‘SWD manholes broken’

M.S. ARASA KUMAR

Stormwater drain doubles as footpath on Kodambakkam High Road. Here, most of the manholes, especially on the stretch of the road from Valluvar Kottam junction to Gemini junction are damaged. Further, there have been frequent instances of sewage overflowing. This suggests discharge of sewage into the stormwater drain through illegal connections. Several complaints to the authorities have not yielded the desired result. This stretch of the road falls under Ward 113 of Zone 9 - Teynampet.

M.S. Arasa Kumar is a resident of Kodambakkam

‘T Nagar sewer lines are not effective anymore’

V. S. JAYARAMAN

It is time to revamp the sewer network in T Nagar. Sewage overflows have become quite common in the streets and roads of T. Nagar.

The sewer lines here were laid decades ago when there were only individual houses in each street.

Now, many multi-storied residential apartments have cropped up and naturally the sewage generation has also increased but the existing infrastructure is not adequate enough and this causes recurrent sewage overflows. The problem is aggravated by monsoonal rains.

V. S. Jayaraman is a resident of T. Nagar

‘Waste pile-ups along service lane in Kovur’

R.K. RAVICHANDRAN

A trail of waste pile-ups are found along the service lane of Perugalathur-Puzhal Chennai Bypass covering Kovur, Tharappakkam, Erandamkattalai, Paraniptur and Thandalam. All kinds of decomposable and non-decomposable waste are dumped here. This includes garbage, raw meat, plastic products and debris among others. Further, these pile-ups are set on fire, a reckless way of waste disposal. This poses a serious health hazard. Because, users of the road will be subjected to inhaling airborne microplastics. Further cattle, whose milk is sold, feed on this waste containing microplastics. And this legacy waste can contaminate groundwater.

R.K. Ravichandran is the founder and president of Iyyappanthangal Bharaniputhur Consumer Rights Protection Society

The service lane near Kovur and Paraniptur.

‘Road in Periya Koluthuvanchery waits for restoration’

SANTHOSH BALAJI

Gangai Amman Koil Street (commonly known as Pillayar Kovil Street) in Periya Koluthuvanchery in Iyyappanthangal Village Panchayat is battered. After the completion of stormwater drain construction, the road has not been relaid. It has been in this state for close to a year. Following the recent rains, the road has gone from bad to worse. This road connects Madhuram Nagar and Periya Koluthuvanchery Main Road and witnesses good traffic during peak hours. Iyyappanthangal Village Panchayat should restore the road before the onset of north-east monsoon.

Santhosh Balaji is a resident of Iyyappanthangal

‘Private land becoming an illegal dump site in Ramapuram’

K. SUBRAMANIAN

A vacant parcel of land at Ambal Nagar First Street in Ramapuram is gradually becoming a dumping site. The waste pile-ups are being set on fire instead of clearing it.

When this issue was brought to the notice of the Greater Chennai Corporation officials, they said it is a private property and it is the owner's responsibility to keep it clean. But this poses a health hazard to the public.

This plot falls under Ward 154 of Zone 11 of Greater Chennai Corporation.

K. Subramanian is the president of Ramapuram Makkal Nala Urimai Sangam, a residents welfare association in Ramapuram

‘Shift Tasmac outlet out of Thambiah Road soon’

R. RAGU

Sometimes, a problem resolved at one place can show up uninvited at another. And that kind of “sometimes” is happening right now at Thambiah Road in West Mambalam.

On this busy road, a Tasmac outlet had been proving to be an irritant for residents for years, inebriated patrons seeming to claim the space around the outlet and causing inconvenience to the public. This problem has now graduated to a full-blown issue, one residents can no longer shrug off.

M. Govindarajan, a resident of Thambiah Road, notes that when the new Tamil Nadu government shut down Tasmac outlets uncomfortably close to sensitive public spaces, around four Tasmac outlets in T. Nagar received the axe. Govindarajan commends the move, but cannot help mentioning the side ef-

fect of this positive action.

Following those shutdowns, the rush at the Tasmac outlet in Thambiah Road has increased. With more inebriated people, the problems that go hand in hand with them have also shot up. Open urination by the drunk is rampant. They lie around the place.

