Madras Medical Mission gets new haemodialysis machine

Tamilnad Kidney Research (TANKER) Foundation has installed a new haemodialysis machine at Madras Medical Mission (MMM) in Chennai. The machine was inaugurated on Monday in memory of late Rajan Hariharan, a distinguished professor of surgery and an esteemed member of the medical fraternity. The haemodialysis machine, which was sponsored by the family of Dr. Rajan, was inaugurated by Dr. Sarojini Hariharan. Georgi Abraham, founder-trustee and president of TANKER Foundation, and Sivakumar Hariharan also participated. Dr. Abraham said the new haemodialysis machine would enable MMM to serve more underprivileged patients suffering from chronic kidney disease.

Boy dies after falling from tree near Poonamallee

A 14-year-old boy died of injuries late on Sunday at the Rajiv Gandhi Government General Hospital (RGGGH), where he had been undergoing treatment after falling from a tree while attempting to retrieve a kite from its branches in Kattupakkam near Poonamallee on May 27. The victim was identified as Madesh of Amman Koil Street in Kattupakkam. The police said that when Madesh climbed the tree to retrieve the kite, he lost his balance and suffered serious injuries in the fall. Family members rushed him to a private hospital in Poonamallee. Later, he was referred to the government hospital.

GCC plans ₹71.9-cr. pedestrian corridor in Tondiarpet zone

Site survey: GCC Commissioner G.S. Sameeran on Monday inspecting the stretch in Tondiarpet, where the pedestrian corridor will be constructed. SPECIAL ARRANGEMENT

The Hindu Bureau CHENNAI

A pedestrian corridor with integrated utilities is being planned on the 2,400-m stretch from New Washermenpet Metro Station to Toll-gate Metro station and on Arunachaleswarar Koil Street in Tondiarpet zone, at an estimated cost of ₹71.90 crore.

A press release said the project includes provision for underground ducts to carry electric cables, drinking water, and sewer pipelines, and data network lines. Work to create the required sub-surface infrastructure on the stretch is expected to begin soon. During an

inspection here on Monday, Greater Chennai Corporation (GCC) Commissioner G.S. Sameeran asked officials to coordinate with service departments to carry out the work without delay and to remove roadside encroachments, including shops, to expedite the project.

Later in the day, in Kodambakkam zone, Mr. Sameeran reviewed the waste clearance from bins and sanitation work on Vadapalani Nerkundram Road and directed authorities to remove garbage promptly and maintain cleanliness in and around public bin locations, the release added.

Victim in Koyambedu flyover hit-and-run case was sexually harassed by accused at pub

One of the accused had misbehaved with the victim and forced her to dance with him. The police have arrested seven persons, including three college students, in connection with the case so far

The Hindu Bureau CHENNAI

The 18-year-old girl, who was killed by a gang of drunk youths in a hit-and-run case after a quarrel inside a private bar on Saturday night, and her 17-year-old friend, who remains in a critical condition, were allegedly sexually harassed by the gang inside the bar. The Koyambedu police have so far arrested seven persons in connection with the case, including three who were apprehended on Sunday.

The deceased hails from Villupuram district, and her friend, who is a resident of Ramapuram, has been admitted to the intensive care unit of the Government Kilpauk Medical College Hospital, the police said. The deceased was a content creator.

The police said that on Saturday night, the two girls went to a pub called MM's Chennai Gateway and met two more youths whom they befriended on

Shut down: The Prohibition and Excise Department temporarily suspended the licence of the pub in Koyambedu and sealed the premises late on Sunday. SPECIAL ARRANGEMENT

social media. They entered the pub around 9.30 p.m. Aswanth, one of the youths who accompanied the girls, in a video, said that while moving through the crowd, a person from another group that had come to the pub misbehaved with the girls and forced them to dance with him. "When I intervened, the group also manhandled me. The bouncers pacified the group and advised all of us to leave the premises and to settle the matter outside."

During that time, another verbal altercation broke out between the first group

and another group of youths, and escalated into a brawl. The bouncers again intervened and separated both groups. Later, these groups again got into an argument near a shop outside the pub, following which the same bouncers once again intervened and dispersed them.

Stone-pelting incident

Subsequently, the two girls and their friends decided to head towards Thirumangalam on two-wheelers, while the first group left in a sports utility vehicle (SUV).

"Meanwhile, unidentified

fied persons had allegedly pelted the group's SUV with stones near Koyambedu flyover and fled the spot," Aswanth said.

Assuming that the girls and their friends were behind the stone-pelting, the men in the SUV allegedly began chasing and attacking them. "They first rammed another vehicle. They continued to chase us and rammed the motorcycle the deceased and I were riding. In the impact, we fell on the road, resulting in her death. The accused then fled the scene," Aswanth said.

The police arrested seven accused in connection with the incident and identified them as Suman Sakthivel of Virugambakkam, Mohanasundaram, Vimalraj, Rahul, Balaguru, Kishore Kumar, and Joshua. Three of them are college students. Meanwhile, the Prohibition and Excise Department temporarily suspended the licence of the pub in Koyambedu and sealed the premises late on Sunday.

Intense heat to ease across the State amid week-long wet spell

The Hindu Bureau CHENNAI

After weeks of scorching temperatures, intense heat may gradually ease its grip on Tamil Nadu from Tuesday. The start of June is set to bring a spell of heavy rainfall over several parts of west and interior districts, which is likely to continue till Sunday.

The day temperature peaked above the 40-degree mark in Chennai Meenambakkam. However, the maximum temperature would remain near normal or drop below average from Tuesday, noted officials.

The Southwest monsoon, which is expected to advance over parts of Kerala in the next two or three days, is likely to impact the weather in the State. The Regional Meteorological Centre (RMC) has forecast heavy rainfall with thundershowers in 22 districts across Tamil Nadu, including Vellore, Salem, Theni, Tirunelveli, Kanniyakumari, and Karur on Tuesday.

Weather systems, including a trough running from east Vidarbha to south Kerala across Telangana, Rayalaseema, and Tamil Nadu, would aid the wet spell.

On Monday, Vellore recorded 40.5 degrees Celsius, the hottest maximum temperature for the day in the State.

Various rain gauges, including Kodaikanal, Vellore, Valparai, and Krishnagiri, received light rainfall on Monday till 6 p.m.

D.S. Pai, Head, RMC, said Tamil Nadu largely remains a rain shadow region during Southwest monsoon. Parts of the State, including the Western Ghats, may experience the impact of the monsoon onset phase with a weak pulse expected to persist for three or four days.

Most parts of the State are likely to get a respite from the searing heat and temperatures may stay close to normal or drop by a few degrees. Coastal parts too may have their share of thundershower activity, if not immediately, over the coming days.

On the heatwave conditions predicted in isolated regions of the State during June, he said the chances are minimal for at least one week as the wet spell is likely to continue. Hot, humid weather may return to coastal areas once clear skies prevail.

# No more in-person visits for planning approvals: Corpn.

They must be processed within specified timelines and all scrutiny must be done online, as per a circular issued by the GCC's Town Planning Dept.

R. Aishwaryaa  
CHENNAI

The Greater Chennai Corporation (GCC) can no longer summon applicants or registered architects to appear in person for planning permissions.

All scrutiny must be done only online, as per a circular prescribing time-bound guidelines for the processing of planning permission and building permit applications.

According to the circular issued by the GCC's Town Planning Department, planning permission and building permits must be processed within the specified timelines.

The document said that Assistant Executive Engineers should conduct site inspections within seven days of an application being submitted online.

The inspection report should be uploaded to the GCC portal within two days of the inspection, and the documents verified within five days of the report being uploaded, it said. If additional particulars are required, officials should seek them through the online portal within two days of scrutiny, it added.

Applicants must be given seven days to furnish

**Avoiding delays:** The maximum time for approving an application is 27 days in cases involving queries or clarifications. FILE PHOTO

the requested particulars online. Once the required documents satisfy the prescribed conditions, fee calculations must be completed online and the competent authority must approve the planning permission application within three working days.

The circular also directed that the demand advice for the payment of fees be generated automatically through the online portal.

Plans and permits should be digitally signed by Executive Engineers within 24 hours of payment by the applicant, enabling the approved documents to be viewed online.

According to the document, applications should be processed on a first-in, first-out basis.

It stated that the maximum time for the approval of a planning permission application was 27 days in cases involving queries or clarifications.

In cases where applications are complete and no additional particulars are sought, approval should be granted within 18 days.

The circular also laid down the procedures for cases in which the planning permission had already been granted by the Chennai Metropolitan Development Authority.

In such cases, site inspection and document scrutiny by the GCC are not required, and building permit applications forwarded by the CMDA should be sanctioned within seven days, the document further stated.

# Deadline for TNEA registration extended to June 5, polytechnic counselling begins

The Hindu Bureau  
CHENNAI

The last date for registration for Tamil Nadu Engineering Admissions (TNEA) 2026 has been extended to June 5. S. Visakan, Director of Technical Education, said at a review meeting attended by Higher Education Minister P. Viswanathan here on Monday.

The counselling for admission to first year and part-time diploma courses in government polytechnic colleges commenced on Monday.

During a review of the ongoing admission process in State-run institutions, the Minister was informed that as on May 31, as many as 2,81,502 students have registered their applications on the TNEA portal (www.tneaonline.org) and 2,17,627 of them have paid the application fees.

The last date for uploading certificates is June 6, following which the TNEA will assign random numbers to candidates on June 10. The rank list will be published on June 29.

