The process is also available on the website of Association of Investment Bankers of India ("AIBI") and Stock Exchanges and in the General Information Document. The Bid Cum Application Form and the Abridged Prospectus can be downloaded from the websites of BSE Limited ("BSE") and National Stock Exchange of India Limited ("NSE"), and together with BSE, the "Stock Exchanges" and can be obtained from the list of banks that is displayed on the website of SEBI at www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFPI=yes&intmId=43, respectively as updated from time to time. For the list of UPI apps and banks live on IPO, please refer to the link: www.sebi.gov.in. UPI Bidders Bidding using the UPI Mechanism may apply through the SCSBs and mobile applications whose names appear on the website of SEBI, as updated from time to time, HDFC Bank Limited and ICICI Bank Limited have been appointed as the Sponsor Bank for the Offer, in accordance with the requirements of SEBI ICDR Master circular. For other related queries, please contact the Book Running Lead Managers ("BRLMs") on their respective email IDs as mentioned below. For UPI related queries, investors can contact NPCI at the toll-free number: 18001201740 and mail ID: ipo.upi@npci.org.in.

THE EQUITY SHARES OF OUR COMPANY WILL GET LISTED ON MAIN BOARD PLATFORM OF NSE AND BSE

In case of any revision in the Price Band, the Bid/ Offer Period will be extended by at least three additional Working Days after such revision in the Price Band, subject to the Bid/ Offer Period not exceeding 10 Working Days. In cases of force majeure, banking strike or unforeseen circumstances, our Company in consultation with the BRLMs, may for reasons to be recorded in writing, extend the Bid/ Offer Period for a minimum of one Working Day, subject to the Bid/ Offer Period not exceeding 10 Working Days. Any revision in the Price Band and the revised Bid/ Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges, by issuing a public notice, and also by indicating the change on the respective websites of the BRLMs and at the terminals of the Syndicate Members and Intimation to Self-Certified Syndicate Banks ("SCSBs"), the Designated Intermediaries and the Sponsor Banks, as applicable.

This is an Offer in terms of Rule 19(2)(b) of the SCRR read with Regulation 31 of the SEBI ICDR Regulations. This Offer is being made through the Book Building Process in compliance with Regulation 6(2) of the SEBI ICDR Regulations wherein not less than 75% of the Net Offer shall be available for allocation on a proportionate basis to Qualified Institutional Buyers ("QIBs" and such portion the "QIB Portion") provided that our Company, in consultation with the BRLMs, may allocate up to 60% of the QIB Portion to Anchor Investors on a discretionary basis in accordance with the SEBI ICDR Regulations ("Anchor Investor Portion"), of which 33.33% shall be reserved for domestic Mutual Funds and 6.67% shall be reserved for Life Insurance Companies and Pension Funds, subject to valid Bids being received from domestic Mutual Funds, Life Insurance Companies and Pension Funds at or above the price at which Equity Shares will be allocated to the Anchor Investors ("Anchor Investor Allocation Price"), in accordance with the SEBI ICDR Regulations. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the QIB Portion (excluding the Anchor Investor Portion) ("Net QIB Portion"). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIBs (other than Anchor Investors) including Mutual Funds, subject to valid Bids being received at or above the Net Offer Price. If at least 75% of the Net Offer cannot be Allotted to QIBs, then the entire Bid Amount (as defined hereinafter) will be refunded forthwith. However, if the aggregate demand from Mutual Funds is less than 5% of the Net QIB Portion, the balance Equity Shares available for allocation in the Mutual Fund Portion will be added to the remaining QIB Portion for proportionate allocation to QIBs. Further, not more than 15% of the Net Offer shall be available for allocation to Non-Institutional Bidders ("NIBs") of which (a) one third portion shall be reserved for NIBs with application size of more than ₹200,000 and up to ₹1,000,000; and (b) two-thirds of the portion shall be reserved for NIBs with application size of more than ₹1,000,000, provided that the unsubscribed portion in either of such sub-categories may be allocated to Bidders in other sub-category of the NIBs in accordance with SEBI ICDR Regulations, subject to valid Bids being received above the Offer Price and not more than 10% of the Net Offer shall be available for allocation to Retail Individual Bidders ("RIB") in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. All Bidders (except Anchor Investors) are required to mandatorily utilise the Application Supported by Blocked Amount ("ASBA") process by providing details of their respective ASBA accounts and UPI ID (in case of UPI Bidders (defined hereinafter) using the UPI Mechanism), in which case the corresponding Bid Amounts will be blocked by the SCSBs or under the UPI Mechanism, as applicable to participate in the Net Offer. Anchor Investors are not permitted to participate in the Anchor Investor Portion of the Net Offer through the ASBA process. For details, see "Offer Procedure" beginning on page 441 of the RHP.

Bidders/Applicants should ensure that DP ID, PAN, Client ID and UPI ID (for UPI Bidders bidding through UPI Mechanism) are correctly filled in the Bid cum Application Form. The DP ID, PAN, UPI ID and Client ID provided in the Bid cum Application Form should match with the DP ID, PAN, Client ID and UPI ID available for UPI Bidders bidding through the UPI Mechanism in the Depository database, otherwise, the Bid cum Application Form is liable to be rejected. Bidders/Applicants should ensure that the beneficiary account provided in the Bid cum Application Form is active. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPI ID (for UPI Bidders bidding through the UPI Mechanism) as provided in the Bid cum Application Form, the Bidder/Applicant may be deemed to have authorized the Depositories to provide to the Registrar to the Offer, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These Demographic Details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the

Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders/Applicants' sole risk. Investors must ensure that their PAN is linked with Aadhaar and are in compliance with the notification issued by Central Board of Direct Taxes notification dated February 13, 2020 and read with press releases dated June 25, 2021, September 17, 2021 and March 28, 2023 and any subsequent press releases in this regard.

CONTENTS OF THE MEMORANDUM OF ASSOCIATION OF OUR COMPANY AS REGARDS ITS OBJECTS: For information on the main objects of our Company, investors are requested to see "History and Certain Corporate Matters" beginning on page 256 of the RHP. The Memorandum of Association of our Company is a material document for inspection in relation to the Offer. For further details, see "Material Contracts and Documents for Inspection" on page 490 of the RHP.

For details of the share capital history and capital structure of our Company see "Capital Structure" beginning on page 97 of the RHP.

LISTING: The Equity Shares that will be offered through the Red Herring Prospectus are proposed to be listed on the Stock Exchanges. Our Company has received "in-principle" approvals from BSE and NSE for the listing of the Equity Shares pursuant to their letters each dated October 24, 2025. For the purposes of the Offer, the Designated Stock Exchange shall be NSE. A copy of the Red Herring Prospectus has been and the Prospectus shall be filed with the RoC in accordance with Sections 26(4) and 32 of the Companies Act, 2013. For details of the material contracts and documents available for inspection from the date of the Red Herring Prospectus until the Bid/ Offer Closing Date, see "Material Contracts and Documents for Inspection" on page 490 of the RHP.

DISCLAIMER CLAUSE OF SECURITIES AND EXCHANGE BOARD OF INDIA ("SEBI"): SEBI only gives its observations on the offer documents and this does not constitute approval of either the Offer or the specified securities stated in the Offer Document. The investors are advised to refer to page 421 of the RHP for the full text of the disclaimer clause of SEBI.

DISCLAIMER CLAUSE OF BSE: It is to be distinctly understood that the permission given by BSE Limited should not in any way be deemed or construed that the RHP has been cleared or approved by BSE Limited nor does it certify the correctness or completeness of any of the contents of the RHP. The investors are advised to refer to the page 421 of the RHP for the full text of the disclaimer clause of BSE.

DISCLAIMER CLAUSE OF NSE (the Designated Stock Exchange): It is to be distinctly understood that the permission given by NSE should not in any way be deemed or construed that the Offer Document has been cleared or approved by NSE nor does it certify the correctness or completeness of any of the contents of the Offer Document. The investors are advised to refer to page 422 of the RHP for the full text of the disclaimer clause of NSE.

GENERAL RISK: Investments in equity and equity-related securities involve a degree of risk and Bidders should not invest any funds in the Offer unless they can afford to take the risk of losing their entire investment. Bidders are advised to read the risk factors carefully before taking an investment decision in the Offer. For taking an investment decision, Bidders must rely on their own examination of our Company and the Offer, including the risks involved. The Equity Shares in the Offer have neither been recommended, nor approved by the Securities and Exchange Board of India ("SEBI"), nor does SEBI guarantee the accuracy or adequacy of the contents of this Red Herring Prospectus. Specific attention of the investors is invited to "Risk Factors" on page 30 of the RHP.

Chandra not to seek third term as Tata Sons Chairman

DISQUIET AT TOP. Differences with Noel Tata deepens leadership turmoil at holding firm

Aneesh Phadnis
Mumbai

N Chandrasekaran, popularly known as Chandra, on Wednesday announced that he will not seek a third term as Tata Sons Chairman starting February 2027 after failing to secure the backing of Tata Trusts Chairman Noel Tata for the top post.

Chandra's third term came up for a vote earlier in February.

However, the decision was deferred, and he faced tough questions from Noel Tata over losses in Air India and the Group's digital ventures. Massive capital allocation to new businesses, such as semiconductors, also came under scrutiny.

While Chandra's statement on Wednesday does not name Noel Tata, the reference was obvious.

Chandra said both the principal shareholders of Tata Sons — Sir Ratan Tata Trust and Sir Dorabji Tata Trust — had unanimously resolved and recommended the extension of his next term for five years. Subsequently, the resolution was

*All numbers are from consolidated finances

tabled before the Tata Sons board on February 24, but it failed to win the support of all the board members.

'NO UNANIMITY'

"The proposal was not carried through because one of the board members did not support it, and in the absence of unanimous support, I chose to defer the decision. It has been 6 months since that board meeting, and no resolution has been reached till date," Chandra wrote.

Chandra, who has been with the Tata Group for four decades, said he is stepping aside so that the board can decide on succession and en-

sure a proper transition.

"Tata Sons is a very large institution and there are many strategic projects that are at critical stages of execution. It is not only necessary to have a leader in place to lead the Group beyond February 2027, but clarity on leadership is also important for employees, investors, partners and other stakeholders," he said.

QUORUM ISSUES

The announcement comes days ahead of Tata Sons' Annual General Meeting, which has come under the spotlight over the participation of Trusts and quorum issues.

Chandra's reappointment as a director liable to retire by rotation is listed on the agenda. Clarity on leadership is essential as Tata Group's businesses span over 100 countries, serving 900 million consumers.

Chandra oversaw the Group's expansion after taking over the mantle after Cyrus Mistry's unceremonious exit in 2017. Chandra led the incubation of the first and only semiconductor fabrication plant.

While Group-level revenue and profitability rose 2x and 6x respectively, his tenure marked the resolution of major issues concerning the Group's telecom businesses.

"Chandra's resignation has rocked the boat and created uncertainty over the future direction of the Tata Group. The Group needs to take steps to ensure the confidence of all stakeholders. Other members of the Tata Sons board will have to play a more active role and closely review the functioning of Group companies until Chandra's successor is selected," said senior advocate HP Ranina.

More reports p2-3

A pragmatist or a martyr?

Raghuvir Srinivasan
Chennai

Following his decision to not seek reappointment for a third term as Tata Sons Chairman, it would be easy to portray N Chandrasekaran (Chandra) as a victim of boardroom intrigue. He's, after all, someone who took charge during a difficult time and helmed the Group over the last 10 years, piloting it into frontier businesses, most of which are still promises of value. And he was handpicked by none less than the titan Ratan Tata for the job.

COMMENT.

In fact, it was Tata's wish that Chandra should be given another term which is why the Tata Trusts passed a resolution recommending his reappointment in June 2025, two years ahead of the term's end. Yet, Noel Tata, despite being a signatory to the Trust resolution, reneged on the promise. And so, Chandra is a victim in the conclusion. But that would not quite be an accurate portrayal of the drama in the Tata Sons boardroom and in the Tata Trusts ever since Ratan Tata's passing in 2024.

The fact is that Chandra has proved to be quite the pragmatist. Even he cannot deny that he played every card at his disposal to continue in power.

N Chandrasekaran, Chairman of Tata Sons ANI

With Noel Tata, representing the Trusts, raising a red flag, there was little chance that Chandra would be able to function smoothly in the third term. Remember, with the earlier Trust resolution already backing him, the reappointment could not have been stopped. But life would've been tough post that for Chandra in the Tata Sons boardroom.

