation arm informed the panel that the

due date for the tender floated for procurement of power from the ETP project had been extended to July 15 from May 20, necessitating the extension. The delay followed a pre-bid query relating to the project completion timeline, which is based on the Tamil Nadu Infrastructure Development Board’s suggestion.

The board informed TNPGL that a decision could be taken only in consultation with the State government, the Ministry said.

TNPGL has stated that as the due date of tender opening is extended to July 15, and the successful bidder will be identified thereafter, it added.

Akasa Air consolidated net loss widens 37%

Mumbai: Akasa Air's consolidated net loss widened 37 per cent to ₹2,716 crore in FY 2026 due to rupee depreciation. The airline had reported a net loss of ₹1,983.5 crore in FY 2025. While revenue from operations rose 37 per cent year-on-year, the airline slipped further into the red as a weak rupee impacted operating costs and resulted in a mark-to-market loss. Last fiscal, Akasa Air added 10 aircraft, increasing capacity by 30 per cent, while increasing its network to 32 destinations. "While our unit economics have improved significantly, this improvement is masked at the net loss level by a significant accounting related mark-to-market foreign exchange loss," the airline's Chief Financial Officer Ankur Goel said. "We remain firmly on the path of profitability," he added. *OUR BUREAU*

₹882-crore tender for TB diagnostic kits raises concerns over favouritism

RED FLAG. Govt should have opened bidding to generic kits that fulfil necessary specifications, say experts

Ankita Upadhyay
New Delhi

PROCUREMENT QUERY. Union Health Ministry officials said the rate contract was intended to support more than 9,000 TrueNat machines already available in the public health system

Experts questioned why the tender identifies TrueNat by name instead of inviting bids for generic TB molecular diagnostic kits meeting prescribed technical specifications.

KEY DIFFERENCES

The issue is significant because an ICMR assessment published in February 2026 compared four molecular diagnostic tests — Quanti-Plus, PathoDetect, TrueNat and GeneXpert — and found that all four fell within the World Health Organization's acceptability criteria for

sensitivity and specificity. The assessment compared prices. QuantiPlus was priced at ₹245 per test, compared with approximately ₹723 for PathoDetect, ₹834 for TrueNat and ₹1,388 for GeneXpert.

For 100 patients, the estimated costs were ₹34,091 with QuantiPlus, ₹72,300 with PathoDetect and ₹83,400 with TrueNat.

The ICMR report also highlighted differences in the diagnostic systems. TrueNat is a closed system compatible with its own testing devices, while Quanti-

Plus was described as an open kit that can be used with RT-PCR machines available at district and tertiary-care hospitals. It said governments may negotiate prices before procurement for further savings.

"A procurement seeking a TB diagnostic kit could ordinarily specify the required technical parameters and allow manufacturers whose products meet those standards to compete on price and other relevant criteria. The present tender, however, identifies TrueNat by name," said an official on condition of anonymity.

GOVT RESPONSE

The official said the government should explain why the tender was not based on technical specifications.

However, the government said the tender was structured around the existing TrueNat infrastructure. Responding to queries, Union Health Ministry officials said

the rate contract was intended to support more than 9,000 TrueNat machines already available in the public health system across the country nationally. The current cost, they said, is ₹588 per test, excluding taxes.

The Ministry also said QuantiPlus was not considered because it did not diagnose multidrug-resistant TB. Its technology is currently approved for detection of TB, but not drug resistance, officials said.

Therefore, they said, its cost should be compared with traditional sputum microscopy, costing about ₹50 per test, rather than existing nucleic acid amplification tests currently used.

Officials said QuantiPlus is expected to cost about ₹340 per test. If the technology adds drug-resistance detection, it would be comparable with other NAAT technologies capable of diagnosing both TB and drug-resistant TB, they said.

Godrej Consumer bets on Africa turnaround architect Malbari to lead from front

Amit Vijay Mohile
Mumbai

Aasif Malbari, MD & CEO, Godrej Consumer Products

Godrej Consumer Products Ltd (GCPL) is handing over its next phase of growth to Aasif Malbari, a finance veteran turned business operator whose career spans the turnaround of GCPL's Africa operations, Tata Motors' electric vehicle expansion, and more than 25 years across FMCG and automobiles.

SPOT LIGHT.

Malbari will take over as MD and CEO from August 12 for a five-year term, subject to shareholder approval, succeeding Sudhir Sitapati, who resigned with effect from August 11. The elevation ensures leadership continuity at a time when GCPL's growth is accelerating. Since becoming Global CFO in 2023, Malbari was closely involved in shaping financial strategy, strengthening business performance and driving growth. His responsibilities spanned finance, business partnering, supply chain, investor relations and performance management across markets.