While the counselling dates were yet to be announced, the TNEA authorities informed the Minister that they were keeping an eye on developments pertaining to CBSE exam paper enumeration fiasco that may delay the distribution of mark sheets.

**2.81,502 students have registered their applications on the TNEA portal**

In addition, the counselling process for admission to polytechnic courses began at the respective colleges on Monday. As many as 18,888 students have applied for admission to first year through the portal www.tnpoly.in.

In 44 of the 55 government polytechnic colleges, Industry 4.0 Skill Centres have been established in collaboration with the Tata Group offering three new diploma programmes – Digital Manufacturing Technologies, Automation and Robotics, and Internet of Things. As many as 3,570 additional seats have been created to facilitate student enrolment, Mr. Visakan said.

On the other hand, over 2.24 lakh applications were received from students as on May 29 for admission to government arts and science colleges through the www.tngasa.in portal. Those who missed the first window for registration will get another chance to register from June 1, E. Sundaravalli, Commissioner of Collegiate Education, informed the Minister.

V. Arun Roy, Secretary, Higher Education Department, was present.

# Rainbow flag hoisted amid calls for inclusion and action

**Reiterating rights:** Members of Sahodaran Chennai celebrating the pride month on Monday. M. SRINATH

Sahana Mira S.  
CHENNAI

With an unmissable rainbow flag swaying above the premises of Sahodaran, more than 50 members of the LGBTQIA+ community came together on Monday to hoist it and commence the pride month, chanting slogans of non-discrimination and inclusion.

Chennai Rainbow Pride is entering its 18<sup>th</sup> year with the Rainbow Pride self-respect march scheduled for June 28.

Beyond the celebrations, many who took part in the event expressed their disappointment with the Transgender Persons (Protection of Rights) Amendment Act, 2026.

They reiterated calls for horizontal reservation in education and employment in Tamil Nadu, gender-neutral washrooms, and altering the Tamil name of the transgender

welfare board to *Thirunar Nala Variyam*, among the 17 demands.

Sahodaran's General Manager Jaya said previous State governments had been sensitised to the concerns of the community. "This year is important to us because there is a new government in Tamil Nadu, but we don't yet know how well they understand our issues. We hope the members of the Tamil Nadu Rainbow Coalition (TNRC) will be called for a meeting with the current government so that we can directly explain our challenges to them," she said.

Fred Rogers, a man of trans experience, said trans men are a minority within minorities, and that the amendment act erases them completely. "We are just like any other human being, but why should we be discriminated against based on our identity?" he said. When asked what

Pride 2026 means to him, Mr. Rogers said: "It is about me being myself and that gives me so much joy. I want the same for my peers as well."

Finding employment opportunities remains one of the major hurdles. A doctor who completed her MBBS in Russia, Jaahanavi, said that she had received many offer letters from hospitals in Chennai, only to have them revoked once she disclosed that she was a trans woman.

Meanwhile, Archanaa Seker, a Chennai-based activist and member of the TNRC, said Pride month and the march were about equality, visibility, and the right to exist and love.

"There is a divisive world out there waiting to break spaces and movements like these. So, it is important we find hope where it is and commit to reparation whenever things go wrong," she said.

# Migrant worker killed, 48 injured as staircase collapses

The Hindu Bureau  
CHENNAI

A migrant construction worker died and 48 others sustained injuries after an iron staircase ramp collapsed at a temporary accommodation in Nandambakkam on Sunday night.

The incident took place at a makeshift shed operated by a private firm, where hundreds of workers had gathered to watch the finals of IPL 2026 between Royal Challengers Bengaluru and Gujarat Titans, the police said.

**Fatal fall:** The makeshift shed in Nandambakkam where hundreds of workers had gathered to watch the finals of IPL. B. VELANKANNI RAJ

ru and Gujarat Titans, the police said.

more than 100 workers gathered on a section of the staircase and leaned

against the railing while cheering for their respective teams.

Unable to withstand the weight, the structure gave way, following which more than 40 workers fell from a height of about 15 feet, landing on top of one another.

The injured workers were rushed to the Government Kalaigarn Centenary Super Specialty Hospital in Guindy, while 22 others were admitted to the Sri Ramachandra Medical

Centre in Porur for treatment.

## Serious injuries

Brinji Manjhi, 31, from Jharkhand, who suffered serious injuries, died despite treatment at Rajiv Gandhi Government General Hospital in the early hours of Monday.

The Nandambakkam police have registered a case.

They have launched an investigation into the incident.

INBRIEF

BJP urges CM to fill vacancies in government departments

BJP Tamil Nadu president Nainar Nagenthiran on Monday urged Chief Minister C. Joseph Vijay to fill vacancies at government departments. He referred to media reports that about 5,000 government employees attained superannuation on May 31, pushing up the vacancies to 40%. Criticising the DMK government for its failure to keep its promise of filling the vacancies in government service, Mr. Nagenthiran said that even one lakh vacancies could not be filled in five years of DMK rule. While the vacancies were increasing, the youth were struggling with unemployment, he said.

Vijay greets Mohana on her appointment as SC judge

Chief Minister C. Joseph Vijay on Monday congratulated senior advocate Venkita Subramani Mohana on her appointment as a Supreme Court judge. Mr. Vijay said Ms. Mohana, a native of Coimbatore district, was the first woman advocate from Tamil Nadu, and only the second in the country, to get appointed directly as a Supreme Court judge. Mr. Vijay also paid floral tributes to the portrait of freedom fighter Anjalai Ammal on the occasion of her birth anniversary on Monday.

CM Vijay promises inclusive, corruption-free government

The TVK government will never compromise on secularism, State rights, sharing of river water, or social justice, says Vijay at a public meeting organised to thank the voters of Tiruchi East

The Hindu Bureau  
TIRUCHI

Tamil Nadu Chief Minister C. Joseph Vijay on Monday said the TVK-led government would be a “government for all”, and it would never compromise on secularism, State rights, river water-sharing, or social justice.

He was speaking at a public meeting organised to thank the voters of the Tiruchi East constituency, from where he was elected to the Assembly (since vacated), besides Perambur in Chennai. Mr. Vijay promised the people of Tamil Nadu that he would provide corruption-free governance. “I understand it is not magic, and cannot be done overnight. But I will make it happen. I have no other job than working for you,” he said, adding that everything would be done according to the Constitution.

Referring to the criticism of his government, Mr. Vijay said those who had pledged to wait for six

Victory tour: Chief Minister and TVK president C. Joseph Vijay greets supporters at a meeting in Tiruchi on Monday. R. VENGADESH

months (before assessing his performance) could not hold their tongue for even six days. “Within half-an-hour of government formation, they started speaking. They were even ranting at a wedding,” he said.

He reaffirmed that the DMK would remain the TVK’s main political opponent, and all other “formations” were irrelevant. Alleging that attempts were made to prevent the TVK from forming the government, Mr. Vijay said the “evil force” (*theeya sakthi*) and the “exhausted force”

(*theeyintha sakthi*) had plotted to form the government and continue to loot the State. “The moment you decided to keep an alliance with the exhausted force, the DMK became irrelevant,” Mr. Vijay said, addressing DMK president M.K. Stalin.

The TVK, according to him, had broken the influence of caste, religion, and money in elections. The percentage of votes secured by the party was even higher than what was achieved by M.G. Ramachandran, he pointed out,

but was quick to clarify he was not comparing himself with the AIADMK founder and former Chief Minister.

Hitting out at those who labelled TVK supporters as *tharkuri* (illiterate), Mr. Vijay said he would not remain silent if they continued to speak ill of the people. “The same people who voted for you have voted for me, too,” he said.

On the criticism over the law and order situation, Mr. Vijay blamed the rampant spread of drug abuse. Had the DMK nipped it in the bud, many women and children could have been saved, he said. “I have appointed a team of efficient officers now. The ‘Singappen Kaval Padai’ will be inaugurated next week,” he said, promising expeditious filing of charge-sheets, speedy court proceedings, and stringent punishment.

Defending the announcement on farm loan waiver, Mr. Vijay said he had done whatever was possible within a month, given the “financial mess” that needed to be set right.

TVK continuing DMK schemes, says Ezhilan

The Hindu Bureau  
CHENNAI

DMK medical wing secretary Ezhilan Naganathan on Monday said the ruling TVK had not announced any flagship schemes, and was only continuing the schemes implemented by the previous DMK government, such as the breakfast scheme, *Makkalai Thedi Maruthuvam*, *Kalaigal Magalir Urimai Thittam*, *Thayumanavar* scheme, and *Pudhumai Penn Thittam*.

Reacting to Chief Minister C. Joseph Vijay’s speech in Tiruchi, Dr. Ezhilan said Chief Ministers had, in the past, followed the tradition of addressing journalists after meeting the Prime Minister and presenting a list of demands from Tamil Nadu.

“When a reporter asked him to address the press, Vijay *Anna* left in his car. However, today, he has spoken to a captive audience in Tiruchi. There is confusion over whether he spoke as the Chief Minister or as the leader of the TVK. He has the responsibility and power. He has to provide a vision statement,” he said.

Referring to Mr. Vijay’s allegation that the DMK

was now expressing political discontent at weddings, Dr. Ezhilan said the DMK had always used “self-respect marriages” to speak about its politics.

On the DMK’s decision to criticise the ruling TVK within weeks of the latter coming to power, Dr. Ezhilan said, “Please look at how people are out on the street. You said you will bring in monthly electricity bill and provide 200 units of free electricity. But you are continuing the bi-monthly cycle, and have introduced a condition for the free 200 units. You have also introduced a condition for farm loan waiver. Is this the change you promised?”