DOWN THE DRAIN

There have been some bets that he made that have gone horribly wrong as in Tata Digital, where billions of dollars have gone down the drain with little prospect of returns anytime soon. Likewise with many other capital intensive pursuits such as electronics, semiconductors and, of course, Air India. It can be argued though that most of these are long-gestation projects and, again, they're in national interest, which is what you'd expect from the House of Tatas.

In sum, Chandra's exit is

good as much for him as the Tatas because the boardroom intrigue had inevitably led to much fog in Tata Sons' wind-screen in recent times.

What is the next act in this drama? The incoming Chairman's identity will be important. For long, TV Narendran has been spoken of for the role. It helps that he shares a good relationship with Noel, has run Tata Steel with distinction and is also young at just 61 years. He can run the flagship over the next decade until a younger Tata is ready to take over.

END OF AN ERA

The episode also probably signals the end of an era at the Tata Trusts, where veterans such as Venu Srinivasan and Vijay Singh have been in power for a decade. The latter has already signalled his intent to not seek reappointment in any of the Trusts, and the former will probably do the same.

The entire episode has strong parallels to how Ratan Tata gradually assumed power, unseating one satrap after another in the 1990s.

Noel is no Ratan and cannot be too, and age is not on his side for him to assume power at the holding company. The environment is not the same too. But he can always call the shots from Tata Trusts.

History, they say, repeats itself. Only the characters change. Any takers?

Ramesh Rangarajan
appointed Chairman of
Kasturi and Sons Ltd.

Ramesh Rangarajan has been elected Chairman of Kasturi and Sons Ltd., the holding company of The Hindu Group Publishing Private Ltd (THGPPL), the publishers of *The Hindu*, *Businessline*, *Frontline* and *Sportstar*, and other subsidiaries. He is the son of the late Mr. S. Rangarajan, former Chairman of Kasturi & Sons Limited. Soon after graduation from Loyola College, Chennai, Mr. Ramesh Rangarajan joined The Hindu Group, where he served as Deputy General Manager before being appointed to the Board of Directors of Kasturi & Sons Limited. He has extensive experience in the advertising and circulation side of the news media business. He also serves on the Boards of Sporting Pastime India Limited, Hindcorp Resorts Private Limited, and Kasturi Estates Private Limited. Mr. Ramesh Rangarajan serves as an Independent Director on the Board of MRF Limited.

Bank of America to acquire 49.9% stake in Jio Credit for \$1.9 billion

Our Bureau
Mumbai

Jio Financial Services Ltd (JFSL) and Bank of America (BoFA) on Wednesday announced a strategic partnership, under which the US banking major will acquire up to a 49.9 per cent stake in Jio Credit (JCL), JFSL's wholly owned non-banking finance company (NBFC), through a preferential allotment of equity shares and warrants.

The proposed investment, of up to ₹18,268 crore (about \$1.9 billion), will initially give BoFA a 26.5 per cent equity stake in JCL, which can subsequently rise to 49.9 per cent upon the exercise of warrants, subject to regulatory and statutory approvals.

The partnership aims to

combine Jio Financial Services' digital reach, customer base and understanding of the Indian market with BoFA's global financial services expertise, risk management capabilities and technology experience. JCL, one of India's fastest-growing NBFCs, has built assets under management of ₹30,667 crore as of June 30, 2026, in just two years of operations.

SCALE, THE KEY

Commenting on the transaction, Reliance Industries Chairman Mukesh Ambani said India's aspiration to become a developed nation by 2047 requires a financial ecosystem built on scale, trust and inclusivity. "Our country's progress towards becoming *Viksit Bharat* by 2047 demands a financial ecosystem built on scale, trust and

inclusivity. Central to this journey is the democratisation of responsible credit, characterised by lower costs for the customer, absolute transparency and expanding access to capital as our economy grows," Ambani said.

He added that Jio Financial Services is focused on making finance simpler and more accessible for Indians through technology-led solutions. "Our strategic partnership with Bank of America is a pivotal milestone in this mission. By

combining our digital reach with Bank of America's global pedigree, we will eliminate friction in credit delivery for all Indians," he said.

MAJOR MARKET

Brian Moynihan, Chair and Chief Executive Officer of Bank of America, said, "India is one of the world's most important growth markets, and this investment reflects our confidence in its future."

Moynihan said the partnership would combine Jio Financial Services' scale and local expertise with BoFA's global reach and nearly 250 years of banking experience to expand access to financial services. The two partners will have equal representation on JCL's board, while the existing management team will continue to run the business.

No manipulation seen in new stock closing auction regime: SEBI chief

Akshata Gorde
Mumbai

The Securities and Exchange Board of India has so far not observed any manipulation in the new Closing Auction Session (CAS), SEBI Chairman Tuhin Kanta Pandey said on Wednesday.

Speaking on the sidelines of the MCX Global Commodity Conclave, Pandey said, "We are constantly looking at our data. You can see that mutual fund participation was 5-7 per cent earlier. It has increased to almost 25 per cent."

KEY MICRO REFORM

CAS is a big microstructure reform and a transparent market as its pricing is always visible, he said. "A lot of things are positive. But whenever there is a change, it takes time to prepare the

SEBI Chairman Tuhin Kanta Pandey at the MCX Global Commodity Conclave 2026 in Mumbai on Wednesday ANI

whole industry for that change."

CAS replaced the volume-weighted average price mechanism for determining closing prices. Under CAS, buy and sell orders are consolidated to arrive at a single closing price, with indicative prices displayed during the session and a random close to reduce the scope for last-

minute order placement to influence the price.

SEBI has been working with brokers and market participants to improve understanding of the mechanism. The regulator is also monitoring feedback and would consider tweaks if necessary, Pandey said.

The key issue at present is participation and the effectiveness of displaying indicative prices rather than a structural problem with CAS.

Pandey said several large brokers had started displaying indicative prices on their websites, with more expected to make them available on their apps by Friday.

WIDER FPI ACCESS

Pandey said the regulator was examining wider access for foreign portfolio investors to commodity indices and physically settled non-agricultural commodity

contracts through a calibrated framework.

The move is aimed at broadening the participant base as a deeper mix of commercial and institutional participants could improve liquidity, price discovery and the effectiveness of hedging.

IGST FRAMEWORK

SEBI is also engaging with the GST Council on an IGST-based framework for warehousing commodities delivered through exchanges, instead of requiring separate registrations across States.

Pandey said such a framework could make delivery-based contracts easier to execute.

SEBI is also preparing a detailed paper on derivatives trading, including the nature of losses across different categories of participants. Pandey said the paper is expected in 8-10 days.

Era of Chandra: Steering Tata Group towards the digital age

KEY HIGHLIGHTS. Its market cap more than trebled to ₹27 lakh crore, debt ratio declined significantly

Vallari Sanzgiri
Mumbai

N Chandrasekaran’s tenure at Tata Sons saw him steering the group towards new-age businesses, such as digital platforms and semiconductor manufacturing, while also re-entering sectors like aviation that had long been associated with the Tata brand.

THE LEGACY THAT WAS
Having secured a second term as Chairman in 2022, the Board appeared optimistic about Chandrasekaran’s vision for the group.

The Tata Sons he inherited after Mistry’s four-year tenure in 2017 had to navigate a troubled telecom business, particularly in the aftermath of a high-profile legal battle with Japanese telecom company NTT Docomo, as well as several shareholder disputes. Mistry had notably complained of being treated as a “lame duck” during his tenure at Tata Sons.

Despite these challenges, Chandrasekaran not only re-invested in neglected sectors but also ventured into new businesses. Under his leader-

ship, the group established Tata Electronics, expanded its design and manufacturing ambitions, and entered battery manufacturing through Agratas.

The group also launched Tata Digital, an omnichannel platform anchored by the Neu app, which integrates businesses across electronics (Croma), grocery (Big-Basket), pharmacy and diagnostics (Tata 1mg) and fashion (Tata Cliq).

The group also welcomed Air India back, nearly 69 years after the airline was nationalised. In telecom, Tata Sons embraced the indigenous telecom network stack by acquiring Tejas Networks.

Overall, the group’s capital expenditure increased from ₹8,131 crore in FY21 to ₹45,499 crore in FY26.

THE LEGACY THAT IS
“Chandrasekaran’s tenure brought stability to the Tata

Group after a turbulent period. He played a key role in consolidating businesses, improving strategic alignment across companies, and strengthening performance across several listed entities,” said Shriram Subramanian, Founder and Managing Director of proxy advisory firm InGovern.

The group also saw significant value creation under Chandrasekaran, with its market capitalisation more

than tripling to ₹27 lakh crore and its debt-to-equity ratio declining from 16 times to 0.9 times.

According to InGovern, the market capitalisation and stock performance of several Tata companies improved substantially over the last decade, reflecting investor confidence in the group’s direction.

Meanwhile, ‘Tata Sons’ net worth grew from ₹43,252 crore in 2018 to ₹1.79 lakh crore in 2026.

Experts said there was little reason for his successor to pull back from these commitments. However, with a new chairman set to take charge, questions remain over how the group will navigate its next phase of growth.

“Chandrasekaran’s decision comes as a surprise, yet he has chosen to do so on his own terms. His departure gives Tata Sons an opportunity to appoint a successor whose vision aligns closely with both Tata Sons and Tata Trusts, a priority for ensuring organisational harmony. The challenges for the next leader will be ensuring prudent capital allocation and turning around loss-making entities swiftly,” said Subramanian.

All careers end at some point, Chandra to Tata Group staff

Our Bureau
Mumbai

All careers end at some point of time and someone else has to step in, Tata Sons Chairman N Chandrasekaran told employees in a townhall address on Wednesday, just hours after announcing his decision to step down from the role.

QUICK REISE
Chandrasekaran, who joined Tata Consultancy Services as an intern in 1986, rose up the ranks over the years to become the tech-services company’s CEO, before he was anointed the Chairman of Tata Sons in 2017, following Cyrus Mistry’s

unceremonious exit. “I am not seeking a reappointment after February 2027 as my term comes to an end,” he told employees. “I spent 40 years in the group and did not know where it will take.”

“Tata is a revered name and

that is because of efforts of all employees like you. The group will continue to make progress and each one of you will also have opportunities,” he added, while also advising the staff to not pay attention to gossip and conspiracy theories.

Most complex succession test ahead for Tatas

Maresh Ravidas Nayak
Mumbai

N Chandrasekaran’s decision to step down after his tenure may have come as a surprise, but it also gives the Tata Sons board a rare opportunity to shape its next decade.

The challenge is not merely in finding a successor. It is in finding a leader capable of steering a conglomerate increasingly defined by technology, artificial intelligence, digital platforms, manufacturing scale-up, energy transition and new-age businesses. In many ways, succeeding Chandrasekaran could prove far more difficult than succeeding any Tata Chairman in recent memory.

IN THE MIX
Among the names doing the

rounds internally and in business circles, TV Narendran, CEO and Managing Director of Tata Steel, is seen as a leading contender.

Narendran has built a reputation as one of the group’s strongest operators, having managed complex global businesses, navigated commodity cycles and overseen key strategic transformations within Tata Steel. His leadership credentials, execution abilities and deep understanding of the Tata ecosystem make him a natural candidate for the top role.

THE NOEL FACTOR
Importantly, Narendran is also seen as being close to Noel Tata, a factor that could carry significance in a succession process where the alignment between Tata Sons and Tata Trusts will be closely scrutinised.

● **BAR IS HIGH**
Under Chandra’s leadership, Tata Sons sharpened its focus on aviation, digital transformation, EVs, electronics, chips, energy transition and emerging technologies

Noel Tata himself remains a serious contender, with his influence within the Tata Group and the Tata Trusts steadily growing. His prospects cannot be ruled out, particularly given the central role the Trusts play in the group’s governance structure.

History shows that leadership transitions within the group are often shaped by an individual’s ability to build consensus across Tata Sons, operating companies and the

Trusts. In several ways, Noel Tata occupies a position similar to the one Ratan Tata leveraged as he consolidated influence within the group decades ago. Whether as a candidate himself or as a key influence in the selection process, Noel Tata is expected to play a pivotal role in shaping the next phase of the Tata leadership.

Other names include P Venkatesalu, CEO of Trent, who is also said to be close to Noel Tata. The board could also consider Tata veteran Harish Bhat, particularly if it seeks a leader steeped in Tata values, consumer understanding and institutional memory.