Govindarajan notes that complaints about this situation have been made to elected representatives and a promise extracted that the Tasmac outlet would be shifted out of Thambiah Road. Residents want the promise to be fulfilled without any delay as every passing makes it impossible to put up with the inconvenience caused by the visitors to this Tasmac outlet on Thambiah Road.

Guindy terminal needs escalators

T.S. ATUL SWAMINATHAN

Commuters want Southern Railway to install escalators at the entry point to Guindy terminal from Anna Salai. Currently, pedestrians climb a number of steps to reach the platforms.

S. Ayyappan, a commuter, says, “The commuters have to climb two floors and cross more than 80 steps to go to platforms 1 and 2. At Anna Salai entrance, commuters rush up the steps to board the trains, especially when they see them pull into the station. There is plenty of space for facilitating escalators.”

The station has the potential to become the fourth terminal, as many passengers book tickets at the ticket counters to board long-distance trains. “At present, a lift connects long-distance trains platforms, but it is yet to be operational. Two escalators connecting the present and yet-to-be-opened footbridge can be facilitated. The yet-to-be-opened bridge should have an entrance along Race Course Road. If an opening is facilitated, there would be diversion of metro and suburban train commuters. Here too, the option of installing escalators should be looked into,”

Guindy railway station. PHOTO: SPECIAL ARRANGEMENT

says T. Manoharan, a commuter. The escalators (along Anna Salai) will be useful for long-dis-

tance train passengers from Chennai Central and Tambaram railway stations.

Metro Rail work on major corridors in Mylapore has cast a shadow on C.P. Koil Street with its goldsmiths, and here is how these traditional craftspersons are ensuring the sparkle is not lost despite poor access to their doorsteps

LAKSHMY HARIKRISHNAN

Chengazhuneer Pillaiyar Koil Street off North Mada Street in Mylapore can be missed by footwear-clad hooves other than those heading to it aware of what it has to offer, a standout craftsmanship nestling quietly inside. Narrow and hemmed in by non-decrepit buildings, it slips past the eye unless one has known it for what it is: the bling street in these parts. In terms of numbers, both of shops and transactions, C.P. Koil Street is no patch on Edapalayam Street, which winds like a necklace between NSC Bose Road in George Town and Walltax Road in Park Town. While Edapalayam Street is the undisputed capital for gold and other precious metal jewellery-making and testing in Chennai, C.P. Koil Street could be placed in a “family” that includes gold jewellery-making enclaves in T. Nagar and Purasawalkam.

The description of a lane fitting it better than that of a street, C.P. Koil Street (the quickly recognised contraction) is lined with shops of gold-and-other-precious-metal jewellery-making craftspersons strategically interspersed with those selling jewellery. There are flower vendors, and shops selling temple-related items at C.P. Koil Street sketching the classic image of a street running close to a famous temple (in this case, Kapaleeswarar temple), but the one trait that overrides everything else is that of a turf for craftspersons adept at shaping precious metal into wearables. These craftspersons, some of whom also work with silver and zari saris that have gold and silver threads woven into them, draw upon the trust built patiently over generations. At Santhosh Thanga Maligai, the owner M. Padmanabhan is carrying forward a family business that had its genesis on North Mada Street where his grandfather operated for nearly 50 years. In its current location at C.P. Koil Street, the business has weathered 40 summers. And if one does a simple addition math, there is an unmistakable and majestic hoariness to the enterprise. This account of a skill passed down generations is a recurring feature, the story reappearing at different addresses across C.P. Koil Street’s storefront.

A bling street behind barricades

This business cannot get any more family-oriented than it is. It could not be put more lucidly than how Karthik Gopal of Sagunthala Testing on C.P. Koil Street does. “It is a family business started by my grandfather Venkatesh,” and on who has been running it now, Karthik rattles off a list: “My father, me, my uncle, my aunt, my mother, my cousins, my niece... everyone” And that certainly is pretty much everyone in the family.

Just as craftsmanship and ownership are passed down the generations, on the other side of the counter, customer loyalty also follows an unbroken line of continuity, generations of a family getting gold jewellery done at a shop

whose work ethics they trust. This trust is coming in handy as these craftspersons are battling challenges arising from a mammoth civic work just beyond C.P. Koil Street’s doorsteps.