Dr. Ezhilan said free electricity (for farmers) was first introduced by then Chief Minister M. Karunanidhi in 1989.

Raising law and order issues, he said, “In the last month, caste killings and sexual violence have taken place. Law and order has deteriorated. Your questions have boomeranged towards you.”

“The [new] West Bengal and Kerala Chief Ministers have introduced the Annapurna scheme (₹3,000/woman) and free bus travel, respectively,” he said.

Police officer suspended pending probe into sexual harassment

The Hindu Bureau  
THOOTHUKUDI

A mid-level police officer, formerly attached to the Arumuganeri police station, has been placed under suspension following the launch of an inquiry into alleged sexual harassment of a Head Constable, currently attached to the Singappen Special Task Force (SSTF).

According to sources, the Head Constable, who had joined SSTF on May 28, was allegedly subjected to sexual harassment through text messages while serving at the Arumuganeri police station.

When *The Hindu* contacted a senior police officer to ascertain whether the suspension was based on the findings of the inquiry, and whether a formal complaint had been received from the Head Constable, the senior officer said that the suspension had been ordered to facilitate a fair investigation, and that the Head Constable was yet to lodge a formal complaint.

Safety concerns raised over Dexamethasone injection batch after adverse events

Serena Josephine M.  
CHENNAI

Three patients, including a 20-year-old nursing student, who died during an elective septoplasty, developed severe cardiovascular complications suspected to be associated with the intravenous administration of Injection Dexamethasone 8 mg (Batch No. CHI-60004) during perioperative management at the Mahatma Gandhi Memorial Government Hospital (MGMGH), Tiruchi. Following the adverse cardiac events, hospital authorities flagged concerns regarding the safety of the drug with health officials, after which the Tamil Nadu Medical Services Corporation (TNMSC) initiated testing of the drug batch.

On May 29, S. Kumaravel, dean of MGMGH, Tiruchi, wrote to the Director of Medical Education and Research, seeking urgent drug analysis and necessary action on a report from the hospital’s Professor and Head of Department, Anaesthesiology, regarding suspected adverse

reactions associated with the particular batch of injection Dexamethasone 8 mg ampoule, supplied by TNMSC. The drug is a synthetic corticosteroid used to treat severe inflammation and allergic reactions.

In the letter, seen by *The Hindu*, the hospital raised the occurrence of multiple serious adverse cardiac events suspected to be associated with the administration of the Dexamethasone injection manufactured by Cotec HealthCare Ltd, Roorkee, batch number CHI-60004, at MGMGH.

Severe complications

Three patients, who received the drug from the specific batch during perioperative management, developed severe cardiovascular complications immediately following its intravenous administration. The adverse events included ventricular tachyarrhythmias, cardiomyopathy, severe left ventricular dysfunction, hypotension, and refractory cardiogenic shock.

On May 28, a 49-year-

old woman, who was posted for elective mastoidectomy, developed ventricular tachycardia, followed by cardiomyopathy with cardiogenic shock. On the same day, a 40-year-old woman posted for emergency scar ectopic gestation excision developed severe tachycardia, hypotension, non-dilated cardiomyopathy, and severe left ventricular dysfunction.

The letter went on to state that retrospective review identified another similar event in a 20-year-old woman, Seetha, who underwent elective septoplasty on May 22 and subsequently developed ventricular arrhythmias with refractory cardiogenic shock, following the administration of the same drug.

“On receiving the report, we issued a ‘stop order’ and recalled the batch of drugs. We have sent the drug for testing. We have initiated the process based on the hospital’s report. The final findings will be determined through objective evaluation,” an official of TNMSC said.

3 get double life term for murdering Karur activist

The Hindu Bureau  
KARUR

The District and Sessions Court in Karur on Monday convicted and sentenced three accused to double life imprisonment for murdering R. Jaganathan, an activist who fought against illegal stone quarries, in September 2022.

The court also imposed a penalty of ₹2 lakh each on the convicts – Sakthivel, Selvakumar, and Ranjith Kumar.

Jaganathan, of Kalpalayam in Pugalur taluk in Karur district, had been pushing for the closure of illegal stone quarries in the district, and had petitioned the officials multiple times in this regard.

The activist was riding a two-wheeler when he was mowed down by a truck belonging to a quarry, at Kupparam near K. Paramathi. The murder took place a day after a quarry near Kalpalayam, where Jaganathan was residing, was closed by the Department of Geology and Mining following complaints that it was being operated illegally.

MDMK general council will decide party’s future course of action, says Durai Vaiko

The Hindu Bureau  
TIRUCHI

The question of whether the MDMK should continue in the DMK-led Secular Progressive Alliance would be discussed at the party’s general council meeting on June 27, MDMK principal secretary and Tiruchi MP Durai Vaiko said on Monday.

“We have convened our party general council on June 27. We will place the question in the council and take a decision based on the views of office-bearers/cadre,” Mr. Durai Vaiko said, while addressing the media after receiving Chief Minister C. Joseph Vijay at Tiruchi airport.

Speaking to *The Hindu* later, he clarified that the party remained a part of the DMK alliance, and said he had made the statement in response to a query whether the party would continue in the alliance.

“The general council is the governing body of the party, and it will discuss various issues, including the party’s recent political

Durai Vaiko

decisions, the seat-sharing arrangement (for the Assembly election), and Karnataka’s move to build a dam at Mekedatu, and decide on the party’s future course of action,” he said.

During an earlier media interaction, when asked whether the MDMK would extend support to the TVK government, Mr. Durai Vaiko said the party was not in a position to do that as it had “unfortunately” contested the Assembly election on the DMK symbol. “However, parties such as the Left outfits, the Congress, and others have extended support to the TVK government to prevent President’s Rule be-

ing imposed on the State. There is nothing wrong in that. Though the people had not given the TVK an absolute majority, it had emerged as the single-largest party. We have to respect the people’s verdict,” he said.

On the criticism over the law and order situation under the current regime, he conceded that there had been incidents of crime, but added that arrests had been made and FIRs registered.

Mr. Durai Vaiko said there was nothing wrong in AIADMK MLAs joining the TVK after resigning their seats, adding that he did not view it as “horse trading”.

He said it was the “democratic right” of a legislator to resign as an MLA and join another party if he does not agree with a decision of the parent party.

On AIADMK general secretary Edappadi K. Palaniswami’s allegation that it was an attempt to break the AIADMK, Mr. Durai Vaiko said people who live in glass houses should not throw stones.

HC orders inquiry into amassing of ₹800 crore of Chettinad family funds by Meena Muthiah’s employee Karuppan Chetty

The Hindu Bureau  
CHENNAI

The Madras High Court has directed the Greater Chennai Commissioner of Police to conduct an inquiry into K.T.R. Raja Karuppan Chetty, alias Karuppiyah, an employee of noted educationist and philanthropist Meena Muthiah, who passed away in Udahgamandalam on May 2, having amassed ₹800 crore belonging to the Chettinad family.

Justice Mohammed Shaffiq directed the Commissioner of Police to take appropriate action on the basis of a complaint, which accused Mr. Chetty

Meena Muthiah

of having misappropriated the huge sum of money by misusing his proximity with Meena Muthiah during her lifetime, and by keeping her son M.A.M.M. Annamalai at a distance. The judge made it clear

that the inquiry must conclude at the earliest, since the deceased was the secretary of Kumara Rajah Muthiah School of Traditional Arts & Crafts, a registered society, which runs Chettinad Vidyashram in Chennai, and “thus the interests of students are also at stake”.

Various charges

The orders were passed on a writ petition filed by V. Palaniappan, a member of the registered society. Representing him, Senior counsel J. Ravindran told the court that the petitioner had lodged a nine-page complaint with the Commissioner on May 26, le-

velling charges of criminal conspiracy, forgery, cheating, criminal breach of trust, fabrication of records, and so on against Mr. Chetty.

According to the complainant, Mr. Chetty had joined the Chettinad household in a modest domestic capacity. Over time, by exploiting his closeness to Meena Muthiah, he entrenched himself within the household’s administrative structure and capitalised on internal family dynamics to assume absolute control over communications, administration, and access to family members.

“Once she fell prey to

his ill-motive, he had secured all her wealth. Thereafter, when she identified his ulterior motive and started digging up the secret, he cleverly planned a trip to Ooty, without even informing any of her relatives, including her son, that too when she was weak and her activity was restricted due to her advanced age, deliberately putting her life at risk,” the complaint said.

Accusing Mr. Chetty of having inducted his family members into the trusts instituted by the Chettinad family and accumulating wealth in their names, too, the complainant said

a detailed investigation would reveal how he had siphoned off the society funds and compromised the charitable objectives of the Chettinad family.

Mr. Palaniappan also accused Mr. Chetty of not having handed over the accounts and administrative control of the registered society to industrialist P. Vijayakumar Reddy, who had been appointed as its interim administrator by the High Court last month.

He said Mr. Chetty was continuing to withdraw funds from the society’s bank accounts, thereby causing severe administrative hindrance.

AIADMK man found dead, EPS announces ₹55-lakh solatium

The Hindu Bureau  
THANJAVUR/CHENNAI

An AIADMK functionary was found dead in an open ground at Pallur hamlet in Thanjavur district on Sunday.

The deceased was identified as Mahendiran, 37, of Thiruppanandal. AIADMK general secretary Edappadi K. Palaniswami announced a solatium of ₹55 lakh to his family.