THE LARGER ROLE
Succession at Tata Sons today is not merely about pedigree or managerial competence, said a senior industry official. Chandrasekaran

fundamentally redefined the Chairman’s role. The next chairman will, therefore, need to do much more than oversee a conglomerate. He or she must understand technology-led disruption, capital allocation across emerging sectors and the challenges of building businesses that may take years to generate returns.

That is why even critics of Chandrasekaran’s tenure have acknowledged the benchmark he established.

Speaking to *businessline* on condition of anonymity, a senior Tata official said, “He understands evolving business models, emerging industries and technology-driven opportunities. The next chairman must possess exactly those qualities: The ability to identify new opportunities early, deploy capital prudently and scale businesses for the future.”

Tata Group’s governance now under fresh scrutiny

Akshata Gorde
Mumbai

N Chandrasekaran’s decision not to seek another term after his tenure ends as Tata Sons Chairman has raised questions over how the Tata Group resolves differences at the top. His re-appointment had remained unresolved for six months amid differences among the board, the leadership and the Tata Trusts.

“Whenever the incumbent chairman of a holding company exits amid visible differences over strategy or tenure, investors naturally examine whether there is sufficient alignment between the promoters, the board and management,” said Shriram Subramanian of InGovern.

THE CONFLICT
The issue brings in governance concerns because Tata Trusts hold a controlling stake in Tata Sons. Tata Sons, in turn, holds substantial interests in major operating companies.

“The concern is whether their influence extends into informal control over commercial decisions or the boards of operating companies,” said Alay Razvi, Managing Partner at Accord Juris. “Ownership of Tata Sons does not make the trusts owners of the assets of every Tata company.”

The group’s next governance test will be to decide on a successor while resolving the differences between all stakeholders

MISTRY VS CHANDRA
The latest episode also revives concerns raised during Mistry’s exit. The two events are not identical; Mistry was removed by the board, while Chandrasekaran has decided not to seek reappointment, but both expose the difficulty of balancing an independent professional chairman with the expectations of the controlling shareholder, legal experts said.

“Repeated leadership disruption suggests that succession planning, allocation of authority and internal dispute-resolution mechanisms may not be sufficiently clear,” Razvi said.

Tushar Kumar, a Supreme Court advocate, said, “Chandrasekaran’s case is particularly instructive: The question of his reappointment remained unresolved for months. This does not, by itself, establish a failure of governance but it reveals the possibility of institutional paralysis where the expectations of controlling shareholders, the Board and individual directors cease to converge.”

‘Don’t rule out Noel Tata on experience alone; Ratan Tata faced similar doubts’

Amit Vijay Mohile
Mumbai

Noel Tata, Chairman of Tata Trusts, should not be ruled out from playing a larger role in the Tata Group on grounds of experience, former Tata Sons senior executive Mukund Rajan said on Wednesday.

Rajan said questions over Noel Tata’s experience echoed those raised when JRD Tata was considering Ratan Tata as his successor, arguing that the latter went on to demonstrate his leadership despite having never previously run a business remotely comparable with the scale and complexity of the Tata Group.

Noel Tata currently holds leadership positions across several major Tata companies, including as Chairman of Trent, Voltas and Tata Investment Corporation, and as Vice Chairman of Tata Steel and Titan Company. As Chairman of the principal Tata Trusts, he also represents the trusts that collectively control about 66 per cent of Tata Sons.

NEED CLARITY
That said, Rajan called for a swift clarity in succession, strong governance and management continuity to restore confidence across a group whose businesses, employees and shareholders span India and global mar-

[Noel Tata] is a fairly experienced business leader in his own right. The question is how will the board work with him and support him as a large shareholder...

MUKUND RAJAN
Former executive, Tata Sons

kets. “When Ratan Tata was being considered for the chairmanship, there were many similar voices about his experience,” Rajan told *businessline* in an exclusive interview.

Rajan cited Ratan Tata’s stewardship of NELCO, then a relatively small and struggling Tata company, saying he had not previously run an enterprise remotely comparable with the Tata Group before succeeding JRD Tata. Yet, Ratan Tata went on to “demonstrate tremendous vision and leadership qualities”, Rajan said, despite setbacks, including acquisitions and investments that did not work as planned and the Tata Nano.

The lesson, he argued, was that experience alone should not become the overriding test for Noel Tata.

“He is a fairly experienced business leader in his own right,” Rajan said. “The ques-

ance, while the boards must approve strategy and demand course correction when results fall short, he added.

ACTION PLAN
With Chandrasekaran not seeking reappointment, the focus is on how the group manages the transition.

Rajan laid out a detailed action plan: Quickly identify a successor with the necessary “credibility” and “credentials”; decide whether the next chairman should be executive or non-executive; appoint a strong CEO or managing director to hold the operational reins; remain open to talent from outside; review the board and bring in “new and different voices” where required; and preserve management continuity across key group companies.

Management continuity is particularly important given the group’s large investments across businesses, its “many, many lakhs” of employees in India and overseas and millions of shareholders.

Rajan cautioned against changes cascading through group companies during the transition and adding to the uncertainty.

Surprised at Chandrasekaran’s announcement that came without a simultaneous indication of what next, Rajan said it was an “unnecessary creation of uncertainty”.

Tata stocks lose ₹45,000 cr in market cap in one session

Anupama Ghosh
Mumbai

Shares of Tata Group companies came under broad selling pressure on Wednesday after N Chandrasekaran, Chairman of Tata Sons, announced he would not seek a third term after his current tenure ends in February 2027.

The development wiped off roughly ₹45,000 crore off the group’s combined market capitalisation in a single session.

BIGGEST CASUALTY
Tata Consultancy Services, the group’s largest listed entity with a market cap of ₹8.50 lakh crore, bore the sharpest absolute brunt, closing down 3.93 per cent at ₹2,349.70. The stock is down 27.20 per cent year-to-date and 22.59 per cent over the past year.

Tata Elxsi dropped 2.19 per cent to ₹3,711.90, extending its year-to-date loss to 28.77 per cent.

Tata Motors Passenger Vehicles declined 1.32 per cent to ₹343.00, now down 47.56 per cent over one year, the steepest one-year fall among the group’s listed entities.

Tata Motors Ltd, the demerged commercial vehicles entity listed in November 2025, bucked the trend, closing up 1.52 per cent at ₹457.05.

Tata Consumer Products

Under fire

	BSE close (₹)	% change
TCS	2,349.7	-3.71
Tata Steel	185.45	-1.57
TMPV	342.3	-1.92
Tata Consumer	1,061.4	-2.44
Tata Tech	840.75	-2.81

fell 1.49 per cent to ₹1,061.90, Tata Steel shed 1.09 per cent to ₹186.20, and Tata Communications declined 0.57 per cent to ₹379.45. Indian Hotels closed unchanged at ₹724.00.

Voltas and Tata Chemicals were marginal gainers.

Titan Company was the session’s standout, slipping just 0.57 per cent to ₹5,099.

Chandrasekaran took charge as Tata Sons Chairman on February 21, 2017, when the group’s combined listed market cap stood at around ₹8.46 lakh crore.

Wednesday’s close of ₹27.03 lakh crore represents a 3.19x expansion over nearly 10 years.

Tata Sons' listing: RBI unlikely to be swayed by Chandra's departure

N Chandrasekaran's decision not to seek a third term as the Executive Chairman of Tata Sons is unlikely to affect its fate at the hands of the Reserve Bank of India. The company's application to deregister as a core investment company, a move aimed at avoiding a mandatory listing, is awaiting a decision from the regulator.

Voices within Tata Trusts opposing the listing could gain greater influence, according to industry observers as Noel Tata, Director of Tata Sons, is increasingly seen as asserting control over the Trusts, which holds a 66 per cent stake in Tata Sons. However, the debt-laden Shapoorji Pallonji (SP) Group has consistently advocated for Tata Sons' listing so as to unlock value from its 18 per cent shareholding.

The RBI's decision on the de-registration application, said experts, will be based primarily on the systemic importance of Tata Sons rather than the changes in its leadership. The regulator is expected to assess the application against the backdrop of Tata Sons' extensive holdings across the Tata Group, including stakes in 17 listed companies and 16 unlisted entities.

IN UPPER LAYER

Incidentally, the RBI has included Tata Sons, the principal investment holding company of the Tata Group, in the list of non-banking financial companies in the Upper Layer (NBFC-UL), under the Scale-Based Regulation Framework for 2026-27. The central bank, however, clarified that this inclusion is without prejudice to the outcome of its de-registration application.

Meanwhile, Tata Trusts and the SP Group have reportedly initiated backchannel discussions, under which the Trusts may acquire the SP Group's stake in Tata Sons in a phased manner, potentially purchasing 5-6 per cent annually.

Some trustees within Tata Trusts are said to be wary that a public listing of Tata Sons could adversely affect the Trusts' philanthropic activities as a listed company may choose to reinvest a larger share of profits into new businesses rather than distribute dividends. For FY26, Tata Sons declared a dividend of ₹4,474.58 crore, significantly higher than the ₹2,622.91 crore declared in the previous financial year.

NUANCED STANCE

Sources indicated that the RBI is likely to adopt a nuanced stance on Tata Sons' de-registration request, particularly in light of the SP Group's plans to gradually exit its investment in the company and the extensive philanthropic activities undertaken by Tata Trusts.

"The Tata Sons listing question is fundamentally a regulatory matter. The final outcome is largely dependent on the RBI's decision regarding its upper-layer NBFC classification," said Shirram Subramanian, Founder and MD of InGovern, a corporate-governance research firm. "It is not something that any Chairman alone can determine. There is merit in obtaining regulatory clarity at the earliest. A prolonged uncertainty leaves a significant strategic question unresolved for Tata Sons and its stakeholders."

Regulatory certainty is preferable from a governance perspective, too, Subramanian added.

Whether the outcome is a listing or an exemption, a definitive decision will help the group plan its capital allocation and long-term strategy more effectively.

Chandra gives in after rift with Noel Tata

Suresh P Iyengar
Mumbai

Tata Group veteran N Chandrasekaran, after nearly 40 years with the group, had to face the twin challenges of stemming the decline in business prospects and mending his worsening relationship with Tata Trusts Chairman Noel Tata before deciding to hang up his boots.

Chandrasekaran had a meteoric rise in the Tata Group and was chosen by Ratan Tata to head Tata Sons. He joined Tata Consultancy Services as a trainee in 1987, rose to become its CEO before taking over as the Chairman of Tata Sons in January 2017.

NEW AGE BETS

The Tata Group, under the stewardship of Chandrasekaran committed substantial capital to many long-gestation, new age businesses, including aviation, digital businesses, electronics, semiconductors and batteries, which continue to remain capital guzzlers.

Chandrasekaran's decision not to seek reappointment when his term ends follows months of friction driven by policy differences with Noel Tata regarding capital allocation, gov-

ernance and the potential listing of Tata Sons. The aviation business under Air India and Air India Express reported a combined loss of ₹22,238 crore in FY26, more than double the ₹10,859 crore loss in the previous year. Tata Digital reported a loss of ₹4,974 crore during FY26.

In fact, Chandrasekaran himself told shareholders that the turnaround of the airline business would be a five-to-10-year journey.

Apart from this, the profit flow from TCS, the crown jewel of the Tata Group, also came under pressure due to margin disruptions caused by artificial intelligence (AI) across various sectors.

However, Tata Sons, the

holding company for the group's businesses, reported a 22 per cent increase in net profit to ₹31,961 crore in FY26. The Tata Sons board reviewed the turnaround strategy for loss-making businesses, including Air India, Tata Digital and Tata Electronics, amid the soaring financial burden of these new ventures.

The Tata Group has had to contend with the fatal Air India crash, pressure on its technology business from the global shift toward AI and a cyberattack affecting Jaguar Land Rover.

BIZ TURBULENCE

Besides turbulence on the business front, Noel Tata had also sought a commitment that Tata Sons would never be publicly listed, which Chandrasekaran was unwilling to guarantee due to regulatory and strategic flexibility considerations.

The RBI, in its latest list, retained Tata Sons as an upper layer NBFC, which requires mandatory listing on stock exchanges. This was in contrast to Tata Sons' efforts to remain private by repaying its debts and surrender its NBFC registration.

Nearly a decade after the unceremonious exit of Cyrus Mistry, Tata Sons is back to square one in its search for a captain.

