and Arranged Prospectus)

Our Company was originally incorporated as "AT Capital Advisory India Private Limited" as a private limited company under the provisions of the Companies Act, 1956, pursuant to a certificate of incorporation dated December 5, 2011, issued by the Registrar of Companies, National Capital Territory of Delhi and Haryana at New Delhi. Subsequently, the name of our Company changed to "Juniper Green Energy Private Limited", pursuant to a board resolution dated November 22, 2018 and a shareholders' resolution dated November 28, 2018 to reflect a shift in our focus towards the business and a fresh certificate of incorporation was issued by the Registrar of Companies, Delhi and Haryana at New Delhi on December 8, 2018. Upon the conversion of our Company from a private limited company to a public limited company, pursuant to a Board resolution dated May 13, 2025 and a special resolution passed by our Shareholders in the extra-ordinary general meeting dated May 22, 2025, the name of our Company was changed to "Juniper Green Energy Limited", and a fresh certificate of incorporation dated May 26, 2025 was issued by the Registrar of Companies, Central Processing Centre. For details in relation to the changes in the registered office of our Company, see "History and Certain Corporate Matters - Changes in the registered office of our Company" on page 396 of the Red Herring Prospectus dated July 23, 2026 ("RHP").

IN MAKING AN INVESTMENT DECISION, POTENTIAL INVESTORS MUST ONLY RELY ON THE INFORMATION INCLUDED IN THE RED HERRING PROSPECTUS AND THE TERMS OF THE ISSUE, INCLUDING THE RISKS INVOLVED AND NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION ABOUT THE ISSUE AVAILABLE IN ANY MANNER. IN RELATION TO PRICE BAND, POTENTIAL INVESTORS SHOULD ONLY REFER TO THIS PRICE BAND ADVERTISEMENT FOR THE ISSUE AND SHOULD NOT RELY ON ANY MEDIA ARTICLES/REPORTS IN RELATION TO THE VALUATION OF OUR COMPANY AS THESE ARE NOT ENDORSED, PUBLISHED OR CONFIRMED EITHER BY THE COMPANY OR THE BOOK RUNNING LEAD MANAGERS ("BRLMs").
 In accordance with the recommendation of committee of independent Directors of our Company, pursuant to the resolution dated July 24, 2026, the above provided price band is justified based on quantitative factors/KPIs disclosed in the "Basis for Issue Price" section on page 185 of the RHP vis-a-vis the weighted average cost of acquisition ("WACA") of primary and secondary transaction(s) as applicable, disclosed in the "Basis for Issue Price" on page 185 of the RHP.

RISK TO INVESTORS

(For details, refer to the "Risk Factors" section on page 25 of the RHP)

1. Reliance on certain off-takers risk:

A significant portion of our revenue from operations is derived from the sale of electricity generated at our projects and our top two off-takers collectively contributed 86.06%, 91.11% and 97.00% of our revenue from operations for Fiscals 2026, 2025 and 2024, respectively. The loss of any such key commercial relationships could adversely affect our business, results of operations, financial condition and cash flows.

Particulars	2026		Fiscal 2025		2024	
	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)	Amount (₹ million)	Percentage of revenue from operations (%)
Revenue generated from our off-taker - GUVNL	2,865.17	39.85	2,426.91	47.71	2,009.51	51.32
Revenue generated from our off-taker - MSEDCL	3,321.85	46.21	2,207.73	43.40	1,788.70	45.68
Total	6,187.02	86.06	4,634.64	91.11	3,798.21	97.00

2. High dependence on suppliers risk:

Our business is dependent on suppliers for the procurement of critical components, equipment, material and other goods for the operation of our projects as well as for other business operations. Our top 10 suppliers collectively contributed to 84.42%, 79.98% and 87.52% of our total purchases for Fiscals 2026, 2025 and 2024, respectively. Interruptions in the supply of our critical components and other goods could adversely affect our business operations, financial position and cash flow.

3. Encumbrance of Equity Shares risk:

Juniper Renewable Holdings Pte. Ltd. ("Juniper Renewable"), one of our Corporate Promoters, had pledged 7,194,462 Equity Shares (1.46% of total pre-issue share capital on a fully diluted basis) in favour of IREDA as security for a loan availed by our Company. Additionally, post-listing, we are required to create a further pledge over certain Equity Shares in favour of IREDA as security in relation to one of our project financing arrangements. Any default under these pledge arrangements will entitle IREDA to enforce the pledge, which could dilute the shareholding of our Corporate Promoter and may adversely affect our business, results of operations, cash flows and prospects.

4. Geographical concentration risk:

Our renewable energy projects are located in the states of Gujarat, Maharashtra, Rajasthan and Madhya Pradesh. Our operations are susceptible to local and regional factors including adverse changes in government policies, political factors, economic conditions, weather conditions, natural disasters, the outbreak of infectious diseases and other unforeseen events and circumstances affecting these states. Any such events may disrupt our projects, adversely impact our ability to meet contractual obligations, and materially affect our operations, cash flows, financial condition and results of operations.

5. Land acquisition risk:

Our development of renewable energy projects may be restrained by our inability to identify or acquire suitable land sites. If we are unable to identify suitable land on commercially acceptable terms, our ability to develop new renewable energy projects on a timely basis or at all might be affected, which could result in the imposition of liquidated damages and/or reductions in tariffs which could adversely affect our business, financial condition, cash flows and results of operations.

6. Dependence on environmental conditions risk:

Our revenue is a direct function of the electricity we generate, which is significantly influenced by environmental conditions, irradiation and wind speed. Electricity output may decrease under adverse conditions including cloudy weather, sandstorms, heavy rainfall, solar eclipses and environmental pollution. The seasonal nature of our energy production can place additional demands on our working capital reserves, particularly during periods of reduced cash flow from operations. Any adverse change in environmental conditions may materially impact our business, financial condition, cash flows and results of operations.

7. Related party transactions risk:

In the ordinary course of our business, we have in the past entered into, and may continue to enter into, related party transactions. While all such transactions have been conducted on an arm's length basis in accordance with the Companies Act, relevant Accounting Standards and applicable regulations, we cannot assure you that we might not have achieved more favourable terms

10. Utilization of a portion of Net Proceeds for repayment of loan facilities from an affiliate of a Book Running Lead Manager:

A portion of our Net Proceeds may be used to repay or pre-pay certain loan facilities availed from The Hongkong and Shanghai Banking Corporation Limited. While HSBC Securities and Capital Markets (India) Private Limited is one of our Book Running Lead Managers and The Hongkong and Shanghai Banking Corporation Limited is an affiliate of our Book Running Lead Managers, these loans were sanctioned in the ordinary course of business and are not considered a conflict under applicable SEBI Regulations. The Board has chosen the loans and facilities to be repaid/prepaid based on commercial considerations. However, the use of Net Proceeds for repayment of such loans may still be perceived as a potential conflict of interest.

11. The price to earnings ratio based on diluted EPS for Financial Year 2026 is 257.83 and 271.08 times at the lower and upper end of the Price Band respectively.

12. The weighted average return on net-worth for Fiscals 2026, 2025 and 2024 is 1.34%.

13. Set forth below are details of the price at which specified securities were acquired in the last three years preceding the date of the Red Herring Prospectus by each of our Promoters, Promoter Group and shareholders entitled with the right to nominate directors or any other rights:

Name of acquirer/shareholder	Nature of the transaction	Nature of specified securities	Face value (in ₹)	Date of acquisition	Number of specified securities	Acquisition price per specified shares (in ₹)

Juniper Renewable Holdings Pte. Ltd.	Equity Shares for Equity Shares every 1 Equity Share held		10	March 26, 2025	444,535,720	NA

⁽¹⁾As certified by ARAJ & Associates LLP, Chartered Accountants, bearing firm registration number 023981NN500116, by way of their certificate dated July 24, 2026.

⁽²⁾Consideration for such Equity Shares (issued pursuant to conversion of CCDs) was paid at the time of issuance of such CCDs, which were acquired at a price of ₹100 per CCD in two tranches (the date of allotment of CCDs 1 and CCDs 2 was July 30, 2024 and September 10, 2024, respectively).

⁽³⁾Pursuant to a resolution dated July 24, 2024 and July 30, 2024 approved by our Shareholders and Board, respectively, 40,000,000 compulsorily convertible debentures ("CCDs 1") were allotted to Juniper Renewable Holdings Pte. Ltd. Thereafter, pursuant to a resolution dated July 24, 2024 and September 10, 2024 approved by our Shareholders and Board, respectively, 16,350,000 compulsorily convertible debentures ("CCDs 2", together with CCDs 1, "CCDs") were allotted to Juniper Renewable Holdings Pte. Ltd. Subsequently, pursuant to a resolution dated December 20, 2024 approved by our Board, all 56,350,000 CCDs were converted into 5,782,333 equity shares and allotted to Juniper Renewable Holdings Pte. Ltd. on December 20, 2024. Accordingly, as on the date of the Red Herring Prospectus, there are no outstanding CCDs.

⁽⁴⁾Also a shareholder with nomination right. For further details, see section titled "History and Certain Corporate Matters - Details of the Shareholders' Agreement and other material agreements" on page 409 of the RHP.

Juniper Renewable Holdings Pte. Ltd. ("Juniper") was a subsidiary of Juniper Renewable Holdings Pte. Ltd. ("Juniper Renewable Holdings Pte. Ltd."). On December 20, 2024 approved by our Board, all 56,350,000 CCDs were converted into 5,782,333 equity shares and allotted to Juniper Renewable Holdings Pte. Ltd. on December 20, 2024. Accordingly, as on the date of the Red Herring Prospectus, there are no outstanding CCDs.

⁽⁵⁾Also a shareholder with nomination right. For further details, see section titled "History and Certain Corporate Matters - Details of the Shareholders' Agreement and other material agreements" on page 409 of the RHP.

14. Weighted average cost of acquisition of all Equity Shares transacted during the last one year, 18 months and three years from the date of the Red Herring Prospectus:

Period	Number of Equity Shares transacted of face value of ₹10 each	Weighted average cost of acquisition (in ₹)	Cap Price is 'x' times the weighted average cost of acquisition	Range of acquisition price: lowest price - highest price (in ₹)
One year preceding the date of the Red Herring Prospectus	N.A.	N.A.	N.A.	N.A.
18 months preceding the date of the Red Herring Prospectus	448,446,220	10.15	22.17	Nil - 1,163.84
Three years preceding the date of the Red Herring Prospectus	473,951,525	52.06	4.32	Nil - 1,163.84

⁽⁶⁾As certified by ARAJ & Associates LLP, Chartered Accountants, bearing firm registration number 023981NN500116, by way of their certificate dated July 24, 2026.

...continued on next page...

...continued from previous page:

dated July 24, 2026.

⁽¹⁾Weighted average cost of acquisition has been arrived at by considering only the cost of shares transacted by the Promoters on account of any further issue, conversion of CCDs, bonus issue or secondary transfers, i.e., the cost paid or received by the Promoters for transactions in Equity Shares, divided by the total number of Equity Shares transacted.

⁽²⁾Nil represents cost of Equity Shares acquired pursuant to a bonus issue (at no consideration).

⁽³⁾The details in the table above have been calculated for all the Equity Shares acquired by the Promoters.

15. Weighted average cost of acquisition, Floor Price and Cap Price

The Floor Price is 6.05 times and the Cap Price is 6.36 times the weighted average cost of acquisition based on Primary Issuances and Secondary Transactions as disclosed below:

Type of transactions	Weighted average cost of acquisition per Equity Share (₹)*	Floor Price ₹214 (in times)	Cap Price ₹225 (in times)
WACA for Primary Transactions	N.A.	N.A.	N.A.
WACA for secondary sale/acquisition of share	N.A.	N.A.	N.A.

Since there were no Primary Issuance or Secondary Transactions of equity shares of our Company during the 18 months preceding the date of filing of the Red Herring Prospectus, where either issuance or acquisition/ sale is equal to or more than five per cent of the fully diluted paid-up share capital of our Company (calculated based on the pre-issue capital before such transaction) and excluding employee stock options granted but not vested) the following are the details based on the last five primary and secondary transactions (secondary transactions where Promoter(s), members of the Promoter Group or Shareholders having the right to nominate Director(s) to the Board of our Company, are a party to the transaction), during the three years preceding the date of the Red Herring Prospectus, irrespective of the size of transactions:

ADDITIONAL INFORMATION FOR INVESTORS

- The Company has not undertaken a pre-IPO placement.
- The Promoters or members of the Promoter Group have not undertaken any transaction of shares aggregating up to 1% or more of the paid-up equity share capital of the Company from the date of filing of the draft red herring prospectus dated June 27, 2025 till date.
- The aggregate Equity Shareholding and percentage of the shareholding of Equity Share capital and post-Issue Equity Shareholding, of our Promoter, members of our Promoter Group and public shareholders (top 10 Shareholders) of our Company is set forth below. Further, as on date, none of the members of the Promoter Group hold any Equity Shares of our Company.

Pre-issue shareholding as on the date of the Red Herring Prospectus			Post-issue shareholding as at Allotment ¹			
Name of the Shareholder	Number of Equity Shares of face value of ₹10 each (on a fully diluted basis)	Pre-issue Shareholding, on a fully diluted basis (%) ²	At the lower end of the Price Band (₹214 per Equity Share)		At the upper end of the Price Band (₹225 per Equity Share)	
			Number of Equity Shares of face value of ₹10 each	Post-Issue Shareholding (%)	Number of Equity Shares of face value of ₹10 each	Post-Issue Shareholding (%)
Juniper Renewable Holdings Pte. Ltd. ³	488,989,292	99.43	488,989,292	84.90*	488,989,292	85.52*

¹ Under six equity shares of face value of ₹10 each, i.e., one equity share of face value of ₹10 each held by each of Sunet Puri, Parag Agrawal, Anushah Malik, Gourav Kumar Kalai, Amit Gupta and Deepak Kalaitkar on behalf of and as nominees of Juniper Renewable, one of the Corporate Promoters.

² Under six equity shares of face value of ₹10 each, i.e., one equity share of face value of ₹10 each held by each of Sunet Puri, Parag Agrawal, Anushah Malik, Gourav Kumar Kalai, Amit Gupta and Deepak Kalaitkar on behalf of and as nominees of Juniper Renewable, one of the Corporate Promoters.

³ This table includes the shareholding of Juniper Renewable Holdings Pte. Ltd. as on the date of the Prospectus. It does not include the shareholding of Juniper Renewable Holdings Pte. Ltd. as on the date of the Prospectus. This table includes the shareholding of Juniper Renewable Holdings Pte. Ltd. as on the date of the Prospectus. *UPI mandate end time and date shall be at 5.00 p.m. on the Bid/Issue Closing Date.

*QIBs and Non-Institutional Investors can neither revise their bids downwards nor cancel/withdraw their Bids.

In case of (i) any delay in unblocking of amounts in the ASBA account (including amounts blocked through the UPI Mechanism) exceeding two Working Days from the Bid/Issue Closing Date, for cancelled/withdrawn/deleted ASBA Forms, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the Bid Amount, whichever is higher, from the date on which the request for cancellation/withdrawal/deletion is placed in the Stock Exchanges bidding platform until the date on which the amounts are unblocked; (ii) any blocking of multiple amounts for the same ASBA Form (for amounts blocked through the UPI Mechanism), the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the total cumulative blocked amount except the original application amount, whichever is higher from the date on which such multiple amounts were blocked till the date of actual unblock; (iii) any blocking of amounts more than the Bid Amount, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the difference in amount, whichever is higher from the date on which such excess amounts were blocked till the date of actual unblock; (iv) any delay in unblocking of non-allotted partially allotted Bids, exceeding four Working Days from the Bid/Issue Closing Date, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the Bid Amount, whichever is higher from the date of actual unblock; (v) any delay in unblocking of non-allotted fully allotted Bids, exceeding four Working Days from the Bid/Issue Closing Date, the Bidder shall be compensated at a uniform rate of ₹100 per day or 15% per annum of the Bid Amount, whichever is higher from the date of actual unblock. The BRLMs shall, in their sole discretion, identify and fix the liability on such intermediary or entity responsible for such delay in unblocking. The Bidder shall be compensated by the intermediary responsible for causing such delay in unblocking in accordance with applicable law. Further, investors shall be entitled to compensation in the manner specified in the SEBI Master Circular in case of delays in receiving investor's grievances in relation to blocking/unblocking of fund. The processing fees for applications made by the UPI Bidders may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Master Circular.

ASBA # Simple, Safe, Smart way of Application!!!

*Applications Supported by Blocked Amount ("ASBA") is a better way of applying to Issues by simply blocking the fund in the bank account. For further details, check section on ASBA.

Mandatory in public issues. No cheque will be accepted.

UPI - Now available in ASBA for Retail Individual Investors and Non-Institutional Investors applying in public issues where the application amount is up to ₹500,000, applying through Registered Brokers, Syndicate, CDTs & RTAs. Retail Individual Investors and Non-Institutional Investors also have the option to submit the application directly to the ASBA Bank (SCSBs) or to use the facility of linked online trading, demat and bank account. Investors are required to ensure that the bank account used for bidding is linked to their PAN. Bidders must ensure that their PAN is linked with Aadhaar and are in compliance with CBTDT Notification dated February 13, 2026, issued by Central Board of Direct Taxes and the subsequent press releases, including press releases dated June 25, 2021 and September 17, 2021 and CBTDT circular no. 1 of 2022, dated March 30, 2022 read with press release dated March 28, 2023 and any subsequent press releases in this regard.

ASBA has to be availed by all the investors except Anchor Investors. UPI may be availed by (i) Retail Individual Investors in the Retail Portion; (ii) Non-Institutional Investors with an application size of up to ₹500,000 in the Non-Institutional Portion. For details on the ASBA and UPI process, please refer to the details given in the Bid Cum Application Form and the prospectus and also please refer to the section "Issue Procedure" on page 710 of the RHP. The process is also available on the website of Association of Investment Banks of India (AIBI) and Stock Exchanges and in the General Information Document. The Bid Cum Application Form and the Prospectus can be downloaded from the websites of the Stock Exchanges and the website of the AIBI. For the latest UPI app and banks live on IPO, please refer to the link: www.sebi.gov.in. UPI Bidders Bidding using the UPI Mechanism may apply through the SCSBs and mobile applications whose names appear in Annexure-43, respectively as updated from time to time. For the latest UPI app and banks live on IPO, please refer to the link: www.sebi.gov.in. UPI Bidders Bidding using the UPI Mechanism may apply through the SCSBs and mobile applications whose names appear in Annexure-43, respectively as updated from time to time. Kotah Mahindra Bank Limited and Axis Bank Limited have been appointed as the Sponsor Banks for the Issue, in accordance with the requirements of SEBI circular dated November 1, 2018. For Issue related queries, please contact the BRLMs on their respective email IDs as mentioned below. For UPI related queries, investors can contact NPCI at the toll-free number: 18001201740 and mail id: ugi@npci.org.in.

Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders/Applicants' sole risk. Investors must ensure that their PAN is linked with Aadhaar and are in compliance with the notification issued by Central Board of Direct Taxes dated February 13, 2026 and read with press releases dated June 25, 2021, March 30, 2022 and March 28, 2023 and any subsequent press releases in this regard.

Contents of the Memorandum of Association of our Company as regards its objects: For information on the main objects of our Company, investors are requested to see "History and Certain Corporate Matters" on page 396 of the RHP. The Memorandum of Association of our Company is a material document for inspection in relation to the Issue. For further details, see "Material Contracts and Documents for Inspection" on page 754 of the RHP.

Liability of the members of our Company: Limited by shares.

Amount of Share Capital of our Company and Capital Structure: As on the date of the RHP, the authorized share capital of our Company is ₹10,000,020,000 comprising of 1,000,002,000 Equity Shares of face value ₹10 each. The issued, subscribed and paid-up share capital of our Company is ₹4,889,892,920 comprising 488,989,292 Equity Shares of face value of ₹10 each. For details of the capital structure of our Company, see "Capital Structure" on page 148 of the RHP.

Names of the Initial Signatories to the Memorandum of Association of our Company and the number of Equity Shares subscribed by them: The names of the initial signatories of the Memorandum of Association of our Company along with their allotment are: Hemant Tota and Sunet Puri were the initial subscribers to the MoA. For details on the share capital history and capital structure of our Company see "Capital Structure" on page 148 of the RHP.

Listing: The Equity Shares of face value of ₹10 each that will be offered through the Red Herring Prospectus are proposed to be listed on the Stock Exchanges. We have received pre-inciple approvals from BSE and NSE for the listing of the Equity Shares of face value of ₹10 each pursuant to letters, each dated August 14, 2025. For the purpose of this Issue, NSE is the Designated Stock Exchange. A signed copy of the Red Herring Prospectus has been filed and a signed copy of the Prospectus shall be filed with the ROC in accordance with Section 24(4) of the Companies Act 2013. For details of the material contracts and documents available for inspection from the date of the Red Herring Prospectus up to the Bid/Issue Closing Date, see "Material Contracts and Documents for Inspection" on page 754 of the RHP.

Disclaimer Clause of the Securities and Exchange Board of India ("SEBI"): SEBI only gives its observations on the draft Issue document and this does not constitute approval of either the issue or the specified securities stated in the Issue document. Further ASBA Application forms can be obtained from Designated Branches of SCBs, the list of banks that are available on website of SEBI at www.sebi.gov.in and website of Stock Exchanges at www.nseindia.com and www.bseindia.com. The investors are required to fill the Bid Cum Application form and submit the same to the relevant SCBs at the specified locations or registered brokers at the broker centers or RTA or CDPs. The SCBs will block the amount in the account as per the authority contained in application.

Juniper Green Energy Limited is proposing, subject to applicable statutory and regulatory requirements, receipt of requisite approvals, market conditions and other considerations, to make an initial public offering of its Equity Shares and has filed the red herring prospectus dated July 23, 2026 with the Registrar of Companies, National Capital Territory of Delhi, at South Delhi. The RHP is available on the website of SEBI at www.sebi.gov.in, as well as on the websites of the Stock Exchanges i.e. BSE and NSE at www.bseindia.com and www.nseindia.com, respectively, on the website of our Company at www.juniperengreen.com and the websites of the Book Running Lead Managers, namely, ICICI Securities Limited, HSBC Securities and Capital Markets (India) Private Limited, JM Financial Limited and Kotak Mahindra Capital Company Limited at www.icicisecurities.com, www.business.hsbc.co.in, www.jmf.com and www.investmentsbank.kotak.com, respectively. Potential investors should note that investment in equity shares involves a high degree of risk and details relating to such risks, please see the section titled "Risk Factors" on page 25 of the RHP. Potential investors should not rely in the draft red herring prospectus dated June 27, 2025 for making any investment decision but should only rely on the information included in the RHP filed by the Company with the RHC, SEBI and Stock Exchanges. This announcement is not an issue of securities for sale in the United States or elsewhere. This announcement has been prepared for publication in India only and is not for publication or distribution, directly or indirectly, in or into the United States. The Equity Shares offered in the issue have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended ("U.S. Securities Act") or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold (a) in the United States only to "qualified institutional buyers" (as defined in Rule 144A under the U.S. Securities Act and referred to in the Red Herring Prospectus as "QIBs") in transactions exempt from, or not subject to the registration requirements of the U.S. Securities Act and (b) outside the United States in "offshore transactions" in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur. The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

On allotment, amount will be unblocked and account will be debited only to the extent required to be paid for allotment of shares. Hence, there will be no need of refund. UPI Bidders can also bid through UPI Mechanism.

IN BRIEF

Amid July rise, Nifty IT passive funds clocked outflows

Passive funds tracking the Nifty IT index witnessed outflows in July even as the sector rebounded sharply from multi-year lows. The combined AUM of Nifty IT index funds and ETFs rose 13.8 per cent to about ₹6,600 crore as of July 30, trailing the Nifty IT index's 18.6 per cent gain during the period. The gap suggests investors booked profits or used the rally to exit at lower levels, resulting in estimated net outflows of ₹280 crore. ABHISHEK KUMAR reports

FPIs infused \$8.44 bn into debt, equity since RBI policy in June

Foreign portfolio investors (FPIs) have infused about \$8.44 billion into Indian debt and equity markets since the RBI's June policy announcement. They were net buyers of \$6.1 billion of debt and \$2.34 billion of domestic equities during the period, according to NSDL data. In June, the Centre exempted foreign investors from taxes on interest income and capital gains on specified gees as part of a broader effort to deepen the domestic bond market and attract foreign capital. ANJALI KUMARI WRITES

E20 debate shifts into high gear

What the government describes as a carefully tested fuel transition is fast becoming a political flashpoint. Opposition parties are mobilising protests against petrol blended with 20 per cent ethanol, or E20, while the policy is drawing scrutiny in Parliament, despite the Centre's insistence that its nationwide rollout is backed by extensive studies and field trials. ARCHISH MOHAN WRITES

W Asia, project delays dent highway building

Down 45% year-on-year to 740 km in April-May FY27

AKSHAT AYUSH
New Delhi, 2 August

Highway construction in the first two months of 2026-27 (FY27) declined by 45 per cent year-on-year (Y-o-Y) to 740 kilometres (km) with the West Asia conflict adding to the sector's woes, as it grapples with project-readiness issues.

This marks a sharp decline from highway construction of 1,344 km and 1,288 km achieved during the same periods in FY26 and FY25, respectively, according to data from the Ministry of Statistics and Programme Implementation's (MOSPI) Project Assessment Infrastructure Monitoring and Analytics for Nation Building (PAIMANA) dashboard.

"The slowdown is primarily a project-readiness issue combined with impact from the West Asia conflict, not a lack of domestic investment intent or contractor capacity," said Manish Sharma, partner and leader, infrastructure, transport & logistics at PwC India. Highway projects involve layers of work that progress at different speeds, he said, adding that "a contractor may be fully mobilised but unable to deploy resources continuously across the alignment".

Shipping disruptions due to the conflict have also delayed bitumen deliveries, pushing up prices. In April-June FY27, India imported nearly 4.59 lakh tonnes of bitumen, down 45 per cent from 8.36 lakh tonnes imported during the corresponding period of FY26, according to data from the Ministry of Petroleum and Natural Gas' Petroleum Planning and Analysis Cell. India is largely dependent on West Asia for bitumen imports.

According to MoRTH data, the price of bulk VG-40, the bitumen grade used to pave highways, at the Mathura refinery rose from ₹48,892

Source: Project Assessment Infrastructure Monitoring and Analytics for Nation Building (PAIMANA); Ministry of Road Transport & Highways (MoRTH)

Laying the bituminous layer typically marks the final stage of road construction. While earthwork and civil works continue, completed highway km can only be reported once bitumen paving has been completed. Bitumen shortage can, therefore, delay project completion despite ongoing on-site work. "Bitumen shortage can have a disproportionate impact on reported construction even when substantial on-site activity continues," Sharma added.

In a parliamentary reply dated July 23, the minister for road transport and highways, Nitin Gadkari, said the primary reasons behind delayed highway projects were bottlenecks related to land acquisition, statutory clearances and permissions, utility shifting, encroachment removal, law and order issues, poor performance of contractors or concessionaires, and force majeure events such as the Covid-19 pandemic. A MoRTH circular issued on

BUSINESS STANDARD POLL

'Cautious' MPC may stick to status quo

Most economists expect stance to remain 'neutral'

Forecasting stability
Expectations from the monetary policy review meeting scheduled for the upcoming week

ANJALI KUMARI
Mumbai, 2 August

The Reserve Bank of India's (RBI)'s six-member Monetary Policy Committee (MPC) is expected to keep policy rates unchanged for a fourth consecutive meeting, according to all 12 respondents in a *Business Standard* poll. Barring one respondent, all expect the policy stance to remain neutral.

The central bank will announce its policy decision on August 5. Economists expect the central bank to remain in wait-and-watch mode, with the current macroeconomic backdrop offering little reason to change policy stance, although some see scope for a shift as early as the next review.

"We expect the MPC to retain a cautious tone on the outlook, particularly around El Niño-related weather risks and the still-elevated uncertainty from West Asia geopolitical tensions," economists at Goldman Sachs stated.

They expect a cumulative 50 basis points (bps) of rate hikes in this cycle, beginning with a 25 bps increase in October.

Institution	Do you expect the RBI to revise the FY27 growth forecast?	Do you expect the RBI to revise the FY27 inflation forecast?	When do you see the first rate hike?
State Bank of India	No	No	Data dependent: As of now foresee no hikes
Goldman Sachs	No	Yes, lower	October
YES Bank	No	No	December
ICICI Bank	No	No	Data dependent
HDFC Bank	Yes	No	One rate hike by end of FY27
IDFC First Bank	Yes	No, upward	In FY28
Icra	No	No	H2FY27
Bank of Baroda	No	No	October
Emkay Global Financial Services	No	No	Not in near future
STCI Primary Dealer	No	No	Q4FY27
RBL Bank	No	Yes	October
Credit	No	No	Data dependent

All the respondents said the Reserve Bank of India (RBI)'s monetary policy committee (MPC) is expected to keep the policy rate unchanged in its upcoming meeting.

Except RBL Bank, respondents also expected the stance to remain neutral. FY: Financial year; H2FY27: Second half of financial year 2026-27; Q4FY27: Fourth (January-March) quarter of FY27

Minus N-power plans, fresh private investments fell 32% sequentially in Q1

HIMANSHU BHARDWAJ
New Delhi, 2 August

4 of 7 sectors see Q-o-Q dip in new capex plans

India's fresh investment plans' tally in the first quarter of 2026-27 (Q1FY27) cent surged 71 per cent over the previous quarter to about ₹14.77 trillion, with new private projects leading the way with a value of ₹10.59 trillion, 70.6 per cent over Q4FY26 levels.

These numbers were bolstered by four large nuclear power projects worth ₹6.5 trillion announced in Maharashtra this May, and excluding these presents a more sobering picture of the West Asia conflict-affected Q1, according to investment monitoring firm Projects Today.

Barring the four N-power projects, fresh investment plans declined 4.27 per cent quarter-on-quarter (Q-o-Q) to ₹8.27 trillion in Q1FY27 from ₹8.63 trillion in Q4FY26, with private in-

Sectors	No. of projects	Value (₹ crore)	Q-o-Q growth (in %)	% share in total value
Power	214	755,586	507.44	51.17
Manufacturing	453	258,461	-21.51	17.50
Building infra	1,892	226,681	3.45	15.35
Transport	917	189,787	59.51	12.85
Water	314	26,781	-26.24	1.81
Mining	38	17,771	-11.17	1.20
Oil & gas	43	1,464	-90.46	0.10
All sectors	3,871	1,476,531	71.01	100

Source: Projects Today

vestments dropping 31.88 per cent sequentially. New central government capex plans helped soften the moderation, zooming 168 per cent jump to ₹2.72 trillion from ₹1.01 trillion in Q4.

Manufacturing, mining, oil and gas sectors clocked a sequential contraction in Q1, signalling the headline increase in outlay plans didn't mark a broad-based recovery across sectors, but was driven by a few large announcements.

Despite tariff threat

SOHINI DAS
Mumbai, 2 August

Indian pharmaceutical companies are not rushing to move to the United States despite the Trump administration's renewed tariff threat. They are relying on existing US plants, contract manufacturers and selective investments in complex products while retaining India as their principal production base.

US President Donald Trump earlier this month threatened to impose a tariff rate of up to 200 per cent on imported generic drugs after a two-year transition period.

"This is done in order to RESHORE Generic Pharmaceutical Production into America, with a penalty to those Companies that decide not to build Plant and Equipment within the stated period of time given to them," Trump wrote on Truth Social.

An analysis of annual reports for FY26 and recent earnings calls shows that drugmakers are increasing research (R&D) spending, preparing complex-product launches and adding capacity across markets in line with existing strategies rather than undertaking a wholesale relocation of manufacturing to the US.

Dr Reddy's Laboratories Chief Executive Officer (CEO) Erez Israeli said moving a manufacturing facility within the two-year tariff-free window proposed by Trump was not practical.

"As we speak, I don't see any reason to be concerned," Israeli told analysts after the company's April-June quarter results. "It's not practical to move any facility in two years." "Personally, I don't, at this stage, give too much weight to that," he added.

Big Shift after 1991: Only seven of 30 Sensex companies still remain in index

The dropout rate of companies in the index surged in the post-liberalisation economy, even as Indian equities joined the global asset pool, with the entry of foreign institutional investors in the late 1990s

PHOTO: BSE ARCHIVES

KRISHNA KANT
Mumbai, 2 August

Among the changes that liberalisation in 1991 brought to the economic landscape, the most dramatic perhaps is the transformation of India's stock market.

The composition of India's benchmark equity index, the BSE Sensex, reflects the scale of changes in India's corporate landscape with successful companies replacing

laggards at regular intervals. The dropout rate of companies in the index surged post-liberalisation economy, even as Indian equities joined the global asset pool, with the entry of foreign institutional investors in the late 1990s.

Thirty-five years after the reforms, less than a quarter, or just seven, of the constituents of the 30-share index in 1991 have managed to survive in the Sensex. Others have either gone out of business or failed to grow at the pace required to be counted among the country's top 30 listed companies. These changes mirror the broader shift in the Indian economy as it became a services powerhouse.

Firms that have stayed in Sensex since '91

Company	Mar 31, 1991	Jul 31, 2026	CAGR (%)#
Tata Steel	3,654	236,936	12.5
Reliance Industries	1,826	1,769,109	21.5
Tata Motors Passenger Vehicles*	1,788	125,116	12.8
Hindustan Unilever	1,549	493,602	17.7
ITC	902	352,015	18.4
Larsen & Toubro	849	541,845	20.1
M & M	130	422,346	25.7

#Compound annual growth rate between March 1991 and July 2026.
*Tata Engineering & Locomotive Company in 1991; Current mcap of Tata Motors PV doesn't include the value of Tata Motors Commercial Vehicle which was demerged in September 2025. Source: Capitaline, exchange

Few survivors

The list of survivors is led by Tata Steel (then Tata Iron and Steel Company or TISCO). The steel maker was the most valuable index company in

1991, with a market capitalisation of ₹3,653.5 crore or around \$1.9 billion at the end of March 1991. The rupee-dollar exchange rate averaged 19.2 per dollar then,

according to data from the Reserve Bank of India. Reliance Industries was the second biggest with a market cap of ₹1,825.7 crore at the end of March 1991 or around \$950.8 million. Tata Motors Passenger Vehicles (formerly Tata Engineering & Locomotive Company or TELCO) was the third biggest, with a market capitalisation of ₹1,788.3 crore or around \$931.4 million. TELCO became Tata Motors in 2025, and in September 2025, it demerged its commercial vehicle division into an independent company called Tata Motors, while the original company is now called Tata Motors Passenger Vehicles.

Other survivors from 1991 include Hindustan Unilever,

which had a market capitalisation of ₹1,353.1 crore at that time. It was followed by ITC (₹902.2 crore), Larsen & Toubro (₹848.5 crore), Mahindra & Mahindra (₹130 crore). In contrast, five of the 30 index companies from 1991 have either gone bankrupt or become defunct. This includes paper maker Ballarpur Industries (the eleventh biggest in 1991 with a market cap of ₹618.6 crore), and automakers Premier and Hindustan Motors. Two other index companies that went out of business are Futura Polyester and Zenith Steel.

Many companies that were part of the Sensex in 1991 failed to grow adequately and are now either mid or smallcap stocks.