During the inquiry, the police found a video posted by the functionary on social media, in which he said he was upset over the recent developments in

the AIADMK, including the split and the infighting, and had therefore decided to take the extreme step.

Mr. Palaniswami, who visited the bereaved family at Thiruppanandal on Monday, urged members of his party not to carry out “undesirable and depressing” acts, in the wake of the party’s defeat in the Assembly election.

(Assistance for overcoming suicidal thoughts is available on the State’s health helpline 104, TeleMANAS 14416, and Sneha’s suicide prevention helpline 044-24640050)

INBRIEF

Eleven persons held after CID busts online betting network

Eleven persons were arrested by the Telangana CID's Special Investigation Team (SIT) for allegedly operating a multi-State illegal online betting network linked to the Dafabet platform, following an investigation into the loss of nearly ₹10 lakh by a software engineer from Karimnagar. The CID seized three luxury vehicles, including BMW, Mercedes and Kia Seltos cars, eight laptops, two iPads, 26 mobile phones, five passports and ₹3,21,900 in cash.

Southern Railway to operate trains from Palani to Kerala

The Southern Railway will operate special trains between Thiruvananthapuram in Kerala and Podanur Junction in Coimbatore, Tamil Nadu, via Palani. Train No. 06079 Thiruvananthapuram North (Kochuveli)-Podanur Junction Express Special will leave Thiruvananthapuram North at 1 p.m. on Wednesdays and reach Podanur Junction at 6.45 a.m. the next day. Train No. 06080 will leave Podanur at 5 p.m. on Thursdays and arrive at the Kerala capital at 7.15 a.m. the next day.

‘A.P. spent ₹65,887 crore on pensions since July 2024’

Andhra Pradesh Chief Minister N. Chandrababu Naidu announced that the State government distributed over ₹65,887 crore under the NTR Bharosa pension programme since July 2024, and that about ₹32,000 crore was being spent annually on pensions alone. He also said, in June, ₹2,729 crore has been allocated for pensions to 62.34 lakh beneficiaries. Mr. Naidu was at a gathering of beneficiaries at the 21st Pedala Sevalo programme in Kakinada on Monday.

Phone tapping: MLA deposes before SIT

The Hindu Bureau  
HYDERABAD

Mahbubnagar MLA Yen-nam Srinivas Reddy deposed before the Special Investigation Team (SIT) probing the alleged phone tapping case on Monday. Mr. Srinivas had earlier lodged a complaint with the Hyderabad police alleging that his phone had been tapped by the Telangana State Level Agency during the tenure of the BRS government.

The Congress MLA appeared before the SIT in

Hyderabad after being served a notice. The SIT has been recording statements of legislators who had alleged that their phones were tapped ahead of the 2023 polls.

The case came to light after the arrest of former Telangana DSP in the Special Intelligence Branch (SIB) Praneeth Rao on March 13, 2024. He was picked up following a complaint by Additional SP D. Ramesh, who alleged unlawful interception of phone calls of senior political leaders and officials.

Karnataka Cabinet formation discussions spill over to today

Much-awaited talks of senior Cong. leaders on Monday evening did not happen; they are likely to meet today; lobbying for berths reaches crescendo as a big number of contenders camp in Delhi

The Hindu Bureau  
BENGALURU

The wait for a decision on new Cabinet formation in Karnataka has been extended by one more day. After the much-awaited discussion of senior Congress leaders on Monday evening was postponed, the leaders are likely to meet on Tuesday morning. Even as the swearing-in ceremony of the newly-elected Congress Legislature Party (CLP) leader D.K. Shivakumar is scheduled for Wednesday evening, the entire Congress leadership from Karnataka appears to have moved to Delhi to lobby for berths in the Cabinet.

Though Mr. Shivakumar and outgoing Chief Minister Siddaramaiah reached Delhi by afternoon, the

In full swing: Preparations under way for the swearing-in ceremony of D.K. Shivakumar, in Bengaluru on Monday. J. ALLEN EGENUSE

meeting of central leaders scheduled for Monday could not take place since Leader of Opposition in Lok Sabha Rahul Gandhi returned to the capital late in the evening, sources said.

They added that Congress chief Mallikarjun Kharge and Congress general secretary (organisa-

tion) K.C. Venugopal met to discuss Karnataka developments.

It is also learnt that Mr. Siddaramaiah and Mr. Shivakumar also met Congress general secretary in-charge of Karnataka Ran-deep Singh Surjewala with their list of preferences for Cabinet berths.

The outgoing Chief Mi-

nister is also learnt to have met Mr. Venugopal separately, while Mr. Shivaku-mar too is expected to meet them.

Size and composition The size and composition of the Cabinet, along with other issues – such as having Deputy Chief Ministers, and a coordination committee, a demand that has come from the outgoing Chief Minister's camp – is yet to be discussed.

Another source said that the party is likely to keep about four berths vacant after the Cabinet formation is completed in phases.

“With such a large number of leaders seeking Cabinet berth, it is likely that four berths could be kept vacant to accommodate leaders if trouble engulfs the government with dissidence,” the source added.

CMRL case: HC directs status quo till Friday

The Hindu Bureau  
KOCHI

A Division Bench of the Kerala High Court has ordered the Enforcement (ED) to maintain status quo in the Cochin Minerals and Rutile Ltd. (CMRL)-Exalogic Solutions pay-off case till Friday.

The Bench will pronounce its orders on Friday in an appeal filed by CMRL challenging a single

Bench order that dismissed its plea to quash the proceedings initiated in the pay-off case involving an IT firm owned by T. Vee-na, daughter of former Chief Minister Pinarayi Vijayan. The ED informed the court that it would refrain from ‘precipitating the issues’ till that day.

CMRL and its officials had filed an appeal before the court a week ago, seeking a stay on the ED's

probe into its financial transactions with Exalogic Solutions.

The investigation pertains to alleged misappropriation of public funds.

The High Court had earlier directed the firm's officials to appear before the ED under provisions of the Prevention of Money Laundering Act, 2002, and to cooperate with the probe.

On its part, the CMRL questioned the ED invok-

ing the PMLA against the firm, “even without the registration of an FIR or a complaint in the predicate offence.”

The ED submitted that the agency had the right to issue summons to the firm's officials.

It submitted before the High Court last week that its probe was independent of a probe by the Serious Fraud Investigation Office into the matter.

WEATHERWATCH

Rainfall, temperature & air quality in select metros yesterday

TEMPERATURE DATA: IMD, POLLUTION DATA: CPCB, MAP: INSAT/IMD (TAKEN AT 18.15 HRS)

**Air Quality Code:** Poor Moderate Good (Readings indicate average AQI)

**SO<sub>2</sub>:** Sulphur Dioxide. Short-term exposure can harm the respiratory system, making breathing difficult. It can affect visibility by reacting with other air particles to form haze and stain culturally important objects such as statues and monuments.

**NO<sub>2</sub>:** Nitrogen Dioxide. Aggravates respiratory illness, causes haze to form by reacting with other air particles, causes acid rain, pollutes coastal waters.

**CO:** Carbon monoxide. High concentration in air reduces oxygen supply to critical organs like the heart and brain. At very high levels, it can cause dizziness, confusion, unconsciousness and even death.

**PM2.5 & PM10:** Particulate matter pollution can cause irritation of the eyes, nose and throat, coughing, chest tightness and shortness of breath, reduced lung function, irregular heartbeat, asthma attacks, heart attacks and premature death in people with heart or lung disease

GOVERNMENT OF INDIA  
NATIONAL CENTRE FOR DISEASE CONTROL  
(DIRECTORATE GENERAL OF HEALTH SERVICES)  
22-SHAM NATH MARG, DELHI - 110 054

# Cockroach Janta Party now transitioning into a movement: Abhijeet Dipke

**Amarjot Kaur**  
CHANDIGARH

The Cockroach Janta Party will continue to use every constitutional means available to make people's voices heard, including satire, and hopes to create a lasting "movement" out of the viral popularity of the on-line outfit, CJP founder Abhijeet Dipke says.

In a video posted on the social media platforms Instagram and X on Sunday, the CJP founder said he would return to India on June 6 and stage a peaceful protest at Jantar Mantar in New Delhi. Reiterating the CJP's demand for the resignation of Union Education Minister Dharmendra Pradhan, Mr. Dipke said a petition hosted on the CJP website had received over

eight lakh signatures. "Even though the CJP started as satire on May 16, in response to the Honourable Chief Justice of India Surya Kant's oral observations, the past 17 days have been a reminder of the growing frustrations against the unfair education system among India's youth. The youth has responded strongly to the NEET paper leak controversy and the technical issues in the new OSM system used for marking Class 12 CBSE Board results," he said.

The CJP's Internet popularity has surpassed that of any political party in the country, with its Instagram account clocking a total of 22.3 million followers.

Speaking to *The Hindu*, he said that the CJP is now

transitioning from a satirical political outfit into a "movement". "CJP will remain a movement born out of satire and powered by the support of young people. We will continue to use every constitutional means available to make our voices heard, including satire. Our focus will remain on the most pressing issues facing the country today," he added.

**'Should not fade away'**

On his homecoming, he said, "I am announcing my arrival since many people were asking me when I am going to return to India and take this movement forward. It was my responsibility towards all CJP supporters who have seen a rare hope in this movement and don't want it to

**New launch:** CJP founder Abhijeet Dipke says he will return to India on June 6 and seek permission for a protest in Delhi. REUTERS

fade away." He had earlier cited concerns about being "arrested and sent to Tihar (jail)" when he lands in India, and his worries have only grown with repeated attempts to allegedly suppress his voice by with-

holding his social media accounts. He said, "Yes, I can most probably be arrested and mentally I am prepared for all the consequences and attacks. I believe the Constitution of India will protect me."