Struggling BigBasket emerges as key test for Tata Digital

Jyoti Banthia
Bengaluru

With N Chandrasekaran set to leave Tata Sons, the spotlight is shifting to Tata Digital's portfolio of new-age businesses, with BigBasket emerging as one of the group's most expensive and challenging bets.

BigBasket's mounting losses have become a key concern for Tata Digital, even as the online grocery company tries to catch up with quick-commerce rivals that have built a significant lead in the market.

WIDENING LOSSES

Innovative Retail Concepts, which operates BigBasket's consumer-facing business, reported a 66 per cent year-on-year increase in losses to ₹3,073 crore in FY26 from ₹1,850 crore in FY25. Revenue grew just 7.7 per cent to ₹8,223 crore from ₹7,634 crore, according to Tata Sons' FY26 annual report.

The numbers highlight the difficult economics of BigBasket's transition from a scheduled online grocery business to a quick-commerce player. The company began shifting towards quick commerce in FY25 and accelerated investments in its BBNow business, dark stores and fulfilment infrastructure in FY26.

However, the investments have so far not translated into comparable revenue growth. BigBasket's losses in FY26 alone accounted for nearly a third of the ₹8,527 crore it has accumulated since Tata Digital acquired the company in May 2021.

The challenge is particularly stark, given the market BigBasket is trying to compete in.

Industry estimates peg Blinkit's market share at around 45 per cent, followed by Zepto at 25 per cent and Swiggy Instamart at 23 per cent. BigBasket is estimated to have about 5 per cent.

This leaves BigBasket playing catch-up in a market where scale, dark-store dens-

ity and delivery speed have become critical competitive advantages.

The company has now brought in Amit Nanda, a former Amazon executive, as its Chief Executive Officer. Nanda's appointment comes

at a critical juncture, with the company needing to improve its unit economics while narrowing the gap with its better-scaled rivals.

For Tata Digital, the issue is not simply BigBasket's current losses but whether con-

tinued capital deployment can materially change its competitive position.

Tata Digital reported a consolidated loss of ₹4,974 crore in FY26, widening from ₹4,610 crore a year earlier. Revenue increased nearly 12 per cent to ₹35,990 crore. Tata Sons' direct investment in Tata Digital stood at ₹22,903 crore as of March 2026.

"The Tata Group's newer businesses are the ones that will be in the limelight. Within Tata Digital, the loss-making status of newer businesses such as BigBasket is not necessarily a major concern because businesses in new spaces have long gestation periods and are backed by patient capital," said Harish Bijoor, brand strategy specialist.

But BigBasket's position in quick commerce makes the question of capital deployment more pertinent, he said.

"What is important is whether there is a clear go-to-market strategy for Tata Digital, and whether the old plan of a super-app still exists and has enough meat in it to make it to the market," Bijoor said.

UNDER PRESSURE

"Chandra's exit will put greater pressure on Tata Digital's businesses to actually show a path to profitability. This happens whenever there is a change in leadership," Bijoor said.

For BigBasket, that pressure is likely to be more immediate.

The company has already spent heavily to reposition itself for quick commerce, but its revenue growth remains modest and its market share significantly trails the category leaders.

"With every change comes a new approach," Bijoor said.

The incoming Tata Sons Chairman will, therefore, inherit a digital portfolio where BigBasket presents one of the clearest tests of whether patient capital can eventually translate into a profitable business.

NOTES:
1) The above is an extract of the detailed format of Quarterly Financial Results filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015. The full format of the Quarterly Financial results are available on the Websites of the Stock Exchanges and on the Company's Website (www.rubfila.com).
2) The above Unaudited standalone / consolidated financial results have been prepared in accordance with Indian Accounting Standards ('Ind AS') prescribed under section 133 of the Companies Act, 2013 read with relevant rules thereunder and in terms of the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (as amended) and SEBI Circular dated 5 July, 2016.
3) The Consolidated financial results of the Quarter ended 30.06.2026 includes the financial results of its wholly owned subsidiary M/s Premier Tissues India Limited
4) The company's reportable business segments are "Latex Rubber Thread" and "Corrugated Carton Box" and its subsidiary has one reportable business segment viz "Paper Tissue". The Company publishes the standalone financial results along with the consolidated financial results.
5) The number of Investor Complaints pending at the beginning of the quarter was nil, 2 complaints were received and resolved during the quarter and no complaints were pending at the end of the quarter.
6) The above unaudited standalone and consolidated financial results for the period ended 30th June 2026 were reviewed and recommended by the audit committee and approved by the Board of Directors at their respective meetings held on 11th August and the auditors have issued a modified opinion on the same.
7) The figures for the quarters ended 31st March 2026 is the balancing figures between audited figures in respect of the full financial year up to 31st March 2026 and the unaudited published year to date figures up to 31st December 2025, being the date of the end of the third quarter of the respective financial years, which were subjected to limited review.
8) On November 21, 2025, the Government of India notified the four Labour Codes - the Code on Wages, 2019, the Industrial Relations Code, 2020, the Code on Social Security, 2020 and the Occupational Safety, Health and Working Conditions Code, 2020 - replacing 29 existing labour laws, collectively referred to as the 'New Labour Codes'. The Group has assessed the incremental financial impact if any, due to these changes, taking into consideration the best information available read with the FAQs released by the Ministry of Labour & Employment and the Institute of Chartered Accountants of India. Considering the materiality and non-recurring nature of this impact, the Group has no incremental charges in the standalone and consolidated financial results for the quarter and year ended June 30, 2026, respectively. The Group continues to monitor developments on the rules to be notified by regulatory authorities, including clarifications/ additional guidance from authorities and will continue to assess the accounting implications basis such developments/ guidance if any.

TECH DIGEST.

Google shares first Pixel 11 Pro Fold teaser

Google recently released the first official teaser for the Pixel 11 Pro Fold, offering an early glimpse of its upcoming foldable

smartphone ahead of its scheduled debut on August 12. The short teaser video does not reveal many details about the device but showcases the Pixel 11 Pro Fold's silhouette along with a brief look at its inner display. It also highlights the rear camera module, which appears to retain the same design seen on the Pixel 10 Pro Fold. While the official teaser remains limited, previously leaked renders have already provided a clearer picture of what to expect from the next-generation foldable. According to those leaks reported by GSM Arena, the Pixel 11 Pro Fold is expected to closely resemble its predecessor in terms of design. The leaked information also suggests the device will feature an 8-inch inner display and could be powered by Google's Tensor G6 chipset. It is also expected to pack a 4,800 mAh battery and introduce the new Pixel Glow LED integrated into the rear camera module. In terms of colour options, the Pixel 11 Pro Fold is expected to be available in a new Pine finish alongside a black variant. Google is set to officially unveil the Pixel 11 Pro Fold on August 12, when the company is expected to confirm the device's full specifications, features, pricing and availability.

HP OmniPad 12 now in India, starting at ₹48,999

HP has announced the availability of the HP OmniPad 12 in India, a 2-in-1 device that combines the portability of a tablet with laptop-style productivity. The device is aimed at students, first-time users, MSMEs and young professionals. It comes with a detachable keyboard

that allows users to switch between tablet and laptop modes. Powered by Qualcomm Snapdragon processors and running Android 16, the OmniPad 12 features a 12-inch 2K multi-touch display with a 16:10 aspect ratio, up to 400 nits brightness and a 90Hz refresh rate. HP claims up to 18 hours of battery life on a single charge. It weighs 600 g and includes quad speakers with DTS Ultra, dual microphones, an 8 MP front camera and a 13 MP rear camera. It comes with 8 GB LPDDR5 RAM, UFS storage options and support for up to 1 TB expandable storage via microSD card. Connectivity options include Wi-Fi 6E, Bluetooth 5.2 and a USB Type-C port. The HP OmniPad 12 is available through HP's online store, Amazon, Flipkart, Reliance Digital, Croma, Vijay Sales and HP World stores, starting at ₹48,999.

Premium Android tablet Asus Pad launched in India

Asus has launched the Asus Pad in India, a premium Android tablet featuring a 12.2-inch 2.8K dual-layer OLED display with a 144 Hz refresh rate, up to 2,000 nits' peak brightness and 100 per cent DCI-P3 colour coverage. Asus claims it is the first tablet in its segment to offer a dual-layer

OLED panel. Powered by the MediaTek Dimensity 8300 processor, the tab comes in 8 GB + 128 GB and 8 GB + 256 GB variants, priced ₹45,990 and ₹49,990, respectively. It has a 9,000 mAh battery with 45W fast charging, supports expandable storage up to 1 TB via microSD and runs Android 16. The device is 6.5 mm thin and weighs 523 g, with a protective folio case bundled in the box. Other highlights are Wi-Fi 6E, Bluetooth 5.3, Dolby Atmos-powered quad speakers, and support for the Asus Pen 2.0 stylus. The ASUS Pad is available through Flipkart, Asus eShop, Asus and ROG stores, Reliance Digital, and authorised Asus retail outlets across India.

New redeem codes for BGMI's 5th anniversary

Krafton India has released a fresh batch of redeem codes for Battlegrounds Mobile India (BGMI), giving players a chance to unlock the Diver Set and other in-game rewards free of cost. The codes can be redeemed through BGMI's official redemption portal and are valid until September 25.

The latest code drop coincides with BGMI's ongoing 5th Anniversary Edition 4.5 Update, one of the game's biggest content seasons so far. The update brings together collaborations with Naruto: Ninjas Assemble, Spider-Man and Ferrari, alongside upgrades to the World of Wonder (WOW) creator platform and the game's Card Collection system. Players can access Naruto-inspired abilities such as Rasengan and Chidori, while Ferrari's Roma, Purosangue, LaFerrari and SF90 XX Spider have been added to the game. Krafton has released 50 redeem codes in the latest batch, offering access to exclusive cosmetics and collectibles as part of the anniversary season.

Big-screen versatility in a slim package

SAMSUNG GALAXY Z FOLD 8 ULTRA. Has Samsung finally perfected the foldable smartphone with this one?

Siddharth Mathew Cherian

Samsung's Galaxy Z Fold series has long been the benchmark for foldables and with the Galaxy Z Fold 8 Ultra, the company is doubling down on refinement. The latest iteration brings a sleeker design, a thinner profile and Samsung's first-ever Ultra branding for a Fold device. But beyond the new name, does the Fold 8 Ultra offer a truly better foldable experience? After spending time with the device, here's why Samsung's most ambitious foldable yet may also be its most complete.

DESIGN

The Galaxy Z Fold series has evolved steadily over the years, but the Z Fold 8 Ultra feels like Samsung's most refined foldable yet, striking the right balance between portability and productivity. Measuring just 4.1 mm when unfolded and 8.9 mm when folded, the Galaxy Z Fold 8 Ultra is remarkably thin for a book-style foldable. The Violet Shadow variant reviewed here stands out with its subtle lavender hue, lending the device a distinctive yet understated premium look. The finish also does a good job of resisting fingerprints and smudges. The only notable drawback is the protruding camera module, which causes the phone to wobble when placed on a flat surface.

DISPLAY

The Galaxy Z Fold 8 Ultra features an expansive 8-inch Dynamic AMOLED 2X inner display with a 120 Hz adaptive refresh rate, HDR10+ support and a peak brightness of up to 3,000 nits. On the outside sits a 6.5-inch Dynamic AMOLED 2X cover display that matches the inner screen's 120 Hz smoothness and is protected by Corning Gorilla Glass Ceramic 3. The large foldable display remains one of the Fold's biggest strengths. It is ideally suited for streaming videos, reading documents and PDFs, browsing the web and multitasking across multiple apps. The extra screen real estate also enhances gaming and photo-editing workflows, offering a tablet-like experience in a device that still fits in a pocket. Watching *Operation Safed Sagar* on Netflix was particularly enjoyable on the 8-inch display. The panel delivers excellent contrast, natural-looking skin tones and rich yet balanced colours, making movies and shows look consistently immersive.

SOUND

The Galaxy Z Fold 8 Ultra features a stereo speaker setup. Listening to

FLAGSHIP FOLDABLE. Samsung's foldable blends portability, productivity and premium craftsmanship BIJOY GHOSH

The cameras consistently delivered well-balanced images with excellent detail, contrast and reliable exposure BIJOY GHOSH

tracks such as *Blinding Lights* by The Weeknd, the synth-pop and synthwave production came through with excellent clarity, even at higher volume levels. Vocals remained crisp and well-defined, while the instrumentals retained their energy and detail, resulting in a balanced and engaging listening experience. That said, Samsung's pursuit of an ultra-thin design has introduced a minor compromise.