We need to update our definition of TV: Gaurav Banerjee

Q&A Gaurav Banerjee (49) took over as head of Sony Pictures Networks India or SPNI in August 2024, six months after its merger with Zee was called off. SPNI, the Indian arm of Los Angeles-based Sony Pictures Entertainment (SPE), is part of Japan's \$83 billion Sony Corporation Group. SPNI's revenue was stagnant and its 29-channel (SAB, MAX, YAY etc) broadcasting business looked challenged. Two years on revenue is at ₹7,064 crore, up over 9 per cent from FY25. Vanita Kohli-Khandekar met Banerjee at his Mumbai office for a conversation. Edited excerpts:

What has driven the rise in revenue?

■ It is a result of three things. First, Sony LIV (its OTT platform) has grown and content like Asia Cup, *Indian Idol* and *MasterChef* have led that growth.

Second, Sony SAB has grown to become number one (on viewership) for the first time.

Third, SET (Sony Entertainment Television, its flagship channel) has grown nearly 30 per cent from where it was two years ago.

With the launch of our regional less than 100 days away, we are hopeful of further growth.

How is that journey going?

■ The first step is, can we get better at our core market, Hindi?

This network has had pioneering shows like *CID* in the 1990s and *Jassi Jaisi Koi Nahin* in the early 2000s. We have managed to bring some of that innovation back. For example, to connect to young fans on *Indian Idol* there has to be a different interpretation of who's an idol — it is not just a playback singer in a Bollywood movie. It is a pop icon with a different signing signature. We did that two years ago and viewership jumped by over 30 per cent. In the new season of *Kaun Banega Crorepati* (KBC, starting August 10) we have tried to move away from the old world of a question-and-answer show. The answers to most general knowledge questions are in your pocket. Why do you need to watch a show for

that? The new KBC encourages you to think and figure out an answer.

The next step — we want Sony to be meaningful to all of India. Therefore, we are launching a big foray into Marathi, Bangla, Tamil and Telugu.

Madhuri Dixit will be hosting KBC on Sony Marathi and Sony LIV. In Tamil, we will start with *Celebrity MasterChef* with Samantha Ruth Prabhu and a Tamil version of *Indian Idol* with A R Rahman. Plus, big original shows in Bangla. All of this is within this calendar year. And in future years, we will do more content in Telugu, Kannada and Malayalam.

The third thing is sports. One of our first acquisitions, the Asia Cup has done very well. Currently we have Commonwealth Games off to a terrific start. The Asian Games are in September. We have cricket rights in England, New Zealand and Sri Lanka. The effort is to build a large live sports portfolio and use it to build reach on streaming and TV.

Both your key businesses — linear and digital — are profit-

“WITH THE LAUNCH OF OUR REGIONALS LESS THAN 100 DAYS AWAY, WE'RE HOPEFUL OF FURTHER GROWTH”

Gaurav Banerjee
MD & CEO, Sony Pictures Networks India

able. Which of them is the growth driver?

■ Sony is certainly a growth driver. We continue to see value and

growth in television and are putting our money behind it. A week after KBC, we are launching a show called *India Game Show* on SET and Sony LIV. It began on YouTube with two comedians, Bharti (Singh) and Haarsh (Limbachia). We are launching *Crime Patrol*, with (actor) Ajay Devgn as a presenter and bringing a new show with (cricketer) Rohit Sharma.

What was the brief from Los Angeles when you took over?

■ It was simple: Grow the brand of Sony and its entertainment footprint in India.

Sony had been in India for nearly three decades. Its primary identity had been of a television network. My job was to help transform it from being a television network to an entertainment company, which is agnostic of screens and known for high-quality content. We see India becoming a \$10 trillion economy in the next decade. This will be lit up by a billion screens of entertainment. We want a good share of that. Our playbook here is stellar IP (intellectual

property) creation.

What are the challenges in that?

■ The company that I stepped into had been planning on a merger for over three years. And then, for a variety of reasons, it did not happen. For three years, we were trying to not think about the long term and getting to what needs to get done. Now, we believe the best thing for Sony is to build great shows and be agnostic about where viewers see them. This means more investments in building the creative muscle of the company. This has to be a creative company — that is our core product.

Sony is a standalone media firm in a market dominated by Google, Meta and others for whom media is part of a larger business. Does that make you feel vulnerable?

■ Not at all. We have never felt I don't believe anybody in Sony feels that we are a small company. We are not. We are exceptionally large and meaningfully so. Everyone who works at SPNI knows that all that is

needed of us is that we make terrific shows and monetise them well. The simplicity of that aim is a strength — there are no distractions.

Over the last five years, linear television's reach has gone from 900 million people to just over 600 million. Is it in decline?

■ We need to update our definition of television. If we just limit TV to pay television there are challenges but there are also ways out. We have seen growth on pay television on both our lead channels. The larger way to think about TV is connected television, where we are seeing phenomenal growth in this country.

How critical is streaming/digital as a growth driver?

■ It is a large part of our overall business and has grown enormously in the last two years. A lot of the best content lights up both digital and traditional pay TV screens. The most valuable show for us across this divide for several years has been KBC. The Asia Cup took Sony LIV to new heights.

IN BRIEF

IndiGo targets bigger global push, diaspora traffic through India

As IndiGo marks 20 years of operations, the airline that transformed air travel in India is preparing for what its cofounder calls a “longer leap of flying” as it charts an ambitious expansion to connect the global Indian diaspora to their homeland, recapture international traffic now flowing through Gulf hubs and, over the longer term, carry passengers between foreign countries via India. The country's largest airline, which has a domestic market share of more than 66 per cent, is set to induct Airbus A321 XLR aircraft before taking delivery of wide-body A350s from 2028. With an extensive domestic network, IndiGo is prepared to take a “longer leap of flying”, IndiGo Managing Director Rahul Bhatia (pictured) said, adding that the airline will connect more overseas destinations with the A321 XLR and later with the A350.

FSSAI cracks down on USL, Inbrev over flavouring norms

Food safety regulator FSSAI on Sunday said it has issued notices to several alcoholic beverage manufacturing units of United Spirits and INBREW Beverages for adding flavours that mimic a product's natural profile. In an official statement, the FSSAI clarified that there is no prohibition on the use of flavouring substances. The regulator said that the notices have been issued as certain manufacturers are adding the flavour of the standardised alcoholic beverage itself. For instance, the addition of rum flavour in rum or whisky flavour in whisky.

M&M eSUV biz shifts gear from ₹101 cr loss to ₹288 cr profit in a yr

SOHINI DAS
Mumbai, 2 August

Mahindra & Mahindra's (M&M's) electric sport utility vehicle (eSUV) business swung from operating loss of ₹101 crore in the April-June quarter of 2025-26 (Q1FY26) to a profit before interest and taxes (PBIT) of ₹288 crore in the corresponding quarter of 2026-27 (Q1FY27).

This comes as higher volumes, scale, a favourable product mix and government incentives improved the economics of its born-electric portfolio. Revenue from the electric-SUV business rose 77 per cent year-on-year (YoY) to ₹5,430 crore from ₹3,068 crore. PBIT margin improved by 860 basis points (bps) to 5.3 per cent compared with a negative 3.3 per cent a year earlier.

The numbers combine the performance of Mahindra Electric Automobile Ltd (MEAL), which houses the electric vehicle business, and the contract manufacturing income earned by M&M for producing the vehicles. Of its ₹288-crore PBIT reported in the latest quarter, ₹271 crore came from MEAL and ₹17 crore from contract manufacturing undertaken by M&M.

The turnaround has not been linear. The business reported operating loss of ₹101 crore in Q1FY26, which narrowed to ₹34 crore in the following quarter. It slipped back into operating loss of ₹102 crore in Q3FY26 before turning profitable with a PBIT of ₹245 crore in Q4FY26.

The Q4 figure included ₹21-crore

On a roll
M&M eSUV performance (₹ crore)

	Q1FY27	Y-o-Y chg (%)
Revenue	5,430	77
Ebitda	613	452
PBIT*	288	LTP**

*Profit before interest and tax
**Loss to profit
Source: Company

said after the Q1FY26 results. Ebitda has since risen more than fivefold to ₹613 crore, while the margin expanded from 3.6 per cent to 11.3 per cent.

Ebitda margin was marginally lower than the 11.7 per cent recorded in Q4FY26, but the PBIT margin in Q1 improved by 20 bps.

A key contributor to the latest scale-up has been the XEV 9S, M&M's seven-seater electric SUV, which was launched in November 2025, with deliveries beginning in January 2026.

The model has widened appeal of the electric portfolio beyond early adopters seeking futuristic vehicle designs. “The 9S has certainly helped drive movement to electric. There are many mainstream customers who wanted a conventional SUV format in

Govt raises semiconductor demand forecast 50% to \$150 bn by 2030

SURAJEET DAS GUPTA
New Delhi, 2 August

India's semiconductor demand has been sharply revised, with projections now placing it at \$150 billion by 2030 — 50 per cent higher than the estimate made in January last year, according to the Ministry of Electronics and Information Technology (MeitY).

It also expects 20-30 per cent of the country's semiconductor requirement to be met by India's lone fabrication (fab) plant and 12 Outsourced Semiconductor Assembly and Test (Osat)/Assembly, Testing, Marking and Packaging (ATMP) players receiving incentives under the semiconductor scheme, all of which are expected to be fully operational by then. Already, three of them — Micron Technology, Kaynes Technology, and CG Power and Industrial Solutions — are up and running.

In January 2025, the India Electronics and Semiconductor Association, now integrated with Semiconductor Equipment and Materials International, a global association with

The new wafer order

- India's semiconductor market already estimated at about \$64 billion in 2026
- Domestic fab and Osat/ATMP players expected to meet 20-30 per cent of India's chip requirement by 2030
- AI and electronics manufacturing to power the next phase of semiconductor consumption

4,000 member companies worldwide, had pegged India's semiconductor demand for 2030 at \$103.4 billion. India's semiconductor demand for 2026 is estimated at around \$64 billion annually.

A senior MeitY official, explaining the sharp upward revision, said, “We expect India's annual semiconductor demand to reach \$150 billion. This is because the big push in electronics and components through various incentive schemes, which is expected to create a \$500 billion ecosystem, will spur demand for more

chips across categories. There is also rising artificial intelligence (AI)-led demand, with large data centres coming up across the country, which will further increase semiconductor consumption. By then, we expect to have enough capacity to cater to 20-30 per cent of domestic demand.”

The official pointed out that global semiconductor companies are increasingly looking at India as a second base for chip assembly alongside Malaysia, one of the world's leading semiconductor assembly hubs. “We have also held

discussions with companies that are looking to assemble chips in India's Osat/ATMP plants for the global market, while using China to serve their domestic market. It is an evolving scenario.”

The global AI boom, which has encouraged demand for greater processing power and high-end graphics processing units, has also altered earlier projections for the semiconductor industry. Earlier estimates had projected global semiconductor demand to touch \$1 trillion by 2030.

However, the latest AI-driven demand trends and capacity additions to address the global memory chip shortage have prompted the Semiconductor Industry Association, which represents more than 100 US-based member companies, to say that the \$1 trillion milestone will now be achieved by the end of this year. India is already seeing a sharp rise in semiconductor imports. During April-May 2026, imports of semiconductor products rose 44 per cent, from \$5.91 billion in the same period last year to \$8.5 billion.

Ramkrishna Forgings expects export recovery on North American, European orders

SOHINI DAS
Mumbai, 2 August

“WE SHOULD REACH AROUND 35% AS THE

Zee seeks legal advice on Sebi order

Zee Entertainment Enterprise (ZEE) in a statement on Sunday said it has received the order issued by the Securities and Exchange Board of India (Sebi) and is seeking advice from legal experts on it. The company's spokesperson said in a statement, "It (ZEE) will further take all required steps to successfully complete the fund-raising exercise, which is aimed at strengthening its financial foundation, and will also continue to work towards creating value for its stakeholders." "With regards to the allegations levelled against the company and its promoters, the required measures in accordance with the law will be taken, to protect the interest of all stakeholders," it said. **ASAP@PPT**

gain on compulsionary convertible preference shares. PBFT rose another 18 per cent sequentially in Q1 FY27.

Revenue increased from ₹3,068 crore in Q1 FY26 to ₹3,287 crore in Q2, before declining to ₹2,936 crore in Q3. It then climbed to ₹4,820 crore in Q4 and ₹5,430 crore in the latest quarter.

In Q1 FY26, the business had reported earnings before interest, tax, depreciation and amortisation (EBITDA) of ₹111 crore but operating loss of ₹101 crore.

"We did see that we are losing money at a PBIT level because of depreciation on electric vehicles," Rajesh Jejurikar, executive director (ED) and chief executive officer (CEO) for M&M's auto and farm sector had

the seven-seater, and the 9s others that," Jejurikar had told reporters on Thursday. M&M said the XEV 9S was the highest-selling electric vehicle in the country by wholesale volumes during the quarter, despite being priced substantially higher than several mass-market electric models.

"We have cumulatively sold 77,000 electric SUVs since we launched. But what's interesting is XEV 9S, in spite of its price point, is the single-largest-selling electric product in the country," Jejurikar said.

Electric vehicles accounted for 12 per cent of M&M's SUV volumes during Q1 FY27 compared with an industry penetration level of around 9 per cent.

Ramkrishna Forgings Ltd (RKFL) expects exports to grow through FY27 and reach around 35 per cent of revenue, driven by new business wins and recovering demand in North America and Europe, said Chaitanya Jalan, the company's joint managing director. The metal forming company's standalone revenue from operations rose 3.3 per cent to ₹2,754.92 crore in FY26. Export revenue, however, declined 19.9 per cent to ₹1,186.55 crore from ₹1,482.09 crore in FY25 amid weak demand and volatility in its main overseas markets.

OVERALL EXPORT SHARE THIS YEAR AND ARE LOOKING TO GO UP TO 40% BY FY28

Chaitanya Jalan
Joint managing director, Ramkrishna Forgings

Exports accounted for 31.6 per cent of standalone revenue in FY26, down from 40.8 per cent in FY25.

Standalone revenue from operations rose 17.1 per cent to ₹1,097.22 crore in Q1 FY27. Export revenue increased 11 per cent both year-on-year (Y-o-Y) and sequentially to ₹233.87 crore. The share of exports

improved to 32.3 per cent.

"We expect exports to grow throughout the year and improve quarter-on-quarter. We should reach around 35 per cent as the overall export share this year and are looking to go up to 40 per cent by FY28," Jalan told *Business Standard*.

North American revenue increased 11.8 per cent Y-o-Y and

European revenue rose 9.0 per cent Y-o-Y and 19.5 per cent sequentially to ₹128.41 crore.

"The past two years were very poor in terms of North America and Europe, with considerable volatility in both markets. This year, the situation looks fairly stable, and we are seeing good order inflows from both regions," Jalan said.

RKFL has been in North America for about 15 years, while Europe opened up more significantly over the last 7-8 years. The company is pursuing passenger vehicle deals in North America and gaining traction in Europe's commercial vehicle market.

Indian drugmakers in no rush to shift to US despite tariff threat

FROM PAGE 1

Dr Reddy's already has some local manufacturing exposure. Products accounting for around 25-30 per cent of its revenue are manufactured by contract manufacturing organisations (CMOs) in the US, investor relations head Aishwarya Satharam said on the call.

The company had considered engaging a US contract manufacturer for Abatacept, its proposed biosimilar of Bristol Myers Squibb's arthritis drug Ocrelizumab, to mitigate potential tariff risks. However, Israeli said the option was no longer being pursued and the product would be launched from the company's Bachupally facility in Hyderabad. Adding a US manufacturing site after appro-

val would require a regulatory supplement and entail significant costs, he added.

Dr Reddy's launched six products in North America during the first quarter of FY27, including complex generics bosutinib (for leukaemia) and nintedanib (lung disease).

Cipla, meanwhile, is using a combination of American and Indian plants for its forthcoming US launches, managing director and global CEO Achin Gupta said its pipeline for the remainder of FY27 included four significant launches—three respiratory products and one "peptide opportunity".

"Two of these three respiratory assets have been filed from our US manufacturing facilities, while the third has been filed from our Goa facility," Gupta told analysts.

The company launched generic Ventolin in the US during the quarter and has started commercial shipments. Its remaining respiratory pipeline includes generic Advair. Cipla spent ₹486 crore, or 6.8 per cent of revenue, on research and development during the quarter, largely on filings and key development programmes.

Cipla has continued targeted investment in its US manufacturing network. Its FY26 annual report said the company had commissioned a metered-dose inhaler facility at Fall River, Massachusetts, which has been approved for generic Proventil and Ventolin. It is investing further to scale capacity there, while its Long Island City powder inhaler facility will support generic Advair and other products.

The annual report identified trade protectionism as a risk, saying measures to promote local manufacturing could restrict pricing flexibility and reduce margins. Its mitigation measures include local manufacturing partnerships, greater active pharmaceutical ingredient (API) backward integration and supply-chain efficiency.

At the same time, Cipla's broader capacity programme remains India-heavy. It has commissioned a greenfield respiratory API facility at Kurkumbh (Maharashtra) and is expanding its oncology API block at Bommasandra (Karnataka) and dosage-form capacity at Sikikim, Patalganga (Maharashtra) and Goa.

Lupin has made one of the largest disclosed US investments among Indian drug-

makers. The company said in its FY26 annual report that it has invested around \$250 million in its Coral Springs, Florida, facility, "significantly expanding manufacturing and development capabilities for complex and specialty products", particularly respiratory therapies.

However, Lupin's wider manufacturing investments remain centred in India. It commissioned an oncology-focused, high-potency API facility at Visakhapatnam and expanded its peptide and contract development and manufacturing organisation platform at Dabhasa, Gujarat.

Lupin described the tariff hike and pressure to localise manufacturing in the US and Europe as a significant risk. It said it would respond through a

diversified manufacturing footprint, flexible sourcing and "selective investments in onshore and nearshore manufacturing".

Other companies are similarly making targeted investments based on product and technology requirements.

In January 2026, Zydus Lifesciences acquired two biologics facilities in Emeryville and Berkeley, California, for an upfront consideration of \$75 million, with potential contingent payments of up to \$50 million over three years, linked to revenue milestones. According to its annual report, the plants will initially operate as a biologics contract development and manufacturing organisation and, over the longer term, support Zydus's US biosimilar portfolio.

The investment is focused on biologics and contract manufacturing rather than shifting conventional generics capacity from India.

Biocon has commissioned an oral solid-dose facility at Cranbury, New Jersey, and begun commercial supplies. But its largest ongoing expansion is in Malaysia, where it is doubling insulin drug-substance and drug-product capacity. Additional fill-finish capacity is expected in FY27, while the drug-substance expansion is scheduled for completion in FY28.

In India, Biocon is developing a greenfield injectables facility in Bengaluru for pre-filled syringes, cartridges, vials and drug-device combinations. The company said in its annual report that its major infrastruc-

ture investments were "largely behind us", with the focus shifting towards asset utilisation, operating efficiency and commercial scale-up.

Torrent Pharmaceuticals offered the most explicit expectation of continued tariff protection for generics. "Tariffs on pharmaceuticals was a grave concern in 2025. Fortunately, as of now, generic pharmaceuticals are exempt, and we expect this to continue in 2026," the company said in its annual report.

Torrent's four plants supplying finished products to the US have US Food and Drug Administration clearance, and the company has started receiving new product approvals. However, it has announced no new US manufacturing project.

IT sector not creating new jobs, funds diverted to AI costs: Vembu

Zoho Corporation Founder and Chief Scientist Sridhar Vembu on Sunday said the information technology (IT) industry is not creating many new jobs as funds are being diverted to meet the rising costs of artificial intelligence (AI) and data centre infrastructure. In a post on social media platform X, Vembu noted that while the IT industry, including Zoho, has avoided large-scale layoffs, it has failed to generate significant new employment opportunities in recent years. "The money that would have gone to new employees is now going to AI and data centre costs, the latter due to the steep rise in server and memory prices," Vembu said. **PPT**

Addverb bets on India, CEO says physical AI race has begun

Homegrown robotics and automation company Addverb's CEO Sangeet Kumar believes humans and robots will increasingly coexist, with people remaining firmly in control even as physical AI reshapes industries over the next two decades. Kumar, who is also the company's cofounder, says regulations will need to evolve alongside rapid advances in robotics, but dismisses dystopian sci-fi depictions of robots eventually supplanting and dominating humans, arguing that people will remain in the loop for the foreseeable future. Addverb is now betting on what Kumar calls the next frontier of robotics—collaborative robots, quadrupeds and humanoid robots, as he highlighted that the global race in physical AI has begun and India has a strong opportunity to build globally competitive companies. **PPT**

Kaapi Machines raises ₹50 cr from Sedna HoReCa

Coffee equipment and services provider firm Kaapi Machines has raised ₹50 crore in an equity round from Sedna HoReCa, a business-to-business HoReCa (Hotel, Restaurant, and Cafe/Catering) solutions provider. This was the firm's first external fund raise and until now, it has grown through promoter-led investments. The firm, whose clients include large cafe chains, hotels, retailers, corporates and coffee vending businesses, plans to use funds to expand its product portfolio, strengthen manufacturing capabilities and improve its technology stack, warehousing and service infrastructure. **BS REPORTER**

Target bets on AI for enterprise strategy

AVIK DAS
Bengaluru, 3 August

Retail major Target is reinventing its enterprise strategy using artificial intelligence (AI) and adopting a shift in its technology architecture to support AI transformation, its chief information officer said, as the Minneapolis-headquartered firm integrates the technology deeper in its operations to adapt to the shifting needs of customers.

A significant part of that transformation happens out of its centre in Bengaluru, which was set up over two decades ago. It now undertakes complex tasks such as store design and remodelling, improving packaging of in-house brands to make it more appealing, solving last-mile connectivity problems, or elevating customer experience with agentic AI. The retailer, with a market capitalisation of over \$100 billion, is known for its style, design and curated merchandise and has about 5,500 employees in India now.

"The first (strategy) is powering the enterprise strategy with AI. The second is technology and an architectural shift to support AI transformation. The third is ways of working, which is significant in every discipline. All three come into play as we think of our enterprise priorities—understanding how AI is enabling style and design and how AI is elevating the guest experience," Prat Vemana, executive vice president, chief information and product officer, told *Business Standard* recently.

Prat Vemana, executive vice president, chief information and product officer, Target

For example, Target has a design team in the country that does half of all of its new store designs and 80 per cent of the remodels though they have not been to the US and walked through the stores. It also has a Brand Design Lab team, that designs packaging for some of its owned brands.

"When you walk into a store and you're trying to decide between products, packaging can influence the decision you make. A lot of the digital experience that guests experience on target.com is also powered by the team here," added Andrea Zimmerman, president at Target India. AI is also changing the back end of retail that includes supplier onboarding and solving the last-mile connectivity problem, the most complex thing to solve in the retail supply chain. Onboarding supplier means background verification, financial health, industry credibility, product fit and compliance with Target's standards.

'AI CREATING JOB UNCERTAINTY'

Ex-NITI Aayog VC calls for more dialogue between youth, policymakers

Calling for sustained dialogue between policymakers and the young generation, former NITI Aayog Vice Chairman Rajiv Kumar said the rise of artificial intelligence has created uncertainty and frustra-

tion among Indian youth regarding future job opportunities and employability.

In an interview with *PPTVidya*, Kumar said India's youth is very uncertain and very unclear about the future because of AI.

"This is generating fears of both employability and employment generation," Kumar said while replying to a question about youth's anger and recent National Eligibility cum Entrance Test-related protests.

Kumar said the recent periodic labour force survey data has shown that the youth unemployment rate in India for the 15-29 age group has stood at around 20 per cent. **PPT**

West Asia crisis, AI boom trigger printed circuit board shortage

PRESS TRUST OF INDIA
New Delhi, 2 August

A surge in artificial intelligence (AI) server demand and the West Asia conflict have caused a shortage of printed circuit boards, a key hardware platform, which in turn has triggered a price rise in the electronics industry.

This crunch in printed circuit boards (PCB) — a hardware platform on which components are fixed in electronic products — stems from rising material costs, supply chain disruptions in key shipping routes, and component diversion toward high-end AI hardware.

The shortage of PCBs comes at a critical juncture for Indian industry as several major investments amounting to over ₹1,000 crore are in the pipeline under the Electronics Components Manufacturing Scheme amid rising domestic demand.

A senior official of electronics manufacturing services firm Syma SGS told PTI that the recent strike of Iran on facilities in Saudi Arabia has triggered a shortage of some of the chemicals that are used for making PCBs.

"The current quarter and the subsequent quarter will continue to see pressure on material costs. PCBs have all of a sudden gone in short supply because some facility in Saudi Arabia has been hit by Iran. They were controlling 80 per cent of the supply of a specialty chemical, which goes into the making of a PCB," Syma SGS Technology Managing Director Jasbir Singh Gujral said.

Syma SGS is one of the applicants under the government's electronics component manufacturing scheme.

4 ECONOMY & PUBLIC AFFAIRS

MUMBAI | MONDAY, 3 AUGUST 2026 **Business Standard**

IN BRIEF

Pak made every effort to destroy goodwill under Indus treaty: Kwatra

The Indus Water Treaty was signed in the spirit of goodwill and friendship, and Pakistan spent half a century dismantling it, India's envoy to the US, Vinay Mohan Kwatra said. "That asymmetry stifled development for decades in Indian regions that could have benefited from better water rights. India honoured the treaty anyway," Kwatra wrote in an article published in *Newsweek* magazine, adding that India's decision to keep the Indus Water Treaty (IWT) in abeyance merely acknowledged what Pakistan's conduct had already destroyed. Kwatra's article came days after Pakistan hosted a conference recently to protest India's decision to hold the IWT in abeyance on April 23 last year, a day after Pakistan-trained terrorists killed 26 people at Pahalgam in Jammu and Kashmir.

Ladakh LG Saxena decentralises decision making for land-use

In a major step towards decentralising decision-making, Ladakh Lieutenant Governor Vinai Kumar Saxena has authorised the chief secretary and the divisional commissioner to approve land-use proposals for development projects in areas outside municipal committees. "The move is part of the ongoing people deregulation initiative aimed at promoting citizen-centric governance in the Union Territory," an official spokesperson said on Sunday. For land parcels measuring above four kanals and up to two acres, the chief secretary has been empowered to

Quadruple import duty on truck tractors: MHI to FinMin

DEEPAK PATEL
New Delhi, 2 August

The Ministry of Heavy Industries (MHI) has asked the Department of Revenue, which works under the Ministry of Finance (FinMin), to quadruple the import duty on truck tractors to 40 per cent from 10 per cent currently, as the lower duty was "being misused to facilitate dumping of foreign products in the Indian market."

The Society of Indian Automobile Manufacturers (SIAM) has been ringing alarm bells about the rising imports of truck tractors, especially electric truck tractors (also called electric prime movers), since November last year, *Business Standard* has learnt.

In a letter to the MHI on November 28 last year, the industry body stated that about 400 units of electric truck tractors were imported from China and about 100 units of them were imported from Europe in the first half of 2025-26 (H1FY26). SIAM stated that imports of 55-tonne electric prime movers were low in H1FY26 but could rise significantly if the existing 10 per cent import duty continued. The low duty gave foreign electric truckmakers a 40-50 per cent price advantage over their Indian peers it added.

'Unfair advantage'

- MHI says lower import duty is enabling dumping of foreign electric truck tractors in India
- 400 electric prime movers were imported from China and 100 from Europe in H1FY26
- The 10% duty gives foreign

electric truckmakers a 40-50% price edge over domestic manufacturers

- If duty remains unchanged, imports may rise to 1,000-3,000 units by 2027, capturing 20-25% of the Indian market

growing at a compound annual growth rate (CAGR) of around 55 per cent. Based on AG's forecast, the current market is estimated to be worth around \$400-500 million.

The MHI, through the Prime Minister Electric Drive Revolution in Innovative Vehicle Enhancement (PME-DRIVE) scheme, is providing incentives to accelerate the adoption of electric trucks while

import a completely built unit (CBU) without any depth of operation in India at cheaper cost and penetrate the Indian market."

Following these representations by SIAM, the MHI sent a memorandum to the Department of Revenue on July 2 this year.

The MHI, in its July 2 communication, stated that the 10 per cent BTD has enabled foreign

posed that the overall Customs duty incidence (BCD plus Agriculture Infrastructure and Development Cess, or AIDC) on these vehicles be aligned with other imported commercial vehicles, which currently attract an effective duty of 40 per cent. The ministry stated that raising the duty would help protect domestic manufacturers, particularly those investing in electric commercial vehicles, and encourage them to continue expanding local production.

About thirteen days after the MHI's memorandum to the Department of Revenue, the Mumbai Port Authority said on X that it handled the arrival of 861 heavy-duty electric vehicles imported by Sany Heavy Industry. The shipment included electric truck tractors and wheel loaders, and arrived on the Ro-Ro vessel MV Grande Shanghai at Mumbai Port. Sany Heavy Industry global headquarters are located in Changsha, Hunan, China.

SIAM, the MHI, and the FinMin did not respond to queries sent by *Business Standard*.

China's advantage in electric vehicles (EVs) comes from its dominance across the EV supply chain, particularly batteries. China accounts for nearly 70 per cent of global battery cell manufacturing

Panel orders first study to reform Delhi co-op sector

SANJEEV MUKHERJEE
New Delhi, 2 August

A high-level meeting on short-term cooperative credit institutions held on July 31 approved the first-ever comprehensive diagnostic study of Delhi's cooperative sector. The meeting chaired by Pandurang K Pole, secretary (Cooperation), Government of the National Capital Territory of Delhi, expressed concern over the prolonged stagnation in key financial and business parameters of institutions such as Delhi State Cooperative Bank.

The study will be undertaken by Nabcons (Nabard Consultancy Services), a wholly owned subsidiary of Nabard (National Bank for Agriculture and Rural Development). According to an official statement issued on Sunday, the assessment will fill a critical knowledge gap and provide an evidence-based road map for policy reforms, sectoral revitalisation, and long-term sustainability.

The committee warned that continuation of current trends

inevitably, it stressed that a "business-as-usual" approach was no longer viable and called for reforms centred on business expansion, customer acquisition, digital transformation, innovation, and improved customer service. The committee also stressed the need to accelerate reforms in governance, regulatory compliance, capacity building, and digitisation.

The meeting was attended by representatives from the Reserve Bank of India (RBI), the Registrar of Cooperative Societies, Delhi State Cooperative Bank, Nabard, Nabcons, and multiple urban cooperative banks. While urban cooperative banks are regulated under the RBI-led task force for urban cooperative banks, the committee said their participation as special invitees would enable a more holistic assessment of Delhi's cooperative ecosystem and facilitate coordinated policy interventions.

The committee added that Nabard's assessment would help shape future reforms aimed at revitalising Delhi's

approve land-use applications, while the approval for change in land use on land above two acres will continue to be granted by the lieutenant governor, he said.

Andhra, Australia sign MoUs on clean energy, manufacturing

Andhra Pradesh and Australia on Sunday signed four MoUs covering clean energy, advanced manufacturing, inclusive education, student mental health and skill development, marking a significant expansion of bilateral cooperation in these sectors. The agreements were signed in the presence of Andhra Pradesh Education, Information Technology and Electronics Minister Nara Lokesh and Australia's Assistant Minister for International Education, Citizenship, Customs and Multicultural Affairs Julian Hill. "These partnerships reflect the growing collaboration between Andhra Pradesh and Australian institutions in education, research, innovation and workforce development," Lokesh said in a release.

Fast-track court special judge on Nect paper leak case transferred

The Delhi High Court has transferred the special judge of the designated fast-track court dealing with paper leak cases, Anu Grover Baliga, along with 137 other judges. Special Judge Baliga had barely completed a week in the designated court after taking charge on July 25. Special Judge Ajay Gupta, who was initially in the paper leak case, including the Nect matter, will replace Judge Baliga. She has been transferred to a special court under the National Investigation Agency (NIA) Act to try terror cases.

The industry body warned that global electric truckmakers, particularly from China, which export around 20,000 such vehicles annually, could increasingly target India. If import duty remained at 10 per cent, imported electric prime movers could increase to 1,000-3,000 units by 2027, estimated accounting for 20-25 per cent of the Indian market, it added.

For 55-tonne electric prime movers, prices in India typically range between ₹95 lakh and ₹1.3 crore (ex-showroom). Autobel Consulting Group (ACG), in a report released in 2026, estimated that the heavy-duty electric truck segment, including prime movers and tippers, would reach \$1.23 billion by FY30.

encouraging domestic manufacturing. Blue Energy Motors, Montra Electric, Tata Motors, and Ashok Leyland are among the major domestic players that have invested in developing and manufacturing electric prime movers in India.

Siam, in its November 28 letter, stated that safeguards were needed to protect investments made by Indian manufacturers in electric commercial vehicles. A similar letter was written by Siam to the Central Board of Indirect Taxes and Customs on December 2 last year.

On May 21 this year, Siam wrote another letter to the MHI, wherein it stated: "The current rate of 10 per cent basic Customs duty (BCD)... is allowing the foreign brands to

brands to import CBU's at "competitive prices" without any depth of manufacturing operations or substantial investment in India. "Cheap foreign CBU imports directly undermine the business viability of these domestic EV investments by Indian OEMs (original equipment manufacturers)," the MHI said, adding that the low import duty was "being misused to facilitate dumping of foreign products in the Indian market".

The MHI on July 2 recommended increasing the Customs duty on imported electric and diesel prime movers from the current 10 per cent to bring them in line with other fully built commercial vehicles. The ministry pro-

capacity and dominates the processing of key battery materials such as lithium, cobalt, and graphite. This integrated ecosystem — from raw material processing and battery production to vehicle manufacturing — has helped Chinese EV makers achieve economies of scale and lower costs.

Concerns over this cost advantage have prompted governments to raise trade barriers. The European Union (EU) in 2024 imposed additional duties of up to 35.3 per cent on Chinese-made electric cars. The US has also sharply increased tariffs on Chinese EVs, raising the duty rate to 100 per cent in 2024 to protect its domestic automobile industry.

In Delhi State Cooperative Banks could impact its long-term relevance and competi-

cooperative credit institutions and improving their operational efficiency.

India okayed just 1 FDI plan from China in FY26

India approved just one Chinese FDI proposal worth ₹1 crore in financial year 2025-26 (FY26), while clearing 13 proposals from Hong Kong worth ₹610.42 crore.

The approvals were made under Press Note 3 of the Department for Promotion of Industry and Internal Trade (DPIIT), which was introduced in 2020 to curb opportunistic takeovers by investors from countries sharing a land border with India. Though the norms were eased in March 2026 for certain non-controlling investments, the relaxation does not apply to entities incorporated in China or Hong Kong.

Petrol, diesel sales soared amid weak monsoon rains

PRESS TRUST OF INDIA
New Delhi, 2 August

Petrol and diesel sales by India's three state-run fuel retailers rose sharply in July as below-normal monsoon rainfall boosted fuel demand from farmers and motorists, preliminary industry sales data showed. Petrol sales by Indian Oil Corp (IOC), Bharat Petroleum Corp Ltd (BPCL) and Hindustan Petroleum Corp Ltd (HPCL) climbed 9.7 per cent to 3.45 million tonnes (mt) during July, against 3.4 mt in the corresponding period a year ago. Compared to June, however, petrol sales fell 1.1 per cent from 3.48 mt. Diesel sales rose 10.7 per cent year-

on-year to 7.12 mt in July from 6.43 mt a year earlier. On a month-on-month basis, diesel sales declined 9.2 per cent from 7.85 mt in June.

Diesel is India's most widely used fuel, powering freight transport, agricultural machinery and irrigation. Below-normal monsoon rainfall boosted irrigation demand during the peak sowing season.