CJP's official X account has been withheld since May 21, said Mr. Dipke. Listing out a timeline, he added: "We had lost access to CJP's Instagram handle for two days [on May 22 and 23]. The back-up account has been taken down since May 22. My personal Instagram [account] was locked for more than five days, between May 23 and May 28. CJP's website was down for three-to-four days from May 23 to May 27."

He also claimed that the CJP's volunteer registration form posted on May 29 was taken down by Instagram without any notice.

In view of these allegations and after observing the government's reaction to previous protests in the

country, including the anti-Citizenship Amendment Act and farmers protests, the CJP founder said he would remain cautious. "I will be going to the Parliament Street police station to seek permission for the protest the day I land in Delhi and on the same day, after permission is granted, we will be holding a fully peaceful and democratic protest at Jantar Mantar. I am aware attempts will be made by the ruling party to defame the movement and even derail it. We will do everything we can within our constitutional rights to seek accountability from the government," he said.

**Choice of protest site**

About choosing Jantar Mantar as the protest's site, Mr. Dipke shared, "For de-

cades Jantar Mantar has been the symbol of public movements. For us, it is synonymous with our fundamental right to free speech. Just like all other movements at Jantar Mantar that have shaped India for the better, this too will do the same. I won't be there alone, there will be thousands of youth who have been wronged by the system and who will lead this movement along with many other social activists and many democratic voices."

The proposed demonstration would mark the CJP's first major on-ground mobilisation since the satirical outfit emerged online in May, testing whether its viral popularity can translate into sustained public participation.

## Trinamool MLAs are facing threats, says Mamata

**Shrabana Chatterjee**  
KOLKATA

Trinamool Congress supremo Mamata Banerjee on Monday said the party's MLAs were not allowed to participate in meetings and were being threatened with the help of the police.

This comes a day after only one-fourth of MLAs came to attend a meeting at her residence, and they had to eventually call off the meeting.

"Trinamool MLAs are being threatened with the help of police, local IC and SPs are making calls. They are sending police to their homes so that they cannot leave. They are directly asking our MLAs to break the party. The first call comes from police, the second phone from the Bharatiya Janata Party office," Ms. Banerjee said.

The Trinamool supremo said at least four of her MLAs faced such threats and were facing threats from the police to get slapped with fake cases under the Arms Act and other cases. She questioned if this was how democracy functioned.

Ms. Banerjee claimed that many of her party leaders were not speaking due to fear and were being pressured to break the party.

# Trinamool expels 2 MLAs for 'anti-party activities'

Move came after they alleged their signatures were forged in a party letter submitted to Speaker; number of party MLAs in Assembly drops to 78; Abhishek fails to appear before CID probing case

**Shrabana Chatterjee**  
**Shiv Sahay Singh**  
KOLKATA

The Trinamool Congress on Monday expelled two of its MLAs – Ritabrata Banerjee and Sandipan Saha – minutes after West Bengal Chief Minister Suwendu Adhikari announced that the duo had lodged a complaint alleging the forging of their signatures in a letter submitted by the party to the Speaker.

Addressing a press conference, Mr. Adhikari said Mr. Ritabrata and Mr. Saha had submitted a written complaint to the Speaker of the West Bengal Assembly that their signature on a letter nominating Sovande Chattopadhyay as the Leader of the Opposition in the Assembly had been forged.

"I thank Chief Minister Suwendu Adhikari for exposing the MLAs. If they had any allegations, they should have written to party chairperson Mamata Banerjee, not the Speaker," Trinamool MLA and party spokesperson Kunal Ghosh said, announcing their expulsion from the party.

Many party members,

**Big action:** Trinamool Congress supremo Mamata Banerjee addressing the media in Kolkata on Monday. PTI

including himself, Mr. Ghosh said, may have had complaints about the Trinamool and may not be in agreement with everything the party did, but that did not give them the right to approach a political opponent with a complaint.

"None of these people have won independently. They have won as representatives of the Trinamool, using Mamata Banerjee's face. After winning, just because we are not in government, they are doing this. If we were in power, these same people would have lobbied to become Ministers," Mr. Ghosh said. This is the first

time the Trinamool is cracking down on dissident leaders after the Assembly election. The letter under scrutiny, addressed to the Speaker and signed by 70 Trinamool MLAs, was written by party general secretary Abhishek Banerjee on May 20.

**Official notices**

The official notices sent to the two MLAs by the party stated that they had failed to attend meetings called by the party leadership repeatedly, they had made "anti-party statements", and hence their membership had been revoked with immediate effect.

Following the expulsion, the number of party MLAs in the Assembly has dropped to 78.

Mr. Saha told *The Hindu* on Monday that he welcomed his expulsion. "I have been expelled from an immoral party for doing the moral thing," he said.

Mr. Ritabrata said the expelled MLAs were right to file an official complaint with the Speaker of the House, a neutral entity who does not represent any party.

Party chairperson Mamata Banerjee said that "some people who now have a problem with the party" must also remember they had become MLAs and MPs under the party's banner and symbol. "The moment we lost, you have turned and are coming to an understanding with other parties," she said.

It has been alleged that the names of 14 MLAs in the letter had been forged. The Criminal Investigation Department of the Bengal Police has questioned several MLAs in connection with the forgery. It summoned Mr. Abhishek on Monday in connection with the case, but he did not appear, citing illness.

# Telangana CM to share views on governance and welfare delivery at The Hindu Huddle

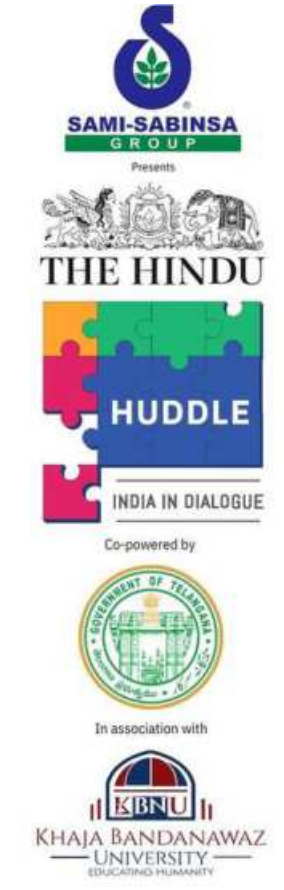

**The Hindu Bureau**  
CHENNAI

In a Huddle session on June 6 titled "By, for, and of the people: Good governance for Telangana," Chief Minister Revanth Reddy will be in conversation with N. Ram, Director, The Hindu Group. The conversation will range over selected aspects of governance, development, and welfare delivery, and what the Congress government has been able to achieve since the party's victory in the 2023 Assembly elections.

In Telangana, the Congress party, led by a young and energetic Chief Minister, has been able to consolidate its political standing through a resounding triumph in the 2024 Lok Sabha elections and impressive wins in subsequent local body polls. But what about delivering on the Chief Minister's ambitious agenda?

The session will cover Telangana's Hyderabad-led economic development over the past decade, with the double-digit annual growth rate ranking well above the national average. The Chief Minister will also be asked about implementation of his party's "Six Guarantees" electoral promise, and the specifics of welfare delivery such as free bus travel for women, the scheme of 200 units of free electricity per household, and the farm support and housing schemes.

The conversation will touch upon the State's industrial and investment policies, its fiscal crisis, the

government's social justice initiatives that have been frustrated by courts, and political questions such as Union-State relations, State rights, Delimitation, the Chief Minister's relationship with the Governor, and with the Government of Andhra Pradesh.

Mr. Revanth Reddy will also be invited to present his intermediate and long-term vision for the all-round development of Telangana as one of India's most advanced States.

As in the previous Huddle edition, he will answer questions from the audience.

The event is presented by the Sami-Sabinsa Group as the Presenting Partner. The event is co-powered by the Government of Telangana and held in association with Khaja Bandanawaz University. It is further supported by Bank of Baroda, Larsen & Toubro, Apollo Hospitals, IIM Sirmaur, ICAFI Group, TAFE, Wizzmonii, Associate Partners; Casagrand, Realty Partner; Toyota, Luxury Car partner; Amity University Bengaluru, University Partner; Harrow International School Bengaluru, Education Partner; Meghalaya Tourism, State Partner; and NDTV 24x7, TV Partner.

# Students are paying the price of mistakes made by CBSE: Congress

**The Hindu Bureau**  
NEW DELHI

Intensifying its attack on the Narendra Modi government over the controversy surrounding the Central Board of Secondary Education (CBSE)'s On-Screen Marking (OSM) system, the Congress on Monday demanded the resignation of Union Education Minister Dharmendra Pradhan, saying he "epitomised arrogance and incompetence".

The Opposition party's criticism came after the CBSE acknowledged that there was a problem in the system, which made students' data public.

The Leader of the Opposition in the Lok Sabha, Rahul Gandhi, accused the government of "financialising" education, and criticised the cost imposed on students seeking correction of alleged evaluation errors.

Sharing a video of his interaction with students, Mr. Gandhi said the burden of rectifying mistakes

Congress leader Pawan Khera has asked why the CBSE did not pay heed to warnings about flaws in the digital evaluation system. ANI

made by the system had been unfairly placed on them.

"Beware of pickpockets – today, they are sitting right inside the CBSE," he said in a post on X. "The mistake belongs to the CBSE. The punishment falls on the student. The profit goes to the government."