Finding itself in the long shadows of Metro rail work all around it, C.P. Koil Street might be a little less hoofed now, but the adverse situation has not significantly detracted from its glitter. The trust factor carries the day for these craftspersons as floating customers have dwindled on account of access unwittingly restricted by Metro rail work on main corridors in Mylapore, examples being Kutchery Road, Luz Church Road and RK Mutt Road.

“Now, almost all roads leading to the street have been affected by Metro rail work. Our regular customers still return because they know us,” says Karthik, noting that accessibility as a whole has been a difficult hurdle to bypass. Years of dedication and craftsmanship have earned them a loyal customer base. However, reputation alone cannot replace the steady stream of first-time visitors the place once enjoyed. “Seven years ago, there was much more footfall,” Karthik recalls. Being overly dependent on your established customer base with little scope for new customers swelling it can bring about a frustrating clinginess and a tendency to want to play Aladdin’s servile genie to those loyal customers from the past. Padmanabhan says his shop is open all days of the week, from 10.30 a.m. to 8.30 p.m.; and they close for work only on two festival days in a year. This challenge plonks alongside others faced by all goldsmiths, particularly those in south India, in Karthik’s view. While technology would have brought a cutting edge of accuracy and speed to the goldsmith’s job, Karthik notes, customers still prefer the sight of a goldsmith seated in front of them and testing and assessing the precious

In the run-up to Madras Day, a look at how a narrow, hidden street associated with a form of time-tested craftsmanship is holding on to its legacy against the backdrop of a civic work that has disrupted commerce in the region

metal. It is down to trust issues, he points out. Laser technology makes jewellery-making swift, but too many people cannot be allowed to stay around lest there could be spread of dust. Those who work with this technology are in the right gear for it. The challenge lies in making the process effective through technology and at the same time making it reassuringly visible for the customer.

A picture of sameness

“The street has not changed much,” says Karthik. Padmanabhan echoes that sentiment in a tone that rings wistful. “There has been no development. The street remains the same, and its narrowness leaves little scope for change,” says Padmanabhan. And perhaps that is what makes the present struggle so striking and relevant. The businesses remain where they started and the community they created continues to seek them. It is the journey moving forward that has become increasingly difficult for them. Preserving the place’s commercial character also means preserving the ease with which people, the outsiders, can be a part of it. And at present, that is a challenge.

A small number of apartment communities in Chennai now offer an impressive 1:1 EV charger-to-parking ratio thanks to developers future-focussed in their thinking. Even these developers admit they are on a learning curve, trying to grapple with technology to make their offering even more meaningful

Towards a fully 'charged up' parking space

LIFFY THOMAS

When a large apartment complex goes big on EV adoption, providing a dedicated charging point at every parking slot, the move will have far-reaching benefits. For one, it would give impetus to the Tamil Nadu government's October 2025 mandate requiring charging point for every individual car and two-wheeler parking space in residential buildings.

Here are two builders who saw the need for personalised charging points even before the State Government came up with this mandate.

In 2022-23, Radiance Group announced launch of the 234-unit Radiance Majestic in Valasaravakkam with one feature embossed: a one-to-one charger to parking ratio. Eight months ago when residents started occupying the flats, they were happy the builder had made good the promise.

The apartment complex has 10-15 EV owners who make the most of the single phase EV charging point that

delivers 7.4 kW of power when connected to their individual meter. This infrastructure is likely to get more residents to switch to an EV.

The builder is modest to admit they still have some ground to cover.

"We were inspired by projects in Pune and Mumbai to adopt the same in Chennai, but we are still learning as those owning a high end car want a fast charger but we have only provided a neutral charger. As this technology is still evolving, there is a lot that we need to analyse and factor in as more owners bring home an EV," says Gnana Murugan of Radiance Group.

With individual EV plug point at every parking spot, Lancor Infynys, a 290-flat gated community in Keelakattalai has a story of how the teething trouble was overcome. The irritants, which

included lack of output from the charging point, app not getting connected and iPhone not getting synced, were addressed over a period of time. "With technology do expect some issues but it is extremely easy and convenient to charge at your convenience from your own space," says Vinoth Kumar, who owns an electric two-wheeler.