Fuel sales typically moderate with the onset of the monsoon, which reduces demand for running agricultural irrigation pumps as well as slows vehicular movement. But this year, the monsoon rains arrived late, which led to farmers using diesel to run pumps to irrigate farms.

July coal output up 7.5%

SUDHEER PAL SINGH
New Delhi, 2 August

India's coal production grew 7.51 per cent to 69.75 million tonnes (mt) in July against 64.88 mt produced a year ago in July 2025, according to provisional data released by the Union Ministry of Coal on Sunday. Coal dispatch grew 17 per cent to 86.33 mt during the month compared to 73.57 mt dispatched in July last year.

"The growth in coal production and dispatch underscores the ministry of coal's sustained commitment and efforts to ensuring consistent supply and operational stabil-

ity across the sector," the ministry said in a statement. The country's cumulative coal production for the April-July period stood at 302.24 mt while the cumulative coal dispatch reached 354.70 mt, a 5.87 per cent year-on-year (Y-o-Y) growth.

State-owned Coal India Ltd (CIL) contributed 50.35 mt to the July's figures, marking a 8.42 per cent growth. CIL dispatched 63.67 mt coal during the month, recording a 17.43 per cent Y-o-Y growth. The cumulative coal dispatch by CIL between April and July this year also registered a 6.81 per cent Y-o-Y growth.

Big Shift after 1991: Only 7 of 30 Sensex companies still remain in index

FROM PAGE 1

This includes ACC, Voltas, Indian Hotels, Aditya Birla Real Estate (formerly Century Textile & Industries in 1991), Bombay Dyeing, Mukand, GE Shipping, Cent, GlaxoSmithKline Pharma, and GSFC, among others. In comparison, companies such as Grasim, Hindalco, Nestlé India, Siemens and Tata Power, which were part of the Sensex in 1991 have remained large-cap stocks but are not currently part of the index.

Decline of manufacturing and rise of financials

The changes reflect the steady decline of manufacturing and the growing financialisation of the economy. Another big growth area in the post-1991 era has been IT services and technology-enabled services. Overall, the economy and equity index is now dominated by services, with the manufacturing and industrial sector playing a minor role. Family-owned businesses have also lost their dominance and independent and institution-owned firms have been more successful in the post-reform era. There has also been a perceptible decline in the participation of multinationals in the index.

The benchmark index is currently dominated by firms in the service sector

The composition BSE Sensex's sectoral weighting (in %)

led by banking, financial services and insurance (BFSI) players. There are seven BFSI firms in the index that have a combined weight of 38.5 per cent, over four times that of the next biggest sector in the index — oil and gas. Firms from other service sectors with a presence in the index include IT services (9.2 per cent), telecom (6.4 per cent), retail (3.1 per cent) and Internet aggregators (3 per cent).

However, in 1991 the index was dominated by family-owned companies in the manufacturing sector. In all, 28 of the 30 companies in March 1991 were manufacturers or industrial firms in sectors such as FMCG (fast-moving consumer goods), textile, metals and mining, automotive, cement, capital goods, chemicals, paper, pharmaceuticals and consumer durables. There were just two companies from the service sector in the index in 1991: Indian Hotels Company and Great

Eastern Shipping.

In terms of ownership, 20 of 30 index firms in 1991 were family-owned including four Tata group firms and Mahindra & Mahindra. Now, 17 stocks are family-owned companies, including five Tata group companies but excluding Infosys. The index also includes four central public-sector firms, two multinationals and seven independent or institution-owned companies.

The Indian subsidiaries of global multinationals were the second-largest group in the index in March 1991 with six companies. These included Hindustan Unilever, Nestlé India, Siemens India, Cummins India, Philips India and GSK Pharmaceuticals. These index companies in March 1991 were independent or institution-owned: Larsen & Toubro, ITC and Associated Cement Companies (ACC). There was just one public sector

The trend

Growth of Sensex-listed companies by...

*CAGR between July 2021 and July 2026
Source: Capitaline, Compiled by BS Research

company in the index in 1991: Gujarat State Fertiliser & Chemicals (GSFC).

Jump in market cap

The post-reform era has, however, seen a steady rise in the stock price and market capitalisation of listed companies. The benchmark index grew 67 times from 1,168 at the end of March 1991 to 78,094.6 at the end of July 2026. This translated into annualised capital returns of 12.6 per cent for investors. The returns have been much lower in dollar terms because of the depreciation of the Indian rupee over the years. In US dollar terms, the Sensex value is up just 13.5 times in the last 35 years and four months.

The rupee has lost nearly a fifth of its value since 1991 and it closed at 95.39 to the dollar at the end of July 2026, compared to ₹19.20 to the dollar in March 1991.

The market capitalisation of index

companies has, however, grown at a much faster pace in the post-reform era. The Sensex companies' combined market cap rose 779 times in the last 35 years and four months, growing from ₹20,193.8 crore at the end of March 1991 to ₹15.72 trillion at the end of July 2026. This translated into annualised appreciation of 20.7 per cent. In US dollar terms, the Sensex companies' combined market capitalisation has grown at a compound annual rate of 15.4 per cent from \$10.52 billion at the end of March 1991 to around \$1.65 trillion at the end of July 2026.

In early 1991, the Sensex reflected the economic architecture of pre-liberalisation India. Subsequently, the index went through a rapid transformation as liberalisation produced new winners and many incumbents across sectors failed to grow.

Before 1991, India was a mixed and planned economy with a dominant role

reserved for the public sector or government-owned companies. Most of the capital intensive and strategic sectors of the economy — such as banking and insurance, oil and gas, power, ports and infrastructure, aviation, aerospace and defence, and railways — were reserved for government-owned companies. There were dozens of such companies operating in these "strategic" sectors that were unlisted. The reforms opened most of these sectors up for the private sector, spurring the rise of new winners most of which are owned by various family-run business groups, except in banking and insurance, which is now dominated by independent firms owned by institutional investors.

The post-reform era also saw the creation of the BSE's rival, the NSE, and the initial public offerings and listing of public-sector firms, quite a few of which are now part of the benchmark indices.

THIS IS A PUBLIC ANNOUNCEMENT FOR INFORMATION PURPOSES ONLY. THIS IS NOT A PROSPECTUS ANNOUNCEMENT AND DOES NOT CONSTITUTE AN INVITATION OR OFFER TO ACQUIRE, PURCHASE OR SUBSCRIBE TO SECURITIES. NOT FOR RELEASE, PUBLICATION OR DISTRIBUTION, DIRECTLY OR INDIRECTLY, OUTSIDE INDIA.

Initial public issue of equity shares on the main board of BSE Limited ("BSE") and National Stock Exchange of India Limited ("NSE"), and together with BSE, the "Stock Exchanges") in compliance with Chapter II of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended ("SEBI ICDR Regulations").

MV ElectroSystems Limited (To Be Listed on the Main Board of BSE and NSE)

MV ElectroSystems Limited ("Company" or "Issuer") was originally incorporated as "MV ElectroSystems Private Limited" on July 03, 2009 at Delhi as private limited company under the Companies Act, 1956. Subsequently, our Company was converted into a public limited company, the word "private" was struck off from the name of our Company and consequently, a fresh certificate of incorporation dated November 28, 2021 was issued by the "RoC", recording the change of our Company's name to "MV ElectroSystems Limited". For details of change in the name of our Company and Registered Office of our Company, see "History and Certain Corporate Matters" on page 282 of the Red Herring Prospectus ("RHP").

Corporate Identity Number: U31401HR2009PLC140506

Registered & Corporate Office: Plot No. 7, Site No. 2, 14/3, Mathura Road, Faridabad - 121 003, Haryana, India. Tel. No.: +91 92 1199 9711. Contact Person: Sourabh Bansal, Company Secretary and Compliance Officer. E-mail: call@mvelectrosystems.com. Website: www.mvelectrosystems.com

THE ISSUE

INITIAL PUBLIC ISSUE OF UP TO [•] EQUITY SHARES OF FACE VALUE OF ₹ 5 EACH (EQUITY SHARES) OF MV ELECTROSYSTEMS LIMITED (OUR COMPANY) FOR CASH AT A PRICE OF ₹ [•] PER EQUITY SHARE (INCLUDING A SHARE PREMIUM OF ₹ [•] PER EQUITY SHARE) (ISSUE PRICE) AGGREGATING UP TO ₹ 2,900.00 MILLION (ISSUE). THE ISSUE SHALL CONSTITUTE [•] % OF OUR POST-ISSUE PAID-UP EQUITY SHARE CAPITAL OF OUR COMPANY.

PRICE BAND: ₹400 TO ₹425 PER EQUITY SHARE OF FACE VALUE OF ₹5 EACH.

THE FLOOR PRICE IS 80.00 TIMES THE FACE VALUE OF THE EQUITY SHARES AND THE CAP PRICE IS 85.00 TIMES THE FACE VALUE OF THE EQUITY SHARES. BIDS CAN BE MADE FOR A MINIMUM OF 34 EQUITY SHARES OF FACE VALUE OF ₹ 5 EACH AND IN MULTIPLES OF 34 EQUITY SHARES OF FACE VALUE OF ₹ 5 EACH THEREAFTER. SINCE BASIC AND DILUTED EPS FOR FISCAL 2026 ON RESTATED FINANCIAL INFORMATION OF THE COMPANY IS NEGATIVE, PRICE EARNING ("P/E") CANNOT BE ASCERTAINED. WEIGHTED AVERAGE RETURN ON NET WORTH FOR LAST THREE FISCAL YEARS IS (6.92%)

Fresh Issue	72,49,990	29,00.00	68,23,528	2900.00
Offer for Sale	Not Applicable	Not Applicable	Not Applicable	Not Applicable
Total Issue Size	72,49,990	29,00.00	68,23,528	2900.00
Post Issue Market Capitalisation	2,77,08,190	11,063.68	2,72,82,728	11,595.16

BID / ISSUE PERIOD

BID / ISSUE CLOSES TODAY*

*UPI mandate end time and date shall be at 5:00 p.m. on Bid / Issue Closing Date.

We are a technology-driven company engaged in the design, development, assembly and manufacturing of electrical & power electronics Equipment used in railway rolling stock including IGBT based 3-Phase Drive Propulsion Equipment for electric locomotives, switchgear Panels for railway coaches & EMU's, cable protection & management products.

THE ISSUE IS BEING PURSUANT TO REGULATION 6(2) OF THE SEBI ICDR REGULATIONS, AS OUR COMPANY DID NOT FULFIL REQUIREMENTS UNDER REGULATION 6(1)(B) OF THE SEBI ICDR REGULATIONS. THE EQUITY SHARES OF THE COMPANY WILL GET LISTED ON THE MAIN BOARD OF BSE AND NSE. NSE SHALL BE THE DESIGNATED STOCK EXCHANGE.

QIB PORTION: NOT LESS THAN 75% OF THE ISSUE | NON-INSTITUTIONAL PORTION: NOT MORE THAN 15% OF THE ISSUE | RETAIL INDIVIDUAL PORTION: NOT MORE THAN 10% OF THE ISSUE

IN MAKING AN INVESTMENT DECISION, POTENTIAL INVESTORS MUST ONLY RELY ON THE INFORMATION INCLUDED IN THE RED HERRING PROSPECTUS AND THE TERMS OF THE ISSUE, INCLUDING THE RISKS INVOLVED AND NOT RELY ON ANY OTHER EXTERNAL SOURCES OF INFORMATION ABOUT THE ISSUE AVAILABLE IN ANY MANNER. IN RELATION TO PRICE BAND, POTENTIAL INVESTORS SHOULD ONLY REFER TO THE PRICE BAND ADVERTISEMENT FOR THE ISSUE AND SHOULD NOT RELY ON ANY MEDIA ARTICLES / REPORTS IN RELATION TO THE VALUATION OF OUR COMPANY AS THESE ARE NOT ENDORSED, PUBLISHED OR CONFIRMED EITHER BY OUR COMPANY OR THE BRLM.

IN ACCORDANCE WITH THE RECOMMENDATION OF THE COMMITTEE OF INDEPENDENT DIRECTORS OF OUR COMPANY, PURSUANT TO THEIR RESOLUTION DATED JULY 25, 2026, THE ABOVE PROVIDED PRICE BAND IS JUSTIFIED BASED ON QUANTITATIVE FACTORS/ KEY PERFORMANCE INDICATORS DISCLOSED IN THE "BASIS FOR THE ISSUE PRICE" SECTION ON PAGE 148 OF THE RHP VIS-A-VIS THE WEIGHTED AVERAGE COST OF ACQUISITION ("WACA") OF PRIMARY AND SECONDARY TRANSACTION(S), AS APPLICABLE, DISCLOSED IN THE "BASIS FOR THE ISSUE PRICE" SECTION ON PAGE 148 OF THE RHP.

RISK TO INVESTORS

For details, refer to section titled "Risk Factors" on page 22 of the RHP.

1. **Customer concentration risk:** Our business is dependent on and derive a substantial portion of our revenue from a limited number of customers. Further, Indian Railways through its various units or workshops, has been the single largest customer of our Company. Cancellation of orders, if any, by customers or delay or reduction in their orders could have a material adverse effect on our business, results of operations and financial condition.

Particulars	For the Financial Year ended March 31,					
	2026		2025		2024	
	Amount	%age *	Amount	%age *	Amount	%age *
Top one customer	379.22	76.72%	457.00	72.96%	338.69	67.80%
Top three customer	408.73	82.69%	502.91	80.29%	382.96	76.68%
Top five customer	428.41	86.67%	532.02	84.94%	402.67	80.60%
Top ten customer	459.86	93.04%	576.35	92.01%	433.30	86.73%

*%age to revenue from operations.

2. **Risk of renewing or maintaining statutory and regulatory approvals:** We are required, and will continue to be required, to obtain and hold relevant statutory and regulatory approvals, licenses, permits and registrations for our operations. Except as disclosed below, as on the date of the Red Herring Prospectus, there are no material approvals applied for, including renewal applications, that have not been received by our Company.

Particulars	Filed with	Date of fresh / renewal application
For Unit 1	Dakshin Haryana Bijli Vitran Nigam Limited	March 23, 2026
Application for increase of power load	Dakshin Haryana Bijli Vitran Nigam Limited	March 23, 2026

3. **Dependence on key suppliers for sourcing raw materials:** We are dependent on certain key suppliers for a significant portion of our raw materials purchased. The following tables set forth details of raw material purchased and contribution to total purchase of material and consumables from our top suppliers for the periods and year indicated:

Particulars	For the Financial Year ended March 31,					
	2026		2025		2024	
	Amount *	%age *	Amount *	%age *	Amount *	%age *
Top one supplier	136.86	39.24%	137.09*	36.60%	40.90	15.54%
Top three suppliers	205.43	58.90%	190.08	51.02%	92.17	35.24%
Top five suppliers	255.29	73.20%	224.11	60.15%	124.91	47.75%
Top ten suppliers	330.89	94.87%	284.51	76.37%	174.79	66.82%

*value of purchase of material and consumables during the period

*cost of goods sold (i.e., cost of raw material consumed, adjusted for changes in inventory of finished goods, work in progress and stock in trade)

*includes goods in transit as on March 31, 2025

4. **Geographical concentration risk:** We have only one assembling cum manufacturing facility located at Village Baghola, Palwal, Haryana (Unit 1) and the proposed assembling cum manufacturing facility is located at Village Hange Bihou, Palwal, Haryana (Unit 2). Any breakdown or failure of equipment, difficulties or delays in obtaining raw materials, spare parts and equipment / machines, raw material shortages, operational inefficiency, facility obsolescence, natural or man-made disasters, industrial accidents or regional social unrest may restrict our operations and adversely affect our business and financial conditions.

5. **Negative cash flows from operating activities:** Our Company has experienced negative cash flows from operating activities during the Financial Year ended March 31, 2026 and March 31, 2024 and may experience similar earnings declines or operating losses or negative cash flows from operating activities in the future. The following table sets forth certain information relating to our cash flows for the periods indicated:

Particulars	Financial year ended March 31,			
	2026		2025	
	2026	2025	2026	2025
Net cash flows from / (used in) operating activities	(575.45)	50.39	(52.15)	
Net cash flows from / (used in) investing activities	(178.69)	(14.85)	(35.56)	
Net cash flows from / (used in) financing activities	755.16	(36.32)	65.74	

6. **High working capital requirement:** Our business requires significant working capital for our business operation, furnishing of bank guarantees for orders awarded or deduction of retention money from amount receivable by us, financing inventory and any change in terms of credit or payment would affect our working capital. The following table shows our net working capital turnover ratio for the Financial Years ended March 31, 2026, March 31, 2025 and March 31, 2024 respectively:

Particulars	Financial year ended March 31,			
	2026		2025	
	2026	2025	2026	2025
Net working capital (₹ in million) *	312.78	32.12	30.41	
Net working capital turnover ratio	1.58	19.50	16.43	

*excludes cash and cash equivalents and current borrowings.

7. **Our revenue from operations have been constant in the past as compared to the orders received:** Our revenue from operations have been constant in the past as our Company focused on the development of 3-Phase Propulsion Equipment. The following table sets forth our revenue from operations and profit during the Financial Years ended March 31, 2026, March 31, 2025 and March 31, 2024:

Particulars	Financial year ended March 31,			
	2026		2025	
	2026	2025	2026	2025
Revenue from operations	494.28	626.37	499.57	
Net profit after tax	(126.95)	13.84	6.48	

Our Company has received significant purchase orders aggregating to ₹ 7,376.60 million (excluding GST and AMC) for supply of 450 (four hundred fifty) 3-Phase Propulsion Equipment during the Financial Year ended March 31, 2026. Any inability to execute these orders in accordance with their terms, including with respect to production capacity, working capital requirements, operational execution, delivery schedules, quality standards or warranty and maintenance obligations, may have a material adverse effect on our business, financial condition, results of operations, cash flows and future prospects.

8. **Our business with our customers is on purchase order basis or through tenders and we do not have long-term contracts:** Our business is primarily conducted on purchase order basis or through tenders issued by Indian Railways and we neither have long-term contracts with most of our customers nor have any marketing tie up. Our Company participates in these tenders and may not always qualify as lowest bidder or match the bid of the lowest bidder and hence, the conversion of participation in the tenders vis-a-vis successful award of order is low, which is as under:

Particulars	For the Financial Year ended March 31,					
	2026		2025		2024	
	No. of Bids / Tenders	Value of Tender	No. of Bids / Tenders	Value of Tender	No. of Bids / Tenders	Value of Tender
Bids / Tenders participated	462	49,960.00	435	46,305.13	233	35,877.46
Bids / Tenders awarded to us	75	10,023.00	115	2,175.16	71	316.31
Bids / Tenders not awarded to us	387	39,937.00	320	44,129.97	162	35,561.15
Bid / Tenders success ratio	16.23%	20.06%	26.44%	4.70%	30.47%	0.88%

9. **Liquidated damage charges:** Most of our customer orders generally contains a liquidated damage charges clause for delay or non delivery of the products and we may also incur such similar cost in the event of disputes, claims, defects or delays in future, which could adversely affect our business, financial condition, profitability and cash flows. The details of such expenditure for last three financial years is as under:

Particulars	Financial year ended March 31,			
	2026		2025	
	2026	2025	2026	2025
Liquidated Damage Charges	4.07	2.52	0.47	
Total income	497.91	646.37	505.65	
Liquidated Damage Charges as %age to total income	0.82%	0.39%	0.09%	

10. **Dependence on imports of certain raw material:** Our Company relies on imports from certain countries for certain raw material for our products, including for 3-Phase Propulsion Equipment. Supplies of such imports / imported materials may be disrupted by changes in government regulations or policies, deterioration in economic conditions or escalation of trade tensions and any changes in the pricing and quality of our raw material / components including Insulated Gate Bipolar Transistors, capacitors, semiconductors, microprocessors, thyristor, etc could cause significant disruptions to and adversely impact our business operations. During the Financial Years ended March 31, 2026, March 31, 2025 and March 31, 2024, we imported supplies from China, Taiwan, USA and other countries. The table below shows the cost of imported materials consumed by country as a percentage of the total cost of materials consumed for the periods indicated:

Particulars	Financial year ended March 31,			
	2026		2025	
	2026	2025	2026	2025
Import of raw material for Rolling Stock Electric and Propulsion Systems	40.47	0.43	2.00	
China	-	0.10	-	
Switzerland	0.94	0.05	0.24	
Taiwan	5.94	0.07	2.92	
USA	-	-	0.06	
Bulgaria	16.11	-	0.04	
UK	17.81	-	-	
Hong Kong	0.35	-	-	
UAE	81.62	0.65	5.26	
Sub-total (A)	46.98	-	14.96	
Sale of Rolling Stock Electric and Propulsion Systems #	12.89	20.17	13.32	
Import of raw material for Cable Protection & Interconnected products and Switchgear & Panels	12.89	20.17	13.32	
China	447.29	626.37	484.61	
Sub-total (B)	447.29	626.37	484.61	
Sale of Cable Protection & Interconnected products and Switchgear & Panels	94.51	20.82	18.58	
Grand total (C) = (A) + (B)	494.28	626.37	499.57	
Total revenue from operations	494.28	626.37	499.57	
Value of Imports (C) above as percentage to total revenue from operations	19.12%	3.32%	3.72%	
Fixed Assets	0.19	0.04	-	
China	20.89	-	-	
Singapore	7.96	-	-	
South Korea	29.04	0.04	-	
Sub-total (D)	123.55	20.87	18.58	
Total Imports (C) + (D)	123.55	20.87	18.58	

11. **Risk of loss of confidential technical knowledge:** Our competitive advantage is heavily dependent on our proprietary technical knowledge, which includes trade secrets, assembling and manufacturing processes, and other confidential information critical to our operations. The unauthorized disclosure or misappropriation of this technical knowledge could significantly erode our competitive position in the market. If we fail to adequately protect this information, whether through lapses in internal controls, breaches of confidentiality agreements, or cybersecurity incidents, it could lead to the loss of valuable intellectual property.

12. **Risk of technological advancements in railway propulsion and power electronics systems:** Our business operates in a technology-driven environment where developments in railway propulsion systems, power electronics, control systems and energy efficiency standards continue to evolve. In the railway sector, changes in technology are typically reflected through evolving technical specifications, performance requirements and regulatory standards rather than complete replacement of underlying technologies. There can be no assurance that our research and development efforts will enable us to successfully anticipate, develop or adopt new or enhanced technologies in a timely or cost-effective manner.

13. **Our Company has incurred loss in the financial year ended March 31, 2026 and hence price-to-earnings ratio cannot be ascertained.** The average industry price-to-earnings ratio based on the identified peer set is 88.83 times.

14. **Weighted Average Return on Net Worth for the financial years ended March 31, 2026, March 31, 2025 and March 31, 2024 is (6.92%).**

15. **Weighted Average Cost of Acquisition for all Equity Shares transacted by our Promoters, members of the Promoter Group and shareholders with the right to nominate directors or other rights to the extent applicable (excluding inter-se promoter group transfer by way of gift) in 1 year, 18 months and 3 years immediately preceding the RHP is as follows:**

Period	Weighted average cost of acquisition per Equity Share (in ₹)	Cap Price is 'X' times the weighted average cost of acquisition	Range of acquisition price per Equity Share: lowest price - highest price (in ₹)
Last one year preceding the date of the Red Herring Prospectus	370.00	1.15	₹ 370.00 - ₹ 370.00
Last eighteen months preceding the date of the Red Herring Prospectus	23.72	17.82	₹ Nil - ₹ 370.00
Last three years preceding the date of the Red Herring Prospectus	8.63	49.25	₹ Nil - ₹ 370.00

*For weighted average cost of Acquisition, the price and the number of Equity Shares have been adjusted for the split of face value of equity shares from ₹ 10 to ₹ 5

† Pursuant to the Shareholders resolution passed at the Extra Ordinary General Meeting held on November 30, 2023, our Company has allotted bonus shares in the ratio of thirty one bonus Equity Shares of face value ₹ 10 each for every one then existing Equity Share of face value ₹ 10 each held in the meeting of the Board of Directors held on December 09, 2023 and Reserved Bonus Equity Shares of face value ₹ 10 each allotted in the meeting of the Board of Directors held on March 18, 2025. Nil cost refers to the acquisition of such Bonus Equity Shares.

Certified by Ashish Mehta, Partner, Billoreia Mehta & Co., Chartered Accountant, (Membership No.: 165824; UDIN: 26156824BSMLZ05743) vide their certificate dated July 23, 2026

16. The BRLM associated with the issue (Sundae Capital Advisors Private Limited) has handled 3 (three) public issues (1 Main board and 2 SME issue) in the past 3 financial years out of which 1 SME issue closed below the issue price on listing date.

Continued on next page...

The Company has availed an additional MSME Insta Fund for 150 days for an amount aggregating to ₹54.00 million after June 30, 2026.

7. The date of transition to Ind AS (a) on page nos. 307, 310, 311, 359, 363, 379, 380, 383 and 384 of the Red Herring Prospectus should be read as "April 1, 2022" instead of "April 1, 2023" and (b) on page nos. 365 and 366 as "April 1, 2022" instead of "April 1, 2024".

8. On page no. 114 of the Red Herring Prospectus under "(vi) Built up of our Promoters' shareholding in our Company" (i) Anil Dhaswar, note no. (13) shall be read as "Promoter Group Inter se Transfer (Sale) of 1,00,000 Equity Shares to Ramendra Pratap Singh".

9. On page no. 117 of the Red Herring Prospectus under "(vi) Built up of our Promoters' shareholding in our Company" (ii) Rahul Dhaswar, note no. (4) shall be read as "Transfer of 76,200 Equity Shares and 45,700 Equity Shares to Pankaj Rastogi and Saranj Mann respectively" instead of "Transfer of 51,310 Equity Shares and 30,780 Equity Shares to Pankaj Rastogi and Saranj Mann respectively".

10. On page no. 137-138 of the Red Herring Prospectus under Trade Payables working note, the order book should be read as "₹3,216.40 million (excluding GST and AMC charges) for supply of 564 Propulsion Equipment" instead of "₹3,261.70 million (excluding GST and AMC charges) for supply of 567 Propulsion Equipment".

11. On page 127, the statement "As of June 30, 2026, the aggregate amount sanctioned to our Company was ₹547.62 million" should be read as "As of June 30, 2026, the aggregate amount sanctioned to our Company was ₹581.31 million".

12. On page 210, under the second bullet point under "11.2 MV ElectroSystems - Order book", the disclosure "The order covers 6 such equipment units for an aggregate value of ₹86.55 crore and a three-year comprehensive AMC for an aggregate value of ₹4.69 crore, both excluding taxes. Accordingly, the total order value, including AMC but excluding taxes, stands at ₹91.23 crore" should be read as "The order covers 6 such equipment units for an aggregate value of ₹86.55 crore and a five-year comprehensive AMC for an aggregate value of ₹4.69 crore, both excluding taxes. Accordingly, the total order value, including AMC but excluding taxes, stands at ₹91.23 crore".

13. On page 413 under "Financial Indebtedness - The summary for the overall loan facilities availed by our Company is as under", the sanctioned amount from Indian Overseas Bank should be read as "₹245.20 million" instead of "₹180.00 million" and the total for the amount sanctioned column should be read as "₹613.82 million" instead of "₹547.62 million".

The information above modifies and updates the information (as applicable) in the RHP. The RHP accordingly stands amended to the extent stated hereinabove and the above changes are to be read in conjunction with the RHP. Please note that this corrigendum does not reflect any change that have occurred between the date of filing of the RHP and the date of this Corrigendum and the relevant changes shall be reflected in the Prospectus as and when filed with the ROC, SEBI and the Stock Exchanges. Unless otherwise specified, all capitalised terms used herein shall have the same meaning ascribed to such terms in the RHP.

MUMBAI | MONDAY, 3 AUGUST 2026 Business Standard

Vedanta sets \$10 bn Ebitda goal for FY27

CFO says group expects to cut debt by over ₹20K cr

SAKET KUMAR
New Delhi, 2 August

Metals and mining conglomerate Vedanta expects to post around \$10 billion in group earnings before interest, tax, depreciation, and amortisation (Ebitda) in 2026-27 (FY27) from \$6 billion in FY26 and reduce its overall debt by more than ₹20,000 crore during the year, Vedanta's senior leadership told *Business Standard* in an interview, signalling confidence in sustaining the momentum after reporting record earnings across most of its businesses in the first quarter (Q1).

"We are looking at, as a group, Ebitda for the current financial year (FY27) of about \$10 billion. We are also looking at reducing our debt at the overall group level by more than ₹20,000 crore," said Ajay Goel, chief financial officer (CFO) of Vedanta group, following the company's first quarterly earnings after completing its demerger.

Goel said the deleveraging exercise had already gathered pace. Vedanta Resources, the group's parent entity, reduced its debt by \$1.1 billion during Q1FY27. The company also refinanced its borrowings, reducing funding costs by 280 basis points, which is expected to lower annual interest expenses by more than ₹1,000 crore, strengthening the group's balance sheet.

The guidance comes after Vedanta reported record quarterly earnings across its businesses. According to Goel, the performance was driven by factors within the company's control, including higher production volumes, lower operating costs, and a richer mix of value-added products, as well as supportive macroeconomic conditions, including stronger Brent crude and London Metal Exchange prices and the depreciation of the rupee,

VEDANTA CFO AJAY GOEL SAID THE DELEVERAGING EXERCISE HAD ALREADY GATHERED PACE. VEDANTA RESOURCES, THE GROUP'S PARENT ENTITY, REDUCED ITS DEBT BY \$1.1 BN IN Q1

which benefited the group's export-oriented businesses.

While most of Vedanta's businesses reported improved profitability, Vedanta Power posted a quarterly loss despite higher revenue. Explaining the divergence, Vedanta Power Chief Executive Officer (CEO) Rajinder Singh Ahuja said the loss was primarily due to a one-time impact of ₹487 crore arising from legal proceedings before the Supreme Court over the acquisition of the insolvent Athena Chhattisgarh Power.

Vedanta's brass also offered insights into the company's position on the ongoing policy debate over import duties on aluminium and aluminium scrap. Last month, *Business Standard* reported that the mines ministry had recommended removing the 2.5 per cent basic Customs duty on imported aluminium scrap. Downstream manufacturers have been seeking lower tariffs to reduce input costs, while primary producers such as Vedanta Aluminium, represented by the Aluminium Association of India, have argued for

retaining the duty.

Vedanta Aluminium Metal CEO Rajesh Kumar said retaining some import duty on aluminium scrap would support long-term investment in the sector. "It would be good for the country if scrap imports attract some duty because, going forward, in a country like India, where per capita aluminium consumption is low, it will encourage the domestic industry to set up capacity and facilities. When we undertake long-term planning, we also look at the earning potential, and dumping low-duty material could have some impact on prices," Kumar said. However, he added that changes in the duty structure would not materially affect Vedanta.

"For a large player like us, with strong backward integration and forward integration into value-added products, we don't see it having any major impact. But for the country, to encourage aluminium investment, we believe retaining the duty is fundamentally the right approach," he said.

On critical minerals, Vedanta Executive Director Arun Misra said the company had begun exploration across multiple critical mineral blocks held by Vedanta and Hindustan Zinc, including a monazite block in Uttar Pradesh that could emerge as India's first land-based source of neodymium, a rare earth element used in permanent magnets.

According to Misra, exploration activities are expected to continue for another two to two and a half years, with mining likely to commence by 2029-30. Commercial production, including beneficiation and metal processing, is expected to begin in 2030-31, marking Vedanta's entry into a new portfolio of critical minerals.

RBI must rethink matching every trade entry with remittances

EXIM MATTERS
T N CHAI RAJAGOPALAN

In my article last Monday, I suggested that the Reserve Bank of India (RBI) should replace matching of shipping bills, bills of entry and remittances through the Export Data Processing and Monitoring System (EDPMS) and Import Data Processing and Monitoring System (IDPMS) with aggregate reporting, data analytics and risk-based scrutiny. Readers have asked whether the law permits such a change and expressed concerns about misuse of trade transactions to transfer money abroad.

Sections 7 and 8 of the Foreign Exchange Management

Act, 1999 require export declarations and reasonable steps to realise and repatriate foreign exchange within the period and manner specified by RBI. They do not, however, mandate perpetual invoice-level matching through EDPMS. Removing the statutory obligation to realise export proceeds may require legislative change, but replacing universal matching with proportionate, risk-based monitoring does not.

The Foreign Exchange Management (Export and Import of Goods and Services) Regulations, 2026, coming into force on October 1, consolidate the framework and delegate greater authority to authorised dealer banks.

Since October 2025, RBI has allowed EDPMS and IDPMS entries of up to ₹10,00,000 to be closed on declarations by exporters or importers, individually or through quarterly bulk-declarations. These are welcome reforms, but transaction matching continues.

Indeed, exports of services will also enter EDPMS under the new framework.

This philosophy goes back to the pre-liberalisation exchange-control regime. Today, each resident individual may remit up to \$250,000 annually under the liberalised remittance scheme for permitted transactions. Subject to applicable conditions, including restrictions on pooling for certain capital-account transactions, a family's aggregate permitted remittances can be substantial. Although LRS is unavailable to companies, LLPs and firms, such liberalisation weakens the presumption that every unmatched trade entry represents an attempt to accumulate personal wealth abroad.

Official enforcement outcomes counsel against basing the monitoring architecture on assumptions about vast recoverable fortunes abroad. Until March 2025, Black Money Act assessments raised prescriptive demands of ₹35,105 crore,

while actual recovery was ₹338 crore, besides ₹2,476 crore collected via the 2015 compliance window. These figures do not establish the quantum of undisclosed foreign assets but show the gap between estimates and amounts recovered.

Trade transactions can be misused through mispricing, fictitious advances, sham service payments and related-party arrangements. Such cases merit investigation but policing every transaction is as impractical as assigning a policeman to follow every individual to prevent crime. Repeated or prolonged non-realisation, abnormal prices, high-risk jurisdictions, third-party payments and unexplained advances can be identified through analytics and examined selectively. Banks would retain underlying records and produce them whenever selected for examination, preserving an audit trail without treating every delay or mismatch as presumptively suspect from outset. In genu-

ine transactions, commercial discipline ordinarily impels exporters to pursue receivables and importers to pursue goods paid for.

EDPMS also supports enforcement of conditions attached to drawback, duty credits, GST refunds and duty-exemption schemes. Whether non-realisation should trigger recovery of tax remission on goods physically exported raises a separate issue.

The period before October 1 offers RBI an opportunity to reconsider whether matching every import-export transaction should give way to aggregate reporting, with transaction-level follow-up reserved for identified risks. Otherwise, the new framework will merely make an old control system easier to administer. The more fundamental question is whether universal transaction-level control remains necessary at all.

Bokaro Steel posts best-ever Q1 show among SAIL plants

SAKET KUMAR
New Delhi, 2 August

Bokaro Steel Plant (BSL), a unit of Steel Authority of India Ltd (SAIL), posted its best-ever performance during the April-June quarter of 2026-27 (Q1FY27), with earnings before interest, taxes, depreciation and amortisation (ebitda) nearly doubling to ₹1,154 crore, driven by higher operational efficiency and production.

The unit's ebitda rose from ₹588 crore to ₹1,154 crore, the highest among SAIL's integrated steel plants. Operational revenue increased 9.37 per cent to ₹5,880 crore from ₹5,376 crore, while the ebitda margin improved to 19.62 per cent from 10.94 per cent, also the highest within SAIL. Profit before tax surged to ₹715.57 crore from ₹378.82 crore.