Pointing to charges levied during re-evaluation – ₹100 per subject for re-scanned copies, ₹100 for re-totalling and ₹25 per question for re-evaluation

– Mr. Gandhi said that students could spend up to ₹2,000 merely to ensure accurate marking.

"When education is turned from a service into a business, mistakes aren't corrected. They're multiplied. And our children are paying the steepest price for it – with their time, their self-confidence, and their future," Mr. Gandhi said.

In a separate X post, Congress general secretary Jairam Ramesh alleged that tender norms were altered

to favour contractor COEMPT. Taking a swipe at the Education Minister, the Congress communications chief said, "Mantri Pradhan is the very epitome of arrogance and incompetence," and urged him to "follow his rajdharma and resign".

Addressing a press conference, Congress media and publicity department head Pawan Khera accused the BJP government of weakening India's educational institutions through "12 years of blatant misrule and relentless propaganda".

"While PM Modi continued on a personal PR spree with *'Pariksha Pe Charcha'* and *'Exam Warriors'*, crores of young students and their parents suffer daily," he alleged.

Posing a series of questions to the Prime Minister, Mr. Khera asked why the CBSE had "ignored" warnings from teachers and experts about 36 major flaws in the digital evaluation system.

# Parliamentary panel bars doctors' body from attending meet on NEET

**Sobhana K. Nair**  
NEW DELHI

The United Doctors' Front (UDF), which has been demanding the dissolution of the National Testing Agency (NTA), was not allowed to depose before the Parliamentary Standing Committee headed by Congress leader Digvijaya Singh, after protests from BJP MPs on Monday.

The Standing Committee on Education, Women, Children, Youth and Sports, chaired by senior Congress leader Mr. Singh, had convened a meeting on issues concerning the National Eligibility-cum-Entrance Test-Undergraduate (NEET-UG) and the functioning of the NTA. It also weighed in on the merits of "pen-and-paper testing" versus "computer-based tests". The agency has come under scrutiny following allegations of paper leaks and irregularities in the NEET-UG.

According to the official notice, representatives of

Digvijaya Singh

the UDF were listed among the witnesses for the meeting. However, when they were to be called, BJP Rajya Sabha member Bhim Singh objected. According to sources, he argued that the UDF's position on the issue was well known and that they were not neutral witnesses.

**Writ petition**

The UDF has filed a writ petition in the Supreme Court seeking to replace the NTA with an independent testing authority with direct parliamentary oversight, strong anti-leak mechanisms, and comprehensive audits. Other BJP members also supported Mr. Singh's position, contending that the issue must not be politicised.

Some of them also questioned the timing of these deliberations. Following this, the waiting UDF representatives were informed by Mr. Singh that they could not be part of the discussion.

Lakshya Mittal, chairperson of the UDF, told reporters that the body had submitted the names of its representatives and also a memorandum of demands a week in advance. "NTA should be dissolved and a new examination body should be created through an Act of Parliament. Such a body should be made accountable to Parliament," Dr. Mittal said.

Mr. Singh declined to share details of the meeting, citing rules that prohibit disclosure of discussions until the report is presented in Parliament. He reiterated the Congress's demand for the re-

signation of Union Education Minister Dharmendra Pradhan. "The PM is so miffed with the failures of Mr. Pradhan that he has taken up all the responsibilities himself," Mr. Singh said.

**Congress allegations**

On X, Congress general secretary Jairam Ramesh posted that the Solicitor-General had informed the Supreme Court that the Prime Minister was personally monitoring conduct of NEET.

Mr. Ramesh said it was difficult for any reasonable person to have faith in the "Pradhan Mantri and his 'system'."

"This 'system' botched up the investigation into the 2024 NEET-UG paper leak. This 'system' continues to deny that the NEET-UG 2026 paper was leaked... This 'system' has not only wrecked the administration of exams in higher education, but has done so in the CBSE as well," the Congress leader said.

CM  
YK

**K. VijayRaghavan**

**F**or the first time in about four billion years of life on the earth, one species is learning not just to read the book of life but to write new versions.

Humans' quest to understand and explain the natural world has always carried a double consequence: every success also enhances our ability to change the world. By understanding how diseases act, we create drugs and vaccines that change the prevalence of infectious agents. The elimination of smallpox is one example. Understanding the basis of some hereditary disorders has meant that dietary management can help those affected to live full lives. Phenylketonuria, a condition in which the body cannot process a common amino acid, phenylalanine, is one such example.

## Verbosity in genes

At the core of our efforts to understand and explain the extraordinary diversity of forms and functions of life lies one molecule: deoxyribonucleic acid, popularly known by its abbreviation, DNA. DNA resides in cells, the unit of construction of our bodies – indeed of any organism – and we humans are made up of trillions of cells.

The DNA in a cell is called its genome. The linear thread of DNA that makes up the genome has an alphabet of four molecules, denoted by the letters 'A', 'T', 'G', and 'C'. A genome can have thousands of genes, and through the specific ordering of these letters, each gene can encode a specific protein. Proteins in their various forms make up, or help manufacture, all that is needed for each cell to perform its unique function.

If we were to look simultaneously at a bacterium, a fruit fly, a mouse, and a human, and think about their varying complexity, we would be tempted to hypothesise that the human has many thousands of times more genes than the fly or the bacterium. After all, we are a far more complex organism than a tiny, unicellular bacterium.

However, the commonly studied bacterium *Escherichia coli* has about 4,300 genes. The fruit fly, about 17,000. The mouse, about 21,000. And the human, about 22,000. There is only a fivefold difference in gene number between a bacterium and a human. The mouse has more protein-coding genes than us, and a water flea, *Daphnia*, has about 31,000 genes, more than either us or the mouse.

Verbosity in genes, as in conversation, is not a measure of complexity. Just as one can convey something complex and information-dense in a short, non-redundant paragraph, it is how, when, how much, and where in the cell gene products are expressed that determines complexity. While genes encode proteins, they also have DNA sequences involved in regulating when, where, and to what extent genes are expressed. These regulatory regions are locations where other specific proteins, called transcription factors bind, to turn genes 'on' and 'off'. These regulatory proteins are themselves encoded by genes.

## Three extraordinary insights

The decreasing cost and increasing speed of DNA sequencing means that we can, today, sequence the genome of any organism we choose. At the start of the Human Genome Project, sequencing a human genome took more than a decade, cost close to \$3 billion, and involved thousands of scientists across about 20 countries. Today this is possible in a few hours, at a cost of a few hundred dollars, in a small laboratory. As our computational capacity also increases, so does our ability to study the genomes we have sequenced. The growing bank of genome sequences across organisms offers three extraordinary insights into all life on the earth.

First, genome sequences taken together give us a history of life on the planet, the relatedness of organisms, and how the tree of life branched in different ways. The exquisite detail that genomes provide complements the fossil record where it is available – but it also tells us the history of life where no fossil record exists. No social history of humans can provide this degree of precision and accuracy over such an extended period.

Second, when we examine genomes in the context of how an organism (bacterium, plant or animal) functions in its environment, we learn how they are adapted. Genes, famously described as selfish, ensure their own propagation by using their host organism's survival as a vehicle for their transmission. By studying

**Life chemistry:** The exquisite detail that genomes provide complements the fossil record where it is available — but it also tells us the history of life where no fossil record exists. No social history of humans can provide this degree of precision and accuracy over such an extended period. RETHA FERGUSON/PEXELS

variations in genes, we learn how mutations are selected as organisms adapt to their environments. Human populations that today carry genes predisposing them to type II diabetes are typically descended from groups that lived in environments where food supply rose and fell cyclically over long intervals. In today's environment of abundant food, this genetic inheritance leads to disease.

Third, just as with DNA sequencing, we are rapidly accumulating detailed information on all aspects of the cellular environment across a variety of organisms – which genes are expressed, where their products are localised, what they do, and so on. When taken together, this detailed ‘cell map’ can give us a picture of all the complexity within a cell in each organism we study. When gathered over the entire life of a cell or organism – and we are far from this stage of data collection – the volume and complexity of data to be analysed is mind-boggling. Yet the tools for storing, analysing, and interrogating such ‘big data’ are also growing.

While scepticism remains, this may therefore not only be a feasible project in theory, but also one in practice. We already see early glimpses of such comprehensive pictures appearing from diverse attempts around the world. From all of this, one can expect a substantial advance in our understanding of how life in all its diversity came about, how organisms are made, and how they work. New hypotheses will be formed and tested, and new fundamental knowledge and applications will appear.

## Never before seen

With this knowledge will come expanded power in synthetic biology. Our understanding of how genes, cells, and environments collaborate to make organisms has already enabled us to

**With access to computing power and memory that AI provides, it is possible to analyse cellular and environmental information and design sections of genomes or entire genomes with the desired properties on our computers**

engineer nature in many ways. But what we can currently do with genetic engineering is modest compared to the potential from new avenues now opening. Engineering cells and organisms not just at the level of one or a few genes, but on a genome-wide scale, is becoming possible. These technologies will become more accurate, less expensive, and more accessible.

With access to computing power and memory that AI provides, it is possible to analyse cellular and environmental information and design sections of genomes or entire genomes, with the desired properties on our computers.

Today, the predictability of what happens when such designs are implemented still remains low: cells and organisms are notorious for resisting simplistic *in silico* predictions. But this too will change, through a combination of analytical and experimental work. Designer cells that make chemicals, drugs, materials, and fuels are already with us but they will become ubiquitous and far broader in their uses than what we see today.