He shifted from a large apartment complex in Pallikaranai to Keelakattalai a year ago to avail this facility. "My previous apartment did not have even a common charging point, so I used to go to public charging stations or borrow from other EV owners who had connected it from their power box," says Vinoth.

Those working in the EV charging network say it is way easier for an upcoming project to provide owners with the basic infrastructure at their parking lot by focusing on proper earthing and electric load capacity than initiating the work in existing apartments.

Nethaji M, senior manager, charging infrastructure at Bolt.Earth, an EV charging network, says all that we ask developers is provide the cabling work by connecting every parking lot

with the resident's individual meter. The charging kit varies from vehicle to vehicle and is provided when the person buys

the EV which can be fitted to the plug point.

"3.3 kW is the basic requirement that we recommend for an individual parking lot, but as the number of EV users increases in a community the extra load must also be planned by coordinating with the Tamil Nadu Electricity Board," says Nethaji.

CREDAI's stand

Confederation of Real Estate Developers Association of India - Chennai had represented to the Additional Chief Secretary, Housing and Urban Development Department, Government of Tamil Nadu that one-to-one charger-to-parking ratio may be "technically unnecessary, financially burdensome, and operationally impractical, especially in large residential developments."

Currently, 7 kW AC home charger has been used as the ba-

sis for EVs priced below ₹20 lakh. With the market fast moving towards 11 kW AC chargers, transitioning from 7 kW to 11 kW would reduce charging times by nearly 35%, sharply improving utilisation efficiency. If 11 kW becomes the norm, the current requirement of having a dedicated charger for every parking slot would result in an overcapacity, nearly 18 times higher, rendering the infrastructure severely underutilised, says CREDAI in their representation. Developers feel rapid technological advancements will outdate today's chargers. EV charging cables, often 30-40 mm in diameter, pose major challenges when routing hundreds of lines across basements and high-rise structures. The cumulative cable volume, ducting requirements, and heat considerations make one-to-one provisioning technically unviable.

A green upgrade, slow and steady

Most older gated communities are not keen on a one-to-one charger to parking ratio for a variety of reasons and are taking baby steps towards increasing the common EV infrastructure.

Brentwood, one of the 13 towers at House of Hiranandani in Egattur, was the first to invest in an EV charging station that was opened to residents from other towers as well. Now, they have another tower, Amalfi, that has also opened a charging station just for cars.

Likewise, DLF Gardencity Cluster 1 in Semmancherry invested in four basic charging devices to meet the needs of both two-and-four wheelers. The infrastructure was installed at a place easily accessible to residents from the nine towers at DLF Gardencity. This year, the Association upgraded the amenity with four charging points for two-wheelers and four others for four-wheelers.

Karthik T.S., a committee member, says their EV journey has been "steady and fruitful". Towards finding out what best suits the needs of the community, they took up a study that included finding out how many vehicles were coming to the community, how quickly the vehicles were getting charged, the EV capacity, the charger that should be used, how many charging stations are there around the campus and the power requirements.

"We have plans to expand the common charging points to every three towers, and as we have done some homework so it should be easy," says Karthik, adding that they have a separate meter for EV reading and they also consulted other societies with charging infrastructure to arrive at the best possible solution.

A grand lunch at Semmozhi Poonga marks a milestone

The event registering the 750th day of an ongoing annadanam initiative by Teynampet resident D.M. Prakash witnessed Thousand Lights MLA J.C.D. Prabhakar serving food to 150 of the nearly 1000 people who had the free meal

R. RAGU

On July 22, when this daily annadanam, a free mid-day meal initiative by Teynampet resident D.M. Prakash crossed a milestone, clocking 750 days on the trot, the food was understandably grander than on earlier days. Not only what was offered but how it was offered stood out. Imagine being served food by the MLA of the region: that is exactly what unfolded at the event for a good number of the beneficiaries, foot soldiers on the thoroughfare of life for whom a lunch that comes without a bill helps.