His strongest operating credential comes from Africa. As President of the business, Malbari helped expand its margin-accretive FMCG portfolio through air care while strengthening the legacy hair fashion business, raising EBITDA margins from around 9 per cent in FY24 to approximately 15 per cent in FY26.

"Aasif brings deep com-

mand of GCPL's strategic and operating rhythm... It's exactly the kind of ambitious, disciplined execution rigour GCPL needs across all our businesses for our next chapter," Executive Chairperson Nisaba Godrej said.

KEY ROLE

Before joining GCPL, Malbari was CFO of Tata Passenger Electric Mobility and Director at Tata Motors Passenger Vehicles, where he played a key role in reorganising and scaling the businesses, including leading a \$1 billion fundraising exercise for the electric vehicle business. Earlier, he worked across finance and business roles at Hindustan Unilever.

For Malbari, the handover shifts the mandate from fixing individual businesses to delivering the same combination of growth, margin improvement and execution excellence across GCPL.

Industry watchers say his elevation signals an effort to build on the growth momentum established under Sitapati while replicating the operating discipline and performance improvement achieved in Africa.

Zee expects sports business to bolster revenue in Q2 FY27

Vallari Sanzgiri
Mumbai

Rallying around queries on its re-entry into sports, the management of Zee Entertainment Enterprises stressed that the real impact of its new sports properties, especially FIFA, will be felt in Q2 of FY27.

"The knockout stages were in Q2, so that's when the traction and advertising picked up. As we mentioned, we had limited time before the June 11 start. The traction has picked up in Q2. So, Q2 should also see a revenue boost, given the momentum across these properties," said Puneet Goenka, CEO, Zee Entertainment, during a conference call.

NEW AVATAR

Comparing the company's renewed sports vision to its earlier avatar, Zee stressed that football would never have reached even 50 million viewers in the old days,

Puneet Goenka, CEO, Zee Entertainment

whereas it now reports 400 million viewers.

Calling this a significant number for Zee, Goenka said the company plans to monetise its sports properties in a very prudent manner.

"We will ensure that this business is sustained for us over the long term. We are also seeing a lot of other rights owners approaching us for partnerships," said Goenka.

FOCUS ON SUBSCRIBERS

Further, the management expects subscription rev-

enue to increase significantly in Q2 compared with Q1. The company's subscriber base more than doubled in Q1, boosted by the FIFA announcements, alongside a sizeable non-sports consumer base.

Goenka said digital subscribers will continue with their plans as long as the company consistently provides content that consumers prefer and enjoy.

The management spoke about exploring international markets for subscription growth and looking for hybrid models. But the ongoing situation in West Asia had complicated the outlook for ad revenue.

"The advertising front is a little more challenging, given the current dynamics in the market. But we are confident that, given our market share is expected to improve significantly and with the festive season approaching us, we should be able to leverage these opportunities effectively," said Goenka.

PT Jyothi Datta
Mumbai

Over 80 per cent of multinational company Philips' innovations in artificial intelligence (AI), designed for global needs, is done in India, says Bharath Sesha, Managing Director, Philips India, outlining the growing role of AI in the Indian healthcare landscape.

"Bengaluru is where 85 per cent of our AI innovations get developed for global needs. So, it is really the hub of AI innovation for Philips globally. One in two Philips machines sold globally will have software that is developed in Bengaluru," Sesha told *businessline*.

FOCUS ON INNOVATION

The firm has centres in Bengaluru and Pune, and "over the last four to five years, we have invested in India — ₹1,750 crore, focused on manufacturing, innovation, building capabilities on

Bharath Sesha, Managing Director, Philips India

AI and software," he added.

"AI is not theoretical, AI is not futuristic, AI is already having an impact today.. from (an) access to care perspective," he said, citing the findings of their latest *Future Health Index 2026* report.

ROLE OF AI

Both physicians and patients are accepting the role of AI, he said, and there is a bit of scepticism too.

This is leading to a "hybrid model where care is provided by a mix of AI and clinician, but the clinician always preserves the over-

sight, the accountability and has the full authority to override whatever is being suggested by AI."

According to the report, the global research covered over 2,000 healthcare professionals and over 20,000 patients across 10 countries, including 200 healthcare professionals and 2004 patients in India.

INDIA FINDINGS

As per the report, AI is helping healthcare professionals use their time differently. "58 per cent of healthcare professionals in India report average annual time savings of at least 132 hours, equivalent to more than three full working weeks."

And this gives physicians more time with patients, th report added.

Pointing to clinical outcomes, it said, "48 per cent say AI has helped them identify or prevent a potential medical error at least three times in the past three months."