It is not only cells for biotechnological applications that will be created, often making products never before seen in nature. Creating complex new forms of multicellular organisms, plants or animals, is also a real possibility. Replacing the genome of a cell with one designed and manufactured by humans is now feasible for small genomes and will

soon be possible for larger ones.

In 2010, American scientist J. Craig Venter (1946-2026) and his team chemically synthesised a complete bacterial genome and introduced it into a bacterial cell whose native DNA had been removed. This was, at a first approximation, digitally created life. They watermarked their creation by encoding three quotations into non-coding regions of the synthetic DNA – a biological ‘cipher’ in which letters were mapped to codons: James Joyce, from *A Portrait of the Artist as a Young Man*: “To live, to err, to fall, to triumph, to recreate life out of life”; Richard Feynman: “What I cannot build, I do not understand”; and J. Robert Oppenheimer: “See things not as they are, but as they might be.”

While we are currently limited by the speed and cost of genome-wide synthesis, this will change. It will then be possible to create large genomes, introduce them into defined cellular environments we construct, or into fertilised eggs whose own genomes have been removed.

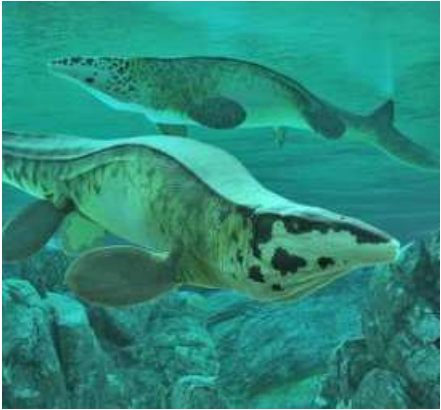

## With great power

Complementing this top-down approach, which draws on billions of years of genomic history to create new forms of life, there is a bottom-up alternative. Pioneered by Jack Szostak and others, this approach aims to synthesise a primordial cell from scratch, modelling what the earliest living systems may have looked like before the first genome was ever written. Mr. Szostak's laboratory at the University of Chicago builds protocells – fatty-acid vesicles that can spontaneously form closed membranes, encapsulate RNA, and, in the right conditions, copy that RNA and divide. The aim is to solve the great mystery of how life first originated from non-living chemistry. In working towards this, we too will develop the power to create new and complex self-replicating biological systems.

All of this raises the 'genie conundrum' that humanity has grappled with across the centuries. Our quest to understand the universe releases the genie from the lamp. Kept inside, the genie is of no use and, more relevant, we leash human thought and creativity. Released but unregulated, we risk creating new and unforeseen problems. Released and used wisely, the applications are many and valuable.

These are challenges that regulators face not only in biology but in other domains too: how does one regulate chemistry or nuclear power, for example? But the engineering of life has a feature that the engineering of a spaceship or a nuclear plant does not: the ability to convert information into a self-replicating product. Here, we must 'see things not as they are, but as they might be'. Both for what must be done, and for what we must refrain from doing.

(K. VijayRaghavan is DAE-Homi Bhabha Chair, TIFR-National Centre for Biological Sciences, Bengaluru. vijay@ncbs.res.in)

A reconstruction of the marine reptile *Tylosaurus rex* in the Cretaceous-era Western Interior Seaway of North America. REUTERS

*Fearsome  
dinosaur-era  
reptile was T.  
rex of the sea*

**Reuters**

**T**yrannosaurus rex was a huge land predator during the twilight of the age of dinosaurs. But it was not the only *T. rex* that terrorised the Cretaceous Period. There also was a marine reptile named *Tylosaurus rex* – the *T. rex* of the sea – that rivalled its land counterpart in size and ferocity.

Scientists say they have identified *Tylosaurus rex* as a distinct species after a wide-ranging examination of previously discovered fossils. They made the judgment based on its enormous size, fine serrations along the edges of its teeth to cut flesh more efficiently, heavy-duty musculature of the jaws and neck for subduing large prey, and certain other anatomical nuances. Roughly 66 million years ago, *Tyrannosaurus rex* roamed the land in Western North America.

**The seagoing T. rex with a streamlined body, elongated snout with large teeth, four large paddle-like flippers, and a powerful tail, rivalling its land counterpart in size and ferocity**

Approximately 80 million years ago, *Tylosaurus rex* prowled an inland sea that at the time split North America in two. The seagoing *T. rex* had a streamlined body, elongated snout with large teeth, four large paddle-like flippers, and a powerful tail. The genus 'Tylosaurus' has been known since fossils were first unearthed during the 19th century. A handful of species are recognised, including *Tylosaurus proriger*. A genus is a grouping of closely related species sharing similar characteristics. For example, lions and tigers are from the same genus but represent different species.

The largest *Tyrannosaurus rex* specimen, nicknamed Sue and held at the Field Museum in Chicago, is about 12.2 m long. The largest *Tylosaurus rex* specimen, nicknamed Bunker and held at the University of Kansas Biodiversity Institute and Natural History Museum, is about 13.2 m long. Bunker previously had been identified as *Tylosaurus proriger*, but possessed the suite of traits that assigned it to *Tylosaurus rex*, the researchers said. “The skull alone is as long as I am tall – 5 foot-7 inches (1.7 m),” said palaeontologist Amelia Zietlow of the History Museum at the Castle in Appleton, Wisconsin, lead author of the study published in the *Bulletin of the American Museum of Natural History*.

*Tylosaurus rex* is a member of a group of marine reptiles with a global distribution called mosasaurs that evolved from land-living lizards to become apex marine predators during the final roughly 30 million years of the age of dinosaurs. Today's monitor lizards, including the Komodo dragon – the largest present-day lizard at up to 3 m long – are perhaps among the closest living relatives of *Tylosaurus rex*. Most of the fossils identified as *Tylosaurus rex* come from north and central Texas, though Bunker came from Kansas. The holotype specimen – the fossil used to formally name a species – is at the Perot Museum.

The new species name, meaning “king of the tylosaurs,” was a nod to *Tyrannosaurus rex* – “an incredible animal itself, obviously,” Ms. Zietlow said. The two *T. rexes* were not contemporaries, though forerunners of the giant dinosaur lived at the same time as the giant mosasaur. *Tylosaurus rex* was among the largest of the mosasaurs, alongside the likes of *Mosasaurus hoffmanni*.

## NEWS IN NUMBERS

### Percentage increase in Gross GST collections in May

**3.2** in per cent. Gross GST collections rose to over ₹1.94 lakh crore in May on higher supplies of goods and services, and collection from imports, government data showed. Gross GST collection was ₹1.88 lakh crore in May 2025. GST refunds grew 2.6% to ₹27,281 crore. After adjusting refunds, net GST revenues in May rose 3.3% to about ₹1.67 lakh crore. PTI

### Value of loans sanctioned to MSMEs under ECLGS

**35,000** in ₹ crore. Banks have sanctioned ₹35,000 crore loans under the Emergency Credit Line Guarantee Scheme (ECLGS) to MSMEs and industries impacted by the West Asia conflict. The scheme aimed at providing additional credit flow of ₹2.55 lakh crore for airlines hit by the ongoing geopolitical crisis. PTI

### Value of India's seafood exports in 2025-26

**8.46** in \$ billion. India's seafood exports hit a record high in both volume and value during 2025-26, reaching 19,72,018 metric tonnes worth ₹73,890.46 crore (\$8.46 billion), despite global challenges, MPEDA Chairman P Jawahar said on Monday. The U.S. and China remained the top importers of Indian seafood during the fiscal year. PTI

### Number of drones fired by Russia at Ukraine in May

**8,150** Russia fired a record number of long-range drones at Ukraine in May, an analysis of Ukrainian air force data showed on Monday, as Kyiv appealed to allies for air defence support. Russia launched 8,150 long-range drones and more than 200 missiles during the month, beating the previous record set one month earlier. AFP

### Cases of Ebola reported in Congo's ongoing outbreak

**282** At least 282 confirmed cases of Ebola have now been reported in Congo's ongoing outbreak, the central African nation said late on Sunday. The outbreak remains focused in Congo's eastern Ituri province, where 264 of the cases have been recorded, Congo's Ministry of Health said. PTI

# Why do cities get polluted in summer?

How is summer air pollution different from that in winter? Why does ozone rise in hot weather? What drives PM10 spikes in Indian cities?  
How do dust storms affect air quality? How do human activities worsen summer air pollution? What can cities do to combat summer air pollution?

## EXPLAINER

**Mohammad Rafiuddin**  
**Sneha Maria Ignatious**

### The story so far:

In March, the Commission for Air Quality Management in the National Capital Region and Adjoining Areas (CAQM) revoked all curbs under the Graded Response Action Plan (GRAP), signalling the end of the winter air pollution in Delhi. A month later, as temperatures rose, it reimposed Stage 1 of the GRAP to combat summer air pollution. It was briefly revoked and reimposed again in May, while North India was reeling under heatwaves.

**Why are cities witnessing pollution episodes during summer?**  
Delhi and the Indo-Gangetic plain are known for winter smog because low temperatures, low wind speeds, and their basin-like topography trap pollutants close to the ground.