On regular days, food packets would be parked on a small table, and Prakash and his associates

would hand them over to the beneficiaries who would queue up. On the 750th day, many tables were placed in a straight line, and the beneficiaries were parked in front of them. Banana leaves were spread out before them. Volunteers were waiting on them hand and foot, running to fetch them the extra helping they sought. The venue, which on regular days would be the sidewalk on the road outside Prakash's house in Vellala Teynampet, had shifted to the Semmozhi Poonga, the parking area being marked for the event.

On the menu were chicken briyani with onion raitha, chicken 65, brinjal curry and bread halwa. (On regular days, a 'revolving menu', one following a weekly cycle would include vegetable briyani, coconut rice, lemon rice, pudhina rice, channa rice and Tomato rice.)

Prakash points out close to 1000 people partook of the celebratory repast. And 150 of those beneficiaries who settled down first for lunch had the food served by Thousand Lights MLA and Speaker of Tamil Nadu Legislative Assembly J.C.D. Prabhakar.

The ongoing annadanam exercise by Prakash, an advocate who is carrying out this service with the support of his United States-based brother D.M. Suresh, benefits a diversity of foot soldiers: autorickshaw drivers, security personnel and daily wage earners.

BY A SPECIAL CORRESPONDENT

A city-wide campaign through art is mobilising students at colleges and schools to speak up about the dangers of substance abuse. Initiated by art and craft brand Fevicryl, the initiative launched recently has Fevicryl-certified teachers visiting institutions to

conduct an art session where students use their creativity to create meaningful works on the theme of drug awareness. The sessions are aimed at encouraging creativity, building teamwork, promoting social responsibility and creating awareness for a drug-free society.

Tejaswitha Singh, a resident of Adyar who is driving the initiative

During a workshop at a college in Thiruverkadu. PHOTOS: SPECIAL ARRANGEMENT

Art against drugs

Fevicryl-certified teachers fan out to educational institutions to create awareness about drug abuse and fight the scourge

in south Chennai, says, "All what we ask institutions is give them two hours and at least 200 students and we engage with them to use art to create awareness." The materials for the artworks have to be arranged by the students that includes canvas board,

markers and other stationery.

A team of three would be assigned to every institution where they are also involved in colouring a 6ft x 3 ft banner with colourful messages.

Besides being a Fevicryl certified trainer, Tejaswitha works as a

guest lecturer in fashion designing. She says there are close to 150 such certified teachers in Chennai and they are fanning out to institutions in their respective areas to increase participation in this initiative.

By researching about drugs and its side effects to send out a message on canvas, the initiative nudges students to recognise behavioural signs and be allies with the State Government in combating the scourge of drug abuse.

If you wish to invite the team, contact Tejaswitha Singh at 80560 91498

At the ongoing MCC World Records Festival 2026, both individuals and teams are displaying a variety of incredible skillsets

BY A SPECIAL CORRESPONDENT

Over 1,137 students, 90 staff and 56 world records in the offing. MCC Public School in Chetpet is sporting a festive mood with 'MCC World Records Festival 2026' under way on the campus till July 26. To mark the school's 10th anniversary, six major team world records and 50 individual world record attempts across academics, artistry, athletics and cultural disciplines are happening. Besides showcasing the talent, creativity, innovation and endurance, the Records Festival has ensured every student is part of some event whereby they get to showcase their skills.

For instance, there is Jessica John of Class IX who showcased her mastery with words by penning 200 poems on a range of topics. Her batchmate, Samanta Felix, showed her skill on the court by

And it is raining feats

playing badminton against most opponents for the longest duration: nine hours 45 minutes.

All the events are being adjudicated by four internationally recognised bodies – Elite World Records, Asian Book of Records, Indian Book of Records and Tamil Nadu Book of Records.

On July 24, students performed a sports drill while holding umbrellas at a single venue. Likewise, there was another feat with vegetable print artwork and solving single-digit mental arithmetic addition problems.

Each of these feats was a display of hard work and mental disci-

Students perform a drill holding umbrellas and (below) a kindergarten student showcases his skill with numbers. PHOTOS: SPECIAL ARRANGEMENT

pline.

The idea to bring out a book was floated by a student, Daita Hardikh. The process for 'Most Authors Contributing to a Fiction Story Book Series Published by a School' began in April. Each story had to be 250 words and was written in the school in their notebooks.