Both stereo speakers are positioned on the left half of the unfolded Fold, with one located at the top and the other at the bottom. As a result, audio exhibits a subtle left-side bias in landscape mode.

CAMERA

The Galaxy Z Fold 8 Ultra features a versatile triple-camera system, led by a 200 MP primary sensor with optical image stabilisation (OIS) and Samsung's 2x optical-quality zoom. It is accompanied by a 50 MP ultra-wide camera for broader perspectives and a 10 MP telephoto lens with 3x optical zoom and OIS for steadier long-range shots.

In use, the primary and ultra-wide cameras consistently delivered well-balanced images with excellent detail, contrast and reli-

able exposure. Colours appeared natural without being overly saturated and dynamic range was generally impressive. One minor quirk was the Fold's bright inner display, which occasionally made it difficult to accurately judge exposure in harsh outdoor conditions immediately after unfolding the device.

Low-light performance was equally commendable. Night-time images were clean, with controlled noise levels, good detail retention and pleasing contrast.

The 10 MP telephoto camera remains a useful addition for portraits and moderate zoom shots, but its relatively modest resolution and 3x optical reach limit its ability to capture finer details at longer distances. While the results are perfectly serviceable, the setup falls short of the Galaxy S26 Ultra's dual-telephoto system, which combines 3x and 5x optical zoom lenses to offer greater flexibility and long-range image quality.

Samsung includes a 10 MP cover camera and a 10 MP under-display camera hidden beneath the foldable display. Both deliver good detail, natural skin tones and a wide field of view that works well for group selfies and video calls.

PERFORMANCE

The Galaxy Z Fold 8 Ultra is powered by Qualcomm's Snapdragon 8 Elite Gen 5 for Galaxy chipset. Our review unit came with 12 GB RAM and 256 GB storage, while Samsung also offers 12 GB/512 GB and 16 GB/1 TB variants.

On Geekbench 6, the device posted a single-core score of 3,656 and a multi-core score of 11,185, firmly placing it among the fastest Android smartphones available. The single-core result notably outpaces devices such as the OnePlus 13 (2,881) and the Galaxy S25 Ultra (2,852), highlighting the performance gains of the latest Snapdragon silicon.

Day-to-day performance was predictably flawless, with apps launching quickly and allowing users to comfortably run multiple apps side by side.

Gaming is another area where the device excels. *Call of Duty: Mobile* ran smoothly at up to 90 fps, while the large screen makes both competitive shooters and casual gaming more immersive.

It is also impressive how seamless the UI feels when switching between the main display and the

cover screen. The dual-screen experience is particularly well thought out, allowing one half to function as a viewfinder while the other provides shooting controls. This approach extends to other apps as well. Overall, the UI feels highly polished, intuitive and well refined.

Galaxy Z Fold 8 Ultra also manages heat well, and I could feel it on the cover screen. The device remained comfortable to hold during benchmarking sessions and extended gaming. Samsung's software experience is equally polished, with minimal pre-installed clutter beyond the company's own apps.

BATTERY

The Galaxy Z Fold 8 Ultra packs a 5,000 mAh battery with support for 45 W wired charging, 20 W wireless charging and Wireless PowerShare. In everyday use, battery life proved to be reliably all-day, comfortably lasting from 7 am until around 10 pm with a mix of web browsing, video streaming, messaging, email and occasional gaming. By the end of the day, the phone still had around 22 per cent charge remaining.

Using a 100 W USB-C charger, I was able to take advantage of the Fold 8 Ultra's 45 W wired charging speeds, bringing the battery from empty to full in under an hour. Wireless PowerShare remains a useful addition for topping up accessories, such as Galaxy Buds and smartwatches, although charging speeds are understandably slow.

VERDICT

The Galaxy Z Fold 8 Ultra represents Samsung at its best, delivering meaningful improvements across design, display quality, feature set and overall refinement. While it faces strong competition from rivals such as the Google Pixel 10 Pro Fold, OnePlus Open 2 and Vivo X-Fold 5, Samsung has managed to raise the bar over its predecessor.

Compared to the Galaxy Z Fold 7 and 6, the Fold 8 Ultra offers a superior display experience, a more mature and refined implementation of foldable technology and noticeable enhancements in software optimisation for everyday use.

● **SNAPSHOT**

Price: ₹1,99,999 (12 GB + 256 GB)
Pros: Stunning displays, minimal crease, slim profile, top-tier performance, dependable wide and ultra-wide cameras
Cons: Expensive, average telephoto camera capabilities, limited optical zoom, lacks S Pen support

Xiaomi's new launch makes performance its calling card

REDMI TURBO 5. Dependable battery and refined design make this heavy duty performer a future ready device

Ashwin Rajagopalan

One of the key battlegrounds in the battle for supremacy in India's smartphone market is the ₹30,000-40,000 bracket. As smartphone prices continue to rise, many Indian consumers are stepping up and looking for devices that promise longevity. This can also be attributed to extended upgrade cycles as consumers hold on to their smartphones for longer periods of time. This has changed the market dynamics with features like build quality, future-proof spec sheets and OS update policies becoming key purchase drivers.

The Redmi Turbo 5 lands at a time when Xiaomi is aiming to consolidate its position in this price segment with a smartphone that is future ready. Xiaomi chooses performance as the key USP for the Redmi Turbo 5. Does it have what it takes to take on its rivals in a segment where consumer aspirations run high?

DESIGN

You might notice similarities between the POCO X8 Pro and the Redmi Turbo 5. This device is crafted with an aerospace-grade metal middle frame, complemented by a matte-finished glass back. Redmi plays it safe with a design that borders on bland. But it looks every inch premium, ticking a key box for buyers in this segment who usually seek a device that looks more expensive than its price tag. Xiaomi has done a good job with weight management; I rarely felt the 204 g-heft during my time with this device.

The flat frame and rounded edges not only add to the elegant vibe but also make the Turbo 5 easier to clasp. The Redmi Turbo 5 also excels in

NEXT GEN. The Redmi Turbo 5 lands at a time when Xiaomi is aiming to consolidate its position in this price segment with a future ready smartphone

terms of ingress protection front; it is IP66, IP68, IP69 and IP69K certified for dust and water protection. Every smartphone needs a party trick in 2026; the Pixel Matrix Camera Rings that encircle the rear camera are embedded with multi-colour LED lights. You can customise the Pixel Matrix rings for notifications and calls. The device comes in three colourways, including our favourite Nitro Blue.

PERFORMANCE

Much of Xiaomi's sales pitch for the Turbo 5 is built on performance. At

its heart is a MediaTek Dimensity 8500-Ultra chipset. The device comes in a choice of two storage variants — 8 GB/256 GB and the 12 GB/256 GB option that we put to the test. I'd recommend the ₹3,000 premium for the top-end variant if you're planning to retain this device for two years or more. The Redmi Turbo 5 consistently breached the 6700 mark in our Geekbench (multi-core) benchmark test, making it one of the better performers at this price point. This device is ready for heavy duty gaming and everyday multitasking.

The 50 MP primary lens captures sharp images ASHWIN RAJAGOPALAN

The Redmi Turbo 5 runs on HyperOS 3, which is built on Android 16. The UI is easy on the eye, but the pre-installed apps and notifications are a dampener. I really wish Xiaomi had not loaded this device with so many apps. The device is loaded with AI tools and customisations; however, I would have liked to see more photo editing tools. The Turbo 5 comes with four years of Android OS updates and six years of security updates. That's on par with many of its rivals in this segment.

BATTERY

If there's one reason (apart from raw power) why this device ought to be on your radar, it's battery performance. Xiaomi has packed this device with a massive 7540 mAh silicon-carbon battery under the hood. It comfortably lasted more than a day during my time with the device, despite moderate to heavy camera usage and screen time. The retail package comes with a 100 W HyperCharge fast charger that takes this device from 1 to 100 per cent in just over an hour.

CAMERA

Most of the camera experience revolves around the 50 MP primary

lens (Sony IMX882 sensor with optical image stabilisation and a f/1.5 aperture). Portraits are sharp, with consistent subject separation. Results were quite good when I pushed the camera to 2X and 3X mode, despite the lack of a telephoto lens. Images were quite impressive in optimal light, while results in low light were quite acceptable for this segment. If there's one weak link, it's the 8 MP ultra-wide lens. Selfie duties are handled by a 20 MP front cam.

DISPLAY

The Redmi Turbo 5 is equipped with a 6.59-inch (2756 x 1268 pixels) 12-bit AMOLED display (1.5K resolution) that features a 120Hz refresh rate. It comes with HDR10+, Dolby Vision and the convenience of wet touch support. It peaks at 3500 nits, providing excellent visibility across most lighting conditions. You get full HDR support on OTT platforms like Netflix. I watched the highlights and a couple of key quarter finals of the FIFA World cup 2026; the colours were punchy with deep blacks.

VERDICT

The Redmi Turbo 5 scores on the performance front. This is a device that will please heavy duty gamers and users with workflows that involve multitasking.

You also get a dependable battery that's geared for binge watching, making it one of the better bets if you're looking for a smartphone under ₹40,000.

QUICKLY.

Tamilnadu Petroproducts
Q1 profit rises to ₹80 cr

Chennai: The consolidated net profit of Tamilnadu Petroproducts Ltd (TPL) more than doubled to ₹80 crore in the quarter ended June 2026 (Q1FY27), compared to ₹35 crore in the corresponding quarter last year. Consolidated revenue rose 68 per cent to ₹778 crore (₹463 crore). The company said the higher performance was supported by increased customer demand, cost-led operational efficiencies and improved capacity utilisation. Ashwin Muthiah, Vice-Chairman, TPL, and Founder Chairman, AM International, Singapore, said despite the geopolitical situation in West Asia resulting in increased input costs, lower import pressures supported overall performance. **OUR BUREAU**

Retail inflation rises to 4.45% in July

PRICE SPIKE. Food inflation remains high at 5.52% and will continue to show a rising trend, say experts

Shishir Sinha
New Delhi

Driven by higher prices of kitchen staples such as onions, ginger and garlic, the CPI-based retail inflation rose to 4.45 per cent in July from 4.38 per cent in June, according to Statistics Ministry data released on Wednesday.

Economists expect headline inflation to continue climbing in the coming months. The July print is the highest in 19 months.

FOOD INFLATION

Higher food inflation was a key reason for the headline number moving up. Food inflation remains high at 5.5 per cent and will continue to show a rising trend.

“There is a difference, however, in price movements of goods depending on the crop size. Prices of potatoes and tomatoes are down due to higher production, while onion prices are

up due to lower production,” said Madan Sabnavis, Chief Economist with Bank of Baroda. Further, the war impact on prices can be seen from higher inflation for restaurants and food services, where higher fuel prices have made units increase prices.

“The southern States continue to witness higher CPI inflation. Andhra Pradesh, Telangana, Tamil Nadu and Karnataka were among the four highest inflation rate States, with Madhya Pradesh

also being in this group. This can be attributed to higher demand factor as well as higher logistics cost and local levies,” Sabnavis added.

However, despite the West Asia crisis, the print is still contained.

“Inflationary pressures in India remain broadly contained despite elevated wholesale price inflation driven by a weaker rupee and higher energy costs. This stands in contrast to several major economies, including

the US, where inflation continues to remain well above central bank comfort levels,” said Debopam Chaudhuri, Chief Economist, Piramal Group. Also, the relatively benign inflation outlook should provide the RBI with additional room to maintain the policy rate at its October meeting.

CORE INFLATION

Meanwhile, core inflation (headline inflation minus food and fuel inflation) remained stable. According to Rajeev Sharan, Head of Research at Brickwork Ratings, core inflation is estimated near 4 per cent, kept elevated by gold and silver prices amid geopolitical risk aversion and firm crude-linked transport costs.

“For Q2FY27 (July-September), we expect headline inflation to average around 4.5-4.7 per cent, with a mild uptick likely in September as base effects turn less favourable,” Sharan said, adding that going forward,

food will remain the key swing factor amid uneven monsoon and El Nino-related uncertainty.”

RBI FORECAST

Megha Arora, Director at India Ratings & Research, feels that stable core inflation, which has remained at 3.9 per cent since May, suggests the absence of demand push to inflation and may under-shoot the RBI's forecast of 4.3 per cent in FY27.