The plant also reported best-ever first quarter production since inception, setting records in oven pushings, gross sinter, hot metal, crude steel and saleable cold-rolled steel production.

Key operating parameters, including sinter machine pro-

ductivity, coke rate and blast furnace productivity, also touched record Q1 levels.

The company also established new quarterly benchmarks in techno-economic performance during the April-June quarter. Coal Dust Injection (CDI) rate improved to 96 kg per tonne of hot metal from the previous best of 95 kg achieved in the preceding quarter. A higher CDI rate reduces coke consumption while enhancing blast furnace efficiency and overall cost competitiveness.

The plant's specific energy consumption declined to a record 6,334 Gcal per tonne of crude steel from 6,328 Gcal, reflecting improved energy efficiency and process optimisation. It also achieved record monthly and daily milestones in the quarter, including raw material unloading of 1.17 million tonnes, daily gross sinter and hot metal production, and its highest-ever monthly sales of coal chemicals. The firm attributed the performance to better operational efficiency, stringent cost control and water conservation measures.

WEEKEND UPDATES

Gross GST collection rose 15% in July

Gross and net Goods and Services Tax (GST) collections rose 15.4 per cent and 15.8 per cent year-on-year (Y-o-Y), respectively, in July, on robust revenues from imports. Gross GST mopup stood at ₹2.11 trillion in July against ₹1.83 trillion Y-o-Y while net collections, after adjusting for refunds, rose to ₹1.81 trillion from ₹1.57 trillion, according to government data released on Saturday. On a sequential basis, gross GST collections fell 1.01 per cent from ₹1.05 trillion in June to ₹1.11 trillion in July, while net GST collections rose 11.6 per cent from ₹1.62 trillion to ₹1.81

trillion. Import-related GST mopup outpaced domestic revenues again during the month. Gross domestic GST revenue rose 10.1 per cent Y-o-Y to ₹1.45 trillion.

Record UPI transactions Unified Payments Interface (UPI) transactions again hit a record high of ₹29.9 trillion according to NPCI data released on Saturday. UPI transactions also touched a record high of ₹29.9 trillion last month. UPI transactions in volume rose 23.66 billion in July, higher than 23.2 billion in May and 22.73 billion in June. The value of transactions was

registered 19 per cent annual growth.

PV sales zoom 33% in July Passenger vehicle (PV) dispatches in the domestic market are estimated to have risen 33 per cent to about 470,000 units in July this year, riding on record volumes led by market leader Maruti Suzuki, along with Hyundai, Tata Motors and Mahindra & Mahindra also clocked high double-digit growth as the PV industry rode the wave of impetus from GST 2.0, reduced repates and income tax relief.

BS REPORTERS & AGENCIES

Banks got \$41 bn under RBI swap window, so far

The RBI on Saturday said banks had mobilised nearly \$41 billion in foreign exchange inflows as of July 31 under its concessional swap window for fresh foreign currency (non-resident bank) [FCNR (B)] deposits. Overseas foreign currency borrowings (OFB) and external commercial borrowings (ECBs). Of the total inflows, \$362 billion came via FCNR(B), \$2.57 billion in OFBs and \$1.5 billion through ECBs. The mobilisation has already surpassed the \$34 billion raised under the RBI's special FCNR(B) deposit scheme in 2013. Overall inflows have exceeded the 2013 mark in less than two months.

BS REPORTER

CWG: Double golds for India in judo

Asmita Dey kicked off a historic evening for India at the 2026 Commonwealth Games on Saturday with a stunning gold. India's first ever judo at the CWG, before Harish Singh added another just moments later. Yamini Mourya added a silver in the women's 57kg category, giving India their record haul. On the penultimate day, India jumped to the fourth spot in the medal tally with 13 gold, 17 silver and 9 bronze for a total of 39 podium finishes.

AGENCIES

BoM cuts home loan rate to 7%, waives processing fees

State-owned Bank of Maharashtra (BoM) has launched a limited-period "Monsoon Dhamaka" campaign, reducing its home loan interest rate to 7 per cent per annum while waiving processing fees and documentation charges to boost retail lending. The bank

also lowered its car loan interest rate to 7.45 per cent per annum, positioning both products among the lowest-priced offerings in the industry, it said in a statement on Saturday.

The lender said the combination of lower interest rates and the waiver of upfront

charges aims to reduce the overall borrowing cost and equalled monthly instalment (EMI) burden for customers.

Customers can apply for retail loans through the bank's digital loan application platform for faster processing, the bank said.

BS REPORTER

Minus N-power plans, pvt investments fell 32% in Q1

"The previous two quarters had shown weakness across several major sectors, and Q1 FY2027 did not fully reverse that trend once the nuclear projects were excluded," Shashikant Hegde, founder and director of Projects Today told *Business Standard*, adding that the outlook for fresh investments remains cautious.

"Global uncertainty, disruption in crude oil and gas supplies, and pressure on exports of goods and services had affected investment decisions," he reasoned. "If energy, shipping stabilised, and geopolitical tensions eased in the second quarter, the country might see a revival in private investment in the second-half of FY27. A more visible revival in private investment was likely to depend on lower uncertainty in energy supplies, improved export conditions, and a clearer project execution environment," he averred.

The four nuclear projects announced in Q1 included a Reliance Industries' project at Purnagad, the Bajaj group's Lalpur Power Generation Company (Maharashtra), the Adani group's Coastal-Maha Atomic Energy's plant at Barsu, and NTPC's plant at Devgad.

The power sector made up for over half of the new investment plans in Q1, with a 507 per cent Q-o-Q uptick, while transport projects were up 60 per cent. However, barring N-power, other investments in electricity fell, with renewable power down 38.47 per cent to ₹69,258 crore. Fresh projects in states grew 3.3 per cent Q-o-Q to ₹14.6 trillion.

Large projects' domination rose in the investment mix, with 143 mega projects worth ₹1,000 crore or more. Their total value was worth ₹12.06 trillion.

Mega projects' share in new projects rose to 81.71 per cent from 76.65 per cent in Q4 FY26. Within the private sector, the split between domestic and foreign money widened further. Overall, private Indian investors accounted for ₹9.94 trillion, or 67.29 per cent of the total investments in Q1, up from a 61.58 per cent share in Q4 FY26. Private foreign investment declined 26.4 per cent to ₹65,551 crore in Q1, with its share falling to 4.44 per cent from 10.32 per cent of total new outlays, its largest project being Raiden Infotech India's artificial intelligence data centre in Andhra Pradesh.

Manufacturing, which had led sectoral investment in Q4 with a 38.14 per cent share, fell 21.51 per cent to ₹2.58 trillion, taking its share to 17.5 per cent. Metals were the principal drag, falling 56.06 per cent to ₹84,827 crore as the previous quarter's large steel-plant announcements were absent. Electronics, however, drew 30 projects worth ₹53.41 crore.

Oil and gas investment plans fell 90.46 per cent to ₹1,464 crore, water projects declined 26.24 per cent and mining 11.17 per cent in value terms. Transport rose 59.51 per cent to ₹1.9 trillion, with rail infrastructure at ₹64,111 crore against ₹6,076 crore in Q4. Building infra rose 3.45 per cent to ₹2.27 trillion, though data centre investment fell 62.09 per cent to ₹28,433 crore.

The nuclear effect was just as pronounced on the map of where the money is headed. Among the states, Maharashtra retained the top spot with fresh outlays of ₹8.02 trillion across 748 projects, or 54.34 per cent of the total, up 33.92 per cent from ₹2.4 trillion in Q4. Apart

Source: Projects Today

from the four N-power projects, fresh outlay plans in the State dropped 36.6 per cent to ₹1.52 trillion. Andhra Pradesh stood second despite a 2798 per cent Q-o-Q decline to ₹1.13 trillion, its share falling to 7.65 per cent from 18.16 per cent across states in Q4. Karnataka moved up to third place from ninth, with investments rising 332.53 per cent to ₹83,326 crore on the back of the ₹16,500-crore Eastern Connectivity Tunnel at Bengaluru airport.

Odisha slipped to fourth, with ₹79,467 crore and Uttar Pradesh held the fifth place with ₹65,590 crore. The top five accounted for 77.45 per cent of

fresh outlays, against 67.73 per cent in Q4. West Bengal entered the top ten states' list at the sixth place with ₹34,004 crore, aided by Vikram Solar's ₹27,000-crore solar manufacturing project, while Rajasthan (eighth) and Haryana (tenth) also entered the list. Gujarat slipped to seventh with a 34.06 per cent decline and Telangana to ninth with a 43.68 per cent fall. Tamil Nadu (TN), Madhya Pradesh and Bihar, among the top 10 states in Q4 FY26, dropped out in the last quarter, with outlays in TN falling 74.48 per cent to ₹11,237 crore, taking it to 17th place among States from sixth in Q4.

BS poll: 'Cautious' MPC may stick to status quo

The MPC cut the policy repo rate by a cumulative 125 basis

points in 2025. "The MPC may keep rates

unchanged, but the current backdrop has made soft language costlier. Oil volatility, rupee pressure, external-inflation caution and higher inflation projections make an explicitly dovish message less likely," Soumya Kanti Ghosh, group chief economic advisor at State Bank of India, said in a note.

Madhavi Arora, chief economist at Emkay Global Financial Services, expected the MPC to adopt a wait-and-watch approach, maintaining a neutral stance while "remaining cautious on global

uncertainty and El Niño risks, even as it stays optimistic on the current growth momentum and healthy Foreign Currency Non-Resident (Bank), or FCNR (B), inflows." Most respondents expect the RBI to retain its FY27 GDP growth forecast at 6.6 per cent, while a few expect an upward revision. The central bank has maintained its FY27 growth projection at 6.6 per cent over the past three policy reviews after lowering it from 6.9 per cent, citing uncertainty arising from the West Asia conflict.

"Economic activity in the first quarter has been stronger than anticipated, with domestic demand holding up well and spillovers from the West Asia conflict proving far more contained than initially feared. This, in our view, strengthens the case for an upward revision to the RBI's FY27 GDP growth forecast from the current 6.6 per cent," Sakshi Gupta, principal economist at HDFC Bank, said.

State Bank of India said the macroeconomic environment has improved and first-quarter

growth is likely to be stronger than earlier anticipated. It estimates Q1 FY27 GDP growth at around 7 per cent.

Most respondents also expect the RBI to retain its FY27 inflation forecast. They said downside risks have emerged, with Q1 CPI inflation at 3.9 per cent versus the RBI's projection of 4.2 per cent. However, with half the monsoon season still remaining and the US-Iran ceasefire fragile, the central bank is likely to retain its FY27 inflation forecast of 5.1 per cent.

Foreign investors buy \$8.4 bn debt, equity since RBI's June policy

Foreign Portfolio Investors (FPIs) have infused about \$8.44 billion into Indian debt and equity markets since the RBI's June policy announcement. They were net buyers of \$6.11 billion of debt and \$2.34 billion of domestic equities during the period, according to National Securities Depository Ltd (NSDL) data.

In June, the government exempted foreign investors from taxes on interest income and capital gains on specified government bonds as part of an effort to deepen the domestic bond market and attract foreign capital. The RBI also expanded the fully accessible route (FAR) to cover all new issuances of 15-year, 30-year and 40-year government securities, while easing investment norms for overseas investors.

Indian equities also attracted inflows in July after four consecutive months of outflows as market sentiment improved following the de-escalation

Ebb & flow

Net FPI investment (\$ mn)

of the West Asia conflict.

"The tax cut and expectations of Bloomberg Index Inclusion led to inflows into the debt segment," the treasury head at a private bank said.

Last Friday, Bloomberg Index Services again deferred a decision on including Indian government securities under FAR in its Global Aggregate Index, saying recent market reforms need more time to become embedded in market practice.

Water disputes back in spotlight

Change of guard in some states and evolving El Niño dynamics are triggering fresh actions on water-sharing disputes, Hemant Kumar Rout and Shine Jacob report

With a strengthening El Niño threatening bountiful monsoon and newly elected chief ministers looking to score political points, the politics of inter-state river water sharing has once again taken the centre stage.

From Odisha to Chhattisgarh, Karnataka to Tamil Nadu, and Maharashtra to Gujarat, states are again witnessing fresh action on long-running water disputes.

While in Karnataka, the slogan "Go Back Vijay" is trending over the proposed visit of Tamil Nadu Chief Minister C Joseph Vijay, his counterpart D K Shivakumar has appealed to the act-turned-politician to postpone the visit, citing the raging row over the water release order of the Cauvery Water Management Authority (CWMA). At the same time, in the East, Odisha Chief Minister Mohan Charan Mahi, seems to be keen on finding a solution to the long-standing Mahanadi water dispute with neighbouring Chhattisgarh.

According to industry experts, the possible dip in rainfall due to El Niño may be one of the reasons such water disputes are cropping up again.

A study by IPE Global shows that compound heat-drought events have increased 19-fold over the past decade, and El Niño conditions systematically suppress southwest monsoon rainfall by 10-20 per cent below the long-term average across peninsular and central India—precisely the catchments feeding the Cauvery.

Tribunal extensions

In July, the Centre extended the tenure of the two oldest water dispute tribunals for one more year

Ravi-Beas: Extended to August 5, 2027

Krishna: Extended to July 31, 2027

Climate impact

IPE Global study reveals:

Compound heat-drought: Increased 19-fold over the decade

Monsoon loss: El Niño cuts peninsular/central rainfall by 10-20% (affecting Cauvery, Krishna, Godavari catchments)

Agricultural consequences

River flows: Drop 25-40% in El Niño years

Farm disruptions: Delayed kharif sowing and faster groundwater overdraft

Economic loss: ₹60,000-80,000 crore in national annual loss

surfaces — and what policymakers must urgently correct," he added.

In early July, a five-decade-old dispute over the share of costs for the construction of the Sardar Sarovar Project on the Narmada River was amicably resolved between Maharashtra, Gujarat, Rajasthan, and Madhya Pradesh, with Union Minister Amit Shah acting as a tie-breaker.

Water wars & truce efforts

Take the case of Odisha. For the first time in a decade, the state is showing willingness to resolve the Mahanadi dispute, a sign of a policy shift due to a change of guard as well.

"Both states will make their

mismin. Chhattisgarh Chief Minister Vishnu Deo Sai said sustained efforts are being made to resolve the dispute since the BJP came to power in both states. This comes when July also witnessed the extension of the tenure of the two oldest water dispute tribunals — the 40-year-old Ravi and Beas, and the 22-year-old Krishna water disputes tribunals — for one more year, till August 5, 2027, and July 31, 2027, respectively, as both of them have failed to arrive at a solution despite repeated extensions.

In the South, water is more of an emotion when it comes to the Cauvery. The first to step on the gas was Tamil Nadu Chief Minister Vijay. On June 19, he

saying the judgment of the Supreme Court in February 2018 does not direct that Karnataka should obtain the consent of the lower riparian states (Tamil Nadu, Puducherry, and Kerala) before constructing a structure across the Cauvery.

On July 28, Vijay said in a letter to the Prime Minister that Choudhary's statement was made without referring to the settled law and legal principles on inter-State water issues. He sought the intervention of Prime Minister Narendra Modi to ensure that no statutory or administrative approval is granted to the Mekedatu project unless it is demonstrably consistent with the Cauvery Water Disputes Tribunal (CWDT) Award and the judgment of the Supreme Court.

Vijay's visit to Bengaluru faced opposition from several pro-Kannada organisations, which even called for a state-wide bandh on August 13, asking the Karnataka government to oppose a ruling by the Cauvery Water Regulation Committee (CWRC) to release 3,500 cusecs of water per day to Tamil Nadu for 15 days, starting from July 29.

"More than 18 districts in Tamil Nadu are dependent on Cauvery water. It is the lifeline for the state. Politics should not take away the rights of the people in riparian states," said T Jayaraman, an environmentalist from the Cauvery Delta region. Singh added that a major reason for the rise in water disputes and water

'Focus of TN Budget will shift to investment from expenditure'

Congress leader **Praveen Chakravarty** became a Rajya Sabha member from Tamil Nadu in June with the support of the party's new ally, the Tamilaga Vettri Kazhagam. Chakravarty chairs two of the Congress' departments, the Professionals' Congress and Data Analytics wings. He has been advising the TVK government in shaping its policies, including helping to set up the Revenue Augmentation Committee under economist Montek Singh Ahluwalia. In a conversation on the sidelines of Parliament's Monsoon Session, he tells Archis Mohan in New Delhi that he expects the state Budget, the first of the new government and will be tabled on August 5, will change how the country has looked at Budget making in recent years.

The chief minister (C Vijay Joseph) turns to you for advice, especially on economic issues. What is your assessment of the state's finances and the new government's ability to deal with the challenges?

■ No, no. The chief minister doesn't turn to me often for advice. We (Congress) are an alliance partner, so to the extent we can help, we will. The state's finances are not particularly healthy. Its debt levels have gone up nearly six times in the last 10 years. Its interest burden is one of the highest among the larger states. Committed expenditure is almost 65 per cent of the revenues received, which is very high. It is a precarious situation. The chief minister realises this. First, it's an acknowledgement of the problem and that is important. Second, a committee has been formed under the chairmanship of Montek Singh Ahluwalia with a specific task and clear mandate: How do we increase the state's own tax revenues from 5.5 per cent of gross state domestic product (GSDP) to about 8 per cent, which is what it was about 15 years ago. This involves looking at excise reforms and looking for new revenue opportunities, including property taxes.

The committee will look only at the revenue side, and this is where I want to highlight how this is a shift. Most people, when they say the finances are bad, look at expenditure. What has gone unnoticed is revenue, and how it has gone down (outside of central devolution).

"THERE IS A COMMON THREAD BETWEEN WHAT HAPPENED IN TAMIL NADU AND WHAT WE SAW AT JANTAR MANTAR. IT IS THAT THE YOUNG GENERATION IS TIRED OF ESTABLISHMENT POLITICS AND THE STATUS QUO"

Praveen Chakravarty

Krishna, and Godavari.

"In India, every chief minister wants to show voters only how much water they have taken from another state. Hence, their visions are only for five years. The major issue is that the ownership of water is split into three parts between the Centre, the state, and the local bodies. Hence, no politi-

accelerates, and MSME agricultural supply chain disruption worth an estimated ₹60,000-80,000 crore in annual agricultural losses nationally," Mohanty said.

"The farmer is the first to absorb the shock, and the last to receive compensation. That asymmetry is what our climate vulnerability work consistently

submissions before the technical committee headed by the Chairman of the Central Water Commission (CWC). After assessments, the panel will submit its report to the Mahanadi Water Disputes Tribunal (MWDT) within three months with a solution to benefit the two states," Majhi said last month. Echoing similar opti-

requirements is poor river management, with crop patterns changing too, as commercial crops like paddy and sugarcane are consuming more water.

When each state and its politicians are trying to score points, farmers and the common man are expected to face the heat, with El Niño also playing spoilsport.

planned in partnership with industry to equip the workforce with required skills.

July 30: In a late-night Instagram video, Modi spoke about his government's steps to check the paper-leak menace.

July 31: In another late-night Instagram video, Modi lamented that "our daughters" had used abusive language, and called for forgiving the "misguided children".

August 1: PM inaugurated the Swami Vivekananda Cultural Youth Centre-Viveka Smaraka in Mysuru, Karnataka, and once again focused on the youth.

He said the energy of our young people is the driving force behind the success of initiatives such as Aatmanirbhar Bharat and Make in India.

He said the New Education Policy is preparing the nation's youth to meet the needs and aspirations of the 21st Century. ARCHIS MOHAN

What are the sectors that it would look at?

■ I have analysed this. Liquor excise alone in my estimate is short by about ₹35,000 crore a year. In terms of its percentage share in the state's GDP, if you compare with Maharashtra or Karnataka, the amount Tamil Nadu should have got through liquor excise, which it was getting 10-15 years ago, is not commensurate with its level of economic activities, and it is because of a variety of reasons, including corruption. Second, if the (panel) will look at whether we can charge excise duties based on alcohol volumes, which is not the case today in Tamil Nadu. Then there is huge scope for reform in property tax and its collection. Third, there is the issue of better monetising state assets, state public-sector undertakings, land banks, and road assets. These are various avenues that the committee would look into.

What can one expect from the first Budget of the new government?

■ The Budget will set the direction of how this government is looking to shape the state's economy. I believe it will shift the emphasis from expenditure to investment and revenue.

The chief minister's council of ministers is young — its average age being 44.6 years.

■ The idealism of the young is an advantage. So far we have traditionally had "experienced ministers" more interested in doing politics and politicking than devoting themselves to new ideas, issues of governance and efficiency. I can tell you from personal experience that the industries minister (S Keerthana, who is 29 years old) is idealistic, and also keen to understand how the state can move up the value chain. A question she asked us after being sworn in was how we could move from making iPhone cases to producing some of the parts in the phone. I don't see a so-called experienced politician or minister even thinking along these lines. You could always say the disadvantage is lack of experience, but that can be easily supplemented with not just the bureaucracy but outside experts as well.

You are one of the few who predicted the TVK's win in the Assembly polls because

What are your views on welfareism and on universal basic income since you piloted the Congress' 2019 manifesto promise of Nyay or Nyuntam Aya Yojana?

■ It is easy for us to dismiss all of this as welfareism but the question is if as a country we are not confident of creating jobs, it's the responsibility of any elected government to ensure that people's needs are taken care of. How do you do that? The growing welfareism is a direct consequence of the inability and the uncertainty around jobs, and the future of jobs and incomes. On Nyay, what many people miss is that even in that manifesto we had said that we would also ensure that the Budget expenditure on it did not expand. We said we would have to re-architect the expenditure side and rationalise a lot of expenditure to move more towards cash transfers.

Youth connect: PM ramps up outreach after Neet row

On Sunday, the PM launched the 'Drug-Free Youth for Viksit Bharat Sanjivani Campaign'. According to a Press Information Bureau (PIB) release, "10 million young citizens from over 28,000 locations" connected to the PM's video conference. Millions of youth took the anti-drug oath. Drawing upon the teachings of Sri Guru Granth Sahib, the PM spoke of how societal rejection of mind-altering substances is embedded in India's tradition and culture.

In a late-night video on Instagram, he described the examination paper leaks as "extremely painful" for students and parents and promised strict action against paper leaks in the next day's Union Cabinet meeting.

July 24: The Cabinet approved the amendments to the anti-paper leak law. In another late-night Instagram reel, the PM thanked young people for sending their suggestions.

July 25: PM urged National Democratic Alliance members to engage with the youth, especially on Instagram, said government sources.

July 26: PM announced the setting up of fast-track courts to deal with exam paper leak-related cases.

In an Instagram post, he announced setting up a high-powered task force on examination reforms headed by Infosys cofounder Nandan Nilekani.

July 28: PM held a meeting with secretaries of departments of finance and economy, commerce and industry, and technology.

He "observed" that "a government must always remain youthful and forward-looking, continuously adapting to new challenges and opportunities".

He emphasised the importance of proactive communication on strategic sectors where the country is undertaking major initiatives.

He said to counter misinformation and unfounded fears surrounding such efforts, and spoke of the need for greater participation of young innovators and entrepreneurs in the cybersecurity ecosystem. He stressed that new academic courses should be

E20 debate shifts into high gear

The AAP plans a march to the Prime Minister's residence tomorrow as opposition parties step up protests against blended petrol, Archis Mohan writes

What the Union government describes as a carefully tested fuel transition is fast becoming a political flashpoint. Opposition parties are mobilising protests against petrol blended with 20 per cent ethanol, or E20, while the policy is drawing scrutiny in Parliament, despite the Centre's insistence that its nationwide rollout is backed by extensive studies and field trials.

On Saturday, the Aam Aadmi Party (AAP) held a "national town hall against E20" in the national capital. AAP chief Arvind Kejriwal announced that he would march to the Prime Minister's residence at 12 pm on Tuesday with 100 volunteers to submit a petition backed by

200,000 signatures collected through an online campaign. The issue is also raging in Maharashtra's political discourse. Addressing a rally at Mumbai's Shivaji Park on April 26, Shiv Sena (UBT) chief Uddhav Thackeray took a swipe at Union Road Transport Minister Nitin Gadkari, saying the "khadda (potholes)" minister was now talking about ethanol. "This is definitely the next issue," Thackeray said. His son and Sena (UBT) legislator Aaditya Thackeray argued that many people were upset by what they saw as the forced adoption of E20 petrol. Congress state units have likewise demanded a probe into the

ethanol policy and into any potential conflict of interest linked to it. At a July 23 meeting of the Parliamentary Standing Committee on Transport, Tourism and Culture, several MPs questioned senior government officials about complaints of vehicle problems associated with E20 fuel and asked what steps the government was taking in response. The controversy has also reached the Bombay High Court. Later this week, the court is scheduled to hear Gadkari's suit against Meta, X Corp, Google LLC and unidentified persons over allegedly generated posts related to the ethanol policy. During the previous hearing

on July 28, Gadkari sought the immediate removal of fabricated content and an injunction against its circulation. His plea contends that unknown individuals falsely portrayed him as personally responsible for the programme and alleged that he and his family had profited from it. The next hearing is on August 5.

At Saturday's town hall in New Delhi, Kejriwal argued that consumers should be free to choose between E20 and regular petrol at fuel stations, and that E20 should be sold at a lower price. Ravi, a gig worker, said his motorcycle had developed problems over the past two months, affecting his livelihood.

CONGRESS STATE UNITS HAVE DEMANDED A PROBE INTO THE ETHANOL POLICY AND INTO ANY POTENTIAL CONFLICT OF INTEREST LINKED TO IT

hood. Anupam, an environmental science professor, argued that ethanol should be assessed not only for tailpipe emissions but also for fertiliser use, water consumption, agricultural practices and changes in land use.

The government has mounted a forceful defence of the blending programme, saying extensive testing and large-scale field experience have found no evidence that E20 petrol causes abnormal engine wear, corrosion or reduced vehicle life. It argues that the programme has strengthened India's energy security by shielding consumers from swings in global oil prices. Union Minister of State

for Road Transport and Highways Harsh Mahotra, who also heads the BJP's Delhi unit, accused Kejriwal of spreading "misinformation" about E20 petrol. Mahotra claimed that wider use of E20 had improved Delhi's air quality by 30 per cent and would save nearly ₹1 trillion in foreign exchange during the first year.

In a written reply to the Rajya Sabha last Wednesday, Gadkari said some rubber parts and gaskets in BS-IV vehicles — introduced from April 1, 2005, and manufactured before 2016 — might need replacement when operated on E20 fuel, though such changes could be carried out during routine servicing.

He added that automobile manufacturers and vehicle-testing agencies had made clear that mileage depends on multiple factors beyond fuel type, and that studies had found no need to modify car or two-wheeler engines.

A day later, in another written reply tabled in the Lok Sabha, Gadkari said E20 petrol could reduce fuel economy by 2 to 6 per cent depending on a vehicle's category and age. He maintained, however, that dynamometer tests and on-road durability trials had detected no engine failures attributable to E20. The minister said the fuel delivers better acceleration, improved ride quality and roughly 30 per cent lower carbon emissions than E10. More than 200 million two-wheelers and over 30 million petrol cars, he added, have been operating on ethanol blends without any verified evidence of widespread engine failure or vehicle breakdown caused by ethanol blending.

MUMBAI | MONDAY, 3 AUGUST 2026 Business Standard

IN BRIEF

Purja's body found 3 days after avalanche on Broad Peak in PoK

The body of veteran Nepalese-British mountaineer Nirmal Purja was found on Sunday, three days after he and nine fellow climbers were swept away in an avalanche on Broad Peak, located in Pakistan-occupied Kashmir's (PoK's) Gilgit-Baltistan. The Alpine Club of Pakistan said the 43-year-old mountaineer's body was found at an altitude of around 5,200 metres. So far, the bodies of five climbers have been recovered, and efforts are underway to locate the remaining five, it said.

Curfew relaxed in Nepal as situation improves after communal clashes

Nepalese authorities on Sunday relaxed the curfew imposed in various parts of Madhesh and Koshi provinces as the security situation improved days after communal violence rocked the region. Three people have been killed in communal violence in Nepal that started after clashes erupted in Sunsari district bordering India in Koshi province, prompting authorities to impose curfews, restrict movement and stop all activities.

Trump pauses attack on Iran in hope of deal

Saudi crown prince stresses dialogue, de-escalation

REUTERS 2 August

President Donald Trump has said the US will hold off on a fresh attack on Iran as long as a deal can be reached quickly to halt Iran's nuclear ambitions and reopen the Strait of Hormuz.

Trump said late on Saturday on his Truth Social platform that Iran and other Middle Eastern countries had asked for time to complete a deal that would lead to "the immediate, complete and total" reopening of the vital strait and "an end to Iran's nuclear threat".

He did not name the countries in the post, which followed a call with Crown Prince Mohammed bin Salman of Saudi Arabia, a US ally.

In his call with Trump, the Saudi crown prince stressed the "necessity" of prioritising dialogue to de-escalate tensions in the Middle East, according to Saudi Arabia's state news agency.

A White House official told Reuters that the two had spoken but

"I HAVE AGREED, FOR THE FUTURE BENEFIT OF THE WORLD AND, LIKEWISE, THE SURVIVAL OF A SUCCESSFUL AND PROSPEROUS IRAN... ISRAEL JOINS ME IN THIS COMMITMENT"

Donald Trump, US President

did not provide details.

"Based on this request, I have agreed, for the future benefit of the world and, likewise, the survival of a successful and prosperous Iran, to cancel the attack, subject to being able to rapidly make a deal," Trump

wrote. Israel "joins me in this commitment", he said.

Trump's apparent de-escalation after days of threats of new attacks from each side was the latest twist in the war the US and Israel launched five months ago. Attacks have spread across the Gulf to the Red Sea and even a Mediterranean facility in Egypt.

Iran has largely closed the Strait of Hormuz, a conduit for 20 per cent of the world's oil and LNG before the war, causing energy prices to rise and stoking broader inflation.

Eli Cohen, Israel's energy minister and a member of Prime Minister Benjamin Netanyahu's security cabinet, said there was close security and intelligence coordination between Israel and the US on everything happening in the region.

But he added: "With or without an agreement, and regardless of any external commitments, if Iran attempts to renew its nuclear programme or advance its ballistic missile industries, we will be there. We will take action, and we will strike."

The knives are out for the world's oldest bank

BERNHARD WARNER Siena (Italy), 2 August

Banca Monte dei Paschi di Siena is the world's oldest bank. It has survived the rise and fall of the Medici, regional and world wars and its own near-death experiences — including a 5.4-billion-euro bailout in 2017 and a derivatives scandal that made the lender a byword for mismanagement.

But under Luigi Lovaglio, the chief executive, who was recruited by the Italian government in 2022 to engineer a turnaround, Monte dei Paschi has grown into one of Europe's healthiest financial institutions. Now, it's a takeover target. Sitting in Palazzo Salimbeni, the bank's fortress-like 14th-century headquarters in Siena's historic center, Lovaglio reflected last week on the bank's latest challenge. The Tuscan lender is being pursued by its biggest rival in an increasingly combative contest.

"I'm working around the clock to find the best deal," he said.

3 killed, 21 injured after female bomber blows up in Moscow

A homemade bomb carried by a woman killed at least three people and injured 21 near an upscale restaurant in central Moscow on Saturday evening, authorities said, amid unconfirmed speculation on social media that the attack may have been linked to the war in Ukraine. The explosion occurred just before 8 pm close to an Italian restaurant located in one of Moscow's seven Stalin-era skyscrapers at Kudrinskaya Square, the police said. REUTERS

Bangladesh issues alert against possible attacks on police vehicles

Bangladesh police has issued a nationwide alert against possible terrorist or extremist attacks on vehicles used by law enforcement agencies, in line with intelligence reports. The Operations Control Branch issued the internal directive on Saturday without naming or specifying the source of the threat. The directive, however, coincides with the second anniversary of the ouster of deposed prime minister Sheikh Hasina's Awami League government on August 5, 2024, following a violent student-led street protest. Plane carrying tourists crashes in Peru, killing 13 people on board

A plane carrying European tourists to view the famed Nazca Lines crashed into a field outside the Peruvian city of Nazca, killing 13 people, local authorities said. Nazca's municipal government said the plane departed from the nearby city of Ica on Saturday and was operated by Peruvian company Aerodiana. On its website, the airline said that it has offered scenic flights over the Nazca Lines for the past 14 years using Cessna Grand Caravan planes. AP/PTI

Opec+ makes small quota hike

REUTERS
London, 2 August

Opec+ approved an oil production quota increase on Sunday of around 188,000 barrels per day from September, the producer group said, in a move that completes the unwinding of a layer of voluntary output cuts. Due to export disruptions from the Gulf, Russia and Kazakhstan caused by the Iran and Ukraine wars, successive monthly Opec+ hikes over most of this year have remained largely on paper with

little impact on the market.

The September increase agreed by core Opec+ members — Saudi Arabia, Russia, Iraq, Kuwait, Algeria, Kazakhstan and Oman — finishes the phased rollback of a 1.65 million bpd supply cut originally agreed in 2023, when the group still included the United Arab Emirates, which left Opec+ in May.

Although Opec+ sources said before the meeting the group would likely pause output increases for the fourth quarter, its statement made no reference to what might be agreed

for the last three months of 2026. A pause was still a feasible option, said Jorge Leon, an analyst at Rystad.

"Opec+ has finished unwinding its voluntary cuts. The next challenge is managing the surplus that could emerge as export flows normalise," he said.

"Having completed the restoration campaign, Opec+ has little incentive to rush into further supply changes. Our base case is a fourth-quarter pause while the group prepares for the 2027 quota negotiations."

FROM ATHENS TO BORDEAUX, WILDFIRE RAGES ON

Greek firefighters battled on Sunday to control a huge wildfire that has destroyed over 100 homes northwest of Athens, while a fresh blaze forced evacuations on the popular tourist island of Kefalonia. Meanwhile, Hungary faces a critical five days, as the drying out of the Danube forced the country's sole nuclear power plant to shut for the first time in over four decades. PHOTO: REUTERS

Spain's Sanchez isolated in EU after Ceuta sparks fear of migration crisis

BLOOMBERG
2 August

Spanish Prime Minister Pedro Sanchez has been the most progressive European leader on migration, bucking his colleagues' rightward shift. That stance has now left him politically exposed after thousands of migrants overran a Spanish enclave in Northern Africa.

As he grappled with 50,000 undocumented migrants arriving illegally in Ceuta this week, the Spanish leader found himself the target of swift condemnations and warnings, with leaders vowing to impose border checks if needed and even suspend Spain's participation in Europe's free-trade zone, known as the Schengen area.

Spanish PM Pedro Sanchez

On Saturday, his isolation became more evident after Sanchez slammed European Union (EU) peers for what he called a "selfish, polarising and unlawful" reaction to the crisis. In a letter to the EU's leadership, he expressed his "serious con-

Migrants who crossed into Ceuta from Morocco queue up for water provided by the Spanish military. PHOTO: REUTERS

cern" to attitudes he said were "driven by prejudice, fake news, ignorance, or political interest." Meanwhile, leaders including Denmark's Mette Frederiksen, Italy's Giorgia Meloni and Germany's Friedrich Merz joined forces in a separate letter

signed by 22 member states, calling for immediate EU action. The bloc "cannot allow uncontrolled mass crossings, the instrumentalisation of migration to create the perception that illegal entry into the EU is possible," they wrote.