Yasmin Khan, teacher with the English Department, says the book titled 'Inspire' is a collection of fictional stories on a range of topics that children relate to and the first version was corrected by teachers of the English department.

The exercise went through many checks and balances to ensure the contents of the story was not plagiarised and each of the authors had to come up with their first manuscript for an interview round.

On July 25 and 26, the 'Longest Bible Reading Marathon' will be conducted for 24 hours.

The citation ceremony will be held on August 1; 9 a.m. onwards.

Jolly Saji Mathew, principal of the school, says the World Records Festival would serve as memory for all. "We noticed that there were so many children with talents and they had to be given a platform where they could showcase their skills individually and as a team, which is what our motto also is 'Achieving Excellence Together', says Jolly.

DG Vaishnav College wins basketball title

The team which won the championship. PHOTO: SPECIAL ARRANGEMENT

The Dwaraka Doss Goverdhan Doss Vaishnav College (Autonomous) won the 29th Sree Raghavendra Inter-Collegiate Basketball Championship, held in the city from July 11 to 23.

In the knockout match, the college defeated Jeppiaar University, 72-47; in league matches, SRM University, 67-56; Hindustan University, 71-69; and Madras Christian College, 91-51.

The team showed outstanding teamwork, which paved the way for an unbeaten run in the tournament and helped them to clinch the title and bring pride to the institution.

The results: Hindustan University, runner-up; SRM University, third place; and Madras Christian College, fourth place, said a release.

UNIFAI Hospital conducts a camp for sanitation workers

As part of its first anniversary celebrations, and 52nd birthday of an actor-turned politician, UNIFAI Robotic Multispeciality Hospital, Saligramam region, recently organised a comprehensive blood checkup camp for more than 50 sanitation workers from Zone 10 - Ward 129 of the Greater Chennai Corporation. Playback singer and cine actor Manojkumar inaugurated the camp. The camp underscores the hospital's commitment to providing quality healthcare for the city's frontline workers, who tirelessly keep our neighborhoods clean and safe, a release stated. Dr. V. Surekha Sri, maxillofacial and hair transplant surgeon, and Dr. S. Sivakumar, anaesthesiologist, of UNIFAI Robotic Multispeciality Hospital, presided over the camp. Dr. Surekha

ha said, "Sanitary workers are regularly exposed to sewage, chemicals, sharp waste, and harmful microorganisms, which significantly increase their risk of developing various health disorders - often without visible symptoms. A simple blood test can help detect underlying conditions early and enable timely treatment. It is our

commitment to their health and well-being - they care for us daily, and we must care for them in return. The workers are prone to common infections, respiratory and skin issues, and are at high risk for Hepatitis B and C." The hospital screened and identified health issues from test reports, provided immediate medical aid, and will

offer a three-month vaccination course for Hepatitis B and Hepatitis C to protect them, along with expert consultations and guidance for all necessary follow-up care, the release added.

Milestone

As a significant milestone marking its first year of service, UNIFAI Robotic Multispeciality Hospital also announced the successful completion of 25 robotic surgeries led by Dr. U P Srinivasan, surgical gastroenterologist. To commemorate this achievement, the hospital performed a free robotic procedure for a patient with colorectal cancer. The patient has recovered well post-surgery. The hospital is located on Lal Bahadur Shastri Street, Sathya Garden, Saligramam. Phone : 90437 55830.

Course on Montessori teacher training

The Indian Montessori Training Courses (IMTC), Chennai, will commence their 57th Montessori teacher training Course in August. The weekend course will have online and in-person sessions, a format designed to suit working women, enabling them to balance work and family while pursuing their passion for early childhood education.

IMTC-Chennai is affiliated with the Indian Montessori Center, Bengaluru, which awards the Diploma to successful candidates.

For details, WhatsApp and call 94449 36263, 044-24614301.

HGI starts school in Padappai

The Hindustan Group of Institutions (HGI) has established Hindustan International School (HIS) in Padappai to provide a contemporary learning environment that integrates academic excellence, technology, creativity, sports, and values-based education.