“Ind-Ra believes the headline inflation is likely to remain stable around 4.5 per cent in August 2026, but remain within the RBI's upper tolerance band of 6 per cent. Persistent upside risks are posed by geopolitical tensions and El Nino weather pattern, though some improvement in the latter could be visible in the August print,” she said.

Arora added that crude price volatility is expected to continue, with oil likely to hover around 80-85/bbl in the coming weeks.

Bosch bets on CAFE III, localisation to power the next growth phase

Amit Vijay Mohile
Mumbai

Bosch Managing Director Guruprasad Mudlapur

Bosch Ltd expects its EBITDA margin of around 14 per cent to sustain after moving above its post-Covid range of 12-13 per cent as the auto-component and technology major bets on localisation, operating efficiencies, premiumisation and regulation-led technology adoption to drive growth over the next three to five years, Managing Director Guruprasad Mudlapur told analysts during the company's post-results investor call on Tuesday.

“We have done quite a few things over the last several years... which has led to a sustained improvement in our margins,” said Mudlapur, citing operational excellence, higher localisation, volume growth, productivity and a favourable product mix.

“Overall, I would say we are on an upward trend, and we would say that we will sustain this.”

REVENUE RISES

Bosch Ltd's standalone revenue from operations rose 22 per cent year-on-year to ₹5,841.9 crore in the June quarter and was 5 per cent higher sequentially. EBITDA increased 28 per cent to ₹818 crore, translating into a 14 per cent margin.

Profit after tax stood at ₹701.8 crore, down 37.1 per cent due to an exceptional gain in the year-earlier quarter. Excluding the exceptional item, PAT grew 9.9 per cent. For the second quarter, Mudlapur expects the automotive market to grow about 8 per cent, supported by festival demand, stronger rural cash flows and continued infrastructure activity.

He, however, flagged mon-

soon variability, a potential El Nino effect and geopolitical tensions as key downside risks.

A key part of Bosch's next growth leg could come from regulatory changes. Its power solutions business grew 29 per cent year-on-year, outperforming the market across passenger vehicles, off-highway vehicles and tractors.

Mudlapur said upcoming CAFE Phase III regulations “should be an even better boost”, while commercial-vehicle ADAS represents “a whole new technology, a regulated market” that could emerge as another growth driver.

Bosch expects higher vehicle volumes, new products, technology adoption and premiumisation to drive revenue over the next three to five years.

TWO-WHEELERS' SHARE

Two-wheelers emerged as another growth engine, with revenue surging 41.4 per cent year-on-year. The management confirmed Bosch gained market share through new products supplied to new OEMs, including premium motorcycle platforms. “We've gained market share,” said Mudlapur, attributing the improvement to new products introduced to new OEMs.

Tata Motors CV Q1 profit jumps 83% as revenue rises 19%

Amit Vijay Mohile
Mumbai

Tata Motors Ltd reported an 83 per cent year-on-year rise in consolidated profit after tax at ₹2,600 crore in the June quarter, aided by a mark-to-market gain on its Tata Capital investment, while consolidated revenue rose 19 per cent to ₹20,667 crore.

Consolidated EBITDA rose 10 per cent to about ₹2,300 crore, but its margin contracted 90 basis points to 10.9 per cent. EBIT margin fell 80 basis points to 8.5 per cent. Profit before exceptional items jumped 81 per cent to ₹3,049 crore.

The sharp bottom line growth was led by the mark-to-market gain on Tata Capital investments. The company ended June with consolidated net cash of ₹13,500 crore. The management also indicated that it is expecting the final regulatory clearance for its Iveco acquisition by August-end, allowing the tender offer to start in early September and potentially close by early November.

COMMODITY PRESSURE

The commercial vehicle (CV) maker has an order pipeline of more than 3,400 electric vehicles, but warned that commodity pressures that squeezed margins in Q1 are likely to persist into the

September quarter. Tata Motors faced a commodity impact of around 3.8 per cent in Q1, said Managing Director and CEO Girish Wagh during the company's post-results media conference call.

The company raised prices by 2 per cent from April 1 and followed it with another increase of around 2.5 per cent from July 1. “Commodity inflation does remain a major headwind,” said Wagh, adding that the company was seeing further increase in Q2. Tata Motors would first seek to offset inflation through cost reductions before considering further price increases.

Wagh said margin improvement will depend on

Tata Motors MD and CEO Girish Wagh

three variables — how commodity pressures taper, how the latest price increase settles in the market, and the trajectory of volume growth.

EV ORDER PIPELINE

The company has more than 3,400 units of electric CV or-

ders across trade, logistics and passenger mobility. This includes an electric bus order book of around 850-900 units from government and private customers, with orders from Chennai, Ahmedabad, Odisha and Hyderabad. Deliveries have started and are expected to run through Q2 and Q3, with some extending into Q4.

Electric small commercial vehicle penetration has reached close to 10 per cent, with Wagh saying that higher diesel and CNG prices have brought EV total-cost-of-ownership parity earlier in the vehicle's life, making electric models more attractive. EV demand is also spreading beyond metros

into Tier-II and Tier-III cities. Tata Motors' Q1 CV wholesales rose 26 per cent to 108,700 units, with domestic volumes up 26 per cent and exports 35 per cent higher. Domestic Vahan market share increased 100 basis points sequentially to 36.8 per cent.

Wagh said heavy CV demand remained broad-based, with large fleet operators replacing ageing trucks to benefit from better fuel economy and lower maintenance costs. Strong demand has, however, created supply bottlenecks in sheet metal, castings and forgings, while the EV business faces shortages of imported battery cells.

Grasim Industries net up 39% at ₹3,846 cr

Our Bureau
Mumbai

Grasim Industries, an Aditya Birla Group company, reported that its net profit in the June quarter increased 39 per cent to ₹3,846 crore against ₹2,771 crore logged in the same period last year, on better realisation and higher demand.

Revenue was up 21 per cent at ₹48,716 crore (₹40,118 crore). EBITDA jumped 26 per cent to its highest-ever of ₹8,077 crore, driven by higher realisation and cost efficiencies across businesses.

Revenue of the cellulosic fibres segment increased 12 per cent to ₹4,530 crore on higher global prices, rupee depreciation and favourable product mix.

EBITDA was up nearly two times at ₹632 crore, supported by low base and a higher contribution from speciality fibres. Caustic sales volumes slipped 6 per cent to 2.84

lakh tonnes due to lower production on account of captive power plant maintenance shutdown.

Chemicals business revenue increased 10 per cent to ₹2,640 crore.

EBITDA was up 16 per cent at ₹491 crore, led by all-round performance across chemical businesses.

PAINTS BUSINESS

Decorative paints business under Birla Opus registered a 64 per cent rise in revenue at ₹1,661 crore, supported by strong dealer onboarding, with first-time billed dealers increasing sequentially by over 10 per cent. The company implemented a price hike of 9 per cent on rise in input cost.

Birla Opus has over 1,450 exclusive branded franchise retail outlets. During the quarter, Birla Opus launched 10 new products and 95 SKUs, expanding its product portfolio to 228 products and over 1,945 SKUs.

Scorecard (in ₹ cr)

	Q1FY26	Q1FY27
Net profit	2,771	3,846
Revenue	40,118	48,716
EPS (₹)	20.91	31.60
(Diluted)		

Birla Pivot, the B2B e-commerce business, revenue increased 75 per cent to ₹2,548 crore.

VOLATILE MARKETS

However, revenue moderated quarter-on-quarter amid elevated market volatility and inventory optimisation approach pursued by value-conscious customers. The business remains on

track to achieve EBITDA break-even in FY27, it said.

Building materials B2B e-commerce revenue increased 21 per cent to ₹28,835 crore led by all-round performance across cement, paints and B2B e-commerce.

EBITDA was up 17 per cent at ₹5,002 crore, led by improved profitability in the cement business and continued reduction of investment phase impact from the paints and B2B e-commerce businesses.

CEMENT BUSINESS

Cement business under Grasim Industries subsidiary UltraTech registered 16 per cent rise in revenue and stood at ₹24,648 crore, mainly led by volume growth. EBITDA per tonne stood at ₹1,214, led by operating leverage and better cost management.

Avinash Nair
Ahmedabad

Electric vehicle prices could see another 10-12 per cent increase in the fourth quarter if the disruption around the Strait of Hormuz persists and pushes up raw material and logistics costs, Rajat Gupta, Business Head, Commercial Mobility Business, TVS Motor Company.

“The price fluctuation is very high. So, battery prices have already risen. If the Strait of Hormuz does not open, raw materials and logistics cost will increase, and maybe in the fourth quarter you may see OEMs going for a 10-12 per cent price hike,” said Gupta.

He said EV prices had already been increased this year as material costs rose 10-12 per cent.

The Iran crisis has further increased cost pressures,

with electric components and batteries among the parts most affected, he said.

CHARGING INFRA

“Electric components and batteries are the most affected due to the Iran crisis,” said Gupta.

TVS currently has about a 25 per cent market share in the electric three-wheeler segment, but EV adoption in Gujarat remains slow, according to Gupta.

He attributed the slower adoption to a lack of awareness among customers as well as concerns around charging infrastructure.

“In the EV portfolio, we are already having a 25 per cent market share. However,

EV adoption in Gujarat is very slow. There are a couple of reasons among which one is that people are hesitant and awareness is not there,” he said.

The company opened its third dealership in Ahmedabad on Wednesday as it looks to expand its presence in the electric three-wheeler market in the State.

Gupta said TVS provides a home-charging solution along with its electric three-wheelers, but customers in Ahmedabad remain concerned about the availability and reliability of charging infrastructure.

In some locations, inadequate voltage also prevents the home-charging system

from functioning properly, he said.

“In Ahmedabad, customers are worried about charging infrastructure. Second, the voltage in many places is not adequate for functioning of the home charging solution provided. Third, they are not aware of the subsidy they can avail in EV, so that is something we are educating them on,” said Gupta.

BATTERY WARRANTY

TVS also offers a six-year warranty on the battery of its electric three-wheelers, he said. According to Gupta, government policy had played an important role in determining the pace of EV adoption across markets.

EID Parry consolidated Q1 net profit falls 42% on higher costs

Our Bureau
Chennai

Murugappa Group company EID Parry on Wednesday reported a 42 per cent decline in net profit for the quarter ended June 2026 (Q1FY27). Consolidated profit (after tax and non-controlling interest) was at ₹142 crore, compared to ₹246 crore in the corresponding quarter of the previous year. Consolidated revenue grew at a marginal 3 per cent y-o-y at ₹9,017 crore.

On a standalone basis, the sugar company reported a standalone net loss for the quarter at ₹89 crore, compared to a loss of ₹28 crore in the corresponding quarter of the previous year. This loss included an impairment of investments in subsidiary, Parry Sugars Refinery India Pvt Ltd (PSRIPL), of ₹19

crore. On a standalone basis, revenue from operations for the quarter ended June 30, 2026, was ₹733 crore, compared to ₹756 crore in the same quarter of the previous year.

SALES RISE

Muthiah Murugappan, Whole-time Director and Chief Executive Officer, EID Parry, said the sugar segment recorded revenue of ₹410 crore for the quarter ended June 30, 2026, compared to ₹347 crore in the corresponding quarter of the previous year, reflecting a growth of 18 per cent, primarily driven by higher sales volumes. “The benefits

arising from higher sales volumes were offset by increased operational costs, including certain one-time expenses incurred during the quarter,” he said in a statement.

DISTILLERY SEGMENT

Revenues in the distillery segment declined 14 per cent y-o-y, and the company attributed the decline primarily to lower offtake of extra neutral alcohol (ENA) by IMFL manufacturers in Tamil Nadu. The segment reported a profit of ₹9 crore for the quarter ended 30 June 2026, against ₹20 crore in the corresponding quarter of the previous year.