Inside the meltdown of a wunderkind's AI hedge fund

Situational Awareness, led by a 24-year-old Aschenbrenner, exploded onto the AI scene — and then nosedived

ROB COPELAND
2 August

Last year, Leopold Aschenbrenner, a man barely of legal drinking age with a fondness for Rubik's Cubes, crisscrossed the nation to raise money for his high-flying hedge fund.

An ex-researcher at OpenAI, who departed there in a cloud of controversy and then wrote a viral essay predicting an artificial intelligence (AI) revolution, Aschenbrenner had started his fund, Situational Awareness, in 2024 at age 22 with a burst of attention. That November, he raised \$100 million from big names in the tech world and immediately began going whole hog into AI investing.

From an office in the Bay Area that he shared with a podcast studio, he poured money into fledgling start-ups, chipmakers and data center companies — pretty much anything that could even vaguely benefit from the AI boom. The fund began reporting staggeringly high investment returns, quadrupling its investor money in mere months. It borrowed huge sums — tens of billions of dollars — from Wall Street banks to make ever-bigger bets.

When this star of San Francisco

Kenneth Griffin (right), CEO of Citadel, has sealed a deal to rescue Situational Awareness, founded by Leopold Aschenbrenner (left)

arrived in New York during his fund-raising tour around last summer, however, he received a relatively cool reception, according to three people from whom he tried to raise money, who declined to be identified talking about a private fund. They said they viewed him as a lightweight and a one-hit wonder. The asset management colossus Blackstone, the world's largest investor in hedge funds, passed on investing, according to two of those people.

One wealthy New York investor who did take the meeting welcomed Aschenbrenner into his downtown office, and then gave him a grilling, according to the investor, who

declined to be named publicly because he had agreed to keep the contents of the fund's pitch private. What was Aschenbrenner's plan if the AI revolution didn't pan out quite as hoped? The hedge fund founder had no detailed response, the investor recalled. Aschenbrenner simply truly believed it would all work out.

An early answer to that question arrived this week. When AI stocks dropped quickly, felled by questions about whether the technology would be quite as transformative as promised, Goldman Sachs — one of Situational Awareness's larger lenders — demanded the payback

of some of its loans, according to two bankers involved in the process.

The hedge fund couldn't — not without holding a last-minute fire sale. Over the next 30 hours, it worked to get rid of roughly \$50 billion in stocks. As it frantically called rivals for help, the firm's representatives claimed that it was hocking a portfolio of so-called hedges, or modest investments meant to protect from risk, that were now in distress, according to three people briefed on the entreaties.

That made little sense as potential buyers examined what was for sale: These were monster bets, many against companies like Adobe that the fund thought would be replaced by AI but now suddenly appeared stronger than ever, the three people said. These wagers formed a huge swath of the firm's total investments.

Scared to take on so much risk, some passed on the stocks on offer. The hedge fund Citadel eventually came to an agreement to buy much of them at a discount, a deal sealed in an early morning phone call Thursday between Aschenbrenner and Citadel's billionaire founder, Kenneth Griffin.

Situational Awareness survived. One person briefed on what

remains said it had roughly \$8 billion left, down from around \$30 billion at the start of July. Most of that is private stakes in companies such as Anthropic, which the firm has wide latitude to value and may or may not be worth what the firm hopes in the end. A minority of what remains is in publicly traded stocks, the backbone of the firm's original investment thesis.

"We let you down," Aschenbrenner wrote to investors at the day's end, according to a letter viewed by *The New York Times*. He vowed to "fight another day."

Aschenbrenner declined through a representative to be interviewed. The story of Situational Awareness is in some way an old Wall Street lesson learned by every generation and then forgotten by the next. Hot hedge funds, particularly those tied to trendy new investments like AI, burn bright and then sometimes fall, in some cases taking down the broader markets with them. Indeed, that appeared to have been on the minds of many on Wall Street on Thursday, as news of the company's struggles broke.

Kospi rout: S Korea's govt faces the heat

BLOOMBERG
2 August

South Korea's retail traders have long built a reputation for embracing risk. Yet July's punishing reversal in the Kospi has rattled even this battle-hardened cohort, exposing the limits of their tolerance for volatility.

Some, like Kim Han-kyung, a Seoul resident in her late 30s, have resolved never to invest again, while others are comparing the \$3.9 trillion market to a casino. Retail investors sold a record amount of Kospi shares on Friday despite a stunning 18 per cent rebound. The gauge still capped a 22 per cent loss for the month, the steepest since the global financial crisis.

Signs of frustration are everywhere on social media, with much of the blame being directed at the government. Encouraged by President Lee Jae Myung's stock-market reform drive as well as the debut of single-stock leveraged ETFs offering the prospect of amplified gains, mom-and-pop traders piled

Panic peaks 30-day Kospi volatility

about 78 trillion won (\$54.2 billion) into Kospi shares over May and June, only to be sucker-punched by the index's wild swings in July.

"That was the era of the Kospi mania," said Kim, who started investing in Korean stocks for the first time in early May. "I got completely swept up in the frenzy. Now, I'm honestly scared."

Trading in Kospi stocks was halted four times during the month, a record run for circuit-breaker suspensions, a tool rarely used before this year.

Sustained uncertainty

MPC is unlikely to change the policy rate

Economic uncertainty has not receded significantly since the Monetary Policy Committee (MPC) of the Reserve Bank of India (RBI) last met in June, and this will continue to dominate its three-day deliberations ending August 5. The fragile ceasefire between the United States (US) and Iran did not hold, and the Strait of Hormuz is blocked again, with little oil and gas flowing through this route. The strait facilitated about a fifth of the global flows of crude oil before the conflict. Signals from the Gulf are often hard to interpret. Fresh attempts are being made to open the strait, and US President Donald Trump has announced that he is holding the planned attack for now because the "perimeters of a deal" have been agreed upon. However, as long as both sides don't firmly agree on the mechanism to address the underlying issues, West Asia will remain a source of risk for a large energy importer like India.

STAY INFORMED THROUGH THE DAY @ WWW.BUSINESS-STANDARD.COM

ILLUSTRATION: AJAYA MOHANTY

infirmities of the Indian state is a long-term project. In the meantime, generous bilateral investment treaties are the way to make progress with foreign investment.

The fourth problem is trade barriers. Firms receiving foreign investment are more internationalised: They import more and they export more.

Trade barriers damage India's internationalisation. Protecting one upstream producer makes all downstream producers less competitive. Local content requirements and non-tariff barriers degrade the economics of locating production in India. Firms view the problems of trade policy as components of the investment regime. India cannot become an im-

OPINION 11

The impact of higher prices of crude oil on the consumer price index has been limited due to a partial pass-through by oil companies. The inflation rate in June increased to 4.38 per cent as against 3.93 per cent in the previous month. It is not clear how long oil companies will be forced to absorb the losses. A fresh deal in West Asia will help relieve the pressure. The RBI has projected an average inflation rate of 5.1 per cent for this financial year and is unlikely to change it much at this stage. On the domestic front, the biggest risk is the possibility of lower monsoon rain owing to El Niño. Although India has ample food grains, a possibility of lower production can push up the inflation rate. A higher food-inflation rate also tends to have a larger impact on inflation expectations. The food-inflation rate increased to 5.32 per cent in June, as against 4.78 per cent in the previous month.

However, at this stage the MPC is unlikely to react to the possibility of the below normal monsoon and its impact. Given the broader economic backdrop, therefore, it makes sense for the MPC to leave the policy rate unchanged. Financial markets, however, will focus on the RBI's commentary on both inflation and broader macroeconomic conditions. It is worth noting that the impact of higher prices of crude oil and global turmoil on India has been reflected not in inflation numbers, owing to the limited pass-through, but in the foreign-exchange market. After the June MPC meeting, the RBI announced various measures to attract foreign flows. About \$41 billion has been mobilised thus far under the concessional mechanisms announced in June. Given the window is open for about another two months, the markets will want to know what the RBI's broad expectations are in this context.

Although the inflows seem to have helped stabilise the rupee for now, it is worth noting that these funds may not solve the underlying problem. Higher inflation rates in other parts of the world, particularly in the developed world, are pushing up bond yields. Further, the communication style of the new Federal Reserve Chairman Kevin Warsh and the lack of forward guidance from the US central bank are creating a fair bit of confusion in the market. Last week, yields on 30-year US government bonds, for instance, increased to the highest level since 2007. Higher bond yields in the US and other developed countries will inevitably affect capital flows to emerging market countries like India and put pressure on the rupee. The solutions to the difficulties in the balance of payments must come from the government, which will enable the inflow of long-term, stable foreign capital into India.

Dominating the sky

Indian aviation needs more competition

IndiGo, with more than 66 per cent of the passenger share among domestic airlines, is leaving its teens during a difficult period in aviation history. While IndiGo, at 20, is a success story in the Indian skies for continuing to fly (for a large part in profit) for two decades, its market dominance has often raised a question mark over the issue of competition. While a possible duopoly has been a matter of concern in other sectors such as telecom — even pushing the government to pick up a significant stake in a debt-ridden private telecom company — aviation has been a largely two-player market for all practical purposes in the recent years. Although the government is reportedly exploring the idea of allowing airport owners to run airlines, it should not allow another monopolistic air pocket.

That said, with India witnessing robust growth in passenger traffic, it needs greater competition to help both the industry and consumers. In India, which is the third-largest domestic market globally, the annual passenger traffic is estimated at over 400 million. According to a government projection, the numbers could exceed one billion by 2047. Even as some stringent rules, such as the policy that required airlines to operate within India for five years before going international, got scrapped, there's need for greater reform to broaden consumer choice. While there's been an investment push to increase the number of airports and boost regional connectivity, it's important to enhance competition following the privatisation of Air India (now in the Tata group) and subsequent consolidation. The consolidation has left the market with two airlines of consequence — IndiGo and the Air India group. The rest are small players.

The agile and low-cost carrier founded by Rahul Bhatia and Rakesh Gangwal, with its first flight using the A320 aircraft between New Delhi and Imphal on August 4, 2006, had entered a crowded and competitive aviation market. Air India, Jet Airways, and Kingfisher Airlines, besides SpiceJet, Air Deccan and GoAir, were its competition then. After running for more than 20 years, Jet got grounded in 2019 due to mounting debt, providing IndiGo more space to expand aggressively. Among others, Kingfisher stopped operations in 2012, Air Deccan in 2008 in its first stint and subsequently as a regional player in 2020, and GoAir in 2023. Against this backdrop, the industry sees high taxes on aviation turbine fuel (ATF) as an obstacle to profitability. High operational cost owing to high airport charges at major centres also affects profitability. Covid-linked flying restrictions and the geopolitical situation barring several routes have added to the stress in the aviation sector.

Although this is a global reality, India's hurdles have been harder to overcome because of the blocking of Pakistan's airspace for international flights. Besides, there are regulatory issues linked to pilot fatigue and flight duty time limitations (FDTL). IndiGo was at the centre of it all in December last year, when it failed to comply with the regulatory norms on pilot fatigue and FDTL, cancelling hundreds of flights and throwing Indian aviation into chaos. The December crisis, arguably caused by a duopoly situation, also took the issue of pilot shortage centre stage. The policymakers, regulators and the industry should invest meaningfully in pilot training while making Indian aviation attractive for the existing lineup of talented pilots and crew members.

Six issues impeding foreign investors

There is no silver bullet for attracting investment

Internationalisation is central to sustained Indian economic growth, as firm productivity rises through proximity and engagement with advanced economies. India is a capital-scarce economy. Large volumes of low-cost foreign capital are required to finance domestic investment. Recent trends are concerning. Net foreign direct investment (FDI) has stagnated since 2011. The stock of foreign portfolio investment is not growing. Firms are importing less, and then inevitably exporting less.

There is no single policy intervention that will alter this trajectory. We must assess the entirety of foreign firms' interaction with the Indian state. Six elements require focus.

The first question is whether capital can enter, adapt to commercial changes, and exit. The state runs a central planning system — the capital controls regime — with control of instruments, pricing, rescheduling, and exit terms. This interferes in commercial decisions.

There is a state of fog with thousands of pages of intrusive, detailed law, backed by criminal sanctions. Investors need expensive lawyers to reconstruct their obligations from rules, policy documents, and circulars. This law needs to be consolidated, stable, and intelligible, and step back from intrusion into the world of business.

Pricing rules are particularly harmful. Regulation operates on the premise that a valuer can discover one official price and eliminate commercial uncertainty. This restricts legitimate risk-taking. It harms smaller firms that rely on flexible financing arrangements.

Second, foreign investors face international taxation at domestic taxes. They allocate capital based on post-tax returns across jurisdictions. Tax policy must not merely ask how much revenue can be

extracted from income connected to India. The Ministry of Finance needs to be the custodian of India's growth in gross domestic product, not merely short-term tax revenues. Taxing foreign capital operates like a tariff on an imported input. It makes capital more expensive for the Indian enterprise and makes Indian exports uncompetitive.

Foreign capital coldly evaluates the Indian state. It moves to jurisdictions offering better combinations of tax, risk, and institutional quality. India operates a source-based taxation policy, but residence-based taxation works better in furthering the Indian interest.

In economic success, India must compete for foreign capital through attractive low taxation for foreigners, as was done with success by countries like Ireland.

The third problem is expropriation by the Indian state. Multiple arms of the Indian state — from tax authorities to state governments — have a demonstrated history of harming foreign firms. In developing countries, domestic institutions such as the judiciary and property rights are weak. Bilateral investment treaties provide a safety blanket. They protect foreign investors through international arbitration when domestic institutions fail. The economic function of these treaties is to reduce institutional risk. This lowers the rate of return that foreign investors demand. The money paid out owing to writing strong treaties is the flow of insurance payments in return for stabilising vast sums of foreign money in the country. Each payment to a foreigner should trigger responses in the Indian state to solve the root cause which led to a foreigner being expropriated.

Treaties cannot substitute building state capacity. They do not protect domestic investors. But solving the

AJAY SHAH & SHUBHO ROY

The economics of survival

I was in Europe in late June for meetings, and the heat was on. Even for an Indian accustomed to high temperatures, the intensity of the sun was searing. It was also evident that these countries are not designed for heat, from buildings to devices for temperature control. As I made my way home, the monsoon was crashing across India. Mumbai, the financial capital, was brought to its knees with floods taking over roads and entering homes.

Cloudbursts in the Himalayas and Western Ghats were bringing with them landslides and loss of property. Then there was news of damage to roads and bridges, some of which were built only recently. The investment was clearly unkind of the climate extremes we now face. And all this has unfolded in a matter of one week.

So, if anyone still questions the grip of climate change, they are living in denial and derangement. This is what models predicted would happen as temperatures spiralled and spiked weather. It is time we acknowledged that we are doing far too little to stem this rot affecting our planet. It is time we got our act together. Sadly, we are going in reverse — not just in action but in the narrative that would make the world a different place.

The fact is that green technology is now making inroads into countries not for climate mitigation but because it makes more energy and economic sense. The leap to solar energy, without going down the fossil-fuel route, works when the cost of panels and batteries is cheaper than installing and building a power

grid, which also takes time. Countries are taking decisions based on their domestic priorities and the co-benefit, or collateral advantage, is reducing emissions of greenhouse gases.

Take Delhi's recent policy to move the needle on the electrification of its vehicle fleet. It is bold and a potential game changer. The policy provides a mandate for switchover to electric two- and three-wheelers as well as light commercial vehicles. Under it, by January 2027, only electric three-wheelers — used extensively as paratransit in the city — and light commercial vehicles will be allowed to be registered. By April 2028, only electric two-wheelers will be allowed registration. It combines this with fiscal incentives for new purchase and a robust scrapping policy, so that old vehicles can be turned new, but electric.

The objective of the policy is to stem air pollution in the city; this is why there is a focus on two-wheelers. The city registers, each day, some 1,000 new two-wheelers, which then contribute to its pollution load because of their sheer numbers. Similarly, the paratransit is a critical system to connect to public transport. The city is moving towards a green bus fleet and with its extensive subway system, this could be the way to its green transport future.

Delhi's electric-vehicle (EV) 2026 policy has limited fiscal incentives for personal vehicles, as it should, because these vehicles occupy disproportionate road space and congestion, which in turn adds to pollution. This EV transition is not designed for cli-

portant place for the world to produce when the Indian state interferes in international trade. A firm deciding where to locate a global factory evaluates the friction at the border.

The fifth problem is the domestic financial system. Consider a container ship that reaches Nhava Sheva. From there, the containers reach deep into India through Indian infrastructure. In a similar fashion, once foreign capital reaches the Indian shores, it connects into the Indian economy through the Indian financial system. Trusted pricing on the equity market, liquidity on all financial markets, the ability to hedge currency risk, the trust in banks, the workings of initial public offerings (IPOs), etc. All these features of domestic finance matter in the ultimate investment outcomes for the foreigner.

Foreigners do not require a government subsidy in the form of price control on the dollar/rupee exchange rate. They require liquid, efficiently priced derivatives to hedge exchange rate risk. FDI investors face rupee exposure through future dividends, operating cash flows, and eventual asset sales over very long time horizons. They require enormous capabilities in the Indian bond-currency-derivatives nexus. But policymakers have damaged these capabilities from 2013 onwards.

Finally, we come to the rule of law and institutional development. Foreign capital shudders when contracts remain unenforced, tax administration is arbitrary, and regulatory interpretations change without notice. If engaging with the Indian state requires hiring government relations firms, something is going wrong.

Domestic investors also face all these broken institutions. They have also responded by pulling back from investment, but they are better off as they are able to navigate the human networks of personalised power. This is harder for foreign investors, and foreign investors have more choices about where to invest. Foreign investors are the most fearful ones. They need the rule of law the most, and the drumbeat of economic nationalism and industrial policy in India frightens them the most.

Subsidies, production-linked incentives, and investment-promotion agencies attempt to compensate for institutional weakness. They work for a few well-connected persons. They cannot replace functioning institutions.

There is widespread concern about the Indian retreat from economic engagement with advanced economies on capital flows, trade and FDI. We agree with this concern. However, there is no silver bullet. We need progress on all the six fronts shown here.

Rivals of the polio vaccine

DAVID OSHINSKY

Twenty years ago, the National Museum of American History held an exhibition titled "Whatever Happened to Polio?" It focused on Jonas Salk, whose vaccine helped tame the devastating virus that crippled and killed tens of thousands of children in the baby boom era following World War II. Salk became a national icon, our first home-grown celebrity-scientist. When people speak of polio today, it's Salk they remember.

The adulation served to marginalise the contributions of others, none more so than Albert Sabin, whose competing polio vaccine proved essential in

controlling the disease. Karen Torghele's *Albert Sabin: The Life of a Polio Vaccine Pioneer* is the first serious biography to appear. It does full justice to one of medicine's forgotten giants.

He was born Abram Saperstein in Bialystok, Russia, in 1906, and his earliest memories included the anti-Semitic pogroms that swept the region with murderous regularity. His family fled to America in 1921, settling in an immigrant stronghold known as "Silk City" for its textile factories. Abram entered high school with a new name, Albert Sabin, and a modest goal of finding steady work in the mills. His plans changed when a relative agreed to pay his way to New York University (NYU). He won a scholarship to the NYU School of Medicine, one of the few places that didn't restrict Jewish applicants.

Sabin's early career cemented his reputation as a gifted researcher, but a troubled colleague. It reached the point, says Torghele, where his mentors felt

compelled to warn prospective employers. While working at the prestigious Rockefeller Institute, Sabin received a lucrative offer from the Children's Hospital of Cincinnati, where he'd spend most of his career.

Given ample laboratory space and a hefty budget, Sabin concentrated on vaccines. He also knew a bit about polio. Sabin speculated that polio was a disease of cleanliness. As sanitation improved, children were less likely to be exposed (and naturally immunised) as infants. Squalor, he believed, could sometimes protect against disease.

Torghele, an epidemiologist who worked at the Centers for Disease Control and Prevention for more than 25 years, is a sure guide to the breakthroughs that made Sabin's work possible.

Two rival vaccine versions emerged — an injected, killed-virus vaccine developed by Salk, and an oral, live-virus vaccine championed by Sabin. Salk tested his vaccine in 1954, in what stands as the largest public health

experiment in American history. More than a million schoolchildren participated, some getting the real vaccine, others a look-alike placebo. A private charity provided the funding and ran the trials. The government played almost no role.

The positive results turned Salk into a superstar, much to the displeasure of other polio researchers who viewed Sabin, for all his nasty bluster, as the superior scientist with the better product. To compound matters, Sabin couldn't test in the United States because so many children had already received the Salk vaccine. But in 1959, at the height of the Cold War, the Kremlin and the United States (US) State Department gave him permission to run trials in the Soviet Union, where polio was rampant. Nearly 78 million oral doses were consumed, and the early reports were glowing. It was cheaper than Salk's vaccine and easier to administer. Sabin's vaccine was fully licensed in

Albert Sabin: The Life of a Polio Vaccine Pioneer by Karen Torghele Published by Yale University Press 390 pages \$38

the US in 1962. His professional success did little to quell his personal demons. Torghele's portrait of Sabin's private life is both straightforward and painful to read. He had multiple affairs. He showered family members with verbal abuse. His first wife killed herself by placing a plastic bag over her head. His second wife quickly realised her mistake and divorced him. He remained so distant from his two daughters that he cut them from his will. His gods were science and self-promotion, not necessarily in that order.

Salk, too, remained an enduring target. Sabin never stopped belittling him, even leading a successful campaign to deny Salk admission to the elite National Academy of Sciences.

Both men died — Sabin in 1993, Salk in 1995 — with Sabin the apparent victor. But his vaccine had a flaw; in rare instances, the attenuated strains reverted to virulence, causing polio in

the vaccinated child. Torghele intimates that he knew. During the Russian trials, she writes, several scientists had alerted him to the problem. He responded by persuading them to remain silent for the good of the vaccination programme.

In 2000, the CDC removed Sabin's live-virus vaccine from its immunisation schedule, replacing it with a modern version of Salk's killed-virus vaccine.

The widespread administration of a more powerful Salk vaccine ended the threat in the US and beyond. Hot spots remain in remote regions of Asia and Africa, where the numbers are small but persistent, and where the Sabin vaccine is favoured because of its low cost and easy delivery. The irony is that it will take both vaccines to eradicate the disease — Sabin's to contain it where it still circulates, Salk's to finish it off. An endgame that must have both men spinning in their graves.

The reviewer directs the division of medical humanities at the NYU Grossman School of Medicine. His books include *Polio: An American Story*, which won the Pulitzer Prize for history. ©2026 The New York Times News Service

FORM - II
JGMP RENEWABLE PRIVATE LIMITED
A-43, Phase II Extension, Hosur, Chennai - 681505, Uttar Pradesh, India

Notice under sub-section (2) of Section 102 of Electricity Act, 2003
The JGMP Renewable Private Limited ("JGMP"), a company incorporated in India, is a private limited company incorporated on 14.08.2024 under Companies Act, 2013. It has made an application under sub-section (2) of Section 102 of the Electricity Act, 2003 for grant of license for inter State trading in electricity in all regions across India before the Central Electricity Regulatory Commission, New Delhi. The necessary details in respect of the applicant are given hereunder:

(i) Authorized/issued, subscribed and paid-up capital:

	(a)	(b)	(c)	(d)
Authorized share capital	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-
Issued share capital	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-
Subscribed share capital	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-
Paid-up share capital	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-	Rs. 2,10,00,000/-

(ii) Shareholding pattern (indicate the details of the shareholders holding 5% and above of the shares of the applicant):

Name of Shareholder	Shareholding %
Johnson Green Private Limited	99.99%

(iii) Financial and technical strength: JGMP has adequate financial and technical resources to undertake the business of trading and meet all the statutory requirements in this regard. JGMP has full time professionals having industry expertise in the power sector including power trading, regulatory affairs and finance. JGMP is well placed to draw on its experience and work with various stakeholders in the Indian electricity system to build on this opportunity with the aid of its organized, skilled and experienced team. JGMP is confident that the emerging regulatory and legislative changes in the power sector would enhance the competition which exists in the Indian Electricity Sector and provide more avenues and opportunities to JGMP in the capacity of a power trader.

(iv) Management profile of the applicant including details of the applicant and of the persons on the management of the applicant in generation, transmission, distribution and trading in electricity or similar activity.

CA. Nitya Dip Goswami, Vice President: is a qualified Chartered Accountant with over 23 years of professional experience in the fields of Finance, Company and Accounts. NOTICE OF 23rd ANNUAL GENERAL MEETING, BOOK CLOSURE, RECORD DATE AND INFORMATION ON E-VOTING

Notice is hereby given that the 23rd Annual General Meeting (AGM) of the members of the Company will be held on Tuesday, 25th August, 2026 at 11:00 A.M. (IST) through Video Conferencing ("VC")/Other Audio Visual Means ("OAVM") to transact the business as set forth in the Notice of the AGM. The Notice of AGM along with the Annual Report for the year ended on 31st March, 2026 has been sent by email only to the members whose email addresses are registered with the Company/Depository Participant(s) in compliance with the applicable provisions of the Companies Act, 2013 and SEBI (LODR) Regulations, 2015 read with General Circular No. 03/2025 dated 22nd September, 2025 and other circulars issued earlier in this regard.

Notice of the AGM and Annual Report are also available on the Company's Website: www.rvnl.org/RAIL_VIKAS_NIGAM_UPLOADS (Annual Report 23rd Annual Report of 202526.pdf and website of the stock exchange i.e. BSE Limited & National Stock Exchange of India Limited on www.bseindia.com and www.nseindia.com). The Notice is also available on the website of Central Depository Services (India) Limited ("CDSL") on www.evotingindia.com.

Notice is also hereby given that Pursuant to Section 51 of the Companies Act, 2013 and Regulation 42 of the SEBI (LODR) Regulations, 2015, the Register of Members and Share Transfer Books of the Company will remain closed from Wednesday, 19th August, 2026 to Tuesday, 25th August, 2026 (both days are inclusive). The Final Dividend will be subject to deduction of TDS at applicable rates (Management and Administration) Rules, 2014 and Regulation 44 of the SEBI (LODR) Regulations, 2015 and as per MCA Circular, the members are provided with the facility to cast their vote on all resolution set forth in the Notice of AGM using electronic voting system (remote e-voting and e-voting) provided by CDSL. Individual members holding securities in Demat mode are allowed to vote through their Demat Account maintained with their Depositories and Depository Participant(s).

1. The remote e-voting period will commence on Saturday, 22nd August, 2026 9:00 A.M. (IST) and ends on Monday, 24th August, 2026 05:00 P.M. (IST). The remote e-voting shall be disabled by CDSL thereafter and the facility will be blocked forthwith.

2. The cut-off date for determining the eligibility to vote through remote e-voting or at the AGM will be Tuesday, 18th August, 2026. During remote e-voting period, shareholders of the company holding shares either in physical form or in dematerialized form, as on the cut-off date i.e. Tuesday, 18th August, 2026 may cast their vote electronically. Once the vote on a resolution is casted by a Member, the Member shall not be allowed to modify it subsequently.

3. A person who has acquired shares and becomes Member of the Company after the Notice of AGM has been sent electronically but before the cut-off date of Tuesday, 18th August, 2026, may obtain their user ID and password for e-voting by sending a request to www.evotingindia.com for procuring user ID and password for e-voting by providing the documents mentioned in the Notice of AGM.

4. Those Members, who are present in the AGM through VCO/AVM facility and have not cast their votes on the resolutions through remote e-voting and are otherwise not barred from doing so, shall be eligible to vote through e-voting system during the AGM. The members who have not cast their vote by remote e-voting prior to the AGM may vote at the AGM or participate in the AGM through VCO/AVM but shall not be

NOTICE OF 34th ANNUAL GENERAL MEETING

Notice is hereby given that the 34th Annual General Meeting (AGM) of the Members of the Company will be held on Monday, August 24, 2026 at 05:00 PM through Video Conferencing Facility ("VCO")/Other Audio Visual Means ("OAVM") to transact the business specified in the Notice convening the said AGM through e-voting, without the physical presence of the Members at a common venue, in compliance with the relevant provisions of the Companies Act, 2013 ("Act") and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations") read with General Circular dated April 08, 2020, April 08, 2020, May 05, 2020 and the latest Circular General Circular No. 03/2025 dated 22 September 2025 issued by the Ministry of Corporate Affairs (collectively referred to as "MCA Circulars") and relevant circulars issued by the Securities and Exchange Board of India, ("SEBI Circulars") and other applicable provisions of the Companies Act, 2013 read with rules made thereunder and, Secretarial Standard on General Meetings ("SS-2") issued by the Institute of Company Secretaries of India and any other applicable law, rules and regulations (including any statutory modification(s) or re-enactment(s) thereof, for the time being in force and as amended from time to time). The deemed venue for the AGM shall be the Registered Office of the Company. The instructions for attending the AGM through VCO/AVM and e-voting are mentioned in the Notice convening the AGM.

The Company has on August 02, 2026, sent the email through National Securities Depository Limited (NSDL) containing notice of the 34th AGM along with the Annual Report for the financial year ended March 31, 2026, to the members whose email IDs are registered with the Depositories or the Company. In view of aforesaid MCA & SEBI Circulars, physical copies of the AGM Notice and Annual Report are not being dispatched and the AGM Notice along with the Annual Report for FY 26 has been sent only through email.

Members, who have not received the Notice and the Annual Report, may download it from the website of the Company at www.coforge.com under the "investors" section (website for Notice: <https://investor.coforge.com/india/AGM-Holiday-2026.pdf>, website for Annual Report: <https://investor.coforge.com/india/Annual-Report-2026.pdf>) or may request for a softcopy of the same by writing to the Company Secretary at the above mentioned email ID or registered office address of the Company. The aforesaid Notice of the AGM and Annual Report is also available on the website of National Stock Exchange of India Limited at <https://www.nseindia.com> and BSE Limited at <https://www.bseindia.com> where the securities of the Company are listed and on the website of NSDL (the e-voting service provider) at www.evotingindia.com. Shareholders whose email IDs are not registered, are requested to register their email ID's by contacting (i) relevant Depository Participant (in case of dematerialized shares) or (ii) the Company at investor@coforge.com or MUR Indira Private Limited ("RTA") at investor.helpdesk@murpm.com (in case of physical shares) by sending a signed request letter in form (SR-1) (available on the website of the Company) along with self-attested copy of PAN Card and address proof and such other documents as provided in the said form. Post successful registration of the email, the shareholder may write to NSDL website to generate the password online by providing higher credentials. In case of any queries, shareholder may write to evoting@coforge.com or investor@coforge.com.

The instruction for attending the meeting through VCO/AVM and the manner of participation in the remote e-voting or casting vote at the AGM through e-voting is provided in the Notice convening the AGM. The Notice also contains the instructions with regard to login credentials for shareholders, holding shares in physical form or in electronic form, who have not registered their email address either with the Company or their respective Depository Participants ("DTPs"). Members participating through VCO/AVM facility shall be counted for the purpose of quorum u/s 103 of the Act.

Further, pursuant to the provisions of Section 108 of the Act and Rule 20 of the Companies (Management and Administration) Rules, 2014, as amended and Regulation 44 of the SEBI Listing Regulations, SEBI and other applicable provisions, if any, the Company is providing to the Members the facility to exercise their right to vote on the business as set forth in the Notice of the 34th AGM from a place other than the place of venue of AGM by electronic means. The Company has engaged services of NSDL to provide remote e-voting facility.

The remote e-voting period commences on Friday, August 21, 2026, at 09:00 A.M. (IST) and ends on Sunday, August 23, 2026 at 05:00 P.M. (IST). The e-voting module shall be disabled by NSDL, after the aforesaid date and e-voting shall not be allowed beyond the said date and time. Members of the Company holding shares in physical or dematerialized form as on the cut-off date, being Monday, August 17, 2026, may cast their vote by remote e-voting or may vote at the AGM. The voting rights of the Members shall be in proportion to their shares in the paid-up share capital of the Company as on cut-off date. A person whose name is recorded in the Register of Members or in the Register of Beneficial Owners maintained by the Depositories as on the cut-off date shall be entitled to avail the facility of voting through remote e-voting or at the AGM. A person who is not a member on the cut-off date shall treat this Notice for information purposes only. The procedure of e-voting/attending AGM is given in the Notice of AGM.

Any person, who acquires shares of the Company and become member of the Company after the dispatch of the notice and holding shares as on the cut-off date i.e. Monday, August 17, 2026, may obtain the login ID and password by sending a request at evoting@coforge.com or investor@coforge.com. However, if you are already registered with NSDL, for remote e-voting then you can use your existing user ID and password for casting your vote.

Further, the facility of e-voting will also be made available at the AGM and members attending the AGM, who have not cast their votes by remote e-voting shall be able to exercise their right at the AGM. Members who have already cast their votes through remote e-voting will be entitled to attend the AGM but shall not be entitled to vote again.

Mr. Nityanand Singh, Company Secretary (Membership No. FCS 2668, COP 2368) Mr. Nishu Nityanand Singh & Co., Company Secretaries have been appointed as the Scrutinizer to scrutinize the e-voting process in a fair and transparent manner. The results of the AGM will be announced by the Chairman of the Company or Company Secretary duly authorized within two working days of conclusion of AGM and communicated to the Stock Exchanges and shall also be displayed on the website of the Company i.e. www.coforge.com and on the website of NSDL (e-voting service provider) i.e. www.evotingindia.com.

In case of any queries or grievances relating to electronic voting or attending the AGM through VCO/AVM, Members may refer to Frequently Asked Questions (FAQs) for Members and e-voting user manual available at the download section at <https://investor.coforge.com> or can contact NSDL, helpline by sending a request to Mr. Anil Vohra, Deputy Vice President, NSDL, or Mr. Pallavi Mathur, Assistant Vice President at investor@coforge.com or contact NSDL at 022-4888 7000. Members may also write to Company Secretary at investor@coforge.com or registered office address of the Company.

Members may please also note that SEBI has amended Regulation 40 of SEBI Listing Regulations and has mandated that all requests for effecting transfer of securities including transmission and transposition shall be processed only in dematerialized form. In view of the same and to eliminate all risks associated with physical shares and avoid various benefits of dematerialization, members are advised to

The Smart Investor

Maruti sales engine to keep humming in FY27

Capacity additions and healthy demand should fuel volume growth even as cost pressures weigh on margins

RAM PRASAD SAHU
Mumbai, 2 August

The country's largest passenger vehicle maker, Maruti Suzuki India (MSIL), posted a mixed performance in the first quarter (April-June/1Q) of 2026-27 (FY27). While revenue growth, driven by its highest-ever quarterly sales, was strong, operating performance remained below expectations as higher commodity and other costs weighed on margins.

Brokers expect the company to maintain its sales growth in the current year, supported by its launch pipeline and robust demand momentum. At the current price, the stock, which has gained about 13.7 per cent over the past year, is trading at 21x its 2027-28 earnings estimates. Further gains will depend on the sales trajectory, market-share gains, and the company's ability to sustain margins. The company reported record quarterly volumes of 682,724 units in 1Q, up 29.3 per cent year-on-year (Y-o-Y). This was led by domestic sales of 557,988 units, up 29.5 per cent Y-o-Y, and exports of 124,736 units, which rose 28.6 per cent. Export growth came despite geopolitical disruptions, with MSIL accounting for 55 per cent of the country's vehicle exports

Strong growth expected

Key metrics and projections for Maruti Suzuki India

Net sales (₹ cr)	1,83,266 (19.9)	2,18,813 (19.4)	2,49,673 (14.1)
Figures in brackets show Y-o-Y % change			
(₹ crore)	FY26	FY27E	FY28E
Ebitda	21,450	22,905	30,251
Change (%)	6.5	6.8	32.1
Ebitda margins (%)	11.7	10.5	12.1
Net profit	14,445	15,230	20,633
Change (%)	1.0	5.4	35.5

Ebitda: Earnings before interest, tax, depreciation, and amortisation
E: Estimates
Standalone figures; Source: Motilal Oswal Research

during the quarter. Its presence across 120 nations helped offset regional disruptions. Key export markets include South Africa, Japan, and Europe.