Theodosius Mar Thoma, Metropolitan, Malankara Mar Thoma Syrian Church, inaugurated the campus.

In his speech, he underscored the importance of education rooted in values, character, and compassion in shaping responsible global citizens.

Anand Jacob Verghese, chairman of Hindustan Group of Institutions, said, "We believe education must go beyond academic achievement to nurture character, creati-

ty, critical thinking and a sense of purpose. Through this campus, we aim to create an environment where every learner is encouraged to explore their potential, embrace innovation and grow into a responsible global citizen while remaining rooted in strong values." The campus features smart classrooms, robotics and computer laboratories, composite science laboratories, innovation and maker spaces, and dedicated sports infrastructure.

Two books were released: one curated by Anand Jacob, 'Journey of Parables', a collection of reflections centred on leadership and values, and a coffee table book, 'Historia', documenting the decade-long journey of Hindustan International School, a release from HGI stated.

Cleanliness awareness rally held

To raise awareness of waste management and environmental responsibility, the UNESCO Kancheepuram District and Mangadu Municipality recently organized a cleanliness rally on the theme 'My Waste, My Responsibility' at the National IT School campus in the Mangadu region.

V. Padmavathy, president, UNESCO Kancheepuram district, and M. Sumathi Murugan, president of Mangadu Municipality, participated and flagged off the rally.

ALLERGIC AIRWAY DISEASES

Advertisement

Over 500 million people world wide have chronic respiratory disease, yearly one billion. In India annually 40 million patients are reported. Children under the age of 5 and older adults faces the higher risk. In Tamil Nadu over 2 million people affected state- wide (Chennai, Coimbatore, Madurai)

Air enters into nose then it goes to lungs where oxygen get absorbed and carbon dioxide releases. 500ML of air is being filtered per breath with 12 to 20 breaths/ min

Allergic rhinitis happens when the immune system over reacts to allergens causing swelling sneezing and irritation.

Sinuses are air cavities; sinusitis is their inflammation causing mucus blockage and facial pain.

Pharyngitis is throat inflammation caused by viruses (or) bacteria, leading to tissue damage and fever.

Asthma is a chronic lung disease where inflammation narrowed airways make breathing difficult and causes cough.

Genetic and environment factors trigger airway allergy. In conventional medicine infection, allergy, genetics & oversensitivity -where the immune system treats harmless particles as harming invader. This triggers an intense defense reaction. This body accidentally attacks it's own tissues, causing immediate swelling mucus build up and muscle contraction that blocks airways.

❖ Reduce exposing to allergens.

❖ Avoid tobacco smoking.

❖ Manage stress by yoga, meditation.

❖ Homoeopathic approach differs from conventional medicine. Etiologies, environment factor & life style situations and stress also trigger this allergic reaction.

Homoeopathy considers these allergic reactions in 4 stages:

Stage-1: All the rhinitis symptoms with fever will be present.

Stage-2: Nose block and discharge present

category 2 also has the different stages like ozena, bloody discharge.

Stage-3: Consists of cough and wheezing with seasonal changes.

Stage-4: Throughout the year they suffer with respiratory illness, breathing difficulty. In such cases they will be dependant on inhaler (or) nebulizer.

Here the homoeopathic medicine significantly alters the defective immune system and brings down the dependency on conventional medicine and leads to the recovery of diseases.

Two different persons suffers from same disease also express a different set of symptoms; this difference is considered as **Individualization** in homoeopathy. This forms core & essence in managing diseases.

Constitution medicines are selected on the basis of intellect, mental and physical attributes.

Homoeopathic practice emphasizes a holistic evaluation and it also addresses the underlying causes rather than just the symptoms, aiming for long lasting results and better quality of life.

Our clinic is named

PRANAVAA HOLISTIC HOMEO CLINIC & RESEARCH CENTRE.

It is located near

New bus stand, Thanjavur

**RR -Nagar, Reliance apartment
Near central bus stand, Trichy**

and in

**Coral spring apartment,
RR colony Jafferhanpet,
Ashok Nagar, Chennai**

and we are doing our services.

Thanjavur 98424 33473 | Thanjavur RR nagar 99655 33473 | Trichy 95973 33473 | Chennai 97910 55500