Scorecard (in ₹ cr)

	Q1 FY26	Q1 FY27	Growth %

Groww adds over 70,000 active clients in July

Bengaluru: Wealth-tech platform Groww added 70,119 active clients in July, significantly outpacing the overall broking industry, which added around 8,000 net active clients, according to NSE active client data. Groww's active client base rose to 1,312 crore, taking its market share to 28.88 per cent from 28.72 per cent in June. Zerodha's active client base declined by 38,725 to 67.6 million, while Angel One remained largely flat at 6.63 million. Among other large brokers, ICICI Securities added 11,748 clients to reach 2.13 million, while Upstox net 26,433 clients, with its active client dipping to 1.86 million. OUR BUREAU

Indel Money to raise up to ₹500 crore via NCDs

Mumbai: Kerala-based Indel Money is planning to raise up to ₹500 crore (base issue ₹250 crore and greenshoe option ₹250 crore) via non-convertible debentures (NCDs) at coupon rates ranging from 9 per cent to 11.5 per cent depending on the tenor, which ranges from 400 days to 72 months. The effective yield ranges from a minimum of 9 per cent/9.38 per cent for a NCD of 400 days under the cumulative/monthly option to 12.12 per cent/12.25 per cent for 72 months under the monthly/cumulative option, per the gold loan company's NCD prospectus. The minimum investment is ₹10,000. The issue opens on August 18 and closes on August 31. OUR BUREAU

Chandra's exit, crude surge weaken market sentiment

UNDER PRESSURE. Nifty, Sensex close marginally lower despite firm Asian markets

Anupama Ghosh Mumbai

The markets closed lower on Wednesday, caught between rising crude oil prices, the shock announcement of Tata Sons Chairman N Chandrasekaran and investor caution ahead of closely watched inflation data from India and the US. The Nifty 50 settled at 24,435.95, down 35.75 points or 0.15 per cent, after briefly slipping to an intra-day low of 24,265 before recovering in the final hour. The Sensex closed at 77,966.35, lower by 0.24 per cent.

MID-CAP: AT NEW HIGH The Nifty Midcap 100 bucked the trend, gaining 0.28 per cent and touching a

MIXED SHOW. Nifty Midcap 100 bucked the trend, gaining 0.28 per cent and touching a fresh all-time high, while the Nifty Smallcap 100 declined 0.18 per cent

fresh all-time high, while the Nifty Smallcap 100 declined 0.18 per cent. Sentiment was weak even as Asian stocks gained, led by Korea's Kospi that surged nearly 4 per cent. "Leadership spooked the market before earnings did," said Sarvam Goel, Founder

of Pocketful, pointing to the broad sell-off across Tata Group stocks following N Chandrasekaran's decision to step down as Chairman of Tata Sons after his tenure ends in February. TCS fell around 4 per cent, and Tata Motors and Tata Consumer

SAT questions logic of Zee's two-month market ban, reserves interim order

Akshata Gorde Mumbai

The Securities Appellate Tribunal (SAT) on Wednesday reserved its order on interim relief pleas filed by Zee Entertainment Enterprises and its Managing Director Punit Goenka against an order by SEBI barring them from accessing the market. Zee and Goenka sought a stay on the market access restrictions and relief to proceed with a ₹3,143.5 crore preferential issue of fully convertible warrants to promoter group entity Sun-bright Mauritius Investments as the company had a limited window to complete

the fundraise. Senior Advocate Ravi Kadam, representing Zee, said delaying the issue could prejudice the company because the warrant price is linked to the market price and a lower share price after two months could result in a recalculation and potentially reduce the premium that the promoter entity is currently willing to pay.

TRIBUNAL QUESTIONS The tribunal questioned SEBI on the rationale for barring Zee from accessing the securities market for two months. SEBI's July 31 order barred Zee from accessing the securities market for two months, while Goenka and

founder Subhash Chandra were barred for one year. "You are putting a ban for about two months' time... We are not able to understand why only 2 months... you don't do this today but tomorrow you do it. There must be some logic to that," the bench said. Senior Advocate Chetan Kapadia, representing SEBI, argued that allowing the preferential issue during the debarment would dilute the effect of the market access restriction imposed after violations. SAT has asked both parties to file their replies within six weeks and reserved its order on the interim relief sought by Zee and Goenka.

Godrej Consumer logs worst day in 6 years due to sudden exit of CEO

Reuters

Shares of Godrej Consumer Products plunged more than 11 per cent on Wednesday and posted their steepest fall in over six years as CEO Sudhir Sitapati's abrupt exit fuelled concerns over strategic execution at the consumer goods company. It named Finance chief Aasif Malbari as CEO and Managing Director on Tuesday after Sitapati resigned, just three months after his reappointment for a five-year term. Consumer's shares, which slipped to a three-year low, settled 11.2 per cent lower at ₹910 in their busiest session since May 2021. Analysts said the sudden leadership transition puts greater focus on the execution of Godrej Consumer's growth plans, with improved performance in its core brands seen as key.

This comes after Godrej Consumer Executive Chair Nisaba Godrej on Tuesday said the company needed greater "execution rigour", particularly in online sales, digital marketing and liquid vapourisers. "An abrupt change is never liked by the market," said Amit Purohit, Senior VP at Elara Securities, adding that investors would monitor execution of the company's plans before they regain confidence in the stock. HSBC downgraded it to 'Hold' from 'Buy' and cut its target price to ₹1,120 from ₹1,260, citing greater uncer-

tainty, while Goldman Sachs and Nomura retained 'Buy' ratings but lowered their targets.

NEXT PHASE Despite Sitapati's pivotal role in shaping the company's 2040 vision, the management highlighted other areas where execution could improve, including the use of AI and effective digital marketing, Jefferies said. Vision 2040 is Godrej Consumer's long-term growth strategy focused on expanding its addressable market, entering new categories and targeting faster-growing segments. "Bringing in an experienced internal CFO to steer the company through margin and cost pressures shows how important profitability and operating efficiency are in today's environment," said Agamjeet Dang, CEO of executive search firm Executive Access.

IPOs of Dhoot Transmission, Molbio get thumbs up from investors with 70x subscription

Our Bureau Bengaluru

Aggressive bidding		(Number of times)			
	QIBs	Non-institutions	Retail	Employee	Total
Dhoot Transmission	212.92	51.93	8.12	8.14	74.21
Molbio Diagnostics	186.39	49.8	12.96	13.28	70.26

Source: Exchange

Dhoot Transmission and Molbio Diagnostics IPOs received strong demand on the final day of bidding, with the two mainboard issues getting subscribed 74.21 times and 70.26 times.

DHOOT TRANSMISSION The ₹3,067-crore Dhoot Transmission IPO was subscribed 74.21 times, led by QIBs whose portion was subscribed 212.92 times, followed by NIIs 51.93 times, retail investors 8.12 times and employees 8.14 times. The Maharashtra-based

company had raised ₹918.3 crore from anchor investors. The IPO came out with a price band of ₹829-871. The issue comprised a fresh issue of ₹1,400 crore and an OFS of ₹1,667 crore by promoters BC Asia Investments XV Ltd, an entity of PE firm Bain Capital, and Mangalam Capital Pvt Ltd. It plans to use proceeds

from the fresh issue towards repayment or prepayment of certain outstanding borrowings, investment in subsidiaries for debt repayment and setting up new wiring harness manufacturing plants in Jhajjar, Haryana, and Hosur, Tamil Nadu.

MOLBIO DIAGNOSTICS Molbio Diagnostics' IPO was

subscribed 70.26 times. The QIB portion was booked 186.39 times, while the NII category was subscribed 49.80 times. The retail portion was subscribed 12.96 times and the employee portion 13.28 times. The point-of-care diagnostics company, backed by Temasek and Motilal Oswal Private Equity, raised ₹281.5 crore from anchor investors. The IPO has a price band of ₹768-807 per share. The IPO comprised a fresh issue of ₹200 crore and an OFS of ₹739.7 crore by existing shareholders. Both the stocks are proposed to be listed on the BSE and NSE on August 17.

Shiprocket India IPO: Priced for orbit, profits stay grounded

Kumar Shankar Roy bl. research bureau

E-commerce enablement company Shiprocket has come out with a ₹1,617-crore IPO at ₹92-97 a share. The issue closes on August 14. It comprises a fresh issue of ₹885.5 crore and an offer for sale (OFS) of about ₹732 crore. The company has no identifiable promoter. Of the fresh proceeds, ₹210 crore will be used to repay borrowings, which stood at ₹242 crore as of FY26 end. About ₹365.6 crore is earmarked for marketing and technology infrastructure. The balance will largely go towards acquisitions and general corporate purposes.

ANALYSIS.

Seven financial investors and three founders are participating in the OFS. Three late-stage investors — L&R India Fund I, Moore Strategic Ventures and AFOS LLC — are exiting completely. At the IPO cap price of ₹97, these three will exit at losses of about 28-41 per cent. The founders are only partially selling their holdings. Bertelsmann, Tribe Capital and Eternal (Zomato) will remain among the top 10 public shareholders post the IPO. Shiprocket provides logistics and commerce services mainly to online merchants and D2C brands. It has a profitable core shipping business, but its faster-growing newer businesses are making large losses. As a result, consolidated profitability remains weak. At an enterprise value of ₹6,329 crore, Shiprocket trades at 359 times FY26 adjusted EBITDA. Even if adjusted EBITDA jumps almost six-fold to ₹100 crore in FY27, the multiple would still be about 63 times. Unicommerce eSolutions, Shiprocket's listed peer as per the RHP, trades at around 25 times EV/EBITDA. It had more than doubled on listing in August 2024, but is now sharply below its debut price despite

IPO rating	
Shiprocket India	
Business	★★★★★

Management	★★★★★
Valuation	★★★★★
Overall	★★★★★
Rankings 1 to 5, 1 denoting lowest and 5 highest	
Offer period	Aug 12-14, 2026
Price band (per share)	₹92-97
Implied market cap	₹7,058 cr (at upper band)

strong revenue and profit growth. On EV-to-gross profit, Shiprocket trades at about 11.9 times against around 5.9 times for Unicommerce. At IPO price, investors are being asked to pay today for much of the future improvement. Investors can skip the IPO. The stock can be revisited if 'emerging business' losses fall materially, 'core' growth and margins hold up or the share price corrects to offer better valuation comfort.

BUSINESS Shiprocket's basic proposition is simple. A small online merchant may not have enough parcel volume to negotiate attractive rates with several courier companies. Shiprocket combines the volumes of a large merchant base and connects sellers with courier partners through a common technology platform. A merchant can pull orders from its online store into Shiprocket, compare courier options, generate shipping labels and track deliveries. Shiprocket also helps manage failed deliveries, returns and cash-on-delivery remittances. Physical parcel movement is largely handled by third-party courier companies. Domestic shipping and related applications form its 'core business'. 'Emerging business' includes cargo and fulfillment, cross-border shipping, checkout, advertising and marketing. Fastrr Checkout is another offering. It helps online sellers

simplify checkout by managing addresses, payment options, COD, discounts and shipping rules.

WHAT WORKS Shiprocket has built meaningful scale. Consolidated revenue increased from ₹1,316 crore in FY24 to ₹2,024 crore in FY26, a two-year CAGR of 24 per cent. More importantly, its 'core business' is profitable. Revenue grew 13.7 per cent to ₹1,485 crore in FY26. Adjusted EBITDA from this was ₹186.6 crore, giving it a healthy 12.6 per cent margin. Some operating indicators are also improving. Unique transactions grew about 23 per cent in FY26. Core customer-acquisition cost declined further, and the repeat rate among core end-consumers increased from 51.1 per cent to 57.8 per cent. Average revenue per 'Power Merchant' (average of more than 100 unique transactions per active month) also increased nearly 24 per cent to ₹17.8 lakh. The company's newer products can help it earn more from the same merchant base rather than relying only on parcel shipping.

WHAT DOESN'T WORK The main concern is the profitability of growth. Emerging Business revenue jumped 65.2 per cent to ₹538.7 crore in FY26. But it reported an adjusted EBITDA loss of ₹169 crore, giving it a negative margin of 31.4 per cent. The profitable Core Business generated ₹186.6 crore of adjusted EBITDA, but almost all of this was absorbed by Emerging Business losses. Consolidated adjusted EBITDA was, therefore, only ₹17.65 crore on ₹2,024 crore of revenue, a margin of less than 1 per cent. Shiprocket also reported a statutory net loss of ₹79.2 crore. There are some signs of moderation even within 'core'. Core Power Merchants declined from 9,242 in FY25 to 8,815 in FY26. Thus, investors can skip the IPO and revisit the stock later.

Ardee Industries ends Day 1 with 27% gains

FIRM SHOW. (from left) Krishnan Iyer, Head-Issuer Relationships, NSE, with Sandeep Aggarwal, CMD, and Nikunj Aggarwal, Whole-time Director, Ardee Industries, at the listing ceremony

Our Bureau Bengaluru

Ardee Industries shares made a strong market debut on Wednesday, listing at a 38.8 per cent premium at ₹73.60 on the BSE over the IPO price of ₹53. However, the stock failed to sustain the listing gains and closed at ₹67.13, up 27 per cent above the offer price. The stock debuted at ₹72 on the NSE and closed at ₹67.12. Shivani Nyati, Head of Wealth at Swastika Investmart Ltd, said Ardee Industries made a strong debut and emphasised that the post-listing outlook remained positive. Nyati said it is supported by attractive valuations, strong RoNW of 57.46 per cent, healthy profitability and the company's presence in the growing circular economy and recycling space. The ₹426-crore IPO of Ardee Industries received strong participation from investors, with the issue getting subscribed 133.66 times. The IPO received bids for 780 crore shares against 5 crore shares on offer.