Net sales jumped 35.9 per cent, driven by strong volume growth and a 5 per cent increase in realisations. Domestic demand received a boost from the goods and services tax (GST) cut, with the small-car segment growing 34 per cent and the sport utility vehicle segment expanding 44.6 per cent. Strong volumes helped MSIL

increase its market share by 230 basis points (bps) Y-o-Y to 41.2 per cent. Sales in July also remained robust, rising 33.4 per cent Y-o-Y. The company expects demand to remain strong and has maintained its guidance of 10 per cent domestic volume growth for FY27. The company continues to face supply-side constraints, with a pending order book of 130,000 units. It expanded its manufacturing footprint by commissioning the second plant at Kharkhoda, Haryana (250,000 units), in May

and the fourth manufacturing line at Hansalpur, Gujarat (250,000 units), in July. These additions have increased annual installed capacity by 500,000 units. With this expansion, the company's total annual production capacity has risen to 2.9 million units, with both facilities expected to ramp up over the next four to six months. The added capacity is expected to support growth in both domestic and export markets.

Analysts Subhash Gate and Heet Chheda of Choice Institu-

tional Equities expect the company to deliver steady growth, driven by GST benefits, launches, and strong exports, supporting volume and revenue visibility. While the brokerage has lowered its FY27 estimates to factor in the impact of commodity inflation, it has retained its "add" rating and raised its target price to ₹15,350.

Motilal Oswal Research is positive on the company and expects MSIL to sustain its outperformance in FY27, aided by a healthy launch pipeline, a revival in car demand,

lean inventory, and the rampup of its two new facilities. A sustained recovery in market share is likely to drive a rerating of the stock, analysts led by Aniket Mhatre said. They also expect margins to normalise after a relatively weak 1Q, supported by moderating raw material costs and steady volume growth.

Even though the top-line performance was strong, the operating profit margin contracted 380 bps Y-o-Y to 8.2 per cent, coming in below estimates. Margin pressure was primarily due to commodity headwinds, which impacted margins by 300 bps, followed by higher employee costs (40 bps), fixed costs related to inventory depletion (30 bps), higher gas costs (20 bps), and foreign exchange impact. This was partially offset by lower other expenses (30 bps) and higher other operating income (30 bps).

Emkay Research has cut its earnings estimates for FY27. It has also downgraded the stock, citing expectations of a sharp moderation in growth in the second half (H2) of FY27 as the base effect catches up—it expects flat volumes compared with H2 of 2025-26—and only a gradual improvement in margins from 1Q because of limited pricing power. The brokerage has an "add" rating with a target price of ₹15,500.

STREET VIEW

"These are true battleground stocks. Investors can't make up their minds whether the ROI on the massive capex spending will be worthwhile. Microsoft delivered, and maybe Microsoft is going to be able to move itself from the 'battleground' camp to be a 'trusted AI winner' stock."

Jed Ellerbroek, Portfolio Manager, Argent Capital Management

21,150-24,100 key support for Nifty

July was a strong month for the Nifty, supported by a combination of favourable global and domestic factors. The unwinding of the crowded global AI trade strengthened the case for foreign investors to allocate funds to India's more diversified equity market. The resulting foreign inflows also helped the rupee firm up. These factors helped drive a market recovery. The outlook remains positive, but the sustainability of the recovery will depend on an easing of global uncertainties, stability in crude prices and a broader improvement in earnings growth beyond a limited number of sectors. "Going forward, the 24,550-24,600 zone is expected to act as a crucial resistance area, as it coincides with previous swing highs. A decisive breakout above 24,600 could pave the way for a rally towards 24,900, with the potential to extend further to 25,200 in the near term. On the downside, the 24,150-24,100 zone is likely to provide strong support, and holding above this region will be crucial for maintaining the positive bias," said Sandeep Shah, head of technical and derivatives research at SBI Securities.

Tepid GMP for Juniper Green

July was a blockbuster month for initial public offerings (IPOs), with 11 issues hitting the market. The month ended with the mega issue of Manipal Health Enterprises, which was booked 5.12 times. The current week will continue to be a busy one for the IPO market, with the issues of MV ElectroSystems and Juniper Green Energy concluding. The issue of Ardee Industries will also open this week. Dhoot Transmission and LEAP India will announce their price bands this week. The grey market premium (GMP) for Juniper Green is 0.67 per cent, while MV ElectroSystems has a GMP of 26 per cent and Ardee Industries has a GMP of 13 per cent.

Weekend drill before closing auction debut

The rollout of the new closing auction session kept exchanges busy over the weekend, with courses conducting mock trading sessions until Sunday to iron out operational issues ahead of today's implementation. The new method replaces the volume-weighted average price methodology with a 15-minute auction to determine the closing prices of eligible stocks. Under the new framework, continuous trading in F&O-eligible stocks in the cash market will end at 3:15 pm, followed by a 20-minute Closing Auction Session to determine the official closing price. The new plan is expected to have the biggest impact on passive and arbitrage funds. While

Nifty IT passive funds witness outflows despite sector rebound

ABHISHEK KUMAR
Mumbai, 2 August

Passive funds tracking the Nifty IT index witnessed outflows in July, even as the sector rebounded sharply from multi-year lows. The combined assets under management (AUM) of Nifty IT index funds (ETFs) rose 13.8 per cent to about ₹6,600 crore in July (upto 30th), trailing the Nifty IT index's 18.6 per cent gain during the period. The gap suggests investors

Recovery mode

Compiled by BS Research Bureau

More equities closed higher than lower for the second straight month in July. Last month's BSE advance-decline ratio (ADR) edged above parity to 1.03, led by 2,482 advancing stocks against 2,046 decliners. July brought gains for large and small indices alike. An ADR over 1 shows that more stocks went up than down, proving the rally was strong across the board. Nifty gained 2.2 per cent, the Nifty Midcap 100 rose 1.8 per cent, and the Nifty Smallcap 100 advanced 2.5 per cent in July. The broad-based gains were supported by encouraging June-quarter earnings, renewed inflows from foreign portfolio investors, and a sell-off in artificial

intelligence stocks across other emerging markets, prompting investors to reallocate funds to India late in the month. After a prolonged period of modest returns in large-cap stocks, investors increasingly shifted towards small and midcap companies, where stock-specific opportunities, thematic rallies, and attractive valuations offered better potential. The outlook remains favourable, although it will hinge on stable foreign flows, a steadier rupee, supportive earnings, and continued retail participation. Volatility may persist, but the broader market could continue to outperform.

SUNDAR SETHURAMAN

booked profits or used the rally to exit at lower losses, resulting in estimated net outflows of around ₹280 crore. The sharp rebound in IT stocks in July was driven by a combination of better-than-expected earnings sentiment, easing concerns over artificial intelligence (AI) and attractive valuations following the steep correction earlier this year. The Nifty IT index gained 17 per cent in July, its strongest monthly performance in six years. "While the Nifty IT index rallied 17 per cent this month, the first quarter earnings of most frontline technology companies were largely in line with estimates, helping restore investor confidence. Also, the initial AI-driven euphoria, which triggered a massive rally in Asian

markets such as South Korea's KOSPI and Taiwan, has subsided over the past few weeks, resulting in a recovery in domestic IT stocks," said Ankur Puri, managing director (MD) and business head, Equirus Wealth. The outflows came after passive IT funds had logged net inflows over the one-year period ending in June. An analysis by *Business Standards* showed that investors continued allocating money to Nifty IT index funds and ETFs even as the benchmark index remained among the worst-performing sectoral indices during the one-year period. The AUM of passive funds tracking the Nifty IT index was

up over 20 per cent in the one-year period ending June even as the index declined 30 per cent in the same period. Calculations based on changes in fund assets and the Nifty IT index had estimated net inflows of around ₹2,500 crore. The Nifty IT index had declined nearly 31 per cent during the first half of calendar year 2026. IT stocks remained under pressure over the past year amid persistent uncertainty over the global technology spending outlook, especially the impact of AI on traditional IT services. The outlook, based on revenue growth forecasts provided by domestic and global firms,

remains muted. The lack of growth visibility has kept most asset and wealth managers underweight on the sector. The correction compressed valuations of large-cap IT companies to multi-year lows. As fears around AI-led disruption eased and companies delivered earnings largely in line with expectations, investor sentiments improved to some extent, according to experts. The July rebound also coincided with a shift in global technology stocks as the initial enthusiasm surrounding AI-linked semiconductor companies moderated. This benefited software and IT services companies.

passive funds rely on official closing prices for index tracking and valuation, experts expect the new mechanism to compress end-of-day opportunities for arbitrage funds. CONTRIBUTED BY SUNDAR SETHURAMAN & ABHISHEK KUMAR

'Corporate earnings may see low double-digit growth in FY27'

Q&A Even as high-frequency economic indicators continue to point to healthy economic activity and improving corporate earnings, global uncertainties remain the biggest factor for market sentiment, says **Alok Singh**, chief investment officer (CIO), Bank of India Mutual Fund. In an email interview with Abhishek Kumar in Mumbai he said that an adverse monsoon, slowdown in global growth, currency volatility and monetary policy shifts across major economies are also key downside risks for Indian equities. Edited excerpts:

The equity market has remained range-bound in recent weeks. What's holding back the next leg of the rally — persistent global uncertainties, or valuations and earnings growth expectations offering limited room for upside?

■ As geopolitical tensions eased in April, markets recovered from their lows and shifted their focus back to earnings growth and domestic fundamentals. However, renewed tensions in West Asia have once again weighed on sentiment, leaving equities largely range-bound in recent weeks. For India, crude oil prices remain critical for macroeconomic stability, making developments in West Asia a key driver of investor sentiment. While high-frequency economic indicators continue to point to healthy economic activity and improving earnings, global uncertainties are currently exerting a greater influence on market direction. Until geopolitical risks ease decisively, the market's ability

to sustain the next leg of the rally is likely to remain constrained.

What factors are likely to drive equity markets in the coming months?

■ The trajectory of earnings growth will remain the key determinant of market performance. In addition, progress on government-led capital expenditure, private investment activity, and the pace of global economic growth will be important factors to monitor. Geopolitical developments, particularly in West Asia, and movements in crude oil prices will continue to influence market sentiment and could create intermittent volatility.

Which sectors are best positioned to do well, going forward? Are there any sectors where you remain cautious?

■ Among the larger sectors, we believe financials are well positioned given their attractive valuations, healthy balance sheets, and earnings growth prospects. Credit growth remains supportive, while asset quality across the banking system continues to be robust. We also remain positive on automobiles, as rising discretionary spending and improving consumption trends are likely to support demand. Infrastructure-related sectors con-

"WE BELIEVE FINANCIALS ARE WELL POSITIONED GIVEN THEIR ATTRACTIVE VALUATIONS, HEALTHY BALANCE SHEETS, AND EARNINGS GROWTH PROSPECTS"

Alok Singh, CIO, Bank of India Mutual Fund

tinue to benefit from sustained government policy support and ongoing capital expenditure initiatives. Additionally, we remain constructive on the electronics manufacturing services (EMS) segment, driven by manufacturing incentives, supply-chain diversification, and growing domestic production opportunities. On the other hand, we remain relatively cautious on the energy sector due to crude price volatility and evolving global dynamics. We are also cautious on IT, where long-term business visibility remains clouded by the evolving impact of artificial intelligence (AI) and changing technology spending patterns.

Have the June-quarter earnings released so far met your expectations, and which sectors have stood out? Do you expect FY27 earnings growth to reach double digits?

■ Overall, the June-quarter (Q2 of FY27) earnings season has been better than expected so far. Among the sectors that have stood out, public sector banks, capital goods, and capital market-linked businesses have delivered strong operational and earnings performance. Looking ahead, we expect earnings momentum to remain healthy through

the second half of the financial year, supported by improving domestic demand, government capex, and favourable macroeconomic conditions. This should enable corporate earnings to deliver low double-digit growth in FY27. But downside risks remain. Any significant escalation in West Asia tensions, leading to sustained higher energy prices, or a weaker-than-expected monsoon could put pressure on earnings growth expectations and lead to downward revisions.

What are the key risks that equity markets face at this juncture?

■ The primary risks facing Indian equity markets currently are external in nature. Any escalation in geopolitical tensions could lead to higher crude oil prices, affecting inflation, fiscal balances, and corporate margins. In addition, an adverse monsoon outcome could impact rural demand, agricultural output, and inflation trends, thereby affecting earnings growth expectations. Risks of a global economic slowdown, currency volatility, and unexpected shifts in monetary policy across major economies also remain important factors that investors should monitor closely.

Stock investors: Do you track your portfolio return?

SALIENT POINT
SAUBHAG MITTAL

My client, Roy, a senior professional, decided to take up a second job. Dedicated evenings and weekends, he spent years researching stocks and making investment decisions. After five years, I asked: "How much did this second job pay you over the years?" Roy answered: "I don't know."

Sounds unbelievable. If you are spending time and effort on an activity to earn more, measuring the outcome should be obvious. Yet many investors do this with direct equity. "I want to generate higher returns than what I would get by outsourcing my equity investments or investing passively," said Roy. But then comes the important question: Are you measuring whether you are actually achieving this goal?

Roy, like many direct equity investors, can instantly recall successful investments. "I bought this stock at ₹200; today it is at ₹1,000." That is undoubtedly a good outcome, but it tells only a part of the story. What matters is the collective performance. What happened to the stocks that did not work? How much weight did you give to winners versus losers? How long was cash lying idle?

The only way to answer these questions is to measure portfolio-level returns generated on your cash flows. At what rate did your overall portfolio grow? Technically, extended internal rate of return (XIRR) is the appropriate way to evaluate the actual investor experience.

Without measurement, improvement is almost impossible. Making money is not enough. Equity markets generally create wealth over long periods, so a positive return does not prove

spent hours researching companies, tracking results and making decisions, only to underperform a passive alternative. In that case, you effectively did a fund manager's job but were not paid for it. Your "salary" for the additional effort was supposed to be the extra return, or alpha, generated over the benchmark. Without that extra return, your hard work and emotional strain went uncompensated. Roy was surprised that he had not thought about this basic data earlier and that such a fundamental number was not readily available. Today, investors can access charts, ratios, research and corporate announcements within seconds. Yet one of the most important numbers is often not easily visible: What return did my overall portfolio actually generate? The industry has made it extremely easy to know what your stocks are doing, but it is not always easy to know how you as an investor are doing.

Reviewing is not about the profit on a single stock or the percentage gain of the biggest winner. It is about knowing the complete portfolio return after considering every buy and sell decision, every mistake and every success.

Platforms do not highlight this data simply because investors have not demanded it enough. The next evolution in reporting should not just be more information, but meaningful measurement. More data does not always mean more clarity.

If you enjoy studying businesses and investing is a passion, returns may not be the only measure of success. The journey itself has value. But if the objective is to outperform, treat it like any other professional responsibility. Measure your performance. Compare it with a reasonable benchmark. Evaluate whether the effort is creating value.

Coming back to Roy, the heartening part is that he is proactive about his financial future and is working towards creating wealth. But the surprising part is that after all this effort, he never checked his "salary slip".

And without looking at the outcome, how would he know whether this second job was rewarding him? Many investors are working hard as their own fund managers, unaware whether their efforts have actually

Finfluencers, money decisions and the question of trust

To stay safe, stick to the minority that has a Sebi licence for offering advice

SANJAY KUMAR SINGH & KARTHIK JEROME

Only 6.3 per cent of the 48 financial influencers, or finfluencers, studied were registered with the Securities and Exchange Board of India (Sebi), although 33.3 per cent provided explicit stock recommendations, according to the "Clicks and Credibility 2.0" report by the CFA Institute's Research and Policy Centre.

Finfluencers can simplify financial concepts and widen access to information. However, investors must understand the risks, regulatory gaps and potential conflicts before acting on their content.

Why finfluencers appeal

Economic and capital-market growth has increased retail investors' interest in equities and other financial products. At the same time, gaps in their financial knowledge push them towards finfluencer content. The expansion of online platforms and growth of do-it-yourself investing after the Covid pandemic have also provided impetus to this trend.

"The bull run from 2020 to 2024 accelerated the growth of finfluencer content," says Anmol Sharma, content creator, FinancebyAnmol.

Technology and social media increasingly shape how younger and newer investors acquire financial knowledge. "Younger investors prefer accessible, real-time financial guidance through social media and digital channels," says Arati Porwal, senior country

M Pattabiraman, associate professor and founder, IIT Madras and Freehial.

Financial creators also simplify complex topics. "They provide simplified summaries of rule changes, topical news and fund reviews," says Pattabiraman.

Traditional financial advice, on the other hand, may not always be easily accessible or affordable. Its perceived complexity and cost can make finfluencer content more appealing. "Investors also tend to fear that traditional advice will expose their errors of omission or commission," says Vishal Dhawan, chief executive officer (CEO) and founder, Plan Ahead Wealth Advisors.

Responsible content benefits

Responsible finfluencer content can support investor education. "They can spread awareness of the nuances involved in investment decisions. Their diversity and ability to connect with audiences can increase Gen Z's willingness to

Tips for investors

- Verify the influencer's registration on Sebi's portal
- Check their qualifications, certifications, experience across market cycles
- Try to find out whether the content is sponsored, contains affiliate links or referral arrangements
- Demand clear information on fees, costs, risks, tax implications and lock-in of products
- Invest via regulated platforms with grievance-redress mechanisms

low-cost alternative to professional advice. "Content creators can use data and analysis to explain market events without resorting to hype, help viewers identify scams, avoid poor financial decisions, encourage long-term investing over short-term speculation, and improve their understanding of risk," says Sharma.

Beware of conflicts

Low entry barriers to content creation on social media create the risk that bad actors enter this arena and offer unverified or questionable advice. Many creators lack expertise in the subjects on which they advise.

"When the players offering advice are unregistered with the regulator, their advice carries no accountability," says Dhawan. Sometimes their advice is too generic to suit every investor's circumstances.

About 37.5 per cent of the finfluencers analysed in the CFA Institute report did not ad-

vised and harmful to investors. "Paid product reviews can encourage positive coverage of stocks, bonds or financial platforms," says Pattabiraman.

Monetary or non-monetary support from providers may cause creators to understate the risks of high-risk instruments and strategies. "Content on futures and options or trading, for instance, can be highly risky when it is not labelled accordingly," says Dhawan. Creators may also fail to highlight the high expenses of some financial products.

Rules tightened

Sebi has strengthened its surveillance of finfluencers and enforcement against violations. The regulator can impose fines, market bans and disgorgement for unregistered stock tips or advisory activity.

Advertising norms have also become stricter. Regulated intermediaries cannot pay referral fees or trail commissions to, or sponsor, unregistered finfluencers. Sebi

stock-price data that is at least three months old. Profit-and-loss screenshots and guaranteed-return claims are prohibited.

Porwal says standardised disclosure norms and a dedicated Finfluencer Code of Conduct would help.

Investors must recognise that Sebi cannot practically regulate every finfluencer because their population is too large. "The regulator's measures work only partially because advice is often delivered through private channels or offline. The thin line between education and advice also hampers enforcement," says Dhawan.

Checks before acting

Verify a content creator's Sebi registration, qualifications and certifications before acting on their advice. "Do not treat a term like 'Sebi compliant' used by a finfluencer as being equivalent to 'Sebi-registered'," says Porwal. Investors should check the creator's experience across market cycles.

Investors must distinguish educational content from promotional and explicit recommendations. "Creators often combine public educational channels with private groups that give recommendations. Also, beware that a low-cost workshop or product may be used to upsell a more expensive product," says Pattabiraman.

Understand how the creator earns revenue and their sources of business income. "Viewers should check descriptions for affiliate links containing the creator's or channel's name. An affiliate link is a red flag when a creator speaks positively about a product or platform," says Pattabiraman.

Avoid creators who promise guaranteed, exaggerated or risk-free returns. Check whether the costs, fees and taxes of products have been disclosed.

success. The relevant question is: Did your effort create additional value?

Compare your portfolio with the Nifty 50 Total Return Index (TRI). Suppose your direct equity portfolio generated 10 per cent annually while the Nifty 50 TRI delivered 12 per cent. You did create wealth, but you

rewarded them for the job. Every job deserves an appraisal, even the ones where you appoint yourself.

The writer is founding director, Circle Wealth Advisors, a SEBI-registered investment advisor; X: @saurabhsmittal

head-India, CFA Institute.

Influencers make financial information appear interesting and draw viewers with relatable, easy-to-follow social-media posts. "Their crisp, engaging content with graphic overlays attracts viewers," says

engage with financial content," says Porwal.

Influencer content can make saving, investing, tax planning and budgeting easier to access. When it is of high quality and authentic, free-finance content can act as a

equately disclose the existence of sponsored content or affiliate marketing. "Undisclosed sponsorships and affiliate marketing create conflicts of interest," says Porwal.

Vested financial interests often lead to advice that is bi-

also requires regulated entities and their agents to display their registration details on social media.

SEBI restricts unregistered educators from using real-time market data. Sponsored educational material must use

Finally, verify advice and claims of high returns through multiple independent sources. "Rely on personal scepticism and independent due diligence instead of accepting easy answers," says Patibabraman.

NOTICE

SPECIAL WINDOW FOR TRANSFER AND DEMATERIALIZATION (DEMAT) OF PHYSICAL SECURITIES

NOTICE is hereby given that pursuant to SEBI Circular No. - HO/38/13/11(2)2026-MRSD-PDD/3750/2026 dated January 30, 2026 ("SEBI Circular"), a Special Window for Transfer and Dematerialization ("demat") of Physical Securities will remain open for a period of one year from February 5, 2026 to February 4, 2027.

The above facility is only available for physical securities that were bought or sold prior to April 01, 2019 and allows their lodgement for transfer and demat as per SEBI guidelines.

Applicability Matrix:

Execution Date of Transfer Deed	Lodged for transfer before April 01, 2019	Original Security Certificate Available?	Eligible to lodge in the current window?
Before April 01, 2019	No (it is fresh lodgement)	Yes	Yes
Before April 01, 2019	Yes (it was rejected/ returned earlier)	Yes	Yes
Before April 01, 2019	Yes	No	No
Before April 01, 2019	No	No	No

Only those request(s) accompanied by original security certificate(s) along with duly executed transfer deed(s) and relevant supporting document(s) as prescribed in the SEBI Circular will be considered under this special window.

It may be noted that:

- Securities transferred under this facility shall be credited to the transferee only in his/her demat account;
- These Securities will be under mandatory lock-in for a period of one year from the date of registration of transfer, and
- During the lock-in period such securities cannot be transferred/lien-marked or pledged.

All eligible transfer request (s) should be lodged with the Company's Registrar and Share Transfer Agent (RTA) at the following address:

MUGF Intime India Private Limited

NOTICE OF ANNUAL GENERAL MEETING

NOTICE is hereby given that the 118th Annual General Meeting (AGM) of Jamshri Realty Limited (the Company) will be held on Tuesday, the 27th August, 2026 at 12.00 noon through Video Conferencing (VC)/ODI Audio Visual Means (OVM) at the Company's Registered Office No. 30225 dated September 22, 2025, issued by the Ministry of Corporate Affairs (MCA) and circulars issued from time to time for Securities and Exchange Board of India (SEBI) collectively referred to as the "Circulars", and all other applicable laws, to transact the business that may be set forth in the Notice of the AGM. Notice convening AGM and Annual Report 2025-26 will be sent electronically to those shareholders whose email addresses are registered with the Company or Registrar & Share Transfer Agent and Depositories. The letter providing the website, including the exact path, where annual report for the financial year 2025-26 is available, will be sent to those shareholders whose email address is not registered with the Company/Punjab Share Registry/Depositories/Depository Participant. The notice of the AGM and the Annual Report for the financial year 2025-26 will also be available on the website of the Company at www.jamshri.in, BSE Website at www.bseindia.com and on website of Punjab Share Registry/Depositories/Depository Participant.

Shareholders who have not registered their email address will have an opportunity to cast their vote remotely on the business as set forth in the notice of the AGM through remote e-voting or through e-voting system during the AGM. The manner of voting remotely for shareholders holding shares in dematerialized and physical mode will be provided in the Notice to the shareholders. Shareholders holding shares in physical mode and who have not updated their email addresses/VTC details with the Company are requested to update their email addresses by sending a Form ISR-1 and relevant forms to Punjab Share Registry (India) Private Limited, Registrars and Share Transfer Agents, Unit No. 8, Shiv Shakti Ind. Estate, J. K. Borima Marg, Lower Panel (E), Mumbai-400017. Shareholders holding shares in dematerialized mode are requested to update their email address/VTC details with the relevant Depository Participant.

Shareholders can cast their votes on the business set out in the notice of the AGM through electronic voting system ("e-voting"). The manner of voting, including voting remotely ("remote voting") by members holding shares in dematerialized mode, physical mode and for members who have not registered their email address has been provided in the Notice to the Shareholders who have cast their votes by remote e-voting prior to AGM may also attend the AGM but shall not be entitled to cast their vote again. Shareholders attending AGM who have not cast their votes by remote voting will be able to vote at the AGM. Members will be able to attend the AGM through VC/OVM. The information in this regard including login credentials to be used and steps to be followed for attending the AGM are explained in the notice of the AGM.

The Register of Members and Share Transfer Books in respect of Equity Shares of the Company will remain closed from 19.08.2026 to 25.08.2026 (both days inclusive). For JAMSHRI REALTY LIMITED

NOTICE

Dear Shareholders,

- Reminder to claim the dividends remaining unpaid/unclaimed.
- Transfer of equity shares in respect of unclaimed dividend to the Investor Education and Protection Fund (IEPF) Account.

In accordance with the Investor Education and Protection Fund (Accounting, Audit, Transfer and Refund) Rules, 2016 notified by the Ministry of Corporate Affairs (MCA), Government of India effective from September 2016, all the shares in respect of which the dividend has not been claimed / paid for seven consecutive years or more are liable to be transferred to the IEPF account.

The shareholders are requested to note that all shares in respect of which the dividend has not been claimed / paid for seven consecutive years or more and relevant shares upto 2017-2018 have already been transferred by the Company in the name of IEPF account as per IEPF rules.

The shareholders are requested to note that those who have not claimed their dividends for seven consecutive years or more from 2018-2019, their relevant shares are now liable to be transferred to the IEPF account as per the said rules. Please note that the due date for claiming dividend declared for financial year 2018-2019 is 02.11.2026. All concerned shareholders are requested to make an application to the Company or Company's Registrar and Share Transfer Agent preferably by 25.10.2026 with request for claiming unclaimed dividend for the Financial Year 2018-2019 and onwards to enable processing of claims before the due date.

The statement containing the details of name, address, folio number / demat account and number of shares liable to be transferred to IEPF account is made available in the company's website www.rootsindustries.com for necessary action by the shareholders.

The concerned shareholders holding shares in physical form and whose shares are liable to be transferred to IEPF account, may note that the company would be issuing duplicate share certificate in lieu of original share certificate held by them for the purpose of transfer of shares to the IEPF account as per the said rules and upon issue, the original certificate which are registered in the name will stand automatically cancelled and be deemed non-negotiable.

In case, the company does not receive any valid communication from the concerned shareholders on or before the due date, the company shall transfer Equity shares to the IEPF account as per the rules without any further notice to the shareholders.

The shareholders may note that they can claim their unclaimed dividend and the shares including all benefits accruing on such shares, if any, by making separate application to the IEPF Authority, in the prescribed Form IEPF-5, as stipulated under the said Rules and the same is available at www.iefp.gov.in, www.iefp.gov.in. Please feel free to contact the Company/MUGF Intime India Private Limited, in case you have any queries at their following address/email/telephone number:

PRANJAL SHARMA

Software takes the wheel in auto industry

Once a supporting actor, software has quickly become the main engine of modern vehicles. The leap from software in vehicles to software-defined vehicles has been remarkably swift — and this technological shift is hitting nearly every global market at once.

When Asmita More decided to sell her two-bedroom apartment in Navi Mumbai's Kharghar, she chose an AI-powered property portal instead of relying on the brokerage network traditionally used.

The platform connected her with buyers directly, and the sale was completed within weeks. "Maybe yes, because it has worked for me as a person trying to sell property in Mumbai with genuine interest from buyers," More said when asked whether she would trust such platforms again.

Her experience points to a broader shift in India's real estate industry. Property technology (proptech) companies are using AI to handle everything from sales calls to loan approvals — simplifying the process for homebuyers while cutting costs and boosting revenue.

AI could improve real estate sales velocity — the pace at which properties are sold — by 30-50 per cent and reduce customer acquisition costs by 20-50 per cent, according to an EY-Parthenon-Credai report released in June. The technology can potentially improve workforce productivity by 20-50 per cent and contribute \$14-17 billion to the sector's gross value added over the next seven years by "transforming" planning, construction, sales and customer engagement.

Property tech firms

maximum advantages come from exclusive datasets, along with the ability to build scale and provide customised automation solutions to stakeholders with different needs."

Human touch

Using AI for customer interactions does not completely remove friction. Igra Ghor, who recently bought a home in Mira Road, a suburb to the north of Mumbai, said AI-powered recommendation engines and local insights helped narrow hundreds of listings to projects matching her budget and preferences. It made comparing neighbourhoods and connectivity easy but she did not rely entirely on AI. "Some suggestions felt a bit generic or came from outdated listings, so I still did on-site visits, checked possession timelines, and verified developer credentials. AI made discovery far more intuitive and efficient, but it didn't remove the need for human judgment."

While More successfully sold her apartment through a property portal, finding a home on rent the same way was far less satisfying. She found the website lacked customisation, noting that traditional search methods still do a better job of understanding what a buyer actually needs.

AI is improving efficiency, workflows and customer engagement, but real estate

In various ways, vehicles around the world are becoming like mobile phones with integrated software that updates periodically. As a consequence, the consumer experience can be rapidly improved with software without changing the vehicle.

The focus on software, including artificial intelligence (AI), has prompted a deep change in vehicle manufacturing. "The automotive

AS VEHICLES TRANSFORM INTO ROLLING DIGITAL HUBS, AUTOMAKERS FACE THE CHALLENGE OF MAINTAINING CYBERSECURITY ON GLOBAL ROADS

industry is undergoing its most challenging transformation in over a century," says a report by the World Economic Forum (WEF). Vehicles are rapidly evolving into software-defined systems anchored by centralised compute, modular architectures, and continuous updates. This shift decouples hardware from software lifecycles, dramatically redistributing value among original equipment manufacturers (OEMs), suppliers, and tech platforms. As control pivots from isolated components to integrated software stacks, traditional roles across the value chain are being thoroughly redefined, according to the WEF.

For years, automakers ran on fragmented software provided by different suppliers. As each hardware vendor was trapped in its own proprietary system, vehicles ended up with disconnected software.

Today, an increasing number of automakers are developing integrated software architectures. A recent McKinsey report projects the global market for automotive software and electronics to reach \$519 billion by 2035 — growing at a 4.5 per cent compound annual rate, more than four times faster than the broader automotive market.

The rapid acceleration is driven by the rise of software-defined vehicles, AI and advanced driver assistance systems (ADAS). According to McKinsey, vehicles with Level 2 or higher automation could account for nearly 70 per cent of global sales by 2035. Level 2 systems are set to lead the pack at 52 per cent, with Level 3 autonomous vehicles taking a 16 per cent share.

The new architecture integrates a wide range of software — from ADAS and automated driving to infotainment, powertrain, chassis, body comfort, and connected security. As the market evolves, tech providers and automakers will increasingly co-develop software to align their needs and build a unified driving experience.

Vehicle security and passenger safety now go far beyond crash testing. As modern cars evolve into AI-driven, sophisticated digital devices, they also become vulnerable to cyberattacks. Every new car is essentially a mobile computing centre that continuously syncs with the Cloud, processes real-time data streams, and receives over-the-air system updates — all while leveraging AI to refine driver assistance and customise the in-cabin experience.

However, this connectivity introduces new vulnerabilities, making robust cybersecurity an absolute priority. For manufacturers, securing these systems must be integrated into every phase of a vehicle's development and operational lifecycle — because a hacking incident in a moving car can be fatal. Consequently, automakers must adopt a comprehensive security approach that incorporates AI-driven defences. Upstream Security's 2026 Global Automotive Cybersecurity Report provides compelling data on this rapidly changing threat landscape. Ransomware now drives 44 per cent of documented attacks — a more than twofold increase since 2024, according to the report. More than 61 per cent of these breaches threaten to disrupt thousands or even millions of connected vehicles simultaneously, highlighting a critical shift towards systemic vulnerabilities that jeopardise entire mobility fleets. Upstream's researchers analysed 494 publicly reported automotive and smart mobility cyber incidents in 2025 for the report.

The writer is an economic analyst and author

Beyond using AI in their daily work, proptech companies are making money from the technology by licensing proprietary software to banks, non-banking financial companies and insurers.

Business use

Property portal NoBroker says AI has been built into its technology — from room recommendations to blocking fake brokers — since the company launched 12 years ago. Over the last two years, it stepped up those efforts with ConvoZen AI, an in-house tool that runs its AI voice and text agents, listens in on customer calls, and gives live support to staff.

AI-driven leads and property matching have enabled certain company businesses to increase revenue by up to 195 per cent while requiring 55 per cent fewer human agents, said Akhil Gupta, founder and chief technology and product officer of NoBroker.

Square Yards uses AI for both buyers and industry clients.

find real estate in AI

While AI boosts property sales and efficiency, buyers and experts agree human trust remains essential, reports Prachi Pisal

SuperAgent Pro, its automated tool, handles chats in multiple languages, while its data tools use AI to check property values, verify ownership and clear titles. Earlier this year, the company integrated its search feature with ChatGPT, letting people find properties through conversations.

Vivek Agarwal, cofounder and chief technology officer of Square Yards, said AI-powered tools have boosted user engagement by 50 per cent and conversions by 40 per cent. The company licences its AI software to banks, lenders and insurers — a move that turns the technology into a standalone revenue stream rather than just an internal efficiency tool.

Truva, another proptech firm uses AI-powered WhatsApp assistants to answer customer queries, recommend properties and schedule site visits. AI voice agents make the initial conversations before handing customers to sales executives. Truva's sales teams use AI copilots to analyse customer interactions and convert voice notes into recommendations.

AI-powered WhatsApp interactions have nearly doubled the conversion of enquiries into site visits, according to Truva's cofounder Puneet Arora. Furthermore, new project launches now draw almost 50 per cent more visits by targeting prospective buyers from the

company's existing customer base.

AI-driven proptech companies are "no longer just novelties but have become mainstream in the home-buying process," said Aayush Puri, chief executive officer, residential, Middle East, and CEO of Anarock Channel Partners.

"From offering personalised searches to automated valuations and immersive virtual tours that lower friction for homebuyers and channel partners, the scope is constantly expanding," he said.

However, Puri noted, companies are unlikely to build a lasting competitive advantage through AI models alone. Instead, "the

executives acknowledge that fragmented property records, data quality and the emotional nature of home buying limit the scope for complete automation.

"We've intentionally kept the experience personal and human rather than trying to automate everything," Arora said. "Currently, the objective of these AI agents is simply to get the buyer to visit the property. Once the visit happens, everything thereafter is handled by a human because home-buying is a very emotional journey."