Summer brings stronger winds, occasional thunderstorms that wash out pollutants, and warmer temperatures that allow pollutants to mix higher in the atmosphere. Despite such meteorological favours, Delhi has already witnessed 54 days between 1 April and 31 May 2026 where daily average PM10 levels exceeded the 24-hour National Ambient Air Quality Standard (NAAQS) of 100 ug/m3. At the same time, on 40 days, at least one Continuous Ambient Air Quality Monitoring Station (CAAQMS) in the city recorded a breach in the hourly ozone standard of 180 ug/m3. Unlike most headlines, this is not the story of Delhi alone. Other large cities like Mumbai, Chennai, Hyderabad, Bengaluru, and Kolkata also recorded pollution spikes in the same period this summer, with PM10 and ozone levels going above the national standards to varying degrees. These spikes were shaped by local sources such as vehicular emissions, road dust, construction activity, industrial emissions, and dust from local storms. Mumbai, for instance, has been recording high PM10 and ozone levels over the last few years due to construction activity, dust, and traffic. While Chennai's PM10 breaches are occasional, its high vehicular density and hot weather also make it an ozone hotspot.

**How is summer air pollution different from that in winter?**  
While winter pollution is dominated by finer PM2.5 particles, summer air pollution is driven by the coarser PM10 and ozone.

Vehicles, industries, waste burning, agricultural residue burning, construction sites, and broken roads remain year-round sources of pollution. Winter adds biomass burning for heating. Summer brings in dust storms that hike PM10 levels, while heat and sunlight catalyse ozone formation.

**Why does ozone rise in hot weather?**  
Ozone is not emitted directly from a tailpipe or chimney. It forms when nitrogen oxides (NOx), largely from vehicles and volatile organic compounds (VOCs) from industrial emissions, vehicle exhaust, paints, and other sources, react under strong sunlight. Hotter, sunnier days therefore create favourable conditions for ozone formation, which, along with particulate matter, could cause respiratory illnesses.

Summer brings in dust storms that hike PM10 levels, while heat and sunlight catalyse ozone formation. PTI

## THE GIST

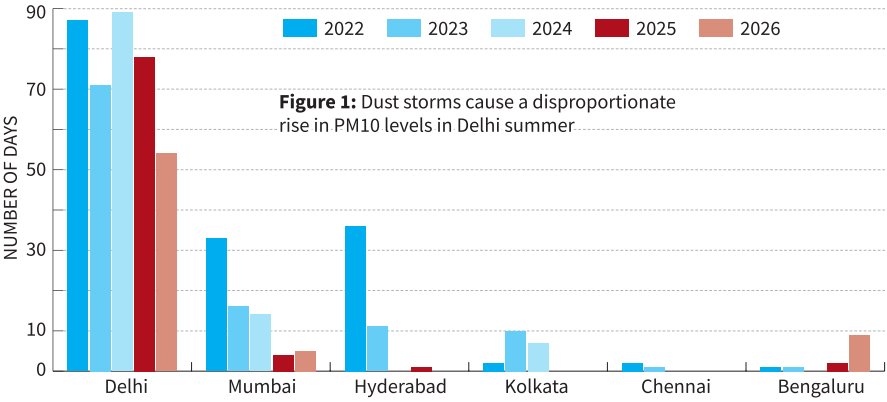

Summer air pollution is driven largely by PM10 and ozone, with several Indian cities recording repeated breaches of national standards.

Dust storms, construction activity, road dust, vehicular emissions and industrial pollution contribute to pollution episodes during the hotter months.

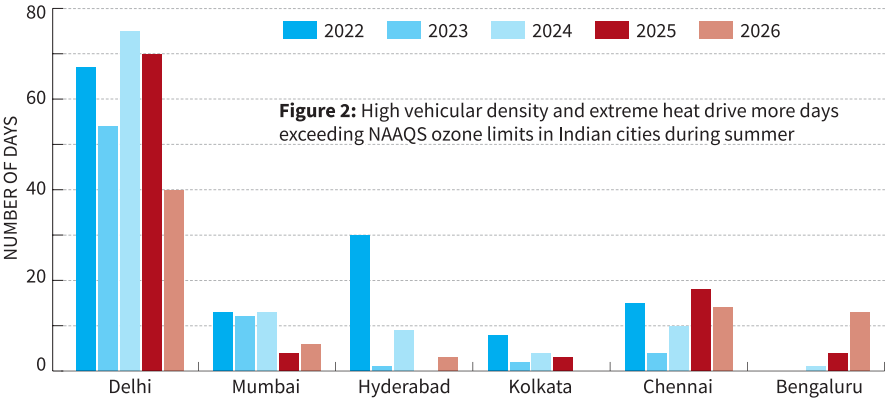

Heat and strong sunlight promote ozone formation, underlining the need for year-round air quality management rather than a focus on winter smog alone

## The summer burden

Dust, heat, and urban emissions continue to drive pollution episodes across Indian cities even during summer

**Figure 1:** Dust storms cause a disproportionate rise in PM10 levels in Delhi summer

**Figure 2:** High vehicular density and extreme heat drive more days exceeding NAAQS ozone limits in Indian cities during summer

**Note:** The data for 2026 is from 1 April to 31 May 2026. For other years, the data is from 1 April to 30 June.

**What causes India's PM10 to spike?**  
Hot conditions over the Indian subcontinent create a low-pressure area that extends towards Iran. Its interaction with surrounding high-pressure areas produces hot, windy conditions. These winds could stir up dust storms, including hot winds called loo, which carry dust from West Asia and the Thar Desert across India towards the Bay of Bengal. Such episodes could elevate PM10 levels for days, as seen during the severe North Indian dust storms of 2018.

The Indian subcontinent also experiences shorter, localised dust storms known as 'andhi' that usually subside within hours. These form when strong downward-moving air associated with thunderstorms hits the ground, lifts loose dust, and carries it at high speed. While loo-type dust storms are common in

North India, cities like Mumbai and Hyderabad generally face dusty episodes due to local thunderstorms.

Human activity worsens this natural dust load. Construction and demolition work often resumes after the more stringent winter GRAP restrictions are lifted. Without adequate site-level dust control, these activities add to PM10 levels. Vehicles moving over broken roads also further resuspend loose, dry dust into the air in the dry summer months.

### What can cities do to combat summer air pollution?

While natural sources of dust cannot be controlled, they can be predicted. Delhi's Air Quality Early Warning System (AQEWS) was created in response to severe dust storms in 2018 and smog episodes of the previous years, and now

runs year-round. It has since been extended to other cities such as Jaipur and Mumbai, and provides forecasts of multiple pollutants several days in advance. Its bulletin provides detailed weather information for Delhi and three-day Air Quality Index forecasts for 140 Indian cities.

The India Meteorological Department (IMD) also publishes national weather forecast bulletins several times a day. Authorities should use these systems to issue local alerts on dust storms, ozone, and poor air quality so citizens can reduce exposure.

For controllable non-natural sources, enforcement matters. Construction sites need active dust management even outside winter.

A study by the Council on Energy, Environment and Water (CEEW) found that simply reducing heavy-vehicle movement at construction sites can lower local particulate matter levels. The Brihanmumbai Municipal Corporation (BMC)'s Air Quality Decision Support System (AQDSS), also developed with CEEW, for example, assists in monitoring construction sites. It has already helped authorities take measures against more than 1,000 sites since October 2025 in Mumbai.

Reducing ozone requires cutting NOx and VOC emissions from vehicles and industries through cleaner transport, better compliance, and attention to solvents, paints, and fuel combustion. Even simple behavioural measures, like the 'Red Light On, Gaadi Off' campaign of the Delhi government that urges drivers to switch vehicles off while waiting at junctions to reduce idling emissions, can reduce ozone formation. But Indian cities need more sustained action.

Delhi has had a summer action plan since 2022. Other cities need similar plans that combine forecasting, public health advisories, construction dust control, road dust management, and action on ozone-forming emissions. Summer may disperse some pollutants better than winter, but heat and sunlight create their own pollution chemistry. Indian cities must plan for both seasons, treating them with equal seriousness. Red emerges from a vast global system of dyes made from insects raised in the Americas, plants cultivated in Asia, and shellfish harvested along Mediterranean coasts; it moves through empires, trade networks, and factories, shifting from living organisms to laboratory production

In the Mediterranean world, the most famous red-purple dye was extracted from marine snails harvested along Levantine shores. Classical writers such as Pliny the Elder describe vats of crushed shells fermenting under the sun, releasing a colour so rare that Roman law eventually reserved it for imperial robes. The value of the dye lay not merely in its hue but in the difficulty of its production: thousands of mollusks sacrificed to colour a single garment. In the Americas,

Military power depended on these

Yet even as imperial armies marched in crimson, the foundations of the dye trade were beginning to shift. For centuries, every brilliant red had depended on living organisms, whether it was roots pulled from soil, or insects harvested from cacti, or shellfish gathered along rocky coasts. In 1856, the English chemist William Henry Perkin inadvertently altered this relationship. While attempting to synthesise quinine in an experiment, he produced a purple residue that dyed silk with remarkable intensity. The compound, later marketed as mauveine, inaugurated the modern synthetic dye

The colour remained the same to the eye, but the world that produced it, and the world that would perceive red as a phenomenon, had both fundamentally changed.

I don't think there is a difference in meaning between the two. An umpire and a referee are expected to make sure that the players follow the rules of the game and penalise them if they don't. The word referee is normally associated with wrestling, basketball, billiards, boxing, football, hockey, and rugby. Umpire, on the other hand, is associated with cricket, baseball, tennis, table tennis, and volleyball. By the way, in the word "referee", the stress is on the final syllable.

The expression is used to mean “to clean up a mess”. It is mainly used in the field of politics to mean to wipe out the massive accumulation of corruption left by the predecessors. Another common expression used these days is “to clean house”.

You normally find this word at the end of newspaper articles. Reuters is an international news agency started by Baron de Paul Julius Reuter.