Horizon Parks' ₹2,600-cr IPO opens on August 17

Anupama Ghosh Mumbai

Horizon Industrial Parks Ltd will open its initial public offering for subscription on August 17, with a price band of ₹57-60 a share. The offer closes on August 19. The IPO is entirely a fresh issue aggregating ₹2,600 crore, meaning promoter Blackstone is not offloading any stake. Bids can be placed for a minimum lot of 250 shares. The proceeds will be used entirely for debt repayment. The company carried roughly ₹6,700 crore in gross debt heading into the offer. Combined with a ₹1,650 crore pre-IPO private placement completed in December 2025, which drew investors including 360 One, SBI Life and Radhakishan Damani, the total primary capital raised stands at ₹4,250 crore, which the company says will retire approximately two-thirds of its debt. Urvish Rambhia, CEO, said, "We have grown from 10 million to 60 million sq ft in just five years." Ashish Mohta, Head of Real Estate India at Blackstone, said the listing marks Blackstone's 15th IPO in India and seventh real estate listing, calling it "a continuation of our efforts to drive innovation in Indian capital markets".

TODAY'S PICK.

Aarti Industries (₹530.75): BUY

Gurumurthy K bl. research bureau

The short-term outlook is bullish for Aarti Industries. The stock surged over 5 per cent on Wednesday, breaking above a key resistance level of ₹520. The region between ₹520 and ₹515 will now act as a good support zone and limit the downside. The stock has been moving inside a bull channel since mid-January. We see high chances for Aarti Industries' share price to reach ₹590, the upper end of the channel, in the coming weeks. Traders can buy Aarti Industries shares now at ₹531. Accumulate on dips at ₹524.

Keep the stop-loss at ₹504. Trail the stop-loss up to ₹536 as soon as the stock goes up to ₹543. Revise the stop-loss higher to ₹547 and ₹563 when the price touches ₹555 and ₹572 respectively. Exit the long positions at ₹580. Note: The recommendations are based on technical analysis. There is a risk of loss in trading

Sun TV Q1 PAT rises
17 per cent to ₹619 cr

Chennai: Sun TV Network Ltd reported a 17 per cent uptick in net profit at ₹619 crore in Q1FY27, against ₹529 crore in the corresponding quarter last year. Revenue from operations was up 13 per cent at ₹1,458 crore (₹1,290 crore). The Board of Directors also declared an interim dividend of ₹5 per share (100 per cent). **OUR BUREAU.**

Vadilal Industries Q1
net profit jumps 96%

Ahmedabad: One of India's largest ice-cream manufacturers, Vadilal Industries Ltd reported a 95.5 y-o-y growth in consolidated net profit attributable to owners at ₹131 crore for the first quarter of FY27, supported by strong growth in revenue from operations. The group is primarily engaged in the food business. **OUR BUREAU**

RBI unveils draft directions on interest rates on loans for all lenders

Our Bureau
Mumbai

The RBI on Wednesday released draft directions on “Interest Rates on Loans and Advances”, prescribing a principles-based framework for determination of interest rates on both fixed rate and floating rate loans, commen-

‘Despite headwinds, exports up by about 15% in April-July’

TRADE AVENUES. Nine FTAs finalised in last four years will open up big markets: Goyal

Our Bureau
New Delhi

Despite global economic uncertainties, India's exports surged by about 15 per cent during the April-July period of the current fiscal, according to Commerce and Industry Minister Piyush Goyal.

The Minister added that the nation is on track to hit \$1 trillion export target for goods and services in 2026-27, up from \$863 billion in 2025-26.

“During the first four months of this fiscal, about 15 per cent growth is there in exports,” he said on Wednesday. The final exports and import numbers for July will be released on August 13.

Today's \$4 trillion economy is set to become at least a \$30 trillion economy by the year 2047

PIYUSH GOYAL
Commerce Minister

The Minister said the nine free trade agreements (FTAs) finalised by India in the last four years will open up big markets for the domestic industry. These nine pacts together account for about two-thirds of world trade.

“The whole world is witnessing India's emerging

strength. The whole world wants to establish trade ties with India. Today's \$4 trillion economy is set to become at least a \$30 trillion economy by the year 2047,” he said.

The nine FTAs mentioned by Goyal span 38 countries. The pacts are with Mauritius, the UAE,

Australia, the EFTA bloc (Switzerland, Iceland, Norway, Liechtenstein), the UK, Oman, New Zealand, the EU and the US (only a framework to an interim deal has been signed with the US).

During April-June this fiscal, India's goods exports increased 15.92 per cent to \$129.32 billion, while imports rose 19.89 per cent to \$216.18 billion.

Merchandise trade deficit in April-June 2026-27 was \$86.86 billion, compared to \$68.75 billion in the same period last year.

With the West Asian crisis continuing to put pressure on freight and insurance cost for India's shipments to the region as well as Europe, exporters' profits have taken a hit.

Gokaldas Exports reports 7% profit rise in first quarter

Our Bureau
Bengaluru

Textile manufacturer Gokaldas Exports reported a 7 per cent y-o-y increase in profit after tax (PAT) to ₹44 crore for the first quarter of FY27, while total income rose 21 per cent to ₹1,180 crore.

The growth came despite a 12 per cent y-o-y decline in Indian apparel exports during the quarter, with Gokaldas benefiting from higher order execution and realisations in its India business. Total income from India grew 16 per cent y-o-y.

The firm's Africa business was another key growth driver, with income rising 45 per cent y-o-y.

“Better order execution in India and higher volume in Africa led to a strong income growth in the quarter,” said Sivaramakrishnan Ganapathi, VC and MD, Gokaldas Exports.

MDR: FinMin mulls selective levy and tiered sops to end subsidising industry's UPI cost

Shishir Sinha
New Delhi

The Finance Ministry has told a Parliamentary panel that two options related to Merchant Discount Rates (MDR) are being considered to sustain the Unified Payment Interface (UPI) ecosystem and reduce the burden on the exchequer.

The panel cautioned that delay in operationalising enabling statutory provision for levying the MDR on high-value transactions might have serious repercussions.

TWO OPTIONS

“Given the sustainability of the UPI ecosystem and the burden on the government exchequer, the Department is currently exploring two options. First, examining the feasibility of restoring MDR for certain high threshold transactions/merchants; and, second, a tiered incentive structure to phase out government support in the next few years,” the Financial Services Department of the Finance Ministry said in a written submission to the Standing Committee on Finance.

From January 2020, zero MDR was announced on all UPI (P2M) transactions to accelerate digital payment adoption and encourage a shift from cash to digital.

In its submission, the Department said that the zero

MDR policy had eliminated the core revenue streams for the UPI ecosystem.

To mitigate this and also to encourage banks and other ecosystem participants to promote digital payments, the government has been implementing the incentive scheme.

Accordingly, for FY 2026-27, a Budget provision of ₹2,000 crore was made against an estimated ₹20,700 crore incurred by the industry (that is, at the rate of ₹1.38 per transaction multiplied by total P2M transactions of 15,000 crore recorded last year).

Further, it submitted that the incentive is paid in reimbursement mode only after the completion of transactions' submission of data by banks.

NEGATIVE LIST

Last week, Parliament approved an amendment to the Payment and Settlement Act as part of the Taxation and Other Laws Amendment Bill.

This empowers the government to notify a list of electronic modes of payment to be exempted from any charge. Excluded modes will attract MDR for which threshold, rates, etc., will be notified.

Finance Minister Nirmala Sitharaman has already clarified that no charge is to be levied on consumers and small businesses.

Protein products emerge as expansion engine for Milky Mist

Our Bureau
Chennai

Expansion of its protein products category, along with geographical expansion, is a potential growth avenue for Milky Mist Dairy Food Ltd, with executives saying the company plans to use the funding proceeds from its ongoing initial public offering (IPO) to support these initiatives.

The Erode, Tamil Nadu-based dairy firm has already initiated a project to extract protein from cheese whey, a byproduct of cheese making, and convert it into protein-based products, K Rathnam, Whole-time Director and CEO, Milky Mist, said at a roadshow here for the company's IPO.

The ₹1,553 crore IPO comprises a fresh issue of ₹1,428 crore and an offer for sale of ₹125 crore. The issue that opened on Tuesday will close on Thursday and the end of second day, the IPO was subscribed 2.17 times.

As part of its product-line expansion, Milky Mist plans to install a fully automated yoghurt manufacturing plant with a capacity of 60 tonnes per day.

The facility will have an integrated packing line capable of handling multiple packaging configurations with a packing capacity of 21,600 containers per hour, according to the RHP.

The investments will ex-

milky mist

T Sathishkumar (left), CMD, Milky Mist Dairy Food Ltd, and K Rathnam, Whole-time Director and CEO, at a press conference in connection with the company's IPO in Chennai BUOY GHOSH

pand the firm's manufacturing capabilities in categories where it already has a presence while allowing it to scale production as demand for branded and value-added dairy products increases, said Rathnam.

BROADER TRANSITION

About 69 per cent of the company's business is currently concentrated in southern markets, while it is expanding its presence in western and northern India.

A 50-acre manufacturing facility at Baramati in Maharashtra is currently in the planning stage and could be completed in about three to four years, he added.

The proposed facility is expected to manufacture a

combination of paneer, cheese, curd, yoghurt and ice cream, enabling Milky Mist to locate production closer to consumers in western India. The company did not disclose the proposed investment for the facility.

The firm's strategy is rooted in the broader transition in India's dairy market from unbranded and commodity products to branded, packaged and value-added dairy products, said CMD T Sathishkumar.

The strategy is to capture consumers moving from loose and unbranded dairy products towards branded offerings, where quality, convenience, consistency and product innovation is important, he said.

Yokohama India eyes deeper play in OEM supply segment

Rohan Das
Visakhapatnam

Yokohama India, a wholly owned subsidiary of Japan-based tyre giant Yokohama Rubber Co is actively looking to expand its presence in the Original Equipment Manufacturing (OEM) tyre supply segment.

OEM supply involves tyre makers supplying directly to auto companies for newly manufactured cars.

Yokohama's India business has predominantly been in the after market segment where vehicle owners replace tyres in their cars. The company holds a market share of about 10 per cent in this segment.

Speaking to *businessline*, Anil Gupta, Vice Chairman, Yokohama India, said that being a relatively new entrant in the country, the company's business share from OEM is still fairly low, without giving exact figures. Industry estimates peg Yokohama's OEM business at roughly 5-10 per cent.

“It takes time to grow the

(from left) Harinder Singh, MD and CEO, Yokohama India; Nitin Mantri, Chairman and Anil Gupta, Vice-Chairman

OEM businesses. When you discuss with partners you are not planning for their current lineup of cars but for models that will be launched 3-4 years later. We are in discussions now and hopefully some will materialise soon.”

Gupta was speaking to *businessline* on the sidelines of Yokohama's new Geolander X-CV tyre launch in Vishakhapatnam on Wednesday.

Yokohama India is expecting to grow at 18 per cent in 2026, after posting similar growth in 2025. Gupta said that the growth rate is the highest in the Indian organised tyre market.

PREMIUM TYRES

At a press conference, Nitin

Mantri, Chairman, Yokohama India said that the rapid adoption of SUVs, which now account for nearly 60 per cent of the cars sold in India, has been a significant tailwind for the tyre maker that specialises in premium tyres for this segment.

On the production side, Yokohama has an annual capacity of 4.5 million tyres which it manufactures out of its two facilities in Haryana (2.8 million) and Vishakhapatnam (1.7 million). The Visakhapatnam plant's capacity can be expanded by a further 1.8 million tyres.

Beyond passenger cars, the group also operates a separate off highway tyre

(OHT) business, with separate manufacturing facilities in Gujarat, Tamil Nadu and Visakhapatnam and an under construction unit in Odisha. Overall, the company has

invested around \$700 million- \$800 million across all of these units.

The writer was in Visakhapatnam at the invitation of Yokohama India