As real estate companies rush to adopt AI, industry experts say the differentiator won't be model sophistication, but data quality and the ability to combine technology with human trust.

AI in proptech is in its infancy, but its role is expected to grow from property discovery to supporting transactions. Executives emphasise that AI will enable — not replace — human advisors, who remain core to the homebuying process.

AI in HR: Adoption up, governance trails

Source: Agentic AI Readiness report by Great Lakes Institute of Management, Gurgaon

Nearly one in four companies in India uses artificial intelligence (AI) in human resources (HR) without a rulebook. A new report from the Great Lakes Institute of Management says that while 66 per cent of companies are actively piloting or deploying agentic AI in HR, only 43 per cent have established formal governance frameworks. The survey gathered insights from HR leaders and business professionals across industries. Agentic AI systems can independently plan, execute and adapt tasks without a human prompt.

AI at work

66% of organisations have deployed AI in HR, but only 43% have clear employee guidance, and 25% have no guardrails

76% of them say AI has changed how roles are designed and performed

72% believe AI coworkers will be central to daily work within two to three years

9% of organisations foresee significant job losses due to AI

Adoption pace

34% of organisations have deployed active agentic AI pilots

33% of them are exploring the technology

32% are scaling up adoption

Employee productivity

36% of firms see moderate improvement due to AI

32% report significant improvement

15% see limited improvement

12% have not measured impact yet

Use case

62% of companies use AI for technology functions

41% for HR management

37% for operations

32% for customer support

21% for finance

'Indians involved in solving world's toughest problems'

Google DeepMind executives explain how the AI lab is deploying autonomous agents in the country

PEERZADA ABRAR

Google DeepMind is turning to artificial intelligence to accelerate its own research, deploying AI agents alongside scientists to identify gaps in its Gemini models and speed development, said two senior executives as they explained how their company is solving "very tough" global problems. The approach marks a shift in how Google DeepMind's India teams work, using AI not only to build software but to help chart a path toward artificial general intelligence (AGI), which can perform human-like tasks across domains. Demis Hassabis, Google DeepMind's chief executive officer who shared the 2024 Nobel Prize in Chemistry, has said that AGI could arrive as early as 2029.

By assigning routine testing to AI agents, DeepMind hopes to speed up specialised applications in drug discovery and materials science, while strengthening its foothold in India's developer market.

AI is a powerful research tool, Manish Gupta, senior director for India and A-Pac at Google DeepMind, and Seshu Ajarapu, the company's

senior director of applied AI, told *Business Standard* in an interview in Bengaluru.

Google DeepMind teams, including those in India, are using AI agents to improve Gemini by identifying capability gaps, curating data and verifying improvements, said Gupta. Teams in Bengaluru are improving Gemini's reasoning and multilingual performance. Automating parts of AI research gives scientists powerful tools for complex challenges such as disease discovery and new materials.

"As we move towards more powerful AGI capabilities, we have the opportunity to tackle virtually every disease, develop cures, address renewable energy and solve many of the toughest problems that remain unsolved," Gupta said. "We have that opportunity to make much faster progress on many of those very tough problems. That work is being done globally, including in India."

Ajarapu said AGI's best value will lie in its ability to benefit humanity by accelerating scientific discovery, including advances in medicine and climate. Researchers in India have

Manish Gupta (left), senior director for India and A-Pac, and Seshu Ajarapu, senior director of applied AI at Google DeepMind. They talk about their work in India

access to DeepMind AI tools such as AlphaGenome, which analyses the impact of genetic mutations, and AI Co-Scientist, a virtual scientific collaborator.

Across India, new and expectant mothers are adopting life-saving health practices through programmes run by the nonprofit Arman. The initiative powers its outreach using machine learning models developed with probono support from Google DeepMind researchers.

More than 150,000 Indian researchers are leveraging the AlphaFold Protein Structure Database for open-access scientific discovery. They are deploying a DeepMind tool called AlphaFold to address complex health problems.

Researchers at All India Institute of Medical Sciences (AIIMS) in New Delhi are using Google's open-source MedGemma models to build localised tools for leprosy and reproductive health. Gupta said that Indian researchers are fine-tuning these models

with local datasets.

Gemini Live, a conversational voice feature for Google's AI, now supports 25 Indian languages and dialects, including Sanskrit, Bhojpuri and Maithili, letting users interact with the assistant in their native language. Gupta said such models have significantly narrowed the performance gap between English and Indian languages, although improvements are needed.

Google DeepMind and the Partnerships Innovation team have launched the Agricultural Monitoring and Event Detection API to enhance farm oversight across India. Powered by machine learning, satellite imagery and three years of historical data, the tool identifies crop types, field sizes and planting dates.

Complementing this is Earth AI — a suite of Gemini-powered models designed for environmental tracking and disaster response. Together, these tools deliver data-driven insights to refine farm management, address soil and climate needs, and forecast harvest yields.

Gupta said he views AI less as a geopolitical race and more as a way to address

India's challenges in health care, education and agriculture. He noted that India's growing developer ecosystem and startups such as Sarvam are building foundational AI models.

Asked how Google DeepMind differentiates itself from rivals in winning Indian developers and enterprises, Ajarapu said the company's advantage lies in its end-to-end AI stack.

Ajarapu said Google builds across the entire AI stack — from custom infrastructure to foundational models, open systems like Gemma, tools such as MedGemma, and enterprise software.

Rather than chasing labels like AGI or artificial superintelligence, Ajarapu evaluates progress through practical benchmarks — specifically the real-world problems solved and how AI is delivered. While systems have surpassed human capability in specialised domains, he noted that true general intelligence will take longer and needs strict oversight.

"We need to shepherd this technology carefully with a lot of responsibility and clear markers," he said.

SANJEEB MUKHERJEE
New Delhi, 2 August

Earlier this month, after a gap of almost 14 years, the Union Cabinet approved a new National Investment Policy for Urea (NIPU-2026) with the objective of setting up 8-9 gas-based urea plants, both brownfield and greenfield — with a combined production capacity of 10 million tonnes (mt) in a fresh stab at self-reliance over

Since the NIP 2012, India's urea consumption has risen from 29.56 mt in 2011-12 to almost 40 mt in 2025-26, a CAGR of around 2.32 per cent. Paddy acreage during this period has grown by a CAGR of 1.29 per cent while that of maize has risen by 3.58 per cent and wheat by 0.84 per cent. Clearly, the rise in maize cultivation could be one of the main reasons for the growth in urea demand.

In addition, pilferage and leakage have been major issues over the years

Expect a status-quo policy

The rate-setting body is likely to remain in wait-and-watch mode as uncertainties continue to cloud the macroeconomic outlook

5.25 per cent, raised the projection for inflation and lowered the estimate for growth.

The 10-year bond yield, which closed at 6.975 per cent on June 5, dropped to 6.68 per cent on July 6

The Indian Ocean Dipole (IOD) — a climate pattern defined by the difference in sea surface temperatures between the western and eastern sectors of the tropical Indian Ocean — is currently in a weak

Under the new framework — an extension of the 2012 New Investment Policy (NIP) with some revisions — plants will be set up in both the private and public sector, and even by cooperatives.

Releasing the policy, Union information and broadcasting minister Ashwini Vaishnaw said that India's urea consumption is around 40 mt, while current domestic production is close to 30 mt, with the gap being filled by imports. The new policy is expected to help bridge that gap.

Each of the new plants will have a production capacity of around 1.27 million tonnes per annum.

The approximate project cost per plant is expected to be ₹11,000 crore for the greenfield category and ₹9,000 crore for brownfields, said sources, based on an exchange rate of ₹90 to the dollar. This would put the cumulative investment by way of the new policy close to ₹90,000 crore-₹1 trillion over the next 5-8 years.

Key changes from NIP-2012 include the separation of fixed and variable costs for greater transparency; introduction of a viable return on equity (RoE) band with a floor at 12 per cent and a ceiling at 16 per cent; and mitigation of foreign exchange risks through conversion of fixed costs into rupees after four years, based on prevailing exchange rates.

"These measures are estimated to result in savings of over ₹250 crore for each plant established under NIPU-2026 compared to NIP-2012," the government said.

Mounting pressure

India currently imports around 26 per cent of its annual urea requirement, which has placed a heavy burden on the exchequer because of the West Asia crisis. More than half of this comes from Oman through the besieged Strait of Hormuz.

But the NIP considerably pre-dates the current West Asia crisis — the Centre has been tweaking the NIP multiple times since 2012 to the requirements of fertiliser companies and fine-tune it per changing dynamics, be it gas pricing or fixed cost calculations.

Under the NIP 2012, which expired in October 2019, six new urea units were set up. Of these, four were established through joint ventures with companies of nominated public sector units (PSUs), and two by private companies.

They added a production capacity of 7.62 mt, thereby increasing total indigenous capacity from 20.75 mt in 2014-15 to 28.37 mt in 2023-24.

Thereafter, the government approved another exclusive policy for reviving the Talcher unit of Fer-

Can new urea policy end import dependency?

Rising demand, subsidy distortions and weak private participation are things to watch out for

Acceage of major cereals Urea consumption

Note: Acreage based on crop year basis and urea consumption on FY basis; mt: million tonnes and mha: million hectares; Estimated; Sources: Ministry of Agriculture, Fertiliser Association of India

tiliser Corporation of India Ltd through a joint venture company of nominated PSUs. The resultant Talcher Fertilisers Ltd was a new greenfield urea plant to produce 1.27 mt of urea by coal gasification route. More recently, a few years back, the Union Cabinet also approved another proposal to set up a new brownfield ammonia urea complex of 1.27 mt capacity within the existing premises of Brahmaputra Valley Fertiliser Corporation Ltd in Namrup, Assam.

As a result of all these, India currently has 33 operational urea manufacturing units with a total reinstalled or installed capacity of 26.94 mt.

Maize craze

But just as India's domestic urea production rose, so did demand.

In fact, rise in demand for urea has outstripped domestic urea production despite the new plants. As a result, despite looking to achieve self-sufficiency through NIP 2012, the country is still reaching for the same objective in 2026.

Some experts say that one reason for this state of affairs is a growing clamour among farmers to grow maize, which has become a prized crop due to its extensive use in ethanol. Maize, paddy and wheat are crops that consume the most urea. The maize craze, alongside an over-reliance on paddy and wheat means that consumption of this critical crop nutrient in India has not come down. India's per hectare consumption of urea, as per some estimates, has risen by around 20 per cent in the last 10 years to around 185-190 kgs.

age have grown over the years. Though there is no official data, sources cite evidence to suggest that agricultural urea is being diverted for industrial use because of a massive difference in price.

Some industry players said that while technical or industrial grade urea is usually available in the market for around ₹85-90 per kg, agriculture grade urea is available at a highly subsidised rate of just ₹5 per kg. "This makes it a prime candidate for diversion and pilferage," a senior industry official said. Cutting down on this by raising the long-delayed retail price of urea would be one way to check diversion and pilferage.

Until recently, the landed price of imported urea was close to ₹3,000-4,000 per 45 kg bag. This came down to around ₹2,400 few days back but the same is available to Indian farmers at a heavily subsidised ₹265-270 per bag.

A government assessment shows that the biggest consumers of urea are in 163 out of India's 730 districts. A significant number of these districts, as per some reports, are in Punjab, Haryana, western Uttar Pradesh and regions bordering states West Bengal and Assam — a concentration attributed to perceived smuggling.

As in NIP-1, most of the plants in NIP-2 are proposed to be set up by cooperatives, the public sector, or state governments, with only limited private sector involvement. The reason is that with profits capped and return on investment (RoI) pre-decided, private participation will continue to be elusive despite attractive subsidy proposals.

From crisis to opportunity

"India's urea sector crisis presents a rare window of opportunity to undertake long-overdue structural reforms that can strengthen both fiscal sustainability and supply resilience," a recent policy brief by the Indian Council for Research on International Economic Relations (ICRIER) said.

It said reforms should include gradual decontrol of urea through a farmer-centric Direct Benefit Transfer mechanism, rationalisation and expansion of the Nutrient-Based Subsidy framework, promotion of balanced and sulphur-based nutrient management, diversification of fertiliser import sources and feedstock, establishment of strategic fertiliser reserves, and accelerated investments in domestic production of green ammonia and other low-carbon fertiliser inputs.

More fundamentally, India's fertiliser policy must move beyond its traditional role as an agricultural support instrument, the brief said.

BANKER'S TRUST

TAMAL BANDYOPADHYAY

For central banks globally, the last fortnight was eventful.

On Friday, the Bank of Japan kept its policy rate unchanged at 1 per cent, reiterating its willingness to raise borrowing costs if inflation risks increase. The two-day policy meeting ended in an 8-1 vote in favour of keeping the status quo after the mid-June quarter per cent hike to 1 per cent — a level last seen in 1995.

A day before that, the Bank of England (BoE) too kept interest rates on hold, as expected. BoE's Monetary Policy Committee voted 6-3 to keep rates at 3.75 per cent. "Holding Bank Rate is appropriate as global conditions look to be more uncertain and inflationary, while domestic conditions are on balance more benign as regards the prospects for inflation," Governor Andrew Bailey said. BoE has been on hold since December 2023 after four rate cuts.

The US Federal Reserve kept interest rates unchanged early last week but three members of the Federal Open Market Committee (FOMC) said they would have preferred a quarter per cent rise, the first time since September 2016 when three policymakers dissented with a unified view of direction.

Fed Chair Kevin Warsh has "no tolerance" for inflation but, once again, at his second policy meeting, he refrained from providing any forward guidance, emphasising that future policy decisions would remain entirely dependent on incoming economic data. In the absence of forward guidance, markets are figuring out the timing and direction of policy rates in the coming months even as US bond yields are on the rise.

In the previous week, on 23 July, the European Central Bank (ECB), which had raised its benchmark interest rate by a quarter percentage point in mid-June, left it on hold at 2.25 per cent, citing heightened uncertainty. While the decision to keep rates steady was unanimous, ECB President Christine Lagarde said, "There were some governors who asked themselves whether we should not consider a hike".

What do we expect from the Reserve Bank of India (RBI) this week? Its six-member Monetary Policy Committee is set to meet on Friday, three days after the meeting on Monday.

First, let's take a look at how things have changed since its last policy announcement on June 5 which kept the rate unchanged at

its lowest in recent times. Last Friday, it closed at 6.85 per cent. Following the deferment of Indian government bonds' inclusion in Bloomberg's Global Aggregate Index, it is expected to rise.

The rupee closed at 94.94 a dollar on June 5. Over the next fortnight, by June 18, it rose to 94.33, bolstered by the RBI's multi-pronged strategy to attract foreign capital. Last Friday, it closed at 95.39 a dollar, gaining substantially since it touched 96.57 on 23 July. On Saturday, the RBI said there had been an inflow of \$40.82 billion since the start of the year to attract foreign currency opened.

The RBI's foreign currency assets which were \$543.4 billion in the first week of June, rose to \$555.9 billion by July 24. Overall foreign exchange reserves, however, remained unchanged during this period — at around \$682 billion.

Why is forex flow not reflecting in reserves? There could be four reasons behind this — the RBI is selling dollars in spot market; it is allowing forward book (buy/sell) to mature (not rolling over); and customers withdrawing from existing FCNR(B)/NRE accounts and putting it back through new FCNR(B) scheme. We see new flows in FCNR(B) but not outflow from the existing pile. Finally, the drop in the price of gold. Gold reserves were worth \$114.57 billion on 5 June; by 24 July, this had risen \$103 billion, offsetting the rise in foreign currency assets. In fact, it had dropped more, a week before.

Against this backdrop, I expect the rate-setting body of the India central bank to go for the status quo. The decision of no change in the policy rate could be unanimous.

Like the US FOMC, the MPC is likely to remain in a wait-and-watch mode as uncertainties continue to envelop the macroeconomic outlook. There are three key uncertainties, out of which, two are intertwined — Donald Trump and the price of oil. The price of Brent Crude was \$93.09 per barrel on June 5. On Sunday, it dropped to \$85. Since the last policy, it has yo-yoed between \$71.57 and \$100.69, floating on Trump's action and the lack of it.

Meanwhile, the southwest monsoon's erratic behaviour is likely to continue after an uneven run in June and July. The India Meteorological Department's (IMD)'s monsoon outlook for the second half of the season talks about below-normal rainfall — less than 94 per cent of the long-period average (LPA) — in August for most parts of India. The forecast for August-September together, too, is below normal, less than 94 per cent of the LPA.

forecasts expecting it to shift toward a positive phase later in the season. At the last policy meeting, the MPC unanimously decided to keep the policy repo rate unchanged. The stance also remained neutral.

The RBI cut down the real GDP growth estimate for FY27 from 6.9 per cent to 6.6 per cent with "downside" risks. Quarter-wise, the growth projections were revised to 6.6 per cent for the first quarter, 6.3 per cent for the second, 6.5 per cent for the third, and 6.8 per cent for the fourth quarter.

Its projection for the consumer price index (CPI) inflation target raised to 5.1 per cent for FY27 from 4.6 per cent earlier with upside risks. Here, the quarter-wise projections have been 4.2 per cent in the first quarter, 5.1 per cent in the second, 5.9 per cent in the third, and 5.4 per cent in the fourth quarter. Core inflation is projected at 4.7 per cent. The 5.1 per cent inflation projection is based on an assumption of crude price at \$95 a barrel.

The CPI inflation in June rose to 4.38 per cent, year-on-year, breaching the 4 per cent target for the first time in 17 months. It was also higher than what most analysts had expected. The RBI follows a flexible inflation target — 4 per cent with a 2-percentage point band on either side. In the first quarter, the average CPI inflation was 3.93 per cent, below the RBI projection of 4.2 per cent but is likely to remain above 5 per cent for the next two quarters.

With no immediate serious threat to inflation and growth (Index of Industrial Production or IIP grew by 7.3 per cent year-on-year in May 2026, driven by strong performances in manufacturing and electricity), the RBI will go for the status quo both for the rate as well as the stance of the monetary policy. There is also likely to be no change in the inflation and GDP projection for the year.

Of course, there are challenges — the price of oil (influenced by the Trump factor) and imported inflation (the trajectory of the monsoon and its impact on food inflation, and the pressure on the rupee (the difference between the yield on US government bond and Indian bond has narrowed since the last policy, impacting the foreign money flow). The RBI will wait and watch how things pan out before changing its stance as a precursor to the rate hike which could happen by the year-end.

SNEHA SASIKUMAR & JAYANT PANIKAR

Parliament recently passed the Public Examinations (Prevention of Unfair Means) Amendment Bill, 2026, aimed at tackling the recurring issue of paper leaks in India. The controversy underscores deeper challenges facing the country's youth. The Kothari Commission (1964) had recommended that the Centre and states spend six per cent of GDP on education, a target reaffirmed by the National Education Policy 2020 (NEP). The policy completed its six years on July 29 and yet this goal remains unmet, largely due to lower central spending. The gap between Bihar and Punjab, the top and bottom spender on education (measured as a proportion of their respective total expenditure) respectively, has also widened from 6.4 percentage points in FY19 to 14.04 percentage points in FY26.

One in ten GenZs is jobless in India, three times the overall unemployment rate. This places India just behind Nepal in youth joblessness. Globally, protests surged from 67 in 2019 to 196 in 2023 and declined thereafter. India's share of global protests has grown since 2019.

Countries where Gen Z protests are most visible such as India, Nepal, Bangladesh, and Peru, also score poorly on Transparency International's Corruption Perceptions Index, ranging from 23 to 41, reflecting persistent corruption challenges.

1 6% target remains a distant goal

Expenditure on education (as % of GDP)

Note: RE - Revised estimates. All states and UTs, Centre show the expenditure by Ministries of Education. FLOODS AND WATERLOGGING

Insurers expect claims worth ₹5K cr in Gujarat

AATHIRA VARIER
Mumbai, 2 August

With parts of the country witnessing floods, insurers expect nearly ₹5,000 crore worth of claims from rain-battered Gujarat alone. According to them, these claims would mainly be with respect to property losses.

However, they do not believe that premiums would increase in the already discounted property insurance market.

Gujarat saw one of its most severe waterlogging and flood episodes last month. Surat, Navsari, and Valsad were among the worst-affected districts, while Ahmedabad, Vadodra, Rajkot and several other urban centres witnessed submerged roads, resulting in disruptions to transport and public services.

According to an insurance broker, "The insurance industry is expecting over ₹4,000 crore claims from Gujarat floods mainly on the property lines. Motor insurance claims are expected to follow. It is one of the heavily insured states in terms of property insurance."

In comparison, insurance claims during 2024 floods in Gujarat stood at ₹1,500-2,000 crore.

According to reports, thousands of homes and large stretches of road infrastructure were inundated, forcing authorities to evacuate more

8 dead in Kerala floods

Children waded through a waterlogged street in Kochi. Chief Minister V D Sathesnan on Sunday said eight people have died, and as many persons are missing following heavy rainfall and landslides in several parts of the state. At least 13 people were injured in rain-related incidents PHOTO: PTI

than 40,000 residents from vulnerable areas.

Schools and colleges were temporarily closed in several districts, and rescue teams, including the Army and disaster response forces, were deployed to assist stranded residents.

"The claims have started coming in from Gujarat. The industry is likely to see nearly ₹4,000-5,000 crore worth of claims mainly on property lines. However, it is also heavily reinsured and hence, direct insurers will not see much pressure on their books. Therefore, despite these incidents, the rates in

property insurance lines are not going to see any revision because of the claims. Further, motor insurance claims are also expected to come in gradually," said a senior official at a private insurance firm.

The general insurance industry has seen heavy discounting in fire and property risk to strengthen their topline and recently, the Insurance Regulatory and Development Authority of India (Irdai) had also advised the insurers to maintain prudent underwriting and sustainable pricing amid this intense competition.

From blue to saffron: How India's hockey kit changed

ANISH KUMAR
New Delhi, 2 August

Amid the row over Hockey India (HI)'s decision to introduce a saffron jersey for its teams at the upcoming World Cup, a sneak peek into the men's kit history shows colours changed, but blue remained its primary base.

While HI says that the new design and colour of the jersey is meant to "tell a story" and carry "India's pride" and was finalised after consultations with players and support staff, former players like former captain Viren Rasquinha have questioned the move calling it "embarrassing".

Former captain Pargat Singh alleged that everything in the country was being saffronised. Veteran Dhanraj Pillay contended that the blue jersey has been the sport's identity for decades. For much of the twentieth century, the team played primarily in blue, often combined with white.

India made their Olympic hockey debut at Amsterdam in 1928. In his 1959 book, Portrait

FORMER PLAYERS AND VETERANS HAVE QUESTIONED HOCKEY INDIA'S DECISION TO INTRODUCE SAFFRON JERSEY FOR TEAMS

of Indian Sport, administrator Anthony de Mello wrote that dark blue, light blue and old gold were selected as sporting colours after discussions involving the Patiala royal family.

"Historically, blue has been the base colour of the Indian hockey team. The minor variations were navy blue and royal blue," senior sports journalist Norris Pritam said.

The first major modern departure came at the 2000 Sydney Olympics. India wore a light-blue jersey with dark-blue trim, light-blue shorts and light-blue stockings against Australia. The team also used a yellow alternate jersey with blue-and-red detailing, royal-blue shorts and yellow stockings, including in the classification match against Argentina.

Pritam said such changes

did not attract significant controversy at the time. He added that the Indian Olympic Association traditionally handled kitting for Olympic and Asian Games contingents, while professional designers and apparel companies later introduced more changes in patterns and colours.

At the 2010 World Cup in New Delhi, India wore a pale-blue jersey, white shorts and dark navy stockings. The alternate strip comprised a white jersey and shorts with orange stockings. Blue and white variants were used again at the 2012 London Olympics.

Another complete departure from blue came at the 2014 World Cup in The Hague, where India wore bright yellow shirts, shorts, and stockings. A white alternate kit with orange panels and stockings was also used.

Blue returned at the 2016 Rio Olympics and remained dominant at the 2018 and 2023 World Cups. White alternate kits appeared at Rio, Tokyo 2020 and Paris 2024, with different stocking colours.

NOTICE TO SHAREHOLDERS

Transfer of Unclaimed Dividend and Equity Shares of the Company to Investor Education and Protection Fund (IEPF) Account

Pursuant to Section 124 of the Companies Act, 2013, read with the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 (as amended from time to time), shareholders are hereby informed that the Final Dividend declared for the Financial year 2015-16, which has remained unclaimed for seven years from the date of its transfer to the unclaimed dividend account, along with the corresponding shares on which such dividends have remained unclaimed for seven consecutive years, are required to be transferred to the IEPF.

In compliance with the Rules, individual notices are being sent to all concerned shareholders whose shares are liable to be transferred to the IEPF as per the aforesaid Rules. Full details of such shareholders are available on the Company's website: www.mallcom.in.

Shareholders are requested to submit the requisite documents, as outlined in the aforementioned communication, to the Company's Registrar and Share Transfer Agent (RTA) by November 3, 2026, to claim unclaimed dividends and shares. If no valid claim is received by the date, the Company will transfer the unclaimed dividends for the financial year 2015-16 and the corresponding shares (with unclaimed dividends for seven consecutive years) to the IEPF without further notice.

Please note that no claim shall be against the Company in respect of unclaimed dividend amount and shares transferred to IEPF pursuant to the said Rules. Following such transfers, Shareholders/Clients can claim the transferred shares along with dividends from the IEPF Authority, for which details are available at www.iefp.gov.in.

For any queries regarding this matter, shareholders are requested to contact the Company's RTA, Niche Technologies Private Limited, at 24-Aurkhand Plaza, 7th Floor, Room No. 7A & 7B, Kolkata 700017. Tel: (033) 2280 8616/1718; Fax: (033) 2280 6619; Email: nichetech@nichetechpvtl.com. Website: https://www.nichetechpvtl.com.

The CBI has decided to approach all high courts to transfer these pending cases to the fast-track courts, which are being set up in various states to handle cases under the new anti-paper leak law, they said.

Sources said the CBI has decided to convey to the high courts that it will provide dedicated special prosecutors to conduct these trials and make all possible resources available so that they are concluded at the earliest possible. In the national capital Delhi, there are around 25 cases since 2000 that are awaiting trial despite the completion of CBI investigation.

RISK TO INVESTORS

For details, kindly refer to the section titled "Risk Factors" beginning on page 33 of the RHP.

- 1. Business Concentration Risk:** We have generated 85.44%, 80.22% and 90.91% of our revenue from operations for the financial year ended on March 31, 2026, March 31, 2025 and March 31, 2024, respectively, from Water & Wastewater Infrastructure work. We are a multidisciplinary public infrastructure development company engaged in the execution of turnkey Engineering, Procurement and Construction ("EPC") contracts. We operate across various infrastructure segments, including Water & Wastewater Infrastructure such as Water Supply Scheme Projects ("WSSPs"), Sewerage Networks, Sewerage Treatment Plants ("STPs"), Wastewater Treatment Plants ("WWTPs"), Transmission mains, Reservoirs, Trenchless & Micro tunnelling Works, Roads and Highways work, Electrical Transmission work, Urban Infrastructure which includes sector-level planning and execution of residential building projects and Operation and Maintenance ("O&M") of public utilities.

The business segment wise bifurcation of revenue for the financial year ended March 31, 2026, March 31, 2025 and March 31, 2024 are as below:

(₹ in million)

Particulars	For the Financial Year ended					
	March 31, 2026		March 31, 2025		March 31, 2024	
	Amount	% of revenue from operations	Amount	% of revenue from operations	Amount	% of revenue from operations
Sale of Services						
Water & Wastewater Infrastructure work	2,947.64	85.44	2,242.61	80.22	2,055.48	90.91
Roads and Highways work	444.04	12.87	20.38	0.73	-	0.00
Urban Infrastructure work	-	-	248.38	8.88	-	0.00
Electrical Transmission work	-	-	210.30	7.52	-	0.00
Operation & Maintenance work	57.71	1.67	24.50	0.88	13.79	0.61
Other Operating Revenues						
Sale of Material	0.57	0.02	49.47	1.77	191.75	8.48
Total	3,449.96	100.00	2,795.64	100.00	2,261.02	100.00

As certified by Rishi Kapoor & Company, Chartered Accountants pursuant to their certificate dated July 10, 2026 vide UDIN: 26455362TEEDWY3049.

Continued on next page...

Continued from previous page.

- 2. Revenue Concentration Risk:** A substantial portion of our revenues is derived from contracts awarded by Central and State Governments, local authorities under Government-led schemes such as the Atal Mission for Rejuvenation and Urban Transformation ("AMRUT"), Jal Jeevan Mission ("JJM"), Namami Gange and Pradhan Mantri Gram Sadak Yojana ("PMGSY"). Our order book is therefore highly dependent on Government budgetary allocations and policy priorities. Any reduction or reallocation in public spending, delay in issuance of tenders, change in pre-qualification norms, or cancellation of awarded projects could materially reduce our pipeline of opportunities.

The table below sets forth our revenue from Government & Government authorities and from Private clients for the financial years ended March 31, 2026, March 31, 2025 and March 31, 2024 indicated:

(₹ in million)

Particulars	For the financial year ended		
	March 31, 2026	March 31, 2025	March 31, 2024
Revenue from Government	3,449.39	2,274.52	1,741.50
% of Revenue from Operations	99.98	81.36	77.02
Revenue from Private Sector	0.57	521.12	519.52
% of Revenue from Operations	0.02	18.64	22.98
Total	3,449.96	2,795.64	2,261.02

As certified by Rishi Kapoor & Company, Chartered Accountants pursuant to their certificate dated July 10, 2026 vide UDIN: 26455362MFNQNB9135.

Our Company may face execution risks, including delays in approvals, resource mobilisation, site challenges, adverse weather, land acquisition issues, labour shortages, and supply chain disruptions in future. Our Company may not be able to successfully bid for and/or procure government orders in the future. Any inability to secure such orders, or a reduction in the number or value of government contracts awarded to our Company, could adversely affect our revenue, financial condition and results of operations.

- 3. Geographical Concentration Risk:** Our Company's project portfolio is geographically concentrated, with a significant presence in Uttar Pradesh and Rajasthan. Our Company's geographic concentration in Uttar Pradesh and Rajasthan exposes it to risks such as regional slowdowns in infrastructure spending, changes in state policies or political conditions, limited geographic diversification, challenges in competing for large national projects due to a regional market perception, and constraints on efficiently expanding and clustering projects across other states.

Following are the state wise bifurcation of revenue for the financial year ended March 31, 2026, March 31, 2025 and March 31, 2024:

(₹ in million)

Sr. No.	Name of the States	For the Financial Year ended March 31,					
		2026		2025		2024	
		Revenue from Operations	% of Revenue from Operations	Revenue from Operations	% of Revenue from Operations	Revenue from Operations	% of Revenue from Operations
1.	Uttar Pradesh	881.00	25.53	756.39	27.06	1,382.72	61.15
2.	Rajasthan	2,175.25	63.05	1,665.42	59.58	730.64	32.31
3.	Delhi	355.21	10.30	163.53	5.85	147.66	6.54
4.	Uttarakhand	-	-	210.30	7.52	-	-
5.	Madhya Pradesh	38.50	1.12	-	-	-	-
	Total	3,449.96	100.00	2,795.64	100.00	2,261.02	100.00

As certified by Rishi Kapoor & Company, Chartered Accountants pursuant to their certificate dated July 10, 2026 vide UDIN: 26455362LGVDP3135.

(₹ in million)

- 4. Ability to qualify and bid for Government tenders:** Our Company relies on competitive government tenders to secure infrastructure projects across sectors such as water, wastewater, power, roads, microtunneling and urban infrastructure. Its ability to win contracts depends on meeting technical and financial eligibility criteria, which may change over time. Delays, cancellations, or unsuccessful bids can result in wasted bid preparation costs and reduced business opportunities. Our success ratio, in case of solo bids submitted by our Company, is 36.11% for the period ended on July 15, 2026 and last three financial years. Even after winning a contract, delays in project awards or commencement can lead to underutilized labour and equipment, increasing costs and reducing profitability.

Particulars	For the financial year ended		
	March 31, 2026	March 31, 2025	March 31, 2024
Trade Receivables	1,179.76	581.84	1,001.83
Revenue from operations	3,449.96	2,795.64	2,261.02
Trade Receivables as % of revenue from operations	34.20	0.81	44.31

The increase in our trade receivables as at March 31, 2026 was primarily attributable to the timing of billing during Fiscal 2026, with approximately 40% of our revenue from operations of ₹ 3,449.96 million being billed during the fourth quarter while approximately 56% was billed during the third and fourth

The table below sets forth details of the cumulative bids submitted by us and the corresponding conversion metrics for the period ended July 15, 2026 and for the financial years ended March 31, 2026, March 31, 2025 and March 31, 2024 indicated:

Particulars	Solo bid by the Company	Bid as a Lead Partner	Bid as a Joint Venture Partner
Bids submitted	56	9	6
Less: Cancelled/ Awaited/ Pending Result	20	1	3
Net bids submitted	36	8	3
Awarded	13	6	0
Successful Conversion of Bids (in %)	36.11	75.00	0.00

5. Financial Risks:

A substantial portion of our revenues is derived from contracts awarded by Central and State Governments. The execution of large infrastructure projects involves high working capital requirements, and any shortfall or delay in the availability of working capital may adversely affect our project execution, business and financial condition, cash flows and results of operations. Further, our business requires significant working capital investment, which constitutes trade receivables and inventories together form a substantial part of our non-cash current assets, constituting 79.50%, 72.93% and 74.59% of total non-cash current assets as of March 31, 2026, March 31, 2025 and March 31, 2024, respectively.

Risk related to Working Capital Requirement Risk

Our operations across infrastructure segments, including water and wastewater projects, roads, electrical networks, and civil construction are inherently working capital intensive due to significant upfront expenses in procurement, mobilization, and project execution. As per our restated consolidated financial information, our working capital requirements for the financial year ended March 31, 2026, March 31, 2025 and March 31, 2024 amounted to ₹ 1,338.16 million, ₹ 1,400.09 million and ₹ 1,280.66 million, respectively. Further, our working capital requirements for Financial Year 2027 are estimated at ₹ 2,909.29 million out of which an amount of ₹ 1,500.00 million will be funded out of the Net Proceeds from issue of fresh equity shares in financial year 2027, whereas the balance, if any, would be arranged from our internal accruals and/or borrowings. For details of our working capital requirements and estimation, kindly refer "Objects of the Offer" beginning on page 136 of the RHP.

Risk related to Trade Receivables & Trade Payables

As majority of our revenue is generated through the government tenders so our Company's trade receivables constitute only receivables from Governments:

quarters combined. Consequently, a substantial portion of the invoices remained outstanding as at the fiscal year-end, resulting in trade receivables of ₹ 1,179.76 million, of which ₹ 1,131.08 million were outstanding for less than six months.

Risk related to Contingent Liabilities:

Our contingent liabilities and commitments (as per Ind AS 37), derived from the Restated Consolidated Financial Information is ₹ 99.79 million and the following bank guarantees have been provided against the works: (₹ in million)

Particulars	GUARANTEES		
	As at		
	March 31, 2026	March 31, 2025	March 31, 2024
A) Bank Guarantees	1,680.33	1,113.16	792.27
Total	1,680.33	1,113.16	792.27

For further details, kindly refer "Restated Consolidated Financial Information - Annexure 46 - Contingent Liabilities and Commitments" beginning on page 438 of the RHP.

If a significant portion of these liabilities materialize, it could have an effect on our results of operations and financial condition. Further, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

6. Risk of seasonality of operations of the Company

Our business operations may be affected by seasonal factors which may restrict our ability to carry on activities related to our construction projects, laying of water pipes and fully utilize our resources.

The following factors may restrict our ability:

- > Heavy or sustained rainfalls
- > Flood
- > Cyclones or
- > Other extreme weather conditions

The above could result in delays or disruptions to our operations during the critical periods of our projects and cause severe damages to our premises and equipment's. In particular, the monsoon season may adversely affect our ability to carry on activities related to our projects and efficiently utilize our resources, resulting in a slowdown in construction projects. This may lead to delays in project execution and consequently defer the recognition of revenue and profits to subsequent quarters. Adverse seasonal developments may also necessitate the evacuation of personnel, suspension or curtailment of operations, damage to construction sites or delays in the delivery of materials. Such fluctuations may adversely affect our revenues, cash flows, results of operations and financial conditions.

7. Orders in our order book may be delayed, truncated, modified, or cancelled, and may not translate into confirmed orders

As on July 15, 2026, our Order Book includes 14 EPC projects across water & wastewater treatment infrastructure work and roads and highways work with an aggregate unexecuted contract value of ₹ 13,054.45 million and 5 Operations and Maintenance (O&M) projects aggregating ₹ 152.87 million.

Continued on next page.

Continued from previous page.

Our Order Book represents the unexecuted value of ongoing and newly awarded contracts. It is compiled based on internal estimates and is unaudited. The methodology used by our Company may differ from industry practices and should not be construed as a guaranteed measure of future revenue or profitability. The realization of income from our Order Book is subject to various factors including but not limited to project approvals, site conditions, contractual timelines and changes in project scope or specifications by the client.

(₹ in million)

Sr. No.	Particulars	FY 2025-26	FY 2024-25	FY 2023-24
1.	Opening balance of Order Book	7,688.20	7,528.80	3,243.20
2.	Add: New orders awarded during the year	8,156.60	2,752.00	5,729.10
3.	Less: Sales booked*	3,449.96	2,798.40	2,262.10
4.	Add/less: Variation/Reduction	35.87	205.80	818.60
5.	Closing Order Book	12,358.97	7,688.20	7,528.80

*Revenue from operations as per audited standalone statement of profit & loss.

11. Weighted average cost of acquisition (WACA) of Equity Shares by our Promoters (including the Promoter Selling Shareholder):

Particulars	Number of Equity Shares of face value of ₹ 10 each	WACA of Equity Shares of face value of ₹ 10 per Equity Share acquired in last 18 months (in ₹)	WACA of Equity Shares of face value of ₹ 10 per Equity Share acquired in last 1 year (in ₹)	WACA of Equity Shares of face value of ₹ 10 per Equity Share acquired in last 3 years (in ₹)
Sanjay Tyagi	1,212,000	0.10	Nil	0.10
Rekha Tyagi	395,200	Nil	Nil	Nil
Kartikey Tyagi	600,000	Nil	Nil	Nil
Sanjay Tyagi HUF	2,114,200	Nil	Nil	Nil
Kartikey Constructions ^A	24,990,000	Nil	Nil	Nil

As certified by the Rishi Kapoor & Company, Chartered Accountant pursuant to their certificate dated July 10, 2026.

^AAlso the Promoter Selling Shareholder.

Note: Weighted average cost of acquisition of all equity shares during last one year, 18 months and three years has been calculated after considering the shares allotted by way of bonus issue and gift.

12. Weighted average cost of acquisition of all Equity Shares transacted by our Promoters (including Promoter Selling Shareholder) and members of the Promoter Group in last 1 year, 18 months and 3 years immediately preceding

8. **Outstanding Legal Proceeding:** There are proceedings pending at different levels of adjudication before various courts, enquiry officers and appellate forums involving our Company, Directors, Promoters and Senior Managerial Personnel (SMPs). Such proceedings could divert management's time, attention and consume financial resources in their defense. Further, an adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition, and result of operations

9. **Regulatory Risk:** The company is unable to trace certain historical corporate records and RoC filings, and some statutory filings contain incomplete or inaccurate disclosures that have not been revised. Under the circumstances elaborated above, our Company cannot assure you that the filings were made in a timely manner, or the information gathered through other available documents of our Company are correct. Also, our Company may not be in a position to attend to and / or respond appropriately to any legal matters pertaining to such period and relating to such documents which have been lost and to that extent the same may adversely affect our business operations.

10. The average cost of acquisition of Equity Shares for the Promoter Selling Shareholder is ₹2.50 and offer price at upper end of the price band is ₹212.

13. Weighted Average Return on Net Worth for last three financial years is 24.55%.

14. Weighted average cost of acquisition for all the shares transacted in the last

from the date of RHP is as follows:

Period	Weighted Average Cost of Acquisition of Equity Shares (in ₹)	Cap price is 1.74 times the Weighted Average Cost of Acquisition	Range of acquisition price: Lowest Price-Highest Price (in ₹)
Last 1 year	Nil	Nil	Nil
Last 18 months	121.76	1.74	121.76-121.76
Last 3 years	121.76	1.74	121.76-121.76

As certified by the Rishi Kapoor & Company, Chartered Accountant pursuant to their certificate dated July 10, 2026.
Note: Weighted average cost of acquisition of all equity shares during last one year, 18 months and three years has been calculated without considering the shares allotted by way of bonus issue and gift.

Investors are advised to read the risk factors carefully before taking an investment decision in the Offer. For detail kindly refer "Risk Factors" beginning on page 33 of the RHP.

ADDITIONAL INFORMATION FOR INVESTORS

- The Company has not undertaken a pre-IPO placement.
- The Promoter Selling Shareholder or members of the Promoter Group have not undertaken any transaction of Equity Shares aggregating up to 1% or more of the Paid-up Equity Share Capital of the Company from the date of Draft Red Herring Prospectus till date.
- The aggregate Pre-offer and Post-offer shareholding of the Promoters, members of the Promoter Group and the additional top 10 Shareholders of the Company is set out below:

Sr. No.	Name of the Shareholders	Pre-Offer shareholding as on the date of the Red Herring Prospectus		Post-Offer shareholding as on the date of Allotment ⁽ⁱ⁾			
		Number of Equity Shares of face value of ₹ 10 each held	Shareholding (in %)	At the lower end of the price band (₹ 200)		At the upper end of the price band (₹ 212)

* Also Promoter Selling Shareholder

- Notes:
- Assuming full subscription in the Offer (fresh issue and offer for sale). The post-Offer shareholding details, as at allotment, will be based on the actual subscription and the final Offer Price and updated in the Prospectus, subject to finalisation of the basis of allotment. Also, this table assumes there is no transfer of shares by these shareholders between the date of the advertisement and allotment (if any such transfers occur prior to the date of Prospectus, it will be updated in the shareholding pattern in the Prospectus).
 - Based on the Offer price of ₹ 200 and subject to finalisation of the basis of allotment.

BASIS FOR OFFER PRICE

The "Basis for Offer Price" beginning on page 150 of the RHP has been updated with the above. Please refer to the websites of the BRLM: www.khambattasecurities.com for the "Basis for Offer Price" updated with the above price band. You may scan the QR code for accessing the website of Khambatta Securities Limited.

The Price Band has been determined by our Company in consultation with the BRLM, and the Offer Price shall also be determined by our Company in consultation with the BRLM, on the basis of assessment of market demand for the Equity Shares offered through the Book Building Process and quantitative and qualitative factors as described below. The face value of the Equity Shares is ₹10 each and the Floor Price is 20 times the face value and the cap price is ₹ 212 times the face value.

Bidders should read the below mentioned information along with "Risk Factors", "Our Business", "Restated Consolidated Financial Information" and "Management's Discussion and Analysis of Financial Conditions and Results of Operations" beginning on pages 33, 249, 364 and 486, respectively, of the RHP, to have an informed view before making an investment decision.

Qualitative Factors

Some of the qualitative factors and our strengths which form the basis for computing the Offer Price are on page 289 of the RHP.

Quantitative Factors

Certain information presented below relating to our Company is derived from the Restated Consolidated Financial Information. For details, please refer to the chapter titled "Restated Consolidated Financial Information" beginning on page 364 of the RHP.

Some of the quantitative factors which may form the basis for calculating the Offer Price are as follows:

1. Basic and diluted earnings per Equity Share ("EPS"):

For the Financial Year ended	Basic (in ₹)	Diluted (in ₹)	Weight
March 31, 2026	14.39	14.39	3
March 31, 2025	9.37	9.37	2
March 31, 2024	6.33	6.33	1
Weighted Average		11.37	

14. Weighted average cost of acquisition for all the shares introduced in the last one year, 18 months and 3 years preceding the date of the Red Herring Prospectus is given in point 11 above.

15. The Price/Earnings ratio based on diluted EPS for Fiscal 2026 for our Company at the upper end of the Price band is 14.73 times as compared to the average industry peer group PE ratio of 24.73 times.

16. The BRLM associated with the Offer i.e., Khambatta Securities Limited has handled 11 public issues (2 main board IPOs & 9 SME IPOs) in the past three years preceding the date of RHP, out of which 3 SME IPOs closed below issue price on listing date.

Investors are advised to read the risk factors carefully before taking an investment decision in the Offer. For detail kindly refer "Risk Factors" beginning on page 33 of the RHP.

Notes:

- Weighted average = Aggregate of financial year-wise weighted EPS divided by the aggregate of weights i.e. (EPS x Weight) for each financial year/Total of weights. The face value of equity shares of the Company is ₹10 each.
- Basic Earnings per Equity Share (EPS) = In accordance with the Ind AS 33, Basic earnings per share is calculated by dividing the restated profit or loss for the financial year by the weighted average number of Equity Shares outstanding during the financial year after considering the adjustment of bonus shares issued subsequent to financial year end.
- Diluted Earnings per Equity Share (EPS) = In accordance with the Ind AS 33, Diluted earnings per share is calculated by dividing the restated profit or loss for the financial year by the weighted average number of Equity Shares outstanding during the financial year after considering the adjustment of bonus shares issued subsequent to financial year end and as adjusted for the effects of all dilutive potential Equity Shares during the financial year. The above statement should be read with significant accounting policies and notes on Restated Consolidated Financial Information.

2. Price/Earning ("P/E") ratio in relation to the Price Band of ₹ 200 to ₹ 212 per Equity Share:

Particulars	P/E at the Floor Price (no. of times)	P/E at the Cap Price (no. of times)
Based on Basic EPS for the Financial Year ended March 31, 2026	13.90	14.73
Based on Diluted EPS for the Financial Year ended March 31, 2026	13.90	14.73

3. Industry Peer Group P/E ratio

Based on the peer group information (excluding our Company), details of the highest, lowest and industry average P/E ratio are set forth below:

Particulars	P/E Ratio
Highest	31.96
Lowest	14.81
Average	22.96

Notes:

- The highest and lowest industry P/E shown above is based on the peers set out in item no. 6 of this section.
- The industry average has been calculated as the arithmetic average P/E of the industry peers disclosed under item no. 6 of this section.
- P/E Ratio has been computed based on the closing market price of equity shares as at July 21, 2026 / Diluted EPS as on March 31, 2026.

4. Return on Net Worth ("RoNW")

For the Financial Year ended	RoNW (%)	Weight
March 31, 2026	26.51	3
March 31, 2025	23.51	2
March 31, 2024	20.76	1
Weighted Average**		24.55

Notes:

- * Return on net worth is calculated as restated profit/loss for the financial year divided by net worth. Net Worth is aggregate value of the paid up share capital and all reserves created out of the profits and securities premium account and debt or credit balance of profit and loss account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, but does not include reserves created out of revaluation of assets/fair value gain, write back of depreciation and amalgamation, in accordance with Regulation 2(1)(h) of the SEBI ICDR Regulations.
- ** Weighted Average: Aggregate of financial year-wise weighted RoNW, divided by the aggregate of weights, i.e. (RoNW*Weights) for each financial year/Total of weights.

5. Net Asset Value per Equity Share ("NAV")

As at	Consolidated (in ₹)
March 31, 2026	54.28
March 31, 2025	39.86
March 31, 2024	30.49
After the completion of the Offer	
- At the Floor Price	89.25
- At the Cap Price	92.13
Offer Price*	92.13

* Offer Price per Equity Share will be determined on conclusion of the Book Building Process.

Notes:

- NAV means Net asset value (NAV) per share is computed as the closing net worth divided by number of equity shares outstanding at the end of the financial year, as adjusted for bonus issue of Equity Shares.
- Net Worth is aggregate value of the paid up share capital and all reserves created out of the profits and securities premium account and debt or credit balance of profit and loss account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, but does not include reserves created out of revaluation of assets/fair value gain, write back of depreciation and amalgamation, in accordance with Regulation 2(1)(h) of the SEBI ICDR Regulations.

6. Comparison of Accounting Ratios with listed industry peers

Set forth below is a comparison of our accounting ratios with our listed peer companies listed in India, for Fiscal 2026:

Name of the Company	Face Value (₹ per share)	Revenue from Operations for Fiscal 2026 (₹ in million)	EPS for Fiscal 2026 (₹ per share)		NAV (₹ per share)	P/E Ratio	RoNW (%) Fiscal 2026
			Basic	Diluted			
Technocrat Ventures Limited*	10	3,449.96	14.39	14.39	54.28	14.73	26.51
Peer Group							
EMS Limited	10	7,327.47	16.30	16.30	190.57	24.30	8.62
VA Tech Wabag Limited	2	39,442.00	59.51	58.72	415.11	31.96	14.37
Enviro Infra Engineers Limited	10	11,455.96	10.42	10.41	7.05	20.76	15.22
Denta Water and Infra Solutions Limited	10	2,503.79	22.81	22.81	171.91	14.81	13.27

Continued on next page...

*continued from previous page.

*The financial information for our Company is based on the Restated Consolidated Financial Information.

**To be included in respect of our Company in the Prospectus, based on the Offer Price.

Source: All the financial information for listed industry peers mentioned above is on a Consolidated basis and is sourced from the annual results submitted to stock exchanges and posted on their websites.

- Basic EPS and Diluted EPS refer to the Basic EPS and Diluted EPS sourced from the financial statements of the respective company.
- P/E Ratio has been computed based on closing price as at July 29, 2026 / Diluted EPS as on March 31, 2026.
- Net asset value (NAV) per share is computed as the closing net worth divided by number of equity shares outstanding at the end of financial year, as adjusted for bonus issue of Equity Shares.
- Return on Net Worth calculated as restated profit for the financial year divided by Net Worth.
- "Net worth" means the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account and debt or credit balance of profit and loss account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per the restated consolidated financial information, but does not include reserves created out of revaluation of assets, write-back of depreciation and amalgamation, capital reserve on consolidation and foreign currency translation reserve.

7. Comparison of Key Performance Indicators with listed industry peers

Set forth below is a comparison of our KPIs with our peer companies listed in India:

For the Financial Year ended March 31, 2026

(₹ in million, unless otherwise indicated)

Key Financial Indicators	Technocrat Ventures Limited	EMS Limited	VA Tech Wabag Limited	Enviro Infra Engineers Limited	Denta Water and Infra Solutions Limited

As certified by Rishi Kapoor & Company, Chartered Accountants pursuant to their certificate dated July 10, 2026 vide UDIN: 26455362QBRCF4855.

10. Justification for Basis for the Offer Price

Explanation for Cap Price along with our Company's key performance indicators and financial ratios Fiscals 2026, 2025 and 2024 and in view of the external factors which may have influenced the pricing of the Offer.

Return on Capital Employed (%)	27.72	11.75	20.04	17.21	17.61
--------------------------------	-------	-------	-------	-------	-------

As certified by Rishi Kapoor & Company, Chartered Accountants pursuant to their certificate dated July 10, 2026 vide UDIN: 26455326NPQOM8185.

- Notes:**
- (1) Revenue from operation means revenue from sales and other operating revenues.
 - (2) Total Income represents the total turnover of business i.e. Revenue from Operations and Other Income, if any.
 - (3) EBITDA is calculated as restated profit/loss before tax plus finance costs, depreciation and amortization expenses.
 - (4) EBITDA Margin is calculated as EBITDA divided by Revenue from Operations.
 - (5) PAT Margin is calculated as restated profit/loss for the financial year divided by Revenue from Operations.
 - (6) Net Worth is aggregate value of the paid up share capital and all reserves created out of the profits and securities premium account and debt or credit balance of profit and loss account, after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, but does not include reserves created out of revaluation of assets/fair value gain, write back of depreciation and amalgamation, in accordance with Regulation 2(1)(h) of the SEBI ICDR Regulations.
 - (7) Net debt = non-current borrowing (including lease liability) + current borrowing (including lease liability) - Cash and Cash Equivalent.
 - (8) Debt-equity ratio means ratio of total debt (long-term plus short-term debt) and Equity Share capital plus other equity (including minority interest).
 - (9) ROE is calculated as Profit for the financial year, divided by total shareholder's equity (including minority interest).
 - (10) ROCE is calculated as EBIT (i.e. restated profit/loss) before tax plus finance costs divided by capital employed (i.e. sum of (i) Total shareholder's Equity (including minority interest); (ii) Long-Term Borrowings (including Lease Liabilities, if any); (iii) Short-Term Borrowings (including Lease Liability, if any).

8. Details of our Operational KPIs

(₹ in million, unless otherwise indicated)

KPI	For the Financial Year ended*		
	March 31, 2026	March 31, 2025	March 31, 2024
No. of Sewage Treatment Plant (STP) Projects Completed**	Nil	1	Nil
No. of Govt. Projects Completed	6	2	2
Order Book (in numbers)	18	19	11
Order Book (in value)	12,358.97	7,688.20	7,528.80
Tender Participation and Success Ratio†	36.36%	41.67%	54.55%
EPC Volume under Government Schemes	12,358.97	7,688.20	7,528.80

*The Operational KPIs have been certified by YPS Associates, Chartered Engineer vide certificate dated July 21, 2026, bearing certificate no. YP04/OPERATIONAL KPIs/TECHNOCAFT.

**Since our inception, we completed and commissioned Wastewater Treatment projects, including high capacity STPs of capacity 56 MLD and 40 MLD based on SBR technology and a 3 MLD STP based on UASB technology.

†STP Projects take 2-3 years for completion. 3 projects are ongoing.

Successful Conversion of Bids (in %) = (Bids awarded / Net Bids Submitted) * 100.

9. Weighted average cost of acquisition ("WACA").

Weighted average cost of acquisition based on Primary Issuances and Secondary Transactions

- a) Price per share of the Company (as adjusted for bonus issuance) based on primary issuances of Equity Shares or convertible securities (excluding Equity Shares issued under ESOP Plan and issuance of Equity Shares pursuant to a bonus issue) during the 18 months preceding the date of the Red Herring Prospectus, where such issuances are equal to or more than 5% of the fully diluted paid-up share capital of the Company in a single transaction or multiple transactions combined together over a span of rolling 30 days ("Primary Issuances").

There have been no primary/new offer of shares (Equity Shares/convertible securities), excluding grants of any options and issuance of bonus shares, equal to or more than 5% of the fully diluted paid-up share capital of our Company (calculated on the pre-issue capital before such transactions and excluding employee stock options granted but not vested), in a single transaction or multiple transactions combined together over a span of rolling 30 days) during 18 months preceding the date of the Red Herring Prospectus.

- b) Price per share of the Company (as adjusted for bonus issuance) based on secondary sales or acquisitions of Equity Shares or convertible securities (excluding gifts) where Promoters or members of the Promoter group or other shareholders with rights to nominate directors are a party to the transaction during the 18 months preceding the date of the Red Herring Prospectus, where the acquisitions or sale is equal to or more than 5% of the fully diluted paid-up share capital of the Company (calculated on the pre-issue capital before such transactions and excluding employee stock options granted but not vested), in a single transaction or multiple transactions combined together over a span of rolling 30 days ("Secondary Transactions").

There have been no Secondary Transactions, where Promoters or members of the Promoter group or other shareholders with rights to nominate directors are a party to the transaction (excluding gifts), during the 18 months preceding the date of the Red Herring Prospectus, where either acquisition or sale is equal to or more than 5% of the fully diluted paid-up share capital of the Company (calculated on the pre-issue capital before such transactions and excluding employee stock options granted but not vested), in a single transaction or multiple transactions combined together over a span of rolling 30 days.

- c) Since there are no such transactions to report under (a) and (b) above, the details basis the last five primary and secondary transactions (secondary transactions where Promoters or members of the Promoter group or other shareholders with rights to nominate directors are a party to the transaction) during the three years preceding the date of the Red Herring Prospectus, irrespective of the size of transactions, is as below:

Primary Transactions:

Sr. No.	Date of Allotment	Nature of Specified Securities	No. of Specified Securities Allotted	Face Value per Share (in ₹)	Adjusted no. of shares Allotted at Face Value of ₹ 10 each	Issue per share (in ₹)	Nature of Allotment	Nature of Consideration	Total Consideration (₹ in million)
1	May 29, 2025	Equity	22,575,900	10	Nil	Nil	Bonus Issue in the ratio of 3:1	Other than cash	Nil

As certified by Rishi Kapoor & Company, Chartered Accountants pursuant to their certificate dated July 10, 2026 vide UDIN: 26455326NPQOM8185.

*The Primary Transactions includes Bonus Issue.

ASBA*

Simple, Safe, Smart way of Application – Make use of it!!!

*Applications Supported by Blocked Amount (ASBA) is a better way of applying to Offers by simply blocking the fund in the bank account, investors can avail the same. For details, check section on ASBA below. **Mandatory in Public Issues. No cheque will be accepted.**

UPI – Now available in ASBA for Retail Individual Investors and Non-Institutional Investors applying in public issues where the application amount is up to ₹ 0.50 million, applying through Registered Broker, Syndicate, GDRs & RTAs. UPI Bidders also have the option to submit the application directly to the ASBA Bank (SCSBs) or to use the facility of linked online trading, demat and bank account. Bidders are required to ensure that the bank account used for bidding is linked to their PAN. Bidders must ensure that their PAN is linked with Aadhar and in compliance with CBOT notification dated February 13, 2020 issued by Central Board of Direct Taxes and the subsequent press releases, including press release dated June 25, 2021 read with press release dated September 17, 2021, and CBOT circular no. 7 of 2022 dated March 30, 2022, read with press release dated March 28, 2023 and any subsequent press release in this regard.

ASBA has to be availed by all the investors except Anchor Investors. UPI may be availed by (i) Retail Individual Investors; and (ii) Non-Institutional Investors applying in public issue where the application amount is up to ₹ 0.50 million in the Non-Institutional Portion. For details on the ASBA and UPI process, please refer to the details given in the Bid Cum Application Forms and Abridged Prospectus and also please refer to the section "Offer Procedure" beginning on page 576 of the RHP. The process is also available on the website of Association of Investment Bankers of India ("AIBI") and Stock Exchanges in the General Information Document. The Bid Cum Application Forms and the Abridged Prospectus can be downloaded from the websites of Stock Exchanges and can be obtained from the list of banks that is displaying on website of SEBI at www.sebi.gov.in/sebiweb/other/OtherAction.do?do=doRecognisedFPIyes&intmid=35 and <https://www.sebi.gov.in/sebiweb/other/OtherAction.do?do=doRecognisedFPIyes&intmid=43>, respectively as updated form time to time. For the list of UPI Apps and Banks live on IPO, please refer to the link: www.sebi.gov.in. UPI Bidders Bidding using the UPI Mechanism may apply through SCSBs and mobile applications whose names appear on the website of SEBI, as updated from time to time. HDFC Bank Limited and Axis Bank Limited have been appointed as Sponsor Bank for the Offer in accordance with the requirements of the SEBI Circular dated November 01, 2018, as amended. For Offer related queries, please contact the BRLM on its email ID as mentioned below. For UPI related queries, investors can contact NPCI at the toll free number: 18001201740 and mail ID: ipo.upi@npci.org.in

THE EQUITY SHARES OF OUR COMPANY WILL GET LISTED ON THE MAIN BOARD PLATFORMS OF BSE AND NSE

In case of any revision in the Price Band, the Bid/Offer Period shall be extended by at least three additional Working Days following such revision of the Price Band, subject to the Bid/Offer Period not exceeding 10 Working Days. In cases of force majeure, banking strike or similar circumstances, our Company in consultation with the BRLM, may, for reasons to be recorded in writing, extend the Bid/Offer Period for a minimum of one Working Day, subject to the Bid/Offer Period not exceeding 10 Working Days. Any revision in Price Band, and the revised Bid/Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges, by issuing a public notice, and also by indicating the change on the website of the BRLM and at the terminals of the Syndicate Member and by intimation to the Designated Intermediaries and the Sponsor Banks, as applicable.

The Offer is being made in terms of Rule 19(2)(b) of the SCRR, read with Regulation 31 of the SEBI ICDR Regulations. The Offer is being made through the Book Building Process, in compliance with Regulation 6(1) of the SEBI ICDR Regulations wherein not more than 50% of the Offer shall be available for allocation on a proportionate basis to Qualified Institutional Buyers ("QIBs") (such portion referred to as "QIB Portion") provided that our Company, in consultation with the BRLM, may allocate up to 60% of the QIB Portion to Anchor Investors and the basis of such allocation will be on a discretionary basis in accordance with the SEBI ICDR Regulations (the "Anchor Investor Portion"), of which 40% of the Anchor Investor Portion will be reserved for allocation in the following manner: (i) 33.33% to domestic Mutual Funds, and (ii) 6.67% to life insurance companies and pension funds in accordance with the SEBI ICDR Regulations. In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the Net QIB Portion. Further, 5% of the QIB Portion shall be available for allocation on a proportionate basis only to Mutual Funds subject to valid Bids being received at or above the Offer Price, and the remainder of the QIB Portion shall be available for allocation on a proportionate basis to all QIBs, including Mutual Funds, subject to valid Bids being received at or above the Offer Price. However, if the aggregate demand from Mutual Funds is less than 5% of the QIB Portion, the balance Equity Shares available for allocation in Mutual Fund Portion will be added to the remaining QIB Portion for proportionate allocation to QIBs. Further, not less than 15% of the Offer shall be available for allocation to NIs (out of which: (a) one-third of the portion available to NIs will be for allocation to Bidders with a Bid size of more than ₹ 20 million and up to ₹ 1.00 million; and two-thirds of the Non-Institutional Category will be available for allocation to Bidders with Bid size of more than ₹ 1.00 million and under-subscription of either of these two sub-categories of Non-Institutional Category may be allocated to Bidders in the other sub-category of Non-Institutional Category). Further, not less than 35% of the Offer shall be available for allocation to RIs, in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. In case of revision of Price Band, the Bid Lot shall remain the same. All potential Bidders (except Anchor Investors) are required to mandatorily utilize the Application Supported by Blocked Amount ("ASBA") process by providing details of their respective ASBA Accounts and UPI ID (in case of UPI bidders using the UPI Mechanism (as defined hereinafter)), in which case the corresponding Bid Amounts will be blocked by the SCSBs or under the UPI Mechanism, as applicable to participate in the Offer. Anchor Investors are not permitted to participate in the Anchor Investor Portion of the Offer through ASBA process. For details, kindly refer "Offer Procedure" beginning on page 576 of the RHP.

Bidders/Applicants should ensure that DP ID, PAN and the Client ID (for UPI Bidders bidding through UPI Mechanism) are correctly filled in the Bid Cum Application Form. The DP ID, PAN and Client ID provided in the Bid Cum Application Form should match with the DP ID, PAN, Client ID and UPI ID (for UPI Bidders bidding through the UPI Mechanism) in the Depository database, otherwise, the Bid Cum Application Form is liable to be rejected. Bidders/Applicants should note that on the basis of the PAN, DP ID, Client ID and UPI ID (for UPI Bidders bidding through UPI Mechanism) as provided in the Bid Cum Application Form, the Bidder/Applicant may be deemed to have authorized the Depositories to provide to the Registrar to the Offer, any requested Demographic Details of the Bidder/Applicant as available on the records of the depositories. These Demographic details may be used, among other things, for giving Allotment Advice or unblocking of ASBA Account or for other correspondence(s) related to the Offer. Bidders/Applicants are advised to update any changes to their Demographic Details as available in the records of the Depository Participant to ensure accuracy of records. Any delay resulting from failure to update the Demographic Details would be at the Bidders/Applicants sole risk.

CONTENTS OF THE MEMORANDUM OF ASSOCIATION OF OUR COMPANY AS REGARDS ITS OBJECTS: For information on the main objects and other objects of our Company, kindly refer "Our History and Certain Corporate Matters" beginning on page 328 of the RHP. The Memorandum of Association of our Company is a material document for inspection in relation to the Offer. For further details, kindly refer "Material Contracts and Documents for Inspection" beginning on page 618 of the RHP.

LIABILITY OF MEMBERS OF THE COMPANY: Limited by shares.

AMOUNT OF SHARE CAPITAL OF THE COMPANY AND CAPITAL STRUCTURE: As on date of RHP, the authorized share capital of the Company is ₹ 400,000,000 divided into 40,000,000 Equity Shares of face value of ₹ 10 each. The issued, subscribed and paid-up share capital of the Company before the Offer is ₹ 301,012,000 divided into 30,101,200 Equity Shares of face value of ₹ 10 each. For details of the Capital Structure, kindly refer "Capital Structure" beginning on page 113 of the RHP.

NOTICE
SPECIAL WINDOW FOR TRANSFER AND DEMATERIALIZATION (DEMAT) OF PHYSICAL SECURITIES
NOTICE is hereby given that pursuant to SEBI Circular No. - HO/38/13/11(2)2026-MIRSD-POD/3750/2026 dated January 30, 2026 ("SEBI Circular"), a Special Window for Transfer and Dematerialization ("demat") of Physical Securities will remain open for a period of one year from February 5, 2026 to February 4, 2027.

The above facility is only available for physical securities that were bought or sold prior to April 1, 2019 and allows their lodgement for transfer and demat as per SEBI guidelines.

Applicability Matrix:

Execution Date of Transfer Deed	Lodged for transfer before April 01, 2019?	Original Security Certificate Available?	Eligible to lodge in the current window?
Before April 01, 2019	No (It is fresh lodgement)	Yes	Yes
Before April 01, 2019	Yes (It was rejected/ returned earlier)	Yes	Yes
Before April 01, 2019	Yes	No	No
Before April 01, 2019	No	No	No

Only those request(s) accompanied by original security certificate(s) along with duly executed transfer deed(s) and relevant supporting document(s) as prescribed in the SEBI Circular will be considered under this special window.

It may be noted that:

- Securities transferred under this facility shall be credited to the transferee only in his/her demat account;
- These Securities will be under mandatory lock-in for a period of one year from the date of registration of transfer, and
- During the lock-in period such securities cannot be transferred/lien-marked or pledged.

All eligible transfer request(s) should be lodged with the Company's Registrar to an issue and Share Transfer Agent (RTA) at the following address:

NAMES OF THE INITIAL SIGNATORIES TO THE MEMORANDUM OF ASSOCIATION OF THE COMPANY AND THE NUMBER OF EQUITY SHARES SUBSCRIBED BY THEM: Given below are the names of the initial signatories of the Memorandum of Association of the Company and the number of Equity Shares subscribed by them at the time of signing of the Memorandum of Association of our Company: Rekha Tyagi- 100 Equity Shares and Neera Tyagi- 100 Equity Shares aggregating to 200 Equity Shares of face value of ₹ 10 each. For details of the share capital history of the Company, kindly refer "Capital Structure" beginning on page 113 of the RHP.

LISTING: The Equity Shares offered through the RHP are proposed to be listed on BSE and NSE. Our Company has received in-principle approvals from BSE and NSE for listing of the Equity Shares pursuant to their letters each dated October 10, 2025. For the purposes of this Offer, BSE shall be the Designated Stock Exchange. A signed copy of the RHP has been filed with the ROC and the Prospectus shall be filed with the ROC in accordance with Section 26(4) and 32 of the Companies Act, 2013. For details of the material contracts and documents available for inspection from the date of the RHP up to the Bid/Offer Closing date, kindly refer "Material Contracts and Documents for Inspection" beginning on page 618 of the RHP.

DISCLAIMER CLAUSE OF SECURITIES AND EXCHANGE BOARD OF INDIA ("SEBI"): SEBI only gives its observations on the Offer Document and this does not constitute approval of either the Offer or the specified securities stated in the Offer Document. The investors are advised to refer to page 549 of the RHP for the full text of the Disclaimer Clause of SEBI.

DISCLAIMER CLAUSE OF BSE (THE DESIGNATED STOCK EXCHANGE): It is to be distinctly understood that the permission given by BSE should not in any way be deemed or construed that the RHP has been cleared or approved by BSE nor does it certify the correctness or completeness of any of the contents of the RHP. The investors are advised to refer to page 552 of the RHP for the full text of the Disclaimer Clause of BSE.

DISCLAIMER CLAUSE OF NSE: It is to be distinctly understood that the permission given by NSE should not in any way be deemed or construed that the RHP has been cleared or approved by NSE nor does it certify the correctness or completeness of any of the contents of the RHP. The investors are advised to refer to page 552 and 553 of the RHP for the full text of the Disclaimer Clause of NSE.

GENERAL RISKS: Investments in equity and equity-related securities involve a degree of risk and investors should not invest any funds in this Offer unless they can afford to take the risk of losing their investment. Investors are advised to read the risk factors carefully before taking an investment decision in this Offer. For taking an investment decision, investors must rely on their own examination of our Company and the Offer including the risks involved. The Equity Shares issued in the Offer have neither been recommended nor approved by Securities and Exchange Board of India ("SEBI"), nor does SEBI guarantee the accuracy or adequacy of the contents of the RHP. Specific attention of the investors is invited to the chapter titled "Risk Factors" beginning on page 33 of the RHP.

For Technocraft Ventures Limited

On Behalf of the Board of Directors

Sd/-

Shefali Kesarwani

Company Secretary and Compliance Officer

Technocraft Ventures Limited is proposing, subject to applicable statutory and regulatory requirements, receipt of requisite approvals, market conditions and other considerations, to undertake an initial public offering of its Equity Shares and has filed the RHP dated July 30, 2026 with Registrar of Companies, Delhi I. The RHP shall be available on the website of the SEBI at www.sebi.gov.in, the website of the BRLM at www.khambattasecurities.com and websites of BSE and NSE i.e. www.bseindia.com and www.nseindia.com, respectively. Any potential investor should note that investment in equity shares involves a high degree of risk and for details relating to the same, kindly refer "Risk Factors" beginning on page 33 of the RHP. Potential investors should not rely on the DRHP filed with the SEBI and Stock Exchanges for making any investment decision and should instead rely on the information included in the RHP filed by the Company with the ROC, the SEBI and the Stock Exchanges.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended or any other applicable law of the United States, and may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are only being offered and sold (i) to persons in the United States or to for the account or benefit of, U.S. Persons, in each case to investors that are both "qualified institutional buyers" (as defined in Rule 144A under the U.S. Securities Act and referred to in the Red Herring Prospectus as "QIBs") and, for the avoidance of doubt, the term U.S. QIBs does not refer to a category of institutional investor defined under applicable Indian regulations and referred to in the Red Herring Prospectus as "QIBs"; and "qualified purchasers" (as defined under the U.S. Investment Company Act and referred to in the Red Herring Prospectus as "QIPs") in transactions exempt from or not subject to the registration requirements of the U.S. Securities Act and in reliance on Section 3(c)(7) of the U.S. Investment Company Act; or (ii) outside the United States to investors that are not U.S. Persons in offshore transactions (as defined in, and in reliance on, Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur).
